BUQU 1230	Business Statistics	
CRIM 2103	Quantitative Data Analysis I	
MATH 1115	Statistics I	
MATH 2341	Introduction to Statistics for Business	
PSYC 2300	Applied Statistics	
SOCI 2365	Introduction to Social Research Statistics	

**Breadth Electives**

Select four breadth electives from courses numbered 1100 or higher in any area of study except ACCT, BUSI, ENTR, HRMT or MRKT. 12

**General Electives**

Select two electives from courses numbered 1100 or higher in any area of study. 6

Total Credits 120-124

<sup>1</sup> Students who choose Group B may count the additional ACCT course as a general elective.

## Credential Awarded

Upon successful completion of this program, students are eligible to receive a **Bachelor of Business Administration in Accounting**.

## Co-op Requirements Co-operative Education

The BBA in Accounting degree is offered with a Co-operative Education option. Co-operative Education gives a student the opportunity to apply the skills gained during academic study in paid, practical work experience semesters. Degree students can complete a minimum of three work terms while completing their degree. Work terms generally occur full-time in separate 4 month work semesters but may also be available part-time over an 8 month continuous (parallel) placement. Work semesters alternate with academic study.

Students wishing to enter and participate in the Co-op Option must meet the following requirements:

### Declaration and Entrance Requirements

- Successful completion of 15 credits
- Declaration of Co-op specialization into the Bachelor of Business Administration in Accounting Program
- Minimum GPA of 2.7

### Work Term and Program Continuance Requirements

Procedures for enrollment in Co-operative Education work terms are outlined in the COOP course descriptions. Conditions for continuance in the program are:

- Successful completion of COOP 1101 prior to completing 75 credits
- Minimum GPA of 2.7
- Successful completion of 45 credits
- Instructor Permission

## Co-op Course Requirements

The Co-operative Education designation requires successful completion of the following courses:

Code	Title	Credits
COOP 1101	Job Search Techniques	1
COOP 1150	Co-op Work Semester 1	9
COOP 2150	Co-op Work Semester 2	9
COOP 3150	Co-op Work Semester 3	9
Optional:		
COOP 4150	Co-op Work Semester 4	
Total Credits		28

Note: These COOP courses must be completed sequentially. COOP 1150, COOP 2150, COOP 3150, or COOP 4150 may be taken part-time over two consecutive semesters as COOP 1150A/COOP 1150B, COOP 2150A/COOP 2150B, COOP 3150A/COOP 3150B or COOP 4150A/COOP 4150B. Co-op courses may be used only to satisfy the Co-op designation and cannot be used to satisfy other curricular requirements of the program.

## Additional Requirements

In addition to the requirements stated above, all Co-op students must satisfy the General Co-operative Education Requirements (p. 31).

## Credential Awarded

Upon successful completion of this program with co-operative education, students are eligible to receive a **Bachelor of Business Administration in Accounting, Co-operative Education Option**.

# Diploma in Accounting

Undergraduate

### Credential Granted:

Diploma

### Start Date:

Fall (September)

Spring (January)

Summer (May)

### Intake Type:

- Open

### Minimum Credits Required:

60

## Curriculum Effective Date:

01-Sep-2015

## Description

The Accounting Diploma program prepares graduates for entry-level accounting positions in the work force or to continue their studies at KPU in the Bachelor of Business Administration (BBA) in Accounting.

The Diploma program includes courses in financial accounting, management accounting, finance, taxation and auditing. Graduates will also take courses in economics, business math, business statistics, Simply Accounting, information management, English and communications. The Accounting Diploma is carefully aligned with the requirements of the CPA accounting designation.

## Requirements

### Admission Requirements

Students pursuing a Diploma in Accounting must be admitted to the School of Business (p. 405).

### Declaration Requirements

Students intending to graduate with this School of Business diploma must declare the credential. At the time of declaration, the student must satisfy all of the following requirements:

- In good academic standing with the University
- Completion of a minimum of 15 credits of undergraduate coursework.

## Curricular Requirements

Students must complete a minimum of 60 credits that include the following:

Code	Title	Credits
<b>Business Foundation Courses</b>		
BUSI 1215	Organizational Behaviour	3
BUSI 2390	Business Law	3
BUSI 2405	Operations Management	3
BUSI 2425	Enterprise Development and Business Planning	3
MRKT 1199	Introduction to Marketing	3
Select one of the following groups:		3-6
Group A		
ACCT 2293	Intro To Financial Accounting	
Group B <sup>1</sup>		
ACCT 1110	Introductory Financial Accounting I	
ACCT 1210	Introductory Financial Accounting II	
<b>Accounting Courses</b>		
ACCT 2235	Introductory Taxation	3
ACCT 3320	Cost and Management Accounting I	3
ACCT 3335	Taxation	3
ACCT 3380	Managerial Finance	3
ACCT 3444	Auditing	3
Select one of the following groups:		6
Group A		
ACCT 3310	Intermediate Financial Accounting I	
ACCT 3410	Intermediate Accounting II	

## Group B

ACCT 3510	Intermediate Financial Accounting I & II	
<b>Breadth Education Courses</b>		
CBSY 2306	Accounting Systems and Advanced Reporting Applications	3
CMNS 1140	Introduction to Professional Communication	3
ECON 1150	Principles of Microeconomics	3
ENGL 1100	Introduction to University Writing	3
Select one of the following:		3
BUQU 1130	Business Mathematics	
MATH 1120	Differential Calculus	
MATH 1130	Calculus for Life Sciences I	
MATH 1140	Calculus I (Business Applications)	
Select one of the following:		3
BUQU 1230	Business Statistics	
CRIM 2103	Quantitative Data Analysis I	
MATH 1115	Statistics I	
MATH 2341	Introduction to Statistics for Business	
PSYC 2300	Applied Statistics	
SOCI 2365	Introduction to Social Research Statistics	
Select one elective from Courses numbered 1100 or higher in any area of study except ACCT, BUSI, ENTR, HRMT or MRKT. <sup>2</sup>		3
Total Credits		60-63

<sup>1</sup> Students who choose Group B may require more than 60 credits to graduate.

<sup>2</sup> Note that ECON 1250 is recommended for students who intend to proceed into any KPU BBA program.

## Credential Awarded

Upon successful completion of this program, students are eligible to receive a **Diploma in Accounting**.

## Description

The Accounting Certificate program prepares graduates for entry-level bookkeeping and accounting positions in the work force, or to pursue an Accounting Diploma.

The Certificate program includes an intense concentration of introductory and intermediate courses in financial and management accounting, one course in math, one course in finance, and two courses in tax. The Accounting Certificate is carefully aligned with the requirements of the Bachelor of Business Administration in Accounting (BBA), Accounting Diploma and the CPA accounting designations.

Introductory financial accounting is a prerequisite for other required accounting courses making it necessary to study for at least three semesters to earn all required credits for an Accounting Certificate.

## Requirements

### Admission Requirements

The Faculty's Admission Requirements, which consist of KPU's undergraduate English Proficiency Requirement (p. 13), apply to this program.

### Curricular Requirements

Students must complete 30 credits that include:

Code	Title	Credits
Select one of the following groups:		
Group A		
ACCT 1110	Introductory Financial Accounting I	
ACCT 1210	Introductory Financial Accounting II	
Group B		
ACCT 2293	Intro To Financial Accounting <sup>1</sup>	
ACCT 2235	Introductory Taxation	3
ACCT 3310	Intermediate Financial Accounting I <sup>2</sup>	3
ACCT 3320	Cost and Management Accounting I	3
ACCT 3380	Managerial Finance	3
ACCT 3410	Intermediate Accounting II <sup>2</sup>	3
CBSY 2306	Accounting Systems and Advanced Reporting Applications	3
CMNS 1140	Introduction to Professional Communication	3
Select one of the following:		
BUQU 1130	Business Mathematics	
MATH 1120	Differential Calculus	
MATH 1130	Calculus for Life Sciences I	
MATH 1140	Calculus I (Business Applications)	
Total Credits		27-30

- <sup>1</sup> Students may earn a maximum of 6 credits from ACCT 1110, ACCT 1210 and ACCT 2293. Students that complete only ACCT 2293 must complete one elective course for 3 credits.
- <sup>2</sup> ACCT 3510, Intermediate Financial Accounting I & II (6 credits), may be completed instead of ACCT 3310 and ACCT 3410.

## Credential Awarded

Upon successful completion of this program, students are eligible to receive a **Certificate in Accounting**.

## Business Administration

The two-year diploma in Business Administration will provide graduates with foundational business and professional skills, a solid grounding in economics, and a foundation in calculus appropriate for advanced studies and/or research in economics, finance and operations. The program is designed to give graduates a developed portfolio of job-ready skills and a wide range of business principles and concepts to expand the graduate's career options.

Some courses may be applicable for credit toward the following KPU Business Degrees:

- Bachelor of Business Administration (BBA) in Accounting (p. 412)
- Bachelor of Business Administration (BBA) in Entrepreneurial Leadership (p. 439)
- Bachelor of Business Administration (BBA) in Human Resources Management (p. 452)
- Bachelor of Business Administration (BBA) in Marketing Management (p. 470)

Many of the courses included in this program are articulated with other universities and colleges for ease of course transferability to and from KPU. Please refer to the BC Transfer Guide at [www.bctransferguide.ca](http://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) regarding the transferability of courses to and from specific institutions in British Columbia. It should be noted that the completion of a KPU diploma does not guarantee admission to other institutions.

Please visit [kpu.ca/business](http://kpu.ca/business) (<https://www.kpu.ca/business/>) for more information on School of Business programs.

## Career Opportunities

The Diploma program focuses on skills and knowledge needed for employment in a variety of careers in commercial industries (business analysis, economic analysis, sales, marketing, customer service, operations), financial services, and retailing companies; unions and crown corporations; and in the municipal, provincial and federal governments

Depending on students' capabilities and interests, graduates will have the skills to develop their own business upon graduation.

The Business Administration Diploma also provides a solid foundation for advanced study in disciplines such as economics, accounting, finance, operations or business.

## Programs

- Diploma in Business Administration (p. 418)

## Courses

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](http://bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

### BUSI 1101 3 credits Canadian Business Education Foundations

This course provides International students and those new to Canadian education with a greater understanding of expectations in a Canadian business environment, while developing the foundational skills, strategies and communication techniques essential for success in business education in Canada. Students will be introduced to the political, economic, legal, cultural and social landscape that influences Canadian business and will explore a broad range of business concepts in the Canadian context; paying particular attention to BC's business environment. Students will also get an overview of the business communication and academic skills that are required in Canadian business education.

Level: UG

Co-requisite(s): CMNS 1101

Attributes: ASTR (p. 523), BUSI (p. 521), PW\_3 (p. 522)

### BUSI 1110 3 credits Fundamentals of Business in Canada

Students will study and apply a broad range of business concepts in a Canadian context. They will learn the basic roles and responsibilities of managers in the major functional areas of business including human resources, industrial relations, information systems, operations, marketing, accounting and finance. Students will also get an overview of economic systems, forms of business ownership, general management principles, Canadian business law and ethics.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521), PW\_2 (p. 522)

### BUSI 1205 3 credits Supervisory Skills

This course is designed for students in programs other than business management. It is primarily intended for students in the Horticulture Technology program, but it may also be of interest to students in other disciplines who are preparing for supervisory positions in various fields. The role of supervisor is presented within the framework of the four functions of management: planning, organizing, leading and controlling. Students will be introduced to contemporary supervision techniques, participative leadership and team concepts which can be applied at the supervisory level.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521)

### BUSI 1209 3 credits Business Management in Horticulture

Students in Horticulture will learn the basic concepts of business management needed to be successful in the industry, including: budgeting, cash flow management, working with financial statements, basic banking procedures and dealing with financial institutions. The students also learn basic record keeping and inventory management. Key government regulation affecting horticulture businesses and management of risk in British Columbia will also be covered.

Level: UG

Attribute: BUSI (p. 521)

**BUSI 1210 3 credits****Essentials of Management**

Students will learn the principles of management through an in-depth examination of the universal functions of management: planning, organizing, leading and controlling. They will explore the role of managers as decision makers responsible for achieving the strategic goals and objectives of organizations. Students will study contemporary management practices, concepts and issues including key contingency models, strategic analysis tools, quality control techniques and perspectives on managerial ethics.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521)

**BUSI 1215 3 credits****Organizational Behaviour**

Students will learn how the behaviour of individuals and groups in work environments affect organizational performance. Topics will include individual attributes, motivation theories and strategies, group dynamics, teamwork, organizational structure, job design, leadership, organizational culture and politics, communication, conflict, stress and change management. Special emphasis is placed on diversity, cross-cultural issues and ethical conduct in organizations.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521)

**BUSI 1250 3 credits****Human Resources Management I**

Students will learn a strategic approach to human resources management, with special emphasis on current management practices relating to equity, diversity and employee rights. They will study and practise techniques and procedures such as HRM planning, recruiting, selection, employee relations, labour relations, performance management, compensation, training and development, health and safety and international HRM.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521)

**BUSI 2110 3 credits****Values, rationality, and power: Developing wise organizational action**

Students will learn the inner political nature of organizations and begin developing skills to become wise agents of action. This course will focus on three elements required to get things done in an organization: values, rationality, and power. Students will learn how these attributes impact people's ability to achieve goals and how, though they may lead to conflict, they are the means to build supportive alliances. This course will teach actionable strategies students may apply to manage these political dynamics to drive wise organizational action.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher, including ENGL 1100

Attributes: ASTR (p. 523), BUSI (p. 521)

**BUSI 2360 3 credits****Union Management Relations**

This is a survey of the Canadian labour scene: the historical evolution of Canadian Unionism; the impact of trade unions on industry and commerce; union objectives; employer organizations and labour unions as institutions; existing labour legislation and trends; labour-management relations; mediation and arbitration. The course is largely directed to current events, particularly in B.C.

Level: UG

Prerequisite(s): Second year standing including BUSI 1210 and/or BUSI 1215

Attributes: ASTR (p. 523), BUSI (p. 521)

**BUSI 2390 3 credits****Business Law**

Students will learn about the basic operations of the Canadian Legal system, the civil litigation process, and various aspects of substantive law which relate to, and have application in, Business and Commerce, including Torts, Contracts, Forms of Business Organizations, Consumer Law, Property, Employment, etc. Students will also understand how contracts are formed, enforced, and the remedies possible if contracts are breached. As well, students will develop a familiarization with some of the more important provincial and federal statutes that apply to the business environment. Students will apply basic legal principles and concepts to problems which may arise in the business world.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521)

**BUSI 2405 3 credits****Operations Management**

Students will learn and practise the fundamental design and implementation tools and techniques used in Operations Management (OM). They will be exposed to leading practices employed by entrepreneurs and managers in organizations of all sizes, both in manufacturing and service industries, particularly in small and medium-sized enterprises. Students will apply the theoretical qualitative and quantitative approaches to solve practical problems through exercises, case analyses, and a group term project involving work with real-world or simulated organizations.

Level: UG

Prerequisite(s): All of (a) ACCT 1210 or ACCT 2293 (b) BUSI 1210 or BUSI 1215 (c) ECON 1150 (d) MRKT 1199 and (e) BUQU 1230 or MATH 1115 or MATH 2341 or CRIM 2103 or PSYC 2300 or SOCI 2365

Attributes: ASTR (p. 523), BUSI (p. 521), QUAN (p. 532)

**BUSI 2425 3 credits****Enterprise Development and Business Planning**

Students utilize their knowledge of business principles to develop business plans, form companies, and actively manage their companies via a computer simulation. Students will apply several key concepts relating to the major functional areas of a business and will make realistic management decisions in a simulated competitive environment.

Level: UG

Prerequisite(s): 24 credit hours of 1100-level or higher including (ACCT 2293 or ACCT 1210), CMNS 1140, ECON 1150 and MRKT 1199

Co-requisite(s): BUSI 2405

Attributes: ASTR (p. 523), BUSI (p. 521)

**BUSI 2465 3 credits****Business Negotiations**

Students will learn negotiation techniques that may be used to achieve a variety of business objectives. They will experience the negotiation process and apply the principles of distributive and integrative bargaining through a spectrum of role-plays and simulations, with special emphasis on the importance of developing pre-negotiation plans and establishing benchmarks.

Level: UG

Prerequisite(s): BUSI 1210 or BUSI 1215

Attributes: ASTR (p. 523), BUSI (p. 521)

**BUSI 2490 3 credits****International Business**

Students will study modern strategic approaches and implementation activities used in the creation and operation of successful international businesses. They will develop specific managerial skills in order to deal effectively with international business matters from the techniques of international business transactions to the challenges of globalization, including the roles of culture, political economy, and technology. Students will be exposed to leading practices employed by entrepreneurs and managers and will apply the theories and concepts to solve problems through exercises, case analyses, and a term project involving direct or simulated work with real-world organizations. This course is designed for students who already possess a basic understanding of business fundamentals.

Level: UG

Prerequisite(s): 15 credits at 1100-level courses or higher including at least one of BUSI 1210 or 1215. Note: ECON 1250 is recommended.

Attributes: ASTR (p. 523), BUSI (p. 521)

**BUSI 2500 6 credits****Food Systems Field School**

The study of agriculture-business and food systems facilitates transdisciplinary learning and research that is intimately linked to the understanding of sustainability and the cultures that they are embedded in. This Field School will provide opportunities for students to implement problem solving and critical thinking methodologies to help students develop an understanding of the important role that agriculture and food systems play in connecting all aspects of the economy, business, environment and society as well as the value of regional food systems. Students will visit farms and food related businesses locally, nationally and/or internationally. When studying food systems, students will compare and contrast financing, marketing, pricing and logistics of food production. NOTE: Students will spend two weeks at the Field School site in addition to class sessions on campus before and after travel. Students must be nineteen years or older at the start of the course. Students may earn credit for only one of DESN 2500, AGRI 2500 or BUSI 2500 as they are identical courses. Note: Additional fees will apply to meet field trip expenses.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher.

Cross-listing: DESN 2500

Attribute: BUSI (p. 521)

## Description

The two-year diploma in Business Administration will provide graduates with foundational business and professional skills, a solid grounding in economics, and a foundation in calculus appropriate for advanced studies and/or research in economics, finance and operations. The program is designed to give graduates a developed portfolio of job-ready skills and a wide range of business principles and concepts to expand the graduate's career options.

## Requirements

### Admission Requirements

The Faculty's Admission Requirements, which consist of KPU's undergraduate English Proficiency Requirement (p. 13), apply to this program.

### Declaration Requirements

Students intending to graduate with this School of Business diploma must declare the credential. At the time of declaration, the student must satisfy all of the following requirements:

- In good academic standing with the University
- Completion of a minimum of 15 credits of undergraduate coursework.

## Curricular Requirements

Students must complete a minimum of 60 credits that include the following:

Code	Title	Credits
<b>Business Foundation Courses</b>		
BUSI 1215	Organizational Behaviour	3
BUSI 2390	Business Law	3
BUSI 2405	Operations Management	3
BUSI 2425	Enterprise Development and Business Planning	3
MRKT 1199	Introduction to Marketing	3
Select one of the following groups:		3-6
Group A		
ACCT 2293	Intro To Financial Accounting	
Group B <sup>1</sup>		
ACCT 1110	Introductory Financial Accounting I	
ACCT 1210	Introductory Financial Accounting II	
Select one of the following:		3

BUQU 1230	Business Statistics	
CRIM 2103	Quantitative Data Analysis I	
MATH 1115	Statistics I	
MATH 2341	Introduction to Statistics for Business	
PSYC 2300	Applied Statistics	
SOCI 2365	Introduction to Social Research Statistics	
Select two breadth electives from Courses numbered 1100 or higher in any area of study except ACCT, BUSI, ENTR, HRMT, or MRKT.		6
Select one General Elective from Courses numbered 1100 or higher in any area of study.		3
<b>Total Credits</b>		<b>60-64</b>

<sup>1</sup> Students who choose Group B may allocate the 3 credits earned from ACCT 1210 to the general elective credit requirement, and they should be aware that these 6 credits might only transfer as 3 credits. Students wishing to transfer should consult the BC Transfer Guide. (<http://www.bctransferguide.ca>)

<sup>2</sup> Students wishing to transfer should take ACCT 3320 or consult the BC Transfer Guide (<http://www.bctransferguide.ca>) to determine which course to complete.

<sup>3</sup> Students wishing to enrol in a KPU BBA in Accounting should take ACCT 3320.

<sup>4</sup> Students wishing to enrol in a KPU BBA in ENTR, HRMT or MRKT should take one of BUQU 3230 or FNSR 3350. FNSR 3350 is recommended for students pursuing a career in the financial industry.

<sup>5</sup> MATH 1140 may be replaced with MATH 1120 or MATH 1130, though MATH 1140 is strongly recommended. Students wishing to transfer should consult the BC Transfer Guide. (<http://www.bctransferguide.ca>)

## Credential Awarded

Upon successful completion of this program, students are eligible to receive a **Diploma in Business Administration**.

## Business Management

Business Management program courses prepare graduates for entry-level management positions. The program's foundation courses provide an understanding of the basic skills and techniques required to be effective in today's business environment. Graduates will take specialized courses in management essentials, human resources management, business law, negotiations, operations management, enterprise development, business planning and international business. Both the Diploma and Certificate programs emphasize real world business applications of key management concepts.

Classes are exciting, practical and participatory. They may include a combination of lectures, exercises, case studies, in-class assignments, projects, student presentations, group work, role-play, structured simulations, field trips and guest speakers. Many classes are offered during evenings to accommodate part-time studies.

Some courses in the Diploma and Certificate programs may be applicable for credit toward the following KPU Business Degrees:

- Bachelor of Business Administration (BBA) in Accounting (p. 412)
- Bachelor of Business Administration (BBA) in Entrepreneurial Leadership (p. 439)
- Bachelor of Business Administration (BBA) in Human Resources Management (p. 452)
- Bachelor of Business Administration (BBA) in Marketing Management (p. 470)

Many of the courses are articulated with other universities and colleges for ease of course transferability to and from KPU. Please refer to the BC Transfer Guide at <http://www.bctransferguide.ca> (<http://www.bctransferguide.ca/>) regarding the transferability of courses to and from specific institutions in British Columbia.

Please visit [kpu.ca/business](http://kpu.ca/business) (<https://www.kpu.ca/business/>) for more information on School of Business programs.

## Career Opportunities

Graduates find employment in entry-level management positions in both the private and public sectors, including manufacturing, service, profit, and non-profit organizations. Some graduates become entrepreneurs and start their own businesses.

## Programs

- Diploma in Business Management (p. 421)

## Courses

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](http://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**BUSM 5100 3 credits****Accounting and Financial Management for Managers**

Students will learn to interpret and analyze financial information that managers use for planning operations, controlling activities, and making decisions. They will learn to read financial statements and extract basic information for analysis. Students will explain cost behaviour and apply introductory management accounting techniques such as break-even and cost-volume-profit analysis, identifying relevant costs for decision making, cash flow budgeting, and activity-based costing. Students will be introduced to corporate finance and assess sources of funding to operate a business in terms of borrowing funds or securing equity investment and making long-term capital budgeting decisions. Students will examine business cases and communicate quantitative and qualitative analysis in written reports and oral presentations. Note: This course may be offered in compressed mode. Consult the current timetable.

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

**BUSM 5110 3 credits****Managing Dynamic Teams**

This course will cover the skills needed to build, lead and motivate high-performance teams as a leader. It is intended to provide students with both a conceptual understanding, as well as experiential learning opportunities in initial stages of team construction and development, examining issues of power and control in team functioning, facilitating team problem solving and decision making, evaluating team performance and individual contributions, and providing feedback on team behaviour. Working on virtual teams is an emerging challenge for many leaders and methods for working in these environments will be examined. Note: This course may be offered in compressed mode. Consult the current timetable.

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

**BUSM 5120 3 credits****Project Management**

Students will learn the key project management concepts, tools and techniques through which projects are selected, planned, executed, monitored and controlled, and brought to a close. They will explore and practice competencies in the nine key project management areas: scope, time, cost, quality, human resources, risk, procurement, communication, and integration management. Note: This course may be offered in compressed mode. Consult the current timetable.

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

**BUSM 5130 3 credits****Quantitative Methods for Business Management**

This course will provide the foundation and experience for students to apply a variety of modeling approaches to management problems and decision making in a variety of business functions, e.g., marketing, operations management, finance, accounting, long term strategy and managerial economics. Practical experience in statistics will be provided, and on completion students will be able to critically assess statistical analysis undertaken in their workplace.

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

**BUSM 5140 3 credits****Negotiations and Stakeholder Communications**

This course will help students become more effective communicators and decision-makers by learning proven techniques for building and maintaining relationships, applying appropriate power and influence, structuring agreements, and developing stakeholder buy-in in a variety of negotiation scenarios. Students will examine core decision-making challenges and apply strategies and techniques to effectively engage colleagues, staff, partners, customers, and clients in collaborative negotiations.

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

**BUSM 6100 4 credits****Accounting and Financial Management for Managers**

Students will learn to interpret and analyze financial information that managers use for planning operations, controlling activities, and making decisions. They will learn to read financial statements and extract basic information for analysis. Students will explain cost behaviour and apply introductory management accounting techniques such as break-even and cost-volume profit analysis, identifying relevant costs for decision making, cash flow budgeting, and activity based costing. Students will be introduced to corporate finance and assess sources of funding to operate a business in terms of borrowing funds or securing equity investment and making long term capital budgeting decisions. Students will examine business cases and communicate quantitative and qualitative analysis in written reports and oral presentations. Note: This course may be offered in compressed mode. Consult the current timetable.

Level: GR

Attributes: BUSI (p. 521), F2A9 (p. 521)

**BUSM 6110 3 credits****Project Management**

Students will learn the key project management concepts, tools and techniques through which projects are selected, planned, executed, monitored and controlled, and brought to a close. They will explore and practice competencies in the nine key project management areas: scope, time, cost, quality, human resources, risk, procurement, communication and integration management. This course is key to applying project management techniques to specific knowledge base in the Graduate Diploma in Business Administration (e.g. Green Projects, Green Innovation, Global Business Trade projects). Note: This course may be offered in compressed mode. Consult the current timetable.

Level: GR

Attributes: BUSI (p. 521), F2A9 (p. 521)

**BUSM 6130 3 credits****Change Management and Digital Transformation for Business**

Students in this course will study managing change and some traditional aspects of change management. The course will also cover the emerging field of digital transformation in organizations through the lens of organizational strategy, people, processes and technology. Digital transformation when designed and deployed appropriately has the capacity, at the very core of business to fully leverage changes and opportunities. This course covers the “digital transformation revolution” as part of the new economy and places it at the center of growth and innovation strategies in organizations as well as “holistic optimization” which looks at the broader picture of improvement in organizations, by actually setting in motion the necessary transformations and innovations and its interconnectedness. Last but not least, the course will cover the role that information management plays in digital transformation.

Level: GR

Attributes: BUSI (p. 521), F2A9 (p. 521)

**BUSM 6150 3 credits****Managing Innovation**

Students will learn how to manage innovation using formal processes, frameworks and tools. They will learn about the characteristics of knowledge-based institutions and will learn the role of Intellectual Property management, IP tools. Students will study stimulation of creativity and harnessing of technologies, development of goods, services and processes, business model innovation, and measurement of innovation performance. They will be given the opportunity to examine successful innovation management practices in organizations of all types and sizes including but not limited to design and innovation in operations (e.g. supply-chain management).

Level: GR

Attributes: BUSI (p. 521), F2A9 (p. 521)

**BUSM 6160 3 credits****Strategic Planning**

This course introduces key concepts, tools and principles of strategy formulation. This is an integrative and interdisciplinary course. It helps in the Development of organizational strategy with a broad range of stakeholders, maintaining and advancing ethics and environmental sustainability in the organization. The course covers the identification and building up of competitive advantages in the organization that leads to responsible financial sustainability. The course covers the formulation of short and long-term strategies and policies and the coordination of business activities for the whole enterprise. As mentioned above, this is an integrative course in which the strategy formulation will be framed on a simulated or real business case utilizing skills and knowledge from previous courses, knowledge and skills.

Level: GR

Attributes: BUSI (p. 521), F2A9 (p. 521)

**BUSM 6180 5 credits****Graduate Capstone Experience Practicum**

Professionals will manage, work-hands on and have a professional presentation on a comprehensive project that will meet the requirements of an organization. The project can also be narrow in scope but comprehensive in its design (e.g. new clean technology, innovation of a product or service in an international context, or a business plan with the respective academic framework). They will develop and complete the project in partnership with industry. Professionals will have an opportunity to integrate business theory with polytechnic skills. The business theory will be fully researched and it is not limited to the client organization but includes the broader literature on the subject matter in addition to the client's primary research. When appropriate, professionals taking the course will provide recommendations that will have metrics attached to the plan, so the operational organization client can measure the success or failure of the activity undertaken.

Level: GR

Attributes: BUSI (p. 521), F2A9 (p. 521)

## Diploma in Business Management At a Glance

**Faculty**

[www.kpu.ca/business](http://www.kpu.ca/business) (<http://www.kpu.ca/business/>)

**Area of Study:**

[www.kpu.ca/business/business-management-diploma](http://www.kpu.ca/business/business-management-diploma) (<http://www.kpu.ca/business/business-management-diploma/>)

**Academic Level:**

Undergraduate

**Credential Granted:**

Diploma

**Start Date:**

Fall (September)

Spring (January)

Summer (May)

**Intake Type:**

- Open

**Minimum Credits Required:**

60

**Curriculum Effective Date:**

01-Sep-2015

**Description**

The two-year Business Management Diploma program's foundation courses provide an understanding of the basic skills and techniques required to be effective in today's business environment. Graduates will take specialized courses in management essentials, human resources management, business law, negotiations, operations management, enterprise development, business planning and international business.

**Career Opportunities**

The Business Management Diploma is designed to prepare students for entry-level management positions in both private and public sector organizations. The program is accredited by the Canadian Institute of Management, Canada's senior management association. Their CIM (Certified in Management) designation is a nationally-recognized benchmark in professional management. Graduates of KPU's Business Management Diploma can apply for their CIM designation with no additional coursework required. For more information about CIM (including experience requirements and exemption process) please visit [cim.ca](https://cim.ca/) (<https://cim.ca/>)

**Requirements****Admission Requirements**

The Faculty's Admission Requirements, which consist of KPU's undergraduate English Proficiency Requirement (p. 13), apply to this program.

**Declaration Requirements**

Students intending to graduate with this School of Business diploma must declare the credential. At the time of declaration, the student must satisfy all of the following requirements:

- In good academic standing with the University
- Completion of a minimum of 15 credits of undergraduate coursework.

**Curricular Requirements**

Students must complete 60 credits that include:

Code	Title	Credits
<b>Business Foundation Courses</b>		
BUSI 1215	Organizational Behaviour	3
BUSI 2390	Business Law	3
BUSI 2405	Operations Management	3
BUSI 2425	Enterprise Development and Business Planning	3
MRKT 1199	Introduction to Marketing	3
Select one of the following groups:		3-6
Group A		
ACCT 2293	Intro To Financial Accounting	
Group B <sup>1</sup>		
ACCT 1110	Introductory Financial Accounting I	
ACCT 1210	Introductory Financial Accounting II	
<b>Business Management Courses</b>		
BUSI 1110	Fundamentals of Business in Canada	3
BUSI 1210	Essentials of Management	3
BUSI 1250	Human Resources Management I	3
BUSI 2465	Business Negotiations	3
BUSI 2490	International Business	3
<b>Breadth Education Courses</b>		
ENGL 1100	Introduction to University Writing	3
CMNS 1140	Introduction to Professional Communication	3
ECON 1150	Principles of Microeconomics	3
CBSY 1105	Computer Business Applications	3
Select one additional CBSY course		3
Select one of the following:		3
BUQU 1130	Business Mathematics	
MATH 1120	Differential Calculus	
MATH 1130	Calculus for Life Sciences I	
MATH 1140	Calculus I (Business Applications)	
Select one of the following:		3
BUQU 1230	Business Statistics	
CRIM 2103	Quantitative Data Analysis I	
MATH 1115	Statistics I	
MATH 2341	Introduction to Statistics for Business	
PSYC 2300	Applied Statistics	
SOCI 2365	Introduction to Social Research Statistics	
Select two courses numbered 1100 or higher in any area of study except ACCT, BUSI, ENTR, HRMT, or MRKT <sup>2</sup>		6
Total Credits		60-63

<sup>1</sup> Students who choose Group B may require more than 60 credits to graduate.

<sup>2</sup> ECON 1250 is recommended for students who intend to proceed into any KPU BBA degree program after completing this diploma.

## Credential Awarded

Upon successful completion of this program, students are eligible to receive a **Diploma in Business Management**.

## Computer Information Systems

The Computer Information Systems programs (CISY) offer a unique practitioner-oriented approach to systems support and software

development. Computer Information Systems courses are offered by the Computer Science and Information Technology department. These programs provide graduates with diverse computing knowledge to meet the computer and information system needs of organizations of all sizes.

KPU graduates who complete the prescribed courses in the Computer Information Systems (CISY) diploma or certificate program will be able to transition into the Bachelor of Technology in Information Technology degree program at KPU. For more information see Information Technology: Bachelor of Technology (p. 461).

Upon completion of the Computer Information Systems certificate program students are encouraged to pursue the Computer Information Systems diploma program and subsequently, the Bachelor of Technology in Information Technology degree, to strengthen their IT skills and broaden their career options. Students interested in the CISY diploma and/or the BTECH degree program should consult a School of Business Advisor for course planning assistance.

With proper course planning CISY students may complete some requirements which can be used in the following KPU degrees:

- Bachelor of Business Administration in Entrepreneurial Leadership (p. 439)
- Bachelor of Business Administration in Human Resources Management (p. 452)
- Bachelor of Administration in Marketing Management (p. 470)

Specific features of these programs include:

- Recently revised curriculum with contemporary course content
- Practical projects in most courses
- Course offerings during the day and in the evenings for Fall, Spring and Summer semesters to provide maximum flexibility for student schedules
- Co-op opportunities with a wide range of employers while still earning a diploma
- Professional networking opportunities to prepare for employment after graduation

**Please visit** [kpu.ca/business/programs-and-courses](http://www.kpu.ca/business/programs-and-courses/) (<http://www.kpu.ca/business/programs-and-courses/>) **for more information on School of Business programs.**

## Who Studies Computer Information Systems?

These programs are designed for students interested in pursuing a career in one of the many fields within the Information Technology sector.

At a minimum, students entering the program should have completed high school Math 11 Foundations with a C+ or a KPU equivalent MATQ qualifying course or have achieved an equivalent result on KPU's Math Placement Test.

## Career Opportunities

Graduates of this program may find employment in the following areas:

- Network administration
- Systems and user support
- Database design and management
- Systems analysis and design

- Software development
- Web design and development
- Technical documentation
- C# & Java Programming

## Programs

- Diploma in Computer Information Systems (p. 429)
- Certificate in Computer Information Systems (p. 430)

## Courses

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

### INFO 1111 3 credits

#### Introduction to Computer Hardware and Software

Students will learn general computer hardware and software concepts. They will study the general architecture of the computer and examine hardware components such as microprocessors, memory, motherboards, expansion buses, power supplies, hard disk drives, removable media, peripherals, input/output devices, video, audio, and network interface cards. They will compare differences between hardware used in enterprise, personal and mobile computing devices. Students will also study the functions of operating systems and device drivers and will be provided an overview of popular application software.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521), PW\_2 (p. 522)

### INFO 1112 3 credits

#### Principles of Program Structure and Design I

Students will learn the fundamental logic and structure of computer programs. They will develop skills in different aspects of the problem-solving and programming process including analyzing requirements, designing solutions, coding, testing and writing documentation with emphasis on structured programming and modular design techniques. Students will be required to design and implement a software application.

Level: UG

Prerequisite(s): Level E1 as defined in the Math Alternatives Table (p. 779)

Attributes: ASTR (p. 523), BUSI (p. 521)

### INFO 1113 3 credits

#### Systems Analysis and Design

Students will study current strategies, methodologies and techniques of systems analysis and design with an emphasis on the role of systems analysts in an organization and collaboration within the overall process. Students will learn how to elicit general information system requirements, perform object-oriented system analysis and design, and generate user documentations. Students working in groups will analyze and design small information systems using object-oriented methodology. Students will examine from an ethical perspective issues specific to information technology professionals, such as intellectual property, access, security and protection of private information, and codes of conduct.

Level: UG

Prerequisite(s): Level E1 as defined in the Math Alternatives Table (p. 779)

Attributes: ASTR (p. 523), BUSI (p. 521)

### INFO 1211 3 credits

#### Operating Systems Principles And Applications

Students will learn the fundamentals of operating systems and system utilities. They will study principles such as operating system architecture, input/output systems, file systems, process management and thread management. Students will work with multi-user, multi-tasking operating systems such as Windows, UNIX and Linux.

Level: UG

Prerequisite(s): INFO 1111 and Level E1 as defined in the Math Alternatives Table (p. 779).

Attributes: ASTR (p. 523), BUSI (p. 521)

### INFO 1212 3 credits

#### Networking Technologies I

Students will learn the fundamental architecture, functions and components of computer networks. They will build local area networks with routers and switches and implement Internet Protocol (IP) addressing schemes.

Level: UG

Prerequisite(s): INFO 1111 and Level E1 as defined in the Math Alternatives Table (p. 779)

Attributes: ASTR (p. 523), BUSI (p. 521)

### INFO 1213 3 credits

#### Web Application Development

Students will learn the operating principles of the World Wide Web and its relationship with the Internet. They will learn the client-server model, Internet protocols, domain names and URLs, websites and Web hosting. They will also learn HTML, CSS, JavaScript and XML. Students will program both in client and server-side environments and develop data-driven Web applications. They will also learn to deploy applications on web hosting servers.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521)

### INFO 1214 3 credits

#### Discrete Mathematics for Information Technology

Students will learn the basic mathematical concepts which form the foundations of computing systems. They will be able to apply mathematical logic and methods to software development. They will learn the principles and applications of discrete mathematics, data organization and data representation.

Level: UG

Prerequisite(s): Level E1 as defined in the Math Alternatives Table (p. 779).

Attributes: ASTR (p. 523), BUSI (p. 521)

### INFO 2311 3 credits

#### Networking Technologies II

Students will learn the operation details of routers and switches in small to medium size computer networks. They will acquire skills for configuring and troubleshooting routers and switches. They will also develop skills in resolving common issues which exist when routing between different protocols.

Level: UG

Prerequisite(s): INFO 1212

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 2312 3 credits****Database Management Systems**

Students will learn the concepts and theory of database models, with particular emphasis on the relational model. They will learn and practice database designs utilizing Entity-Relationship Modeling, functional dependencies, and database table normalization. Students will learn Structured Query Language (SQL) and use SQL statements to design, query and maintain databases.

Level: UG

Prerequisite(s): INFO 1112 and INFO 1113

Attribute: BUSI (p. 521)

**INFO 2313 3 credits****Object-Oriented Programming**

Students will learn the principles and concepts of object-oriented programming. They will learn class definition, objects, object interaction, inheritance, polymorphism, interface, abstract classes, and exception handling. They will also learn event-driven programming and object-oriented analysis and design.

Level: UG

Prerequisite(s): INFO 1112

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 2315 3 credits****Data Structure**

Students will learn the data structures and associated algorithms commonly used in system development. They will learn Application of Linked Lists, Stacks, Queues, Binary Trees, Balanced Trees, Searching of Tress, Lists, Inverted Lists, Multi-lists and Graphs. These are the fundamental tools available for contemporary programming languages for implementation of complex algorithms.

Level: UG

Prerequisite(s): INFO 2313

Cross-listing: CPSC 2302

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 2411 3 credits****Foundations of Computer Security**

Students will learn fundamental concepts, theories, methodologies and techniques of computer and network security. Students will gain an understanding of the importance of security within and between organizations, including the ongoing threats and vulnerabilities on networks. In this course the significance of being ethical is emphasized. It covers the aspects of systems security from the perspective of providing security mechanisms for protecting networks. Students will learn several software tools and techniques related to computer security using mechanisms such as cryptographic systems, authentication and access control methods. Different types of network and computer attacks are studied. Tools to discover network designs, functionality, resources and vulnerabilities are introduced.

Level: UG

Prerequisite(s): INFO 1112 and INFO 1212

Attribute: BUSI (p. 521)

**INFO 2412 3 credits****Management of Information Systems**

Students will learn information system management in the global economy. They will learn how to plan information systems and design corporate information technology architectures. Students will also learn how to manage corporate information resources and how to select technologies for developing effective information systems. They will be introduced to issues in managing systems that support knowledge-based work and managing information system security.

Level: UG

Prerequisite(s): INFO 1113

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 2413 3 credits****System Development Project**

Students will work on real-world computer information system projects on a team basis. They will integrate computer and system concepts learned in the first two years of the program to analyze project requirements, design and implement a software based information system using appropriate tools.

Level: UG

Prerequisite(s): All of (a) INFO 2312 (b) INFO 2313 and (c) 15 credits from courses in INFO at the 1100 level or higher

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 2416 3 credits****Server Operating Systems**

Students will learn the principles, techniques and strategies used in planning, installing, testing, and administering a server operating system. Students will learn to create and manage user accounts using Active Directory, and to install and configure server roles including Dynamic Host Configuration Protocol (DHCP), Domain Name System (DNS), printer server, Internet Information Services (IIS), and Virtual Private Network (VPN). Students will be required to plan, design, and install an application server to simulate real-world scenarios. Students will have hands-on experience in installing, troubleshooting, fine-tuning, and administering a server operating system.

Level: UG

Prerequisite(s): INFO 1211 and INFO 1212

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 3110 3 credits****Professional Communications in Information Technology**

Students will address the activities and techniques for developing proposals, specifications, user guides, reports, memoranda, executive summaries and other documentation commonly used in information technology. Students will present a variety of individual and group written and oral communication assignments, reflecting current Information Systems models.

Level: UG

Prerequisite(s): All of (a) CMNS 1140 (b) ENGL 1100 and (c) 9 credits from courses in INFO at the 2000 level or higher

Attribute: BUSI (p. 521)

**INFO 3120 3 credits****Web Programming with Java**

Students will learn the syntax, resources and utilities package of Java related to web applications. Students will also examine web design principles, apply their knowledge to construct web components, including Java Server Pages (JSP), Servlets and JavaBeans for both Internet and Intranet environments, and implement dynamic web applications using a Java web server and a relational database management system.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher, or permission of the instructor.

Attribute: BUSI (p. 521)

**INFO 3135 3 credits****Advanced Web Application Development**

Students will learn PHP and MySQL and use them to develop dynamic, secure and commercially usable websites. They will learn the basics of PHP and MySQL and will also learn how to access the data in a MySQL database through the Web using PHP. The students will be able to develop shopping carts and Web forums using PHP and MySQL.

Level: UG

Prerequisite(s): All of (a) 6 credits from courses in INFO at the 2000 level, (b) INFO 1213 and (c) INFO 2313 or CPSC 1204

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 3150 3 credits****Object-Oriented Software Engineering**

Students will learn the methods of identifying system requirements and producing object models and designs based on the requirements. They will learn the concepts of Unified Modeling Language (UML). They will identify use cases and expand them into object-oriented designs. Students will use the concepts of software engineering to analyze, design and implement software systems. The students will also be introduced to the concepts of Agile Software Development.

Level: UG

Prerequisite(s): All of (a) 6 credits from courses in INFO at the 2000 level and (b) INFO 2313 or CPSC 1204

Attribute: BUSI (p. 521)

**INFO 3160 3 credits****Network Operating Systems**

Students will learn the principles, techniques and strategies used in planning, installing, testing, and administering a server operating system. The course covers creating and managing users using Active Directory, installing and configuring Dynamic Host Configuration Protocol (DHCP), Domain Name System (DNS), Printer Server, Internet Information Services (IIS), Web Server, and a Virtual Private Network (VPN). Students will be required to plan, design, and install an application server simulating real-world scenarios. Students will have hands-on experience in installing, troubleshooting, fine-tuning, and administering a server operating system.

Level: UG

Prerequisite(s): Acceptance into Bachelor of Technology in Information Technology

Attribute: BUSI (p. 521)

**INFO 3170 3 credits****Security of Enterprise Networks**

Students will learn the fundamentals of network security and the principles of firewalls and Virtual Private Networks (VPN). They will learn how to identify network security threats. They will also learn how to select and deploy firewalls and manage VPNs.

Level: UG

Prerequisite(s): INFO 2411, plus 6 credits from courses in INFO at the 2000 level.

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 3171 3 credits****System Security**

Students will learn fundamental concepts, theories and practical skills of system security. This course covers vulnerabilities of operating systems and covers how systems can be penetrated. Students will learn digital data integrity to ensure the data is unchanged. It also covers data security, network security, web server security and web application security. Tools to discover network designs, functionality, resources, and vulnerabilities are introduced. Security mechanisms for protecting networks are evaluated and security planning is considered. In this course the significance of being ethical is emphasized.

Level: UG

Prerequisite(s): INFO 2411 and 6 credits from courses in INFO at the 2000 level

Attribute: BUSI (p. 521)

**INFO 3180 3 credits****Wireless Networks**

Students will learn the concepts and practical skills of wireless local area networks (WLANs). They will learn the fundamentals of radio frequency (RF) signals, mathematical skills required in RF signal power calculations, wireless antennas, antenna accessories, and spread spectrum technologies. The students will also learn WLAN infrastructure devices, WLAN organizations and standards, WLAN network architectures, wireless site survey and WLAN troubleshooting techniques.

Level: UG

Prerequisite(s): INFO 2311 plus 6 credits from courses in INFO at the 2000 level

Attribute: BUSI (p. 521)

**INFO 3210 3 credits****Distributed Systems**

Students will learn principles, techniques and strategies used in design and implementation of distributed applications and system solutions that are robust, scalable, and secure. Students focus on modeling distributed systems and building distributed objects using .NET framework. Students will be required to develop a distributed business solution using C# and .NET Remoting.

Level: UG

Prerequisite(s): Acceptance into 3rd year of the BTech program.

Attribute: BUSI (p. 521)

**INFO 3225 3 credits****Web Multimedia**

Students will learn the different types of multimedia (e.g. text, images, sound, animation and video) required in website development. They will learn the theoretical foundations and the practical tools for creating graphics, sound, animation and video content that will be used in websites, as well as multimedia design considerations.

Level: UG

Prerequisite(s): All of (a) 9 credits of courses in INFO at the 2000 level, (b) INFO 1213 and (c) INFO 2313 or CPSC 1204

Attribute: BUSI (p. 521)

**INFO 3230 3 credits****Advanced Object-Oriented Application Development**

Students will learn to use object-oriented methodology to analyze, design and implement real-world software applications. Students will learn the best practices for iterative software development recommended by the Unified Process (UP). Student will learn the advanced features of the Unified Modeling Language (UML) in modeling distributed software applications. Students also will learn the concepts of software design patterns and how these patterns can be used to create flexible and extensible software.

Level: UG

Attribute: BUSI (p. 521)

**INFO 3235 3 credits****Software Quality Assurance**

Students will learn the essential features involved in developing timely, cost-effective and high-quality software products that meet the user's requirements. They will examine the effective deployment of quality assurance procedures throughout the entire software development process. They will learn the concepts of Total Quality Management (TQM), the development of quality assurance plans, the implementation of verification and validation functions, the selection of tools to support quality assurance, the application of software metrics to measure quality, and the International Standards Organization (ISO) certification process.

Level: UG

Prerequisite(s): INFO 3150

Attribute: BUSI (p. 521)

**INFO 3240 3 credits****Enterprise Resource Planning Systems**

Students will learn the concepts in Enterprise Resource Planning (ERP). They will learn the basis of how integrated information systems such as ERP systems can help companies to optimize business processes. Students also will learn business process modeling, process improvement and ERP implementation. They will explore the role of ERP in electronic commerce. Students will gain hands-on experience through working on an ERP system.

Level: UG

Prerequisite(s): 9 credits from courses in INFO at the 2000 level

Attribute: BUSI (p. 521)

**INFO 3241 3 credits****Identity Management**

Students will learn the fundamental concepts of digital identity management. They will learn the concepts of digital identity, digital identity lifecycles, digital rights management and identity management architecture building. They will also examine industrial software and tools and use them to build identity management systems.

Level: UG

Prerequisite(s): INFO 3160

Attribute: BUSI (p. 521)

**INFO 3245 3 credits****Mobile Programming**

Students will learn the skills for developing Android-based mobile applications. They will be introduced to the basics of wireless technologies associated with a smartphone such as cellular networks, Wi-Fi networks, satellite networks, and GPS systems. They will learn the Android fundamentals and the methods for designing and developing Android software programs for database, audio, video and communication applications.

Level: UG

Prerequisite(s): All of (a) 9 credits from courses in INFO at the 2000 level and (b) INFO 2313 or CPSC 1204

Attribute: BUSI (p. 521)

**INFO 3246 3 credits****Mobile Programming II**

Students will learn software application development for iOS, the mobile operating system from Apple Inc. They will be introduced to programming in Objective-C and will learn the skills in designing, developing and deploying different types of mobile applications for both iPad and iPhone.

Level: UG

Attribute: BUSI (p. 521)

**INFO 3250 3 credits****Content Management and Information Architecture**

Students will learn the concepts of content management and information architecture. They will learn to apply the enterprise content management (ECM) methodology for managing digital assets, records, and knowledge throughout an organization. They will learn how to analyze and plan ECM solutions based on an organizations needs and business requirements. Students will also learn to design information architecture and implement taxonomy in organizing content throughout the information life cycle.

Level: UG

Prerequisite(s): 9 credits from courses in INFO at the 2000 level

Attribute: BUSI (p. 521)

**INFO 3280 3 credits****Information Technology Project Management**

Students will learn topics in Information Technology (IT) project management. They will examine various issues related to the development and implementation of complex information systems. Students will explore the use of new technologies in IT project management and will use a project management software tool to complete assignments, case studies and a term project.

Level: UG

Prerequisite(s): 9 credits from courses in INFO at the 2000 level

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 3290 3 credits****Virtualization**

Students will learn the fundamentals of virtualization. They will learn the internals of a Virtual Machine (VM), how to install and deploy VM Applications on desktop computers and enterprise servers, back up and recovering VMs, use virtual file systems, implement failover clusters, create load-balanced clusters, build VM clusters. They will also be introduced to storage networking and storage virtualization, and virtualized information systems.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 3390 3 credits****Networking Technologies III**

Student will learn the architecture, components, and operations of routers and switches in a larger and complex network. They will configure and troubleshoot routers and switches and resolve common issues related to routing and switching in both Internet Protocol version 4 (IPv4) and Internet Protocol version 6 (IPv6) networks.

Level: UG

Prerequisite(s): 9 credits from courses in INFO at the 2000 level, including INFO 2311

Attribute: BUSI (p. 521)

**INFO 4105 3 credits****Search Engine Principles**

Students will learn the principles of search engines and information retrieval. Information filtering and retrieval drives some of the world's most successful and high-tech businesses. Students will learn various methods of search engine optimization (SEO), ranging from theory to implementation. Students will learn how to use tools and methods to perform searches and utilize results effectively. They will also learn how large data sources such as social media affects information retrieval.

Level: UG

Prerequisite(s): INFO 3135, plus 9 credits from courses in INFO at the 3000 level.

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 4110 3 credits****Cloud Computing**

Students will learn cloud computing basics, benefits and limitations, cloud computing technologies (hardware and infrastructure), cloud accessing technologies, cloud storage, standards in cloud computing, software as a service, platform as service and cloud application development.

Level: UG

Prerequisite(s): INFO 3390, plus 12 credits from courses at the 3000 level.

Attribute: BUSI (p. 521)

**INFO 4115 3 credits****Human Factors and Website Design**

Students will learn computer interface design requirements based on perceptual and cognitive factors; learnability; recall, recognition and retention; speed and accuracy of performance, and apply them in Web design process. They will learn website planning and design, usability, website navigation design, graphics and color selection, text formatting using cascaded style sheet (CSS), browser compatibility testing and interactivity design using JavaScripts.

Level: UG

Prerequisite(s): INFO 3135 plus 9 credits from courses in INFO at the 3000 level

Attribute: BUSI (p. 521)

**INFO 4120 3 credits****Digital Forensics**

Students will learn the foundations of digital forensics. They will learn the key technical concepts, the methodologies used and the tools needed in digital forensics. Students will learn how to perform examinations for computers, networks, mobile devices, GPS, the Cloud and the Internet. Students will also learn how to collect evidence, document the scenes, and recover deleted data.

Level: UG

Prerequisite(s): INFO 3170 plus 9 credits from courses in INFO at the 3000 level

Attribute: BUSI (p. 521)

**INFO 4125 3 credits****Website and Cloud Security**

Students will learn the core mechanisms and tools for Web and cloud security. They will learn the principles of Web attacks on authentication, users, application servers, data stores, back-end components, application logic and bypassing client side controls. They will learn how to discover and prevent Web security flaws during Web application development and measures to improve Web security. They will also learn how to identify and resolve the security issues specific to public and private clouds.

Level: UG

Prerequisite(s): INFO 2411 plus 12 credits from courses in INFO at the 3000 level

Attribute: BUSI (p. 521)

**INFO 4190 3 credits****Integration Project I**

Students will conduct an extensive literature review and research for projects originating from faculty or the stakeholders from the industry or local communities. Students will carry out detailed project designs and complete the overall project design documentation in this capstone course. They will report the design results through presentations that are open to all faculty and students in the department and industry sponsors. Students will apply in great depth and breadth the system, hardware, software and project management knowledge they learned in the program to the accomplish the tasks of the project. Note: This course is a prerequisite for INFO 4290 Integration Project II where the students will implement their designs using software and/or hardware.

Level: UG

Prerequisite(s): 24 credits from courses in INFO at the 3000 level

Attribute: BUSI (p. 521)

**INFO 4210 3 credits****Human Factors and Computer Interface Design**

Students will study procedures for analyzing human-computer interaction (HCI) and will translate this information into design criteria. They will learn to ensure that computer interface design specifications meet end-user requirements for perceptual and cognitive factors; learnability; recall, recognition and retention; speed and accuracy of performance; cultural factors; and job satisfaction. They will identify task and system requirements and perform usability testing methodologies for both desktop and small screen interfaces.

Level: UG

Prerequisite(s): 12 credits from courses in INFO at the 3000 level, and acceptance into 3rd year of the BTech program.

Attribute: BUSI (p. 521)

**INFO 4225 3 credits****Animations**

Students will learn the skills of using professional software to create animations for Web applications. They will learn simple and complex graphics, graphics on multiple layers, symbols and basic animation, motion and shape Tweening, buttons and actions, and action programming.

Level: UG

Prerequisite(s): INFO 3225

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 4235 3 credits****Special Topics in Web and Mobile Application Development**

This course offers selected topics on web and mobile application development. The topics will be based on emerging industrial technologies, including but not limited to application design, service integration, system development, and application deployment on both web and mobile platforms. Students will learn novel concepts of web and mobile technologies required by the IT industry.

Level: UG

Prerequisite(s): INFO 3135, plus 9 credits from courses in INFO at the 3000 level.

Attribute: BUSI (p. 521)

**INFO 4250 3 credits****Special Topics in Network Administration and Security**

Students will learn special topics in network administration and security. This course is designed to cover emerging technologies that the department deems important but are not covered in other courses. Currently the course covers data center fundamentals. Topics include introduction to server farms, infrastructure protocols, security and load balancing, server health management, persistence mechanisms on load balancers and data center design.

Level: UG

Prerequisite(s): INFO 3160

Attribute: BUSI (p. 521)

**INFO 4260 3 credits****Networking Technologies IV**

Students will learn Wide Area Network (WAN) technologies and network services in a complex network. They will analyse and evaluate network devices and WAN technologies to meet network requirements. Students will also develop the knowledge and skills needed to implement Internet Protocol Security (IPSec) and Virtual Private Network (VPN) operations in large network.

Level: UG

Prerequisite(s): 12 credits from courses in INFO at the 3000 level, including INFO 3390.

Attribute: BUSI (p. 521)

**INFO 4290 3 credits****Integration Project II**

Students will implement the project designs they produced in the course INFO 4190 (Integration Project I) using suitable software tools and selected hardware. They will test and debug the project implementations and generate the final system prototype and project documentation. They will report and demonstrate the final project results through presentations which are open to all faculty and students in the department, as well as industrial sponsors.

Level: UG

Prerequisite(s): INFO 4190

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 4310 3 credits****Entrepreneurial Development in Information Technology**

Students will gain an understanding of entrepreneurship fundamentals in the information technology sector, including business planning, financing and venture capital, operations, human resources, marketing and personal selling.

Level: UG

Prerequisite(s): 12 credits from courses in INFO at the 3000 level.

Attribute: BUSI (p. 521)

**INFO 4320 3 credits****Software Quality Assurance**

Students will learn the essential features involved developing timely, cost-effective and high quality software products that meet the user's requirements. They will examine the effective deployment of quality assurance procedures throughout the entire software development process. Other topics covered in this course will include: the concepts of Total Quality Management (TQM), development of quality assurance plans, implementation of verification and validation functions, selection of tools to support quality assurance, application of software metrics to measure quality, and the International Standards Organization (ISO) certification process.

Level: UG

Attribute: BUSI (p. 521)

**INFO 4330 3 credits****Data Warehousing and Data Mining**

Students will examine the problems caused by having too much information and the methods, processes and tools for extracting useful information from multidimensional databases and data marts stored on different system platforms. They will also acquire the techniques for defining, selecting, implementing and evaluating data warehousing and data mining solutions for businesses.

Level: UG

Prerequisite(s): INFO 2312, plus 12 credits from courses in INFO at the 3000 level.

Attribute: BUSI (p. 521)

**INFO 4350 3 credits****Wireless Technologies and Programming**

Students will learn the concepts and principles of wireless technologies, wireless devices, wireless signals, wireless networks and wireless access technologies. They will learn wireless programming techniques and will develop wireless applications using technologies that include Wireless Markup Language (WML), WMLScript, Java and Microsoft .NET based wireless application development environments.

Level: UG

Attribute: BUSI (p. 521)

**INFO 4370 3 credits****Security of Wireless Systems**

Students will learn about wireless security technologies such as advanced user authentication, robust encryption, and intrusion prevention. They also will learn concepts of wireless discovery, wireless attack identification and monitoring, and wireless security policies and solutions. Students will be required to conduct research and work on a project to solve real-world wireless system security problems in a simulated environment.

Level: UG

Prerequisite(s): INFO 3180, plus 9 credits from courses in INFO at the 3000 level.

Attribute: BUSI (p. 521)

**INFO 4381 3 credits****Internet of Things and Applications**

Students will learn the concepts of "Internet of Things" (IoT) and their related applications. The underlying principles and architectures of sensors and actuators are discussed. The course also examines IoT's connectivity, platforms and different application domains. Data analytics and IoT system security are also explored in the course. In addition, students will do a course project using selected hardware, software and development tools.

Level: UG

Prerequisite(s): INFO 3180 and 9 credits from courses in INFO at the 3000 level

Attribute: BUSI (p. 521)

## Diploma in Computer Information Systems

### At a Glance

#### Faculty

[www.kpu.ca/business](http://www.kpu.ca/business) (<http://www.kpu.ca/business/>)

#### Area of Study:

[www.kpu.ca/business/computer-information-systems-diploma](http://www.kpu.ca/business/computer-information-systems-diploma) (<http://www.kpu.ca/business/computer-information-systems-diploma/>)

#### Academic Level:

Undergraduate

#### Credential Granted:

Diploma

#### Start Date:

Fall (September)

Spring (January)

Summer (May)

#### Intake Type:

- Open

#### Minimum Credits Required:

60

#### Curriculum Effective Date:

01-Sep-2015

### Description

This 60-credit diploma program provides graduates with diverse computing knowledge to meet the computer and information system needs of organizations of all sizes. The program is designed to provide graduates with a solid foundation in computer systems and user support, network administration, systems design and foundational programming.

## Requirements

### Admission Requirements

The Faculty's Admission Requirements, which consist of KPU's undergraduate English Proficiency Requirement (p. 13), apply to this program.

### Declaration Requirements

Students intending to graduate with this School of Business diploma must declare the credential. At the time of declaration, the student must satisfy all of the following requirements:

- In good academic standing with the University
- Completion of a minimum of 15 credits of undergraduate coursework.

### Curricular Requirements

The diploma program requires a minimum of 60 credits of required courses. The diploma program with Co-operative Education requires an additional 19 credits of Co-op Education courses.

Note: BC Math 11 Foundations with a minimum grade of C+ (or an equivalent course) is a prerequisite for several INFO courses in Year 1. Consult an Academic Advisor to plan your course selections accordingly.

Course	Title	Credits
<b>Year 1</b>		
BUQU 1130 or MATH 1140	Business Mathematics or Calculus I (Business Applications)	3
Select one of the following:		3-4
BUQU 1230	Business Statistics	
MATH 1115	Statistics I	
MATH 2341	Introduction to Statistics for Business	
INFO 1111	Introduction to Computer Hardware and Software	3
INFO 1112	Principles of Program Structure and Design I	3
INFO 1113	Systems Analysis and Design	3
INFO 1211	Operating Systems Principles And Applications	3
INFO 1212	Networking Technologies I	3
INFO 1213	Web Application Development	3
INFO 1214	Discrete Mathematics for Information Technology	3
PHIL 1150	Introduction to Formal Logic	3
Credits		30-31
<b>Year 2</b>		
BUSI 1110	Fundamentals of Business in Canada	3
CMNS 1140	Introduction to Professional Communication	3
ENGL 1100	Introduction to University Writing	3
INFO 2311	Networking Technologies II	3
INFO 2312	Database Management Systems	3
INFO 2313	Object-Oriented Programming	3
INFO 2315	Data Structure	3
INFO 2411	Foundations of Computer Security	3
INFO 2413	System Development Project	3
INFO 2416	Server Operating Systems	3
Credits		30
Total Credits		60-61

### Other Information

Students enrolled in this program are expected to have their own laptop computers.

## Credential Awarded

Upon successful completion of this program, students are eligible to receive a **Diploma in Computer Information Systems**.

## Co-op Requirements Co-operative Education

The Computer Information Systems diploma is offered with a Co-operative Education option. Co-operative Education gives a student the opportunity to apply the skills gained during academic study in paid, practical work experience semesters. Students can complete two work semesters while completing their diploma. Work terms generally occur full-time in separate 4 month work semesters but may also be available part-time over an 8 month continuous (parallel) placement. Work semesters alternate with academic study.

Students wishing to enter and participate in the Co-op Option must meet the following requirements:

### Declaration and Entrance Requirements

- Declaration into the Diploma in Computer Information Systems program.
- Good Academic Standing
- Maximum of 30 credits completed

### Work Term and Program Continuance Requirements

Procedures for enrollment in Co-operative Education work terms are outlined in the COOP course descriptions. Conditions for continuance in the program are:

- Successful completion of COOP 1101 prior to completing 30 credits
- Minimum GPA of 2.5
- Instructor Permission

### Co-op Course Requirements

The Co-operative Education designation requires successful completion of the following courses:

Code	Title	Credits
COOP 1101	Job Search Techniques	1
COOP 1150	Co-op Work Semester 1	9
COOP 2150	Co-op Work Semester 2	9
Total Credits		19

Note: These COOP courses must be completed sequentially. COOP 1150, or COOP 2150 may be taken part-time over two consecutive semesters as COOP 1150A/COOP 1150B, or COOP 2150A/COOP 2150B. COOP courses can only be used to satisfy the Co-op designation and cannot be used to satisfy other curricular requirements of the program.

### Additional Requirements

In addition to the requirements stated above, all Co-op students must satisfy the General Co-operative Education Requirements (p. 31).

## Credential Awarded

Upon successful completion of this program with co-operative education, students are eligible to receive a **Diploma in Computer Information Systems, Co-operative Education Option**.

# Certificate in Computer Information Systems

## At a Glance

### Academic Level:

Undergraduate

### Credential Granted:

Certificate

### Start Date:

Fall (September)

Spring (January)

Summer (May)

### Intake Type:

- Open

### Minimum Credits Required:

30

### Curriculum Effective Date:

01-Sep-2011

## Description

This 30-credit certificate program provides graduates with diverse computing knowledge to meet the computer and information system needs of organizations of all sizes. The program is designed to provide graduates with a solid foundation in computer systems and user support, network administration, and systems design.

## Requirements

### Admission Requirements

Students pursuing a Certificate in Computer Information Systems must be admitted to the School of Business (p. 405).

### Curricular Requirements

This program is available to students as a full-time or part-time study schedule and requires the completion of 30 credits.

Code	Title	Credits
INFO 1111	Introduction to Computer Hardware and Software	3
INFO 1112	Principles of Program Structure and Design I	3
INFO 1113	Systems Analysis and Design	3
INFO 1211	Operating Systems Principles And Applications	3
INFO 1212	Networking Technologies I	3
INFO 1213	Web Application Development	3

INFO 1214	Discrete Mathematics for Information Technology	3
BUQU 1230	Business Statistics	3
PHIL 1150	Introduction to Formal Logic	3
Select one of the following:		3
CMNS 1110	Fundamentals of Business Communication	
CMNS 1140	Introduction to Professional Communication <sup>1</sup>	
Total Credits		30

<sup>1</sup> Students choosing to take CMNS 1140 rather than CMNS 1110 may be required to undertake English upgrading.

## Other Information

Students enrolled in this program are expected to have their own laptop computers.

## Credential Awarded

Upon successful completion of this program, students are eligible to receive a **Certificate in Computer Information Systems**.

## Economics

Economics students begin their first year of studies with courses that provide a foundation in the principles of microeconomics and macroeconomics. In their second year, students build on their foundation of economic principles and take additional economics courses to broaden their knowledge. Students will be able to select from a number of economic theory and specific field courses. Third and fourth year courses offer specialized topics to provide students with a broad understanding of the discipline.

**Please visit** [kpu.ca/business/programs-and-courses](http://www.kpu.ca/business/programs-and-courses) (<http://www.kpu.ca/business/programs-and-courses/>) **for more information on School of Business programs.**

## Career Opportunities

The field of Economics provides students with a solid understanding of economic principles as well as analytical and problem-solving skills. Training in Economics is an excellent foundation for students who wish to go on to complete advanced professional degrees such as law, community development, or business.

The study of Economics prepares students for careers in banking, financial advising and analysis, stock broking, journalism, real estate, insurance, international trade and diplomacy, teaching, and all levels of government careers.

## Programs

- Associate of Arts Degree in Economics (p. 434)
- Minor in Economics (p. 435)

## Courses

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

### ECON 1101 3 credits

#### Foundations of Economics

Students will study basic economic principles and economic issues facing the Canadian economy. They will analyze and discuss such issues as free trade, environmental problems, economic growth, unemployment and inflation. Note: Students with credit for ECON 1150 or ECON 1250 may not take ECON 1101 for further credit.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521)

### ECON 1110 3 credits

#### Making Economic Sense of Life

Students are introduced to the explanatory power of microeconomic reasoning. They learn and practice basic methods for the appropriate economic explanation of human behavior. Students will consider behaviour such as discrimination, sexual activity, divorce, traffic patterns, and military participation.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521)

### ECON 1150 3 credits

#### Principles of Microeconomics

Students will learn how economists view the choices of households and firms. Topics covered include the nature and method of economics, scarcity, specialization and exchange, supply and demand analysis, elasticity, consumer behaviour, economics of the firm, perfect competition, monopoly and market failure. Students planning to take both ECON 1150 and ECON 1250 are recommended to successfully complete ECON 1150 first.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521), PW\_3 (p. 522), QUAN (p. 532)

### ECON 1250 3 credits

#### Principles of Macroeconomics

Students will study macroeconomic theory at an introductory level. Topics treated include macroeconomic performance measures, economic growth, inflation, unemployment, money and banking, interest rates, exchange rates and government policy in a small, open economy like Canada. Students planning to take both ECON 1150 and ECON 1250 are recommended to successfully complete ECON 1150 first.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521), PW\_3 (p. 522), QUAN (p. 532)

### ECON 2210 3 credits

#### Money and Banking

Students will examine the economics of the Canadian financial system. They will study the structure and operation of the banking system, money, financial and foreign exchange markets; theories of financial markets and financial intermediation; processes of monetary control and the regulation of the banking and financial systems. They will examine the role of the central bank in the conduct of monetary policy.

Level: UG

Prerequisite(s): ECON 1150 and ECON 1250

Attributes: ASTR (p. 523), BUSI (p. 521), QUAN (p. 532)

**ECON 2255 3 credits****Globalization in an Economic Framework**

Students will address theoretical and policy issues related to globalization. They will learn about economic implications of lowered barriers to the international flow of information, capital, labour, and goods. Students will study topics including theoretical foundations of globalization, international economic institutions, and the role of globalization in the process of economic development. Students will be introduced to the relevant models, examine the evidence and discuss various arguments that figure in the debate.

Level: UG

Prerequisite(s): ECON 1150 and ECON 1250

Attributes: ASTR (p. 523), BUSI (p. 521)

**ECON 2260 3 credits****Environmental Economics**

Students will examine the links between the economy and the environment. They will use economic principles to explain why environmental problems occur in a market economy and study how economic policy instruments can be used to deal with these problems.

Level: UG

Prerequisite(s): ECON 1150 and ECON 1250

Attributes: ASTR (p. 523), BUSI (p. 521)

**ECON 2280 3 credits****Labour Economics**

Students will use economic theory to examine the decision-making processes that underlie the supply of and the demand for labour in the Canadian economy, with emphasis on the role of labour markets in determining wages and employment levels. They will analyze relevant labour market structures, theories that predict the outcome of collective bargaining, and policies with respect to unemployment and retraining.

Level: UG

Prerequisite(s): ECON 1150 and ECON 1250

Attributes: ASTR (p. 523), BUSI (p. 521)

**ECON 2350 3 credits****Intermediate Microeconomics**

Students will study the price theory aspects of intermediate microeconomics, with a focus on consumer theory, production and cost, the firm under perfect and imperfect competition, markets for factor inputs, and general equilibrium. Students will learn to identify, analyze, and solve microeconomic problems within these topic areas. For graduation purposes students with credit for ECON 2350 cannot take ECON 3150 for further credit.

Level: UG

Prerequisite(s): All of (a) ECON 1150, (b) ECON 1250 and (c) MATH 1120, 1130, or 1140

Credit Exclusion: ECON 3150

Attributes: ASTR (p. 523), BUSI (p. 521), QUAN (p. 532)

**ECON 3100 3 credits****Economics of Sustainability Policy**

Students will study current sustainability issues and policies from an economic perspective. Students will learn about the Neoclassical Growth Theory. The students will study several topics including: the values and the limitations of the alternative measures of economic welfare, policy reports and studies, and the implications of complementarity between natural and human-made capital. Students may earn credit for only one of ECON 3100 and POST 3100 as they are identical courses.

Level: UG

Prerequisite(s): ECON 1150 and 1250

Cross-listing: POST 3100

Attribute: BUSI (p. 521)

**ECON 3150 3 credits****Managerial Economics**

Students will apply microeconomic theory and quantitative techniques to managerial decision making. They will use these tools to solve problems faced by firms. Students will examine such topics as demand analysis and estimation, production and cost analysis, pricing and output decisions within various market structures, and competitive strategies. For graduation purposes students with credit for ECON 2350 cannot take ECON 3150 for further credit

Level: UG

Prerequisite(s): ECON 1150 and 1250 and one of the following:

BUQU 1230; ACCT 1230; MATH 1115; MATH 2315; MATH 2341;

PSYC 2300; CRIM 2103; SOCI 2365; or equivalent first-year statistics course

Attributes: ASTR (p. 523), BUSI (p. 521)

**ECON 3208 3 credits****History of Economic Thought**

Students will survey the ideas of the major figures in the development of economic thought from the medieval period to the present. They will examine the characteristics of the prevailing economic theories in relation to the economic conditions of the time. Students will trace the evolution of economic theory from Classical Economics, the Marxist and Historicist challenges to Classicism, and proceed through a discussion of the development of Marginalism, the Neo-classical Economics of Alfred Marshall, the criticisms of Neo-classical Economics, and the Keynesian revolution and counter-revolution.

Level: UG

Prerequisite(s): ECON 1150, ECON 1250 and 6 credits of 2000-level ECON courses

Attribute: BUSI (p. 521)

**ECON 3211 3 credits****Economic History of Canada**

Learning about economic history of Canada is essential to understanding how Canada has become the country it is now. Beginning with the Aboriginal economies and spanning more than 150 years, the economic history of Canada has been developing a *Mari usque ad Mare*, harvesting fish and lumber and wheat and numerous talents of numerous people - and controversy. War and peace, land and poverty, trade and Confederation: the course offers a modern economic approach to interpreting the economic past of Canada

Level: UG

Prerequisite(s): ECON 1150 and ECON 1250, and 6 credits from courses in ECON at the 2000 level or higher.

Attributes: ASTR (p. 523), BUSI (p. 521)

**ECON 3251 3 credits****Women and the Economy**

Students will learn how gender differences impact women in both the household and the marketplace. They will obtain an introduction to the theoretical and empirical literature and use basic microeconomic tools to study specific women's issues. Students will explore economic aspects of family formation; occupational and work choices; household versus market production; explanations of gender differences in earnings; the human capital investment theory; and how public policies affect paid work and the family.

Level: UG

Prerequisite(s): ECON 1150 and 1250, and 6 credits from courses in ECON at the 2000 level or higher.

Attribute: BUSI (p. 521)

**ECON 3270 3 credits****Industrial Organization**

Students will examine the economics of imperfect competition. They will learn how different market structures operate, study pricing strategies and examine government policy in these market structures and in various industries. Students will analyze the theory of the firm, monopoly, monopolistic competition, oligopoly, government policies and their effects, Canadian competition policies, regulation and deregulation. They will also discuss game theory and various aspects of strategic behaviour such as price discrimination.

Level: UG

Prerequisite(s): All of: (a) ECON 1150, (b) ECON 1250 and (c) 6 credits from courses in ECON at the 2000 level or higher.

Attribute: BUSI (p. 521)

**ECON 3333 3 credits****Introductory Econometrics**

Students will be introduced to the techniques employed in the estimation and inference of economic modeling. They will learn the intuitive and practical application of the single-equation linear regression model and the use of statistical software.

Level: UG

Prerequisite(s): ECON 1150, ECON 1250, and (one of BUQU 1230, MATH 1115, MATH 2315, MATH 2341, PSYC 2300, CRIM 2103, SOCI 2365) and 6 credits of 2000-level ECON courses.

Attribute: BUSI (p. 521)

**ECON 3350 3 credits****Intermediate Microeconomics II**

Students will study advanced and applied topics in microeconomic theory. Student will learn topics that include choice under uncertainty, inter-temporal decision-making, transaction cost economics, and the game theory aspects of competitive strategy. Students, within these areas, will learn to identify, analyze, and solve problems commonly experienced in the business world.

Level: UG

Prerequisite(s): (ECON 1150 and ECON 1250 and ECON 2350) and (MATH 1120 or MATH 1130 or MATH 1140)

Attribute: BUSI (p. 521)

**ECON 3362 3 credits****Natural Resource Economics**

Students will address theoretical and policy issues related to the use of natural resources. They will start with some basic concepts used for decision making over time, and will build the foundations (including biological and/or physical aspects) of the theoretical models used in the economics of renewable and non-renewable resources, in both the static and dynamic cases. Students will enrich the analysis by including the effects of market structure and regulations. They will also study the models for fisheries, forestry and mining.

Level: UG

Prerequisite(s): ECON 1150, ECON 1250, (one of BUQU 2100, MATH 1120, MATH 1130, MATH 1140), and 6 credits of 2000-level ECON courses

Attribute: BUSI (p. 521)

**ECON 3450 3 credits****Intermediate Macroeconomics**

Students will study intermediate macroeconomic theory and will use it to help explain long- and short-run macroeconomic performance. They will analyze economic fluctuations and growth, income and employment theories, monetary theory, theory of exchange rate determination, and interest rates. Students will also examine macroeconomic policy debates, open economy issues and recent developments in macroeconomic theory.

Level: UG

Prerequisite(s): ECON 1150, ECON 1250, (one of BUQU 2100, MATH 1120, MATH 1130, MATH 1140) and 6 credits of 2000-level ECON courses

Attributes: BUSI (p. 521), QUAN (p. 532)

**ECON 3451 3 credits****Macroeconomic Policy I**

Students will examine a modern approach to macroeconomics that builds macro models from microeconomic principles – an approach consistent with how macro research is done today. Students will use this theoretical apparatus to understand, interpret and predict the macroeconomic consequences of changes in physical environment and government policies.

Level: UG

Prerequisite(s): ECON 1150, ECON 1250 and 6 credits of 2000-level ECON courses

Attribute: BUSI (p. 521)

**ECON 3455 3 credits****International Economics**

Students will examine economics of international trade and finance with an emphasis on international economic policy. They will study the determinants of international trade, balance of payments, and the determination of exchange rates. Students will also analyze trade policy including tariff and non-tariff barriers, capital mobility and the political economy of protection and exchange rate policy.

Level: UG

Prerequisite(s): ECON 1150, 1250 and 6 credits of 2000-level ECON courses

Attribute: BUSI (p. 521)

**ECON 3555 3 credits****Issues in Economic Development**

Students will investigate sources of economic growth in developing countries and the requirements for successful development. They will explore the development challenges faced by emerging countries and alternative models for economic development. Students will examine both the theoretical foundations and empirical evidence associated with economic development, and consider current areas of research. Issues related to the development process - such as trade liberalization and poverty, trade versus aid as a development strategy, child labour, migration, debt, and the linkage between poverty and terrorism - are discussed as part of the course.

Level: UG

Prerequisite(s): All of: (a) ECON 1150, (b) ECON 1250 and (c) 6 credits from courses in ECON at the 2000 level or higher

Attribute: BUSI (p. 521)

**ECON 4451 3 credits****Macroeconomic Policy II**

Students will study and analyze various macroeconomic models developed to understand the behaviour and impact of economic growth and business cycles. They will learn how these models have addressed the issues related to business cycles. Students will examine the important differences between fiscal and monetary policy as a tool to minimize business cycle fluctuations and bring about greater stabilization in economic growth. Students will use this theoretical apparatus to understand, interpret and predict the macroeconomic consequences of changes in physical environment and government policies.

Level: UG

Prerequisite(s): ECON 3451

Attribute: BUSI (p. 521)

**ECON 4710 3 credits****Law and Economics**

Students will apply microeconomic tools and concepts to the analysis of legal institutions and legal doctrines in the area of common law (property, tort, family law and contract). They will analyze the economic consequences of common property, the assignment of property rights, various kinds of liability rules, marriage and divorce, and remedies for breach of contract. Students will analyze legal cases from law and economics perspectives.

Level: UG

Prerequisite(s): All of (a) ECON 1150, (b) ECON 1250, (c) 6 credits of ECON courses at the 2000 level and (d) 39 credits from courses at the 1100 level or higher.

Attribute: BUSI (p. 521)

**ECON 4900 3 credits****Special Topics in Economics**

Students will engage in an intensive study of selected topics in Economics. They will examine and evaluate recent developments in the topics area and assess the implications of these developments. Students will undertake a literature review associated with a particular course topic area and identify future directions for research and/or policy development. NOTE: Students may take this course multiple times for further credit on different topics.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher, including all of (a) ECON 1150, (b) ECON 1250, and a minimum of (c) 3 credits from courses in ECON at the 3000 level or higher.

Attribute: BUSI (p. 521)

## Associate of Arts Degree in Economics

### At a Glance

#### Faculty

[www.kpu.ca/business](http://www.kpu.ca/business) (<http://www.kpu.ca/business/>)

#### Area of Study:

#### Academic Level:

Undergraduate

#### Credential Granted:

Associate Degree

#### Start Date:

Fall (September)

Spring (January)

Summer (May)

#### Intake Type:

- Open

#### Minimum Credits Required:

60

#### Curriculum Effective Date:

01-Sep-2011

## Description

The Associate Degree is designed to provide an educational experience that prepares students for work, citizenship and an enriched life as an educated person, and to lay a solid foundation for further study in the field of Economics.

This program of study is recommended for students interested in pursuing a career in economics or finance and is designed to provide the foundations required for upper level courses.

## Requirements

### Admission Requirements

The Faculty's Admission Requirements, which consist of KPU's undergraduate English Proficiency Requirement (p. 13), apply to this program.

### Declaration Requirements

Students intending to graduate with this School of Business degree must declare the credential. At the time of declaration, the student must satisfy all of the following requirements:

- In good academic standing with the University
- Completion of a minimum of 15 credits of undergraduate coursework.

### Curricular Requirements

Within the framework of the Associate of Arts degree (p. 52), you must complete at least 60 credits with a minimum grade of C in each course including the following:

Code	Title	Credits
ECON 1150	Principles of Microeconomics	3
ECON 1250	Principles of Macroeconomics	3
ECON 2210	Money and Banking	3
ECON 2350	Intermediate Microeconomics	3
POLI 1125	Introduction to Political Science	3
POLI 2150	States, Markets, Globalization: International Political Economy	3
SOCI 1125	Introduction to Society: Processes and Structures	3
SOCI 2260	Research Methods in Sociology	3
Select one of the following:		3
ECON 2255	Globalization in an Economic Framework	

ECON 2260	Environmental Economics	
ECON 2280	Labour Economics	
Select one of the following:		3
MATH 1120	Differential Calculus	
MATH 1130	Calculus for Life Sciences I	
MATH 1140	Calculus I (Business Applications)	
Select one of the following:		3-4
ACCT 1230	or BUQU 123 Business Statistics	
MATH 2315	Probability and Statistics	
MATH 2341	Introduction to Statistics for Business	
PSYC 2300	Applied Statistics	
Select one of the following:		3
PHIL 1145	Critical Thinking	
PHIL 1150	Introduction to Formal Logic	
PHIL 1155	Introduction to Scientific Reasoning	
Total Credits		36-37

Students intending on pursuing a Major or Minor in Economics are encouraged to take a second course in calculus and a course in linear algebra. Those pursuing a degree in Finance should also take Accelerated Introductory Financial Accounting.

## Credential Awarded

Upon successful completion of this program, students are eligible to receive an **Associate of Arts Degree in Economics**.

## Minor in Economics

## Description

This minor may be applied towards any KPU bachelor's degree.

## Requirements

### Admission Requirements

Students pursuing a Minor in Economics must be admitted to KPU for undergraduate studies.

## Declaration Requirements

Students pursuing this minor must declare their intention prior to graduation. A minor may only be declared as part of a bachelor's degree.

## Curricular Requirements

Code	Title	Credits
<b>Core Requirements</b>		
ECON 1150	Principles of Microeconomics	3
ECON 1250	Principles of Macroeconomics	3
<b>1000-2000 Level</b>		
Select 6 credits from the following:		6
ECON 1110	Making Economic Sense of Life	
ECON 2210	Money and Banking	
ECON 2255	Globalization in an Economic Framework	
ECON 2260	Environmental Economics	
ECON 2280	Labour Economics	
ECON 2350	Intermediate Microeconomics	
BUQU 2100	Quantitative Methods for Business and Economics	
<b>3000-4000 Level</b>		
Select 15 credits from the following, including at least 3 credits from 15 courses at the 4000 level:		
ECON 3100	Economics of Sustainability Policy	
ECON 3150	Managerial Economics	
ECON 3211	Economic History of Canada	
ECON 3251	Women and the Economy	
ECON 3270	Industrial Organization	
ECON 3333	Introductory Econometrics	
ECON 3350	Intermediate Microeconomics II	
ECON 3362	Natural Resource Economics	
ECON 3450	Intermediate Macroeconomics	
ECON 3451	Macroeconomic Policy I	
ECON 3455	International Economics	
ECON 3555	Issues in Economic Development	
ECON 4451	Macroeconomic Policy II	
ECON 4700		
ECON 4710	Law and Economics	
ECON 4900	Special Topics in Economics	

Total Credits

27

## Credential Awarded

Upon successful completion of the minor as part of a bachelor's degree program, transcripts will indicate a **Minor in Economics**.

## Entrepreneurial Leadership

The Bachelor of Business Administration (BBA) in Entrepreneurial Leadership program prepares graduates to fill a variety of management and leadership positions that drive small and medium-sized business growth. The program also prepares graduates interested in developing and managing their own business enterprise with the skills and knowledge to do so.

Extensive consultation has been conducted with industry and business leaders to ensure that this program is applied and relevant in today's business world. Practicum, learning partnerships with business, applied projects and assignments and ongoing work experience provide students with real-life experience in industry.

This degree provides full-time and part-time intensive study options where a student can complete the program at their own pace. Many classes are scheduled after 4:00 pm and in the evening to allow students to further their education while maintaining current employment. This allows for changing outside-of-school time requirements and does not lock a student into a rigid program structure and time-frame.

Some unique features of this program are:

- Industry based practicum capstone course, learning partnerships with business, applied projects and assignments and ongoing work experience
- Focus on management of small to medium sized businesses, entrepreneurial management and management of service sector enterprises
- Professional development for individuals seeking higher level training
- Courses in Richmond and Surrey during the late afternoons and evenings for Fall, Spring and Summer semesters to ensure maximum flexibility in schedules
- Opportunities for Cooperative Education employment while earning a degree

Many of the 1000 and 2000 level foundational courses included in this program are articulated with other universities and colleges for ease of course transferability to and from KPU. Please refer to the BC Transfer Guide at [www.bctransferguide.ca](http://www.bctransferguide.ca) (<http://www.bctransferguide.ca>) regarding the transferability of courses to and from specific institutions in British Columbia.

**Please visit [kpu.ca/business/programs-and-courses](http://kpu.ca/business/programs-and-courses) (<http://kpu.ca/business/programs-and-courses/>) for more information on School of Business programs.**

## Career Opportunities

Graduates of this program find careers in enterprise development, management, and leadership in a variety of small and medium-sized business including the manufacturing and distribution, consumer goods, services, financial services, heavy equipment and not-for-profit industry sectors.

Careers range from specialist to management positions in operations, customer service, sales, project management, and business planning.

Graduates will also have gained the skills and knowledge to develop and manage their own business enterprise.

## Programs

- Bachelor of Business Administration in Entrepreneurial Leadership (p. 439)

## Courses

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](http://bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

### ENTR 3000 3 credits

#### Advanced Professional Business Communications

Students will study theories and principles for writing correspondence including electronic proposals, business plans, executive summaries and other research reports, including a collaborative report. They will complete written and oral communication assignments that emphasize interpersonal, team-building and leadership skills.

Level: UG

Cross-listing: CMNS 3000

Attribute: BUSI (p. 521)

### ENTR 3100 3 credits

#### Business Analysis and Decision Making

Students will apply previously learned analytical tools to address a wide range of organizational issues. They will develop and assess options based on sound strategic analysis and research. Students will recommend solutions supported by quantitative and qualitative rationale. They will develop their problem solving, judgment, analysis, evaluation and decision making skills through case analyses and applied exercises. Students will be required to undertake both individual and group work, drawing from the full range of business courses completed thus far.

Level: UG

Prerequisite(s): BUQU 1130, BUQU 1230, ECON 1150, MRKT 1199,

CMNS 1140, BUSI 2405, and ACCT 2293 or ACCT 1210

Attribute: BUSI (p. 521)

### ENTR 3110 3 credits

#### Advanced Organizational Behaviour

Students will complete a diagnosis of an organizational setting for the purposes of: managing change, improving performance and increasing organizational effectiveness. Students will use their diagnosis to develop a portfolio that will include: activity management, personal management, conflict and stress management, values, attitudes, group dynamics, leadership and team development, corporate politics and business negotiations.

Level: UG

Prerequisite(s): 45 credit hours including BUSI 1215 or BUSI 1210.

Co-requisite(s): CMNS 3000 or ENTR 3000

Attribute: BUSI (p. 521)

**ENTR 3120 3 credits****Managerial Accounting for Entrepreneurs**

Students will learn managerial accounting tools to help make decisions in a business environment. Students will review and analyze managerial accounting practices of different industries. Students will study topics which include relevant costs and revenues, budget development and analysis, capital budgeting and performance measurement tools. Students will apply concepts learned by using cases and applied exercises.

Level: UG

Prerequisite(s): 45 credits from courses including all of the following:

(a) ACCT 2293 or ACCT 1210, (b) ECON 1150, (c) ENTR 3100 and (d) BUQU 1230 or CRIM 2103 or MATH 1115 or MATH 2341 or PSYC 2300 or SOCI 2365

Attribute: BUSI (p. 521)

**ENTR 3130 3 credits****Production and Operations Management**

Students will learn and practise the fundamental design and implementation tools and techniques used in Production and Operations Management (POM). They will be exposed to leading practices employed by entrepreneurs and managers in organizations of all sizes, both in manufacturing and service industries. Students will apply these tools and techniques to solve practical POM problems through exercises and a group term project involving work with real-world or simulated organizations.

Level: UG

Prerequisite(s): 45 credit hours including (ACCT 2293 or ACCT 1210) and ECON 1150 and (BUQU 1230 or MATH 1115 or MATH 2341 or CRIM 2103 or PSYC 2300 or SOCI 2365)

Attribute: BUSI (p. 521)

**ENTR 3140 3 credits****Entrepreneurial Marketing**

Students will learn to address complex marketing problems that need to be addressed with limited resources and recognition of the financial, operational, and HR consequences of the chosen strategy. Students will develop their problem solving, decision-making and planning skills through case analyses and applied exercises. They will also complete a marketing project for a local small business or community organization. Students will be required to undertake both individual and group work, drawing from the full range of business courses taken thus far.

Level: UG

Prerequisite(s): 45 credit hours including (ACCT 2293 or ACCT 1210) and ECON 1150 and (BUQU 1230 or MATH 1115 or MATH 2341 or CRIM 2103 or PSYC 2300 or SOCI 2365)

Attribute: BUSI (p. 521)

**ENTR 3150 3 credits****Business Economics**

Students will learn and apply economic concepts that directly relate to decisions made in small and medium-sized businesses. They will develop broad analytical skills useful for entrepreneurial decision-making.

Level: UG

Prerequisite(s): 45 credit hours including (ACCT 2293 or ACCT 1210) and ECON 1150 and (BUQU 1230 or MATH 1115 or MATH 2341 or CRIM 2103 or PSYC 2300 or SOCI 2365)

Attribute: BUSI (p. 521)

**ENTR 3160 3 credits****Information Technology for Business**

Students will learn and practice how Information Technology (IT) can assist decision makers in business to be more efficient and effective. They will also learn and practice how to plan, analyze, develop, implement, use and manage information and systems that support the business process from a strategic and competitive advantage perspective.

Level: UG

Prerequisite(s): : ENTR 3100

Attribute: BUSI (p. 521)

**ENTR 3170 3 credits****Entrepreneurial Finance**

Students will learn current financial management theories along with the technical skills necessary to maximize the economic value of the firm for its shareholders. Using the case-study method, students will learn how to identify, define and resolve the issues faced by financial managers in small and medium-sized companies.

Level: UG

Prerequisite(s): 45 credit hours including (ACCT 2293 or ACCT 1210) and ECON 1150 and (BUQU 1230 or MATH 1115 or MATH 2341 or CRIM 2103 or PSYC 2300 or SOCI 2365)

Attribute: BUSI (p. 521)

**ENTR 3230 3 credits****Supply Chain and Logistics Management**

Students will learn how to design, manage and assess end-to-end supply chains and logistics in manufacturing as well as in service industries. They will study the latest concepts and formal tools for planning and auditing supply chains and logistics. Included in this study will be the choices of the most appropriate locations, transportation systems and facilities. Students will practice creating value-adding systems, eliminating waste, and developing sustainable supply chains and logistics networks, both locally and globally, in order to generate a significant positive impact to the organization's triple bottom line. They will apply their knowledge and skills in exercises and projects involving real-world or simulated organizations.

Level: UG

Prerequisite(s): All of (a) BUSI 2405 and (b) ACCT 3320 or ENTR 3120

Attribute: BUSI (p. 521)

**ENTR 3240 3 credits****Entrepreneurial Marketing**

Students will understand and address strategic marketing issues in an entrepreneurial environment while recognizing the impact of marketing on the broader organization. Students will develop their analytical, problem solving, decision-making and planning skills through cases, simulations and applied assignments. Students will be required to undertake both individual and group work, drawing from the full range of business courses taken thus far.

Level: UG

Prerequisite(s): ENTR 3100

Attribute: BUSI (p. 521)

**ENTR 4110 3 credits****Business Leadership**

Students will study the business leadership process as well as applied and practical leadership techniques. They will develop and practice leadership skills through self-assessment exercises, role-playing simulations and other 'hands-on' experience. Students will study other topics such as leadership in entrepreneurial and intrapreneurial settings, small- to medium-size business culture, effective team leadership and self-leadership.

Level: UG

Prerequisite(s): (CMNS 3000 or ENTR 3000 or ENTR 3500) and (ENTR 3110 or HRMT 3115)

Attribute: BUSI (p. 521)

**ENTR 4120 3 credits****Human Resource Management**

Students will acquire an in depth understanding of the human resource (HR) management needed to enable an organization to face changes and challenges. Students will engage in research, present key findings and engage in best practice dialogues around a variety of key human resource management concepts, including legal and diversity issues, employee acquisition and deployment, performance management, career development, employee compensation and rewards, employee communications and discipline, union- management relations, occupational health and safety, and international human resource management.

Level: UG

Prerequisite(s): ENTR 3110

Attribute: BUSI (p. 521)

**ENTR 4130 3 credits****Entrepreneurial Mgt for Service Orgs**

Students will analyze and gain insights into a variety of services industry sectors. They will assess, analyze and manage process and resources that support the building of entrepreneurial service organizations. Students will acquire a holistic understanding of the unique variables and principles associated with the service industry.

Level: UG

Prerequisite(s): ENTR 3140 or [ENTR 3100 and (ENTR 3240 or MRKT 3000)]

Cross-listing: ENTR 4300

Attributes: ASTR (p. 523), BUSI (p. 521)

**ENTR 4140 3 credits****Entrepreneurial Sales and Customer Service**

Students will be introduced to the basic selling process, make formalized sales presentations and learn and practice effective customer service with emphasis placed on understanding loyalty, total quality management (TQM), benchmarking, internal customers and communications.

Level: UG

Prerequisite(s): ENTR 3140 or ENTR 3240

Attribute: BUSI (p. 521)

**ENTR 4150 3 credits****Management of Innovation**

Students will learn how to manage innovation using formal processes, frameworks and tools. They will study the latest innovation management approaches in the areas of design of innovation strategies. Students will study stimulation of creativity and harnessing of technologies, development of goods, services and processes, business model innovation, and measurement of innovation performance. They will be given the opportunity to examine successful innovation management practices in organizations of all types and sizes. Students will apply their knowledge and skills in exercises and projects involving real-world or simulated organizations.

Level: UG

Prerequisite(s): BUSI 2405 and (ENTR 3240 OR MRKT 3000)

Attribute: BUSI (p. 521)

**ENTR 4200 3 credits****Business Strategy**

Students will focus on the conceptual and practical aspects of strategic decision making in business. They will learn how to formulate strategies, evaluate strategic alternatives using financial and non financial criteria, implement strategies and manage strategic change in organizations through a series of case analyses, business exercises and current examples from industry.

Level: UG

Prerequisite(s): [ENTR 3130 and 3140 and either (ENTR 3170 OR ACCT 2380 or ACCT 3380)] or [CMNS 3000, ENTR 3100, (ENTR 3120 or ACCT 3320), ECON 1250, ACCT 3380 and 15 additional credits of 3000 level or higher of MKTG, ACCT, ENTR, or HRMT]

Attribute: BUSI (p. 521)

**ENTR 4250 6 credits****Entrepreneurial Leadership Practicum**

Students will manage, design, prepare and present a comprehensive project that will meet the requirements of a client organization. They will develop and complete a significant project in partnership with businesses or as part of developing an entrepreneurial endeavour. Students will also gain the opportunity to practise the integration of business skills and concepts through a real life business launch exercise.

Level: UG

Prerequisite(s): 27 credits from courses in ENTR at the 3100 level or higher, including ENTR 4140 and 4200

Attribute: BUSI (p. 521)

**ENTR 4300 3 credits****Entrepreneurial Management for Service Companies**

Students will analyze and gain insight into a variety of service industry sectors such as the tourism and sports and entertainment industries. They will design and implement a plan for the marketing of services and service companies through the use of cases, industry projects and applied assignments. Students will acquire a practical and strategic understanding of how the marketing of services and service companies differs from that of product marketing.

Level: UG

Prerequisite(s): ENTR 3140

Cross-listing: ENTR 4130

Attribute: BUSI (p. 521)

---	----

**General Electives**

Select 6 courses numbered 1100 or higher in any area of study	18
---	----

Total Credits	120-123
---------------	---------

<sup>1</sup> Students who choose Group B may count the additional ACCT course as a general elective.

## Credential Awarded

Upon successful completion of this program, students are eligible to receive a **Bachelor of Business Administration in Entrepreneurial Leadership**.

## Co-op Requirements Co-operative Education

The BBA in Entrepreneurial Leadership is offered with a Co-operative Education option. Co-operative Education gives a student the opportunity to apply the skills gained during academic study in paid, practical work experience. Degree students can complete a minimum of three work terms while completing their degree. Work terms generally occur full-time in separate 4 month work semesters but may also be available part-time over an 8 month continuous (parallel) placement. Work semesters alternate with academic study.

Students wishing to enter and participate in the Co-op Option must meet the following requirements:

### Declaration and Entrance Requirements

- Declaration of Co-op specialization into Bachelor of Business Administration in Entrepreneurial Leadership Program
- Minimum GPA of 2.7
- Maximum of 75 credits completed

### Work Term and Program Continuance Requirements

Procedures for enrollment in Co-operative Education work terms are outlined in the COOP course descriptions. Conditions for continuance in the program are:

- Successful completion of COOP 1101 prior to completing 75 credits
- Minimum GPA of 2.7
- Instructor Permission

### Co-op Course Requirements

The Co-operative Education designation requires successful completion of the following courses:

Code	Title	Credits
COOP 1101	Job Search Techniques	1
COOP 1150	Co-op Work Semester 1	9
COOP 2150	Co-op Work Semester 2	9
COOP 3150	Co-op Work Semester 3	9
Optional:		
COOP 4150	Co-op Work Semester 4	
Total Credits		28

Note: These COOP courses must be completed sequentially. COOP 1150, COOP 2150, COOP 3150, or COOP 4150 may be taken part-time over two consecutive semesters as COOP 1150A/COOP 1150B, COOP 2150A/COOP 2150B, COOP 3150A/COOP 3150B or COOP 4150A/COOP 4150B. Co-op courses may be used only to satisfy the Co-op designation and cannot be used to satisfy other curricular requirements of the program.

### Additional Requirements

In addition to the requirements stated above, all Co-op students must satisfy the General Co-operative Education Requirements (p. 31).

## Credential Awarded

Upon successful completion of this program with co-operative education, students are eligible to receive a **Bachelor of Business Administration in Entrepreneurial Leadership, Co-operative Education Option**.

## General Business

The General Business Studies programs are flexible diploma or certificate options, allowing individuals to select a variety of areas of study in the School of Business once they have fulfilled the core requirements of the program. The core business foundation courses can be used in any of the Bachelor of Business Administration (BBA) degrees offered by the School of Business.

After completing the initial core program requirements students are encouraged to meet with a School of Business advisor if they intend to progress to a BBA program.

Classes are exciting, practical and participatory. They may include a combination of lectures, exercises, case studies, in-class assignments, projects, student presentations, group work, role-play, structured simulations, field trips and guest speakers. Many classes are offered during evenings to accommodate part-time studies.

Many of the courses included in this program are articulated with other universities and colleges for ease of course transferability to and from KPU. Please refer to the BC Transfer Guide at <http://www.bctransferguide.ca/> (<https://www.bctransferguide.ca/>) regarding the transferability of courses to and from specific institutions in British Columbia.

**Please visit** [kpu.ca/business/programs-and-courses](http://www.kpu.ca/business/programs-and-courses) (<http://www.kpu.ca/business/programs-and-courses/>) **for more information on School of Business programs.**

## Programs

- Diploma in General Business Studies (p. 442)
- Certificate in General Business Studies (p. 443)

## Courses

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables/) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**BUSI 1101 3 credits****Canadian Business Education Foundations**

This course provides International students and those new to Canadian education with a greater understanding of expectations in a Canadian business environment, while developing the foundational skills, strategies and communication techniques essential for success in business education in Canada. Students will be introduced to the political, economic, legal, cultural and social landscape that influences Canadian business and will explore a broad range of business concepts in the Canadian context; paying particular attention to BC's business environment. Students will also get an overview of the business communication and academic skills that are required in Canadian business education.

Level: UG

Co-requisite(s): CMNS 1101

Attributes: ASTR (p. 523), BUSI (p. 521), PW\_3 (p. 522)

**BUSI 1110 3 credits****Fundamentals of Business in Canada**

Students will study and apply a broad range of business concepts in a Canadian context. They will learn the basic roles and responsibilities of managers in the major functional areas of business including human resources, industrial relations, information systems, operations, marketing, accounting and finance. Students will also get an overview of economic systems, forms of business ownership, general management principles, Canadian business law and ethics.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521), PW\_2 (p. 522)

**BUSI 1205 3 credits****Supervisory Skills**

This course is designed for students in programs other than business management. It is primarily intended for students in the Horticulture Technology program, but it may also be of interest to students in other disciplines who are preparing for supervisory positions in various fields. The role of supervisor is presented within the framework of the four functions of management: planning, organizing, leading and controlling. Students will be introduced to contemporary supervision techniques, participative leadership and team concepts which can be applied at the supervisory level.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521)

**BUSI 1209 3 credits****Business Management in Horticulture**

Students in Horticulture will learn the basic concepts of business management needed to be successful in the industry, including: budgeting, cash flow management, working with financial statements, basic banking procedures and dealing with financial institutions. The students also learn basic record keeping and inventory management. Key government regulation affecting horticulture businesses and management of risk in British Columbia will also be covered.

Level: UG

Attribute: BUSI (p. 521)

**BUSI 1210 3 credits****Essentials of Management**

Students will learn the principles of management through an in-depth examination of the universal functions of management: planning, organizing, leading and controlling. They will explore the role of managers as decision makers responsible for achieving the strategic goals and objectives of organizations. Students will study contemporary management practices, concepts and issues including key contingency models, strategic analysis tools, quality control techniques and perspectives on managerial ethics.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521)

**BUSI 1215 3 credits****Organizational Behaviour**

Students will learn how the behaviour of individuals and groups in work environments affect organizational performance. Topics will include individual attributes, motivation theories and strategies, group dynamics, teamwork, organizational structure, job design, leadership, organizational culture and politics, communication, conflict, stress and change management. Special emphasis is placed on diversity, cross-cultural issues and ethical conduct in organizations.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521)

**BUSI 1250 3 credits****Human Resources Management I**

Students will learn a strategic approach to human resources management, with special emphasis on current management practices relating to equity, diversity and employee rights. They will study and practise techniques and procedures such as HRM planning, recruiting, selection, employee relations, labour relations, performance management, compensation, training and development, health and safety and international HRM.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521)

**BUSI 2110 3 credits****Values, rationality, and power: Developing wise organizational action**

Students will learn the inner political nature of organizations and begin developing skills to become wise agents of action. This course will focus on three elements required to get things done in an organization: values, rationality, and power. Students will learn how these attributes impact people's ability to achieve goals and how, though they may lead to conflict, they are the means to build supportive alliances. This course will teach actionable strategies students may apply to manage these political dynamics to drive wise organizational action.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher, including ENGL 1100

Attributes: ASTR (p. 523), BUSI (p. 521)

**BUSI 2360 3 credits****Union Management Relations**

This is a survey of the Canadian labour scene: the historical evolution of Canadian Unionism; the impact of trade unions on industry and commerce; union objectives; employer organizations and labour unions as institutions; existing labour legislation and trends; labour-management relations; mediation and arbitration. The course is largely directed to current events, particularly in B.C.

Level: UG

Prerequisite(s): Second year standing including BUSI 1210 and/or BUSI 1215

Attributes: ASTR (p. 523), BUSI (p. 521)

**BUSI 2390 3 credits****Business Law**

Students will learn about the basic operations of the Canadian Legal system, the civil litigation process, and various aspects of substantive law which relate to, and have application in, Business and Commerce, including Torts, Contracts, Forms of Business Organizations, Consumer Law, Property, Employment, etc. Students will also understand how contracts are formed, enforced, and the remedies possible if contracts are breached. As well, students will develop a familiarization with some of the more important provincial and federal statutes that apply to the business environment. Students will apply basic legal principles and concepts to problems which may arise in the business world.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521)

**BUSI 2405 3 credits****Operations Management**

Students will learn and practise the fundamental design and implementation tools and techniques used in Operations Management (OM). They will be exposed to leading practices employed by entrepreneurs and managers in organizations of all sizes, both in manufacturing and service industries, particularly in small and medium-sized enterprises. Students will apply the theoretical qualitative and quantitative approaches to solve practical problems through exercises, case analyses, and a group term project involving work with real-world or simulated organizations.

Level: UG

Prerequisite(s): All of (a) ACCT 1210 or ACCT 2293 (b) BUSI 1210 or BUSI 1215 (c) ECON 1150 (d) MRKT 1199 and (e) BUQU 1230 or MATH 1115 or MATH 2341 or CRIM 2103 or PSYC 2300 or SOCI 2365  
Attributes: ASTR (p. 523), BUSI (p. 521), QUAN (p. 532)

**BUSI 2425 3 credits****Enterprise Development and Business Planning**

Students utilize their knowledge of business principles to develop business plans, form companies, and actively manage their companies via a computer simulation. Students will apply several key concepts relating to the major functional areas of a business and will make realistic management decisions in a simulated competitive environment.

Level: UG

Prerequisite(s): 24 credit hours of 1100-level or higher including (ACCT 2293 or ACCT 1210), CMNS 1140, ECON 1150 and MRKT 1199  
Co-requisite(s): BUSI 2405  
Attributes: ASTR (p. 523), BUSI (p. 521)

**BUSI 2465 3 credits****Business Negotiations**

Students will learn negotiation techniques that may be used to achieve a variety of business objectives. They will experience the negotiation process and apply the principles of distributive and integrative bargaining through a spectrum of role-plays and simulations, with special emphasis on the importance of developing pre-negotiation plans and establishing benchmarks.

Level: UG

Prerequisite(s): BUSI 1210 or BUSI 1215  
Attributes: ASTR (p. 523), BUSI (p. 521)

**BUSI 2490 3 credits****International Business**

Students will study modern strategic approaches and implementation activities used in the creation and operation of successful international businesses. They will develop specific managerial skills in order to deal effectively with international business matters from the techniques of international business transactions to the challenges of globalization, including the roles of culture, political economy, and technology. Students will be exposed to leading practices employed by entrepreneurs and managers and will apply the theories and concepts to solve problems through exercises, case analyses, and a term project involving direct or simulated work with real-world organizations. This course is designed for students who already possess a basic understanding of business fundamentals.

Level: UG

Prerequisite(s): 15 credits at 1100-level courses or higher including at least one of BUSI 1210 or 1215. Note: ECON 1250 is recommended.  
Attributes: ASTR (p. 523), BUSI (p. 521)

**BUSI 2500 6 credits****Food Systems Field School**

The study of agriculture-business and food systems facilitates transdisciplinary learning and research that is intimately linked to the understanding of sustainability and the cultures that they are embedded in. This Field School will provide opportunities for students to implement problem solving and critical thinking methodologies to help students develop an understanding of the important role that agriculture and food systems play in connecting all aspects of the economy, business, environment and society as well as the value of regional food systems. Students will visit farms and food related businesses locally, nationally and/or internationally. When studying food systems, students will compare and contrast financing, marketing, pricing and logistics of food production. NOTE: Students will spend two weeks at the Field School site in addition to class sessions on campus before and after travel. Students must be nineteen years or older at the start of the course. Students may earn credit for only one of DESN 2500, AGRI 2500 or BUSI 2500 as they are identical courses. Note: Additional fees will apply to meet field trip expenses.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher.  
Cross-listing: DESN 2500  
Attribute: BUSI (p. 521)

Total Credits		12

**Credential Awarded**

Upon successful completion of this program, students are eligible to receive a **Certificate in General Business Studies**.

**Global Business Management**

Global Business Management is the training of managers for a transnational context. Students are usually trained for cross-border transactions of goods and services as well as the overall design of such strategy for the local, regional and global markets.

International business is also defined as the internationalization process of multinational corporations or MNCs. Global business management is considered a specialty within business because in addition to learning an applying knowledge in functional areas, an international manager pays close attention and make strategic decisions based on different legal systems, languages, cultures, economic and geographical environments, corporate cultures, complex and interrelated financial systems, etc. International and global business is shaped by the process of globalization and the opportunities and challenges that it brings to organizations.

## Who Studies Global Business Management?

Students that are expected to be successful will have some of the following characteristics:

1. Strong undergraduate studies. A Business management background is not required, but those with one will build knowledge and skills faster.
2. Good oral and written communication skills.
3. Work experienced is not required but recommended.
4. Strong interest in globalization, international business and intercultural communication.
5. Willing to learn, research, and apply knowledge in a competitive environment.

## Career Opportunities

KPU's program aligns with 6 of the top 100 high-opportunity occupations that have been identified by the Province of British Columbia.

- NOC 4163 - Business development officers, marketing research and consultants.
- NOC 1122 - Professional occupations in business management consulting.
- NOC 0124 - Advertising, marketing, and public relations managers.
- NOC 0601 - Corporate sales manager
- NOC 1225 - Purchasing agents and officers
- NOC 0113 - Purchasing managers

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

### IBUS 6100 3 credits

#### Intercultural Communication for Business

The course is aimed at increasing participant's awareness of and sensitivity towards their own culture, as well as the culture of others. The content develops specific skills competence in cultural settings including business management techniques which can be used/ deployed in a variety of business settings. These settings include not just global settings but also domestic contexts with cultural diversity. This course also provides a rich environment for discussion that builds on elements of global citizenship and global world view.

Level: GR

Attributes: BUSI (p. 521), F2A9 (p. 521)

### IBUS 6110 3 credits

#### International Operations In Trade

This course is designed to develop an applied understanding of developments in global trade operations and the way in which businesses position themselves to optimally harness opportunities within a global competitive environment. It introduces both operational and strategic aspects of global trade operations through analyzing current trade procedures, practices and policies related to the exchange of goods or services along international borders.

Level: GR

Attributes: BUSI (p. 521), F2A9 (p. 521)

### IBUS 6120 3 credits

#### Marketing for International Organization

This course covers marketing theory and methods as they apply to world markets. The main aim of the course is to link international marketing with the overall strategy of the business while examining the impact of cultural, political and legal issues and the economic differences in global strategies. Emphasis is placed on market entry strategies and developing the marketing mix appropriate to various international global environments. A global marketing strategic plan will be designed from real organization or for a start-up or born-global type company.

Level: GR

Attributes: BUSI (p. 521), F2A9 (p. 521)

### IBUS 6130 3 credits

#### E-commerce Design and Digital Marketing

This course links online marketing theory and practice to traditional business strategy, competitiveness, consumer behaviour, models as well as e-commerce development and design. Upon completion of this course, students will have a comprehensive understanding of the impact of digital marketing and e-commerce. Students will build an e-commerce site within a capstone project for marketing goods or services or providing e-commerce solutions to clients. Some of the applied topics in this course include identifying the business model, plan, research audience, technology hosting, budgeting, as well as web content development. The course also covers models of commercial transactions, payments, customer services and fulfillment as well as transactional risks and ethical issues of e-commerce.

Level: GR

Attributes: BUSI (p. 521), F2A9 (p. 521)

### IBUS 6140 3 credits

#### Advanced Topics in International Business and Economics

Students will be able to further their knowledge of international business practices in a world context paying attention to operations, trade, investments, international financial markets, new financial instruments, etc. Through case studies, students will analyze current international business environments as well as specific industries and their success and challenges. In addition, students study a variety of industries across the globe. Advanced topics on international economics are also covered in the course and they present an applied knowledge of economics for business decision-making by managers. Possible topics include: dislocations on globalization, the globalization process, opportunities provided by free trade and free trade challenges, economic development perspectives, likelihood of economic recessions and global integration and innovation.

Level: GR

Prerequisite(s): 9 credits in courses at the 6000 level.

Attributes: BUSI (p. 521), F2A9 (p. 521)

## Description

The Global Business Management program is designed for individuals that want to actively and constructively participate in global business opportunities and challenges. Whether the participants have industry experience or are starting their career in industry, the program is designed to prepare them to successfully address supervisory and managerial needs in a business environment.

The Global Business Management program consists of six general core courses (21 credits). Following those courses, students complete five specialty courses (15 credits) including a graduate experience practicum. Note: This is a two-year program, though students can choose to complete the program in an accelerated form.

## Requirements

### Admission Requirements

In addition to the Faculty's Admission Requirements, which consist of KPU's undergraduate English Proficiency Requirement (p. 13), the following program admission requirements apply:

- Successful completion of a recognized undergraduate or graduate degree with a minimum cumulative GPA of 2.67 (Applicants with an equivalent combination of education and relevant professional experience may be considered for the program.)
- A statement of intent in the program, including relevant studies and work experience. This statement should be 800 – 1000 words and cover the following:

- Intellectual and creative interests
- Personal goals related to the program
- How one's background contributes to the program
- Self-assessment of emotional intelligence with applied examples
- Highlight interests in community involvement
- Two professional references stating suitability for the program

All applicants are assessed by an admissions committee for maturity, fit to the academic program, educational background, and work experience, using the statement of intent and references. Applicants may also be interviewed by a member of the Admissions Committee as part of the application screening process. Meeting the minimum admission requirements does not guarantee admission into the program. For further details about the statement of intent, including submission specifics, visit the department's website at: [kpu.ca/business](http://kpu.ca/business)

Total Credits		36

## Credential Awarded

Upon successful completion of this program, students are eligible to receive a **Graduate Diploma in Business Administration – Global Business Management**.

## Green Business Management and Sustainability

Green Business Management continues to emerge as a field where negative impacts to local or global environment is reduced or avoided by design. Green Business by its nature is applied and forward looking in its thinking. Green Business is not business as usual and it incorporates environmental sustainability mentioned above in addition to social and economic sustainability. Green Business management trains professionals to work in all types of organizations, but provides further specialization into green or greening operations. In today's world, Green Business Management prepares managers and their companies to reassess its relation to the economy, social relations and the environment.

## Who Studies Green Business Management and Sustainability?

Students that are expected to be successful will have some of the following characteristics:

1. Strong undergraduate background. Students with business, science, technical, tourism or government studies may pick up the material faster, but the program is designed for all majors.
2. Good oral and written communication skills.
3. Work experience is not required but recommended.
4. Strong interest in incorporating knowledge and skills of environmental, social and economic sustainability to their academic and professional backgrounds.
5. Willing to learn, research and apply knowledge in a competitive environment.

## Career Opportunities

KPU's program will prepare graduates for the five occupational categories listed below. A total of 12,500 jobs openings across the five categories are expected to be created between 2015 and 2025 in British Columbia (of which 9,220 are expected in the Lower mainland/ South West region).

The transition to a greener Canadian economy is a highly dynamic process, and as a result, companies and organizations will increasingly need skilled professionals who can help them make the most of this phase of opportunity and growth.

- NOC 4163 Business development officers and marketing research and consultants
- NOC 0412 Government managers, economic analysis, policy development and program administration
- NOC 1122 Professional occupations in business management consulting
- NOC 1123 Professional occupations in advertising, marketing and public relations
- NOC 4161 Natural and applied science policy researchers, consultants and program officers.

## Programs

- Graduate Diploma in Business Administration - Green Business Management and Sustainability (p. 448)

## Courses

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

### GRMT 6100 3 credits

#### Sustainability and Business Administration

Students will learn how to integrate, evaluate, report sustainability in organizations. Students will learn specific reporting techniques on sustainability, including but not limited to the Global Reporting Initiative (GRI) and Principles of ISO 14001. This course is also heavy on Corporate Social Responsibility (CSR) policy and programs as they relate to governance and sustainability.

Level: GR

Attributes: BUSI (p. 521), F2A9 (p. 521)

### GRMT 6110 3 credits

#### Green Marketing Management

This course will prepare professionals in understanding and applying green marketing concepts in organizations. Green marketing is marketing products and services based on environmental factors or awareness. Companies involved in green marketing make decisions relating to the entire process of companies' products, from design, methods of processing, packaging and distribution. This course will also help identify global business opportunities. The conceptual opportunities in this course can be applied on the Green Marketing Plan, in Green Project Management course or even the Capstone course.

Level: GR

Attributes: BUSI (p. 521), F2A9 (p. 521)

### GRMT 6120 3 credits

#### Ecological Economics for Organizations

This course explores new ways of thinking about how we manage our lives and our planet to achieve a sustainable, equitable, and prosperous future. By the end of the course, students will have an understanding of the integration of "nature's household" and "humankind's household" under ecological economics as well as the trans-disciplinary and inter-disciplinary nature of management analysis. Students should have an applied understanding of the interdependence and co-evolution of human economies and natural ecosystems and natural ecosystems over time and space. The above follows the type of system's thinking that is necessary in organizations and societies all over the world.

Level: GR

Attributes: BUSI (p. 521), F2A9 (p. 521)

### GRMT 6130 3 credits

#### Principles of Green and Clean Technologies for Business and Society's Sustainability

This course covers the introduction to physical and technological principles of solar, indirect solar, and non-solar energies with an environmental policy, social and economic backgrounds. This course introduces students to Green and Clean Technologies for business professionals. Introduction to waste management, e-waste, green buildings and water filtration training is also provided in order to ladder into other professional, corporate or on-the-job-training as well. Further knowledge of technologies or industry/corporate knowledge applied to specific companies can/should be developed for those interested in the Green Project Management course or Capstone.

Level: GR

Attributes: BUSI (p. 521), F2A9 (p. 521)

### GRMT 6140 3 credits

#### Sustainable Operations

This course develops students' ability to define and analyze sustainable business practices within the value chain of the product or service in order to develop and integrate sustainable practices at each step of the value chain. Students will learn how to measure and account for sustainability initiatives as a means of creating value at the operations management level within an organization. Students will be challenged to consider the sustainability challenges from the different stakeholder perspectives and priorities in developing and implementing sustainable operational practices and initiatives. Students will analyze graduate level papers on a variety of current research.

Level: GR

Attributes: BUSI (p. 521), F2A9 (p. 521)

# Graduate Diploma in Business Administration - Green Business Management and Sustainability

## At a Glance

### Faculty

www.kpu.ca/business (<http://www.kpu.ca/business/>)

### Area of Study:

### Academic Level:

Graduate

### Credential Granted:

Graduate Diploma

### Start Date:

Fall (September)

Spring (January)

### Intake Type:

- Limited

### Minimum Credits Required:

36

### Curriculum Effective Date:

01-Sep-2018

## Description

This program is ideally suited for those professionals interested in venturing into the evolving business movement of managing companies and organizations that are green or greening themselves.

The Green Business Management and Sustainability program has many elements of a traditional business management program, at the same time it provides professionals with the knowledge, skills and tools to direct companies and organizations towards environmental and economic sustainability.

The Green Business Management and Sustainability program consists of six general management courses (21 credits) that will allow students to develop business-related critical thinking, analytical skills, communication skills, teamwork and interpersonal skills. They will also develop skills in the management of innovation and digital transformation. Following this, students complete 15 credits of Green business specialty courses. Note: This is a two-year program, though students can choose to complete the program in an accelerated form.

## Requirements

### Admission Requirements

In addition to the Faculty's Admission Requirements, which consist of KPU's undergraduate English Proficiency Requirement (p. 13), the following program admission requirements apply:

- Successful completion of a recognized undergraduate<sup>1</sup> or graduate degree with a minimum cumulative GPA of 2.67

- A statement of intent in the program, including relevant studies and work experience. This statement should be 800 – 1000 words and cover the following:
  - Intellectual and creative interests
  - Personal goals related to the program
  - How one's background contributes to the program
  - Self-assessment of emotional intelligence with applied examples
  - Highlight interests in community involvement
- Two professional references stating suitability for the program

<sup>1</sup> Applicants with an equivalent combination of education and relevant professional experience may be considered for the program.

All applicants are assessed by an admissions committee for maturity, fit to the academic program, educational background, and work experience, using the statement of intent and references. Applicants may also be interviewed by a member of the Admissions Committee as part of the application screening process. Meeting the minimum admission requirements does not guarantee admission into the program. For further details about the statement of intent, including submission specifics, visit the department's website at: [kpu.ca/business](http://kpu.ca/business)

GRMT 6140	Sustainable Operations	3
Total Credits		36

## Credential Awarded

Upon successful completion of this program, students are eligible to receive a **Graduate Diploma in Business Administration - Green Business Management and Sustainability**.

## Human Resources Management

The Human Resources Management (HRMT) programs provide full-time and part-time intensive study for students wishing to undertake studies in the human resources management field.

Based on extensive consultations with business leaders, and explicit reference to the Required Professional Capabilities of the Certified Human Resources Practitioner (CHRP) designations, Human Resources Management course content is designed to prepare students to achieve the CHRP designation and for a range of Human Resources Professional roles.

The **Bachelor of Business Administration (BBA) in Human Resources Management** program provides full-time and part-time intensive study for students wishing to undertake studies in the human resources management field.

The **Post Baccalaureate Diploma in Human Resources Management** program is designed for adult learners who have completed a bachelor-level degree, and who are looking for a pathway to professional employment in the human resources management profession.

Graduates of the programs acquire the following:

- Critical thinking and problem-solving skills by assessing and interpreting source materials, evaluating arguments, examining and applying both case-based and real-world business based projects, as consulting teams in the development of business and human resources management solutions
- Skills to manage communication initiatives to create and implement human resources initiatives and programs that achieve organizational goals
- Professional and persuasive communications skills
- An understanding of the entire organization, and the important role of corporate citizenship
- Collaboration skills with all functional areas of an organization (accounting, human resources, operations, production, marketing, information technology, etc.)
- Skills necessary to work effectively in teams, assuming roles of leader and follower, as appropriate

Some unique features of this program include:

- Direct incorporation of Intended Learning Outcomes based on the Certified Human Resources Professional Requirements and industry feedback
- Industry based practicum capstone course, learning partnerships with business, applied projects and assignments and ongoing work experience
- Professional development for individuals seeking higher level training
- Opportunities for Cooperative Education employment while earning a degree

The HRMT programs provide full-time and part-time intensive study options for students to complete the program at their own pace. The majority of the HRMT designated courses are scheduled at 4:00 pm or in the evening to allow students to further their education while maintaining current employment. This allows for changing outside-of-school time requirements and does not lock a student into a rigid program structure and time-frame.

Many of the 1000 and 2000 level foundational courses included in the BBA HRMT program are articulated with other universities and colleges for ease of course transferability to and from KPU. Please refer to the BC Transfer Guide at <http://www.bctransferguide.ca> (<https://www.bctransferguide.ca/>) regarding the transferability of courses to and from specific institutions in British Columbia.

**Please visit** [kpu.ca/business/programs-and-courses](http://www.kpu.ca/business/programs-and-courses) (<http://www.kpu.ca/business/programs-and-courses/>) **for more information on School of Business programs.**

## Who Studies Human Resources Management?

- High school graduates who wish to pursue a human resources career
- Business students from disciplines such as Accounting, Business Management, Economics, Computer Sciences and Information Systems who wish to continue their studies by expanding the depth and breadth of their knowledge, skills, and practical human resources management experience
- Current Kwantlen Polytechnic University students who have completed courses in a different discipline (i.e. Arts, Science, Horticulture, Graphic Design) who wish to better understand human resources management practices and strategies for their field
- Mid-level management working full-time, with some post secondary education, seeking to upgrade their skills in the marketing field through part-time studies
- International students seeking a BBA degree or Post Baccalaureate diploma in Human Resources Management from an accredited university

## Career Opportunities

Depending upon their capabilities and experience, a graduate may be able to enter or advance within the field of human resources management in professional roles such as:

- Manager
- Consultant
- Analyst
- Advisor
- Coordinator

## Programs

- Post-Baccalaureate Diploma in Human Resources Management (p. 451)
- Bachelor of Business Administration in Human Resources Management (p. 452)

## Courses

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**HRMT 3105 3 credits****Human Resources Information Systems and Data**

Students will study the concepts of selecting, managing and leveraging the applications of Human Resource Information technologies to support the delivery of efficient and effective HR services. Students will also develop an understanding of the role and importance of HR analytics by being introduced to the concepts and the business application of human resources data, metrics, analyses and reporting techniques to support HR decision-making. Students will apply the course concepts to develop their knowledge and skills through the use of exercises and projects involving cases or simulated organizational situations. Note: MS Excel proficiency is recommended prior to enrolling in this course.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including BUSI 2405

Attribute: BUSI (p. 521)

**HRMT 3115 3 credits****Human Relations in Organizations**

Students will demonstrate understanding and apply key concepts of human behaviour in organizations, with in-depth focus on the phenomena of communication, leadership, decisionmaking, conflict and change at the individual, group, and organizational levels. They will further their development of interpersonal skills that contribute to effective functioning in organizational settings. Students will assess their human relations strengths and weaknesses and identify opportunities to substantively increase individual contribution to the organization and achieve higher levels of personal fulfillment in their careers and lives. Note: BUSI 1250 is a recommended elective prior to enrolling in this course.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including BUSI 1215

Attribute: BUSI (p. 521)

**HRMT 3125 3 credits****Employment Law**

Students will research, review and apply the applicable statute and common law regulating the employment relationship, including employment agreements, the duties of the employer and employee, and termination of the relationship, including the law of wrongful dismissal. Students will also address the statutory schemes which affect the employment relationship including the Employment Standards Act, and attention will also be paid to Human Rights legislation including the Duty to Accommodate. Students will also investigate emerging privacy law issues. Note: BUSI 1250 is a recommended elective prior to enrolling in this course.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including ENGL 1100 and BUSI 2390

Co-requisite(s): CMNS 3000 or ENTR 3000

Attribute: BUSI (p. 521)

**HRMT 3135 3 credits****Recruitment and Selection**

Students will use the most up-to-date aspects of the current issues and methodologies used in recruiting and selecting employees for organizations as essential components of strategic human resources planning, with an emphasis on their strategic role in enhancing organizational performance. They will deal with contemporary developments and their practical applications related to organization and job analysis, competencies and performance management, employee recruitment, screening and selection, testing, interviewing and related decision making. Note: BUSI 1250 is a recommended elective prior to enrolling in this course.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including ENGL 1100 and BUSI 1215

Attribute: BUSI (p. 521)

**HRMT 3145 3 credits****Occupational Health and Safety**

Students will work as a member of a team to identify strategic organizational practices for Occupational Health and Safety consistent with the organization's strategy; improve occupational health and safety practices through the assessment of education and communication needs and the provision of appropriate programs; and analyze program effectiveness and track accident reports and health outcomes based on information and data from a Human Resource Information System.

Level: UG

Prerequisite(s): HRMT 3115, HRMT 3125 and HRMT 3105

Attribute: BUSI (p. 521)

**HRMT 3255 3 credits****Total Compensation**

Students will evaluate and implement a road map to evolving compensation strategy and design. They will use the process a Human Resource practitioner follows in order to put together an effective compensation program according to current best practices, focusing on performance based approaches to compensation that help create programs that support an organization's broad-based strategic needs. Students will review the most advanced thinking in job analysis, job evaluation, compensation surveys, contingency-based compensation plans, executive compensation packages, productivity measurements and the use of technology in managing compensation programs in the course. Note: MS Excel proficiency is recommended prior to enrolling in this course.

Level: UG

Prerequisite(s): All of: (a) HRMT 3115, (b) HRMT 3135 and (c) ENTR 3120 or ACCT 3380 or ENTR 3170

Co-requisite(s): HRMT 3105

Attribute: BUSI (p. 521)

**HRMT 3265 3 credits****Employee Development and Coaching**

Students will use best professional practices focusing on the management of training and development as a critical investment in an organization's human resources capital. They will demonstrate processes centered around the roles and responsibilities of Human Resource Development professionals, a model of training, the importance of needs analysis, strategic goal setting, program design, on and off-the-job training methodologies, transfer of training, training evaluation and costing, the diversity of training programs, as well as the management development process. Students will also utilize coaching techniques as a powerful intervention to enhance organizational results by influencing the way people think and work together.

Level: UG

Prerequisite(s): HRMT 3115 and HRMT 3135

Attribute: BUSI (p. 521)

**HRMT 4115 3 credits****Labour Relations**

Students will practice the application of collective agreement language in an organizational setting through a series of grievance cases covering all aspects of a collective agreement. Students will use grievance decisions to prepare proposals for negotiations using collective agreement language, and will confront issues surrounding labour disruptions and the application of Labour Relations legislation.

Level: UG

Prerequisite(s): HRMT 3145 and HRMT 3255

Attribute: BUSI (p. 521)

**HRMT 4125 3 credits****Organizational Development**

Students will research, review and present key findings on best practices related to a variety of key organization development concepts, such as: the process of organization development; human process interventions; techno-structural interventions; human resources management intervention; strategic interventions and special applications of organization development, including corporate coaching

Level: UG

Prerequisite(s): All of: (a) HRMT 3265 and (b) ENTR 3100 or ENTR 3150 or ECON 3150 or ECON 2350

Attribute: BUSI (p. 521)

**HRMT 4500 6 credits****Strategic Human Resources Management**

Students will manage, design, prepare and present a comprehensive Human Resource Management project that will meet the requirements of a client organization. Students will synthesize developmental, leadership and application experiences to analyze factors internal and external to an organization and provide strategic recommendations based on an organization's human capital; develop strategic human resource plans in concert with the organization's strategic plan; and implement plans to address gaps in an organization's capabilities in order to carry out strategic plans. They will also design strategic staffing processes to maintain organizational effectiveness, analyze trends in the organization's environment and develop appropriate Human Resources responses. Note: HRMT 4125 is recommended prior to enrolling in this course.

Level: UG

Prerequisite(s): HRMT 3125, HRMT 3135, HRMT 3145, HRMT 3255 and HRMT 3265

Co-requisite(s): HRMT 4115 and HRMT 4125

Attribute: BUSI (p. 521)

## Description

The Post Baccalaureate Diploma in Human Resources Management is a 33-credit program designed for adult learners who have completed a bachelor-level degree, and who are looking for a pathway to professional employment in the human resources management profession. The Diploma program builds on the base established by the Bachelor of Business Administration (BBA) in Human Resources Management to give adult learners another avenue to upgrade skills required for advancement in the growing human resources field.

## Requirements

### Admission Requirements

In addition to the Faculty's Admission Requirements, which consist of KPU's undergraduate English Proficiency Requirement (p. 13), the following program admission requirements apply:

- Successful completion of a recognized undergraduate degree, with a Major, Minor or Diploma in Economics or Business, or successful completion of the following KPU courses: BUSI 1210 (or BUSI 1215) and ACCT 2293 (or ACCT 1110 & ACCT 1210), or equivalent transfer credit.

- Successful completion of CMNS 1140 with a grade of "C+" or higher, or equivalent transfer credit for an undergraduate Professional Communications or Business Communications course delivered in English.

Applicants who have extensive business experience may contact the School of Business Dean's office to discuss alternate admission options. In such cases, applicants will be required to submit their resume and a portfolio documenting their HR experience. An interview may also be required.

Applicants who do not meet the above course requirements for direct admission to the Post Baccalaureate Diploma program may be offered admission to the School of Business in order to complete the required courses.

On September 23, 2019 changes to the admission requirements for this program were approved by Senate. Effective September 2020 the following conditions will apply:

In addition to the Faculty's Admission Requirements, which consist of KPU's undergraduate English Proficiency Requirement (p. 13), the following program admission requirements apply:

- Successful completion of a recognized undergraduate degree, with a GPA equivalent of 2.33 or higher

## Curricular Requirements

The Post Baccalaureate Diploma program requires completion of the following 33 credits of courses with a grade point average of 2.5 or higher.

Code	Title	Credits
HRMT 3105	Human Resources Information Systems and Data	3
HRMT 3115	Human Relations in Organizations	3
HRMT 3125	Employment Law	3
HRMT 3135	Recruitment and Selection	3
HRMT 3145	Occupational Health and Safety	3
HRMT 3255	Total Compensation	3
HRMT 3265	Employee Development and Coaching	3
HRMT 4115	Labour Relations	3
HRMT 4125	Organizational Development	3
HRMT 4500	Strategic Human Resources Management	6
Total Credits		33

**Note:** Prerequisites and co-requisites of these HRMT courses in the subject areas of ACCT, CMNS and ENTR are waived for students in the Post Baccalaureate Diploma program. Prerequisites and co-requisites of these HRMT courses in the subject area of HRMT must be fulfilled.

While it is possible to complete the program in one year (three semesters), registration in all required courses is subject to space availability. Students must be prepared to take more than three semesters to complete the program. Please consult a Business Degree Advisor for assistance with course planning.

### Credential Awarded

Upon successful completion of this program, students are eligible to receive a **Post Baccalaureate Diploma in Human Resources Management**.

## Co-op Requirements Co-operative Education

The Post-Baccalaureate Diploma in Human Resources Management is offered with a Co-operative Education option. This option requires an additional 10 credits of Co-operative Education courses. Students wishing to enter and participate in the Co-op option must meet the following requirements:

### Declaration and Entrance Requirements

- Declaration of the Co-op option upon admission into the Post-Baccalaureate Diploma in Human Resources Management

### Work Term and Program Continuance Requirements

Procedures for enrollment in Co-operative Education work terms are outlined in the COOP course descriptions. Conditions for continuance in the program are:

- Completion of COOP 1101 prior to completing 15 credits
- Completion of COOP 1150 prior to completing HRMT 4500
- Minimum GPA of 2.7
- Instructor Permission

### Co-op Course Requirements

The Co-operative Education designation requires successful completion of the following courses:

Code	Title	Credits
COOP 1101	Job Search Techniques	1
COOP 1150	Co-op Work Semester 1	9
Total Credits		10

Note: These COOP courses must be completed sequentially. COOP courses can only be used to satisfy the Co-op designation and cannot be used to satisfy other curricular requirements of the program.

### Additional Requirements

In addition to the requirements stated above, all Co-op students must satisfy the General Co-operative Education Requirements (p. 31).

### Credential Awarded

Upon successful completion of this program with co-operative education, students are eligible to receive a **Post Baccalaureate Diploma in Human Resources Management, Co-operative Education Option**.

Total Credits		120-124

<sup>1</sup> Students who choose Group B may count the additional Accounting course as a general elective.

## Credential Awarded

Upon successful completion of this program with co-operative education, students are eligible to receive a **Bachelor of Business Administration in Human Resources Management, Co-operative Education Option**.

## Co-op Requirements Co-operative Education

The BBA in Human Resources Management degree is offered with a Co-operative Education option. Co-operative Education gives a student the opportunity to apply the skills gained during academic study in paid, practical work experience semesters. Degree students can complete a minimum of three work terms while completing their degree. Work terms generally occur full-time in separate 4 month work semesters but may also be available part-time over an 8 month continuous (parallel) placement. Work semesters alternate with academic study.

Students wishing to enter and participate in the Co-op Option must meet the following requirements:

### Declaration and Entrance Requirements

- Declaration of Co-op specialization into the Bachelor of Business Administration in Human Resources Management Program
- Minimum GPA of 2.7
- Maximum 75 credits completed

### Work Term and Program Continuance Requirements

Procedures for enrollment in Co-operative Education work terms are outlined in the COOP course descriptions. Conditions for continuance in the program are:

- Completion of COOP 1101 prior to completing 75 credits
- Minimum GPA of 2.7
- Instructor Permission

### Co-op Course Requirements

The Co-operative Education designation requires successful completion of the following courses:

Code	Title	Credits
COOP 1101	Job Search Techniques	1
COOP 1150	Co-op Work Semester 1	9
COOP 2150	Co-op Work Semester 2	9
COOP 3150	Co-op Work Semester 3	9
Optional:		
COOP 4150	Co-op Work Semester 4	
Total Credits		28

Note: These COOP courses must be completed sequentially. COOP 1150, COOP 2150, COOP 3150, or COOP 4150 may be taken part-time over two consecutive semesters as COOP 1150A/COOP 1150B, COOP 2150A/COOP 2150B, COOP 3150A/COOP 3150B or COOP 4150A/COOP 4150B. COOP courses can only be used to satisfy the Co-op designation and cannot be used to satisfy other curricular requirements of the program.

## Additional Requirements

In addition to the requirements stated above, all Co-op students must satisfy the General Co-operative Education Requirements (p. 31).

## Credential Awarded

Upon successful completion of this program with co-operative education, students are eligible to receive a **Bachelor of Business Administration in Human Resources Management, Co-operative Education Option**.

## Information Technology

The Bachelor of Technology in Information Technology (BTech in IT) program allows students to earn a bachelor degree that prepares them for employment in the IT industry in Canada or for graduate school. The BTech in IT degree offers courses in computer hardware, operating systems, computer networks that lead to CISCO certification; computer security, server systems, virtualization and cloud computing, wireless networks, web programming, web design, web application development, mobile and social media application development, IT program management and entrepreneurship. Graduates of the program will work as system administrators, systems analysts, networking professionals, software developers, web developers, mobile app developers, and IT project managers.

Students may apply to start the program in the summer semester but should note that course offerings may be limited. They are advised to consult a business degree advisor for course planning assistance.

Specific features of this program include:

- Recently revised curriculum with contemporary course content
- Specializations in computer network administration and security and mobile and web application development that provide focused, in-depth training in key IT areas
- Practical projects in most courses
- Course offerings during the day and in the evenings for Fall, Spring and Summer semesters provide maximum flexibility for student schedules
- Year-long capstone project course provides opportunities for advanced research and to work with real projects from industry
- Co-op opportunities with wide range of employers while earning a degree
- Professional networking opportunities to prepare for employment after graduation

**Please visit** [kpu.ca/business/programs-and-courses](http://www.kpu.ca/business/programs-and-courses) (<http://www.kpu.ca/business/programs-and-courses/>) **for more information on School of Business programs.**

## Who Studies Information Technology?

This degree is designed for students interested in pursuing a career in one of the many fields within the Information Technology sector. At a minimum, students entering the program should have completed high school MATH 11 Foundations with a C+ or a KPU equivalent MATQ qualifying course or have achieved an equivalent result on KPU's Math Placement Test.

## Career Opportunities

Graduates of this program may find employment in the following areas:

- Enterprise network system administration
- Information system security
- Web design, development and integration
- Mobile software application development
- Software analysis design and development
- Software quality assurance, testing and validation
- Enterprise resource planning (ERP) systems implementation
- Project management
- Hardware and software technical support
- Wireless systems development

## Programs

- Bachelor of Technology in Information Technology (p. 461)

## Courses

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

### INFO 1111 3 credits

#### Introduction to Computer Hardware and Software

Students will learn general computer hardware and software concepts. They will study the general architecture of the computer and examine hardware components such as microprocessors, memory, motherboards, expansion buses, power supplies, hard disk drives, removable media, peripherals, input/output devices, video, audio, and network interface cards. They will compare differences between hardware used in enterprise, personal and mobile computing devices. Students will also study the functions of operating systems and device drivers and will be provided an overview of popular application software.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521), PW\_2 (p. 522)

### INFO 1112 3 credits

#### Principles of Program Structure and Design I

Students will learn the fundamental logic and structure of computer programs. They will develop skills in different aspects of the problem-solving and programming process including analyzing requirements, designing solutions, coding, testing and writing documentation with emphasis on structured programming and modular design techniques. Students will be required to design and implement a software application.

Level: UG

Prerequisite(s): Level E1 as defined in the Math Alternatives Table (p. 779)

Attributes: ASTR (p. 523), BUSI (p. 521)

### INFO 1113 3 credits

#### Systems Analysis and Design

Students will study current strategies, methodologies and techniques of systems analysis and design with an emphasis on the role of systems analysts in an organization and collaboration within the overall process. Students will learn how to elicit general information system requirements, perform object-oriented system analysis and design, and generate user documentations. Students working in groups will analyze and design small information systems using object-oriented methodology. Students will examine from an ethical perspective issues specific to information technology professionals, such as intellectual property, access, security and protection of private information, and codes of conduct.

Level: UG

Prerequisite(s): Level E1 as defined in the Math Alternatives Table (p. 779)

Attributes: ASTR (p. 523), BUSI (p. 521)

### INFO 1211 3 credits

#### Operating Systems Principles And Applications

Students will learn the fundamentals of operating systems and system utilities. They will study principles such as operating system architecture, input/output systems, file systems, process management and thread management. Students will work with multi-user, multi-tasking operating systems such as Windows, UNIX and Linux.

Level: UG

Prerequisite(s): INFO 1111 and Level E1 as defined in the Math Alternatives Table (p. 779).

Attributes: ASTR (p. 523), BUSI (p. 521)

### INFO 1212 3 credits

#### Networking Technologies I

Students will learn the fundamental architecture, functions and components of computer networks. They will build local area networks with routers and switches and implement Internet Protocol (IP) addressing schemes.

Level: UG

Prerequisite(s): INFO 1111 and Level E1 as defined in the Math Alternatives Table (p. 779)

Attributes: ASTR (p. 523), BUSI (p. 521)

### INFO 1213 3 credits

#### Web Application Development

Students will learn the operating principles of the World Wide Web and its relationship with the Internet. They will learn the client-server model, Internet protocols, domain names and URLs, websites and Web hosting. They will also learn HTML, CSS, JavaScript and XML. Students will program both in client and server-side environments and develop data-driven Web applications. They will also learn to deploy applications on web hosting servers.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521)

### INFO 1214 3 credits

#### Discrete Mathematics for Information Technology

Students will learn the basic mathematical concepts which form the foundations of computing systems. They will be able to apply mathematical logic and methods to software development. They will learn the principles and applications of discrete mathematics, data organization and data representation.

Level: UG

Prerequisite(s): Level E1 as defined in the Math Alternatives Table (p. 779).

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 2311 3 credits****Networking Technologies II**

Students will learn the operation details of routers and switches in small to medium size computer networks. They will acquire skills for configuring and troubleshooting routers and switches. They will also develop skills in resolving common issues which exist when routing between different protocols.

Level: UG

Prerequisite(s): INFO 1212

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 2312 3 credits****Database Management Systems**

Students will learn the concepts and theory of database models, with particular emphasis on the relational model. They will learn and practice database designs utilizing Entity-Relationship Modeling, functional dependencies, and database table normalization. Students will learn Structured Query Language (SQL) and use SQL statements to design, query and maintain databases.

Level: UG

Prerequisite(s): INFO 1112 and INFO 1113

Attribute: BUSI (p. 521)

**INFO 2313 3 credits****Object-Oriented Programming**

Students will learn the principles and concepts of object-oriented programming. They will learn class definition, objects, object interaction, inheritance, polymorphism, interface, abstract classes, and exception handling. They will also learn event-driven programming and object-oriented analysis and design.

Level: UG

Prerequisite(s): INFO 1112

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 2315 3 credits****Data Structure**

Students will learn the data structures and associated algorithms commonly used in system development. They will learn Application of Linked Lists, Stacks, Queues, Binary Trees, Balanced Trees, Searching of Trees, Lists, Inverted Lists, Multi-lists and Graphs. These are the fundamental tools available for contemporary programming languages for implementation of complex algorithms.

Level: UG

Prerequisite(s): INFO 2313

Cross-listing: CPSC 2302

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 2411 3 credits****Foundations of Computer Security**

Students will learn fundamental concepts, theories, methodologies and techniques of computer and network security. Students will gain an understanding of the importance of security within and between organizations, including the ongoing threats and vulnerabilities on networks. In this course the significance of being ethical is emphasized. It covers the aspects of systems security from the perspective of providing security mechanisms for protecting networks. Students will learn several software tools and techniques related to computer security using mechanisms such as cryptographic systems, authentication and access control methods. Different types of network and computer attacks are studied. Tools to discover network designs, functionality, resources and vulnerabilities are introduced.

Level: UG

Prerequisite(s): INFO 1112 and INFO 1212

Attribute: BUSI (p. 521)

**INFO 2412 3 credits****Management of Information Systems**

Students will learn information system management in the global economy. They will learn how to plan information systems and design corporate information technology architectures. Students will also learn how to manage corporate information resources and how to select technologies for developing effective information systems. They will be introduced to issues in managing systems that support knowledge-based work and managing information system security.

Level: UG

Prerequisite(s): INFO 1113

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 2413 3 credits****System Development Project**

Students will work on real-world computer information system projects on a team basis. They will integrate computer and system concepts learned in the first two years of the program to analyze project requirements, design and implement a software based information system using appropriate tools.

Level: UG

Prerequisite(s): All of (a) INFO 2312 (b) INFO 2313 and (c) 15 credits from courses in INFO at the 1100 level or higher

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 2416 3 credits****Server Operating Systems**

Students will learn the principles, techniques and strategies used in planning, installing, testing, and administering a server operating system. Students will learn to create and manage user accounts using Active Directory, and to install and configure server roles including Dynamic Host Configuration Protocol (DHCP), Domain Name System (DNS), printer server, Internet Information Services (IIS), and Virtual Private Network (VPN). Students will be required to plan, design, and install an application server to simulate real-world scenarios. Students will have hands-on experience in installing, troubleshooting, fine-tuning, and administering a server operating system.

Level: UG

Prerequisite(s): INFO 1211 and INFO 1212

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 3110 3 credits****Professional Communications in Information Technology**

Students will address the activities and techniques for developing proposals, specifications, user guides, reports, memoranda, executive summaries and other documentation commonly used in information technology. Students will present a variety of individual and group written and oral communication assignments, reflecting current Information Systems models.

Level: UG

Prerequisite(s): All of (a) CMNS 1140 (b) ENGL 1100 and (c) 9 credits from courses in INFO at the 2000 level or higher

Attribute: BUSI (p. 521)

**INFO 3120 3 credits****Web Programming with Java**

Students will learn the syntax, resources and utilities package of Java related to web applications. Students will also examine web design principles, apply their knowledge to construct web components, including Java Server Pages (JSP), Servlets and JavaBeans for both Internet and Intranet environments, and implement dynamic web applications using a Java web server and a relational database management system.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher, or permission of the instructor.

Attribute: BUSI (p. 521)

**INFO 3135 3 credits****Advanced Web Application Development**

Students will learn PHP and MySQL and use them to develop dynamic, secure and commercially usable websites. They will learn the basics of PHP and MySQL and will also learn how to access the data in a MySQL database through the Web using PHP. The students will be able to develop shopping carts and Web forums using PHP and MySQL.

Level: UG

Prerequisite(s): All of (a) 6 credits from courses in INFO at the 2000 level, (b) INFO 1213 and (c) INFO 2313 or CPSC 1204

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 3150 3 credits****Object-Oriented Software Engineering**

Students will learn the methods of identifying system requirements and producing object models and designs based on the requirements. They will learn the concepts of Unified Modeling Language (UML). They will identify use cases and expand them into object-oriented designs. Students will use the concepts of software engineering to analyze, design and implement software systems. The students will also be introduced to the concepts of Agile Software Development.

Level: UG

Prerequisite(s): All of (a) 6 credits from courses in INFO at the 2000 level and (b) INFO 2313 or CPSC 1204

Attribute: BUSI (p. 521)

**INFO 3160 3 credits****Network Operating Systems**

Students will learn the principles, techniques and strategies used in planning, installing, testing, and administering a server operating system. The course covers creating and managing users using Active Directory, installing and configuring Dynamic Host Configuration Protocol (DHCP), Domain Name System (DNS), Printer Server, Internet Information Services (IIS), Web Server, and a Virtual Private Network (VPN). Students will be required to plan, design, and install an application server simulating real-world scenarios. Students will have hands-on experience in installing, troubleshooting, fine-tuning, and administering a server operating system.

Level: UG

Prerequisite(s): Acceptance into Bachelor of Technology in Information Technology

Attribute: BUSI (p. 521)

**INFO 3170 3 credits****Security of Enterprise Networks**

Students will learn the fundamentals of network security and the principles of firewalls and Virtual Private Networks (VPN). They will learn how to identify network security threats. They will also learn how to select and deploy firewalls and manage VPNs.

Level: UG

Prerequisite(s): INFO 2411, plus 6 credits from courses in INFO at the 2000 level.

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 3171 3 credits****System Security**

Students will learn fundamental concepts, theories and practical skills of system security. This course covers vulnerabilities of operating systems and covers how systems can be penetrated. Students will learn digital data integrity to ensure the data is unchanged. It also covers data security, network security, web server security and web application security. Tools to discover network designs, functionality, resources, and vulnerabilities are introduced. Security mechanisms for protecting networks are evaluated and security planning is considered. In this course the significance of being ethical is emphasized.

Level: UG

Prerequisite(s): INFO 2411 and 6 credits from courses in INFO at the 2000 level

Attribute: BUSI (p. 521)

**INFO 3180 3 credits****Wireless Networks**

Students will learn the concepts and practical skills of wireless local area networks (WLANs). They will learn the fundamentals of radio frequency (RF) signals, mathematical skills required in RF signal power calculations, wireless antennas, antenna accessories, and spread spectrum technologies. The students will also learn WLAN infrastructure devices, WLAN organizations and standards, WLAN network architectures, wireless site survey and WLAN troubleshooting techniques.

Level: UG

Prerequisite(s): INFO 2311 plus 6 credits from courses in INFO at the 2000 level

Attribute: BUSI (p. 521)

**INFO 3210 3 credits****Distributed Systems**

Students will learn principles, techniques and strategies used in design and implementation of distributed applications and system solutions that are robust, scalable, and secure. Students focus on modeling distributed systems and building distributed objects using .NET framework. Students will be required to develop a distributed business solution using C# and .NET Remoting.

Level: UG

Prerequisite(s): Acceptance into 3rd year of the BTech program.

Attribute: BUSI (p. 521)

**INFO 3225 3 credits****Web Multimedia**

Students will learn the different types of multimedia (e.g. text, images, sound, animation and video) required in website development. They will learn the theoretical foundations and the practical tools for creating graphics, sound, animation and video content that will be used in websites, as well as multimedia design considerations.

Level: UG

Prerequisite(s): All of (a) 9 credits of courses in INFO at the 2000 level, (b) INFO 1213 and (c) INFO 2313 or CPSC 1204

Attribute: BUSI (p. 521)

**INFO 3230 3 credits****Advanced Object-Oriented Application Development**

Students will learn to use object-oriented methodology to analyze, design and implement real-world software applications. Students will learn the best practices for iterative software development recommended by the Unified Process (UP). Student will learn the advanced features of the Unified Modeling Language (UML) in modeling distributed software applications. Students also will learn the concepts of software design patterns and how these patterns can be used to create flexible and extensible software.

Level: UG

Attribute: BUSI (p. 521)

**INFO 3235 3 credits****Software Quality Assurance**

Students will learn the essential features involved in developing timely, cost-effective and high-quality software products that meet the user's requirements. They will examine the effective deployment of quality assurance procedures throughout the entire software development process. They will learn the concepts of Total Quality Management (TQM), the development of quality assurance plans, the implementation of verification and validation functions, the selection of tools to support quality assurance, the application of software metrics to measure quality, and the International Standards Organization (ISO) certification process.

Level: UG

Prerequisite(s): INFO 3150

Attribute: BUSI (p. 521)

**INFO 3240 3 credits****Enterprise Resource Planning Systems**

Students will learn the concepts in Enterprise Resource Planning (ERP). They will learn the basis of how integrated information systems such as ERP systems can help companies to optimize business processes. Students also will learn business process modeling, process improvement and ERP implementation. They will explore the role of ERP in electronic commerce. Students will gain hands-on experience through working on an ERP system.

Level: UG

Prerequisite(s): 9 credits from courses in INFO at the 2000 level

Attribute: BUSI (p. 521)

**INFO 3241 3 credits****Identity Management**

Students will learn the fundamental concepts of digital identity management. They will learn the concepts of digital identity, digital identity lifecycles, digital rights management and identity management architecture building. They will also examine industrial software and tools and use them to build identity management systems.

Level: UG

Prerequisite(s): INFO 3160

Attribute: BUSI (p. 521)

**INFO 3245 3 credits****Mobile Programming**

Students will learn the skills for developing Android-based mobile applications. They will be introduced to the basics of wireless technologies associated with a smartphone such as cellular networks, Wi-Fi networks, satellite networks, and GPS systems. They will learn the Android fundamentals and the methods for designing and developing Android software programs for database, audio, video and communication applications.

Level: UG

Prerequisite(s): All of (a) 9 credits from courses in INFO at the 2000 level and (b) INFO 2313 or CPSC 1204

Attribute: BUSI (p. 521)

**INFO 3246 3 credits****Mobile Programming II**

Students will learn software application development for iOS, the mobile operating system from Apple Inc. They will be introduced to programming in Objective-C and will learn the skills in designing, developing and deploying different types of mobile applications for both iPad and iPhone.

Level: UG

Attribute: BUSI (p. 521)

**INFO 3250 3 credits****Content Management and Information Architecture**

Students will learn the concepts of content management and information architecture. They will learn to apply the enterprise content management (ECM) methodology for managing digital assets, records, and knowledge throughout an organization. They will learn how to analyze and plan ECM solutions based on an organizations needs and business requirements. Students will also learn to design information architecture and implement taxonomy in organizing content throughout the information life cycle.

Level: UG

Prerequisite(s): 9 credits from courses in INFO at the 2000 level

Attribute: BUSI (p. 521)

**INFO 3280 3 credits****Information Technology Project Management**

Students will learn topics in Information Technology (IT) project management. They will examine various issues related to the development and implementation of complex information systems. Students will explore the use of new technologies in IT project management and will use a project management software tool to complete assignments, case studies and a term project.

Level: UG

Prerequisite(s): 9 credits from courses in INFO at the 2000 level

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 3290 3 credits****Virtualization**

Students will learn the fundamentals of virtualization. They will learn the internals of a Virtual Machine (VM), how to install and deploy VM Applications on desktop computers and enterprise servers, back up and recovering VMs, use virtual file systems, implement failover clusters, create load-balanced clusters, build VM clusters. They will also be introduced to storage networking and storage virtualization, and virtualized information systems.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 3390 3 credits****Networking Technologies III**

Student will learn the architecture, components, and operations of routers and switches in a larger and complex network. They will configure and troubleshoot routers and switches and resolve common issues related to routing and switching in both Internet Protocol version 4 (IPv4) and Internet Protocol version 6 (IPv6) networks.

Level: UG

Prerequisite(s): 9 credits from courses in INFO at the 2000 level, including INFO 2311

Attribute: BUSI (p. 521)

**INFO 4105 3 credits****Search Engine Principles**

Students will learn the principles of search engines and information retrieval. Information filtering and retrieval drives some of the world's most successful and high-tech businesses. Students will learn various methods of search engine optimization (SEO), ranging from theory to implementation. Students will learn how to use tools and methods to perform searches and utilize results effectively. They will also learn how large data sources such as social media affects information retrieval.

Level: UG

Prerequisite(s): INFO 3135, plus 9 credits from courses in INFO at the 3000 level.

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 4110 3 credits****Cloud Computing**

Students will learn cloud computing basics, benefits and limitations, cloud computing technologies (hardware and infrastructure), cloud accessing technologies, cloud storage, standards in cloud computing, software as a service, platform as service and cloud application development.

Level: UG

Prerequisite(s): INFO 3390, plus 12 credits from courses at the 3000 level.

Attribute: BUSI (p. 521)

**INFO 4115 3 credits****Human Factors and Website Design**

Students will learn computer interface design requirements based on perceptual and cognitive factors; learnability; recall, recognition and retention; speed and accuracy of performance, and apply them in Web design process. They will learn website planning and design, usability, website navigation design, graphics and color selection, text formatting using cascaded style sheet (CSS), browser compatibility testing and interactivity design using JavaScripts.

Level: UG

Prerequisite(s): INFO 3135 plus 9 credits from courses in INFO at the 3000 level

Attribute: BUSI (p. 521)

**INFO 4120 3 credits****Digital Forensics**

Students will learn the foundations of digital forensics. They will learn the key technical concepts, the methodologies used and the tools needed in digital forensics. Students will learn how to perform examinations for computers, networks, mobile devices, GPS, the Cloud and the Internet. Students will also learn how to collect evidence, document the scenes, and recover deleted data.

Level: UG

Prerequisite(s): INFO 3170 plus 9 credits from courses in INFO at the 3000 level

Attribute: BUSI (p. 521)

**INFO 4125 3 credits****Website and Cloud Security**

Students will learn the core mechanisms and tools for Web and cloud security. They will learn the principles of Web attacks on authentication, users, application servers, data stores, back-end components, application logic and bypassing client side controls. They will learn how to discover and prevent Web security flaws during Web application development and measures to improve Web security. They will also learn how to identify and resolve the security issues specific to public and private clouds.

Level: UG

Prerequisite(s): INFO 2411 plus 12 credits from courses in INFO at the 3000 level

Attribute: BUSI (p. 521)

**INFO 4190 3 credits****Integration Project I**

Students will conduct an extensive literature review and research for projects originating from faculty or the stakeholders from the industry or local communities. Students will carry out detailed project designs and complete the overall project design documentation in this capstone course. They will report the design results through presentations that are open to all faculty and students in the department and industry sponsors. Students will apply in great depth and breadth the system, hardware, software and project management knowledge they learned in the program to the accomplish the tasks of the project. Note: This course is a prerequisite for INFO 4290 Integration Project II where the students will implement their designs using software and/or hardware.

Level: UG

Prerequisite(s): 24 credits from courses in INFO at the 3000 level

Attribute: BUSI (p. 521)

**INFO 4210 3 credits****Human Factors and Computer Interface Design**

Students will study procedures for analyzing human-computer interaction (HCI) and will translate this information into design criteria. They will learn to ensure that computer interface design specifications meet end-user requirements for perceptual and cognitive factors; learnability; recall, recognition and retention; speed and accuracy of performance; cultural factors; and job satisfaction. They will identify task and system requirements and perform usability testing methodologies for both desktop and small screen interfaces.

Level: UG

Prerequisite(s): 12 credits from courses in INFO at the 3000 level, and acceptance into 3rd year of the BTech program.

Attribute: BUSI (p. 521)

**INFO 4225 3 credits****Animations**

Students will learn the skills of using professional software to create animations for Web applications. They will learn simple and complex graphics, graphics on multiple layers, symbols and basic animation, motion and shape Tweening, buttons and actions, and action programming.

Level: UG

Prerequisite(s): INFO 3225

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 4235 3 credits****Special Topics in Web and Mobile Application Development**

This course offers selected topics on web and mobile application development. The topics will be based on emerging industrial technologies, including but not limited to application design, service integration, system development, and application deployment on both web and mobile platforms. Students will learn novel concepts of web and mobile technologies required by the IT industry.

Level: UG

Prerequisite(s): INFO 3135, plus 9 credits from courses in INFO at the 3000 level.

Attribute: BUSI (p. 521)

**INFO 4250 3 credits****Special Topics in Network Administration and Security**

Students will learn special topics in network administration and security. This course is designed to cover emerging technologies that the department deems important but are not covered in other courses. Currently the course covers data center fundamentals. Topics include introduction to server farms, infrastructure protocols, security and load balancing, server health management, persistence mechanisms on load balancers and data center design.

Level: UG

Prerequisite(s): INFO 3160

Attribute: BUSI (p. 521)

**INFO 4260 3 credits****Networking Technologies IV**

Students will learn Wide Area Network (WAN) technologies and network services in a complex network. They will analyse and evaluate network devices and WAN technologies to meet network requirements. Students will also develop the knowledge and skills needed to implement Internet Protocol Security (IPSec) and Virtual Private Network (VPN) operations in large network.

Level: UG

Prerequisite(s): 12 credits from courses in INFO at the 3000 level, including INFO 3390.

Attribute: BUSI (p. 521)

**INFO 4290 3 credits****Integration Project II**

Students will implement the project designs they produced in the course INFO 4190 (Integration Project I) using suitable software tools and selected hardware. They will test and debug the project implementations and generate the final system prototype and project documentation. They will report and demonstrate the final project results through presentations which are open to all faculty and students in the department, as well as industrial sponsors.

Level: UG

Prerequisite(s): INFO 4190

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 4310 3 credits****Entrepreneurial Development in Information Technology**

Students will gain an understanding of entrepreneurship fundamentals in the information technology sector, including business planning, financing and venture capital, operations, human resources, marketing and personal selling.

Level: UG

Prerequisite(s): 12 credits from courses in INFO at the 3000 level.

Attribute: BUSI (p. 521)

**INFO 4320 3 credits****Software Quality Assurance**

Students will learn the essential features involved developing timely, cost-effective and high quality software products that meet the user's requirements. They will examine the effective deployment of quality assurance procedures throughout the entire software development process. Other topics covered in this course will include: the concepts of Total Quality Management (TQM), development of quality assurance plans, implementation of verification and validation functions, selection of tools to support quality assurance, application of software metrics to measure quality, and the International Standards Organization (ISO) certification process.

Level: UG

Attribute: BUSI (p. 521)

**INFO 4330 3 credits****Data Warehousing and Data Mining**

Students will examine the problems caused by having too much information and the methods, processes and tools for extracting useful information from multidimensional databases and data marts stored on different system platforms. They will also acquire the techniques for defining, selecting, implementing and evaluating data warehousing and data mining solutions for businesses.

Level: UG

Prerequisite(s): INFO 2312, plus 12 credits from courses in INFO at the 3000 level.

Attribute: BUSI (p. 521)

**INFO 4350 3 credits****Wireless Technologies and Programming**

Students will learn the concepts and principles of wireless technologies, wireless devices, wireless signals, wireless networks and wireless access technologies. They will learn wireless programming techniques and will develop wireless applications using technologies that include Wireless Markup Language (WML), WMLScript, Java and Microsoft .NET based wireless application development environments.

Level: UG

Attribute: BUSI (p. 521)

**INFO 4370 3 credits****Security of Wireless Systems**

Students will learn about wireless security technologies such as advanced user authentication, robust encryption, and intrusion prevention. They also will learn concepts of wireless discovery, wireless attack identification and monitoring, and wireless security policies and solutions. Students will be required to conduct research and work on a project to solve real-world wireless system security problems in a simulated environment.

Level: UG

Prerequisite(s): INFO 3180, plus 9 credits from courses in INFO at the 3000 level.

Attribute: BUSI (p. 521)

**INFO 4381 3 credits****Internet of Things and Applications**

Students will learn the concepts of "Internet of Things" (IoT) and their related applications. The underlying principles and architectures of sensors and actuators are discussed. The course also examines IoT's connectivity, platforms and different application domains. Data analytics and IoT system security are also explored in the course. In addition, students will do a course project using selected hardware, software and development tools.

Level: UG

Prerequisite(s): INFO 3180 and 9 credits from courses in INFO at the 3000 level

Attribute: BUSI (p. 521)

## Bachelor of Technology in Information Technology

### At a Glance

#### Faculty

#### Academic Level:

Undergraduate

#### Credential Granted:

Baccalaureate Degree

#### Start Date:

Fall (September)

Spring (January)

Summer (May)

#### Intake Type:

- Open

#### Minimum Credits Required:

120

#### Curriculum Effective Date:

01-Sep-2018

## Description

The Bachelor of Technology in Information Technology (BTech in IT) program allows students to earn a bachelor degree that prepares them for employment in the IT industry in Canada or for graduate school. Courses are offered so that students can focus on network administration and security or mobile and web application development based on their interests and career goals.

## Requirements

### Admission Requirements

The Faculty's Admission Requirements, which consist of KPU's undergraduate English Proficiency Requirement (p. 13), apply to this program.

### Declaration Requirements

Students intending to graduate with this School of Business degree must declare the credential. At the time of declaration, the student must satisfy all of the following requirements:

- In good academic standing with the University
- Completion of a minimum of 15 credits of undergraduate coursework.

### Curricular Requirements

The degree program requires a minimum of 120 credits of required courses and electives. The degree program with Co-operative Education requires an additional 28 credits of Co-op Education credits.

Note: BC Math 11 Foundations with a minimum grade of C+ (or an equivalent course) is a prerequisite for several INFO courses in Year 1. Consult an Academic Advisor to plan your course selections accordingly.

Course	Title	Credits
<b>Year 1</b>		
BUQU 1130 or MATH 1140	Business Mathematics or Calculus I (Business Applications)	3
Select one of the following:		3-4
BUQU 1230	Business Statistics	
MATH 1115	Statistics I	
MATH 2341	Introduction to Statistics for Business	
INFO 1111	Introduction to Computer Hardware and Software	3
INFO 1112	Principles of Program Structure and Design I	3
INFO 1113	Systems Analysis and Design	3
INFO 1211	Operating Systems Principles And Applications	3
INFO 1212	Networking Technologies I	3
INFO 1213	Web Application Development	3
INFO 1214	Discrete Mathematics for Information Technology	3
PHIL 1150	Introduction to Formal Logic	3
		Credits
		30-31
<b>Year 2</b>		
BUSI 1110	Fundamentals of Business in Canada	3
CMNS 1140	Introduction to Professional Communication	3
ENGL 1100	Introduction to University Writing	3
INFO 2311	Networking Technologies II	3
INFO 2312	Database Management Systems	3
INFO 2313	Object-Oriented Programming	3
INFO 2315	Data Structure	3
INFO 2411	Foundations of Computer Security	3
INFO 2413	System Development Project	3
INFO 2416	Server Operating Systems	3
		Credits
		30
<b>Year 3</b>		
<b>INFO Core Courses</b>		
INFO 3110	Professional Communications in Information Technology	3
INFO 3150	Object-Oriented Software Engineering	3
INFO 3250	Content Management and Information Architecture	3
INFO 3280	Information Technology Project Management	3
<b>INFO Electives</b>		
Select four of the following:		12

INFO 3135	Advanced Web Application Development	
INFO 3171	System Security	
INFO 3180	Wireless Networks	
INFO 3225	Web Multimedia	
INFO 3235	Software Quality Assurance	
INFO 3240	Enterprise Resource Planning Systems	
INFO 3245	Mobile Programming	
INFO 3390	Networking Technologies III	
Select one of the following:		3
CBSY 3100		
PHIL 3033	Business Ethics	
PHIL 3109	Foundations in Ethics	
<b>Breadth Electives</b>		
Select one course numbered 1100 or higher in any area of study other than CBSY, CPSC, or INFO.		3
		Credits
		30
<b>Year 4</b>		
<b>INFO Core Courses</b>		
INFO 4190	Integration Project I	3
INFO 4290	Integration Project II	3
INFO 4310	Entrepreneurial Development in Information Technology	3
<b>INFO Electives</b>		
Select five of the following:		15
INFO 4105	Search Engine Principles	
INFO 4110	Cloud Computing	
INFO 4115	Human Factors and Website Design	
INFO 4120	Digital Forensics	
INFO 4125	Website and Cloud Security	
INFO 4235	Special Topics in Web and Mobile Application Development	
INFO 4260	Networking Technologies IV	
INFO 4330	Data Warehousing and Data Mining	
INFO 4370	Security of Wireless Systems	
INFO 4381	Internet of Things and Applications	
<b>Breadth Electives</b>		
Select two courses numbered 1100 or higher in any area of study other than CBSY, CPSC, or INFO.		6
		Credits
		30
Total Credits		120-121

**Note:** Students may select INFO electives in Year 3 and Year 4 to fulfill a degree specialization.

## Degree Specializations

### Network Administration and Security

To complete the Bachelor of Technology with a specialization in Network Administration and Security, students must successfully complete all of:

Code	Title	Credits
INFO 3171	System Security	3
INFO 3180	Wireless Networks	3
INFO 3240	Enterprise Resource Planning Systems	3
INFO 3390	Networking Technologies III	3
INFO 4110	Cloud Computing	3
INFO 4120	Digital Forensics	3
INFO 4260	Networking Technologies IV	3
INFO 4370	Security of Wireless Systems	3
INFO 4381	Internet of Things and Applications	3
Total Credits		27

### Mobile and Web Application Development

To complete the Bachelor of Technology with a specialization in Mobile and Web Application Development, students must successfully complete all of:

Code	Title	Credits
INFO 3135	Advanced Web Application Development	3
INFO 3225	Web Multimedia	3
INFO 3235	Software Quality Assurance	3
INFO 3245	Mobile Programming	3
INFO 4105	Search Engine Principles	3
INFO 4115	Human Factors and Website Design	3
INFO 4125	Website and Cloud Security	3
INFO 4235	Special Topics in Web and Mobile Application Development	3
INFO 4330	Data Warehousing and Data Mining	3
Total Credits		27

## Credential Awarded

Upon successful completion of this program, students are eligible to receive a **Bachelor of Technology in Information Technology**.

## Co-op Requirements Co-operative Education

The Bachelor of Technology – Information Technology degree is offered with a Co-operative Education option. Co-operative Education gives a student the opportunity to apply the skills gained during academic study in paid, practical work experience semesters. Degree students can complete a minimum of three work terms while completing their degree. Work terms generally occur full-time in separate 4 month work semesters but may also be available part-time over an 8 month continuous (parallel) placement. Work semesters alternate with academic study.

Students wishing to enter and participate in the Co-op Option must meet the following requirements:

### Declaration and Entrance Requirements

- Declaration of Co-op specialization in the Bachelor of Technology in Information Technology program.
- Minimum GPA of 2.5
- Maximum of 75 credits completed

### Work Term and Program Continuance Requirements

Procedures for enrolment in Co-operative Education work terms are outlined in the COOP course descriptions. Conditions for continuance in the program are:

- Successful completion of COOP 1101 prior to completing 75 credits
- Minimum GPA of 2.5
- Instructor Permission

### Co-op Course Requirements

The Co-operative Education designation requires successful completion of the following courses:

Code	Title	Credits
COOP 1101	Job Search Techniques	1
COOP 1150	Co-op Work Semester 1	9
COOP 2150	Co-op Work Semester 2	9
COOP 3150	Co-op Work Semester 3	9
Optional:		
COOP 4150	Co-op Work Semester 4	
Total Credits		28

Note: These COOP courses must be completed sequentially. COOP 1150, COOP 2150, COOP 3150, or COOP 4150 may be taken part-time over two consecutive semesters as COOP 1150A/COOP 1150B, COOP 2150A/COOP 2150B, COOP 3150A/COOP 3150B or COOP 4150A/COOP 4150B. Co-op courses may be used only to satisfy the Co-op designation and cannot be used to satisfy other curricular requirements of the program.

### Additional Requirements

In addition to the requirements stated above, all Co-op students must satisfy the General Co-operative Education Requirements (p. 31).

### Other Information

Students enrolled in this program are expected to have their own laptop computers.

### Credential Awarded

Upon successful completion of this program with co-operative education, students are eligible to receive a **Bachelor of Technology in Information Technology, Co-operative Education Option**.

## Legal Administrative Studies

Want to work in an office? Interested in the law? If so, a career as a Legal Administrative Assistant is for you!

*Did you know that Legal Administrative Assistants are amongst the highest paid office assistants in BC?* This is because Legal Administrative Assistants are professional assistants who have knowledge of various areas of law in addition to their administrative skills.

The program starts in September and is designed for full-time students wanting to develop employment-ready skills in only eight months.

*How will this program prepare you to become a Legal Administrative Assistant?* This career focused program will introduce you to a number of different areas of law, such as family law and wills and estates. It will also equip you with the essential skills you will need to be successful in the workplace by using realistic simulation exercises. Most classes are in the computer lab and there is a real hands-on approach to teaching in this program.

**Please visit** [www.kpu.ca/business/programs](http://www.kpu.ca/business/programs) (<http://www.kpu.ca/business/programs/>) **for more information on School of Business programs.**

## Who Studies Legal Administrative Studies?

We find that our students are focused and committed to becoming a valuable member of the legal office team. Understanding that Legal

Administrative Assistants are professional assistants, you should be prepared to treat the program as a full-time professional program.

We have a variety of students in the program. Some students enter the program with previous post-secondary experience and are seeking to develop the practical skills necessary to enter the workforce and the legal profession. Some students are changing career direction, whilst others are high school students who have identified an interest in the legal field. All are welcome!

Ideally, you should already have good keyboarding/typing skills that can be further developed in the program.

## Career Opportunities

The program achieves good employability rates, with graduates working in a variety of organizations, such as: law firms, notary public offices, government offices, and legal departments of large corporations. Graduates will be eligible to secure entry-level Legal Administrative Assistant positions, but there are many opportunities for career progression in due course, such as becoming a senior Legal Administrative Assistant or becoming a paralegal.

## Programs

- Diploma in Applied Business Technology (p. 464)
- Certificate in Legal Administrative Studies (p. 465)

## Courses

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables/) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

### LGLA 1110 1.5 credits

#### Bookkeeping for the Law Office

Students will practice basic bookkeeping functions for a law office. They will record and post basic bookkeeping transactions, reconcile bank statements, perform basic payroll functions, and recognize the distinctions between general and trust funds.

Level: UG

Attribute: BUSI (p. 521)

### LGLA 1125 3 credits

#### Introduction To Legal Office Procedures And Legal Research

Students will study and apply the procedures and documentation related to a general legal office for success in the workplace. They will work in teams to examine statute and case law.

Level: UG

Attribute: BUSI (p. 521)

**LGLA 1135 3 credits****Legal Administrative Computer Applications II**

Students will be instructed in the detailed use of file management, PDF, presentation, electronic communications, and spreadsheet software useful in a legal administrative environment. Using legal administrative-oriented examples taught in a hands-on environment (i.e. a computer lab), students will develop and apply skills and concepts that are critical for success in their academic studies and career.

Level: UG

Prerequisite(s): LGLA 1145

Attribute: BUSI (p. 521)

**LGLA 1145 3 credits****Legal Administrative Computer Applications I: Document Preparation/Production**

Legal assistants require proficiency and advanced skills in document production to service all practice areas in a legal firm. Students will learn to create and format complex legal documents and layouts efficiently using the industry current document production program(s).

Level: UG

Attribute: BUSI (p. 521)

**LGLA 1150 1.5 credits****Law Office Relations and Conflict Resolution**

Students will learn basic principles and skills for developing interpersonal skills to increase effectiveness in the law office environment. Topics explored include self-awareness, relationship development, assertiveness, group dynamics, intercultural communication, stress management and conflict resolution strategies, with a focus on enabling students to be successful and to reach their personal goals in the workplace.

Level: UG

Attribute: BUSI (p. 521)

**LGLA 1202 3 credits****Corporate Law and Procedures**

Students will develop an understanding of the procedures and terminology relating to corporate law, and will become familiar with the requirements of the BC Business Corporations Act. Students will prepare the documentation required for: incorporation of a company; post-incorporation matters; annual requirements; and changes during a company's life cycle. Students will also learn how to maintain and file the appropriate documents in a Corporate Records Book.

Level: UG

Attribute: BUSI (p. 521)

**LGLA 1203 3 credits****Conveyancing**

Students will apply the procedures and documentations related to the transfer of real estate in British Columbia. They will focus on the transfer of title of residential properties, including strata title and mortgage financing.

Level: UG

Prerequisite(s): All of (a) LGLA 1145, 1202, 1205 and (b) CMNS 1140

Attribute: BUSI (p. 521)

**LGLA 1204 3 credits****Wills and Estates**

Students will prepare and process wills, codicils, applications for Letters Probate and Letters of Administration, correspondence regarding estates, distribution and passing of accounts

Level: UG

Prerequisite(s): All of (a) LGLA 1145, 1202, 1205 and (b) CMNS 1140

Attribute: BUSI (p. 521)

**LGLA 1205 3 credits****Litigation and Civil Procedure**

Students will study the process of civil litigation in BC. They will learn the preparation and processing of civil litigation documents, including application and trial procedures.

Level: UG

Attribute: BUSI (p. 521)

**LGLA 1206 3 credits****Family Law and Procedures**

Students will be introduced to family law in BC. They will learn the preparation and processing of family law documents, including trial procedures and collections procedures resulting from court judgments. Student centered instruction will focus on the legal procedures and documentation related to marriage agreements, separation agreements, division of family assets and defended and undefended divorces. Students will become familiar with the requirements of the Divorce Act and the Family Law Act.

Level: UG

Prerequisite(s): All of (a) LGLA 1145, 1202, 1205 and (b) CMNS 1140

Attribute: BUSI (p. 521)

**LGLA 1399 3 credits****Legal Assistant Work Experience/Project**

Students will apply academic and practical knowledge and skills through relevant experience in the workplace or through the completion of a comprehensive project.

Level: UG

Prerequisite(s): All of (a) LGLA 1125, 1145, 1150, 1202, 1205 and (b) CMNS 1140

Co-requisite(s): All of LGLA 1110, 1135, 1203, 1204, and 1206

Attribute: BUSI (p. 521)

**Curriculum Effective Date:**

01-Sep-2011

Intakes for this program have been postponed indefinitely.

**Description**

The program requirements, courses, course credits, and graduation requirements for this program are currently being revised.

Students may exit at diploma, certificate or citation level. The two-year diploma program (which is currently under review) prepares students for advancement in office careers and/or for transfer into the third year of the KPU Bachelor of Business Administration Degree in Entrepreneurial Leadership. The first year of this program is the Applied Business Technology certificate.

The first year of study provides students with excellent workplace skills of an intensive, practical nature. The curriculum provides a background in Business Communications, Bookkeeping Basics, Computer Competency, Office Dynamics, and Word Processing, as well as courses specific to the specialty option selected by each student. These options are Administrative Assistant and Legal Administrative Assistant. Students may exit the program at the certificate level with skills appropriate to the office workplace.

The ten additional courses required for the diploma will provide students with enhanced knowledge, skills, and attitudes for the various office workplaces they have chosen. They will be better prepared for advancement and for supervisory positions with enhanced communication skills and knowledge of management, organizational behaviour, marketing, microeconomics, human resource management, project management and administrative management. Students also have the opportunity to select from a group of optional courses. Not all courses are offered each semester or each campus.

**Who Studies Applied Business Technology?**

Students who are recent high school graduates or are mature students with or without higher education. Students have a large variety of previous work experiences. Some students are seeking entry to the workforce, some are upgrading office skills, some wish for a change in career path, and others have completed higher education and are seeking a hands-on, learning environment with a practical focus.

**Career Opportunities**

Graduates find employment in a wide variety of businesses, legal offices and departments. They may be considered for entry-level supervisory and office management positions in both the public and private sector.

**Requirements****Admission Requirements**

In addition to the Faculty's Admission Requirements, which consist of KPU's undergraduate English Proficiency Requirement (p. 13), the following program admission requirements apply:

- Successful completion of the ABTY Certificate or equivalent

**Curricular Requirements**

## Credential Awarded

Upon successful completion of this program, students are eligible to receive a **Certificate in Legal Administrative Studies**.

## Marketing

Marketing emphasizes competitive advantages of for-profit and not-for-profit organizations and examines the inter-relationships that exist among their customers or members, the competition, and internal resources. A key part of marketing consists of gaining insights into customer needs and then developing effective marketing strategies to serve those needs.

The Bachelor of Business Administration (BBA) in Marketing Management (p. 470) degree produces graduates who bring contemporary applied marketing skills and sound business management acumen to their organizations, helping them to succeed in a dynamic global economy.

The Marketing Management Diploma (p. 472) program is designed to provide a solid, general foundation in this exciting field. Study begins with emphasis on basic business knowledge and skills, and then intensively explores the discipline of Marketing, with emphasis on the job skills and experience that business demands. In addition, they may choose specialized marketing courses in advertising, retailing, international marketing, selling and sales management, buyer behaviour, E-marketing, and marketing research as electives.

The Marketing Management programs provide full-time and part-time intensive study with 1000 and 2000 level MRKT courses being offered during the day and late afternoons with Degree classes scheduled in the later afternoons and in the evenings, to allow students to further their education while maintaining current employment. Students may apply to start any of the marketing programs in the summer semester but should note that course offerings may be limited.

Graduates of the Diploma and Degree programs acquire the following:

- Critical thinking and problem-solving skills by assessing and interpreting source materials, evaluating arguments, examining and applying both case-based and real-world business based projects, as consulting teams in the development of business and marketing plan solutions.
- Skills to manage communication initiatives to create and implement marketing plans that achieve organizational goals.
- Professional and persuasive communications skills through a variety of media (traditional, emerging, and technology driven).
- Skills required to develop creative media objectives, strategies and tactics to reach key target markets across all media and communication options and platforms.
- An understanding of the entire organization, and the important role of corporate citizenship.
- Collaboration skills with all functional areas of an organization (accounting, human resources, operations, production, marketing, sales etc.).
- Skills necessary to work effectively in teams, assuming roles of leader and follower, as appropriate.

Graduates of the Degree program also develop the following:

- Skills necessary to conduct business activities using contemporary social media applications.
- Ability to analyze quantitative and qualitative information using contemporary web tools to facilitate informed marketing decision-making strategies.
- Advanced quantitative business skills.

Some unique features of the Marketing programs are:

- The BBA degree has a capstone project for a real client organization, which allows students to translate their learning into one cohesive project that encompasses the integration of knowledge acquired throughout the degree.
- Learning partnerships with business, applied projects and assignments, and ongoing work experience.
- Entry points that allow for the transfer of credits from recognized post-secondary programs.
- Exit/re-entry flexibility, where a student can complete the program at their own pace. This allows for changing outside-of-school time

requirements and does not lock a student into a rigid program structure and timeframe.

- Professional development for individuals seeking higher level training.

Many of the courses included in this program are articulated with other universities and colleges for ease of course transferability to and from KPU. Please refer to the BC Transfer Guide at [www.bctransferguide.ca](http://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) regarding the transferability of courses to and from specific institutions in British Columbia.

**Please visit** [kpu.ca/business/programs-and-courses](http://www.kpu.ca/business/programs-and-courses) (<http://www.kpu.ca/business/programs-and-courses/>) **for more information on School of Business programs.**

## Who Studies Marketing?

- High school graduates who wish to pursue a Marketing career
- Business students from disciplines such as Accounting, Business Management, Economics, Computer Sciences and Information Systems, who wish to continue their studies by expanding the depth and breadth of their knowledge, skills, and practical marketing experience
- Current Kwantlen Polytechnic University students who have completed courses in a different discipline (i.e. Arts, Science, Horticulture, Graphic Design) who wish to better understand marketing for their field
- Mid-level management working full-time, with some post secondary education, seeking to upgrade their skills in the marketing field through part-time studies
- International students seeking a BBA in Marketing from an accredited university

## Career Opportunities

A marketing education is one of the best ways to prepare for a career in business or management. Virtually all businesses and organizations, profit and non-profit alike, apply marketing to advance their organizational goals. Graduates have a solid grounding in business basics and learn how to make a profit by ethically meeting people's needs with useful products and services.

A **BBA in Marketing Management** prepares students for a career in business or management. Marketing managers have leadership positions in the marketing area of an organization. Marketing programs designed to serve the organization's target markets are directed and implemented by marketing managers. Marketing management professionals work closely with the promotions, advertising, and sales staff of an organization to effectively serve customers. They use tools such as advertising, social media, and promotional events to increase awareness of products, ideas and services. Marketing leaders help their organizations adapt to changing markets through innovation and the development of new products. As well, they make pricing decisions to keep the organization competitive, yet profitable. Many graduates continue in post graduate studies, such as a MBA.

With a **Marketing Management Diploma**, graduates are eligible for almost any entry-level business or management position. Such positions can lead to exciting careers in advertising, retailing, customer relations, sales and sales management, marketing research or business management.

KPU's most recent Graduate Survey indicates that the majority of marketing management graduates are employed or continuing with

further education. Among these graduates, several have started their own successful businesses.

Marketing graduates find careers in the following areas:

- Sales, Marketing and Advertising Managers
- Retail Trade Managers
- Business Development Officers
- Marketing Researchers
- Consultants
- Professional Occupations in Business Services to Management
- Professional Occupations in Public Relations and Communications
- Retail Trade Supervisors

Examples of Job Titles include:

- Business Development Officer
- Market Research Executive
- Marketing Analyst
- Advertising Account Executive
- Business Management Consultant
- Management Analyst
- Promotion Specialist
- Marketing Manager
- Assistant Marketing Manager
- Marketing Executive
- Manager Marketing Planning
- Retail Division Manager
- Manager Digital Marketing
- Manager Social Media

## Programs

- Bachelor of Business Administration in Marketing Management (p. 470)
- Diploma in Marketing Management (p. 472)

## Courses

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](http://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

### MRKT 1199 3 credits Introduction to Marketing

Students will learn the fundamentals of marketing and explore the relationships between companies, their customers and their competition. They will examine concepts that are integral to the field of marketing including marketing environment, customer behaviour, marketing research, product analysis, distribution, pricing strategies and promotion. They apply these concepts in solving marketing problems.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521)

**MRKT 1299 3 credits****Consumer Behaviour**

Students will explore buyer behaviour and motivation using key theories from various social sciences (including Anthropology, Sociology and Psychology) and apply these theories in contemporary marketing situations.

Level: UG

Prerequisite(s): MRKT 1199

Attributes: ASTR (p. 523), BUSI (p. 521)

**MRKT 2111 3 credits****Introduction to e-Marketing**

Students will engage with e-marketing practices in the rapidly changing online environment. Students will study and evaluate various business models employing e-marketing strategies with a range of outcomes. Students will learn the key strategic and technological elements of digital marketing explained through theory and practical analysis. Students will become familiar with a variety of online marketing tools that support the online marketing functions including layout, optimization, testing, promotion, evaluation (analytics) to achieve overall marketing objectives.

Level: UG

Prerequisite(s): MRKT1199

Attributes: ASTR (p. 523), BUSI (p. 521)

**MRKT 2235 3 credits****Small Business Start-up**

Students will learn the fundamentals of small business start-ups in a Canadian context and learn to make decisions on entrepreneurship. They will also learn the elements needed to identify and develop successful business ideas, and apply these to the business planning process in an entrepreneurial environment. Opportunities will be provided for students to further explore the industry within which their own business idea may exist.

Level: UG

Prerequisite(s): MRKT 1199 and (ACCT 1110 or ACCT 1210 or ACCT 2293)

Attributes: ASTR (p. 523), BUSI (p. 521)

**MRKT 2321 3 credits****Retail Management**

Students will be introduced to both theoretical knowledge and practical skills in a variety of retail business models. They will learn consumer behavior, store design and layout, merchandise planning, services marketing, retail pricing strategy, advertising and selling.

Level: UG

Prerequisite(s): MRKT 1199

Attributes: ASTR (p. 523), BUSI (p. 521)

**MRKT 2333 3 credits****Fundamentals of Marketing Management**

In the Fundamentals of Marketing Management course, students will focus on the critique, evaluation, and revision of marketing plans to provide students a thorough overview of the marketing planning process. Students will focus particular attention on the strategic tools used to develop marketing plans and undergo a detailed examination of marketing research methodologies, strategic development, and tactical considerations outlined in marketing plans. In addition, students will engage in professional skills development as they relate to launching successful careers in the modern marketing environment.

Level: UG

Prerequisite(s): All of: (a) MRKT 1199, (b) 6 credits from courses in MRKT at the 2000 level or higher, and (c) BUQU 1230, CRIM 2103, MATH 1115, MATH 2341, PSYC 2300 or SOCI 2365

Attributes: ASTR (p. 523), BUSI (p. 521)

**MRKT 2340 3 credits****Marketing Insights**

Students will learn about basic marketing information needs as it relates to supporting the development and evaluation of a marketing plan, or to solve a given marketing problem. Through the use of case studies and real life examples, students will identify, gather and analyze marketing information in order to recommend actions for maximizing or improving an organization's online and offline marketing efforts.

Level: UG

Prerequisite(s): MRKT 1199

Attributes: ASTR (p. 523), BUSI (p. 521)

**MRKT 2360 3 credits****Selling and Sales Management**

Students will learn the theory and skills of professional selling and demonstrate these skills through completion of a practical selling project. Students will study basic selling processes, including prospecting, needs analysis, and formal sales presentations. Students will undertake a real life sales project that will require them to meet activity and sales targets. Students will begin this course with the theory and skills of professional selling, preparing them to complete a practical selling project. Students will also examine the sales management function.

Level: UG

Prerequisite(s): MRKT 1199

Attributes: ASTR (p. 523), BUSI (p. 521)

**MRKT 2401 3 credits****Introduction to Integrated Marketing Communications**

Students will work in creative teams to develop and present a comprehensive marketing communications proposal for a domestic marketing organization. They will thoroughly review the field of contemporary advertising and promotion in Canada throughout the course. Students will closely examine the evolving theory and practice of developing an overall communications program as well as the client/agency relationship. Students will emerge from this course with the skills to expand their comprehension of Integrated Marketing Communications (IMC) in subsequent courses.

Level: UG

Prerequisite(s): MRKT 1199

Attributes: ASTR (p. 523), BUSI (p. 521)

**MRKT 2444 3 credits****Marketing Management 2**

Students will apply marketing principles and methods from previous courses in the preparation of a detailed professional marketing plan for a real client. Students will develop and present their detailed marketing plan with strong emphasis placed on demonstration of analytical, critical thinking and research skills as well as a solid application of marketing. Students will work independently in the field and one-on-one with the instructor for much of the semester.

Level: UG

Prerequisite(s): MRKT 2333 and MRKT 2340

Attributes: ASTR (p. 523), BUSI (p. 521)

**MRKT 2455 3 credits****International Marketing**

Students will focus on the export needs of a local small to medium sized enterprise (SME), and on how its current product line can be marketed abroad. They will investigate how marketers must adapt to foreign environments and adeptly resolve conflicts between political, cultural and legal forces in order to be successful.

Level: UG

Prerequisite(s): MRKT 1199

Attributes: ASTR (p. 523), BUSI (p. 521)

**MRKT 3000 3 credits****Strategic Marketing Decision Making**

Students will apply marketing principles and methods from previous courses to conduct marketing analysis, make strategic marketing decisions, develop marketing plans, assess results, and adapt to resulting outcomes. Students will synthesize learning through the preparation of a detailed, professional marketing plan for a real client. Students will develop and present their detailed marketing plan with strong emphasis placed on demonstration of analytical, critical thinking and research skills as well as a solid application of marketing principles.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including (a) ACCT 1210 or ACCT 2293, (b) BUQU 1130 or BUQU 1230 or MATH 1115 or MATH 1120 or MATH 1130 or MATH 1140 or MATH 2341 or CRIM 2103 or PSYC 2300 or SOCI 2365, (c) CMNS 1140, (d) MRKT 1299, and (e) MRKT 2111

Attributes: ASTR (p. 523), BUSI (p. 521)

**MRKT 3211 3 credits****Managing the Communication Process**

Students will learn the essential project management skills associated with strategic planning, briefing creative services, and delivering creative projects through a variety of traditional and modern marketing media. They will learn how key messages and graphic standards are delivered effectively and consistently to achieve marketing objectives.

Level: UG

Prerequisite(s): MRKT 3000

Attribute: BUSI (p. 521)

**MRKT 3240 3 credits****Marketing Information Management**

Students will learn to collect, analyze and interpret data available from a variety of sources, internal and external to the organization, to uncover the marketing insights that will provide competitive advantage for an organization. Students will use contemporary data tools and emerging information technologies of marketing information management.

Level: UG

Prerequisite(s): Either ENTR 3140, or both (a) MRKT 3000, and (b) BUQU 1230, CRIM 2103, MATH 1115, MATH 2341, PSYC 2300 or SOCI 2365.

Attribute: BUSI (p. 521)

**MRKT 3311 3 credits****Marketing in a Digital World**

Students will learn the key business and technological elements of digital marketing. Students will become familiar with and use a variety of online marketing tools that support the online marketing functions that help drive traffic to a website, improve conversion rates and achieve overall marketing objectives. Students will prepare audits of real-world organizations and industrial sectors. Students will publish marketing-related analyses as part of the creation of an online project.

Level: UG

Prerequisite(s): MRKT 3000

Attribute: BUSI (p. 521)

**MRKT 4160 3 credits****Business Development**

Students will learn to manage and direct the sales function to achieve organizational goals. They will develop consultative selling skills through study of key account management, group negotiations, and the preparation of proposals and quotations. Students will study leadership and managing a sales force, sales channels and the importance of strategic alliances which will prepare students to assume sales leadership roles in the organization.

Level: UG

Prerequisite(s): All of ENTR 3100, ENTR 3110 and MRKT 3000

Attribute: BUSI (p. 521)

**MRKT 4177 3 credits****Contemporary Issues in Marketing**

Students will analyze and gain insight into significant contemporary marketing issues such as globalization and cross-cultural marketing, online marketing and e-commerce, modern corporate culture, outsourcing and marketing and business ethics. Students will interact with guest speakers, plan and lead seminar discussions, research and analyze contemporary marketing strategies and theories, and produce and present a comprehensive research project.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher, including ENGL 1100 and MRKT 1199.

Attribute: BUSI (p. 521)

**MRKT 4201 3 credits****Integrated Marketing Communication**

Students will learn the fundamentals of market segmentation, positioning and targeting while acquiring skills in the alignment of all aspects of an organization's communication, covering a complete range of target audiences, to create a coherent integrated communication program. They will manage the organization's brand identity and communication with consumers, media, governments, employees, shareholders and community groups. Students will learn how to use a comprehensive variety of communication options in order to maximize return-on-marketing investment.

Level: UG

Prerequisite(s): MRKT4331 or GDMA 3230

Attribute: BUSI (p. 521)

**MRKT 4330 6 credits****Bachelor Business Administration in Marketing - Practicum**

Students will apply marketing theory to undertake a major marketing analysis and develop a detailed marketing plan for an operational client/organization. They will practice the integration of marketing and business concepts learned throughout the degree; manage, design, prepare and present a comprehensive project that will meet the requirements of the operational organization. Students will develop and complete substantial primary research that includes the design, implementation, and analysis of the client's marketing issue. They will develop a marketing plan that will be fully costed with all numbers justified. Students will provide recommendations that will have metrics attached to it so the operational organization/client can measure the success or failure of the activity undertaken. Student teams will develop, launch and manage an online business or participate in a competitive marketing business simulation program. The teams will make decisions and be held accountable for them through achievement of specified measurable Web Analytics, profit and loss results and other metrics in a competitive team environment.

Level: UG

Prerequisite(s): Both (a) ENTR 3000, ENTR 3110, ENTR 3120, ENTR 3130, ENTR 3140, ENTR 4140, MRKT 3240, MRKT 4160 and MRKT 4201, and (b) ECON 2350, ECON 3150 or ENTR 3150.

Co-requisite(s): MRKT 4177

Attribute: BUSI (p. 521)

**MRKT 4331 3 credits****Individual Client Marketing Plan**

Students will work individually to apply marketing theory to undertake a major industry and business analysis and develop a comprehensive consulting plan for an operational client organization. They will practice the integration of marketing and business concepts learned throughout the degree; manage, design, prepare and present a comprehensive project that will meet the requirements of the operational organization. Students will develop and complete substantial primary research that includes the design, implementation, and analysis of the client's critical issues. They will develop a marketing plan that will be fully costed with all numbers justified. Students will provide recommendations that will have metrics attached to the plan so the operational organization client can measure the success or failure of the activity undertaken.

Level: UG

Prerequisite(s): (a) ACCT 3380, BUSI 2390, CMNS 3000, ENTR 3100, ENTR 3110, ENTR 3120, MRKT 3211, MRKT 3240, MRKT 3311] or (b) BUSI 2390, ENTR 3000, ENTR 3110, ENTR 3120, ENTR 3130, MRKT 3211, MRKT 3240 MRKT 3311

Attribute: BUSI (p. 521)

**MRKT 4332 3 credits****Online Business Launch/Simulation**

Student teams will develop, launch and manage an online business and/or participate in a competitive marketing business simulation program. The teams will make decisions and be held accountable for them through achievement of specified measurable Web Analytics, profit and loss results and other metrics in a competitive team environment. NOTE: It is highly recommended that students complete MRKT 2235 before taking this course.

Level: UG

Prerequisite(s): MRKT 4331

Attribute: BUSI (p. 521)

## Description

The BBA in Marketing Management program includes intensive applied business training with an emphasis on marketing management, as well as new and emerging media and marketing analytics. The practical learning outcomes are grounded in curriculum that is accountable, global, team-based and uses contemporary quantitative and qualitative tools. Course content is industry driven and was developed in consultation with industry experts to ensure that KPU's BBA in Marketing Management graduates are ready to work. This degree is an appropriate goal for individuals who aspire to acquire leadership positions in the marketing profession.

## Requirements

### Admission Requirements

The Faculty's Admission Requirements, which consist of KPU's undergraduate English Proficiency Requirement (p. 13), apply to this program.

### Declaration Requirements

Students intending to graduate with this School of Business degree must declare the credential. At the time of declaration, the student must satisfy all of the following requirements:

- In good academic standing with the University
- Completion of a minimum of 15 credits of undergraduate coursework.

## Curricular Requirements

The degree program requires a minimum of 120 credits of required courses and electives. The degree program with Co-operative Education requires an additional 28 credits of Co-op Education credits.

Code	Title	Credits
<b>Business Foundation Courses</b>		
BUSI 1215	Organizational Behaviour	3

### Breadth Electives

Select five courses numbered 1100 or higher in any area of study except ACCT, BUSI, ENTR, HRMT or MRKT. 15

### General Electives

Select seven courses numbered 1100 or higher in any area of study. It is highly recommended that the majority of these electives be chosen from MRKT courses numbered 2000 or higher. 21

Total Credits 120-124

<sup>1</sup> Students who choose Group B may require more than 60 credits to graduate.

## Credential Awarded

Upon successful completion of this program, students are eligible to receive a **Bachelor of Business Administration in Marketing Management**.

## Co-op Requirements Co-operative Education

The BBA in Marketing Management degree is offered with a Co-operative Education option. Co-operative Education gives a student the opportunity to apply the skills gained during academic study in paid, practical work experience semesters. Degree students can complete a minimum of three work terms while completing their degree. Work terms generally occur full-time in separate 4 month work semesters but may also be available part-time over an 8 month continuous (parallel) placement. Work semesters alternate with academic study.

Students wishing to enter and participate in the Co-op Option must meet the following requirements:

### Declaration and Entrance Requirements

- Declaration of Co-op specialization into the Bachelor of Business Administration in Marketing Management Program
- Minimum GPA of 2.7
- Maximum 75 credits completed

### Work Term and Program Continuance Requirements

Procedures for enrolment in Co-operative Education work terms are outlined in the COOP course descriptions. Conditions for continuance in the program are:

- Completion of COOP 1101 prior to completing 75 credits
- Minimum GPA of 2.7
- Instructor Permission

### Co-op Course Requirements

The Co-operative Education designation requires successful completion of the following courses:

Code	Title	Credits
COOP 1101	Job Search Techniques	1
COOP 1150	Co-op Work Semester 1	9
COOP 2150	Co-op Work Semester 2	9

COOP 3150	Co-op Work Semester 3	9
Optional:		
COOP 4150	Co-op Work Semester 4	
Total Credits		28

Note: These COOP courses must be completed sequentially. COOP 1150, COOP 2150, COOP 3150, or COOP 4150 may be taken part-time over two consecutive semesters as COOP 1150A/COOP 1150B, COOP 2150A/COOP 2150B, COOP 3150A/COOP 3150B or COOP 4150A/COOP 4150B. COOP courses can only be used to satisfy the Co-op designation and cannot be used to satisfy other curricular requirements of the program.

### Additional Requirements

In addition to the requirements stated above, all Co-op students must satisfy the General Co-operative Education Requirements (p. 31).

### Credential Awarded

Upon successful completion of this program with co-operative education, students are eligible to receive a **Bachelor of Business Administration in Marketing Management, Co-operative Education Option**.

### Description

The Marketing Management Diploma is a comprehensive program designed to provide a solid, general foundation in this exciting field. Study begins with emphasis on basic business knowledge and skills, and then

intensively explores the discipline of Marketing, with emphasis on the job skills and experience that business demands. Projects with local businesses and organizations are also included in order to provide real world experience.

Graduates of this program may also be eligible to continue their business study by pursuing a Bachelor of Business Administration (BBA) degree in Entrepreneurial Leadership, Human Resources Management, or Marketing Management. Many of the courses required for the Marketing Management Diploma are requirements for these BBA degree programs.

Students wishing to progress into a BBA degree should consult with a School of Business advisor for course planning assistance.

## Requirements

### Admission Requirements

The Faculty's Admission Requirements, which consist of KPU's undergraduate English Proficiency Requirement (p. 13), apply to this program.

### Declaration Requirements

Students intending to graduate with this School of Business diploma must declare the credential. At the time of declaration, the student must satisfy all of the following requirements:

- In good academic standing with the University
- Completion of a minimum of 15 credits of undergraduate coursework.

### Curricular Requirements

Students must complete 60 credits that include the following. The diploma program with Co-operative Education requires an additional 19 credits of Co-op Education credits.

Code	Title	Credits
<b>Business Foundation Courses</b>

Total Credits		60-64

<sup>1</sup> Students who choose Group B may require more than 60 credits to graduate.

## Credential Awarded

Upon successful completion of this program, students are eligible to receive a **Diploma in Marketing Management**.

## Co-op Requirements Co-operative Education

The Marketing Management diploma is offered with a Co-operative Education option. Co-operative Education gives a student the opportunity to apply the skills gained during academic study in paid, practical work experience semesters. Students can complete two work semesters while completing their diploma. Work terms generally occur full-time in separate 4 month work semesters but may also be available part-time over an 8 month continuous (parallel) placement. Work semesters alternate with academic study.

Students wishing to enter and participate in the Co-op Option must meet the following requirements:

### Declaration and Entrance Requirements

- Declaration of Co-op specialization into the Diploma in Marketing Management Program
- Minimum GPA of 2.7
- Maximum 30 credits completed

### Work Term and Program Continuance Requirements

Procedures for enrollment in Co-operative Education work terms are outlined in the COOP course descriptions. Conditions for continuance in the program are:

- Completion of COOP 1101 prior to completing 30 credits
- Minimum GPA of 2.7
- Instructor Permission

### Co-op Course Requirements

The Co-operative Education designation requires successful completion of the following courses:

Code	Title	Credits
COOP 1101	Job Search Techniques	1
COOP 1150	Co-op Work Semester 1	9
COOP 2150	Co-op Work Semester 2	9
Total Credits		19

Note: These COOP courses must be completed sequentially. COOP 1150 or COOP 2150 may be taken part-time over two consecutive semesters as COOP 1150A/COOP 1150B, or COOP 2150A/COOP 2150B. COOP courses can only be used to satisfy the Co-op designation and cannot be used to satisfy other curricular requirements of the program.

### Additional Requirements

In addition to the requirements stated above, all Co-op students must satisfy the General Co-operative Education Requirements (p. 31).

## Credential Awarded

Upon successful completion of this program with co-operative education, students are eligible to receive a **Diploma in Marketing Management, Co-operative Education Option**.

## Operations & Supply Chain Management

The Operations and Supply Chain Management Specialist (OSCM) program is designed for students who have completed a Bachelor's degree with industry experience, or have a technical or science diploma with significant relevant industry experience.

The OSCM program consists of five management courses (15 credits) that will allow students to develop critical thinking and analytical skills, communication skills, effective project management abilities, teamwork and interpersonal skills. Students will attain a solid understanding of how to interpret and synthesize core business, financial and performance data to make informed decisions.

Six courses (18 credits) of focused OSCM content prepare students to apply best in practice processes and tools to a wide range of operations and supply chain areas, identify and assess performance improvement opportunities in a variety of industries, and competently support informed decision making.

OSCM graduates will:

- Complete successful transportation planning, inventory control, warehouse management, customer service standard design and implementation, product and process design and re-engineering, and development and execution of procurement strategies
- Determine the requirements, selection and plan the implementation of technology and information systems in supporting operations and managing the supply chain
- Utilize effective skills and proven models, tools and techniques for managing service operations
- Design and implement quality control and productivity improvement systems in operations and supply chains
- Assess supply chain management strategies in international settings
- Apply an ethical understanding and perspective to business situations both locally and globally, and apply the newest theoretical

and practical approaches with respect to social responsibility and sustainability in operations and supply chain management

Upon completion of the OSCM program, students will have also attained a strong applied management knowledge base, be able to demonstrate their ability in applying business, operations and supply chain management processes, tools and strategies as part of seeking their professional accreditation or designation in:

- Supply Chain Management Professional (SCMP) designation through the Supply Chain Management Association of Canada [www.scma.ca](http://www.scma.ca) (<https://scma.com/en/>)
- Project Manager Professional (PMP) certification through the Project Management Institute [www.pmi.org](http://www.pmi.org) (<https://www.pmi.org/>)
- ASQ certification through the American Society for Quality [asq.org](http://asq.org) (<https://asq.org/>)

## Programs

- Post-Baccalaureate Diploma in Operations and Supply Chain Management (p. 475)

## Courses

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](http://bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

### OSCM 5100 3 credits

#### Strategic Operations Management

An operations strategy refers to a set of operational decisions that a firm makes to achieve a long-term competitive advantage. The course covers strategic decisions in product and process design, technology, facilities, vertical integration, work design, and other areas, and also explores means of competition such as cost, quality, timeliness, productivity, customer service and innovativeness. Students will also analyse the intra-organizational relationships among the major functions both in manufacturing and service companies and the interface with the organization's suppliers, customers, and other stakeholders. Note: This course may be offered in compressed mode. Consult the current timetable.

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

### OSCM 5110 3 credits

#### Information Systems for Operations and Supply Chain Management

Students will learn how to employ information technology to support the building and maintenance of competitive advantages through operations and supply chains, based on international benchmarks such as Supply Chain Operations Reference (SCOR). With the help of information technology, students will learn the theory and practice associated with developing and managing an effective and efficient flow of materials and information throughout the value chain within internal processes, between an organization and multiple tiers of suppliers and between an organization and customers. Students will understand concepts and apply technology-based approaches aiming at reducing operational costs, optimizing processing capacity, expediting accurate information transfer, enabling effective forecasting and planning under complex and dynamic environments. Ultimately, applying such technologies will capacitate students to implement and maintain in-transit delivery of customizable value. Information systems covered will include, but are not limited to Enterprise Resource Planning (ERP), Business Intelligence Systems (BI), Radio Frequency Identification Systems (RFID), and Geographic Information Systems (GIS)

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

### OSCM 5120 3 credits

#### Quality Management

Students will demonstrate advanced understanding of a number of critical components of Quality Management as a conduit to organizational effectiveness. Specific outcomes include demonstrating an understanding of quality management in both manufacturing and service industries, and related concepts including Statistical Quality Control (SQC) and Statistical Process Control (SPC); Six Sigma and Total Quality Management (TQM); measurement of quality in services; and quality systems.

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

### OSCM 5130 3 credits

#### Productivity, Innovation, and Lean Systems

Students will study the organic link between productivity and standard of living. The effects on productivity of organization-level factors will be analyzed in depth. The major importance of innovation (especially incremental innovation) for productivity gains will be examined in the context of understanding the typical processes that ensure the transformation of inputs into outputs both in manufacturing and in services. Note: This course may be offered in compressed mode. Consult the current timetable.

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

### OSCM 5140 3 credits

#### Supply Chain & Logistics Management

Students will learn how to design and implement supply chain and logistics networks, and how to set and monitor relevant and meaningful metrics leading to competitiveness enhancement. Students will examine in depth the evolving concepts and tools of customer service management, transportation, warehousing, reverse flows, humanitarian logistics, sustainability, and the roles of external forces such as technology, globalization, government regulations, and the growing power of informed customers. Students will apply their knowledge and skills to audit or design real supply chain and logistics activities.

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

**OSCM 5150 3 credits****Applied Operations & Supply Chain Management Project**

Students will complete an Operations & Supply Chain audit of an organization and submit suggestions destined to improve the existing Operations & Supply Chain metrics. Class work will include interactive sessions on planning and structuring the audits, solving specific Operations & Supply Chain problems and dealing with project management issues, and addressing – in a large group setting – complex problems encountered by groups and their client organizations.

Level: UG

Prerequisite(s): 9 credits from courses in OSCM, including OSCM 5100 and OSCM 5140

Attributes: BUSI (p. 521), F2A9 (p. 521)

The Operations and Supply Chain Management Specialist (OSCM) program is designed for students who have completed a Bachelor's degree with industry experience, or have a technical or science diploma with significant relevant industry experience.

The OSCM program will allow students to develop critical thinking and analytical skills, communication skills, effective project management abilities, teamwork and interpersonal skills. Students will attain a solid

understanding of how to interpret and synthesize core business, financial and performance data to make informed decisions.

Focused OSCM content prepare students to apply best in practice processes and tools to a wide range of operations and supply chain areas, identify and assess performance improvement opportunities in a variety of industries, and competently support informed decision making. Note: This is a two-year program, though students can choose to complete the program in an accelerated form.

## Requirements

### Admission Requirements

In addition to the Faculty's Admission Requirements, which consist of KPU's undergraduate English Proficiency Requirement (p. 13), the following program admission requirements apply:

- successful completion of a recognized undergraduate degree

or

- successful completion of a recognized technical or science diploma, along with a minimum of 5 years of related technical, scientific, operational, or supply chain work experience. (KPU will require a resume from these applicants to make an admission decision.)

### Curricular Requirements

The Post Baccalaureate Diploma program requires completion of the following 33 credits of courses with a grade point average of 2.5 or higher.

Code	Title	Credits
BUSM 5100	Accounting and Financial Management for Managers	3
BUSM 5110	Managing Dynamic Teams	3
BUSM 5120	Project Management	3
BUSM 5130	Quantitative Methods for Business Management	3
BUSM 5140	Negotiations and Stakeholder Communications	3
OSCM 5100	Strategic Operations Management	3
OSCM 5110	Information Systems for Operations and Supply Chain Management	3
OSCM 5120	Quality Management	3
OSCM 5130	Productivity, Innovation, and Lean Systems	3
OSCM 5140	Supply Chain & Logistics Management	3
OSCM 5150	Applied Operations & Supply Chain Management Project	3
Total Credits		33

### Credential Awarded

Upon successful completion of this program, students are eligible to receive a **Post Baccalaureate Diploma in Operations and Supply Chain Management**.

### Co-op Requirements

#### Co-operative Education

The Post-Baccalaureate Diploma in Operations and Supply Chain Management is offered with a Co-operative Education option for full-time students entering the program in the Fall term. This option requires

an additional 10 credits of Co-operative Education courses. Students wishing to enter and participate in the Co-op option must meet the following requirements:

## Declaration and Entrance Requirements

- Declaration of the Co-op option upon admission into the Post-Baccalaureate Diploma in Operations and Supply Chain Management

## Work Term and Program Continuance Requirements

Procedures for enrollment in Co-operative Education work terms are outlined in the COOP course descriptions. Conditions for continuance in the program are:

- Completion of COOP 1101 prior to completing 12 credits
- Minimum GPA of 2.7
- Instructor Permission

## Co-op Course Requirements

The Co-operative Education designation requires successful completion of the following courses:

Code	Title	Credits
COOP 1101	Job Search Techniques	1
COOP 1150	Co-op Work Semester 1	9
Total Credits		10

Note: These COOP courses must be completed sequentially. COOP courses can only be used to satisfy the Co-op designation and cannot be used to satisfy other curricular requirements of the program.

## Additional Requirements

In addition to the requirements stated above, all Co-op students must satisfy the General Co-operative Education Requirements (p. 31).

## Credential Awarded

Upon successful completion of this program with co-operative education, students are eligible to receive a **Post Baccalaureate Diploma in Operations and Supply Chain Management, Co-operative Education Option**.

## Public Relations

To keep pace with rapid changes in the industry, KPU provides a solid foundation in communications theory blended with practical, hands-on work experience and a field placement in a public relations environment. The program works closely with the professional public relations community and our faculty is drawn from industry and includes full and part-time instructors who are active public relations professionals.

The Public Relations Program is a 60-credit diploma organized into four semesters.

During the first year, students concentrate on general knowledge and on developing the basic skills, work habits and attitudes they need to succeed both as students and as PR professionals.

In the second year, students concentrate on further developing what they have learned and applying their public relations skills to a variety of projects for clients, culminating in a one-month work experience in the public relations industry.

During their two years of study, students will:

- Learn about the broad world of media, including print, radio, television and the Internet along with the theory and practices of communications in Canadian society.
- Be introduced to basic concepts and skills of the public relations industry, including: PR writing, design and production; event planning and management; media relations, marketing, publicity, issues management and crisis response; and internal communications within organizations.
- Develop professional attitudes through exposure to the ethical, legal and societal expectations of modern day public relations.
- Develop personal competence through working in group projects, delivering presentations, and hands-on training in computer labs.
- Gain experience in design and management of all the aspects of a special event fundraiser in support of a non-profit organization in the community.
- Gain hands-on experience during a four-week (full time) practicum in the public relations industry prior to graduation. This work experience provides opportunities for observation and application of previously studied theories and methodologies and assists with the transition of the graduates from KPU to the workplace.

Successful applicants may take non discipline specific courses (MRKT 1199 and English courses) prior to entering the program and/or during the summer semester in order to lighten their workload during the term.

Students that successfully complete the KPU Diploma in Public Relations may be eligible for admission into the third-year of the Bachelor of Arts in Professional Communication degree at Royal Roads University with transfer of KPU credits. Students must still apply formally for admission to Royal Roads University, and transfer of credits from KPU is not automatic, nor guaranteed. Conditions for admission to Royal Roads University and block transfer of KPU credits are set by the receiving institution. Details must be confirmed by the student. For information about any transfer credit agreement, see the Royal Roads University website.

**Please visit** [www.kpu.ca/business/programs](http://www.kpu.ca/business/programs) (<http://www.kpu.ca/business/programs/>) **for more information on School of Business programs.**

## Who Studies Public Relations?

Students accepted into the Public Relations program must have a high level of communication skills, both written and verbal. Depending on their background, advanced standing can be granted for work done or skills learned elsewhere.

Perhaps more than any other skill, good writing is critical to the success of public relations professionals. We are looking for students who have a natural flair for writing and a good command of English grammar.

Industry personnel may contact the Program Coordinator to access individual courses of interest without applying for the complete program. Access is determined by permission of the Coordinator and an availability of space.

Note: A lack of basic writing skills or word processing computer skills will hold students back, so applicants are urged to upgrade this area before starting the program.

## Career Opportunities

During the last few years, the job market has exploded for those who are skilled in public relations writing, special event coordination, media relations, issues management, publication layout and production, community relations, and marketing.

The KPU PR Program is known for providing a broad-based educational experience that gives students a solid grounding in all aspects of public relations and corporate communications.

KPU's Public Relations Program graduates experience a high rate of employment in a variety of positions within the field. Examples of employment positions attained by recent graduates include Communications Manager, Media Relations Specialist, Special Events Coordinator, Information Officer, and Public Relations Consultant.

## Programs

- Diploma in Public Relations (p. 479)

## Courses

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

### PRLN 1120 3 credits

#### PR Writing Fundamentals

Students will develop proficiency in public relations writing skills. They will study the principles of public relations writing to help achieve corporate objectives through professional communication on behalf of an organization. Students will study the role of research, objectives, audiences, and channels in public relations writing as well as how to persuade and frame an argument, conduct audience analysis and use Canadian Press Style. They will gain practical experience in writing and designing a corporate newsletter.

Level: UG

Co-requisite(s): PRLN 1140 and PRLN 1141

Attribute: BUSI (p. 521)

### PRLN 1140 3 credits

#### Digital Applications for Print Media

Students will learn a variety of computer applications for the production of print-ready communications. They will develop the skills and knowledge needed to generate effective print materials used in the public relations field. Students will work with various Windows-based programs such as MS Office and Adobe Creative Suite to design and print a variety of professional materials.

Level: UG

Co-requisite(s): PRLN 1141

Attributes: ASTR (p. 523), BUSI (p. 521)

### PRLN 1141 3 credits

#### Visual Design

Students will study basic design elements and principles involved in creating effective page layout. They will learn about the history and anatomy of typography and how to make good font choices. Students will learn how to critically evaluate and solve design problems using the terminology of design and print production.

Level: UG

Attribute: BUSI (p. 521)

### PRLN 1150 3 credits

#### Introduction to Public Relations

Students will learn about public relations including the related activities of public affairs and publicity. They will learn how to formulate communication plans and determine strategic tactics, objectives, target audiences and key messages.

Level: UG

Attribute: BUSI (p. 521)

### PRLN 1210 3 credits

#### Media Relations

Students will learn the structure and organization of traditional, electronic, digital and social media and examine the characteristics, benefits, strengths and weaknesses of each media type for specific public relations goals. Students will learn how to work effectively with all types of media and to develop strategies to effectively represent an organization and gain positive unpaid (earned) media coverage. They will create a media list from an actual professional media database, pitch a story idea and create a client media plan.

Level: UG

Prerequisite(s): PRLN 1150

Co-requisite(s): PRLN 1220

Attribute: BUSI (p. 521)

### PRLN 1220 3 credits

#### Writing for Media Relations

Students will develop proficiency in the writing of materials in support of media relations activities. They will write news releases, media advisories, backgrounders, profiles and other components of a media kit for both traditional and social media usage. Students will learn to use Canadian Press Style to write engaging and effective approaches aimed at media gatekeepers such as desk editors, producers and bloggers in order to achieve positive unpaid media coverage and publicity for organizations and clients.

Level: UG

Prerequisite(s): PRLN 1120

Co-requisite(s): PRLN 1210

Attributes: ASTR (p. 523), BUSI (p. 521)

### PRLN 1230 1.5 credits

#### Public Relations Research

Students will learn qualitative and quantitative research methods and measurement tools as applied to the professional practice of public relations. They will learn various research methods including sampling and survey methods, focus group research, content analysis, and online research. Students will analyze and evaluate applied and academic research studies and will complete a research project.

Level: UG

Prerequisite(s): PRLN 1150

Attribute: BUSI (p. 521)

**PRLN 1236 3 credits****Visual Presentations**

Students will gain practical experience in the planning, design, production and delivery of aspects of multimedia presentations used in the field of public relations. They will study multimedia design theories and apply specific principles to such digital formats as photographs, video, and electronic slides to convey creative ideas and express information effectively. They will learn how to design and produce handouts and/or information packages that reflect repeating elements, both in content and design, used in visual presentations. Students will learn how to critically evaluate the design and application of each of the presentational formats used and how to critique the overall delivery of information.

Level: UG

Prerequisite(s): PRLN 1140 and PRLN 1141

Attribute: BUSI (p. 521)

**PRLN 1250 3 credits****Digital Applications for Electronic Media**

Students will explore the planning, development, production and communication of electronic media content. Students will be introduced to tools and techniques used in the production and authoring of graphics, text, photography, video and sound to design, edit and produce digital and electronic communications used in public relations, marketing and corporate communications.

Level: UG

Prerequisite(s): PRLN 1140 and PRLN 1141

Attribute: BUSI (p. 521)

**PRLN 2150 3 credits****Reputation Management**

At the core of public relations is the management of an organization's reputation. Students will understand reputation management in the organizational context as it affects the corresponding practice of public relations. Students will examine the role of public relations and reputation management through various theories which impact and influence the practice of public relations.

Level: UG

Prerequisite(s): PRLN 1150

Attribute: BUSI (p. 521)

**PRLN 2310 3 credits****Issues Management & Crisis Response**

Students will learn the theory and practice of reputation management for an organization. They will explore how professional communicators handle issues identification, crisis management and stakeholder analysis on behalf of an organization. They will learn how to evaluate communication risks; conduct stakeholder analyses; and prepare plans and strategies to manage communication around issues and crises for both internal and external stakeholders. Students will also focus on managing media relations during a crisis, with special emphasis on the role of the key spokesperson for the organization.

Level: UG

Prerequisite(s): PRLN 1150 and PRLN 1210

Attribute: BUSI (p. 521)

**PRLN 2320 3 credits****Promotional Writing & Design**

Students will learn to plan, budget, write, design and produce printed corporate communications products such as posters, information sheets, flyers, advertorials and fundraising profiles. They will produce polished, audience-directed, professional print communications projects that assist an organization to convey information about corporate goals and programs and build customer, community and public support.

Level: UG

Prerequisite(s): PRLN 1140, PRLN 1141 and PRLN 1250

Attribute: BUSI (p. 521)

**PRLN 2332 3 credits****Event Planning & Sponsorship**

Students will learn the basics of raising charitable donations for a nonprofit organization, with emphasis on special event fundraising, media coverage and volunteer recognition. Students will plan a fundraising event for a nonprofit whereby they conduct meetings with representatives of the organization to determine venue, theme, activities and timing. They will plan the creative and production aspects of the event, which will be implemented in PRLN 2432 Event Production & Management in the spring term.

Level: UG

Prerequisite(s): PRLN 1150 and PRLN 1210

Attribute: BUSI (p. 521)

**PRLN 2338 3 credits****Advanced Visual Design**

Students will build upon their knowledge of visual design and refine their ability to apply advanced typography and page layout principles to class projects. Students will further develop analytical skills to produce and evaluate effective design strategies and demonstrate the importance of design thinking to business success. Students will identify current areas of strength and prepare and maintain a print portfolio of their best design work.

Level: UG

Prerequisite(s): PRLN 1140, PRLN 1141, PRLN 1236 and PRLN 1250

Attribute: BUSI (p. 521)

**PRLN 2345 3 credits****Introduction to Fundraising & Development**

Students will examine the basics of fundraising and development for nonprofit organizations, foundations and charities. They will examine the principles and strategic issues in fundraising; the role of the development officer; and the nature of fundraising campaigns. Students will develop an understanding of annual, capital and special project fundraising as well as how to work effectively with non-profit volunteer boards.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher

Attribute: BUSI (p. 521)

**PRLN 2350 3 credits****Publicity & Promotion**

Students will explore the tools, techniques, methodologies and best practices of marketing communications campaigns for a wide variety of organizations including profit and non-profit organizations. Students will also examine various corporate and marketing communication products such as posters, information sheets, flyers, advertorials and fundraising profiles to convey information about corporate goals programs.

Level: UG

Prerequisite(s): PRLN 1150

Attribute: BUSI (p. 521)

**PRLN 2432 3 credits****Event Production & Management**

Students will work with a client and implement the client-approved event proposal. They will learn to work as a team to organize, publicize, stage and manage a special event for a non-profit organization planned in a previous semester in PRLN 2332 Event Planning and Sponsorship.

Level: UG

Prerequisite(s): PRLN 2332

Attribute: BUSI (p. 521)

**PRLN 2441 3 credits****Organizational Communications**

Students will learn the techniques and strategies for creating and managing communications on behalf of an organization with employees and other audiences defined as internal to the organization. They will study how to design and produce effective professional communications plans, programs, policies and tools to effectively communicate corporate messages, promote employee engagement & productivity and create a positive organizational culture.

Level: UG

Prerequisite(s): PRLN 1150

Attributes: ASTR (p. 523), BUSI (p. 521)

**PRLN 2455 3 credits****Creative Services Consulting**

Students will learn how to establish a consulting company to gain contract and freelance project work in a creative services field such as public relations, corporate communications, marketing communications or graphic design. They will explore current concepts, theories and practical skills related to the establishment and marketing of a creative services consulting business. Students will examine business, marketing, ethical, legal and professional considerations specific to creative service businesses, agencies and consultancies.

Level: UG

Prerequisite(s): PRLN 1120, PRLN 1140, PRLN 1141, PRLN 1150,

PRLN 1210, PRLN 1220, and PRLN 1230.

Attribute: BUSI (p. 521)

**PRLN 2477 3 credits****PR Practicum**

Students will apply the skills and knowledge of professional public relations practice by securing, with instructor guidance and approval, an unpaid practicum of four weeks on-site in a professional communications environment. They will demonstrate mastery of the full range of PR competencies gained in the PR Diploma Program through tasks completed while working full-time, five days a week, for a minimum of 30 hours a week, for four weeks within the PR industry with consideration given to the student's interests, skills and personal suitability as well as the needs of both the student and the sponsor employer.

Level: UG

Prerequisite(s): Both (a) PRLN 1220, PRLN 1230, PRLN 2310, PRLN 2332, PRLN 2338 and PRLN 2350 and (b) PRLN 2320 OR PRLN 2150.

Attribute: BUSI (p. 521)

**PRLN 2478 1.5 credits****Professional Readiness**

Students will learn the techniques and practices of preparing for work opportunities in a professional and/or creative services field. They will analyze job postings and produce effective cover letters, resumes, and requests for informational interviews. They will design and organize a professional portfolio and learn to effectively present the portfolio to an employer. Students will practice professional networking skills and gain skills in handling employment interviews. They will examine the employment market for their chosen field and discuss plans for a practicum/job search.

Level: UG

Prerequisite(s): Both (a) PRLN 1220, PRLN 1230, PRLN 2310, PRLN 2332, PRLN 2338 and PRLN 2350 and (b) PRLN 2320 or PRLN 2150.

Attribute: BUSI (p. 521)

**PRLN 3010 3 credits****Ethics of Communication**

Students will examine ethical challenges that arise in the careers of organizational communications, marketing, business and public relations professionals. Students will explore the ethical codes of professional associations governing the practice of business communications. They will examine leadership roles for communicators in shaping ethical futures for profit and non-profit organizations.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher

Attribute: BUSI (p. 521)

## Diploma in Public Relations

Undergraduate

#### Credential Granted:

Diploma

#### Start Date:

Fall (September)

#### Intake Type:

- Limited

#### Minimum Credits Required:

60

#### Curriculum Effective Date:

01-Sep-2016

The next available intake for this program will be Fall (September) 2020.

## Description

The two-year Public Relations (PR) Diploma Program provides in-depth training for the next wave of public relations professionals. The KPU program is distinguished not only for providing the technical expertise to successfully work in PR, but also the strategic thinking and communications management that will help KPU grads to succeed and advance quickly within organizations.

## Requirements

### Admission Requirements

In addition to the Faculty's Admission Requirements, which consist of KPU's undergraduate English Proficiency Requirement (p. 13), the following program admission requirements apply:

- English 12 with a minimum grade of B (or equivalent), or a transferable undergraduate level English course with a minimum grade of C

**Note:** A lack of basic writing skills or word processing computer skills will hold the student back, so applicants are urged to upgrade this area before starting the program. Successful applicants will be invited to attend an orientation session sometime in May. The purpose of this session is to provide an opportunity to meet faculty, ask questions about the program, and to explore what the program entails. Arrangements will be made to accommodate out-of-town applicants.

On September 23, 2019 changes to the admission requirements for this program were approved by Senate. Effective September 2020 the following conditions will apply:

The Faculty's Admission Requirements, which consist of KPU's undergraduate English Proficiency Requirement (p. 13), apply to this program.

## Curricular Requirements

The Public Relations Program is a 60-credit diploma organized into four semesters.

Course	Title	Credits
<b>Year 1</b>		
ENGL 1100	Introduction to University Writing	3
PRLN 1120	PR Writing Fundamentals	3
PRLN 1140	Digital Applications for Print Media	3
PRLN 1141	Visual Design	3
PRLN 1150	Introduction to Public Relations	3
PRLN 1210	Media Relations	3
PRLN 1220	Writing for Media Relations	3
PRLN 1230	Public Relations Research	1.5
PRLN 1236	Visual Presentations	3
PRLN 1250	Digital Applications for Electronic Media	3

PRLN 2441	Organizational Communications	3
PRLN 2455	Creative Services Consulting	3

PRLN 2477	PR Practicum	3
PRLN 2478	Professional Readiness	1.5
	Credits	28.5
	Total Credits	60

## Other Information

### Work Experience

Students gain hands-on experience during a four-week (full time) work experience in the public relations industry prior to graduation. This work experience provides opportunities for observation and application of previously studied theories and methodologies and assists with the transition of the graduates from KPU to the workplace. Students are required to successfully complete all other courses in the PR Diploma Program, or be able to demonstrate how they will complete any remaining requirements prior to the graduation date of that particular year, before taking PRLN 2477.

### Credential Awarded

Upon successful completion of this program, students are eligible to receive a **Diploma in Public Relations**.

## Technical Management & Services

The Technical Management and Services (TMAS) program is designed for emerging technical professionals who have completed a Bachelor's degree in engineering or a technical program such as applied sciences or information technology.

Whether participants have industry experience or are just starting their career, this program equips emerging professionals with the skills needed to address supervisory and managerial needs in a technological environment. The technical manager's role is viewed as the link between business management and technical expertise and involves matching resources in uncoordinated areas, working through people and making and implementing management decisions, while simultaneously formulating technical strategies.

The TMAS program combines management and business administration concepts within the context of managing in technical product development, technical services (ie. engineering, environmental sciences, information technology) or operations and manufacturing environments. The TMAS program consists of five general management courses (15 credits) that allow participants to develop business-related critical thinking and analytical, communication, teamwork and interpersonal skills. Students will attain a solid understanding of how to interpret and synthesize core business, financial and performance data to make informed decisions in a technical business environment. Following this, participants will complete six courses (18 credits) of focused TMAS content.

The six TMAS courses develop a student's ability to apply best-in-practice processes and tools to a wide range of business and management issues and opportunities to support informed decision making in technical business situations and environments.

TMAS graduates will:

- Demonstrate the ability to develop a technology plan or technical services plan (or program) that aligns with the overall business plan

- Exercise their responsibilities in the management of cost-effective systems, product development, or technical services by leading and participating in interdisciplinary teams
- Apply their in-depth knowledge of leading a diverse technical team in analysis, administration, and project management within any technical industry
- Apply an ethical understanding and perspective to business situations both locally and globally, and apply the newest theoretical and practical approaches with respect to social responsibility and sustainability
- Analyze the performance of their organization (financial, products, services, practices and systems) to identify ways to improve the performance of organizations and help meet marketplace needs

Upon completion of the TMAS program, students will have a strong applied management knowledge base with the ability to apply business and management processes, tools and strategies as part of seeking or maintaining their professional accreditation or designation (via professional development credits).

The TMAS program will be delivered via Friday and Saturday classes that will be offered through a combination of in-class, blended (in-class/on-line) and compressed (6 week) in-class courses.

## Courses

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

### TMAS 5100 3 credits

#### Business Planning and Performance for Technical Businesses

Students in this course will explore and learn the concepts, issues, and themes related to analyzing business performance, business planning, strategy, and entrepreneurship. Students will develop their ability to analyze business performance and develop business plans that are aligned with the organizations strategic and financial goals. Various life phases of organizations will be explored to build an understanding of the impact on business performance and planning. Students will be encouraged to combine and apply their creativity and technical skills to develop a business strategy including, strategic and financial objectives for a technology or technical service based organization. Note: This course may be offered in compressed mode. Consult the current timetable.

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

### TMAS 5110 3 credits

#### Managing Technical Business Growth

Students will explore and evaluate challenges in the management of technology, engineering and technical services organizations as a business grows and develops in the face of growing complexity. Students will assume the roles of senior technical managers dealing with typical problems in a department within an environment of rapid change and growth: developing and implementing new infrastructure (business models, systems, processes, policies, practices), managing the deployment of resources, management of change, and managing project/technical professionals. Note: This course may be offered in compressed mode. Consult the current timetable.

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

### TMAS 5120 3 credits

#### Business Law for Technical Management and Services

This course addresses legal issues commonly encountered by technical professionals, best practices in identifying and mitigating legal risks, as well as strategies to avoid costly legal errors and to recognize when professional legal advice is necessary. Students will develop legal reasoning skills by examining various areas of the law that can interact to affect a single business transaction in a technical business environment. Note: This course may be offered in compressed mode. Consult the current timetable.

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

### TMAS 5130 3 credits

#### Consulting and Client Management Practices

Student will use an applied approach in developing practiced knowledge of the methodologies, tools, techniques and standards required for the professional consultant. The five stages of the consulting process will be leveraged while working as part of a consulting team. Students will develop an understanding of and practice the skills required to effectively work with external and internal clients. Emphasis will be placed on the particular consulting skills required to manage client interactions and engagement. Note: This course may be offered in compressed mode. Consult the current timetable.

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

### TMAS 5140 3 credits

#### Sustainable Operations

This course develops students ability to define and analyze sustainable business practices within the value chain of the product or service in order to develop and integrate sustainable practices at each step of the value chain. Students will learn how to measure and account for sustainability initiatives as a means of creating value at the operations management level within an organization. Students will be challenged to consider the sustainability challenges from the different stakeholder perspectives and priorities in developing and implementing sustainable operational practices and initiatives.

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

**TMAS 5150 3 credits****New Product and Services Development**

Students will learn and apply the new product and service development processes, as well as the tools and techniques associated with launching them. They will learn how to select and apply quantitative and qualitative approaches for analyzing market opportunities, as well as the approaches and methods to design, test, and introduce new products and services. Students will learn how to lead the organization and its stakeholders in the new product and services development process.

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

### Description

The Technical Management and Services (TMAS) program is designed for emerging technical professionals who have completed a Bachelor's degree in engineering or a technical program such as applied sciences or information technology.

Whether participants have industry experience or are just starting their career, this program equips emerging professionals with the skills needed to address supervisory and managerial needs in a technological environment. The technical manager's role is viewed as the link between business management and technical expertise and involves matching resources in uncoordinated areas to make and implement management decisions while simultaneously formulating technical strategies. Note:

This is a two-year program, though students can choose to complete the program in an accelerated form.

### Requirements

#### Admission Requirements

In addition to the Faculty's Admission Requirements, which consist of KPU's undergraduate English Proficiency Requirement (p. 13), the following program admission requirements apply:

- successful completion of a recognized undergraduate or graduate degree in science or technology (e.g. applied sciences, computer sciences, engineering, information technology, natural sciences)

or

- successful completion of a recognized technical or science diploma, along with a minimum of 5 years of related technical, scientific, or operational work experience. (KPU will require a resume from these applicants to make an admission decision.)

### Curricular Requirements

The Post Baccalaureate Diploma program requires completion of the following 33 credits of courses with a grade point average of 2.5 or higher.

Code	Title	Credits
BUSM 5100	Accounting and Financial Management for Managers	3
BUSM 5110	Managing Dynamic Teams	3
BUSM 5120	Project Management	3
BUSM 5130	Quantitative Methods for Business Management	3
BUSM 5140	Negotiations and Stakeholder Communications	3
TMAS 5100	Business Planning and Performance for Technical Businesses	3
TMAS 5110	Managing Technical Business Growth	3
TMAS 5120	Business Law for Technical Management and Services	3
TMAS 5130	Consulting and Client Management Practices	3
TMAS 5140	Sustainable Operations	3
TMAS 5150	New Product and Services Development	3
Total Credits		33

### Credential Awarded

Upon successful completion of this program, students are eligible to receive a **Post Baccalaureate Diploma in Technical Management and Services**.

## Wilson School of Design

Welcome to The Chip and Shannon Wilson School of Design. We're exceptionally proud of our unique and highly respected programs. As a graduate, you'll be ready to meet your personal and professional goals in the field of design in disciplines such as Fashion Design, Fashion Marketing, Graphic Design in Marketing, Interior Design and Product Design. If you have not decided on a design discipline, the one year Foundations in Design program can help you explore design possibilities while developing fundamental skills. In addition, design-related courses are being developed as general education or bridging courses that will be accessible to all students, including transferred students, international students, or current professionals. Updated information about these courses will be posted to the Wilson School of Design home page.

KPU is a teaching-focused university where we bring together students, teachers, guest lecturers and alumni to create a student-centred learning environment. Unlike larger universities, we keep our classes purposefully small so that you have the opportunity to work directly with faculty. Our small classes encourage teamwork and support while you're in the program, and help create a professional network once you've graduated.

## Requirements and Areas of Study

- Faculty Admission Requirements (p. 483)
- Fashion & Technology (p. 483)
  - Bachelor of Design in Fashion and Technology (p. 488)
- Fashion Marketing (p. 490)
  - Diploma in Fashion Marketing (p. 492)
- Foundations in Design (p. 493)
  - Certificate in Foundations in Design (p. 495)
- Graphic Design for Marketing (p. 496)
  - Bachelor of Design in Graphic Design for Marketing (p. 501)
  - Graphic Design for Marketing Liberal Education Electives (p. 503)
- Interior Design (p. 504)
  - Bachelor of Interior Design (p. 508)
- Product Design (p. 510)
  - Bachelor of Design, Product Design (p. 514)
- Technical Apparel Design (p. 516)
  - Post-Baccalaureate Diploma in Technical Apparel Design (p. 518)

## Interim Dean: Andhra Goundrey

Phone: 604.599.2673 | Email: andhra.goundrey@kpu.ca

## Faculty Admission Requirements

All applicants to undergraduate studies in the Chip and Shannon Wilson School of Design must satisfy the Faculty's undergraduate admission requirement, which consists of KPU's undergraduate English proficiency requirement (p. 13).

## Open Intake Areas of Study

The Chip and Shannon Wilson School of Design does not currently have any open intake areas of study.

## Limited-Intake Programs

Limited-intake programs have a limit on the maximum number of students admitted per application cycle. Refer to the Admission Requirements section in individual program pages for details:

- Bachelor of Design in Fashion and Technology (p. 488)
- Bachelor of Design in Graphic Design for Marketing (p. 501)
- Bachelor of Design, Product Design (p. 514)
- Bachelor of Interior Design (p. 508)
- Certificate in Foundations in Design (p. 495)
- Diploma in Fashion Marketing (p. 492)
- Post-Baccalaureate Diploma in Technical Apparel Design (p. 518)

## Pathway to Undergraduate Studies

Applicants who are unable to satisfy the undergraduate Faculty admission requirement may be eligible for admission to the Faculty's pathway program. See Pathway to Undergraduate Studies (p. 14) for more information.

## Fashion & Technology

The apparel industry has evolved well beyond the simple purpose of providing clothing to protect, identify and adorn the body. The focus has shifted towards a more intentional purpose that reaches deeper than the mere elements of style, but extends to solve problems and address needs related to function and performance. It also includes the integration of technology to improve upon design, marketing and production processes through the conscious awareness of the global impact on the economy, environment and society.

The rapid advancement in technology and globalization will continue to shape the landscape of this industry, creating an emerging need for designers who are flexible and collaborative cultivators of innovation. They are adaptable in responding to the complex needs of the technological and information savvy, time-starved customer, while still remaining mindful of social and ethical influences of business practices. The role of a designer within this industry has evolved to one who possesses the skills that go beyond just creating beautiful sketches and great clothing.

To succeed within this field, it is necessary to gain significant and relevant education and training in the areas of design, production and marketing for the apparel industry. A typical fashion career requires analyzing market trends and forecasting, the ability to design for a specific target market and in-depth knowledge of fabric, pattern drafting, fit and garment construction. Other skill requirements include the preparation of technical specification packages, presentations, communications, costing, trade and logistics and collaboration with in-house production teams, suppliers and contractors.

## Who Studies Fashion and Technology?

Most people who apply to the program have a passionate, lifelong interest in fashion with an aptitude for creative design, technical construction and an appreciation for fabric, prints, colours and trend forecasting. They are recent high school graduates, transfer students from other institutions, mature individuals returning to the profession or making a career change, or industry personnel seeking an upgrade in skills.

KPU boasts student exchange agreements with fashion schools in London, England; Helsinki, Finland; Taipei, Taiwan; Melbourne, Australia; Berlin, Germany and is developing further exchange opportunities to broaden global experiences.

Applicants with previous experience in the fashion industry may gain credits through Prior Learning Assessment (PLA). Graduates from a two-year fashion program who wish to pursue a degree will be assessed on an individual basis for potential advanced entry.

Industry personnel who wish to take a specific course or courses on a part-time basis to complement their job skills may do so based on seat availability and with permission from the Program Coordinator. Some course prerequisites may be waived based on work experience. Contact the Program Coordinator for further information.

## Career Opportunities

With over 300 apparel companies in the Lower Mainland, the well-established B.C. fashion industry offers many career choices. Graduates work in the design, marketing and production departments for vibrant lower mainland companies such as Arc'teryx, Aritzia, International Fashions, ivivva, Karma, Kensie, Kit and Ace, lululemon, Mountain Equipment Co-op, Mustang Survival, Oak and Fort, Peekaboo Beans, Plenty and Sugoi Performance Apparel. Similar opportunities are available worldwide with graduates currently at Nike, Abercrombie & Fitch, Nordstrom, and Volcom in the U.S. and Chloe in Paris, France.

Depending upon capabilities and interests, students work for large companies as members of design, production or marketing teams, for smaller design houses, working in all aspects of the business, engage in entrepreneurial (examples include Allison Wonderland, TrunkShow, Flaming Angels, Osei-Duro and Jolie Couture) or freelance endeavors. In all instances, graduates need to be well versed in all three aspects of the business (design, production and marketing) to fully contribute as a team player. Emerging designers prosper best if they have a solid background and experience in production and marketing.

**Fashion students interested in a career as a high school teacher of clothing and textiles may be eligible for entry to UBC's Bachelor of Education program in Home Economics upon completion of KPU's fashion degree, including a combination 18 credits of English, Sociology, Psychology and Family Studies courses. Family Studies courses may be taken at UBC as either a visiting student at UBC while completing KPU's fashion program (using these courses as electives towards the completion of the fashion degree) or as a UBC student following graduation from KPU's fashion program. Conditions for admission and transfer are set by the receiving institution. Details must be confirmed by the student.**

## Programs

- Bachelor of Design in Fashion and Technology (p. 488)

## Courses

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

### FASN 1100 3 credits

#### Fundamentals of Fashion Design

Students will examine the foundational elements and principles of design and their application in the creation of apparel. They will develop their ability to experiment with design in two- and three-dimensions through exploration of creative methodologies. Students will formulate solutions to basic fashion design problems, considering the human form, colour theory, and material application.

Level: UG

Attribute: DESN (p. 521)

### FASN 1116 3 credits

#### The Apparel Industry

Students will examine the local, national, and global apparel industry through retail environment and brand positioning field analysis. They will acquire an awareness of the historical and current contextual developments affecting the industry. Students will identify the organization of the industry from raw materials through to design, production, marketing, and retail sectors specific to segmented target markets and apparel products.

Level: UG

Attribute: DESN (p. 521)

### FASN 1121 3 credits

#### Fundamentals of Apparel Pattern Drafting

Students will practise the fundamental techniques of apparel pattern drafting. They will investigate the correlation between 2D patterns and their application to 3D human form. They will manually draft flat patterns for basic garments and apparel components using industry standard drafting tools and techniques.

Level: UG

Co-requisite(s): FASN 1130

Attribute: DESN (p. 521)

### FASN 1130 3 credits

#### Fundamentals of Apparel Construction

Students will practise the fundamental techniques of apparel construction utilizing basic industrial sewing and finishing equipment. They will apply construction techniques and develop their machine operating skills to create basic garments and apparel components. They will apply industry standards in apparel construction, including equipment protocols and quality assurance practices.

Level: UG

Co-requisite(s): FASN 1121

Attribute: DESN (p. 521)

### FASN 1205 3 credits

#### Fundamentals of Digital Communication

Students will examine computer applications and digital communication utilized in the fashion industry. They will develop solutions for apparel business activities including formatting of data, visuals, and presentations. Students will explore the capabilities of industry-standard multimedia technology applications such as Adobe Illustrator and Photoshop to design and build print-ready digital fashion files.

Level: UG

Attribute: DESN (p. 521)

**FASN 1215 3 credits****Textiles & Technology I**

Students will explore the textile industry and inherent technologies specific to apparel applications. They will gain an introductory understanding of fabric science through the study of fibre and yarn properties, fabric characteristics and textiles production. They will explore industry-related issues in the production of textiles and their impact on design, manufacturing and marketing of apparel. They will analyze fibre and fabric property performance using textile testing technology.

Level: UG

Prerequisite(s): FASN 1116

Cross-listing: FMRK 1215

Attribute: DESN (p. 521)

**FASN 1225 3 credits****Fundamentals of Apparel Production**

Students will practise the fundamental techniques of apparel production and utilize industry standards of selecting and manipulating block patterns to create prototype garments for new style development. They will create basic technical production specification documents that communicate fabric selection, style details, and garment measurements. Students will construct garments applying basic apparel manufacturing processes while practising industry standards, such as quality assurance and sustainable materials utilization.

Level: UG

Prerequisite(s): FASN 1121 and 1130

Attribute: DESN (p. 521)

**FASN 1231 3 credits****Fundamentals of Fashion Drawing**

Students will explore a variety of free-hand and digital drawing methods and applications utilized in the apparel industry. They will study garment components and fashion terminology for design ideation sketching and technical flat drawing applications. They will experiment with drawing media and techniques to communicate a variety of human forms and fabric rendering solutions. Students will analyze and apply techniques used in historical and current fashion illustrations to communicate and market fashion designs.

Level: UG

Attribute: DESN (p. 521)

**FASN 2100 3 credits****Fashion Design Theory and Process I**

Students will engage in design process and documentation methods utilized in the apparel industry. They will investigate the balance of creativity and marketability required in style development. They will examine and interpret creative design theories and methods. Students will formulate design solutions for apparel products specific to target market segments while developing their individual creative process.

Level: UG

Prerequisite(s): Both: (a) FASN 1230 or FASN 1231 and (b) MRKT 1199

Co-requisite(s): FASN 2121

Attribute: DESN (p. 521)

**FASN 2116 3 credits****Fashion History I**

Students will examine historic costume and the transformation of clothing to the end of the 19th century through analysis of decorative and fine art, and apparel artefacts. They will survey each historical era and the interrelatedness of social, economic, political, cultural and technological events and effects on dress at the time. Students will establish timelines and context for fashion as part of culture, interpret historical design references, and analyze the historical development of the apparel industry.

Level: UG

Prerequisite(s): FASN 1115 or 1116

Attribute: DESN (p. 521)

**FASN 2121 3 credits****Style Production I**

Students will apply drafting and construction skills to create industry standard block patterns for apparel prototype style development. They will expand their skills in pattern manipulation, sewing operations, and industrial equipment use through experimentation with a variety of fabrications, including knits and technical textiles, and increasingly complex garment design. They will apply industry standard technical design skills through development of specification packages and the analysis of fit, quality assurance, and costing in style production.

Level: UG

Prerequisite(s): FASN 1220 or 1225

Co-requisite(s): FASN 2100

Attribute: DESN (p. 521)

**FASN 2201 3 credits****Fashion Design Theory and Process II**

Students will interpret the design and merchandising process utilized in the creation of apparel collections, expanding their knowledge of industry practices and design documentation. They will individually and collaboratively employ fashion design theories and processes in the formulation of design solutions for a range of target market segments. Students will identify production and sustainability considerations in the design process while continuing to explore individual creative practice.

Level: UG

Prerequisite(s): FASN 2100

Co-requisite(s): FASN 2221

Attribute: DESN (p. 521)

**FASN 2215 3 credits****Textiles & Technology II**

Students will integrate their knowledge of the textile industry and inherent technologies for specific apparel applications. They will investigate textile dyeing, printing, and finishing techniques and develop skills in colour management. Technological and environmental innovations and their applications in fashion and performance textiles will be critically examined. Students will apply aesthetic and technological properties of fabric development for apparel through the introduction of composite material and textile design.

Level: UG

Prerequisite(s): FASN 1215

Attribute: DESN (p. 521)

**FASN 2216 3 credits****Fashion History II**

Students will examine historical fashion in the context of the 20th and 21st centuries. They will analyze contemporary history through the interrelatedness of social, economic, political, technological, and cultural events and their effects on dress and the apparel industry. Students will integrate the study of historical dress and cyclical consumer trend analysis to formulate apparel and textiles fashion forecasting presentations specific to target markets.

Level: UG

Prerequisite(s): ENGL 1100 and FASN 2116

Attribute: DESN (p. 521)

**FASN 2221 6 credits****Style Production II**

Students will draft patterns and construct styles for specific markets to explore techniques working with a variety of production equipment and fabrications. They will expand technical design skills through the creation of industry standard specification packages that include detailed production analyses. Students will develop prototype analysis and evaluation techniques to critically assess fit, technical performance, quality, and sustainable practices. Students will utilize critical thinking skills to solve problems encountered through the style production process while employing industry techniques and standards.

Level: UG

Prerequisite(s): FASN 2121

Co-requisite(s): FASN 2201

Attribute: DESN (p. 521)

**FASN 2241 3 credits****CAD Drafting Methodologies**

Students will learn to operate computer-aided-design (CAD) technology to practise pattern manipulation techniques conforming to apparel industry standards. They will transfer manual pattern drafting skills and knowledge to computer-based pattern manipulation methods, with emphasis on creating and determining solutions for new style development.

Level: UG

Prerequisite(s): FASN 1205 and 2121

Attribute: DESN (p. 521)

**FASN 3100 3 credits****Surface Design**

Students will create unique textiles through analysis of fabric traditions of various cultures and the exploration and application of surface design techniques. They will increase their knowledge of structural and sustainable surface design processes by producing textiles using a variety of contemporary media and techniques. Students will engage in creative exploration of surface design problems and prepare presentations of textile and fashion design solutions through tactile, visual, verbal and written communication.

Level: UG

Prerequisite(s): FASN 2215

Attribute: DESN (p. 521)

**FASN 3101 3 credits****Apparel Product Development**

Students will analyze product development design and merchandising processes utilized in the global apparel industry. They will collaborate to formulate seasonal collection design solutions utilizing consumer analysis, strategic planning, and forecasting research. They will propose solutions that consider the balance of ethical, social, environmental, and economic interests throughout the line development process. Students will expand their knowledge and creative application of industry standard technology throughout the product development planning, communication, and presentation process.

Level: UG

Prerequisite(s): All of (a) FASN (2200 or 2201) and (b) FASN 2216

Attribute: DESN (p. 521)

**FASN 3110 3 credits****Advanced Technical Apparel Design & Production**

Students will analyze design processes and manufacturing techniques required for technical and performance apparel production. They will study anthropometrics, ergonomics, and textiles technology to determine articulation, fit, and materials required for the design of performance garments. Students will assemble prototype apparel solutions for identified applications and environments with the use of specific industrial machinery, equipment, materials, and construction techniques.

Level: UG

Prerequisite(s): Both (a) FASN 2220 or 2221 and (b) FASN 2240 or 2241

Attribute: DESN (p. 521)

**FASN 3121 3 credits****Manufacturing Methodology**

Students will interpret manufacturing methodologies and their applications for apparel production environments. They will apply the fundamentals of apparel engineering including productivity concepts, apparel production systems, and operation time studies. They will analyze costing and quality assurance processes in apparel manufacturing and examine domestic and global sustainable production sourcing strategies. Students will study manual and computer-aided-design (CAD) pattern grading and marker-making systems for size range development and sustainable fabric utilization, as part of apparel manufacturing processes.

Level: UG

Prerequisite(s): FASN 3101 and 3110

Attribute: DESN (p. 521)

**FASN 3131 3 credits****Draping Methodology**

Students will experiment with various methods of fabric draping utilized in apparel design. They will create draped three-dimensional (3D) prototypes and apparel components and analyze them for translation into flat patterns. They will explore innovative draped designs through interpretation of historical and current draping techniques used in fashion. Students will determine manufacturing solutions for complex draped garments using advanced pattern making and garment finishing techniques.

Level: UG

Prerequisite(s): FASN 2220 or 2221

Attribute: DESN (p. 521)

**FASN 3151 3 credits****Professional Practices**

Students will develop skills in personal career assessment and professional practices to secure an apparel industry practicum placement with a design/manufacturing company. They will manage skills in resumé and cover letter writing, portfolio development, and interview techniques. They will analyze career opportunities within the local apparel industry and examine practicum procedures, human relations, and leadership principles for success in the workplace.

Level: UG

Prerequisite(s): All of: (a) CMNS 1140, (b) FASN 2200 or FASN 2201 and (c) FASN 2220 or FASN 2221

Attribute: DESN (p. 521)

**FASN 3250 3 credits****Professional Practicum**

Students will engage in professional industry practices through a workplace practicum with a design/manufacturing company in the apparel industry. They will practice applied skills, develop contacts in the industry, and identify opportunities for their place as future professionals in the field. They will utilize critical thinking and reflective practice to synthesize practical knowledge acquisition with prior learning.

Level: UG

Prerequisite(s): FASN 3151

Attribute: DESN (p. 521)

**FASN 3900 3 credits****Special Topics**

Students will critically engage in an intensive study of a special topic in fashion design and/or technology as selected by the instructor. They will research and analyse the theory and application of a particular or emerging fashion topic.

Level: UG

Prerequisite(s): 48 credits from courses in FASN at the 1100 level or higher

Attribute: DESN (p. 521)

**FASN 4101 6 credits****Collection: Design Development**

Students will integrate personal creative direction with industry practice through the identification, validation, and conceptualization of an apparel collection for a viable consumer market. They will refine verbal communication and visual presentation skills utilizing advanced technology applications in proposals of individual line concepts and multiple design solutions. Students will synthesize prior experience, education, knowledge, and skills while critically assessing the balance of creativity, marketability, and sustainability required for leadership in the profession.

Level: UG

Prerequisite(s): FASN 3200 or 3101

Co-requisite(s): FASN 4151

Attribute: DESN (p. 521)

**FASN 4120 3 credits****Innovative Pattern Cutting**

Students will explore contemporary and emergent sustainable apparel industry practices of innovative pattern cutting techniques. They will research the development of these practices and determine their applications for design, manual and computer-aided-design (CAD) pattern making, and manufacturing. Students will experiment with Zero Waste fashion design methods, specialized cutting techniques, three-dimensional (3D) design applications, and material manipulations in the creation of apparel.

Level: UG

Prerequisite(s): FASN 3130 or 3131

Attribute: DESN (p. 521)

**FASN 4130 3 credits****Advanced Digital Communication**

Students will synthesize their visual communication skills in fashion design, illustration, and print and media production integrating industry-standard applications to design and produce a professional digital portfolio. They will design and implement a fashion webpage as a marketing tool. Students will use animation software to create dynamic visual presentations, integrating computer-aided-design (CAD) skills to produce 2-dimensional (2D) to 3-dimensional (3D) garment simulations.

Level: UG

Prerequisite(s): FASN 4101

Co-requisite(s): FASN 4211 and 4221

Attribute: DESN (p. 521)

**FASN 4151 3 credits****Apparel in the Global Economy**

Students will critically analyze the apparel industry in relation to the global and local economy. Through study of the interrelatedness of consumer purchasing patterns, international trade regulations, and raw materials and production sourcing they will examine the global apparel supply chain. Students will manage manufacturing cost and quality analyses while evaluating the integration of ethical supply chain management in the development of a business scenario for an identified apparel collection.

Level: UG

Prerequisite(s): FASN 3120 or 3121

Co-requisite(s): FASN 4101

Attribute: DESN (p. 521)

**FASN 4211 3 credits****Professional Promotion**

Students will present and promote their individual apparel design, production, marketing, and technological skills. They will develop a personal cohesive brand, and professional communication and leadership skills. Students will create marketing materials to promote an individually designed fashion portfolio of work for media and industry professionals, including buyers and potential employers.

Level: UG

Prerequisite(s): FASN 4101

Co-requisite(s): FASN 4130 and 4221

Attribute: DESN (p. 521)

**FASN 4221 6 credits****Collection: Production**

Students will synthesize production knowledge and technical design skills in the creation of a cohesive collection of constructed garments for an identified market. They will evaluate and apply appropriate industry standard pattern making, production, and finishing techniques. Students will create and produce complete specification packages for complex styles and critically evaluate and refine final apparel prototypes for quality, fit, performance, and promotion.

Level: UG

Prerequisite(s): FASN 4120

Co-requisite(s): FASN 4130 and 4211

Attribute: DESN (p. 521)

**FASN 4250 3 credits****Self-Directed Study**

Students will have the opportunity in their final year to integrate personal areas of interest with practice in the profession (subject to faculty approval). They will gain proficiency in entry level job knowledge and skills, as well as develop habits of independent learning through planning, researching, developing and presenting a negotiated area of fashion study.

Level: UG

Prerequisite(s): FASN 3250

Attribute: DESN (p. 521)

## Description

To many, it's a piece of fabric. To you, it's a blank canvas just waiting to be brought to life. Make your mark in the world of fashion with the only four-year degree program of its kind in Western Canada.

KPU's Bachelor of Design, Fashion and Technology program has an international reputation for building tomorrow's fashion leaders. Our unique, industry-focused curriculum gives students the design skills, business acumen and marketing savvy they need to compete in the global fashion marketplace.

Upon graduation from the four year degree program, our alumni have been placed in innovative and leading positions in the local apparel and design industry, often beginning their post-graduate careers as soon as a week after completion of the year end event.

What makes our program so special?

- Our teachers are industry leaders who are plugged into the global fashion scene.
- Our program simulates a professional working environment and constantly adapts to reflect the changing marketplace.
- Our classrooms are equipped with cutting-edge technology used by industry.
- Our workplace practicum program opens the doors to top local companies such as lululemon, Arc'teryx, Oak + Fort, and Manuel Mendoza.
- Our international exchange program prepares students to become global fashion leaders.
- Our students study at fashion schools in London, Melbourne, Berlin, Helsinki, Monterrey, Horsens and Taipei.
- Our many inspiring guest speakers and presentations invite students to take their learning outside of the classroom and participate in the vibrant local design community.
- Our students launch their careers by showcasing their final collections in our renowned fashion show, which is attended by over 2,000 people, including industry leaders and the media.

## Who Studies Fashion and Technology?

Most people who apply to the program have a passionate, lifelong interest in fashion with an aptitude for creative design, technical construction and an appreciation for fabric, prints, colours and trend forecasting. They are recent high school graduates, transfer students from other institutions, mature individuals returning to the profession or making a career change, or industry personnel seeking an upgrade in skills.

KPU boasts student exchange agreements with fashion schools in London, England; Helsinki, Finland; Taipei, Taiwan; Melbourne, Australia; and Berlin, Germany and is developing further exchange opportunities to broaden global experiences.

Applicants with previous experience in the fashion industry may gain credits through Prior Learning Assessment (PLA). Graduates from a two-year fashion program who wish to pursue a degree will be assessed on an individual basis for potential advanced entry.

Industry personnel who wish to take a specific course or courses on a part-time basis to complement their job skills may do so based on seat availability and with permission from the Program Coordinator. Some course prerequisites may be waived based on work experience.

Contact the Program Coordinator for further information.

## Career Opportunities

With over 300 apparel companies in the Lower Mainland, the well-established B.C. fashion industry offers many career choices. Graduates work in the design, marketing and production departments for vibrant Lower Mainland companies such as Arc'teryx, Aritzia, International Fashions, ivivva, Karma, Kensie, Kit and Ace, lululemon, Mountain Equipment Co-op, Mustang Survival, Oak and Fort, Peekaboo Beans, Plenty and Sugoi Performance Apparel. Similar opportunities are available worldwide with graduates currently at Nike, Abercrombie & Fitch, Nordstrom, and Volcom in the U.S. and Chloe in Paris, France.

Depending upon capabilities and interests, students work for large companies as members of design, production or marketing teams, for smaller design houses, working in all aspects of the business, engage in entrepreneurial (examples include Allison Wonderland, TrunkShow, Flaming Angels, Osei-Duro, Jolie Couture and Taylor Hart Designs) or freelance endeavors. In all instances, graduates need to be well versed in all three aspects of the business (design, production and marketing) to fully contribute as a team player. Emerging designers prosper best if they have a solid background and experience in production and marketing.

Fashion students interested in a career as a high school teacher of clothing and textiles may be eligible for entry to UBC's Bachelor of Education program in Home Economics upon completion of KPU's fashion degree, including a combination 18 credits of English, Sociology, Psychology and Family Studies courses. Family Studies courses may be taken at UBC as either a visiting student at UBC while completing KPU's fashion program (using these courses as electives towards the completion of the fashion degree) or as a UBC student following graduation from KPU's fashion program.

## Requirements

### Admission Requirements

In addition to the Faculty's Admission Requirements, which consist of KPU's undergraduate English Proficiency Requirement (p. 13), the following program admission requirements apply:

- Portfolio Review and Orientation Session

### Portfolio Review and Orientation Session

Prospective students should consult with an Academic Advisor, or with the Chip and Shannon Wilson School of Design prior to applying. Faculty will review the eligibility of candidates based on the contents of their portfolio. For detailed information about the Fashion and Technology portfolio requirements and review process, visit the department's website at [kpu.ca/design/portfolio](http://www.kpu.ca/design/portfolio) (<http://www.kpu.ca/design/portfolio/>)

### Upper-Level Program Admission

In addition to the program admission requirements, applicants may be eligible for advanced standing to the program at an upper level. An individual portfolio review is required.

## Curricular Requirements

The first year introduces students to the various facets of the fashion industry, elements and principles of fashion design, drawing, pattern drafting and industrial sewing and includes important support courses in English, computer applications for fashion and marketing. The second year is more focused on fashion discipline-based knowledge and skill development and includes designing for industry linked projects in

collaboration with local apparel companies such as Lululemon, Plum and Oliver and Lilly's.

The third and fourth years feature opportunities to apply previous studies to real world applications. Students design for both mass and niche markets, combining creativity with marketability and practice production planning from both a local and global perspective. A practicum with a local design company will increase students' knowledge of industry practices and develop contacts in the industry. The final semester culminates in a fashion event and presentation of a graduate portfolio to showcase to industry. Most electives are taken in the senior years, but students may take electives in the order that best suits their schedules.

For transfer students, some courses in the lower-level of the program may be taken while in the third year, subject to availability. Some credits from courses taken elsewhere may be used to fulfill the elective requirements in the third and fourth years. Transfer credits are assessed on an individual basis. For information on the transfer credit process, visit [kpu.ca/transfercredit](http://www.kpu.ca/transfercredit) (<http://www.kpu.ca/transfercredit/>)

Course	Title	Credits
<b>Year 1</b>		
<b>Term 1</b>		
CMNS 1140	Introduction to Professional Communication	3
FASN 1100	Fundamentals of Fashion Design	3
FASN 1116	The Apparel Industry	3
FASN 1121	Fundamentals of Apparel Pattern Drafting	3
FASN 1130	Fundamentals of Apparel Construction	3
	Credits	15
<b>Term 2</b>		
FASN 1205	Fundamentals of Digital Communication	3
FASN 1215	Textiles & Technology I	3
FASN 1225	Fundamentals of Apparel Production	3
FASN 1231	Fundamentals of Fashion Drawing	3
MRKT 1199	Introduction to Marketing	3
	Credits	15
<b>Year 2</b>		
<b>Term 3</b>		
ENGL 1100	Introduction to University Writing	3
FASN 2100	Fashion Design Theory and Process I	3
FASN 2116	Fashion History I	3
FASN 2121	Style Production I	3
FASN 2215	Textiles & Technology II	3
	Credits	15
<b>Term 4</b>		
FASN 2201	Fashion Design Theory and Process II	3
FASN 2216	Fashion History II	3
FASN 2221	Style Production II	6
FASN 2241	CAD Drafting Methodologies	3
Upon successful completion of the first four terms (60 credits), students are eligible to exit the program and receive a Diploma.		
	Credits	15
<b>Year 3</b>		
<b>Term 5</b>		
FASN 3100	Surface Design	3
FASN 3101	Apparel Product Development	3
FASN 3110	Advanced Technical Apparel Design & Production	3
FASN 3151	Professional Practices	3
Elective (p. 490)		3
	Credits	15
<b>Term 6</b>		
FASN 3121	Manufacturing Methodology	3

FASN 3131	Draping Methodology	3
FASN 3250	Professional Practicum	3
Elective (p. 490)		3
Elective (p. 490)		3
Credits		15
<b>Year 4</b>		
<b>Term 7</b>		
FASN 4101	Collection: Design Development	6
FASN 4151	Apparel in the Global Economy	3
FASN 4120	Innovative Pattern Cutting	3
Elective (p. 490)		3
Credits		15
<b>Term 8</b>		
FASN 4211	Professional Promotion	3
FASN 4221	Collection: Production	6
FASN 4130	Advanced Digital Communication	3
Elective (p. 490)		3
Credits		15
Total Credits		120

## Electives

The 5 elective courses (15 credits) must include:

- A minimum of two courses (6 credits) numbered 1100 or higher from non-fashion areas of study that develop a breadth of knowledge and integrate with learning acquired in the program.
- A minimum of one course (3 credits) numbered 1100 or higher from the School of Business
- A minimum of two other courses (6 credits) numbered 1100 or higher from any area of study. FASN 3900, Special Topics, and FASN 4250, Self-Directed Study, are recommended.

## Other Information

### Costs

Students should be prepared to spend approximately \$600 to \$1000 per year on books and materials.

This program is delivered in an e-mobile environment that uses laptop computers and specific software. Students are advised NOT to purchase a personal laptop computer until specifications and requirements have been provided to successful applicants.

## Credential Awarded

Upon successful completion of this program, students are eligible to receive a **Bachelor of Design, Fashion and Technology**.

Upon successful completion of the requirements for Years 1 and 2, students are eligible to receive a **Diploma in Fashion and Technology**.

## Fashion Marketing

Where fashion and business meet, exists Fashion Marketing, a field which requires an eye for style and a head for business. Professionals who work in fashion marketing and merchandising examine fashion trends, ensure retailers stock successful product lines, coordinate sales, and promote goods. Successful Fashion Marketing professionals excel at providing an intuitive, superior level of customer service and customer experience. They have a flair for working with people and thrive in an environment that benefits from their engaging communication skills. While fashion marketers may not design clothing, as marketing and merchandising

professionals, they are responsible for helping designers by ensuring that their lines sell. Successful professionals in the field usually have a blend of business skills and textiles knowledge, as well as the ability to identify consumer behavior and desires.

Fashion marketing is the process of managing the flow of merchandise from the initial selection of designs to be produced to the presentation of products to retail customers, with the goal of maximizing a company's sales and profitability. Successful fashion marketing depends on understanding consumer desire and responding with appropriate messages, materials and execution of marketing plans.

## Who Studies Fashion Marketing?

Accepting up to 30 new students each year, applicants to the program are eager to learn about and work in various areas of the fashion industry. They have some experience and knowledge about fashion and wish to build on that passion to develop their marketing and management skills for success in leadership positions. If you have always enjoyed exploring fashion companies and thought about working with people and clothing in the business sector then you will thrive in this program.

Students who excel in this program have a flair for fashion, an eye for style and an innate ability to connect with people.

## Career Opportunities

Our graduates develop skills necessary for employment in the creative business services sector. Career opportunities are extensive and include:

- Buying
- Merchandising
- Branding
- Forecasting
- Styling and Consulting
- Visual Merchandising
- Communications
- Special Events Coordination
- Retail Sales
- Management

Graduates can work for apparel companies, retailers, distributors and marketers.

Some graduates choose to work freelance or run their own organizations and ideally find a broad variety of options to pursue a meaningful career or further education.

## Programs

- Diploma in Fashion Marketing (p. 492)

## Courses

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](http://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**FMRK 1105 3 credits****Computer Applications for Fashion Marketing**

Students will examine the role of computers in the business world of fashion. They will be introduced to the Microsoft Windows operating system, and will use the Internet and the Microsoft Office spreadsheet, presentation and word processing software to develop solutions for fashion marketing related business activities. Students will explore the capabilities of industry-standard software applications such as Adobe Illustrator, Photoshop and InDesign to create fashion marketing-related artwork and to design and build print-ready digital media.

Level: UG

Co-requisite(s): FMRK 1115

Cross-listing: DEPD 1240

Attribute: DESN (p. 521)

**FMRK 1115 2.5 credits****The Apparel Market**

Students will acquire an historical awareness of the apparel industry and the current workings of the industry in local, national and global contexts. They will learn to identify the sectors of the industry from raw materials through to design, production and marketing to the consumer. Through market research students will explore and attend events, network with store owners and develop job contacts for marketing related opportunities. They will also explore a variety of careers available in design and marketing and how these positions interrelate.

Level: UG

Co-requisite(s): FMRK 1105

Attribute: DESN (p. 521)

**FMRK 1150 2 credits****Fashion Retail Work Experience**

Students will work 80 hours, paid or volunteer, to gain an understanding of the retail component of fashion in order to further their fashion marketing knowledge and skills. They will provide evidence of their learning in journal form, self-assessment, and reference letters.

Level: UG

Attribute: DESN (p. 521)

**FMRK 1205 3 credits****Visual Communication for Fashion Marketing**

Students will develop their fashion communication skills in a visual context. They will explore the fundamental elements and principles of design, and apply them to current visual fashion marketing strategies. Students will experiment with concepts of layout using fashion figures, terminology, and fashion product such as apparel and accessories. They will create a variety of fashion marketing images to increase their visual literacy in relation to prevailing industry formats.

Level: UG

Prerequisite(s): FMRK 1105, FMRK 1115 and MRKT 1199.

Attribute: DESN (p. 521)

**FMRK 1215 3 credits****Textile Science**

Students will develop their knowledge of how fabrics are created and used, and will be able to apply that understanding to communicate textile knowledge for marketing purposes. They will learn how factors such as industry issues, sourcing practices, labeling laws, fabric finishes and care instructions affect design, production and marketing decisions.

Level: UG

Prerequisite(s): FMRK 1115 and MRKT 1199.

Cross-listing: FASN 1215

Attribute: DESN (p. 521)

**FMRK 1250 3 credits****Fashion and Consumers**

Students will study the supply and demand for fashion products and services and business opportunities for local retail and wholesale markets. They will practice matching consumer preferences to finished product. Students will investigate job opportunities and entrepreneurial ventures in sales and marketing and explore local fashion districts. They will research, write market reports and present a marketing plan for a new start-up fashion business.

Level: UG

Prerequisite(s): FMRK 1105, FMRK 1115, FMRK 1150 and MRKT 1199.

Attribute: DESN (p. 521)

**FMRK 2105 3 credits****Visual Fashion Merchandising and Promotion**

Students will explore visual concepts of fashion marketing and promotion in 2-dimensional and 3-dimensional formats. They will interpret the elements and principles of design as they relate to 3-D areas, such as retail display spaces. Students will examine careers in visual merchandising and fashion promotion by experimenting with window and in-store display, creating merchandising floor plans for retail, styling still-photography shoots and creating fashion looks with garments. Students will identify current local and global trends in apparel, display, advertising and promotion as it pertains to the fashion industry.

Level: UG

Prerequisite(s): FMRK 1150 and 1205

Attribute: DESN (p. 521)

**FMRK 2115 3 credits****Fashion Forecasting**

Students will engage in examination of historical fashion trends to determine how influences such as politics, economics, social and cultural movements impact the evolution of apparel and textiles. Through analysis of consumer trends and market segmentation, students will research applicable influences from areas such as design, art, music, architecture and lifestyle. Students will present a visual, verbal, and written proposed forecast with a rationale, based on interpretation and resulting analysis.

Level: UG

Prerequisite(s): FMRK 1205

Attribute: DESN (p. 521)

**FMRK 2120 3 credits****Fashion Writing**

Students will examine techniques for effective writing in the context of fashion marketing and promotion. Students will practice various fashion writing techniques such as web and social media writing, print and broadcast advertising, public relations copy, and editorial content in newspapers and magazines. Students will apply research, critical thinking, and writing skills using case studies and industry profiles.

Level: UG

Prerequisite(s): FMRK 1205 and FMRK 1215.

Attribute: DESN (p. 521)

**FMRK 2205 3 credits****Fashion Buying**

Students will expand their knowledge of the retail industry including development and distribution of consumer apparel products. They will examine the financial aspects of merchandising including pricing strategies, sales planning and purchasing of retail inventories. Students will also analyze merchandise control, productivity assessment, and in-store presentation.

Level: UG

Prerequisite(s): FMRK 2105 and 2115.

Attribute: DESN (p. 521)

**FMRK 2215 3 credits****Fashion Events and Promotions**

Students will learn to organize and manage a fashion marketing event including: event project management, research and design of on-site coordination, logistics, budgeting, promotion, fundraising, and evaluating the event's success. They will determine venue, theme, activities and will stage the event in the semester. Students will learn about publicity and will prepare media releases, public service announcements, and event communications plans.

Level: UG

Prerequisite(s): FMRK 2120

Attribute: DESN (p. 521)

**FMRK 2240 1.5 credits****Fashion Marketing Work Experience**

Students will conduct a 40 hour work placement in an apparel marketing organization. They will increase their knowledge of fashion marketing practices, develop contacts in the industry and identify opportunities for their place as professionals in the field.

Level: UG

Prerequisite(s): FMRK 2105

Attribute: DESN (p. 521)

## Description

You have an eye for style, and a head for business. We have a two-year diploma program that combines both. In our hands-on program, you will learn practical skills in business, fashion, communication and marketing, while making industry connections that will launch your career. Everything you learn will enable you to jump into careers in Buying, Merchandising, Branding, Forecasting, Styling, Public Relations, Event Planning and Sales, or continue your studies into KPU's Bachelor of Business Administration Degree Program (BBA).

## Who Studies Fashion Marketing?

Accepting up to 30 new students each year, applicants to the program are eager to learn about and work in various areas of the fashion industry. They have some experience and knowledge about fashion and wish to build on that passion to develop their marketing and management skills for success in leadership positions. If you have always enjoyed exploring fashion companies and thought about working with people and clothing in the business sector then you will thrive in this program. Students who excel in this program have a flair for fashion, an eye for style and an innate ability to connect with people.

## Career Opportunities

Our graduates develop skills necessary for employment in the creative business services sector. Career opportunities are extensive and include:

- Buying/Allocations
- Merchandising
- Branding
- Forecasting
- Styling and Consulting
- Visual Merchandising
- Communications
- Special Events Coordination
- Retail Sales
- Management

Graduates can work for apparel companies, retailers, distributors and marketers. Some graduates choose to work freelance or run their own organizations and ideally find a broad variety of options to pursue a meaningful career or further education.

Graduates may choose to take their career further by applying to enter the third year of one of KPU's Bachelor of Business Administration (BBA) degree programs, or any Faculty of interest.

## Requirements

### Admission Requirements

In addition to the Faculty's Admission Requirements, which consist of KPU's undergraduate English Proficiency Requirement (p. 13), the following program admission requirements apply:

- Fashion Marketing information session
- Letter of Interest package

For further details about the information session and the letter of interest package, including submission specifics, visit the department's website at [kpu.ca/fashionmarketing](http://www.kpu.ca/fashionmarketing) (<http://www.kpu.ca/fashionmarketing/>)

## Curricular Requirements

The Diploma program requires a minimum of 60 credits of post-secondary courses.

To continue each semester as a Fashion Marketing Diploma student and maintain priority registration status, students are required to take all of the Fashion Marketing (FMRK) courses in sequence as listed in the "Course Requirements" section.

### Course Requirements

Course	Title	Credits
<b>Term 1</b>		
FMRK 1105	Computer Applications for Fashion Marketing	3
FMRK 1115	The Apparel Market	2.5
FMRK 1150	Fashion Retail Work Experience	2
MRKT 1199	Introduction to Marketing	3
Select one of the following:		3
BUSI 1110	Fundamentals of Business in Canada	
BUSI 1210	Essentials of Management	
BUSI 1215	Organizational Behaviour	
Select one elective from the list below (p. 493)		3
Credits		16.5
<b>Term 2</b>		
FMRK 1205	Visual Communication for Fashion Marketing	3
FMRK 1215	Textile Science	3
FMRK 1250	Fashion and Consumers	3
MRKT 1299	Consumer Behaviour	3
BUQU 1130	Business Mathematics	3
Credits		15
<b>Term 3</b>		
FMRK 2105	Visual Fashion Merchandising and Promotion	3
FMRK 2115	Fashion Forecasting	3
FMRK 2120	Fashion Writing	3
Select two electives from the list below (p. 493)		6
Credits		15
<b>Term 4</b>		
FMRK 2205	Fashion Buying	3
FMRK 2215	Fashion Events and Promotions	3
FMRK 2240	Fashion Marketing Work Experience	1.5
Select two electives from the list below (p. 493)		6
Credits		13.5
Total Credits		60

#### Progressing to KPU Bachelor of Business Administration (BBA)

**Degrees:** Students planning to progress to a BBA degree program at KPU should consult a School of Business Academic Advisor as early as possible.

#### Electives

Electives may be taken at any time based on availability and having met prerequisites where applicable.

Four of the five electives required (3-credit each for a total of 15 credits) must be selected from the following list.

One of the five electives required (3-credits) may be selected from any program or area of study, including courses from the list below:

Code	Title	Credits
ACCT 1110	Introductory Financial Accounting I	3
ACCT 1210	Introductory Financial Accounting II	3
ACCT 2293	Intro To Financial Accounting	3
BUQU 1230	Business Statistics	3
BUSI 2390	Business Law	3
ECON 1150	Principles of Microeconomics	3
ENGL 1100	Introduction to University Writing	3
MRKT 1220		
MRKT 2111	Introduction to e-Marketing	3
MRKT 2235	Small Business Start-up	3
MRKT 2321	Retail Management	3
MRKT 2333	Fundamentals of Marketing Management	3
MRKT 2340	Marketing Insights	3
MRKT 2360	Selling and Sales Management	3
MRKT 2421		
MRKT 2444	Marketing Management 2	3
MRKT 2455	International Marketing	3

### Other Information

This program is delivered in an e-mobile environment that uses laptop computers and specific software. Students are advised NOT to purchase a personal laptop computer until specifications and requirements have been provided to successful applicants.

### Credential Awarded

Upon successful completion of this program, students are eligible to receive a **Diploma in Fashion Marketing**.

### Foundations in Design

Foundations in Design is a one year (2 semester) certificate program that will develop your skills and your understanding of Design as a Career. Explore the diverse options open to the design professional, and grow your skills with hands on projects. This program gives you the opportunity to focus your studies in a creative environment lead by design professionals. Study fundamental design skills such as drawing, 2D and 3D design plus develop methods in the creative process essential to your success. Complete your year with a dynamic portfolio of work that will open the door to future studies in any number of design disciplines.

### Who Studies Foundations in Design?

Students who excel in the FIND program are:

- curious about how things work
- often build and dismantle things to understand them
- wonder how rooms and public spaces best serve the people who use them
- like photography or drawing
- look at magazines to see how fonts, colours and shapes are used
- play with fabrics to create new looks
- dream of how the new iPhone or a new car could look

If you can relate to any or all of the above, the FIND program could be for you.

## Career Opportunities

A career in design is a lifelong journey and yours can start with FIND. Designers are found in many industries creating everything from furniture to fashion, gadgets and sports equipment, branding, websites, publishing and the built environment. With the completion of the FIND certificate, graduates often seek further design education to find a design-related career.

The possibilities are many:

- Fashion design
- Graphic design
- Interior design
- Product design
- Digital technology/Interface design
- Window Display
- Environmental Design
- Design Management
- Museum Design
- Lighting Design
- Event Design
- Publication Design

...and many more.

## Programs

- Certificate in Foundations in Design (p. 495)

## Courses

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

### FIND 1100 3 credits

#### Design Processes, Methods and Materials

Students will study basic design processes, methods and materials common to a variety of design disciplines. They will plan, produce and present creative solutions to design problems in two and three dimensions.

Level: UG

Attributes: DESN (p. 521), PW\_3 (p. 522)

### FIND 1110 3 credits

#### Drawing for Design

Students will develop drawing and rendering skills to communicate two- and three-dimensional objects. They will explore drawing (sketching, rapid visualization, perspective systems, and scaling and rendering techniques) in order to develop and convey ideas for design-related projects.

Level: UG

Attributes: DESN (p. 521), PW\_3 (p. 522)

### FIND 1121 3 credits

#### Design Connections: Then and Now

Students will examine the ways in which the past and present are connected through designed objects, particularly how designs from the past have inspired contemporary design ideas. They will analyze examples of design in the context of various world cultures, consider design influences throughout history, and investigate issues relating to cultural appropriation.

Level: UG

Attributes: ASTR (p. 523), DESN (p. 521)

### FIND 1130 3 credits

#### Design Explorations

Students will examine design-related issues, theories and practices as a basis for expanding their knowledge of the field of design. They will participate in seminar discussions and project work to promote communication, research, team building, and critical thinking. Students will also investigate opportunities for continuing design studies and potential career options.

Level: UG

Attribute: DESN (p. 521)

### FIND 1140 3 credits

#### Colour Theories

Students learn colour theories and explore their application within design contexts. They will review and examine the physical characteristics, psychological effects, and the cultural and social implications of colour.

Level: UG

Attributes: DESN (p. 521), PW\_3 (p. 522)

### FIND 1150 3 credits

#### Designing for Humanity

Students will examine the relationship between design decisions, humanity and current and historical environmental issues. They will understand the way design impacts individuals, society and the environment through research, case studies and field trips. Students will also investigate such things as over-packaging, built-in obsolescence, toxic materials and sustainable development.

Level: UG

Attribute: DESN (p. 521)

### FIND 1160 3 credits

#### Communication through Visual Language

Students will explore the historical, theoretical and contextual developments of signs and symbols (semiotics) as they relate to visual language. They will study the concepts, theories and roles text and images play in contemporary visual information and communication across a variety of design disciplines.

Level: UG

Attribute: DESN (p. 521)

### FIND 1200 3 credits

#### Two-Dimensional Design

Students will design solutions for a series of comprehensive, two-dimensional projects that emphasize the development of creative conceptualization and problem-solving skills relating to a range of design disciplines. They will create designs for a variety of contexts and will utilize diverse mediums, materials and presentation methods.

Level: UG

Prerequisite(s): FIND 1100 and FIND 1110 or IDDS 1160 and IDDS 1161

Attributes: ASTR (p. 523), DESN (p. 521)

**FIND 1210 3 credits****Three-Dimensional Design**

Students will apply creative conceptualization and problem-solving skills to comprehensive three-dimensional design projects. They will explore principles and processes, mediums and materials as well as three-dimensional modeling techniques and presentation methods relating to a range of design disciplines.

Level: UG

Prerequisite(s): FIND 1100 and FIND 1110 or IDDS 1160 and IDDS 1161

Attribute: DESN (p. 521)

**FIND 1220 3 credits****Design History: 19th Century Onward**

Students will examine developments in architecture, graphic design, interior design, product design, fashion design, and fine arts from the Industrial Revolution to the present day, primarily in the context of the Western world. They will utilize concepts from design and fine art history, sociology, and cultural anthropology to analyze examples of design, as well as the ideologies, theories, and social factors that have influenced designers, design movements, and consumers of design.

Level: UG

Attributes: ASTR (p. 523), DESN (p. 521)

**FIND 1230 3 credits****Drafting For Design**

Students will learn to produce drawings using computer assisted drafting software relating to a variety of design disciplines. They will create two- and three-dimensional drawings that will communicate design ideas visually through a variety of design projects.

Level: UG

Attributes: DESN (p. 521), PW\_3 (p. 522)

**FIND 1240 3 credits****Introduction to Digital Studio**

Students will learn to use industry-standard, design-related software such as Adobe Photoshop, Illustrator, and InDesign. They will explore the creative potential of software applications and tools to articulate their design ideas and enhance problem-solving abilities. Students will originate and edit digital photography, capture and manipulate text and image, produce and present digital design solutions, and create a digital design portfolio.

Level: UG

Attributes: ASTR (p. 523), DESN (p. 521)

## Requirements

### Admission Requirements

In addition to the Faculty's Admission Requirements, which consist of KPU's undergraduate English Proficiency Requirement (p. 13), the following program admission requirements apply:

- Portfolio review
- Reflective written statement

During the portfolio and interview process, faculty members evaluate each applicant for suitability for admission.

### Portfolio Review

Portfolios should reflect creative interests and current art/design capabilities. The following are suggestions for inclusion in the portfolio but are intended only as a guide. There is no minimum or maximum number of projects to include.

- Photos/scans of drawings, paintings, sculptures, pottery, textiles, woodworking, printmaking, sewing/costume design, garden/landscape design, room decorating or model making
- Photos/scans of sketchbooks or journals
- Samples of photography

Portfolios will be accepted in digital or physical formats.

### Reflective Written Statement

Applicants must also include a comprehensive written statement that reflects interests in design as well as personal, educational and career goals.

FIND 1230	Drafting For Design	
FIND 1240	Introduction to Digital Studio	
Total Credits		30

## Other Information

Returning Foundations in Design students and students who successfully qualify for a seat in Foundations in Design will register early. **Registering on the date and time provided in your instructions from the Office of Admissions is extremely important**, as some course spaces may be made available to students from other KPU programs.

Please visit [kpu.ca/find](http://www.kpu.ca/find) (<http://www.kpu.ca/find/>) for more specific program information.

### Costs

In addition to tuition, students should be prepared to spend approximately \$500 - \$800 for project materials and photocopying during the program.

## Credential Awarded

Upon successful completion of this program, students are eligible to receive a **Certificate of Foundations in Design**.

## Graphic Design for Marketing

Graphic designers (also known as visual communication designers or marketing communication designers) function as creative problem solvers, design planners and strategists, as well as skilled communicators and technologists. They demonstrate a passion for design and creativity, high-level design and critical thinking skills, a solid understanding of business and marketing, well-developed research capabilities, and a broad-based understanding of the social, cultural, and environmental implications of design. They are team players, team leaders, and can be employees, freelancers, or self-employed entrepreneurs.

Today, the visual communications field is broader than ever before, providing graphic designers with wide-ranging career opportunities. Graphic designers may create such things as visual identities for corporations, marketing campaigns for businesses, fundraising campaigns for non-profit organizations, layouts for publications, promotional posters, websites and interactive applications, shopping mall way-finding systems, packaging for all manner of products, advertising campaigns, signage in museums, retail displays, user-oriented marketing communications, and more.

## Who Studies Graphic Design for Marketing?

GDMA applicants come from diverse backgrounds and demonstrate a keen interest in design, particularly visual communications. They will have explored various aspects of art and design through such things as drawing and illustration, typography, photography, computer-based projects, video production, painting and sculpture, or perhaps through different types of crafts. Some applicants may also have communications, marketing, public relations, or business-related experience.

Applicants may come directly from high school, or transfer from other post-secondary institutions, or they may already hold a degree from a non-design field. They may also be mature individuals who want to make a career change, or they may have experience in the graphic design industry and want to upgrade their credentials.

It is strongly recommended that applicants have solid English language communication skills, some computer and word processing experience,

basic mathematics, an awareness of the graphic design profession and its significance locally and nationally, as well as an understanding of how graphic design and marketing fit together.

## Career Opportunities

The field of visual communications design is fast-paced, exciting, continually changing and expanding, and today, it is broader-based than ever before. The GDMA degree program prepares graduates for a wide range of entry-level graphic design positions.

## Generalist Graphic Designers

GDMA degree graduates will qualify for entry-level positions as graphic designers in firms providing corporations, small businesses, non-profit organizations, and others with services that may include such things as the creation of marketing strategies, interactive media design, publication design, advertising design, direct marketing design, and display design. Understanding consumer behaviour and end-user needs will also qualify the graduate for employment in marketing, advertising, or public relations firms that offer graphic design as one of their services.

## Specialist Graphic Designers

Throughout the curriculum, GDMA students are exposed to a range of specialty areas within the graphic design industry. Professional graphic designers might choose to specialize in such things as marketing communications strategies, interactive design, packaging design, advertising design, display design, or the design of integrated media.

## In-House (Resident) Graphic Designers

The diverse skills acquired by graduates of the GDMA program will equip them to work as in-house graphic designers in large corporations or institutions with their own marketing communications departments.

## Self-Employed, Freelance or Entrepreneurial Graphic Designers

The GDMA graduate will have a solid understanding of the graphic design industry and marketplace through field studies and a mentorship, as well as business and marketing courses. They will have prepared a comprehensive portfolio along with self-promotional materials and marketing that will help them to effectively market their services to various types of clients.

## Programs

- Bachelor of Design in Graphic Design for Marketing (p. 501)

## Courses

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](http://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

### GDMA 1100 3 credits

#### Typographic Design I

Students will learn the fundamentals of typography and will apply and evaluate design processes while designing basic print communications that require typographic design solutions. They will draw rough, comprehensive and production layouts using page layout applications and colour specification systems.

Level: UG

Co-requisite(s): All of GDMA 1110 and 1121 and 1140

Attribute: DESN (p. 521)

### GDMA 1110 3 credits

#### Image Development I

Students apply design processes to develop concepts and images for basic marketing communications. They learn and apply the elements and principles of design by developing messages through such methods as story telling, image making and applying colour theory. Students also create abstract, symbolic, and representational images to visually communicate ideas and emotions using a variety of mediums.

Level: UG

Co-requisite(s): All of GDMA 1100 and 1121 and 1140

Attribute: DESN (p. 521)

### GDMA 1121 3 credits

#### Print Production Software Applications 1

Students learn how to generate, manipulate, transport, and print graphic, typographic, photographic and illustrative images for graphic communication designs. They will use industry-standard software applications such as InDesign, Photoshop, and Illustrator on a Macintosh platform to produce digital layouts. Students learn the fundamentals of creating and producing layouts for graphic communication design using industry-standard software such as InDesign, Photoshop and Illustrator on a Macintosh platform. They will utilize typesetting tools and techniques; industry-standard systems for colour reproduction, type management and layout; and digital production and troubleshooting processes.

Level: UG

Co-requisite(s): All of GDMA 1100 and 1110 and 1140

Attribute: DESN (p. 521)

### GDMA 1140 3 credits

#### Graphic Design and Society I

Students examine social, cultural, and historical contexts of graphic design from the Renaissance to the end of World War I. They research and analyze politics, ideologies, technologies, consumerism, and trends that influenced design and design's audiences using basic concepts from design history, sociology, semiotics (the study of signs and symbols), and cultural studies.

Level: UG

Attribute: DESN (p. 521)

### GDMA 1200 3 credits

#### Typographic Design 2

Students apply the fundamentals of typography and typographic theory (including typeface anatomy, classifications, measurement systems, etc.) while creating manual and digital typographic layouts for print communication. They will iterate and communicate design concepts and solutions based on research and critical analyses of communication problems related to marketing and promotion.

Level: UG

Prerequisite(s): All of GDMA 1100, 1110, 1121 and 1140

Co-requisite(s): All of GDMA 1210, 1220 and 1240

Attribute: DESN (p. 521)

**GDMA 1210 3 credits****Image Development 2**

Students develop concepts and images for marketing applications of graphic design using manual and digital production technologies. They create images (typographic, photographic, and illustrative) that effectively communicate information and marketing communications concepts and messages, and address the needs and preferences of clients and their target audiences.

Level: UG

Prerequisite(s): All of GDMA 1100, 1110, 1121, and 1140

Co-requisite(s): All of GDMA 1200, 1220, and 1240

Attribute: DESN (p. 521)

**GDMA 1220 3 credits****Print Production Software Applications 2**

Students design and produce layouts using industry-standard software applications such as InDesign, Photoshop and Illustrator on a Macintosh platform. They utilize digital tools and techniques to work on projects that involve features such as colour specification systems, type formatting, style sheets, and editing.

Level: UG

Prerequisite(s): All of GDMA 1100, 1110, 1121, and 1140

Co-requisite(s): All of GDMA 1200, 1210, and 1240

Attribute: DESN (p. 521)

**GDMA 1240 3 credits****Graphic Design and Society 2**

Students examine diverse forms of graphic communication design and other related types of design that emerged from approximately the 1920s onward, primarily in Europe and North America. They will utilize various analytical frameworks to consider historical and emerging ideas and theories relating to the design and communication of information, human interactions with design, and design's social, cultural, and economic significance.

Level: UG

Attributes: ASTR (p. 523), DESN (p. 521)

**GDMA 2100 3 credits****Publication Design 1**

Students design and produce publication layouts to attract and engage end-users, and organize and enrich the content of books, newspapers, and miscellaneous publications, both in print and online. They work with key components of publication design such as typography, photography, illustration, page formats and grids.

Level: UG

Prerequisite(s): All of GDMA 1200 and 1210 and 1220 and 1240 and MRKT 1199

Co-requisite(s): All of GDMA 2110, GDMA 2120, GDMA 2140 and CMNS 2140

Attributes: ASTR (p. 523), DESN (p. 521)

**GDMA 2110 3 credits****Introduction to Advertising Design**

Students learn how to identify client and end-user needs and analyze market research data. They strategically plan, conceptualize, design and produce advertising to promote products or services, raise public awareness, or communicate information in order to engage with specific target audiences.

Level: UG

Prerequisite(s): All of GDMA 1200 and 1210 and 1220 and 1240 and MRKT 1199

Co-requisite(s): All of GDMA 2100, GDMA 2120, GDMA 2140 and CMNS 2140

Attribute: DESN (p. 521)

**GDMA 2120 3 credits****Print Technologies**

Students prepare electronic files and write specifications for mechanical, photomechanical and electronic pre-press, print production and print finishing processes. Students also specify ink, paper, colour and other elements of a printed communication, and how proofing systems and other quality control procedures are used in the printing industry.

Level: UG

Prerequisite(s): All of GDMA 1200 and 1210 and 1220 and 1240 and MRKT 1199

Co-requisite(s): All of GDMA 2100, GDMA 2110, GDMA 2140 and CMNS 2140

Attribute: DESN (p. 521)

**GDMA 2140 3 credits****Communications Design, Consumerism And Popular Culture**

Students will examine contemporary visual communication design, consumerism, and popular culture using concepts from sociology, marketing, cultural studies, cultural anthropology, and semiotics (signs and symbols) to inform their analyses. They will also apply their knowledge and skills to an end of term, research and design-based project. Advertising design, product and packaging design, retail and display design, environmental graphics, and various types of design found in popular culture (comics, movies, sports, music, etc.) may be among the topics covered in the course.

Level: UG

Prerequisite(s): ENGL 1100 and GDMA 1240.

Attributes: ASTR (p. 523), DESN (p. 521)

**GDMA 2200 3 credits****Publication Design 2**

Students research social, cultural, and historical factors and apply fundamentals associated with the design, production and distribution of print and online publications. They identify market opportunities, develop concepts, and produce comprehensive designs for print and digital publications.

Level: UG

Prerequisite(s): All of GDMA 2100, 2110, 2120 and 2140, and CMNS 2140

Co-requisite(s): GDMA 2210, 2220, 2230 and 2240

Attribute: DESN (p. 521)

**GDMA 2210 3 credits****Interactive & Integrated Media Design**

Students use manual and electronic visualization procedures to design text and images for interactive and integrated marketing communications. They will apply critical analysis and problem-solving capabilities while developing and evaluating concepts, messages and images for screen-based interactive and integrated media (such as video, web, mobile devices).

Level: UG

Prerequisite(s): All of GDMA 2100, 2110, 2120 and 2140, and CMNS 2140

Co-requisite(s): All of GDMA 2200, 2222 and 2230

Attribute: DESN (p. 521)

**GDMA 2222 3 credits****Integrated Media Software Applications**

Students will utilize current, industry-standard, video-editing software to create short animations and videos that integrate image, text, sound, motion, and time (i.e. integrated media). They will design and produce or promotional videos appropriate to for clients, targeted audiences, and other end-users.

Level: UG

Prerequisite(s): All of GDMA 2100, 2110, 2120 and 2140, and CMNS 2140

Co-requisite(s): All of GDMA 2200, 2210 and 2230

Attribute: DESN (p. 521)

**GDMA 2230 3 credits****Introduction to Marketing Communications**

Students develop marketing plans before formulating concepts and images that communicate messages to specific target audiences. They design marketing communications for placement in a variety of media. Students focus on the use of effective copy, typography, photography and illustrations to convey marketing messages.

Level: UG

Prerequisite(s): All of GDMA 2100, 2110, 2120 and 2140, and CMNS 2140

Co-requisite(s): GDMA 2200, 2210, and 2222

Attribute: DESN (p. 521)

**GDMA 3100 3 credits****Information Design**

Students will research, analyze, organize and integrate information hierarchies into designs of systems that respond to specific audience needs and incorporate contextual, spatial, narrative and navigational requirements. They will conceptualize, design, and produce visual representations of qualitative and quantitative information (i.e. 'infographics' and/or data visualizations) to make multi-layered information or complex data more accessible, understandable, and interesting to a viewer.

Level: UG

Prerequisite(s): All of GDMA 2200, 2210, 2222 and 2230

Co-requisite(s): All of GDMA 3110, 3122, 3130 and 3140

Attribute: DESN (p. 521)

**GDMA 3110 3 credits****User Experience and Interface Design 1**

Students will learn the concepts and methods required to design interactive communications such as websites and mobile apps. They will employ user research, client journey maps, wireframes, flowcharts, site maps and prototypes. They will plan and create the information architecture, interaction, and visual design required for digital interfaces that deliver desirable experiences for users.

Level: UG

Prerequisite(s): All GDMA 2200, 2210, 2222 and 2230

Co-requisite(s): All of GDMA 3100, 3122, 3130 and 3140

Attribute: DESN (p. 521)

**GDMA 3122 3 credits****Interactive Software Applications 1**

Students use industry-standard software applications to plan, develop, test, and deploy screen-based visual communications that feature simple user interactivity. They use scanners and digital photography, apply methods of image generation, process and optimize images, and use current mark-up and style sheet languages.

Level: UG

Prerequisite(s): All of GDMA 2200, 2210, 2222 and 2230

Co-requisite(s): All of GDMA 3100, 3110, 3130 and 3140

Attribute: DESN (p. 521)

**GDMA 3130 3 credits****Marketing Communications Design 1**

Students analyze and interpret a client's marketing objectives before formulating concepts, messages and images for marketing communications, such as in-store promotions, advertisements, posters and specialty advertising items.

Level: UG

Prerequisite(s): All of GDMA 2200, 2210, 2222 and 2230

Co-requisite(s): All of GDMA 3100, 3110, 3122 and 3140

Attribute: DESN (p. 521)

**GDMA 3140 3 credits****Interactive Technologies and Society**

Students critically analyze the social and cultural impact of interactive technologies. They examine theories relating to interactivity, human factors, and user-centred design, and apply design research methods to analyses of various types of interactivity. Students will respond to a design problem by developing concepts for a range of interactive experiences to suit a particular social context and target audience, and present and rationalize their design ideas.

Level: UG

Prerequisite(s): All of ENGL 1100 and GDMA 2140

Attribute: DESN (p. 521)

**GDMA 3200 3 credits****Corporate Communications Design 1**

Students formulate, conceptualize and design communications that reflect a corporation's positioning, marketing and public relations goals. They research, analyze and address professional, social, cultural and historical needs and preferences present in typical corporate cultures.

Level: UG

Prerequisite(s): All of GDMA 3100, 3110, 3122, 3130 and 3140

Co-requisite(s): All of GDMA 3210, 3220, 3222, and 3230

Attribute: DESN (p. 521)

**GDMA 3210 3 credits****Packaging Design**

Students learn concepts, theories, principles and strategies for designing packaging. They analyze legal, environmental, social and ethical issues that impact the design of packaging for a variety of clients and products. In addition, students learn to work with regulatory and production requirements, client marketing objectives and budgets, distribution and display requirements, timelines, presentation guidelines, and a range of other factors that directly affect the design and production of three-dimensional packaging.

Level: UG

Prerequisite(s): All of GDMA 3100, 3110, 3122, 3130, and 3140

Co-requisite(s): All of GDMA 3200, 3220, 3222, and 3230

Attribute: DESN (p. 521)

**GDMA 3220 3 credits****User Experience and Interface Design 2**

Students will research, strategize, conceive, develop content, design and produce a screen-based project for a specific audience. They will create an interactive user experience to meet specified marketing communication outcomes. They will learn strategies for meeting business, marketing, and communication goals; allocating resources; evaluating elements of user experience; and applying interactive and web-based design processes to deliver prototypes, templates, and/or style guides.

Level: UG

Prerequisite(s): All of GDMA 3100, 3110, 3122, 3130 and 3140

Co-requisite(s): GDMA 3200, 3210, 3222 and 3230

Attribute: DESN (p. 521)

**GDMA 3222 3 credits****Interactive Software Applications 2**

Students use industry-standard, interactive software applications and services to plan, develop, test, and deploy screen-based interactive experiences. They employ interface design practices, current font technologies, markup and scripting languages, and code libraries and plugins to create dynamic interactive experiences for users of various screen-based devices.

Level: UG

Prerequisite(s): All of GDMA 3100, 3110, 3122, 3130 and 3140

Co-requisite(s): GDMA 3200, 3210, 3220, and 3230

Attribute: DESN (p. 521)

**GDMA 3230 3 credits****Marketing Communications Design 2**

Students analyze and interpret corporate strategies in business-to-business marketing plans. They create communication and design strategies to support marketing plans, and design marketing communications solutions using digital and print media. Students design collateral items such as digital presentations, corporate and operational brochures, product and service brochures, and technical information sheets.

Level: UG

Prerequisite(s): All of GDMA 3100, 3110, 3122, 3130 and 3140

Co-requisite(s): All of GDMA 3200, 3210, 3220, and 3222

Attribute: DESN (p. 521)

**GDMA 4100 3 credits****Corporate Communications Design 2**

Students implement visual identity programs and graphic standards while designing external communications for a corporation. They design annual and quarterly reports, shareholder advisories and promotions, corporate newsletters, advertisements, and public relations communications that are consistent with corporate strategies, objectives, and business and marketing plans.

Level: UG

Prerequisite(s): All of GDMA 3200, 3210, 3220, 3222, and 3230

Co-requisite(s): All of (a) GDMA 4120, (b) GDMA 4130, and (c) MRKT 4177 or MRKT 4201

Attribute: DESN (p. 521)

**GDMA 4120 3 credits****Major Project**

Students will demonstrate their ability to synthesize and apply the skills and knowledge learned throughout the Graphic Design for Marketing program to a major design project identifying a hypothetical client. They will outline research methods and processes to be implemented, and will propose, articulate and rationalize their design and communication strategies. Students will complete a major project incorporating the design and presentation of a significant and substantial body of work.

Level: UG

Prerequisite(s): All of GDMA 3200 and 3210 and 3220, 3222 and 3230

Co-requisite(s): All of GDMA 4100, 4130 and MRKT 4177 or MRKT 4201

Attribute: DESN (p. 521)

**GDMA 4130 3 credits****Small Business Essentials**

Students will learn fundamental business procedures relevant to working as employees, employers, or freelancers in the graphic design profession. Topics include government regulations, business planning and ethics, and administrative procedures for small businesses. They will estimate costs and formulate pricing strategies, prepare proposals, budgets, and schedules, and create components used in the day-to-day management of a design practice

Level: UG

Prerequisite(s): All of GDMA 3200, 3210, 3220, 3222 and 3230

Co-requisite(s): All of (a) GDMA 4100, (b) GDMA 4120, and (C) MRKT 4177 or MRKT 4201

Attribute: DESN (p. 521)

**GDMA 4200 3 credits****Advertising Design**

Students will research and analyze client and end-user needs. They will explore the influence of new mediums on marketing advertising. Using manual and electronic processes, students will develop concepts and design solutions for a variety of media based on marketing plans and strategies. They will create advertising campaigns to be implemented through such communication channels as print and interactive media advertising, sales promotions, events, and direct marketing.

Level: UG

Prerequisite(s): All of (a) GDMA 4100, (b) GDMA 4120, (c) GDMA 4130, and (d) MRKT 4177 or MRKT 4201

Co-requisite(s): All of GDMA 4216, 4221, 4230 and 4240

Attribute: DESN (p. 521)

**GDMA 4216 3 credits****Advanced Typographic Communications**

Students will employ advanced typographic methods and techniques to strategize, conceptualize, design, and produce refined interconnected systems of typographic communications for a variety of purposes. They will focus on requirements such as client and end-user needs, strategic positioning, content meaning and structure, information hierarchy, technical and aesthetic development, and typographic form, selection, and composition.

Level: UG

Prerequisite(s): All of (a) GDMA 4100, (b) GDMA 4120, (c) GDMA 4130, and (d) MRKT 4177 or MRKT 4201

Co-requisite(s): All of GDMA 4200, 4221, 4230 and 4240

Attribute: DESN (p. 521)

**GDMA 4221 3 credits****Strategic Portfolio Development**

Students demonstrate proficiency in marketing communication design through rigorous refinement of previous project work that reflects their preferred areas of employment specialization. They create a marketing strategy that is represented through research and the design, production, documentation, presentation and defense of a comprehensive portfolio of work.

Level: UG

Prerequisite(s): All of (a) GDMA 4100, (b) GDMA 4120, (c) GDMA 4130, and (d) MRKT 4177 or MRKT 4201

Co-requisite(s): All of GDMA 4200, 4216, 4230 and 4240

Attribute: DESN (p. 521)

**GDMA 4230 3 credits****Mentorship for Professional Practice**

Students will learn about procedures, practices, and issues relevant to gaining employment and working in the graphic design profession. They create and design self-promotion materials, prepare an employment search plan, and gain industry experience through a mentorship placement in a professional advertising, design or marketing environment.

Level: UG

Prerequisite(s): All of (a) GDMA 4100, (b) GDMA 4120, (c) GDMA 4130, and (d) MRKT 4177 or MRKT 4201

Co-requisite(s): All of GDMA 4200, 4216, 4221 and 4240

Attribute: DESN (p. 521)

**GDMA 4240 3 credits****Contemporary Issues in Graphic Design**

Students will develop a critical awareness of social, cultural, philosophical, environmental, technological, and professional issues that impact contemporary graphic design practice. They will actively contribute to in-class discussions, interact with guest speakers, and engage in multifaceted research and analysis. Student teams will also develop, produce and lead comprehensive workshops relating to current "hot" topics in design such as cyberspace ethics, "professionalization" of the industry, plagiarism and copyright concerns, speculative work, sustainable graphic design, and 'calls to action' by the design community.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher, including ENGL 1100

Attribute: DESN (p. 521)

## Description

Graphic designers function as creative problem solvers, design planners and strategists, as well as skilled communicators and technologists.

They demonstrate a passion for design and creativity, have design and critical thinking skills, a solid understanding of business and marketing, well-developed research capabilities, and a broad based understanding of the social, cultural, and environmental implications of design. They are team players, team leaders, and can be employees, freelancers, or self-employed entrepreneurs.

Today, the visual communications field (aka graphic design) is broader than ever before, providing graphic designers with wide-ranging career opportunities. Graphic designers create visual identities for corporations, marketing campaigns for businesses, fundraising campaigns for non-profit organizations, layouts for publications, promotional posters, websites and interactive applications, product packaging, advertising campaigns, retail displays, marketing communications design, and much more.

## Why Study Graphic Design for Marketing at KPU?

What makes the GDMA Degree different? In addition to developing skills in design and technology, graduates of GDMA acquire a solid marketing edge that sets them apart from other design school graduates. They know how to create effective marketing communication designs that reach specific target audiences, strategically plan a marketing campaign to meet their client's needs, brand a company, design eye-catching packaging, and create websites and apps to promote businesses and not-for-profit enterprises in the marketplace. GDMA graduates have the know-how to successfully and effectively get the job done!

## Who Studies Graphic Design for Marketing?

GDMA applicants come from diverse backgrounds and demonstrate a keen interest in design, particularly visual communications. They will have explored various aspects of art and design through such things as drawing and illustration, typography, photography, computer-based projects, video production, painting and sculpture, or perhaps through different types of crafts. Some applicants may also have communications, marketing, public relations, or business-related experience.

Applicants may come directly from high school, or transfer from other post-secondary institutions, or they may already hold a degree from a non-design field. They may also be mature individuals who want to make a career change, or they may have experience in the graphic design industry and want to upgrade their credentials.

It is strongly recommended that applicants have solid English language communication skills, some computer and word processing experience, basic mathematics, an awareness of the graphic design profession and its significance locally and nationally, as well as an understanding of how graphic design and marketing fit together.

## Credit for Previous Learning

Students may obtain transfer credit for course work taken in other programs at KPU, or at other institutions. All applications for transfer credits are assessed on an individual basis. For information about

transfer credit applications, please visit [kpu.ca/transfercredit](http://www.kpu.ca/transfercredit) (<http://www.kpu.ca/transfercredit/>)

Applicants with experience in the graphic design industry may acquire credits through Prior Learning Assessment (PLA). For further information, please visit [kpu.ca/registrar/pla](http://www.kpu.ca/registrar/pla) (<http://www.kpu.ca/registrar/pla/>)

## Part-time Studies

Graphic design professionals may wish to take specific courses on a part-time basis to complement their job skills. Some requirements for course prerequisites may be waived based on work experience. Opportunities for part-time studies will depend upon the number of available seats in courses. Industry professionals may contact the Program Coordinator to discuss access to individual courses of interest without applying for the complete four-year degree program.

## Career Opportunities

The field of visual communications design is fast-paced, exciting, continually changing and expanding, and today, it is broader based than ever before. The GDMA degree program prepares graduates for a wide range of entry-level graphic design positions.

### Generalist Graphic Designers

GDMA degree graduates will qualify for entry-level positions as graphic designers in firms providing corporations, small businesses, non-profit organizations, and others with services that may include such things as the creation of marketing strategies, interactive media design, publication design, advertising design, direct marketing design, and display design. Understanding consumer behaviour and end-user needs will also qualify the graduate for employment in marketing, advertising, or public relations firms that offer graphic design as one of their services.

### Specialist Graphic Designers

Throughout the curriculum, GDMA students are exposed to a range of specialty areas within the graphic design industry. Professional graphic designers might choose to specialize in such things as marketing communications strategies, interactive design, packaging design, advertising design, display design, or the design of integrated media.

### In-House (Resident) Graphic Designers

The diverse skills acquired by graduates of the GDMA program will equip them to work as in-house graphic designers in large corporations or institutions with their own marketing communications departments.

### Self-Employed, Freelance or Entrepreneurial Graphic Designers

The GDMA graduate will have a solid understanding of the graphic design industry and marketplace through field studies and a mentorship, as well as business and marketing courses. They will have prepared a comprehensive portfolio along with self-promotional materials and marketing that will help them to effectively market their services to various types of clients.

## Requirements

### Admission Requirements

In addition to the Faculty's Admission Requirements, which consist of KPU's undergraduate English Proficiency Requirement (p. 13), the following program admission requirements apply:

- Portfolio Review and Interview Session

The Chip and Shannon Wilson School of Design holds Open House/Information Sessions twice per year, usually in October and February. These information sessions provide prospective applicants with an opportunity to learn about the GDMA program, meet faculty and students, view examples of student portfolios, and discuss portfolio and program admission requirements. It is highly recommended that applicants attend one of these sessions prior to applying for admission. **For more information visit the department's website at:** [kpu.ca/gdma](http://www.kpu.ca/gdma/) (<http://www.kpu.ca/gdma/>). **For further information about portfolio submission and the review process, visit GDMA's website at:** [kpu.ca/design/gdma/portfolios](http://www.kpu.ca/design/gdma/portfolios) (<http://www.kpu.ca/design/gdma/portfolios/>). Applicants who successfully satisfy the required portfolio review will be invited to an interview session.

## Continuance Requirements

Students must successfully complete ENGL 1100 and MRKT 1199 prior to commencing their second year in GDMA. Note that a minimum grade of C is required to meet course prerequisites.

A cumulative GPA of 2.67 (B-) is required by the end of Year 3 to progress into Year 4. Students with a GPA below 2.67 (B-) but who wish to continue to Year 4 should contact the Program Coordinator to discuss the next course of action.

## Curricular Requirements

The Bachelor of Design, Graphic Design for Marketing (GDMA) program consists of 120 credits, organized into eight semesters, over a four-year period.

Successful applicants may take their general education and some non-GDMA courses prior to entering the program and/or during the summer semester in order to lighten their workload during the term. Courses such as ENGL 1100, MRKT 1199 and many Liberal Education Elective courses are usually offered during the summer semester.

Course	Title	Credits
<b>Year 1</b>		
<b>Term 1</b>		
ENGL 1100	Introduction to University Writing <sup>1</sup>	3
GDMA 1100	Typographic Design I	3
GDMA 1110	Image Development I	3
GDMA 1121	Print Production Software Applications 1	3
GDMA 1140	Graphic Design and Society I	3
	Credits	15
<b>Term 2</b>		
GDMA 1200	Typographic Design 2	3
GDMA 1210	Image Development 2	3
GDMA 1220	Print Production Software Applications 2	3
GDMA 1240	Graphic Design and Society 2	3
MRKT 1199	Introduction to Marketing <sup>1</sup>	3
	Credits	15
<b>Year 2</b>		
<b>Term 3</b>		
CMNS 2140	Communications For Design Professionals	3
GDMA 2100	Publication Design 1	3
GDMA 2110	Introduction to Advertising Design	3
GDMA 2120	Print Technologies	3
GDMA 2140	Communications Design, Consumerism And Popular Culture	3
	Credits	15

<b>Term 4</b>		
GDMA 2200	Publication Design 2	3
GDMA 2210	Interactive & Integrated Media Design	3
GDMA 2222	Integrated Media Software Applications	3
GDMA 2230	Introduction to Marketing Communications	3
Select from the GDMA Liberal Education Electives		3
Credits		15
<b>Year 3</b>		
<b>Term 5</b>		
GDMA 3100	Information Design	3
GDMA 3110	User Experience and Interface Design 1	3
GDMA 3122	Interactive Software Applications 1	3
GDMA 3130	Marketing Communications Design 1	3
GDMA 3140	Interactive Technologies and Society	3
Credits		15
<b>Term 6</b>		
GDMA 3200	Corporate Communications Design 1	3
GDMA 3210	Packaging Design	3
GDMA 3220	User Experience and Interface Design 2	3
GDMA 3222	Interactive Software Applications 2	3
GDMA 3230	Marketing Communications Design 2	3
Credits		15
<b>Year 4</b>		
<b>Term 7</b>		
GDMA 4100	Corporate Communications Design 2	3
GDMA 4120	Major Project	3
GDMA 4130	Small Business Essentials	3
MRKT 4177 or MRKT 4201	Contemporary Issues in Marketing or Integrated Marketing Communication	3
Select from the GDMA Liberal Education Electives		3
Credits		15
<b>Term 8</b>		
GDMA 4200	Advertising Design	3
GDMA 4216	Advanced Typographic Communications	3
GDMA 4221	Strategic Portfolio Development	3
GDMA 4230	Mentorship for Professional Practice	3
GDMA 4240	Contemporary Issues in Graphic Design	3
Credits		15
Total Credits		120

<sup>1</sup> Note: Students must successfully complete ENGL 1100 and MRKT 1199 prior to commencing their second year in GDMA. Note that a minimum grade of C (60%) is required to fulfill course prerequisites.

## Electives

The Graphic Design for Marketing (GDMA) program requires students to take 6 credits of electives that are chosen from the list of approved GDMA Liberal Education Electives (p. 503) in order to fulfill the liberal education requirements for degree completion.

## GDMA Degree Show

Graduating students are required to exhibit their work in the annual GDMA Degree Show, which normally takes place during April or May, prior to their Convocation Ceremony. They are expected to participate in the development of Degree Show planning, content, fundraising activities, and implementation of the event. The GDMA program reserves the right to approve or deny the public exhibition of graduate work in the Degree Show.

## Other Information

### Costs

Students should be prepared to spend approximately \$600 to \$1000 per year on books and materials.

This program is delivered in an e-mobile environment that uses laptop computers and specific software. Students are advised NOT to purchase a personal laptop computer until specifications and requirements have been provided to successful applicants.

## Credential Awarded

Upon successful completion of the program, students are eligible to receive a **Bachelor of Design, Graphic Design for Marketing**.

## Graphic Design for Marketing Liberal Education Electives

The following are the Liberal Education electives for the Graphic Design for Marketing (GDMA) (p. 496) degree. GDMA students are advised they must meet co#requisite/pre#requisite and program requirements for all courses taken outside of the GDMA program. Six (6) credits outside of the GDMA program are required.

- **Accounting (ACCT)**
  - Any KPU ACCT course
- **Agriculture (AGRI)**
  - Any KPU AGRI course
- **Anthropology (ANTH)**
  - Any KPU ANTH course
- **Art History (ARTH)**
  - Any KPU ARTH course
- **Applied Communications (CMNS)**
  - CMNS 3100
- **Applied Science (APSC)**
  - Any KPU APSC course
- **Asian Studies (ASIA)**
  - Any KPU ASIA course
- **Astronomy (ASTR)**
  - Any KPU ASTR course
- **Biology (BIOL)**
  - Any KPU BIOL course
- **Brewing & Brewery Operations (HOPS)**
  - Any KPU HOPS course
- **Business (BUSI)**
  - Any KPU BUSI course
- **Business & Quantitative Methods (BUQU)**
  - Any KPU BUQU course
- **Chemistry (CHEM)**
  - Any KPU CHEM course
- **Communications (COMM)**
  - Any KPU COMM course
- **Community & Health Studies (CAHS)**
  - Any KPU CAHS course
- **Computer Business Systems (CBSY)**
  - Any KPU CBSY course
- **Computer Science (CPSC)**
  - Any KPU CPSC course

- **Creative Writing (CRWR)**
  - Any KPU CRWR course
- **Counselling Psychology (CNPS)**
  - Any KPU CNPS course
- **Criminology (CRIM)**
  - Any KPU CRIM course
- **Cultural Studies (CUST)**
  - Any KPU CUST course
- **Economics (ECON)**
  - Any KPU ECON course
- **Educational Studies (EDUC)**
  - Any KPU EDUC course
- **English (ENGL)**
  - Any KPU ENGL course numbered 1200 or higher
- **Entrepreneurial Leadership (ENTR)**
  - Any KPU ENTR course
- **Environmental Protection Tech (ENVI)**
  - Any KPU ENVI course
- **Fine Arts**
  - FINA 1237
- **French (FREN)**
  - Any KPU FREN course
- **Geography (GEOG)**
  - Any KPU GEOG course
- **History (HIST)**
  - Any KPU HIST course
- **Horticulture (HORT)**
  - Any KPU HORT course
- **Human Resources Management (HRMT)**
  - Any KPU HRMT course
- **Japanese (JAPN)**
  - Any KPU JAPN course
- **Journalism (JRNL)**
  - Any KPU JRNL course numbered 1200 or higher
- **Legal Administrative Studies (LGLA)**
  - Any KPU LGLA course
- **Linguistics (LING)**
  - Any KPU LING course
- **Mandarin (MAND)**
  - Any KPU MAND course
- **Marketing (MRKT)**
  - MRKT 1299
- **Mathematics (MATH)**
  - Any KPU MATH course
- **Music (MUSI)**
  - Any KPU MUSI course
- **Nursing (NRSG)**
  - Any KPU NRSG course
- **Philosophy (PHIL)**
  - Any KPU PHIL course
- **Physics (PHYS)**
  - Any KPU PHYS course
- **Policy Studies (POST)**
  - Any KPU POST course
- **Political Science (POLI)**
  - Any KPU POLI course
- **Psychiatric Nursing (PSYN)**

- Any KPU PSYN course
- **Psychology (PSYC)**
  - Any KPU PSYC course
- **Punjabi (PUNJ)**
  - Any KPU PUBJ course
- **Sociology (SOCI)**
  - Any KPU SOCI course
- **Spanish (SPAN)**
  - Any KPU SPAN course
- **Women's Studies (WOMN)**
  - Any KPU WOMN course

## Interior Design

As a profession, Interior Design plays a key role in planning and designing solutions for interior spaces. Not unlike an architect, interior designers must create and plan interior architectural elements that are not only creative, aesthetically-pleasing, and functional, but also safe.

Interior designers are involved with many important aspects of designing interiors including preparing construction documents, floor and furniture layouts, millwork details, and lighting plans.

To ensure the health, safety, and well-being of those who occupy interior spaces, interior designers must have the appropriate amount of education, practical experience, and complete extensive examinations (NCIDQ (<http://www.cidq.org/>) certification). Those within this profession must understand building structures and complicated building codes, as well as many other technical aspects of the built environment.

Interior Design is a multi-faceted profession that includes many different types of spaces such as retail stores, restaurants, hotels, corporate offices, multi-unit residences, spas, and much more.

For more information on this profession, please go to the Interior Designers of Canada (<http://www.idcanada.org/>) website.

## Who Studies Interior Design?

Interior Design students come from a wide variety of backgrounds and vary in age and experience. What they have in common is a passion for sculpting interior space. Often our students have explored other art forms including photography, drawing, illustration, painting, pottery, jewelry making, model making or other kinds of design-focused work.

Applicants may come directly from high school, from other post-secondary institutions, or they may be former graduates of design, fine arts, or other related programs. They may also be mature adults who want to make a career change or may have experience in the interior design industry and want to upgrade to a degree.

We strongly recommend that interested applicants have solid communication skills, computer and word processing experience, ability to measure and draft, and an awareness of the interior design profession.

## Career Opportunities

The career potential for this field is strong. When the economy is strong, building construction increases, and this in turn results in jobs for interior designers. Of course the career potential clearly depends on the individual, their portfolio, and work experience upon graduation. Graduates of the interior design program may work on hospitality and retail design projects, exhibition, theatre/television, and set design, the design of office/corporate or residential projects. Over time, some of our

graduates become senior partners in design/architectural firms, and may also go on to start their own firms.

You may find more information on the field of Interior Design and salary outlooks on the National Occupational Classification located on the Human Resources and Skills Development Canada website at 'NOC-Interior Design' OR on the WorkBC website under 'Occupations'.

## Programs

- Bachelor of Interior Design (p. 508)

## Courses

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

### IDSN 1113 4 credits

#### Studio 1

Students will experiment with and make discoveries about the principles and elements of design. They will develop their problem-solving skills by creating solutions for two- and three-dimensional design problems. They will work individually and in teams, with a focus on critical analysis, design process and student progress. They will develop and apply design vocabulary to various sizes and types of exercises related to spatial definition and organization.

Level: UG

Co-requisite(s): IDSN 1135

Attribute: DESN (p. 521)

### IDSN 1121 3 credits

#### Materials

Students will learn about materials and associated technologies of processing and installation. They will learn about the properties, and will explore conventional and potential applications of a variety of materials such as wood, glass, metal, and fabric, with emphasis on understanding form, workability, strength, and durability. Students will produce an inventory of fundamental materials.

Level: UG

Attribute: DESN (p. 521)

### IDSN 1135 3 credits

#### Design Awareness 1

Students acquire a critical awareness of the importance and impact of design through research, analysis, discussion of both historical and contemporary issues. They will learn, explore and apply the principles and elements of design by executing projects. Students will discuss and debate interior design and built environment issues. They will learn and employ the vocabulary of interior design.

Level: UG

Co-requisite(s): IDSN 1113

Attribute: DESN (p. 521)

### IDSN 1141 3 credits

#### Technical Drawing 1

Students will be introduced to professional interior design drafting standards. They will practise the fundamental skills of manual drafting: line weight, line quality, line type and lettering. They will produce drawings and document two and three-dimensional objects, furniture and spaces through various drawing types such as plans, elevations, sections and paraline drawings.

Level: UG

Attribute: DESN (p. 521)

### IDSN 1202 4 credits

#### Studio 2

Students will continue to apply the principles and elements of design to three-dimensional design projects. They will analyze and experiment with spatial definition and organization, light and colour, and heighten their ability to use space as a design tool. Students will learn how to determine project requirements and criteria, utilize design processes, and create design solutions that are appropriate to purpose and how people interact with the built environment.

Level: UG

Prerequisite(s): IDSN 1113 (C+) and 1121 and 1135 and 1141

Attribute: DESN (p. 521)

### IDSN 1221 3 credits

#### Components

Students will learn about component materials of the built environment and manufacturing processes. They will discover the properties and characteristics of manufactured component materials such as plywood, concrete, ceramics, textiles, carpet, wallcovering, hardware, lighting, window covering and furniture. They will explore conventional and potential applications. Emphasis will be on understanding the history, development, characteristics and behavior of the components.

Level: UG

Prerequisite(s): IDSN 1113 (C+) and 1121 and 1135 and 1141

Attribute: DESN (p. 521)

### IDSN 1235 3 credits

#### Design Awareness 2

Students will continue to acquire a critical awareness of the importance and impact of design. Students will explore the social, political and physical influences affecting historical changes in interior design by researching and analyzing the evolution and development of the built environment from antiquity to the 20th century. They will discuss and link issues across chronological, geographic, cultural and sociological contexts. They will increase their understanding of the vocabulary of interior design through problem-based learning.

Level: UG

Prerequisite(s): IDSN 1113 (C+) and 1121 and 1135 and 1141

Attribute: DESN (p. 521)

### IDSN 1241 3 credits

#### Technical Drawing 2

Students will continue to draft technical drawings manually, communicating ideas, objects, and interior spaces. They will begin to explore material specifications, construction methods, and produce a simple set of orthographic drawings. Students will draw three dimensional paraline views and measured perspective drawings.

Level: UG

Prerequisite(s): IDSN 1113 (C+) and 1121 and 1135 and 1141

Attribute: DESN (p. 521)

**IDSN 2300 4 credits****Studio 3**

Students will produce, individually and in groups, original designs that respond to specific, conceptual, behavioural, and contextual criteria for living spaces. They will focus on meeting the complex needs of individuals and families in the built environment.

Level: UG

Prerequisite(s): IDSN 1202 (C+) and 1221 and 1235 and 1241 and 3 credits of ENGL 1100 or higher or approved 3 credit writing-intensive course at the 1100-level or higher

Co-requisite(s): IDSN 2331

Attribute: DESN (p. 521)

**IDSN 2325 3 credits****Building Systems 1**

Students will learn about technical aspects of built environment systems, such as structural, electrical and mechanical. They will learn about how the constituent subsystems of floor, wall, ceilings, penetrations, comfort systems, power, data communication, lighting, and water use function. Students will produce technical drawings, applying this knowledge in concurrent courses. Emphasis will be on understanding current building techniques and exploring sustainable innovations and choices.

Level: UG

Prerequisite(s): IDSN 1202 (C+) and 1221 and 1235 and 1241 and 3 credits of ENGL 1100 or higher or approved 3-credit writing-intensive course at the 1100-level or higher

Attribute: DESN (p. 521)

**IDSN 2331 3 credits****Design Theories 1**

Students will study fundamental principles and processes involved in creating design solutions for living environments. They will study the theories related to typologies of living spaces such as entry, socializing and relaxing, sleeping, dressing, cooking and eating spaces. Students will research and explore 20th century and current design history and ideologies. They will also explore, discuss and debate a range of built environment issues.

Level: UG

Prerequisite(s): IDSN 1202 (C+) and 1221 and 1235 and 1241 and 3 credits of ENGL 1100 or higher, or approved 3 credit writing-intensive course at the 1100-level or higher

Co-requisite(s): IDSN 2300

Attribute: DESN (p. 521)

**IDSN 2345 3 credits****Drawing and Rendering 1**

Students will investigate design process communication through drawing and ideation exercises. They will expand their technique depicting objects in context to environmental conditions. They will be introduced to digital drawing software and will manipulate drawings using digital programs and experiment with a range of drawing and rendering techniques using manual and digital means.

Level: UG

Prerequisite(s): IDSN 1202 (C+) and 1221 and 1235 and 1241 and 3 credits of ENGL 1100 or higher or approved 3 credit writing-intensive course at the 1100-level or higher

Attribute: DESN (p. 521)

**IDSN 2375 3 credits****Environmental Human Factors**

Students will study how humans relate to the built environment and how it affects behaviour. Students will develop an understanding of human factors research methods and their application to interior design. They will learn how to shape interior spaces by applying knowledge of anthropometrics, ergonomics, proxemics, universal design, sustainable design and human behavior. Students will actively engage in problem-based learning (PBL) modules.

Level: UG

Prerequisite(s): IDSN 1202 (C+) and 1221 and 1235 and 1241 and 3 credits of ENGL 1100 or higher or approved 3 credit writing-intensive course at the 1100-level or higher

Attribute: DESN (p. 521)

**IDSN 2400 4 credits****Studio 4**

Students will continue to produce, individually and in teams, original designs that respond to specific conceptual, behavioural, and contextual criteria for living spaces. They will focus on process, space planning, and spatial volume development.

Level: UG

Prerequisite(s): IDSN 2300 (C+) and 2325 and 2331 and 2345 and 2375

Co-requisite(s): IDSN 2431

Attribute: DESN (p. 521)

**IDSN 2425 3 credits****Building Systems 2**

Students will explore technical aspects of building environments. They will learn about and draw various assemblies found within building systems to expand their understanding and application of building code principles. They will study lighting design systems, acoustics, energy management, and sustainable systems, applying this knowledge in concurrent courses. They will focus on understanding multi-unit built environments and communicate knowledge through digital technical drawings.

Level: UG

Prerequisite(s): IDSN 2300 (C+) and 2325 and 2331 and 2345 and 2375

Attribute: DESN (p. 521)

**IDSN 2431 3 credits****Design Theories 2**

Students will expand their understanding of applied and theoretical issues, principles and processes involved in creating design solutions, emphasizing space planning and spatial volume development. Students will investigate, analyze and discuss historical, contemporary, and future design issues, ideologies and approaches. Students will explore and connect ideological concepts with their own interior design applications.

Level: UG

Prerequisite(s): IDSN 2300 (C+) and 2325 and 2331 and 2345 and 2375

Co-requisite(s): IDSN 2400

Attribute: DESN (p. 521)

**IDSN 2445 3 credits****Drawing and Rendering 2**

Students will continue to develop drawing and rendering skills to effectively visualize design concepts and ideas within the built environment. They will further develop their ability to communicate design intent and deliver effective visual presentations, practicing manual drawing, rendering, and digital manipulation skills.

Level: UG

Prerequisite(s): IDSN 2300 (C+) and 2325 and 2331 and 2345 and 2375

Attribute: DESN (p. 521)

**IDSN 3500 4 credits****Studio 5**

Students will produce creative, experiential design solutions. They will work on various commercial projects such as retail, workplace and public spaces. They will expand their design skills, refining their process and design methodology.

Level: UG

Prerequisite(s): IDSN 2400 (C+) and 2425 and 2431 and 2445

Co-requisite(s): IDSN 3531

Attribute: DESN (p. 521)

**IDSN 3525 3 credits****Building Systems 3**

Students will communicate how and why materials and components are connected through drawing technical details. They will study construction assemblies common to public spaces. Students will resolve building connections (such as floor to wall, wall to ceiling), penetrations, architectural woodwork, case goods, and furniture. They will produce a set of computer-drawn, construction-ready details incorporating appropriate technical specifications and interior design industry drafting standards, based on their own designs from Studio projects.

Level: UG

Prerequisite(s): IDSN 2400 (C+), 2425, 2431, and 2445.

Attribute: DESN (p. 521)

**IDSN 3531 3 credits****Design Theories 3**

Students will study public space typologies and programming processes for specialized areas of practice in interior design, such as retail and the workplace. They will research theoretical and practical design considerations using problem definition and problem solving tools. They will explore, discuss, and debate historical, current, and future interior design and building environment issues. Students will apply this knowledge in studio projects.

Level: UG

Prerequisite(s): IDSN 2400 (C+), 2425, 2431 and 2445.

Co-requisite(s): IDSN 3500

Attribute: DESN (p. 521)

**IDSN 3600 4 credits****Studio 6**

Students will produce creative and experiential design solutions. They will work on various complex project types such as hospitality, institutional and public spaces. They will expand their design skills, refining their process and design methodology. They will collaborate with team members and present comprehensive design solutions incorporating stakeholder needs, public health and safety issues, and sustainability.

Level: UG

Prerequisite(s): IDSN 3500 (C+) and 3525 and 3531

Co-requisite(s): IDSN 3635

Attribute: DESN (p. 521)

**IDSN 3625 3 credits****Contract Documentation**

Students will learn about the production of interior design contract documentation. They will prepare and coordinate working drawings, schedules, product and material specifications, and bid documents. Students will learn about construction contracts and various industry regulations.

Level: UG

Prerequisite(s): IDSN 3500 (C+) and 3525 and 3531

Attribute: DESN (p. 521)

**IDSN 3635 3 credits****Design Theories 4**

Students will study theoretical approaches and their practical considerations for specialized area(s) of practice, such as hospitality, institutional, and health care, informing studio project(s) in IDSN 3600. They will continue to explore, discuss, and debate historical, current, and future interior design and building environment issues. Students will develop objective criteria for critical analysis and generate a personal design philosophy. They will utilize and develop writing skills, culminating in a research paper.

Level: UG

Prerequisite(s): IDSN 3500 (C+) and 3525 and 3531

Co-requisite(s): IDSN 3600

Attribute: DESN (p. 521)

**IDSN 4001 4 credits****Senior Studio 1**

Students will consolidate previous learning to advance and broaden their understanding of interior design. They will undertake a comprehensive, individually focused, interior design project. Students will choose a project topic and a specific building in which to develop extensive research and programming, culminating in a detailed interior design solution. Note: Senior Studio is taken over two consecutive semesters and will appear on the transcript as IDSN 4001 and IDSN 4002. Students registering in IDSN 4001 are committing to register in IDSN 4002 in the subsequent term.

Level: UG

Prerequisite(s): IDSN 3600 (C+)

Co-requisite(s): IDSN 4720

Attribute: DESN (p. 521)

**IDSN 4002 4 credits****Senior Studio 2**

Students will consolidate previous learning to advance and broaden their understanding of interior design. They will undertake a comprehensive, individually focused, interior design project. Students will choose a project topic and a specific building in which to develop extensive research and programming, culminating in a detailed interior design solution. Note: Senior Studio is taken over two consecutive semesters and will appear on the transcript as IDSN 4001 and IDSN 4002.

Level: UG

Prerequisite(s): IDSN 4001 (C)

Attribute: DESN (p. 521)

**IDSN 4720 3 credits****Advanced Design Studies 1**

Students will enhance their knowledge through research and critical evaluation of topics of interest and relevant concerns. They will develop a deeper understanding of historical, current, emerging, and future interior design and built environment issues. Students will formalize their research and disseminate findings in public forums such as presentations, publications, or installations. Note: Advanced Design Studies is taken over two consecutive semesters and will appear on the transcript as IDSN 4720 and IDSN 4820. Students registering in IDSN 4720 are committing to register in IDSN 4820 in the subsequent term.

Level: UG

Prerequisite(s): IDSN 3600 and 3625 and 3635

Co-requisite(s): IDSN 4001

Attribute: DESN (p. 521)

**IDSN 4785 3 credits****Professional Practice 1**

Students will be introduced to basic business practices for professional interior designers including how to market themselves through a professional resume and portfolio. They will explore the design project as a commercial venture considering the successive phases of the design process. They will debate issues such as global perspective, professionalism, professional organizations, licensure, and ethical standards of practice.

Level: UG

Prerequisite(s): All of IDSN 3600 (C+) and 3625 and 3635

Attribute: DESN (p. 521)

**IDSN 4820 3 credits****Advanced Design Studies 2**

Students will enhance their knowledge through research and critical evaluation of topics of interest and relevant concerns. They will develop a deeper understanding of historical, current, emerging, and future interior design and built environment issues. Students will formalize their research and disseminate findings in public forums such as presentations, publications, or installations. Note: Advanced Design Studies is taken over two consecutive semesters and will appear on the transcript as IDSN 4720 and IDSN 4820.

Level: UG

Prerequisite(s): IDSN 4001 and 4720 and 4785

Co-requisite(s): IDSN 4002

Attribute: DESN (p. 521)

**IDSN 4880 3 credits****Professional Practice 2**

Students will continue to examine business and professional practice relevant to interior design. They will prepare themselves to enter the interior design profession through improving communication skills such as interview techniques and business writing. Students will report and reflect critically upon their previous practical experience with peers and instructors. They will discuss business procedures such as fee proposals, project management and contracts as well as legal, ethical, and professional liability issues.

Level: UG

Prerequisite(s): All of IDSN 4001 and 4720 and 4785

Attribute: DESN (p. 521)

**IDSN 4900 3 credits****Self-Directed Study**

Students in their final years of study will have the opportunity to explore and integrate personal areas of interest and career objectives within the interior design profession (subject to faculty approval). They will gain proficiency in career knowledge and skills required for entry level employment, as well as hone independent learning through research, planning, and presenting a project related to a negotiated area of study.

Level: UG

Prerequisite(s): IDSN 3500

Attribute: DESN (p. 521)

# Bachelor of Interior Design

### Academic Level:

Undergraduate

### Credential Granted:

Baccalaureate Degree

### Start Date:

Fall (September)

### Intake Type:

- Limited

### Minimum Credits Required:

128

### Curriculum Effective Date:

01-Sep-2017

## Description

The Bachelor of Interior Design (IDSN) program provides students wishing to pursue a professional career in interior design with a four-year intensive education focused on the built environment. KPU's well received Interior Design degree has been accredited by the Council for Interior Design Accreditation (CIDA) since 2000. As the first accredited program in British Columbia, our CIDA accreditation continues to ensure that our curriculum meets and exceeds industry standards and helps students build the foundation to become a registered interior designer.

The Interior Design faculty team is dedicated to:

- Providing a design education that includes all facets of interior design with emphasis on experience and skills in theory, research, critical analysis, problem-solving, design concepts, working drawings and specifications, technology, presentation media techniques, professional business practices and procedures, and awareness of human needs in interior design and related environments
- Preparing students for work in interior design and/or architectural offices
- Providing a practical and theoretical knowledge base that conforms to the definition and practice of interior design as described by the National Council for Interior Design Qualification (NCIDQ) and as endorsed in the North American definition of an Interior Designer
- Providing education in developing career readiness

The Interior Design program simulates a professional design environment. This "virtual design studio" offers integrated courses and curriculum, and emphasizes learning outcomes and essential skills throughout. These skills include: leadership, problem solving and creative thinking, teamwork, personal management, writing/oral/visual and interpersonal skills, research, visual literacy, mathematical and technological skills, citizenship, and an ability to view issues through a global perspective.

As part of the degree program students will:

- practice both oral and written communication skills
- study and apply technical knowledge of the field
- research and analyze design theory and history
- gain an understanding of professional business practices
- become a member of The Interior Designers Institute of BC

- gain industry knowledge through a practical experience in a design firm
- apply all learning through Design Studio projects
- visit design firms, suppliers, manufacturers, completed interior projects, museums, art galleries, and gain an in-depth understanding of the design industry

Interior Design information sessions are scheduled each fall in order to answer questions from prospective students and to allow applicants to view entry portfolios of current students. These sessions have been of great benefit to those interested in entering the program. For more information on the Interior Design program, you may view our department website at: [kpu.ca/interiordesign](http://www.kpu.ca/interiordesign) (<http://www.kpu.ca/interiordesign/>).

## Who Studies Interior Design?

Interior Design students come from a wide variety of backgrounds and vary in age and experience. What they have in common is a passion for sculpting interior space. Often our students have explored other art forms including photography, drawing, illustration, painting, pottery, jewelry making, model making or other kinds of design-focused work.

Applicants may come directly from high school, from other post-secondary institutions, or they may be former graduates of design, fine arts, or other related programs. They may also be mature adults who want to make a career change or may have experience in the interior design industry and want to upgrade to a degree.

We strongly recommend that interested applicants have solid communication skills, computer and word processing experience, ability to measure and draft, time management skills, and an awareness of the interior design profession.

## Career Opportunities

The career potential for this field is strong. When the economy is strong, building construction increases, and this in turn results in jobs for interior designers. Of course the career potential clearly depends on the individual, their portfolio, and work experience upon graduation. Graduates of the interior design program may work on hospitality and retail design projects, exhibition, theatre/television, and set design, the design of office/corporate or residential projects. Over time, some of our graduates become senior partners in design/architectural firms, and may also go on to start their own firms.

You may find more information on the field of Interior Design and salary outlooks on the National Occupational Classification located on the Human Resources and Skills Development Canada website at 'NOC-Interior Design' OR on the WorkBC website under 'Occupations'.

## Requirements

### Admission Requirements

In addition to the School of Design's Admission Requirements, which consist of KPU's undergraduate English Proficiency Requirement (p. 13), the following program admission requirements apply:

- Portfolio Review and Interview Session: Qualified applicants will receive an invitation to the required Portfolio Review and Interview session.

## Portfolio Review and Interview

During the portfolio and interview process, faculty members evaluate each applicant for suitability for admission based on the contents of the portfolio and results of an interview (including prior learning assessments). For detailed information about Interior Design as well as the interview and portfolio review process, visit the department's website at [kpu.ca/design/interior-design/portfolio](http://www.kpu.ca/design/interior-design/portfolio) (<http://www.kpu.ca/design/interior-design/portfolio/>)

## Continuance Requirements

The Studio courses (i.e., IDSN 1113, IDSN 1202, IDSN 2300, IDSN 2400, IDSN 3500, IDSN 3600, IDSN 4001) require a minimum grade of C+ in order to progress in the program. All other courses require a minimum grade of C in order to progress.

Students must complete and log 80 hours of practical experience in an interior design or architectural firm under the supervision of a registered interior designer. This practical experience can occur anytime during the program but must be completed before Professional Practice 2 in the spring semester of year 4 of the program (see below).

## Curricular Requirements

The Interior Design program requires the completion of 128 credits of coursework. Students may take their general education and non-discipline specific courses prior to entering the program and/or during the summer semester in order to lighten their workload during the term. Many general education courses are offered during the summer semester.

In order to succeed in the second year of the Interior Design program, students should have proficiency in AutoCAD, and should complete ENGL 1100 prior to commencing second year.

Course	Title	Credits
<b>Year 1</b>		
<b>Term 1</b>		
IDSN 1113	Studio 1	4
IDSN 1121	Materials	3
IDSN 1135	Design Awareness 1	3
IDSN 1141	Technical Drawing 1	3
Select one approved elective (p. 510)		3
Credits		16
<b>Term 2</b>		
ENGL 1100	Introduction to University Writing	3
IDSN 1202	Studio 2	4
IDSN 1221	Components	3
IDSN 1235	Design Awareness 2	3
IDSN 1241	Technical Drawing 2	3
Credits		16
<b>Year 2</b>		
<b>Term 3</b>		
IDSN 2300	Studio 3	4
IDSN 2325	Building Systems 1	3
IDSN 2331	Design Theories 1	3
IDSN 2345	Drawing and Rendering 1	3
IDSN 2375	Environmental Human Factors	3
Credits		16
<b>Term 4</b>		
IDSN 2400	Studio 4	4
IDSN 2425	Building Systems 2	3
IDSN 2431	Design Theories 2	3

IDSN 2445	Drawing and Rendering 2	3
Select one approved elective (p. 510)		3
Credits		16
<b>Year 3</b>		
<b>Term 5</b>		
IDSN 3500	Studio 5	4
IDSN 3525	Building Systems 3	3
IDSN 3531	Design Theories 3	3
Select two approved electives (p. 510)		6
Credits		16
<b>Term 6</b>		
IDSN 3600	Studio 6	4
IDSN 3625	Contract Documentation	3
IDSN 3635	Design Theories 4	3
DESN 3100	Design Field School <sup>1</sup>	3
Select one approved elective (p. 510)		3
Credits		16
<b>Year 4</b>		
<b>Term 7</b>		
IDSN 4001	Senior Studio 1	4
IDSN 4720	Advanced Design Studies 1	3
IDSN 4785	Professional Practice 1	3
Select two approved electives (p. 510)		6

<b>Term 8</b>		
IDSN 4002	Senior Studio 2 <sup>2</sup>	4
IDSN 4820	Advanced Design Studies 2	3
IDSN 4880	Professional Practice 2	3
Select one approved elective (p. 510)		3
Select one approved elective numbered 3000 or higher (p. 510)		3
Credits		16
Total Credits		128

<sup>1</sup> The Design Field School (DESN 3100) travel component occurs after Semester 6 and prior to Semester 7.

<sup>2</sup> A minimum grade of C+ is a graduation requirement.

The Interior Design program requires 30 credits that fulfill the following conditions:

- 3 credits from ENGL 1100, Introduction to University Writing
- 27 credits of electives chosen from courses in the Faculty of Arts, the Faculty of Science & Horticulture, or the list of Quantitative courses (except those from the School of Business or the Chip & Shannon Wilson School of Design), including:
  - at least three different academic disciplines
  - at least 3 credits from the Faculty of Arts
  - at least 3 credits from the Faculty of Science & Horticulture
  - at least 3 credits from a course at the 3000 level or higher

## Other Information

The third year of the Interior Design program includes Design Field School (DESN 3100) as part of the curriculum requirements and the cost of travel is borne by the student. Therefore, applicants should factor in the cost of this travel at approximately \$3500 including air travel and course fees.

This program is delivered in an e-mobile environment that uses laptop computers and specific software. Students are advised NOT to purchase a personal laptop computer until specifications and requirements have been provided to successful applicants.

## Credential Awarded

Upon successful completion of this program, students are eligible to receive a **Bachelor of Interior Design**.

This Bachelor degree, followed by two cumulative years of work experience in the profession, qualifies graduates to write the National Council for Interior Design Qualification (NCIDQ) examination. This in turn, allows professional membership in the Interior Designers' Institute of British Columbia (IDIBC), the Interior Designers of Canada (IDC), and various international interior design associations.

## Product Design

Product designers combine science, design and technology to develop new or improve existing products that focus on innovative and responsive solutions for sustainable human development.

Product designers' integral focus is on process, taking concepts and ideas to completion by analyzing and implementing product designs from manufacturing to distribution. Whether identifying underserved, existing opportunities in the global market or innovating new products to fill people's needs, product designers are the leaders of tomorrow.

## Who Studies Product Design?

Applicants to design programs come from diverse backgrounds and age groups. You may be applying to the Product Design program as a graduate from high school, or you may be transferring from another KPU program, or from another institution, or you may be a design professional, wanting to upgrade your credentials. We'd be delighted to receive your application and discuss your possible educational pathway with you.

Perhaps your background includes an active interest in recreation, sports, dance, special occupations or an ambition to improve the design of items related to these pursuits. Or, perhaps you are an entrepreneur wanting to improve the quality of life for groups under-represented by product design. Your creative skills might be in drawing, painting, photography, computer graphics, sculpture, crafts and other 3D work. You might simply be inventive and enjoy making gadgets and taking them apart. Whatever your profile, you are likely to be a risk-taker, problem-solver, willing to push boundaries, able to work independently and in teams, and engage in a rigorous design education.

It is strongly recommended that you have basic skills in English communication, word processing, basic mathematics, plus an awareness of product design, with ideas about how to improve current products and processes – in Canada and internationally.

Because of the varied profiles of our applicants, we will work with you to construct an educational pathway suitable to your goals. Our aim is to ensure that your time at KPU is enriching and enjoyable.

## Career Opportunities

Product design is an evolving design field. Locally, however, there are many very successful companies in Vancouver, known around the world for excellence in recreational and technical gear. There are also many opportunities that students might consider, overseas, in countries noted for manufacture of these items.

Upon graduation, you will have produced an extensive portfolio of innovative work, including a major research and development project that

combines all the skills and knowledge necessary for this field. You would be prepared for such careers as:

- Product designer
- Industrial designer
- Product developer
- Product buyer
- Product production supervisor
- Environmental designer
- Packaging designer

You could work independently as a consultant, an entrepreneur, as a staff designer for an existing design studio, retailer, or manufacturer.

## Programs

- Bachelor of Design, Product Design (p. 514)

## Courses

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

### DEPD 1100 3 credits

#### Studio 1: Design Methods

Students will be introduced to properties, potential, and the language of materials. They will learn about the processes of manufacturing and assembly that are used in product design. Students will develop insight into how materials behave and how information and understanding are used to guide design, decision-making in relationship to these materials and processes. They will explore materiality in developing design outcomes through a series of lectures, projects and workshops.

Level: UG

Attributes: DESN (p. 521), F2A3 (p. 521)

### DEPD 1110 3 credits

#### Visualization for Product Design

Students will develop fundamental skills in visualization for product design (sketching, drawing, and rendering). They will apply theories, concepts, methods and materials comprehending how these hand visualization techniques are integral to the design process; how drawing is a means to an end, for example: communicating and analyzing ideas, simplifying complex problems and processes, persuading clients, manufacturers and users, and providing technical information about construction, assembly and use. Students will transfer these visualization skills to project work.

Level: UG

Attributes: DESN (p. 521), F2A3 (p. 521)

### DEPD 1120 3 credits

#### Computer Fundamentals

Students will examine basic computer hardware and software concepts, and the Internet, in relation to product design. They will use word processing and spreadsheet software to develop solutions for design and business problems. Students will explore the 2D and 3D capabilities of using various tools and techniques. They will design and build compositions to create print materials. Note: This course is similar to FMRK 1105. Students cannot earn credit for more than one of DEPD 1120 or FMRK 1105.

Level: UG

Cross-listing: FMRK 1105

Attributes: ASTR (p. 523), DESN (p. 521), F2A3 (p. 521)

### DEPD 1121 3 credits

#### Construction Technologies

Students will learn fundamental techniques and methods of construction technology related to soft materials for applications in product design. They will produce reference samples focusing on technical and production aspects of design projects. Students will become proficient in: industrial sewing techniques, patternmaking methods and applications, and textile selection for a variety of pliable materials, both natural and synthetic.

Level: UG

Cross-listing: DEPD 1250

Attributes: DESN (p. 521), F2A3 (p. 521)

### DEPD 1130 3 credits

#### Design Thinking

Students will be introduced to a number of strategies related to the design of products, such as methods of rational analysis and synthesis, formal design paradigms drawn from history, strategies for developing concepts, and making products meaningful to user groups. They will be introduced to the relationship of design thinking to the process of design. Students will understand the use of a diverse set of tools deployable within different design contexts or at different stages in the design process. They will use various techniques for exploring and representing design ideas to provide a foundation for future expertise in designing. Students will explore hybrid-thinking models through interdisciplinary actions that will provide a framework for leadership in their discipline.

Level: UG

Attributes: ASTR (p. 523), DESN (p. 521), F2A3 (p. 521)

### DEPD 1140 3 credits

#### Model Making

Students will apply creative and innovative problem-solving skills to comprehensive three-dimensional design projects focusing on product design, such as sportswear and accessories, protective and safety gear, rescue apparel, uniforms, and shelters. Students will expand their knowledge of materials, processes, and methods as well as three-dimensional modeling and prototyping techniques, along with presentation methods relating to industrial product production.

Level: UG

Prerequisite(s): DEPD 1100

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 1210 3 credits****Three-Dimensional Design: Product Design**

Students will apply creative and innovative problem-solving skills to comprehensive three-dimensional design projects focusing on product design, such as sportswear and accessories, protective and safety gear, rescue apparel, uniforms, and shelters. Students will expand their knowledge of materials, processes, and methods as well as three-dimensional modeling and prototyping techniques, along with presentation methods relating to industrial product production. Note: This course is similar to FIND 1210. Students cannot earn credit for more than one of DEPD 1210 or FIND 1210.

Level: UG

Prerequisite(s): DEPD 1100

Attributes: ASTR (p. 523), DESN (p. 521), F2A3 (p. 521)

**DEPD 1220 3 credits****Digital Technologies for Product Design**

Students will learn the fundamentals of digital manufacturing technologies using industry standard software, with a focus on computer-aided design (CAD) for product design. Students will learn to create and develop design ideas from data using three-dimensional modeling software. Students will extend their prior knowledge of computer applications to create and present innovative product designs geared to production. They will develop and explore generative design processes to produce virtual 3D products.

Level: UG

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 1240 3 credits****Computer Fundamentals**

Students will examine basic computer hardware and software concepts, and the Internet, in relation to product design. They will use word processing and spreadsheet software to develop solutions for design and business problems. Students will explore the 2D and 3D capabilities of using various tools and techniques. They will design and build compositions to create print materials.

Level: UG

Cross-listing: FMRK 1105

Attributes: ASTR (p. 523), DESN (p. 521), F2A3 (p. 521)

**DEPD 1250 3 credits****Construction Technologies**

Students will learn fundamental techniques and methods of construction technology related to soft materials for applications in product design. They will produce reference samples focusing on technical and production aspects of design projects. Students will become proficient in: industrial sewing techniques, patternmaking methods and applications, and textile selection for a variety of pliable materials, both natural and synthetic.

Level: UG

Cross-listing: DEPD 1121

Attributes: ASTR (p. 523), DESN (p. 521), F2A3 (p. 521)

**DEPD 2310 6 credits****Studio 2: Design Content**

Students will explore concepts, materials, and fastening components appropriate to product design. They will apply critical thinking and creative problem-solving processes to explore and experiment with multiple combinations of materials, assembling and affixing technologies. Students will document their findings for future reference, and present the results of their explorations.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher

Co-requisite(s): DEPD 2320

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 2320 3 credits****Material Technology**

Students will investigate the technical aspects of soft materials in relation to product design. They will explore the profiles of natural and synthetic materials, including: classification, specification, structure, measurement, and performance. They will seek new uses and applications for soft materials, and consider environmental and technological factors appropriate to product design.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher

Co-requisite(s): DEPD 2310

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 2330 3 credits****Transformative Thinking for Product Design**

Students will be introduced to the complexities of societal threats and opportunities that affect design. They will understand the transformative nature of design that exists in a dynamic context. Students will study areas, such as cultural change, globalization, sustainability and technological advances, that will likely impact the design professions over the next decade.

Level: UG

Prerequisite(s): 12 credits from courses at the 1100 level or higher

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 2331 3 credits****Human Factors for Product Design**

Students will develop an understanding of ergonomics and human factors within the context of designing highly effective recreational and technical apparel and related soft products. They will research the relationship between product design and user needs for comfort, safety, well-being, and performance. They will explore methods for developing detailed user profiles and system requirements, and for evaluating design alternatives relative to functional and task variables; human needs, capabilities and limitations.

Level: UG

Prerequisite(s): 12 credits from courses at the 1100 level or higher.

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 2410 6 credits****Studio 3: Design Context**

Students will further explore concepts, materials, and components, in response to specific criteria for diverse contexts in product design. They will apply critical thinking and creative problem-solving processes in exploring solutions that allow for products to be used differently and more effectively. Students will incorporate relevant socio-cultural, human factor research, and technologies into their design exercises, and present their process and results.

Level: UG

Prerequisite(s): DEPD 2310 and 2320

Co-requisite(s): DEPD 2420

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 2420 3 credits****Production Technology**

Students will study various levels of production technology in product design. They will investigate and compare the principles and processes of current production and manufacturing requirements, and consider the limitations and comparative costs involved in forming materials to the required specifications (e.g. shape, size, and finish). Students will explore new resourceful and sustainable applications of production for product design.

Level: UG

Prerequisite(s): DEPD 2310 and 2320

Co-requisite(s): DEPD 2410

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 2430 3 credits****Socio-Cultural Issues in Design**

Students will consider essential concepts, theories and methods related to cultural issues and how these might impact the design of soft products. They will engage in critical thinking and creative problem-solving activities related to local, regional, and global issues, such as: social structures, economics, politics, gender, ethnicity, class and age; environment, sustainability and ethical practices.

Level: UG

Prerequisite(s): 12 credits from courses at the 2000 level or higher.

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 3510 6 credits****Studio 4: Design Engagement**

Students will respond to design briefs and engage in rigorously researching the design of soft goods products for leisure and sports gear. They will critically analyze existing and potential consumer markets, including under-represented demographic groups, with the aim of creatively improving such aspects as function, performance and comfort of products. Students will incorporate interdisciplinary knowledge and technologies into project work.

Level: UG

Prerequisite(s): All of: (a) DEPD 2331 or DEPD 2431, (b) DEPD 2410 and (c) DEPD 2420.

Co-requisite(s): DEPD 3520

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 3520 3 credits****Production Cycle: Manufacture and Strategies**

Students will study sourcing as a major aspect of production technology in soft product design. They will create specifications that include: sizing/grading, product measurements, bills of materials to gather components, vendor information, critical paths, and efficient, lean manufacturing techniques.

Level: UG

Prerequisite(s): All of: (a) DEPD 2331 or DEPD 2431, (b) DEPD 2410, (c) DEPD 2420, (d) DEPD 2430 and (e) MRKT 1199.

Co-requisite(s): DEPD 3510

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 3530 3 credits****Semiotics for Product Design**

Students will reflect on the relationship between semiotics (the study of sign systems) and product design. They will analyze major theories and current discourse to explore how signs and symbols, codes and conventions are used to convey meaning in the marketplace. Students will investigate the types of messages soft goods products communicate in different contexts.

Level: UG

Prerequisite(s): 15 credits from courses at the 2000 level or higher.

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 3610 6 credits****Studio 5 Design Implementation**

Students will further their skills in responding critically and creatively to designing protective gear for dangerous, and unpredictable contexts, e.g. search and rescue, law enforcement, health and safety, and military activities. They will confer with users and critically analyze their needs, with the aim of innovatively and economically improving such aspects as, function, performance and comfort. Students will consider the manufacturing requirements in the development of their solutions.

Level: UG

Prerequisite(s): DEPD 3510 and 3520

Co-requisite(s): DEPD 3620 and 3630

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 3620 3 credits****Product Development for Manufacturing**

Students will study production operations management and process sequencing. They will assess existing examples of product design to analyze the steps required in prototype manufacturing, evaluating the compatibility of materials with the design concept and end use. Students will connect with industry in order to develop a critical manufacturing path relevant to soft product manufacturing.

Level: UG

Prerequisite(s): All of: (a) DEPD 2331 or 2431, (b) DEPD 3510 and (c) DEPD 3520.

Co-requisite(s): DEPD 3610

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 3630 3 credits****Industry Experience**

Students will initiate and complete a faculty-approved, industry-related experience relevant to product design and manufacture, e.g. a work arrangement, an educational study tour, a set of trade shows, visits to manufacturing plants, or contributor at a major conference. They will observe and record their experiences, relate them to their course work, and provide documented evidence of the practical knowledge gained and its potential application.

Level: UG

Prerequisite(s): DEPD 3510, DEPD 3520, ENGL 1100 and MRKT 1199.

Co-requisite(s): DEPD 3610 and 3620

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 4710 6 credits****Studio 6: Design Evaluation**

Students will synthesize their knowledge and skills, by completing feasibility studies of a major industry-related project that highlights their personal abilities in product design. They will engage in rigorous research, brainstorm and test ideas, and propose strategies for future development. Students will probe and justify the economic viability, environmental impact, and the technologies required for realization. Students will make professional presentations about their feasibility studies to the university and the community.

Level: UG

Prerequisite(s): DEPD 3610, 3620 and 3630.

Co-requisite(s): DEPD 4720

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 4720 3 credits****Products & Business Scenarios**

Students will analyze the relationship between soft products and business scenarios. They will analyze circumstances from a global perspective in relation to today's economy. They will study international trade agreements and the legality of trade, and integrate socio-political factors into their research. Students will envision a business scenario, including product development, business supply chain, along with market research and cost estimates.

Level: UG

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 4810 9 credits****Studio 7: Design Projections**

Students will produce a final prototype of their major, industry-related project in product design. They will respond to research completed previously, by advancing and implementing their design strategies. Students will integrate interdisciplinary content; technological advances; specify appropriate manufacturing processes; estimate the economic viability; predict the environmental and ethical impacts of their design decisions. They will demonstrate and defend their solution through comprehensive presentations, documents, to the university and the community.

Level: UG

Prerequisite(s): DEPD 4710 and 4720

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 4831 3 credits****The Business of Product Design**

Students will practice professional business and leadership skills relevant to engagement in the product design profession. They will prepare themselves with appropriate knowledge, skills and tools, e.g. resumes, business proposals, portfolios and other documents typically required in business and manufacturing environments. Students will discuss business procedures, marketing plans, financial management, fee proposals and contracts, intellectual property issues, government regulations, ethical and professional liability issues.

Level: UG

Prerequisite(s): DEPD 4710, DEPD 4720 and MRKT 4177

Co-requisite(s): DEPD 4810

Attributes: DESN (p. 521), F2A3 (p. 521)

## Description

Within its unique approach, this Bachelor's degree program provides emerging designers with a dynamic inter-disciplinary education that links innovation and creativity through the transformation of ideas into marketable products.

KPU's Product Design degree provides a rigorous, hands-on education that combines a solid foundation in practical design principles such as construction and economics with design, with manufacturing and marketing. Whether engaging in robust academic studies, intensive design studio sessions or collaborating with industry partners, graduates of this program complete their studies poised for success as professionals.

While product design covers a wide range of industries, KPU's program provides particular emphasis on the design and manufacture of recreational gear and technical goods, sportswear and accessories, protective, safety and rescue equipment to name a few. Students will

also explore product design in medical, industrial and technological contexts as well as everyday consumer goods. These types of products are consistent and growing in demand by all sectors of society, ranging from children, adults and seniors to persons with disabilities and medical needs.

KPU faculty's strength and expertise provides a world-class balance of academic rigour and instruction with hands-on, practical immersion from industry leaders and cutting-edge innovators. The Product Design program has been carefully developed to uphold high academic standards and industry partnerships to ensure our graduates meet the needs of the global economy. Successful graduates develop a deep understanding of the connection between product design, industry, and the market and are empowered to undertake leadership positions in design practices aimed at advancing the industry.

The stunning geography of British Columbia provides the perfect backdrop to earn a Product Design degree. Working in collaboration with professional associations and industry designers, graduates can expect to develop and design products that are relevant for Canadian and international economies, providing innovative solutions for emerging needs that can improve people's everyday lives and well-being.

Product Design is a four-year, selective entry degree program consisting of 120 credits of course work organized into eight semesters of full-time study. The Product Design program provides an interdisciplinary education that consists of three major streams: Creativity and Innovation, Technology, Interdisciplinary and Leadership, all woven into an integrated curriculum and timetable.

Students will develop knowledge, skills and abilities from a variety of domains within these three streams that link design and technology to an understanding of social, cultural and historical contexts through elective access to the wide range of courses available. Students will become skilled in applying design theory and processes with an emphasis on critical thinking and creative problem solving, and originate and produce products that focus on transforming pliable materials, such as natural and synthetic fibres, wood, and metal; understanding the constraints and potential of digital technologies; collaborating with industries and markets; and creating responsible leaders in society for the challenges of today and tomorrow.

## Credit for Previous Learning

Students may be eligible to obtain credit for segments of the Product Design program with results from courses taken in other programs at KPU, or at another institution. All applications for the transfer of credits will be assessed on an individual basis.

If you are an applicant with professional experience in the product design industry we welcome your inquiry about how you may acquire credits through Prior Learning Assessment (PLA). All applications for the transfer of credits are assessed on an individual basis, typically through a portfolio and interview process. For more information how to apply for transfer credits or PLA, visit [kpu.ca/transfercredit.html](http://www.kpu.ca/transfercredit.html) (<http://www.kpu.ca/transfercredit.html>).

## Who Studies Product Design?

Applicants to design programs come from diverse backgrounds and age groups. You may be applying to the Product Design program as a graduate from high school, or you may be transferring from another KPU program, or from another institution, or you may be a design professional,

wanting to upgrade your credentials. We'd be delighted to receive your application and discuss your possible educational pathway with you.

Perhaps your background includes an active interest in recreation, sports, dance, special occupations or an ambition to improve the design of items related to these pursuits. Or, perhaps you are an entrepreneur wanting to improve the quality of life for groups under-represented by product design. Your creative skills might be in drawing, painting, photography, computer graphics, sculpture, crafts and other 3D work. You might simply be inventive and enjoy making gadgets and taking them apart. Whatever your profile, you are likely to be a risk-taker, problem-solver, willing to push boundaries, able to work independently and in teams, and engage in a rigorous design education.

It is strongly recommended that you have basic skills in English communication, word processing, basic mathematics, plus an awareness of product design, with ideas about how to improve current products and processes – in Canada and internationally.

Because of the varied profiles of our applicants, we will work with you to construct an educational pathway suitable to your goals. Our aim is to ensure that your time at KPU is enriching and enjoyable.

## Career Opportunities

Product design is an evolving design field. Locally, however, there are many very successful companies in Vancouver, known around the world for excellence in recreational and technical gear. There are also many opportunities that students might consider, overseas, in countries noted for manufacture of these items.

Upon graduation, you will have produced an extensive portfolio of innovative work, including a major research and development project that combines all the skills and knowledge necessary for this field. You would be prepared for such careers as:

- Product designer
- Industrial designer
- Product developer
- Product buyer
- Product production supervisor
- Environmental designer
- Packaging designer

You could work independently as a consultant, an entrepreneur, as a staff designer for an existing design studio, retailer, or manufacturer.

## Requirements

### Admission Requirements

In addition to the Faculty's Admission Requirements, which consist of KPU's undergraduate English Proficiency Requirement (p. 13), the following program admission requirements apply:

- Portfolio Review and Interview Session
  - Qualified applicants will receive an invitation to the required Portfolio Review and Interview session. Alternative arrangements are possible for students who live outside the Greater Vancouver Region and who cannot attend in person. It is, however, in the best interest of applicants to make every effort to attend in person.

During the portfolio and interview process, faculty members evaluate each applicant for suitability for admission.

## Curricular Requirements

The Bachelor of Design, Product Design (DEPD) program consists of 120 credits, organized into eight full-time semesters, over a four-year period.

You may complete electives and other general education courses prior to entering the program, or at any time during your program. See "Electives" below.

**Note:** DEPD courses are assessed Tuition Category 2.a.3 (p. 20) tuition and fees for domestic students.

Course	Title	Credits
<b>Year 1</b>		
<b>Fall Term</b>		
DEPD 1100	Studio 1: Design Methods	3
DEPD 1110	Visualization for Product Design	3
DEPD 1130	Design Thinking	3
DEPD 1140	Model Making	3
ENGL 1100	Introduction to University Writing <sup>1</sup>	3
Credits		15
<b>Spring Term</b>		
DEPD 1220	Digital Technologies for Product Design	3
DEPD 1240	Computer Fundamentals	3
DEPD 1250	Construction Technologies	3
FIND 1150	Designing for Humanity	3
FIND 1220	Design History: 19th Century Onward	3
Credits		15
<b>Year 2</b>		
<b>Fall Term</b>		
DEPD 2310	Studio 2: Design Content	6
DEPD 2320	Material Technology	3
DEPD 2330	Transformative Thinking for Product Design	3
DEPD 2331	Human Factors for Product Design	3
Credits		15
<b>Spring Term</b>		
DEPD 2410	Studio 3: Design Context	6
DEPD 2420	Production Technology	3
DEPD 2430	Socio-Cultural Issues in Design	3
MRKT 1199	Introduction to Marketing	3
Credits		15
<b>Year 3</b>		
<b>Fall Term</b>		
DEPD 3510	Studio 4: Design Engagement	6
DEPD 3520	Production Cycle: Manufacture and Strategies	3
DEPD 3530	Semiotics for Product Design	3
Select elective (p. 516)		3
Credits		15
<b>Spring Term</b>		
DEPD 3610	Studio 5 Design Implementation	6
DEPD 3620	Product Development for Manufacturing	3
DEPD 3630	Industry Experience	3
Select elective (p. 516)		3
Credits		15
<b>Year 4</b>		
<b>Fall Term</b>		
DEPD 4710	Studio 6: Design Evaluation	6
DEPD 4720	Products & Business Scenarios	3
MRKT 4177	Contemporary Issues in Marketing	3

Select elective (p. 516)		3
Credits		15
<b>Spring Term</b>		
DEPD 4810	Studio 7: Design Projections	9
DEPD 4831	The Business of Product Design	3
Select elective (p. 516)		3
Credits		15
Total Credits		120

- <sup>1</sup> Completion of ENGL 1100 with a minimum grade of "C" (or an approved writing intensive course at the 1100 level or higher) is a graduation requirement. It is recommended that this course be taken prior to Year 2.

## Electives

During their third and fourth years in the DEPD program, students are required to complete 12 credits of electives. Electives must be KPU courses numbered 1100 or higher, and may not include courses in FASN, FIND, FMRK, GDMA, or IDSN. Students are encouraged to select a range of elective courses that both broaden their learning and also assist them in their design studios and technology workshops.

## Other Information

This program is delivered in an e-mobile environment that uses laptop computers and specific software. Students are advised NOT to purchase a personal laptop computer until specifications and requirements have been provided to successful applicants.

## Credential Awarded

Upon successful completion of this program, students are eligible to receive a **Bachelor of Design, Product Design**.

## Technical Apparel Design

Technical apparel is defined as apparel designed and manufactured primarily for their technical and performance properties for specific end-uses such as sports, recreation, protection, survival, health and well-being, and military.

Internationally renowned for quality and innovation, British Columbia's technical apparel industries are poised for growth and are seeking talented, trained professionals who can generate new ideas and further technological advances in their field.

## Who Studies Technical Apparel Design?

To be successful in the business of design, industry needs creative innovators who are willing to take risks, technologists who can strategize, and leaders who can manage the continuing shifts in today's economy. Critical thinkers who challenge the existing framework and therefore elevate the industry, are in demand.

The Post Baccalaureate Diploma in Technical Apparel Design is aimed at an independent learner who is driven to explore in a creative learning environment that allows unexpected, surprising, and delightful ideas to emerge.

The program will attract graduates from a wide range of disciplines that include fashion, textile design, product design, industrial design, interior design, engineering, business or kinesiology. It will also appeal to professionals working in areas of design, health and well-being, engineering, sport, and ergonomics. These professionals are drawn

to furthering their design education in order to keep up with today's global economy and innovative technologies, along with cultural and environmental sustainability issues. The program attracts students from BC, Canada, USA, and around the world.

Great designers come from a range of places, life experiences and educational settings. They will have an inquiring mind, professional skills, leadership potential, ambition and a passion for design and innovation. For entrance, it is expected they will demonstrate the general dimensions of learning outcomes commonly identified with an undergraduate education.

## Career Opportunities

Graduates of this advanced post-baccalaureate program will be the next generation of design innovators, strategic technologists and transformative leaders, with the increased ability to drive change and create progress in the technical apparel industry.

Graduates of the program will not only access new design and technical knowledge but will also develop competencies for design thinking with the end-user in mind, leadership, and global business skills. They will be prepared to work in a number of areas in apparel and product design and production, with emphasis on technical and high performance materials. Graduates may also be interested in industrial design, health-care, business development and manufacturing.

As students complete their capstone project, they may be inspired to pursue graduate studies to further their applied research interests.

## Programs

- Post-Baccalaureate Diploma in Technical Apparel Design (p. 518)

## Courses

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

### DETA 5110 3 credits

#### Technical Apparel in Context

Students will examine the relationship between technical apparel and the intended context of use. They will learn to apply a human-centred systems approach to characterizable human, functional, and environmental design requirements and objectives. Students will explore selected topics in ergonomics, anthropometry, psychology, thermal physiology, kinesiology, and safety as they relate to technical apparel design for recreational, occupational, athletic, survival, and therapeutic contexts.

Level: UG

Attributes: DESN (p. 521), F2A6 (p. 521)

### DETA 5120 3 credits

#### Technical Textile Technologies

Students will enhance their knowledge of advances in textile technologies that are revolutionizing the technical apparel industry. They will study the properties, processing, and testing of high tech textiles and new millennium fibres for a range of applications including: athletic and recreational performance, protection, occupational, survival, medical, smart fabrics, and eco-textiles for sustainability. Students will gain an understanding of the properties that influence function and performance. They will explore ways to apply research to further promote their understanding of technical textile applications.

Level: UG

Attributes: DESN (p. 521), F2A6 (p. 521)

### DETA 5130 3 credits

#### Creative Innovation

Students will explore, interpret, and conceptualize innovative processes for creative solutions in the designing of technical performance apparel. They will envision future technical apparel opportunities through evaluation of the current marketplace, interpretation of economic forecasts, sustainability issues, and target market user profiles. Students will systematize the effective application of design processes resulting in a variety of exploratory and defensible options.

Level: UG

Attributes: DESN (p. 521), F2A6 (p. 521)

### DETA 5140 3 credits

#### Advances in Apparel Production

Students will research and analyze advanced production methodologies for technical apparel. They will examine technical apparel components to understand the implications of product integrity. Students will execute rapid prototyping techniques as an iterative process and evaluate production methodologies for fit, function, and environmental sustainability.

Level: UG

Attributes: DESN (p. 521), F2A6 (p. 521)

### DETA 5200 3 credits

#### Global Business Strategies for Technical Apparel

Students will reach beyond existing market demands to create new opportunities. They will critique business models, leadership practices, and global strategies while considering diverse organizational, social, and cultural relationships within the technical apparel industry. Students will assess geographical, ethical, and sustainability issues related to the use and function of technical apparel in global sourcing, trade negotiations, and logistical planning.

Level: UG

Prerequisite(s): DETA 5110, 5120, 5130 and 5140.

Attributes: DESN (p. 521), F2A6 (p. 521)

### DETA 5210 3 credits

#### User Experience

Students will apply and critique methods of engaging with and learning from technical apparel users throughout an iterative design process. They will formulate and implement testing strategies to evaluate user experience of technical apparel products.

Level: UG

Attributes: DESN (p. 521), F2A6 (p. 521)

**DETA 5230 3 credits****Strategic Design Direction**

Students will research market opportunities and critique creative strategies, technological advances, and leadership approaches in the design of technical performance apparel. They will evaluate principles of research design methodology for the purposes of measuring potential innovation and creative solutions. Students will, through divergent thinking and exploration, debate strategic design directions and research to inform the final capstone project in DETA 5300.

Level: UG

Attributes: DESN (p. 521), F2A6 (p. 521)

**DETA 5300 9 credits****Capstone Project**

Students will develop and conduct a complete design process for technical apparel based on approval of the capstone proposal developed in DETA 5230, Strategic Design Direction. They will apply the key elements of an iterative design process to generate a detailed, responsive design and an associated business strategy. Students will incorporate an understanding of the human-centred systems approach, current textile technologies, apparel production standards, user and market analyses, business strategies, project management, and innovation.

Level: UG

Prerequisite(s): DETA 5200, 5210 and 5230.

Attributes: DESN (p. 521), F2A6 (p. 521)

## Description

When you embark on a Post Baccalaureate Diploma in Technical Apparel Design, you'll join an industry that pushes the limits of human potential. From giving elite athletes a competitive edge to saving the lives of outdoor enthusiasts, this booming industry blends creativity with cutting-

edge technology to allow humans to move faster, survive longer and explore further.

Our diploma places you at the centre of BC's world-renowned technical apparel industry. Our curriculum was developed in collaboration with Vancouver-based companies like Arc'teryx, Global Collective, lululemon, Mountain Equipment Co-Op, Mustang Survival and Sugoi, as well as top academics and researchers.

In just 3 semesters, you'll gain the research, design, business and leadership skills needed to join the next generation of design innovators. And thanks to our flexible delivery model, you can still work part-time.

## Requirements

### Admission Requirements

In addition to the Faculty's Admission Requirements, which consist of KPU's undergraduate English Proficiency Requirement (p. 13), the following program admission requirements apply:

- Successful completion of a recognized undergraduate degree, or a design-related diploma or associate degree along with a minimum of 5 years of related work experience
- Letter of Interest package
- Interview

For further details about the letter of interest package and interview process, including submission specifics, visit the department's website at: [kpu.ca/technicalapparel](http://www.kpu.ca/technicalapparel) (<http://www.kpu.ca/technicalapparel/>)

## Curricular Requirements

This program requires students to complete a total of 30 credits including a 9-credit capstone project. Students are required to study full time (12 credits) in their first semester, and part-time for the next two semesters. Intakes generally start in the September semester.

**Note:** DETA courses numbered 5000 or higher are assessed Tuition Category 2.a.6 (p. 20) for domestic students.

## Level & Attributes

### Course Level

Each course description includes the designated academic level of the course as noted below.

Level	Description
CP	Course designated as College Preparatory level.
GR	Course designated as Graduate level.
UG	Course designated as Undergraduate level.
VO	Course designated as Vocational level.

### Course Attributes

Each course description may include one or more attributes for the course. A description of each attribute is noted below.

Attribute	Description
ACAD	Course offered by the Faculty of Academic and Career Advancement.
ARTS	Course offered by the Faculty of Arts.
ASTR	Course designated as applicable towards requirements for an associate degree.
BUSI	Course offered by the School of Business.
DESN	Course offered by the Wilson School of Design.
F2A2	Course fees are assessed according to Tuition Category 2.a.2
F2A3	Course fees are assessed according to Tuition Category 2.a.3
F2A4	Course fees are assessed according to Tuition Category 2.a.4
F2A5	Course fees are assessed according to Tuition Category 2.a.5
F2A6	Course fees are assessed according to Tuition Category 2.a.6
F2A7	Course fees are assessed according to Tuition Category 2.a.7
F2A8	Course fees are assessed according to Tuition Category 2.a.8
F2A9	Course fees are assessed according to Tuition Category 2.a.9
F2B2	Course fees are assessed according to Tuition Category 2.b.2
F2C	Course fees are assessed according to Tuition Category 2.c
F2D	Course fees are assessed according to Tuition Category 2.d
F2E	Course fees are assessed according to Tuition Category 2.e
F2F	Course fees are assessed according to Tuition Category 2.f

<b>FC06</b>	Course fees are assessed according to Tuition Category 6
<b>HLTH</b>	Course offered by the Faculty of Health.
<b>PW_2</b>	Course designated for Pathway Studies students at Pathway 2 English proficiency.
<b>PW_3</b>	Course designated for Pathway Studies students at Pathway 3 English proficiency.
<b>QUAN</b>	Quantitative course that fulfills a quantitative program requirement.
<b>SCIH</b>	Course offered by the Faculty of Science & Horticulture.
<b>TRAD</b>	Course offered by the Faculty of Trades and Technology.
<b>WRIT</b>	Writing Intensive course that fulfills a writing intensive program requirement.

## Pathway Pathway to Undergraduate Study Courses

The following courses are designated for enrolment by students undertaking Pathway Studies (p. 14), as approved by Senate and its Standing Committee on Curriculum.

A student that does not meet the English proficiency requirements for admission to undergraduate studies at KPU has the option of taking English proficiency upgrading courses, while simultaneously taking a limited number of undergraduate courses at KPU. Students may choose courses designated for Pathway 2 or Pathway 3 according to their level of English proficiency. The course description will indicate any prerequisite(s) other than English. Note that Pathway Students must register in an English upgrading course in ENGQ or ELST as a condition of registration in any of these undergraduate courses. See the Pathway to Undergraduate Studies (p. 14) for English upgrading course options.

## Pathway 2 English Proficiency

Students with Pathway 2 English proficiency (p. 14) may choose from the following undergraduate courses.

Code	Title	Credits
BUQU 1130	Business Mathematics	3
BUSI 1110	Fundamentals of Business in Canada	3
CBSY 1105	Computer Business Applications	3
CMNS 1110	Fundamentals of Business Communication	3
CPSC 1100	Introduction to Computer Literacy	3
EDUC 1100	Introduction to Higher Education	3
EDUC 1101	Introduction to Higher Education for Student Athletes	3
EDUC 1102	Introduction to Higher Education for Aboriginal Students	3
EDUC 1150	Introduction to Higher Education for International Students	3
IDEA 1100	Interdisciplinary Foundations	3
INFO 1111	Introduction to Computer Hardware and Software	3
MUSI 1120	Music Rudiments	3
MUSI 1130	Music Technology I	3
MUSI 1167	Kwantlen String Orchestra I	2
MUSI 1168	Kwantlen Wind Ensemble I	2

MUSI 1169	Kwantlen Chorus I	2
MUSI 1267	Kwantlen String Orchestra II	2

## Pathway 3 English Proficiency

Students with Pathway 3 English proficiency (p. 14) may choose from the following undergraduate courses, as well as from the undergraduate courses listed above.

Code	Title	Credits
ACCT 1110	Introductory Financial Accounting I	3
ACCT 1210	Introductory Financial Accounting II	3
ANTH 1100	Social & Cultural Anthropology	3
ARTH 1121	Art and Visual Culture: Late Renaissance to 20th Century	3
ASIA 1100	Introducing Asia	3
ASIA 1111	The Religions of India	3
BUSI 1101	Canadian Business Education Foundations	3
CHEM 1101	CSI: Chemical Sciences Investigation	4
CHEM 1105	Introductory Chemistry	4
CMNS 1101	Foundations of Business Communications	3
CRIM 1100	Introduction to Criminology	3
CRIM 1101	Introduction to the Criminal Justice System	3
ECON 1150	Principles of Microeconomics	3
ECON 1250	Principles of Macroeconomics	3
FINA 1100	Introduction to Drawing	3
FIND 1100	Design Processes, Methods and Materials	3
FIND 1110	Drawing for Design	3
FIND 1140	Colour Theories	3
FIND 1230	Drafting For Design	3
FREN 1100	French for Beginners I	3
GEOG 1160	Geography of British Columbia	3
HIST 1100	Reel History: History through Film	3
HORT 1105	BC Pesticide Applicator Certification	1
HORT 1118	Basic Machinery Operation and Maintenance	3
HORT 1124	Landscape Gardening Methods	3
HORT 1132	Turf Maintenance Operations	3
HORT 1193	Crop Production Practices	3
HORT 1217	Foundations of Plant Health	3
HORT 1230	Sustainable Turf Management	3
HORT 1293	Crop Production Operations	3
JAPN 1100	Basic Japanese I	3
LANC 1870	Intro to Bhangra Dance: Modern and Traditional	3
LING 1100	Introduction to Language Structure	3
MAND 1100	Beginner Mandarin I	3
MATH 1102	Precalculus Algebra	3
MATH 1112	Pre-Calculus	3
MATH 1117	Environmental Mathematics	3
MATH 1120	Differential Calculus	3
MATH 1130	Calculus for Life Sciences I	3
MATH 1140	Calculus I (Business Applications)	3
MUSI 1111	History of Popular Music	3

MUSI 1115	Classical Music in Western Culture	3
MUSI 1291	Songwriting and Arranging	3
PHYS 1100	Introductory Physics	4
PSYC 1100	Introduction to Psychology: Basic Processes	3
PUNJ 1100	Introductory Punjabi I	3
SOCI 1125	Introduction to Society: Processes and Structures	3
SPAN 1100	Basic Spanish I	3
WRTG 1100	Writing for University	3

## ASTR

### Associate Degree Transferable Courses

The following KPU courses receive transfer credit at one or more of SFU, UBC (Vancouver or Okanagan Campus), UNBC or UVic and as such can count towards completing the requirements for an associate degree. For further information, see [bctransferguide.ca/associate](https://www.bctransferguide.ca/associate) (<https://www.bctransferguide.ca/associate/>)

Code	Title	Credits
ACCT 1110	Introductory Financial Accounting I	3
ACCT 1210	Introductory Financial Accounting II	3
ACCT 2235	Introductory Taxation	3
ACCT 2293	Intro To Financial Accounting	3
ACCT 3310	Intermediate Financial Accounting I	3
ACCT 3320	Cost and Management Accounting I	3
ACCT 3335	Taxation	3
ACCT 3380	Managerial Finance	3
ACCT 3410	Intermediate Accounting II	3
ACCT 4120	Financial Statement Presentation and Analysis	3
ACCT 4360	Advanced Financial Modelling using Spreadsheets	3
ACCT 4520	Management Accounting I & II	6
ACCT 4580	Corporate Finance	6
ACCT 4720	Advanced Managerial Accounting	3
ACCT 5110	Intermediate Financial Accounting	4
ACCT 5220	Introductory Managerial Accounting	3
ACCT 5335	Taxation	4
ACCT 5480	Corporate Finance	4
ACCT 5510	Advanced Financial Accounting	4
ACCT 5645	Audit and Assurance	4
ACCT 5720	Advanced Managerial Accounting	3
ACCT 5800	Strategy and Governance	4
ACUP 1100	Acupuncture Fundamental Theory	4
ACUP 1110	Mandarin Foundation for Traditional Chinese Medicine/Acupuncture	3
ACUP 1160	Acupuncture Biomedical Foundation	4
ACUP 1210	East Asian Health and Philosophy	3
AGRI 1150	Sustainable Agriculture for the 21st Century	3
AGRI 1250	Foundations in Sustainable Agriculture	4
AGRI 1299	Food System Field Analysis	1
AGRI 2190	Plant Science	3
AGRI 2220	Soil Stewardship and Management	4
AGRI 2230	Sustainable Human Economy	3
AGRI 2240	Ecologically Based Pest Management	3
AGRI 2250	Agriculture and Food Systems	3

AGRI 2320	Advanced Soil Management	3
AGRI 3150	Agriculture and Energy	3
AGRI 3390	Agro-Ecosystems Management II	6
AGRI 4298	World Trends in Agriculture	3
ANTH 1100	Social & Cultural Anthropology	3
ANTH 1200	Biological Anthropology	3
ANTH 1217	Forensic Anthropology	3

## QUAN Quantitative Courses

The following courses are designated to meet the quantitative course requirements for KPU credentials, as approved by Senate, the Senate Standing Committee on Curriculum and its Subcommittee on Quantitative Courses.

Code	Title	Credits
ACCT 1110	Introductory Financial Accounting I	3
ACCT 1210	Introductory Financial Accounting II	3
ACCT 2235	Introductory Taxation	3
ACCT 2293	Intro To Financial Accounting	3
ACCT 3310	Intermediate Financial Accounting I	3
ACCT 3320	Cost and Management Accounting I	3
ACCT 3335	Taxation	3
ACCT 3380	Managerial Finance	3
ACCT 3410	Intermediate Accounting II	3
ACCT 3510	Intermediate Financial Accounting I & II	6
ACCT 4320	Cost and Management Accounting II	3
ACCT 4335	Taxation 2	3
ACCT 4380	Intermediate Corporate Finance	3
ACCT 4520	Management Accounting I & II	6
ACCT 4580	Corporate Finance	6
ACCT 4720	Advanced Managerial Accounting	3
ACCT 4780	Advanced Corporate Finance	3
AGRI 3150	Agriculture and Energy	3
ANTH 1200	Biological Anthropology	3
ANTH 1217	Forensic Anthropology	3
ANTH 2217	Forensic Methods & Analysis	3
ASTR 1100	Introduction to Astronomy	4
ASTR 3110	Exploring the Solar System	3
ASTR 3111	Exploring Stars & Galaxies	3

## WRIT Writing Intensive Course

The following course is designated to meet the writing-intensive course requirement for KPU baccalaureate degrees. Additional courses may be

approved by Senate, the Senate Standing Committee on Curriculum and its Subcommittee on Writing Intensive Courses.

Code	Title	Credits
ENGL 1100	Introduction to University Writing	3

## Access Programs for People with Disabilities (APPD)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

### APPD 0021 0 credits

#### Work Exploration

Students will explore work and continuous learning opportunities. They will increase independence in campus, community and work settings. Students will also develop essential skills through participation in a combination of employment-oriented classroom instruction and monitored work experience. NOTE: The target audience for APPD programs is graduates of a secondary school or mature students with permanent disabilities or combinations of learning difficulties that hinder their scholastic success.

Level: CP

Attribute: ACAD (p. 521)

### APPD 0031 0 credits

#### Job Preparation

Students will investigate and prepare for future work and academic opportunities. They will identify options for involvement in campus, community and work settings. Students will build essential skills through a combination of employment-oriented classroom instruction and monitored work experience. NOTE: The target audience for APPD programs is graduates of a secondary school and mature students with permanent disabilities or combinations of learning difficulties that hinder scholastic success.

Level: CP

Attribute: ACAD (p. 521)

### APPD 0041 0 credits

#### Strategies for Employment

Students will reflect on and integrate their experiences in either APPD 0021 (Work Exploration) or APPD 0031 (Job Preparation) in order to complete an employment portfolio and conduct an independent or supported job search project. They will demonstrate essential skills on a monitored work experience. NOTE: This course has three weeks of class and four weeks of work experience.

Level: CP

Prerequisite(s): APPD 0021 or APPD 0031

Attribute: ACAD (p. 521)

## Accounting (ACCT)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

### ACCT 1110 3 credits

#### Introductory Financial Accounting I

Students will learn to prepare financial statements using Canadian Generally Accepted Accounting Principles (GAAP). Students will be introduced to the accounting cycle, accrual accounting concepts, and the asset side of the balance sheet, specifically cash, receivables, inventory, and long-lived assets for service and merchandising companies operating as a sole proprietorship. This course is designed to be followed by ACCT 1210, which covers the liabilities and equity side of the balance sheet as well as partnerships and corporations. For graduation purposes a maximum of 6 credits can be obtained for any combination of ACCT 1110, ACCT 1210 and ACCT 2293.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521), PW\_3 (p. 522), QUAN (p. 532)

### ACCT 1160 3 credits

#### Accounting Essentials

Students will learn the basic concepts of financial and managerial accounting. They will study planning, budgeting, and decision-making techniques from a financial perspective. Note: This survey course is intended for students who do not plan to pursue a School of Business credential.

Level: UG

Attribute: BUSI (p. 521)

### ACCT 1210 3 credits

#### Introductory Financial Accounting II

Students will further develop their skills in preparing financial statements in accordance with Canadian Generally Accepted Accounting Principles (GAAP). Students will learn recognition and measurement techniques for liabilities, shareholder's equity and investments as well as accounting for partnerships and corporations and preparing cash flow statements. Students will analyze and interpret financial statement results. This course is designed to be preceded by ACCT 1110, which covers the accounting cycle and the assets side of the balance sheet. For graduation purposes a maximum of 6 credits can be obtained for any combination of ACCT 1110, ACCT 1210 and ACCT 2293.

Level: UG

Prerequisite(s): ACCT 1110

Attributes: ASTR (p. 523), BUSI (p. 521), PW\_3 (p. 522), QUAN (p. 532)

### ACCT 2235 3 credits

#### Introductory Taxation

Students will learn the fundamental principles and concepts of Canadian federal income tax, including a conceptual structure of the Income Tax Act, and the Goods and Services Tax ("GST"). Students will learn to apply the rules and regulations to practical cases through detailed exercises and taxpayer scenarios. They will learn to identify and fulfill a taxpayer's compliance and reporting requirements, including the determination of the components of the taxpayer's Net Income for Tax Purposes, Taxable Income, and the calculation of income taxes payable for an individual. They will also learn to prepare a GST return for businesses.

Level: UG

Prerequisite(s): ACCT 1210 or ACCT 2293

Attributes: ASTR (p. 523), BUSI (p. 521), QUAN (p. 532)

**ACCT 2293 3 credits****Intro To Financial Accounting**

Students will learn to prepare and interpret financial statements for corporations in accordance with Canadian Generally Accepted Accounting Principles (GAAP). Students will learn about the accounting information system, accrual accounting concepts, accounting for service and merchandising operations, the reporting and analysis of inventory, receivables, long-lived assets, liabilities, shareholders' equity and investments, and the preparation of cash flow statements. The user-oriented approach will include performance measurement and the evaluation and analysis of financial statements by external decision-makers. This course is an accelerated and condensed version of ACCT 1110 and ACCT 1210. Note: For graduation purposes a maximum of 6 credits can be obtained for any combination of ACCT 1110, ACCT 1210 and ACCT 2293.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521), QUAN (p. 532)

**ACCT 3111 3 credits****Introduction to Fraud Examination**

Students will analyze the fraud problem and its social and economic impacts. They will examine various issues fundamental to the understanding, prevention, detection, and deterrence of fraud from a management perspective. Note: Students may be entitled to use this course towards Association of Certified Fraud Examiners requirements.

Level: UG

Prerequisite(s): ACCT 2293, BUSI 2390, CRIM 1107, or permission of instructor.

Attribute: BUSI (p. 521)

**ACCT 3310 3 credits****Intermediate Financial Accounting I**

Students will examine accounting theory and current Canadian practice in the measurement, recording and reporting of financial information, with emphasis on the accounting for assets. For graduation purposes: A maximum of 6 credits can be obtained for any combination of ACCT 3310, ACCT 3410, and ACCT 3510

Level: UG

Prerequisite(s): Both (a) ACCT 1210 or ACCT 2293, and (b) BUQU 1130, MATH 1120, MATH 1130 or MATH 1140.

Attributes: ASTR (p. 523), BUSI (p. 521), QUAN (p. 532)

**ACCT 3320 3 credits****Cost and Management Accounting I**

Students will learn how to use internal accounting information for decision making in manufacturing and other organizations. Students will study a variety of management accounting topics such as cost terms and concepts, alternative costing systems, cost/volume/profit relationships, budgeting and profit planning, relevant costing, variance analysis, segmented reporting and the importance of ethics. Note: For graduation purposes, a maximum of 6 credits can be obtained from any combination of ACCT 3320, ACCT 4320 and ACCT 4520.

Level: UG

Prerequisite(s): ACCT 1210 or ACCT 2293

Attributes: ASTR (p. 523), BUSI (p. 521), QUAN (p. 532)

**ACCT 3335 3 credits****Taxation**

The students will learn about business income, property income, and capital gains and losses and their tax effects on individual and corporate taxpayers. They will learn about the different types of corporate taxpayers, and how these factors and the sources of income impact on the calculation of corporate tax liabilities, including the small business deduction and the taxation of investment income for Canadian Controlled Private Corporations. The students will learn to identify opportunities for Canadian income tax planning and suggest effective tax solutions, by integrating the tax consequences of business decisions at the personal and corporate level.

Level: UG

Prerequisite(s): ACCT 2235

Attributes: ASTR (p. 523), BUSI (p. 521), QUAN (p. 532)

**ACCT 3380 3 credits****Managerial Finance**

Students will be introduced to corporate finance and obtain an understanding of the role and function of financial management. Students will learn financial ratio analysis, how to determine cash flows and time value of money. Students will also learn how to value debt and equity investments, capital budgeting techniques, and they will learn about cost of capital and capital structure. For graduation purposes: A maximum of 6 credits can be obtained for any combination of ACCT 3380, ACCT 4380, and ACCT 4580.

Level: UG

Prerequisite(s): Both (a) ACCT 1210 or ACCT 2293, and (b) BUQU 1130, MATH 1120, MATH 1130 or MATH 1140.

Attributes: ASTR (p. 523), BUSI (p. 521), QUAN (p. 532)

**ACCT 3410 3 credits****Intermediate Accounting II**

Students will examine accounting theory and current Canadian practice in the measurement, recording and reporting of financial information with emphasis on the accounting for liabilities and owners' equity. Note: For graduation purposes, a maximum of 6 credits can be obtained for any combination of ACCT 3310, ACCT 3410 and ACCT 3510.

Level: UG

Prerequisite(s): ACCT 3310

Attributes: ASTR (p. 523), BUSI (p. 521), QUAN (p. 532)

**ACCT 3444 3 credits****Auditing**

Students will study auditing principles and internal control. Topics covered include audit reporting, audit risk, audit sampling, auditing standards, techniques and procedures. They will compare and contrast the independent and internal audit functions. The focus will be on external independent financial statement audit.

Level: UG

Prerequisite(s): All of: (a) ACCT 3310 or ACCT 3510, (b) CBSY 2306 or CBSY 2205, and (c) BUQU 1230, CRIM 2103, MATH 1115, MATH 2341, PSYC 2300 or SOCI 2365.

Attribute: BUSI (p. 521)

**ACCT 3510 6 credits****Intermediate Financial Accounting I & II**

Students will examine accounting theory and current Canadian practice in the measurement, recording, and reporting of financial information.

Note: For graduation purposes, a maximum of 6 credits can be obtained for any combination of ACCT 3310, 3410 and 3510.

Level: UG

Prerequisite(s): All of (a) ACCT 1210 or ACCT 2293, (b) BUQU 1130, MATH 1120, MATH 1130 or MATH 1140, and (c) 3 credits from a course in ACCT at the 3000 level.

Attributes: BUSI (p. 521), QUAN (p. 532)

**ACCT 4111 3 credits****Introduction to Organizational Fraud**

Students will explore fraud in organizations, including its social and economic impact from a Canadian management perspective. Students will learn the fundamentals of recognizing, deterring, and detecting internal fraud. They will be introduced to fraud-specific terminology and current research. Students will explore fraud in organizations, including the economic, social and financial reporting impact from a Canadian management perspective, including how people and technology both contribute to, and may be used to mitigate, fraud risk.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher.

Attribute: BUSI (p. 521)

**ACCT 4120 3 credits****Financial Statement Presentation and Analysis**

Students will investigate financial statement presentation, including proper note disclosure appropriate for publication according to generally accepted accounting principles (GAAP) with an emphasis on International Financial Reporting Standards (IFRS). Students will analyze and evaluate financial statements in the form of published annual reports, with special emphasis on different industry-specific presentation and disclosure styles. Students will study differences in international accounting standards. Students will prepare case analysis requiring integration of information and using both qualitative and quantitative analysis.

Level: UG

Prerequisite(s): All of: (a) CMNS 3000 or ENTR 3000, (b) ENTR 3100 or ENTR 3140, and (c) 9 credits from courses in ACCT at the 4000 level.

Attributes: ASTR (p. 523), BUSI (p. 521)

**ACCT 4150 3 credits****International Issues for Financial Managers**

Students will study specific topics in international financial management. They will learn about the international business environment within which a multinational entity operates and about foreign exchange markets.

Students will learn about risks arising from doing business internationally and strategies how to manage these risks. Students will apply financial management concepts such as availability and cost of capital, capital budgeting, working capital management and taxation in a multi-national environment.

Level: UG

Prerequisite(s): 9 credits from courses in ACCT at the 3000 level or higher, including ACCT 3380. ACCT 4380 is strongly recommended.

Attribute: BUSI (p. 521)

**ACCT 4199 3 credits****Accounting Theory**

Students will study practical and theoretical models, including: market efficiency, present value accounting, standard setting, executive compensation, earnings management and agency theory. They will examine the contributions of economics, finance and other disciplines to accounting theory, and will evaluate current issues and problems in the field.

Level: UG

Prerequisite(s): All of: (a) ACCT 3380, (b) ACCT 3410 or ACCT 3510, and (c) CMNS 3000 or ENTR 3000.

Co-requisite(s): ACCT 3410 for those who have not previously completed 3510

Attribute: BUSI (p. 521)

**ACCT 4320 3 credits****Cost and Management Accounting II**

Students will study a variety of management accounting topics including flexible budgets, standard costs, variance analysis and investigation decisions, cost behavior, cost allocation. Topics also covered are: linear programming, joint products and by-products, special issues of process costing, alternative inventory models, pricing theory and strategies, and decentralization and transfer pricing. In addition, the course will cover the quality, operations costing, backflush costing, statistical analysis and linear models as well as selected current issues. For graduation purposes: A maximum of 6 credits can be obtained for any combination of ACCT 3320, ACCT 3420, and ACCT 3520.

Level: UG

Prerequisite(s): ACCT 3320

Attributes: BUSI (p. 521), QUAN (p. 532)

**ACCT 4335 3 credits****Taxation 2**

The students will study a variety of complex tax issues such as corporate reorganizations, amalgamation, wind-up, loss utilization and the limitation of losses from an acquisition of control, estate-planning, business acquisitions and divestitures either in the form of assets or shares. They will also learn about specialized topics such as the use of partnerships and trusts as tax planning tools, and the taxation of non-residents. In analyzing and integrating the business, financial, succession-planning and income tax consequences of these complex transactions and situations, the students will gain a deeper understanding of the effects of the Income Tax Act on business decisions.

Level: UG

Prerequisite(s): Both (a) ACCT 3335, (b) CMNS 3000 or ENTR 3000.

Attributes: BUSI (p. 521), QUAN (p. 532)

**ACCT 4360 3 credits****Advanced Financial Modelling using Spreadsheets**

Students will learn to analyze and solve financial problems in cost accounting, capital budgeting and linear programming using spreadsheets. Students will build pro-forma financial statements, discounted cash flow models and learn to work with pivot tables applied to data mining and analysis situations. Students will also use statistical techniques, such as single/multi-variable regression analysis and various forecasting methodologies using Stat-Tools software.

Level: UG

Prerequisite(s): All of: (a) ACCT 3380, (b) ACCT 4320 or ACCT 4520, (c) CBSY 2306 or CBSY 2205, and (d) BUQU 1230, MATH 1115, MATH 2341, CRIM 2103, PSYC 2300 or SOCI 2365. Note: ACCT 4380 is strongly recommended.

Attributes: ASTR (p. 523), BUSI (p. 521)

**ACCT 4380 3 credits****Intermediate Corporate Finance**

Students will describe, apply and evaluate corporate finance techniques used in forecasting, financial planning, working capital management and dividend policy decisions. Students will apply valuation techniques to more advanced business valuations. Students will learn about derivative financial instruments, mergers and acquisitions and they will be introduced to international corporate finance. For graduation purposes: A maximum of 6 credits can be obtained for any combination of ACCT 3380, ACCT 4380, and ACCT 4580

Level: UG

Prerequisite(s): ACCT 3380 and 6 credits from courses in ACCT at the 3000 level or higher.

Attributes: BUSI (p. 521), QUAN (p. 532)

**ACCT 4445 3 credits****Auditing 2**

Students will learn how to prepare an audit file using a computerized application with focus on the audit process from planning to completion. Students will study current and advanced issues affecting the auditing profession, with exposure to various special audit and review engagements.

Level: UG

Prerequisite(s): All of: (a) ACCT 3444, (b) CMNS 3000 or ENTR 3000, and (c) ENTR 3100 or ENTR 3140.

Attribute: BUSI (p. 521)

**ACCT 4455 3 credits****Advanced Financial Accounting**

Students will study the current issues in financial reporting, intercorporate investments and business combinations, foreign operations, not-for-profit organizations, interim reports, segmented information, partnerships and joint ventures.

Level: UG

Prerequisite(s): ACCT 3410 or ACCT 3510.

Attribute: BUSI (p. 521)

**ACCT 4520 6 credits****Management Accounting I & II**

Students will study a variety of management accounting topics including cost terms and concepts, cost-volume-profit relationships, job-costing, budgeting, variance analysis, alternative costing methods, understanding how costs behave, relevant costing, linear programming, pricing decisions, balanced scorecard, and cost allocation. They will also study joint products and by-products, process costing, quality and time issues, inventory management, and decentralization and transfer pricing. Note: For graduation purposes, a maximum of 6 credits can be obtained from any combination of ACCT 3320, ACCT 4320 and ACCT 4520.

Level: UG

Prerequisite(s): Both (a) ACCT 1210 or ACCT 2293, and (b) 3 credits from courses in ACCT at the 3000 level.

Attributes: ASTR (p. 523), BUSI (p. 521), QUAN (p. 532)

**ACCT 4580 6 credits****Corporate Finance**

Students will develop an understanding of the role and function of financial management, financial analysis, determination of cash flows, time value of money, valuation of investments, capital budgeting, cost of capital and capital structure. Students will continue to cover more advanced topics in corporate finance such as forecasting, advanced valuation and capital structures, working capital management and dividend policy. Sources of capital, mergers and acquisitions, derivative instruments and international corporate finance are also covered. For graduation purposes: A maximum of 6 credits can be obtained for any combination of ACCT 3380, ACCT 4380, and ACCT 4580

Level: UG

Prerequisite(s): Both (a) ACCT 1210 or ACCT 2293, and (b) BUQU 1130, MATH 1120, MATH 1130 or MATH 1140.

Attributes: ASTR (p. 523), BUSI (p. 521), QUAN (p. 532)

**ACCT 4650 3 credits****Not-For-Profit Management and Financial Reporting**

Students will learn the unique aspects of management and financial reporting for not-for-profit organizations (NFPO). Students will learn the legal process and tax implications of incorporation and the distinction between NFPOs and registered charities. Students will gain real-world experience by volunteering with a NFPO and conducting an integrated analysis of structure, governance, strategic planning, fundraising, volunteer management, performance measurement, financial management and annual reporting of the NFPO.

Level: UG

Prerequisite(s): All of: (a) ACCT 3310 or ACCT 3510 and (b) ACCT 3320 or ACCT 4520 and (c) CMNS 3000 or ENTR 3000

Attribute: BUSI (p. 521)

**ACCT 4720 3 credits****Advanced Managerial Accounting**

Students will utilize advanced managerial accounting theories in planning and decision making in various business situations. Students will assess overall business needs. Students will design and evaluate integrative management accounting strategies through case analysis and projects.

Level: UG

Prerequisite(s): All of: (a) CMNS 3000 or ENTR 3000, (b) ENTR 3100 or ENTR 3140, and (c) 12 credits from courses in ACCT at the 4000 level.

Attributes: ASTR (p. 523), BUSI (p. 521), QUAN (p. 532)

**ACCT 4780 3 credits****Advanced Corporate Finance**

Students will learn to apply current financial management theories using a case-based approach. Students will apply corporate finance techniques to maximize the economic value of the firm for its shareholders. Students will learn how to identify and resolve the issues, problems and challenges faced by financial managers in today's complex financial environment.

Level: UG

Prerequisite(s): ACCT 3380 and 6 credits from courses in ACCT at the 3000 level or higher. ACCT 4380 is strongly recommended.

Attributes: BUSI (p. 521), QUAN (p. 532)

**ACCT 5110 4 credits****Intermediate Financial Accounting**

Students will examine accounting theory including the conceptual framework of financial reporting and current Canadian practice in the measurement, recording and reporting of financial information using both International Financial Reporting Standards (IFRS) and Accounting Standards for Private Enterprises (ASPE). This course is designed to meet the entry requirements for the Chartered Professional Accountant (CPA) Professional Education Program (PEP).

Level: UG

Prerequisite(s): ACCT 2293 (B-) Note: It is recommended that this course was taken within the last three years.

Attributes: ASTR (p. 523), BUSI (p. 521), F2A7 (p. 521)

**ACCT 5220 3 credits****Introductory Managerial Accounting**

Students will study introductory topics in managerial accounting including: an introduction to managerial costing terms, concepts, product costing, cost behaviors and cost-volume-profit analysis; job and activity based costing systems; a basic framework of budgeting for both merchandising firms and manufacturing operations; standard costing and variance analysis; relevant costing, segmented statements and analyses of various management strategic and operational decisions; an introduction to performance measurement. This course is designed to meet the entry requirements for the Chartered Professional Accountant (CPA) Professional Education Program (PEP).

Level: UG

Prerequisite(s): ACCT 2293 (B-) Note: It is recommended that this course was taken within the last three years.

Attributes: ASTR (p. 523), BUSI (p. 521), F2A7 (p. 521)

**ACCT 5335 4 credits****Taxation**

Students will learn the fundamental principles and rules of the Federal Income Tax Act, the Excise Tax Act, and the administrative processes of the Canada Revenue Agency, to assist and advise individual and corporate taxpayers in determining their tax liabilities, and meeting their tax compliance and reporting requirements. They will analyze the taxpayer profiles and financial transactions in order to identify, evaluate and recommend appropriate tax-planning opportunities and strategies. This course is designed to meet the entry requirements for the Chartered Professional Accountant (CPA) Professional Educational Program (PEP).

Level: UG

Prerequisite(s): Either (a) ACCT 1110 (B-) and ACCT 1210 (B-) or (b) ACCT 2293 (B-) Note: It is recommended that this course was taken within the last three years

Attributes: ASTR (p. 523), BUSI (p. 521), F2A7 (p. 521)

**ACCT 5480 4 credits****Corporate Finance**

Students will obtain an understanding of the basic concepts in corporate finance: the role and function of financial management, financial analysis, determination of cash flows, time value of money, valuation of investments, capital budgeting, cost of capital, sources of capital and capital structure, working capital management and dividend policy. Mergers and acquisitions, derivative instruments and international corporate finance topics are also introduced. This course is designed to meet the entry requirements for the Chartered Professional Accountant (CPA) Professional Education Program (PEP).

Level: UG

Prerequisite(s): Either (a) ACCT 1110 (B-) and ACCT 1210 (B-) or (b) ACCT 2293 (B-) Note: It is recommended that this course was taken within the last three years

Attributes: ASTR (p. 523), BUSI (p. 521), F2A7 (p. 521)

**ACCT 5510 4 credits****Advanced Financial Accounting**

Students will study advanced issues in financial reporting, including intercorporate investments, business combinations, foreign exchange, foreign operations, and not-for-profit organizations. This course is designed to meet the entry requirements for the Chartered Professional Accountant (CPA) Professional Education Program (PEP).

Level: UG

Prerequisite(s): ACCT 5110

Attributes: ASTR (p. 523), BUSI (p. 521), F2A7 (p. 521)

**ACCT 5645 4 credits****Audit and Assurance**

Students will study auditing principles and internal control. They will explore at length the nature and purpose of audit and assurance engagements and the principles behind these engagements. Topics covered include planning, methodology, standards, documentation, evidence, materiality, risk, internal controls, audit testing, audit reports, internal audit and current standards. The focus will be on external independent financial statement audits. This course is designed to meet the entry requirements for the Chartered Professional Accountant (CPA) Professional Education Program (PEP).

Level: UG

Prerequisite(s): ACCT 5110

Attributes: ASTR (p. 523), BUSI (p. 521), F2A7 (p. 521)

**ACCT 5720 3 credits****Advanced Managerial Accounting**

Students will study a variety of management accounting topics and utilize advanced managerial accounting theories in planning and decision making in various business situations, which may include case analysis and projects. This course is designed to meet the entry requirements for the Chartered Professional Accountant (CPA) Professional Education Program (PEP).

Level: UG

Prerequisite(s): ACCT 5220

Attributes: ASTR (p. 523), BUSI (p. 521), F2A7 (p. 521)

**ACCT 5800 4 credits****Strategy and Governance**

Students will understand and assess the role of corporate governance within an organization. They will design and compare alternative business strategies and their associated objectives and actions as well as the implications of implementation. NOTE: This course is designed to meet the competency-based entry requirements for the Chartered Professional Accountant (CPA) Professional Educational Program (PEP).

Level: UG

Prerequisite(s): BUSI 2390, ACCT 5110, ACCT 5220, ACCT 5335, and ACCT 5480

Attributes: ASTR (p. 523), BUSI (p. 521), F2A7 (p. 521)

## Acupuncture (ACUP)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**ACUP 1100 4 credits****Acupuncture Fundamental Theory**

Students will complete a comprehensive overview of the basic fundamental concepts of Traditional Chinese Medicine (TCM), including its philosophy, physiology, pathology and health maintenance, to lay a solid foundation for diagnosis and other acupuncture courses.

Level: UG

Attributes: ASTR (p. 523), F2A8 (p. 521), HLTH (p. 521)

**ACUP 1110 3 credits****Mandarin Foundation for Traditional Chinese Medicine/Acupuncture**

Students will develop basic listening, speaking, and reading skills in Mandarin Chinese. They will also learn to read and write primarily in the phonetic system Pinyin, but also with very common characters. They will acquire basic Traditional Chinese Medicine (TCM) terminology while exploring the Chinese culture, especially TCM. Note: This course is restricted to students in the Traditional Chinese Medicine in Acupuncture program.

Level: UG

Attributes: ASTR (p. 523), F2A8 (p. 521), HLTH (p. 521)

**ACUP 1160 4 credits****Acupuncture Biomedical Foundation**

Students will study ten major anatomical systems and their normal physiological functions. They will also explore organ structure and functional arrangement of each body system. Students will study the integumentary, skeletal, muscular and nervous system in more detail.

Level: UG

Attributes: ASTR (p. 523), F2A8 (p. 521), HLTH (p. 521)

**ACUP 1180 1 credit****Acupuncture Practicum Introduction**

Students will observe client care in the Traditional Chinese Medicine (TCM) clinic. They will observe how senior interns or clinical supervisors conduct TCM interviews, make diagnoses and determine appropriate treatment, perform treatment, and keep medical records. Students will start practicing their communication skills, client care skills and teaching in a reality based environment.

Level: UG

Prerequisite(s): ACUP 1200

Co-requisite(s): ACUP 1300 and ACUP 1320

Attributes: F2A8 (p. 521), HLTH (p. 521)

**ACUP 1200 4 credits****Acupuncture Diagnosis: Data Collection**

This course builds on the overview of Traditional Chinese Medicine (TCM) fundamental theories that guide students to recognize abnormal symptoms and signs. The course will focus on introducing students to four TCM diagnostic skills in order to collect appropriate clinical information. Students will develop communication skills in order to gather assessment data from clients in a simulation lab.

Level: UG

Prerequisite(s): ACUP 1100

Attributes: F2A8 (p. 521), HLTH (p. 521)

**ACUP 1210 3 credits****East Asian Health and Philosophy**

Students will examine the history and development of Chinese philosophy, East Asian and Chinese perspectives on health, and Traditional Chinese Medicine (TCM). The course will review the formation of classical Chinese philosophy, foundational texts, yin-yang, qi, and five-element theories, and the history of East Asian medicine and some of its core modalities. Students will also discuss the modern development of TCM, and links between Chinese medicine and philosophy. Course content will include but is not limited to an overview of traditional Chinese philosophy, analysis of the Yijing and related classic texts, yang sheng traditions, Daoist medical traditions and physicians, the development of herbalism and medical practices, and an overview of Tai qi and qi gong. Note: This course is restricted to students in the Traditional Chinese Medicine in Acupuncture program.

Level: UG

Attributes: ASTR (p. 523), F2A8 (p. 521), HLTH (p. 521)

**ACUP 1230 6 credits****Acupuncture Meridian and Acupoint**

Students will learn the pathways of qi and blood throughout the body via the main and extra meridians, focusing on the corresponding acupoints. They will study the methods to locate acupoints along the fourteen main meridians. They will watch instructor demonstrations and perform hands-on practice in the lab. Students will study each acupoint function and clinical indication and significance, as well as detailed instruction on points that require special care when needling.

Level: UG

Prerequisite(s): ACUP 1100

Attributes: F2A8 (p. 521), HLTH (p. 521)

**ACUP 1260 3 credits****Acupuncture Medical Biochemistry and Microbiology**

This course will provide students with a basic understanding of the biochemical principles that govern the body metabolisms, and an introduction to different pathogenic microorganisms and the immune system. Students will learn the fundamentals of organic and cellular chemistry, focusing on metabolism of glucose, lipids and proteins. They will identify structures, classification, functions and properties of various molecules which are essential in the many mechanisms of the human body. Students will also learn various pathogenic microorganisms and their properties that are capable of causing diseases in humans. They will explore the cellular and humoral immune responses to infectious diseases, and the ways to prevent these infections, focusing on vaccination, sterilization, and disinfection.

Level: UG

Prerequisite(s): ACUP 1160

Attributes: F2A8 (p. 521), HLTH (p. 521)

**ACUP 1300 4 credits****Acupuncture Diagnosis: Pattern Recognition**

Students will build on knowledge from the Traditional Chinese Medicine (TCM) Diagnosis Data Collection course to learn health disorder pattern identification and differentiation based on TCM theories. They will learn clinical case analysis and make TCM diagnosis in a simulated laboratory setting.

Level: UG

Prerequisite(s): ACUP 1200

Attributes: F2A8 (p. 521), HLTH (p. 521)

**ACUP 1320 3 credits****Acupuncture Technique**

Acupuncture Technique Students will learn filiform needling techniques including methods of manipulation, reinforcement and reduction, needle angles, insertion depth and preparation techniques. They will study moxibustion, cupping and specialized needling techniques such as scalp and ear acupuncture, electro-acupuncture, cutaneous and intra-dermal needling. Students will study the clinical indications, contraindications and precautions for each technique. Students will practice techniques in a simulated laboratory setting.

Level: UG

Prerequisite(s): ACUP 1230

Attributes: F2A8 (p. 521), HLTH (p. 521)

**ACUP 1330 3 credits****Acupuncture Therapy I**

Students will study the application of basic Traditional Chinese Medicine (TCM) theory, diagnostic methods, meridian and acupoint theory, as well as acupuncture skills for disease treatment by using acupuncture and moxibustion. They will study the principles of acupuncture prescription and treatment protocols. Students will be introduced to Chinese internal medicine. This course will include recognition of emergency clinical situations.

Level: UG

Prerequisite(s): ACUP 1230

Co-requisite(s): ACUP 1300 and ACUP 1320

Attributes: F2A8 (p. 521), HLTH (p. 521)

**ACUP 1340 2 credits****Acupuncture Safety**

Students will learn basic disinfection protocol and how to maintain safety in clinical practice, focusing on needling acupoints which are close to internal organs, arteries, nerves and brain stem. They will learn how to recognize emergency situations in the clinical setting and provide appropriate referral to other healthcare professionals for continuity of patient care. Students will study how to prevent and manage potential errors and complications during treatments.

Level: UG

Prerequisite(s): ACUP 1230 and ACUP 1260

Co-requisite(s): ACUP 2130

Attributes: F2A8 (p. 521), HLTH (p. 521)

**ACUP 1360 2 credits****Acupuncture Introduction to Pathology**

The purpose of this course is to provide students with an introduction to pathophysiological processes, underlying cellular and organ function, as well as their relationship to diseases. Students will study the pathogenesis of disease.

Level: UG

Prerequisite(s): ACUP 1260

Attributes: F2A8 (p. 521), HLTH (p. 521)

**ACUP 2100 2 credits****Introduction to Traditional Chinese Medicine History and Classics**

This course will present a comprehensive overview of the origin of Traditional Chinese Medicine (TCM), including its history, philosophical root and theoretical formation. It focuses on the establishment of TCM theory and acupuncture fundamentals. Students will be introduced to the TCM classics including their formation, conceptual and theoretical viewpoints and medical significance.

Level: UG

Prerequisite(s): ACUP 1100

Attributes: F2A8 (p. 521), HLTH (p. 521)

**ACUP 2130 3 credits****Acupuncture Therapy II**

Students will continue to learn how to apply basic Traditional Chinese Medicine (TCM) theory, diagnostic methods, meridian and acupoint theory for disease treatment by using acupuncture and moxibustion techniques. They will study the principles of acupuncture prescription and treatment protocols. Students will learn the treatment of TCM internal diseases focusing on respiratory, nervous, and genitourinary systems, infectious, psychiatric, gynecological and pediatric diseases.

Level: UG

Prerequisite(s): ACUP 1330

Co-requisite(s): ACUP 1340

Attributes: F2A8 (p. 521), HLTH (p. 521)

**ACUP 2150 2 credits****Acupuncture Communication and Ethics**

The purpose of this course is to introduce significant aspects of communication skills to enable Traditional Chinese Medicine Acupuncture (TCM) practitioners to establish and maintain effective therapeutic relationships with their clients and collegial relationships with the healthcare community. Emphasis is placed on therapeutic relationships, interviewing techniques, communication skills, ethics and client empowerment.

Level: UG

Prerequisite(s): ENGL 1100

Attributes: F2A8 (p. 521), HLTH (p. 521)

**ACUP 2160 2 credits****Acupuncture Western Medical Diagnosis (Imaging and Lab Testing)**

This course will provide knowledge about Western diagnosis, the interpretation of common laboratory tests and imaging procedures to enhance clinical decision making which integrates Chinese and Western medicine perspectives.

Level: UG

Prerequisite(s): ACUP 1360

Attributes: F2A8 (p. 521), HLTH (p. 521)

**ACUP 2170 2 credits****Acupuncture Pharmacology**

This course is to introduce students to basic pharmacology and the action of some common Western drugs in the body. Students will learn various classes of commonly used drugs, action mechanisms, pharmacokinetics, pharmacodynamics, therapeutic uses, and adverse effects.

Level: UG

Prerequisite(s): ACUP 1260

Attributes: F2A8 (p. 521), HLTH (p. 521)

**ACUP 2180 3 credits****Acupuncture Practicum (Supervised I)**

Students will continue to develop interview skills with clients focusing on gathering information based on four Traditional Chinese Medicine (TCM) diagnostic methods and identifying patterns based on related theories. Students will make preliminary diagnosis with clinical supervision. Students will learn how to propose an acupuncture prescription and perform the treatment under supervision.

Level: UG

Prerequisite(s): ACUP 1180 and ACUP 1330

Co-requisite(s): ACUP 1340 and ACUP 2130

Attributes: F2A8 (p. 521), HLTH (p. 521)

**ACUP 2200 2 credits****Acupuncture Taiji/Qigong**

Students will learn the fundamental concepts of Taiji Quan, focusing on short form of the Yang style Taiji Quan. They will learn basic steps and movements of each form. Students will study and practice freestyle Qigong and learn how to master and cultivate one's own qi through coordinating slow flowing movement, deep rhythmic breathing, and calm meditative state of mind.

Level: UG

Prerequisite(s): ACUP 1100

Attributes: F2A8 (p. 521), HLTH (p. 521)

**ACUP 2220 2 credits****Advanced Acupuncture**

Students will learn advanced ancient acupuncture and moxibustion techniques such as Ziwu Liuzhu acupuncture therapy and the eight methods of the mystic turtle. They will study and practice modern, unique acupuncture and moxibustion techniques, focusing on specialized techniques of several acupuncture masters.

Level: UG

Prerequisite(s): ACUP 1320

Attributes: F2A8 (p. 521), HLTH (p. 521)

**ACUP 2230 3 credits****Acupuncture Case Study**

Students will be presented with a variety of complex clinical cases focusing on internal medicine disease, gynecological disorders, pediatric disease, musculoskeletal, integumentary and sensory system disorders. They will determine Traditional Chinese Medicine Acupuncture (TCM) diagnosis, etiology and pathogenesis, differentiation of syndrome, principle treatment, acupuncture prescription and appropriate delivery method.

Level: UG

Prerequisite(s): ACUP 2130

Attributes: F2A8 (p. 521), HLTH (p. 521)

**ACUP 2240 3 credits****Acupuncture Tuina (Chinese style massage)**

Students will learn fundamental Tuina theories, clinical procedures and common manipulation techniques. They will study different techniques in combination with meridian and acupoint theory. Students will learn the application of acupressure/Tuina techniques for soft tissue injuries such as those of the knee joint, cervical, lumbar spine and limbs in a simulated lab setting.

Level: UG

Prerequisite(s): ACUP 1160 and ACUP 1230

Attributes: F2A8 (p. 521), HLTH (p. 521)

**ACUP 2280 4 credits****Acupuncture Practicum (Supervised II)**

Students will master interviewing skills with clients focusing on gathering information based on four Traditional Chinese Medicine (TCM) diagnostic skills. They will identify patterns, diagnose and propose an acupuncture prescription. Students will apply acupuncture techniques with supervision to treat clients.

Level: UG

Prerequisite(s): ACUP 2130 and ACUP 2180

Co-requisite(s): ACUP 2220, ACUP 2230, and ACUP 2240

Attributes: F2A8 (p. 521), HLTH (p. 521)

**ACUP 2300 2 credits****Acupuncture Musculoskeletal Management**

Students will study Traditional Chinese Medicine (TCM) practice principles and treatment methods in conditions related to musculoskeletal injury. They will learn physical examination procedures, differential diagnosis and treatment protocols. Students will also study the special physical examination of the vertebrae, hip joints and four extremities.

Level: UG

Prerequisite(s): ACUP 1160 and ACUP 2130

Attributes: F2A8 (p. 521), HLTH (p. 521)

**ACUP 2320 3 credits****Acupuncture Practice Transitions**

Students will learn how to practice as an acupuncturist and comprehensively review the theoretical and practical knowledge. Students will review documents provided by the College of Traditional Chinese Medicine Practitioners and Acupuncturists of British Columbia as well as the Pan-Canadian acupuncture licensing exam files, in preparation for their licensing exam.

Level: UG

Prerequisite(s): ACUP 2230

Attributes: F2A8 (p. 521), HLTH (p. 521)

**ACUP 2340 2 credits****Acupuncture Practice Management and Regulation**

Students will learn how to establish and manage a Traditional Chinese Medicine (TCM) clinic. They will explore business planning, marketing, record keeping, and confidentiality and privacy standards. Students will also learn legal aspects and scope of TCM practice, practice standards and professional ethics.

Level: UG

Prerequisite(s): ACUP 2150 and ACUP 2280

Attributes: F2A8 (p. 521), HLTH (p. 521)

**ACUP 2360 2 credits****Acupuncture Shiliao and Nutrition**

Students will learn Traditional Chinese Medicine (TCM) diet principles, focusing on the nature of food and their properties, taste, indications and contraindications in prevention and treatment of disease. They will study different functional recipes including food composition properties. Students will learn Western nutritional principles, focusing on how to identify, demonstrate safe food handling, preparation, cooking, as well as describe a healthy diet.

Level: UG

Prerequisite(s): ACUP 1100 and ACUP 1260

Attributes: F2A8 (p. 521), HLTH (p. 521)

**ACUP 2380 4 credits****Acupuncture Practicum (Independent)**

Students will consolidate learning in order to plan and implement appropriate acupuncture treatments. They will follow up on clients' conditions as well as make referrals as needed. They will present select clinical cases to their peers. Students will practice analytic skills for determining diagnoses, treatment modalities, duration and methods.

Level: UG

Prerequisite(s): ACUP 2220 and ACUP 2280

Co-requisite(s): ACUP 2300 and ACUP 2340

Attributes: F2A8 (p. 521), HLTH (p. 521)

## Agriculture (AGRI)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables/](http://www.kpu.ca/registration/timetables/) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**AGRI 1150 3 credits****Sustainable Agriculture for the 21st Century**

Students will study, through the lens of human enterprise sustainability, the aspects and ramifications of dominant and alternate agri-food system paradigms. They will examine agri-food systems from perspectives, such as environmental stewardship, food self-reliance, ethics, health, and nutrition. Students will compare, contrast, evaluate, and critique key concepts, elements, and outcomes of diverse agri-food system dimensions.

Level: UG

Attributes: ASTR (p. 523), SCIH (p. 521)

**AGRI 1250 4 credits****Foundations in Sustainable Agriculture**

Students will explore fundamental concepts of sustainable agriculture and food systems through hands-on activities on the research and education farm, in the agriculture lab as well as in the classroom. They will be introduced to the many facets of our food system from basics of soil science, crop production, food quality, processing and distribution. These concepts of sustainable agriculture and food science will be considered through the lens of environmental stewardship, food self-reliance, food justice, health and ethics.

Level: UG

Attributes: ASTR (p. 523), SCIH (p. 521)

**AGRI 1299 1 credit****Food System Field Analysis**

Students will visit and observe agri-food system farm processing and distribution enterprises in British Columbia. They will assess the function and operation of these enterprises and identify challenges and opportunities for advancing agri-food system sustainability. Students will explore ways to define, assess, and interpret factors that contribute to agri-food system sustainability. They will learn how factors interact and learn to weigh these factors in holistic agri-food system sustainability assessments, decision making, and planning processes.

Level: UG

Attributes: ASTR (p. 523), SCIH (p. 521)

**AGRI 2110 3 credits****Beekeeping**

Students will participate in a combination of classroom instruction and field observation/evaluation of honey bees. Students handling, or in close proximity to bees will be required to wear protective equipment and may be required to life equipment weighing up to 20 Kg. Students will participate in colony inspection, equipment assembly and honey collection during the course. The emphasis of the course will be hands-on seasonal management of honey bees, primarily in agricultural systems for the purpose of maintaining colony health and pollinating crops.

Level: UG

Prerequisite(s): 24 credits from courses at the 1100 level or higher

Attribute: SCIH (p. 521)

**AGRI 2190 3 credits****Plant Science**

Students will study basic fruit and vegetable crop plant anatomy, morphology, physiology, plant growth and development, reproduction, genetics and improvement methods. They will also study environmental (biotic and abiotic) and agroecosystem management interactions and their effects on crop growth, yield and quality.

Level: UG

Prerequisite(s): BIOL 1210

Attributes: ASTR (p. 523), SCIH (p. 521)

**AGRI 2220 4 credits****Soil Stewardship and Management**

Students will study the main characteristics of agricultural soils, their ecology and management with emphasis on understanding soil as a living system, in the context of the agro-ecosystem and as a precious natural resource. They will study soil formation and maturation processes, soil classification, physical and chemical characteristics of soils and how these influence suitability for and management in agriculture, soil water management, soil biology and ecology and soil conservation. Students will also study composting methods and compost use.

Level: UG

Attributes: ASTR (p. 523), SCIH (p. 521)

**AGRI 2230 3 credits****Sustainable Human Economy**

Students will learn about economic principles within the context of environmental, economic and social sustainability. They will study key principles and concepts of ecological and sustainable economics in comparison to classical and neo-classical economics.

Level: UG

Attributes: ASTR (p. 523), SCIH (p. 521)

**AGRI 2240 3 credits****Ecologically Based Pest Management**

Students will study common plant, insect, mite, bacterial, fungal, viral and vertebrate pests, and associated injury and or disease caused to common fruit and vegetable crop plants cultivated in the Pacific Northwest. They will study the agro-ecological basis for plant pest occurrence and plant response to infestation/infection. Students will study cultural, behavioral, biological, physical and chemical pest management methods and tools based on maintaining or enhancing agro-ecosystem integrity, function and sustainability. They will learn to identify/ diagnose arthropod, plant and microbial pests/ disease and develop appropriate integrated pest management strategies and action plans. They will also learn to distinguish between pathogenic and non-pathogenic plant disease.

Level: UG

Prerequisite(s): AGRI 2190 and BIOL 2322

Attributes: ASTR (p. 523), SCIH (p. 521)

**AGRI 2250 3 credits****Agriculture and Food Systems**

Students will study the history of agriculture. They will examine and compare different systems of food production such as traditional, industrial, organic, biodynamic, swidden, permaculture and garden agriculture in their historical, environmental, social and economic contexts.

Level: UG

Attributes: ASTR (p. 523), SCIH (p. 521)

**AGRI 2320 3 credits****Advanced Soil Management**

Students will understand and manage agricultural soils. They will learn soil conservation techniques, how to avoid losses through erosion, reduce the degradation of soil and the prevention and elimination of environmental pollution. They will learn how to increase soil fertility and health using appropriate soil amendments, organic fertilizers, cover cropping and tillage techniques. Learning to manage different soil types, students will understand how to optimize soil biological health and nutrition, soil water conservation, and water management such as irrigation and drainage.

Level: UG

Prerequisite(s): AGRI 2220

Attributes: ASTR (p. 523), SCIH (p. 521)

**AGRI 2500 6 credits****Design Thinking: Food System connectivity in Design, Business and Agriculture**

The study of agriculture-business and food systems facilitates transdisciplinary learning and research that is intimately linked to the understanding of sustainability and the cultures that they are embedded in. This Field School will provide opportunities for students to implement problem solving and critical thinking methodologies to help students develop an understanding of the important role that agriculture and food systems play in connecting all aspects of the economy, business, environment and society as well as the value of regional food systems. Students will visit farms and food related businesses locally, nationally and/or internationally. When studying food systems, students will compare and contrast financing, marketing, pricing and logistics of food production. NOTE: Students will spend two weeks at the Field School site in addition to class sessions on campus before and after travel. Students must be nineteen years or older at the start of the course. Students may earn credit for only one of DESN 2500, AGRI 2500 or BUSI 2500 as they are identical courses.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher

Cross-listing: DESN 2500

Attribute: SCIH (p. 521)

**AGRI 3135 6 credits****Business of Agriculture**

Students will examine the unique aspects of small scale agricultural business operations. They will study the critical factors involved in business development and management such as: goal setting, farm mapping and planning, business plan development, record keeping, employee management and marketing.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher, or permission of instructor.

Attribute: SCIH (p. 521)

**AGRI 3150 3 credits****Agriculture and Energy**

Learn to examine agriculture's role as a producer and consumer of energy in the context of the ecosystem, food system and economy. Potential management options to improve agricultural energy efficiency, reduce greenhouse gas emissions, and produce energy on farms through solar, wind, hydro, biopower, and biofuel technologies will also be explored.

Level: UG

Prerequisite(s): AGRI 1150 and AGRI 2250

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**AGRI 3225 3 credits****Experimental Design & Analysis**

Students will learn the fundamental principles of agricultural experimental design and analysis and prepare an applied research proposal.

Level: UG

Prerequisite(s): AGRI 1150, AGRI 1299 and MATH 1115

Attribute: SCIH (p. 521)

**AGRI 3260 3 credits****Animal Agriculture**

Students will study introductory and general principles and practices utilized for small and large animal production, with an emphasis on small scale, low input, integrated methods and objectives. They will study breeds and breeding, nutrition and health, reproduction, sheltering, growth and development, behavior, egg, meat and milk production, and integration of stock with cropping systems on sustainable farms.

Level: UG

Prerequisite(s): 60 credits

Attribute: SCIH (p. 521)

**AGRI 3270 3 credits****Vegetable Crop Production**

Students will study the principles and practices utilized to cultivate vegetable crops, emphasizing but not limited to southwest British Columbia production (topics include adapted and novel crops and cultivars, field preparation, seeding, soil and nutrition management, water management, pest management, crop plant growth and development, crop maturation and harvest and post-harvest handling). They will also study integrated cropping system planning and management.

Level: UG

Prerequisite(s): AGRI 2190 and AGRI 2220

Attribute: SCIH (p. 521)

**AGRI 3280 3 credits****Fruit and Nut Crop Production**

Students will study the principles and practices utilized in tree, small, bush, and cane fruit crops and nut crops cultivated in British Columbia (topics will include adapted and novel crops; climatic requirements; site selection and preparation; propagation; orchard, grove and patch planning and establishment; canopy management; pest, water, and fertility management; plant growth and development; crop maturation and harvest; and post-harvest handling and storage).

Level: UG

Prerequisite(s): AGRI 2190 and AGRI 2220

Attribute: SCIH (p. 521)

**AGRI 3290 3 credits****Agroecosystem Management I**

Students will study the integrated application of food crop production principles and practices in a laboratory farm setting. They will focus on late winter and spring operations including planning seasonal operations and plantings, equipment assessment and maintenance; procuring seed and plants; establishing orchard and field plantings; perennial crops canopy management; soil, nutrition, irrigation and pest management regimes.

Level: UG

Prerequisite(s): AGRI 2190, AGRI 2220 and AGRI 2240

Attribute: SCIH (p. 521)

**AGRI 3390 6 credits****Agro-Ecosystems Management II**

Students will build on the crop production principles and practices of integrated crop production covered in AGRI 3290. They will focus on spring and summer operations including work scheduling; transplant production; planting, transplanting, and direct seeding; fertility management; equipment use and maintenance; irrigation; pest management; weed management; warm season cover cropping; harvest; post-harvest management; and record keeping.

Level: UG

Prerequisite(s): AGRI 3290

Attributes: ASTR (p. 523), SCIH (p. 521)

**AGRI 3398 3 credits****Crop Physiology and Ecology**

Students will explore the interactions of plant communities with their environment across plant life cycles and the implications of this interaction on the quantity and quality of crop yield. Students will learn biochemical, physiological and ecological principles important to the growth and development of crops and interaction with the environment.

Level: UG

Prerequisite(s): AGRI 2190 and AGRI 2220

Attribute: SCIH (p. 521)

**AGRI 3399 3 credits****Research Project I**

Students will continue to build and design their applied research project from AGRI 3225. They will complete the development of a research proposal which includes a justification, detailed workplan and budget for the project and implement the research.

Level: UG

Prerequisite(s): AGRI 3225

Attribute: SCIH (p. 521)

**AGRI 3591 3 credits****Special Topics in Food Systems I**

Students will engage in intensive study of a specific topic, as determined by the student and supervising faculty, and approved by the department. Students will study under the supervision and mentorship of a faculty member with requisite expertise in the area of study. Students will delineate learning objectives, develop a detailed study plan, conduct studies and submit a report(s). Note: Students may repeat this course, to study different topics, for up to 6 credits total.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher

Attribute: SCIH (p. 521)

**AGRI 3599 3 credits****Directed Studies I**

Students will carry out the study of a specific subject in sustainable agriculture under the direct supervision of a faculty member who will delineate learning objectives. The student will develop a detailed study plan, conduct studies and submit a report(s) or satisfactorily complete other means of evaluation which will include exams. Note: Students may repeat this course, to study different subjects, for up to 9 credits total.

Level: UG

Prerequisite(s): Both (a) 60 credits from courses at the 1100 level or higher, and (b) permission of instructor.

Attribute: SCIH (p. 521)

**AGRI 4190 3 credits****Agro-Ecosystems Management III**

Students will continue to build on integrated crop production principles and practices learned in previous Agro-Ecosystems Management courses. They will focus on fall operations including work scheduling, late season planting, season extension, fertility management, equipment use and maintenance, pest management, cool season cover cropping, harvest, post-harvest management, and record keeping.

Level: UG

Prerequisite(s): AGRI 3390

Attribute: SCIH (p. 521)

**AGRI 4295 3 credits****Internship**

Students will identify and participate in an approved internship in the agriculture and food systems sector for a minimum of 120 hours with supervision from a Sustainable Agriculture faculty member. Students will work toward completing specific outcomes and maintain records of their experience and upon completion will prepare a written report and give an oral presentation on their experience.

Level: UG

Prerequisite(s): 15 credits, including AGRI 1150

Attribute: SCIH (p. 521)

**AGRI 4298 3 credits****World Trends in Agriculture**

Students will explore global trends in agriculture and the relationships between production practices, markets, community and the environment. They will study the shifts in agriculture that have occurred in major regions of the world and impacts that agricultural practices have had on the regions over time.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), SCIH (p. 521)

**AGRI 4299 3 credits****Research Project II**

Students will complete, analyze, and present their applied research project from the previous research project course.

Level: UG

Prerequisite(s): AGRI 3399

Attribute: SCIH (p. 521)

**AGRI 4591 3 credits****Special Topics in Food Systems II**

Students will engage in intensive study of a specific topic, as determined by the student and supervising faculty, and approved by the department. Students will study under the supervision and mentorship of a faculty member with requisite expertise in the area of study. Students will delineate learning objectives, develop a detailed study plan, conduct studies and submit a report(s). Note: Students may repeat this course, to study different topics, for up to 6 credits total.

Level: UG

Prerequisite(s): Both (a) 75 credits from courses at the 1100 level or higher, and (b) permission of instructor.

Attribute: SCIH (p. 521)

**AGRI 4599 3 credits****Directed Studies II**

Students will carry out the study of a specific subject in sustainable agriculture under the direct supervision of a faculty member who will delineate learning objectives. The student will develop a detailed study plan, conduct studies and submit a report(s) and/or satisfactorily complete other means of evaluation which will include exams. Note: Students may repeat this course, to study different subjects, for up to 9 credits total.

Level: UG

Prerequisite(s): Both (a) 90 credits from courses at the 1100 level or higher, and (b) permission of instructor.

Attribute: SCIH (p. 521)

**ANTH 1100 3 credits****Social & Cultural Anthropology**

Students will study the interrelationships among culture, community and well-being. They will examine the diversity of human thought and behaviour in cross-cultural perspective. Students will focus on topics such as ethnography, gender, marriage and kinship, culture and adaptive strategies, social and political organization, religion and world view, and globalization.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_3 (p. 522)

**ANTH 1200 3 credits****Biological Anthropology**

Students will explore human ancestry, fossil hominids, non-human primates, and modern human physical variation. They will examine how we have evolved to become modern people and how our bodies and behaviour have been changed and shaped over millions of years. Students will gain knowledge of the theories of Charles Darwin together with the modern synthesis of his ideas, which show how our genes have evolved in response to our environment.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), QUAN (p. 532)

**ANTH 1217 3 credits****Forensic Anthropology**

Students will study forensic anthropology in order to identify unknown human skeletal remains for legal purposes. They will learn techniques for assessing the age-at-death, stature, and sex. Students will also explore the validity of determining "race" or "genetic heritage" based on biological remains. Students will analyze the skeleton to the level of individual identity by understanding how disease, trauma, and behavioural patterns can leave their mark on bones and teeth, through an examination of the application of forensic anthropology in particular investigative cases. They will also learn how cause and manner of death, and the postmortem interval affect the ability to apply forensic anthropological techniques.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), QUAN (p. 532)

**ANTH 1300 3 credits****Archaeology**

Students will analyze the various methods and perspectives used by archaeologists to study ancient cultures from around the world. They will examine the major branches of modern archaeology, as well as the historical development of the discipline. Students will learn how archaeological sites form and become preserved over long periods of time, and will discover how archaeological data are collected and analyzed through survey, excavation and dating methods. They will learn methods used to reconstruct both the economic and sociopolitical organization of ancient societies through analysis and critical discussion. Students will survey world prehistory and critically evaluate the effectiveness of the various methods and approaches studied. Students may earn credit for only one of ANTH 1300 or ANTH 1112, as they are equivalent courses.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

## Anthropology (ANTH)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**ANTH 2100 3 credits****Methods & Ethics in Anthropology**

Students will conduct an overview of anthropological methods such as cross-cultural comparisons, multi-sited ethnography, participant observation, surveys, archival research, media analysis, narrative, collaborative ethnography, and visual analysis. They will critically explore ethical issues that have emerged within ethnographic research while they apply methods to case study examples.

Level: UG

Prerequisite(s): ANTH 1100

Attributes: ASTR (p. 523), ARTS (p. 521)

**ANTH 2120 3 credits****Cross-Cultural Women's and Gender Studies**

Students will use a cross-cultural perspective to explore the concept of gender; the cultural construction of gender roles and identities; and gender relations as a dimension of culture, politics and society. They will critically examine anthropological approaches to gender from early studies that overlooked women to feminist anthropology and research on masculinities and gender diversity. The class will investigate political and cultural responses to gender inequality and discrimination in diverse cultural contexts.

Level: UG

Prerequisite(s): ANTH 1100

Attributes: ASTR (p. 523), ARTS (p. 521)

**ANTH 2133 3 credits****Religion, Magic, and Witchcraft**

Students will investigate the broadly defined interrelationships between culture and religious beliefs, and practices. They will focus on topics such as religious symbols, magic, and witchcraft; rites of passage; spirit possession; and religion in popular culture.

Level: UG

Prerequisite(s): ANTH 1100

Attributes: ASTR (p. 523), ARTS (p. 521)

**ANTH 2140 3 credits****Indigenous Peoples in British Columbia**

Students will examine the anthropology of Indigenous Peoples in British Columbia, including archaeology, history and cultural studies. They will be using language and culture areas as a basis for a regional understanding of the diverse Indigenous Peoples of British Columbia. Students will also come to understand the importance of health, well-being and other contemporary issues. They will find it especially important to understand these ideas in order to examine the current debates regarding lands, resources, treaty rights, and the rationale and history behind the modern treaty negotiations in British Columbia, as distinct from the rest of Canada. Students may earn credit for only one of ANTH 2140 or ANTH 1220, as they are equivalent courses

Level: UG

Prerequisite(s): ANTH 1100 or 1300

Attributes: ASTR (p. 523), ARTS (p. 521)

**ANTH 2142 3 credits****Indigenous Peoples in Canada**

Students will explore the diversity of Indigenous peoples and cultures across Canada. They will examine cultural transformations resulting from European colonization and Indigenous resistance to it, including treaty processes, the Indian Act, and Indigenous rights. They will investigate contemporary Indigenous lifeways and activism related to decolonization and cultural and linguistic revitalization. Students may earn credit for only one of ANTH 2142 or ANTH 1260, as they are equivalent courses.

Level: UG

Prerequisite(s): ANTH 1100 or 1300

Attributes: ASTR (p. 523), ARTS (p. 521)

**ANTH 2160 3 credits****Culture and the Environment**

Students will analyze competing definitions and interpretations of social and physical environments, from various cultural groups around the globe. They will examine the complexity of human relationships with the environment in a world where conflicting cultural systems are often competing for survival. Students will learn to appreciate actions that are crucial to the well-being of environments and the adaptive strategies of threatened cultures.

Level: UG

Prerequisite(s): ANTH 1100, 1200, or 1300

Attributes: ASTR (p. 523), ARTS (p. 521)

**ANTH 2163 3 credits****Culture, Health and Well-Being**

Students will investigate the interrelationships among culture, community and well-being. They will explore anthropological topics such as healing systems; culture, spirituality, and well-being; the language of distress; social suffering; and, practitioner-patient interactions.

Level: UG

Prerequisite(s): ANTH 1100

Attributes: ASTR (p. 523), ARTS (p. 521)

**ANTH 2190 3 credits****Non-Governmental Organizations in Context**

Students will study the role of NGOs (Non-Governmental Organizations), understood to be not-for-profit or 'third sector' organizations concerned with addressing problems of poverty, social justice and/or the environment. They will explore the concepts of global civil society and emerging features associated with social, cultural, economic, and political activity that operate alongside but outside of state and market processes. They will come to understand the various roles that NGOs fill in providing services, promoting particular values, forming the basis for community self-help initiatives or campaigning on public issues. Students will analyze, and demonstrate their familiarity with organizational behaviours and practices.

Level: UG

Co-requisite(s): ANTH 1100

Attributes: ASTR (p. 523), ARTS (p. 521)

**ANTH 2217 3 credits****Forensic Methods & Analysis**

Students will explore scientific hypothesis testing by performing experiments that evaluate current forensic methods. They will study several forensic fields such as: metric measurement, fingerprint examination, image analysis (including photographs and x-rays), bone trauma analysis, and discriminating human from animal bone. Students will participate in a one-day outdoor archaeological excavation exercise. They will apply the information learned in the course to practice the techniques associated with the recovery & analysis of material evidence & human remains. Students will also reflect on the ethical dilemmas involved in the integration of scientific, anthropological, archaeological, and legal testimony in professional reports and in the court system.

Level: UG

Prerequisite(s): ANTH 1217

Attributes: ASTR (p. 523), ARTS (p. 521), QUAN (p. 532)

**ANTH 2300 3 credits****Archaeological Methods**

Students will conduct an in-depth review of current methods in anthropological archaeology. They will examine the historical development of the discipline and study the nature of the archaeological record, including categories of data and site formation processes. Students will study research design, data collection, dating methods and classification of artifacts. They will critically evaluate methods used to examine prehistoric technology, environmental reconstruction, subsistence and diet, and trade patterns.

Level: UG

Prerequisite(s): ANTH 1300

Attributes: ASTR (p. 523), ARTS (p. 521)

**ANTH 2310 3 credits****Archaeology of Death**

Students will examine the key concepts and methods used to analyze the funerary rituals and burial practices of ancient and recent societies. They will examine the theories and methods used by archaeologists to understand the social and ideological aspects of mortuary behavior. Students will study various forensic techniques used to analyze human remains from ancient and recent burials, and critically analyze the kinds of information they provide. They will also examine the ethical issues involved in the analysis of human remains from archaeological sites from a variety of different perspectives.

Level: UG

Prerequisite(s): ANTH 1100, 1217, or 1300.

Attributes: ASTR (p. 523), ARTS (p. 521)

**ANTH 2320 3 credits****Archaeology of the Old World**

Students will be introduced to Old World Prehistory from the development of agriculture to the rise of complex state societies. They will examine and critically evaluate the major theories that attempt to explain the rise of early farming communities and become familiar with the range of diversity in ancient food production systems in several areas of the Old World. Students will also become familiar with and critically evaluate the kinds of evidence used by archaeologists, and researchers in other related disciplines, to document and explain the different cultural and economic pathways taken by Old World peoples. Attention will also be placed on how changes in the economic practices of these ancient cultures led to major social changes such as the rise of social inequality, trade, conflict and environmental degradation in many regions. Part of the course content will also involve overviews of the ancient civilizations of: Egypt and Mesopotamia; the early states of Europe; the evolution of Indus Valley civilizations and the early states of East and Southeast Asia. Students will critically evaluate the theories and methods of data analysis used to study these ancient cultures and develop their own theories and ideas from a more modern global perspective. Students may earn credit for only one of ANTH 2320 or ANTH 1215, as they are equivalent courses.

Level: UG

Prerequisite(s): ANTH 1300

Attributes: ASTR (p. 523), ARTS (p. 521)

**ANTH 2340 3 credits****Archaeology of the Americas**

Students will examine the archaeological record of North and South America. They will examine culture history of the indigenous groups from these continents. Cultures or geographical areas examined can include the Inka, Aztec, Maya, Moche, Nazca, Amazonia, Norte Chico, Olmec, Hopewell, Haudenosaunee, Northwest Coast, Ancestral Pueblo, or others. Students will also critically examine theoretical or ethical problems particular to the archaeology of the Americas, including the impact of colonialism, the first peopling of the continents, the role of descendent communities in archaeology, and the evolution of urban societies, language, and agriculture. Students may earn credit for only one of ANTH 2340 or ANTH 1216, as they are equivalent courses.

Level: UG

Prerequisite(s): ANTH 1300.

Attributes: ASTR (p. 523), ARTS (p. 521)

**ANTH 3100 3 credits****Anthropological Theory**

Students will develop their understanding of how cultural anthropologists use social theory in conducting research, interpreting social processes, and writing ethnography. They will examine how political, intellectual, and cultural contexts have influenced the historical development of anthropological theory. Students will study theoretical writings and ethnographies that reflect a range of theoretical perspectives, time periods, geographical regions, and ethnographic genres. Note: This is a seminar course.

Level: UG

Prerequisite(s): 9 credits including (a) ANTH 2100 and (b) 6 credits from courses in ANTH at the 2000 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ANTH 3150 6 credits****Ethnographic Field Studies**

Students will examine and practice the techniques and ethical conduct of ethnographic research in Cultural Anthropology, building on previous knowledge and experience. They will develop, plan, conduct, and present the results of individual or small group original ethnographic research projects related to an identified theme. Note: This course is only offered as part of an ethnographic field school and will involve an additional fee. Level: UG

Prerequisite(s): 45 credits from courses at 1100 level or higher, including ANTH 1100, and permission of the Departmental Selection Committee.

Attributes: ASTR (p. 523), ARTS (p. 521)

**ANTH 3160 3 credits****Environmental Activism**

Students will analyze competing definitions and interpretations of social and physical environments, in both urban and rural contexts. They will examine the complexity of human connections to the environment, in a globalized world where conflicting cultural systems often come into play. Students will learn to appreciate how the adaptive strategies of threatened cultures function in the current context, with specific reference to Indigenous rights. Note: Students who have taken ANTH 2160 may not take ANTH 3160 for further credit.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including one of the following: ANTH 1100, ANTH 1200, or ANTH 1300.

Attribute: ARTS (p. 521)

**ANTH 3168 3 credits****Deviance Across Cultures**

Students will learn that although crime and deviance occur in all societies, they are not defined or treated in the same way from place to place. They will study anthropological concepts and theories to examine deviance from a cross-cultural perspective. Students will survey topics such as banditry and terrorism, criminal organizations, 'treasure hunting' on archaeological sites, deviance in folklore and popular culture, and social control.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including ANTH 1100.

Attributes: ASTR (p. 523), ARTS (p. 521)

**ANTH 3188 3 credits****Visual Anthropology**

Students will examine the primary aspects of visual anthropology. They will focus on anthropological representations of the interrelationships among culture, society, and the individual through the written and spoken word, still photographs, film, and digital media. Students also will critically apply anthropological concepts and ideas to the study of culture and the politics of representation in popular culture.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher, including ANTH 1100.

Attributes: ASTR (p. 523), ARTS (p. 521)

**ANTH 3190 3 credits****Non-Governmental Organizations in Practice**

Students will carry out a detailed investigation of an NGO (Non-Governmental Organization), understood to be a not-for-profit or 'third sector' organization concerned with addressing problems of poverty, social justice, and the environment. They will complete a case study of a particular organization, or of a particular set of problems that surround a group of organizations. Students will submit original research and analysis. They will also develop an understanding of how stakeholders work towards the solution of social, political, and/or environmental problems.

Level: UG

Prerequisite(s): ANTH 2190

Attributes: ASTR (p. 523), ARTS (p. 521)

**ANTH 3211 3 credits****Forensic Science: Fact and Fiction**

Popular forensic science television programs have generated believable misrepresentations of forensic science that have become known as "The CSI Effect". Students will go through a process of discovery to determine which information is an accurate portrayal of forensic science in popular culture. The exploration of various forensic science fields of study will introduce students to the practical and logistical applications of forensic methods. Another aspect of this course focuses on the differences between the Canadian and American legal systems. These differences have a tremendous impact on expert witness testimony; in particular, the interpretation of forensic science evidence. Furthermore, our Americanized academic literature rarely reflects these legal system distinctions.

Level: UG

Prerequisite(s): ANTH 1217 or BIOL 1110

Attributes: ASTR (p. 523), ARTS (p. 521)

**ANTH 3220 3 credits****Human Osteology**

Students will interpret the intricacies of the human skeleton through the identification of complete and fragmentary skeletal and dental elements. They will study additional topics that include skeletal growth and development, the identification of the normal range of variation in human skeletal anatomy, and distinguishing human from animal bones. They will also appraise the form and function of soft tissue attachments on bones, in order to determine individualizing characteristics such as age-at-death and sex. Notes: This course should be considered essential if students are planning future work in the interpretation of modern and archaeological human remains. This course is lab intensive.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including ANTH 1200 and ANTH 1217.

Attribute: ARTS (p. 521)

**ANTH 3242 3 credits****A Survey of the Primates**

Students will study the diversity, behaviour, and conservation status of a group of mammals called primates. They will better understand humans by exploring the social organization, social interactions, and ecology of non-human primates. Students will consider the implications of the high number of non-human primate species that are at risk of extinction by exploring the ethical and conservation issues arising from human activities such as the pet trade and the use of non-human primates for medical experiments. They will begin to recognize the significant connection between the animal and human world.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, and either (a) ANTH 1200 or (b) BIOL 1110 and BIOL 1210.

Attributes: ASTR (p. 523), ARTS (p. 521)

**ANTH 3300 3 credits****Archaeological Theory**

Students will analyze the development and application of theory in archaeological research. Students will trace the historical development of archaeological theory from a cross-cultural perspective. They will study the culture history, processual, and post-processual paradigms and examine how they have influenced the development of contemporary theory. Students will critically analyze theories of culture change, cognition, gender and ethnicity, and how they are applied to actual archaeological data sets. Students will assess the importance of ethics, cultural resource management, and public relations in conducting research within the context of a modern world. Note: This is a seminar course.

Level: UG

Prerequisite(s): One of: ANTH 2142, 2217, 2310, 2320 or 2340.

Attributes: ASTR (p. 523), ARTS (p. 521)

**ANTH 3301 3 credits****Archaeological Methods for Cultural Resource Management**

Students will develop a hands-on understanding of several aspects of archaeological methodology central to cultural resource management (CRM) work. They will learn to apply these quantitative and qualitative methods to the analysis of archaeological and landscape data, including how to report and organize the results of these analyses. Students will also be tasked with other important aspects of methodology in CRM, which include mapping, site forms, reporting, budgets, and proposals. NOTE: This course is co-requisite with ANTH 3361 and offered as field school studies during summer term. Students may earn credit for only one of ANTH 3301 or ANTH 2301.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher, including ANTH 1300.

Co-requisite(s): ANTH 3361

Attributes: ASTR (p. 523), ARTS (p. 521)

**ANTH 3330 3 credits****East Asian Archaeology**

Students will study the origins and development of complex societies in East Asia. They will analyze the archaeology of China, Korea, and Japan, including an exploration of key issues in cultural evolution and interaction. Students will examine major topic areas such as: early human migrations into the region; early foraging economies; the development of food production; and the evolution of social complexity. Students will critically analyze the current methods and theories used by archaeologists in studying the evolutionary development of East Asian civilizations. Students will examine the modern cultural context of prehistory in East Asia as a source of discussion on ethnic identity.

Level: UG

Prerequisite(s): ANTH 2320 or ANTH 2340

Attributes: ASTR (p. 523), ARTS (p. 521)

**ANTH 3340 3 credits****British Columbia Archaeology**

Students will examine the pre-contact and proto-historic archaeology and cultures of British Columbia's aboriginal peoples. They will study the environmental adaptations and complex cultural developments of both interior and coastal groups, and will develop an understanding of the great diversity and depth of B.C.'s native cultures. Students will critically analyze the theories and archaeological evidence of prehistoric cultural developments in the area from the earliest occupations up to contact with Europeans and Americans. Note: This course is usually offered as field school studies during summer term.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher, including ANTH 1300.

Attributes: ASTR (p. 523), ARTS (p. 521)

**ANTH 3361 6 credits****Archaeological Field Studies**

Students will study and practice the basic techniques of archaeological survey and excavation. They will learn and examine field techniques such as site survey and mapping; GPS data collection, mapping, and analysis; excavation methodology; analysis of site stratigraphy; and the proper documentation, collection and curation of field data. Students will examine how archaeological remains are cleaned, sorted and properly stored in the laboratory and will apply preliminary data analysis methodology. Note: This course consists of a six-week field studies project and is offered only during the summer term.

Level: UG

Prerequisite(s): Both (a) 30 credits from courses at the 1100 level or higher, including ANTH 1300 or equivalent, and (b) permission of the department selection committee.

Co-requisite(s): ANTH 3301

Attributes: ASTR (p. 523), ARTS (p. 521)

**ANTH 3501 3 credits****Special Topics in Cultural Anthropology**

Students will examine a selected topic in Cultural Anthropology. They will critically analyze relevant literature and develop a comprehensive understanding of particular theories, methods, and themes. Students will question and evaluate recent developments in the topic area and debate future directions of possible study. Note: The specific course content will be established in advance by the instructor. Students may take this course multiple times for further credit on different topics.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including ANTH 1100.

Attribute: ARTS (p. 521)

**ANTH 3502 3 credits****Special Topics in Biological Anthropology**

Students will engage in an intensive study of the human physical form by studying a special topic selected by the instructor. They will explore a topic in one of the major focus areas within biological anthropology such as: forensic anthropology (an applied aspect); evolution and heredity; non-human primate studies; human evolution; or modern human biological variation. Students will examine and evaluate recent developments in the specific focus area, assess the implications of these developments, and identify future research directions in order to determine what it means to be a member of the human species. Note: Please check with the department for proposed offerings and the specific prerequisite. Students may take this course multiple times for further credit on different topics.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including ANTH 1200 or 1217.

Attribute: ARTS (p. 521)

**ANTH 3503 3 credits****Special Topics in Archaeology**

Students will study particular aspects of archaeology selected by the instructor. They will examine how archaeology attempts to document and interpret the course of human cultural evolution and to trace the development of cultural traditions in various areas of the world by studying a current issue in archaeology. Student emphasis will be on the methodological, technical, and scientific literature relating to archaeological interpretation. Notes: The area of study will be established in advance by the department. Please check with the department for proposed offerings. Students may take this course multiple times for further credit on different topics. This is a seminar course.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including ANTH 1300.

Attributes: ASTR (p. 523), ARTS (p. 521)

**ANTH 3510 3 credits****Anthropology of Genocide**

Students will examine the anthropological approach to the study of genocide which is a unique multidisciplinary approach due to the contribution of each subfield of anthropology. They will examine the following topics: why anthropology is so well situated to inform the discourse and research on genocide; the definition of genocide and ethnocide; the nature of human aggression from the perspective of our nearest animal relatives; the limitations of forensic investigations in documenting crimes against humanity for future generations; cultural issues, including racial, ethnic and religious concerns; historical and contemporary political issues (local, national, regional, and global through an examination of the United Nations, and other non-government organizations); modern literature and popular culture; and healing processes. Students will, using case examples from Canada and across the globe, investigate the necessity for a multi-disciplinary approach to this problem.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including ANTH 1100, 1200, 1217 or 1300.

Attribute: ARTS (p. 521)

**ANTH 4101 3 credits****Contemporary Readings in Anthropology**

Students will, at an advanced level, study a problem of current concern in anthropology. Students will synthesize current themes and debates arising from a variety of perspectives either about, or within, anthropology. They will study anthropology in institutional and/or applied contexts, by acknowledging the origins of anthropological methodology as well as recognizing its current demands. Students will identify real-life problems through discussion, literature review, and practical observation. They will determine ongoing areas of research that they may utilize for future study or job-related research.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including both of (a) ANTH 1100 and (b) 3 ANTH credits.

Attributes: ASTR (p. 523), ARTS (p. 521)

**ANTH 4500 3 credits****Culture, Community, & Well-Being**

Calendar Description: Students will bring together a number of theories, methods, and themes in anthropology. They will utilize a multidisciplinary approach to examine contemporary issues and they will address the contributions of a number of fields of study to further explore the department focus on "Culture, Community, and Well-Being". Students will explore topics such as Indigenous studies; gender & women's studies; biological, medical & environmental anthropology; methods & ethics in anthropological research; human rights issues; audio-visual anthropology; religion and spirituality; and specific geographic area studies with an emphasis placed upon the holistic and applied approach to anthropology. NOTE: This is a seminar course.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including 6 credits from courses in ANTH

Attribute: ARTS (p. 521)

**ANTH 4501 3 credits****Selected Problems in Anthropology**

Students will engage in the study of a particular issue in the field of anthropology. They will analyze critically the relevant literature and attendant ethical problems, and examine public awareness of the issue, thereby developing a comprehensive understanding of disciplinary considerations. Students will evaluate recent developments in methods and particular approaches, assess the implications of these developments, and identify future directions for the field of anthropology itself.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including 6 credits from ANTH.

Attribute: ARTS (p. 521)

**ANTH 4502 3 credits****Regional Focus in Anthropology**

Students will carry out a detailed investigation of a particular region, as identified by the course instructor. They will use specific anthropological approaches to provide insights into the society and culture of the specified region. They will be required to identify relevant sources of information, provide a summary of the literature and develop a discussion of relevant problems. Note: Students may take this course multiple times for further credit on different topics.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including 6 credits from ANTH

Attribute: ARTS (p. 521)

**ANTH 4510 3 credits****Applied Research in Anthropology**

Students will complete an applied research project in a particular anthropological subfield, and will analyze critically issues relating to the conduct of applied anthropology. Students will utilize and apply anthropological methods to a particular real world problem, possibly including action research, advocacy anthropology, culture resource management (CRM), methodological design, or a forensic human identification problem.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including ANTH 1200 and 1217.

Attribute: ARTS (p. 521)

## Appliance Servicing (APPL)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**APPL 1110 5 credits****Basic Electricity**

Students will study the basic theory of electricity and the principles of electromagnetism. They will perform practical applications on motors, circuits, switches, and other components, while learning to practice safe and correct use of the basic tools and test equipment in the appliance servicing industry. Students will also learn customer relations skills.

Level: VO

Attribute: TRAD (p. 521)

**APPL 1115 1 credit****Basic Electronics**

Students will learn the fundamentals of electronics as they relate to appliance repairs. They will apply the theory of diodes, silicone controlled rectifiers, and triacs in lab experiments using the multimeter and oscilloscope.

Level: VO

Prerequisite(s): APPL 1110

Attribute: TRAD (p. 521)

**APPL 1120 1 credit****Ancillary Products**

Students will test and repair garbage disposers, trash compactors, and electric water heaters. They will master all procedures and safety practices to current Canadian Industrial Standards.

Level: VO

Prerequisite(s): APPL 1110

Attribute: TRAD (p. 521)

**APPL 1125 3 credits****Electric Dryers**

Students will study the operation and repair of common makes of household electric dryers. They will use schematic diagnostic techniques and flow charts to trouble-shoot faults and will make repairs to current Canadian Industrial Standards.

Level: VO

Prerequisite(s): APPL 1110

Attribute: TRAD (p. 521)

**APPL 1130 5 credits****Electric Ranges: Standard and Self-Cleaning**

Students will study the operation and repair of standard and self-cleaning household ranges and wall ovens. They will apply a series of systematic procedures with the use of testers to trouble-shoot to current Canadian Industrial Standards.

Level: VO

Prerequisite(s): APPL 1110

Attribute: TRAD (p. 521)

**APPL 1210 5 credits****Automatic Washers**

Students will focus on installation, diagnosis and repair of automatic washers. They will follow flowcharts and schematic diagrams to trouble-shoot problems and will perform repairs to current Canadian Industrial Standards.

Level: VO

Prerequisite(s): APPL 1110

Attribute: TRAD (p. 521)

**APPL 1215 3 credits****Automatic Electric Dishwashers**

Students will focus on the installation and repair of automatic electric dishwashers. They will follow flow charts and schematic diagrams to troubleshoot electrical and mechanical problems and perform repairs to current Canadian Industrial Standards.

Level: VO

Prerequisite(s): APPL 1110

Attribute: TRAD (p. 521)

**APPL 1220 5.5 credits****Basic Refrigeration and Domestic Air Conditioning**

Students will focus on the theory, testing, diagnosis, and repair of domestic refrigeration units and domestic air conditioners. They will apply systematic procedures to analyze and repair refrigerators to meet current Canadian Industrial Standards.

Level: VO

Prerequisite(s): APPL 1110

Attribute: TRAD (p. 521)

**APPL 1225 1.5 credits****Work Experience Practicum**

Students will apply theoretical and practical experience learned during program in a workplace environment with an appliance sector employer of the student's choosing.

Level: VO

Prerequisite(s): APPL 1115 and 1120 and 1125 and 1130 and 1210 and 1215 and 1220

Attribute: TRAD (p. 521)

**APPL 1230 1.5 credits****Microwave Ovens**

Students will study the theory and practice the safe installation, testing, and repair of microwave ovens. They will trouble-shoot and repair mechanical and electrical faults to current Canadian Industrial Standards.

Level: VO

Prerequisite(s): APPL 1110

Attribute: TRAD (p. 521)

**APPL 1235 2.5 credits****B.C. Provincial "C" Gas Certificate**

Students will study the basic theory and practices of the administration and regulations of the B.C. Gas Act. They will study the properties of gases, piping, regulators, burners (pilot & atmospheric), flame characteristics, orifices, combustion, air supply, venting, basic electricity, flame safety, operating valves, propane cylinders and servicing. Students will learn safety, and the use of basic tools and meters in gas servicing.

Level: VO

Prerequisite(s): APPL 1110

Attribute: TRAD (p. 521)

## Applied Business Technology (ABTY)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**ABTY 1140 3 credits****Keyboarding and Word Processing for Academic Writing**

Students will develop touch control of the keyboard and correct keyboarding techniques and will learn word processing features for writing research papers and reports.

Level: VO

Attribute: BUSI (p. 521)

**ABTY 1141 3 credits****Keyboarding and Introductory Word Processing**

Students will develop touch control of the keyboard and correct keyboarding techniques. They will be introduced to Windows and the Internet and they will learn basic word processing features and basic file management.

Level: VO

Attribute: BUSI (p. 521)

## Applied Communications (CMNS)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**CMNS 1101 3 credits****Foundations of Business Communications**

This course provides international students with an understanding of expectations of communication in a Canadian business environment, while developing the foundational skills, strategies, and communication practices essential for business education in Canada. Students will be introduced to basic communication strategies, with emphasis on grammar and syntax, current conventions for business correspondence, improving intercultural communication fluency, and oral communication.

Level: UG

Co-requisite(s): BUSI 1101

Credit Exclusion: CMNS 1110

Attributes: ASTR (p. 523), BUSI (p. 521), PW\_3 (p. 522)

**CMNS 1110 3 credits****Fundamentals of Business Communication**

Students will be introduced to the interactive relationship between context, message, audience, and purpose in workplace writing. In the process, they will learn basic strategies, with emphasis on grammar and syntax, and current conventions for correspondence and short reports, research and documentation, integration of visual elements. Students will also learn oral report preparation and presentation skills, which they will demonstrate through in-class presentations.

Level: UG

Credit Exclusion: CMNS 1101

Attributes: ASTR (p. 523), BUSI (p. 521), PW\_2 (p. 522)

**CMNS 1120 3 credits****Applied Oral Communications**

Students will study the theories, principles and applications of oral communications, and apply these theories and principles to design, develop and deliver effective oral presentations for a variety of contexts.

Level: UG

Prerequisite(s): English 12 or TPC 12 or ABEE 0091 or PSPE 1091 or ENGP 1091 or LPI 26 or ELST 0381 and 0386 with a B) or ENGL 1099 or ENGQ 1099 or CMNS 1110 or 1105 or Kwantlen English Assessment Test Placement

Attribute: BUSI (p. 521)

**CMNS 1140 3 credits****Introduction to Professional Communication**

Students will learn how to analyze context and audience, determine purpose, message content, visual design and media in order to create written workplace messages that can be received, understood, used and retrieved with speed and accuracy.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521)

**CMNS 1216 1.5 credits****Writing for the Specialized Workplace 1**

Students will learn how to analyze audience and context in order to communicate effectively in specialized workplace environments which require sensitivity and the ability to tailor messages for audiences with different, often conflicting, needs and priorities. They will learn basic communication strategies, document conventions, resume design, visual design techniques, and correct language usage. The course will be delivered partially online.

Level: UG

Attributes: BUSI (p. 521), F2A2 (p. 521)

**CMNS 1217 1.5 credits****Writing for the Specialized Workplace 2**

Students will learn how to analyze audience and context in order to communicate effectively in specialized workplace environments involving persuasion, collaboration and conflict resolution. They will learn basic research strategies, teamwork strategies, page design for specialized document creation, and conflict resolution approaches. The course will be delivered partially online.

Level: UG

Prerequisite(s): CMNS 1216

Attributes: BUSI (p. 521), F2A2 (p. 521)

**CMNS 2140 3 credits****Communications For Design Professionals**

Students will learn the written and oral communication skills required by marketing design professionals to develop, manage, and communicate complex information in their professional practice. Students will learn the basis of client and project management in agency and organizational contexts, and the principles, theories and techniques required for designing, developing and communicating creative marketing briefs, proposals, reports, and oral pitch presentations.

Level: UG

Prerequisite(s): ENGL 1100

Attributes: ASTR (p. 523), BUSI (p. 521)

**CMNS 3000 3 credits****Advanced Professional Business Communications**

Students will study communications theories and then prepare audience-centred correspondence, proposals, business plans, executive summaries, reviews, commentaries, complex analytical reports and presentations. They will complete written assignments that emphasize critical thinking, writing, and visual literacy.

Level: UG

Prerequisite(s): 36 credits including CMNS 1140 and ENGL 1100

Cross-listing: ENTR 3000

Attribute: BUSI (p. 521)

**CMNS 3100 3 credits****Technical Report Writing**

Students will learn written and oral communication skills required by behavioural science professionals to develop, manage, and communicate complex information in their professional practice. They will learn the principles, theories, and techniques required for designing, developing, and communicating proposals, reports, and project plans, and will apply them to written and oral projects integrated within a project management framework throughout the course.

Level: UG

Prerequisite(s): ENGL 1100 and 3 credits of any 1200 level ENGL course

Attribute: BUSI (p. 521)

**CMNS 3120 3 credits****Persuasive Writing and Speaking**

Students will learn the principles of persuasion and apply them to strategic conversations, dialogues and documents with a variety of audiences. They will also learn rhetorical strategies and techniques that include various ways to identify audience needs, stimulate audience attention, spark audience interest and generate appropriate actions from targeted audiences.

Level: UG

Prerequisite(s): CMNS 1140 and 45 credits of 1000 and 2000 level courses

Attribute: BUSI (p. 521)

**CMNS 3130 3 credits****Theories of Human Communication**

Students will examine the history of human communication, from oral to print to digital media, as that history is reflected in modern theories and practices among individuals and within organizations. They will learn techniques to apply traditional and contemporary communication theories as those theories relate to professional contexts.

Level: UG

Prerequisite(s): CMNS 1140 and 45 credits of 1000 and 2000 level courses

Attribute: BUSI (p. 521)

**CMNS 3250 3 credits****Digital Media Communication**

Students will examine principles and practices of traditional and emergent online digital media. They will learn how to evaluate and choose the most appropriate media to deliver a specific message to a target audience. Students will learn how to develop, analyze, and evaluate products such as social media initiatives, media kits, and customer relations management applications.

Level: UG

Prerequisite(s): CMNS 1140 and 45 credits of 1100 courses or higher

Attribute: BUSI (p. 521)

**CMNS 3800 3 credits****Managing Project Communications**

Students will learn how to plan, develop and manage the communications process from inception to completion. They will apply critical-path methodology, document control, human-resource management and conflict-resolution techniques to team- and multi-authored documentation projects.

Level: UG

Prerequisite(s): CMNS 1140 and 45 credits of 1100 or higher level courses

Attribute: BUSI (p. 521)

**CMNS 4250 3 credits****Communications Research**

Students will conduct primary and secondary research using tools they develop such as surveys, focus groups, observations and interviews. They will be required to manage their quantitative and qualitative data and interpret their results. Students will also learn to collect, interpret and use information taken from subject matter experts, journals and informational databases in order to support their written communications and publications.

Level: UG

Prerequisite(s): CMNS 3130

Attribute: BUSI (p. 521)

**CMNS 4300 3 credits****Internal Communications**

Students will investigate the role of employee communications in organizations by integrating concepts of human resource management and motivational theory. They will focus on common principles and practices of effective internal organizational communications. Students will learn to manage issues through top-down, bottom-up, peer-to-peer and interdepartmental communications. They will learn how to integrate internal communications plans and audits into the overall communications efforts of organizations, either through work projects in real-life organizations or simulated case studies.

Level: UG

Prerequisite(s): CMNS 1140 and ENTR 3000, 3 credits of a first year ENGL course and 9 credits of courses at the 3000 level or above

Attribute: BUSI (p. 521)

**CMNS 4400 3 credits****External Communications**

Students will analyze principles and implement techniques for communication with diverse audiences, using written and visual media, and various social media platforms. Upon completion of the course, students will know how to coordinate organizational efforts to develop an external communications plan (based on real and/or simulated situations) aimed at government regulators, media, community groups, relevant organizations, investors, and/or the public.

Level: UG

Prerequisite(s): CMNS 1140 and ENTR 3000, 3 credits of a first year ENGL course and 9 credits of courses at the 3000 level or above

Attribute: BUSI (p. 521)

## Applied Science (APSC)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables/](http://www.kpu.ca/registration/timetables/) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (https://www.bctransferguide.ca/) - for information about course transfer in B.C.

**APSC 1124 1 credit****Introduction to Engineering**

Students will learn about the practice of Engineering through a series of seminars and field trips conducted by working engineers. They will cover work done in various engineering fields, focusing on particular industries and/or specific disciplines. Students will participate in seminars on several engineering metaskills and complete a group design project followed by a presentation to the class. Note: This course is part of the first year engineering program.

Level: UG

Prerequisite(s): PHYS 1100 or Principles of Physics 12 (C)

Attributes: ASTR (p. 523), SCIH (p. 521)

**APSC 1151 3 credits****Introduction to Engineering Graphics**

Students will study technical sketching, orthographic projection, visualization in three dimensions, and conventions of engineering drawing. They will sketch by hand, and will draw with engineering-graphics software on the computer. Students will apply the principles of descriptive geometry to the solution of space problems.

Level: UG

Prerequisite(s): Level B1 as defined in the Math Alternatives Table (p. 779)

Attributes: ASTR (p. 523), SCIH (p. 521)

**APSC 1299 3 credits****Introduction to Microcontrollers**

Students will work with microcontrollers and C language in a lab setting to learn skills such as circuit design, data acquisition, DIO, ADC, and timing. Working in pairs or small groups, students will complete several labs and one project aimed at finding solutions to specified problems. Students will apply programming and debugging skills to make a device perform as intended. Note: This course is part of the first year Engineering program.

Level: UG

Prerequisite(s): CPSC 1103

Attributes: ASTR (p. 523), SCIH (p. 521)

## Art History (ARTH)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (https://www.bctransferguide.ca/) - for information about course transfer in B.C.

**ARTH 1120 3 credits****Art and Visual Culture: Prehistoric to Early Renaissance**

Students will study a selective survey of Western visual art and culture objects, including works of sculpture, painting, architecture, and other art forms from the Prehistoric period to the fourteenth century. They will examine the impact of cultural, religious, political, societal, and technological developments in the history of the visual arts, while studying principal moments of intersection with non-Western cultures. Students will develop their visual literacy, critical thinking and communication skills through written assignments that focus on describing, analyzing, and comparing works of art. Note: This is a writing-intensive course.

Level: UG

Prerequisite(s): English 12 (B) or ENGL 1099 or ENGQ 1099 or ABEE 0091 or ENGP 1091 or ABEE 0092 or ABEE 0097 or ENGP 1097 or Kwantlen English Placement Test placement or an LPI Essay Score of 30 – Level 5 or (ELST 0381 & 0383 B)

Attributes: ASTR (p. 523), ARTS (p. 521)

**ARTH 1121 3 credits****Art and Visual Culture: Late Renaissance to 20th Century**

Students will study a selective survey of European and North American visual art and culture objects, including works of painting, sculpture, printmaking, architecture, and other art forms from the fifteenth to the twentieth century. They will examine principal turning points connected to visual art of this period in order to illuminate the cultural, religious, political, societal, and technological factors contributing to the production and reception of the visual arts. Students will cultivate their visual literacy and develop the basic tools and terminology for analyzing visual art and culture.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_3 (p. 522)

**ARTH 1130 3 credits****Introduction to Film Studies**

Students will study the history and development of world cinema and will examine film as a visual language and art-making practice from its inception in the nineteenth century to the present. They will learn methods for exploring aesthetic function and for considering the social, political, and technological contexts of moving pictures.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**ARTH 1140 3 credits****Introduction to Visual Art, Urban, and Screen Culture**

Students will study the broad field of contemporary visual art and culture with a specific focus on the role of urban environments and the emerging world of screen culture in shaping new possibilities for global art production and circulation. Students will explore how they can become active agents rather than passive observers through engagement with the diversity of visual art and culture surrounding them. They will investigate interdisciplinary topics connecting the world of visual art with urban and screen cultures through case studies in street and graffiti art, hip-hop and punk culture, video gaming, anime, new media and Internet art, urban performance art, activist art, grassroots fashion, street photography, and the world of mobile photography and filmmaking.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**ARTH 2122 3 credits****Modern Art and Visual Culture: 1890-1945**

Students will study the development of modern art movements and visual culture in the period from 1890 to 1945 in Europe and North America. They will identify important issues related to the emergence and development of modern art, modernism, and the avant-garde in art and visual culture in relationship to: urban capitalism; issues of gender representation; social class and social consciousness; theories related to visual art and culture and visual language. Students will also be introduced to critical analysis of art theory in the Modernist period. Note: Students may not get credit for both FINA 1122 and ARTH 2122.

Level: UG

Prerequisite(s): 6 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ARTH 2126 3 credits****Canadian Modern and Contemporary Art**

Students will examine the development of Canadian art from the modern to postmodern and contemporary periods, across Canada, coast to coast. They will investigate Canadian social, political, and multicultural influences on visual art and culture, and visual language from one stylistic period to the next, one region to another. Students will study the Canadian art scene and its institutions within the context of the broader global art community.

Level: UG

Prerequisite(s): 6 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ARTH 2160 3 credits****History of Architecture: Prehistoric to Renaissance**

Students will study a survey of the development and history of architecture in the Paleolithic Age through the Renaissance, approaching architecture as a unique medium with its own visual vocabulary and spatial codes. Students will assess a variety of formal building and visual languages, designs, and theories that have shaped the early history of architecture through the close examination of select buildings and spatial environments set within specific cultural, social, political and economic contexts of their planning and construction.

Level: UG

Prerequisite(s): 6 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ARTH 2222 3 credits****Contemporary Art and Visual Culture: 1945 to the Present**

Students will examine the development of visual art and language in Western art from the 1940's to the Twenty-First Century. They will investigate social, political, cultural and technological influences on Western art from the Abstract Expressionist period to the development of the Postmodernist aesthetic, as well as participating in analysis and interpretation of modern and contemporary painting, sculpture, architecture, printmaking, ceramics, photography, film, installation art, video art, digital art, performance art and other multi-media venues.

Level: UG

Prerequisite(s): 6 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ARTH 2260 3 credits****History of Architecture: Baroque to Postmodern**

Students will study a survey of the development and history of architecture from the period of the late Baroque in the eighteenth century through to the postmodern architectural styles associated with the contemporary present, approaching architecture as a unique medium with its own visual vocabulary and spatial codes. Students will assess a variety of formal building and visual languages, designs, and theories that have shaped the modern and postmodern history of architecture through the close examination of select buildings and spatial environments set within specific cultural, social, political and economic contexts of their planning and construction.

Level: UG

Prerequisite(s): 6 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ARTH 3100 3 credits****Special Topics Seminar in Art History**

Students will engage in an intensive study of a special topic in art history selected by the instructor within a seminar environment. They will study the career of a particular artist or examine an artistic movement, stylistic period or consider the topic from a thematic perspective. The students may utilize exhibitions at local or international venues as part of the make-up of the course content. Note: Students may take this course multiple times for further credit on different topics.

Level: UG

Prerequisite(s): ENGL 1100, and either (a) 6 credits from courses in ARTH, or (b) 18 credits from courses at the 1100 level or higher.

Attributes: ASTR (p. 523), ARTS (p. 521)

**ARTH 3121 3 credits****Italian Renaissance and Mannerist Art**

Students will study the art of the Italian Renaissance and Mannerist periods. They will study the dominant artists of the period as well as their patrons. Students will examine the impact of cultural, religious, political, societal, ideological, and technological developments on the art.

Level: UG

Prerequisite(s): ENGL 1100, and either (a) 6 credits from courses in ARTH, or (b) 18 credits from courses at the 1100 level or higher.

Attributes: ASTR (p. 523), ARTS (p. 521)

**ARTH 3122 3 credits****Art and the Age of Revolution**

Students will study the complex ways in which social and political change, and ideologies of gender, class, race and ethnicity, worked to shape aspects of visual art and culture from the late eighteenth to early twentieth century in Europe and North America. Students will focus on the roles played by industrialization, political ideology, rapid urban growth, global commerce, and the new media technologies of an expanding consumer culture in defining a wide range of visual culture. They will also examine different representations and debates around the idea of modernity and the modern, exploring the dynamic relationship between image and event in the "Age of Revolution." Note: This is a seminar course. Credit will not be provided for both ARTH 3122 and ARTH 3100: Art and the Age of Revolution.

Level: UG

Prerequisite(s): ARTH 1120 and ARTH 1121

Attribute: ARTS (p. 521)

**ARTH 3130 3 credits****Film and the City**

Students will study the dynamic intersections of the filmic medium and the emergence of the city as both a conceptual and material idea, examining how filmmakers and the techniques of filmmaking from the early twentieth century forward have been closely bound up in representing the visual, spatial, and mental contours of the metropolis. They will examine film's critical role in the development of modern visual culture, exploring how the evolving city and its various filmic representations have helped frame the development and understanding of important themes emerging in the history of modern and contemporary art. Note: This is a seminar course. Credit will not be given to both ARTH 3130 and ARTH 3100: Film and the City

Level: UG

Prerequisite(s): Either (a) ARTH 1130, or (b) ARTH 1120 and ARTH 1121.

Attribute: ARTS (p. 521)

**ARTH 3140 3 credits****History of Photography**

Students will study the history of photography and photographic practices from the mid-19th century to the present. They will be introduced to present and past uses of the medium in a number of specific historical, social, and theoretical contexts that examine how photographic images have circulated as both unstable and highly mobile objects within and outside the history of art. Students will learn the basic tools and terminology for analyzing photographic images through an introduction to critical and historical methods. Note: This is a seminar course. Credit will not be given to both ARTH 3140 and ARTH 3100

Special Topic: History of Photography.

Level: UG

Prerequisite(s): ARTH 1120 and ARTH 1121

Attribute: ARTS (p. 521)

**ARTH 3150 3 credits****New Media in Art**

Students will undertake a critical and historical examination of new media and the influence of technological, networked, and computerized information and communication technologies in the development of innovative formats of art making from the late nineteenth century to the present. They will also focus on how contemporary new media art practices can be understood in a broader historical and social context involving changing ideas about time, duration, narrative, and the most recent turn to a digitally mediated world. Note: This is a seminar course. Credit will not be given for both ARTH 3150 and ARTH 3100: New Media in Art

Level: UG

Prerequisite(s): Both (a) ARTH 1121, and (b) ARTH 1120 or ARTH 1130.

Attribute: ARTS (p. 521)

**ARTH 3160 3 credits****Urban Graffiti and Street Art**

Students will undertake a critical and historical examination of the origins and evolution of graffiti and street art in the urban context. The course will track the rise of graffiti and street art from their first appearance on North American city streets through to their often-controversial foray into the contemporary art scene and into their present status as among the most circulated and highly visible forms of global public art both on the Internet and in cities around the world. Themes and issues covered in this course include the form and content of signature graffiti writing and street art media and techniques; the emergence of key individuals, crews, and rivalries on local and global scenes; the influence of hip-hop and music cultures on graffiti and street art; identity politics and the contest over real and virtual public space; the role and influence of celebrity graffiti and street artists on the scene; and the role of technological, digital, computerized, and networked information technologies in the creation, distribution, and circulation of graffiti and street art today. Note: Credit will not be given for both ARTH 3160 and ARTH 3100: Street and Graffiti Art.

Level: UG

Prerequisite(s): 6 Credits from ARTH courses, or 18 credits from courses at the 1100 level or higher, including ENGL 1100.

Credit Exclusion: ARTH 3100

Attribute: ARTS (p. 521)

## Arts (ARTS)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**ARTS 1100 3 credits****Experiencing the Arts**

Students will be introduced to a broad range of liberal arts-related fields of study within the academic world. They will explore various disciplined-based and interdisciplinary approaches to a specific, current and compelling unifying theme, which will change periodically. Students will learn a number of key concepts and methods that shape and inform the perspectives developed in these fields, and how they articulate and inform one another. They will learn to view their world through multiple, and sometimes contrasting, perspectives and develop intellectual skills which are essential for learning in various disciplines and for continued learning in life beyond the University.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**ARTS 3000 6 credits****Interdisciplinary Amazon Field School**

Learners will engage in an intensive interdisciplinary field school in the Amazon rain forest. They will take part in cultural and creative immersion activities, participate in community engagement projects, and contextualize their field learning by classroom-based analysis and critical reflection before and after their field experiences. They will develop interdisciplinary skills in creativity, academic inquiry, ecology and conservation, cultural awareness, environmental design, design thinking, and community development. Learners will become familiar with various expressive modalities of the Amazon region (e.g. design, writing, music, movement, expressive arts, materiality, storytelling, etc.) and will explore the application of those modalities in an integrative learning environment. Note: Students will spend two weeks at the Field School site in addition to class sessions on campus before and after travel. Students must be nineteen years or older at the start of the course. Note: Students may earn credit for only one of DESN 3000 or ARTS 3000, as they are identical courses.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher, or permission of instructor.

Cross-listing: DESN 3000

Attribute: ARTS (p. 521)

**ARTS 3100 6 credits****Interdisciplinary Cuba Field School**

The Cuba Field School is an experiential, interdisciplinary course that contributes to global citizenship and a broadened worldview. It engages learners from a wide cross-section of disciplines in an intensive exploration of Cuban music and culture through interactive workshops, site visits, and interactions with local students, educators, and artists. Within its exceptional and immersive learning environment students contribute interdisciplinary perspectives informed by their distinct backgrounds and programs of study. Collaborative participation, inspired investigation, and cultural immersion are distinctive features of the Cuba Field School's dynamic learning environment. Before their field experiences students will contextualize their learning through conventional lectures, group activities, and classroom-based discussion. Participatory research, immersive activities related to Cuba's expressive cultural traditions, research presentations, and regular critical reflection form the core of the field school itself. Personalized capstone projects featuring student-centred research and creation connect the entire course, and are the focus of students' work upon returning from Cuba. NOTE: Students will spend two weeks at the Field School site in addition to class sessions on campus before and after travel. Students must be nineteen years or older at the start of the course. Additional fees will apply to meet field trip expenses.br />

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher.

Attribute: ARTS (p. 521)

**ARTS 3200 6 credits****Inside-Out Prison Exchange**

Students will explore various Arts topics using the Inside-Out Prison Exchange Program model. The Inside-Out model works with equal numbers of learners from both outside and inside the prison in a transformative, reflective and collaborative learning experience. Students will attend class primarily within local area corrections facilities with the exception of the first and last class for outside students, which will take place at KPU. The course content may arise from any Arts discipline and may include interdisciplinary approaches. Content may include, but is not restricted to, studies in Criminology, Creative Writing, Interdisciplinary Expressive Arts, Indigenous Studies, Policy Studies, Music, Fine Arts, Sociology, Psychology and other subject areas as determined by the qualified instructors. NOTE: Student acceptance into the course will be through an interview with course faculty prior to registration. Accepted students will be expected to provide a criminal record check, agree to a code of conduct, including dress code, and to adhere to prison visitor policies. An interview and a criminal record check are necessary in order for students to be accepted into this course. Students may take this course a maximum of two times for further credit on different topics

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher, and permission of the Instructor

Attribute: ARTS (p. 521)

**ARTS 3991 1 credit****Undergraduate Research and Scholarship**

Students will conduct research and scholarship in collaboration with a faculty mentor. This course will offer experiential learning in an academic setting by partnering students with faculty who have, or are initiating, research projects. Students will advance their research and professional skills, integrating these skills within a faculty-led project, through such activities as conducting a literature review, applying for Research Ethics Board approval, conducting research, applying research methods, drafting and revising reviews and/or articles, researching and compiling materials for conference presentations, and performing data analysis. Note: In order to register for ARTS 3991, students must sign a "Project Work Agreement" Contract which contains the details of the individual project. Note: Students may only register for a total number of 6 credits from ARTS 3991, 3992 or 3993.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher, and Dean's office approval

Attribute: ARTS (p. 521)

**ARTS 3992 2 credits****Undergraduate Research and Scholarship**

Students will conduct research and scholarship in collaboration with a faculty mentor. This course will offer experiential learning in an academic setting by partnering students with faculty who have, or are initiating, research projects. Students will advance their research and professional skills, integrating these skills within a faculty-led project, through such activities as conducting a literature review, applying for Research Ethics Board approval, conducting research, applying research methods, drafting and revising reviews and/or articles, researching and compiling materials for conference presentations, and performing data analysis. Note: In order to register for ARTS 3992, students must sign a "Project Work Agreement" Contract which contains the details of the individual project. Note: Students may only register for a total number of 6 credits from ARTS 3991, 3992 or 3993.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher, and Dean's office approval

Attribute: ARTS (p. 521)

**ARTS 3993 3 credits****Undergraduate Research and Scholarship**

Students will conduct research and scholarship in collaboration with a faculty mentor. This course will offer experiential learning in an academic setting by partnering students with faculty who have, or are initiating, research projects. Students will advance their research and professional skills, integrating these skills within a faculty-led project, through such activities as conducting a literature review, applying for Research Ethics Board approval, conducting research, applying research methods, drafting and revising reviews and/or articles, researching and compiling materials for conference presentations, and performing data analysis. Note: In order to register for ARTS 3993, students must sign a "Project Work Agreement" Contract which contains the details of the individual project. Note: Students may only register for a total number of 6 credits from ARTS 3991, 3992 or 3993.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher, and Dean's office approval

Attribute: ARTS (p. 521)

**ARTS 4800 3 credits****Arts Practicum**

This practicum course is designed to introduce students to the workplace, research settings, and possible degree-relevant entry-level jobs after graduation. Students will work under the supervision of both the employer/host and a KPU supervisor, undertaking one or more projects that will enable them to apply the academic knowledge and analytical skills learned in the classroom in a workplace environment. Students will also attend periodic seminars during the semester to critically reflect and report on their learning, and will produce final materials appraising the connection between their academic and practicum work. Note: Students must work with the practicum instructor prior to the start of this course to obtain a mutually agreed upon placement at the beginning of the semester as it is a competitive process and a placement cannot be guaranteed. This course is limited to students with a declared Major or Minor in the following disciplines: Geography, History, Philosophy, Policy Studies, and Political Science.

Level: UG

Prerequisite(s): 72 credits from courses at the 1100 level or higher, including 9 credits in the student's declared Major or Minor with a minimum grade of B-; and, permission of the Practicum Instructor and applicable Department Chair.

Attribute: ARTS (p. 521)

## Asian Studies (ASIA)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**ASIA 1100 3 credits****Introducing Asia**

Utilizing a pan-Asian approach, this course will introduce students to a variety of ways of seeing the Asian continent. Students will consider questions of gender and class, the impacts of colonialism, and the creation of the Asian diaspora, as they engage with the folklore, material culture, religion and philosophy, and economies of Asia.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_3 (p. 522)

**ASIA 1111 3 credits****The Religions of India**

Students will study the four major religions that originated in India: Hinduism, Buddhism, Jainism and Sikhism. They will study these religions with an emphasis on both scriptural sources and religious practices. They will also examine the development of these religious traditions within their socio-cultural and historical contexts, including Islamic influence.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_3 (p. 522)

**ASIA 1311 3 credits****Religions of East Asia**

Students will study the major religions of East Asia. They will critically examine the history and doctrines of religions including Daoism, Buddhism, and Shintoism. Students will analyze how these religions evolved over time in response to local conditions, and how they influenced the formation of Chinese, Korean, and Japanese cultures.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**ASIA 2120 3 credits****Introduction to Chinese and Japanese Cinema**

Students will be introduced to select films produced in China and Japan. They will examine the ways in which these films view and critique Chinese and Japanese traditions and modernity. They will also explore issues related to gender, identity, and nationalism. Students will develop an appreciation of the aesthetic and cultural values of East Asia and an understanding of recent Chinese and Japanese society through the lens of the assigned films, discussions, and readings. Note: Student may earn credit for only one of ASIA 2120 and LANC 2120 as they are identical courses.

Level: UG

Prerequisite(s): Any 6 credits at the 1100 level or higher

Cross-listing: LANC 2120

Attributes: ASTR (p. 523), ARTS (p. 521)

**ASIA 2156 3 credits****Martial Arts of China and Japan**

Students will challenge the portrayal of East Asia martial arts as ancient, timeless, and even mystical, by examining the history of the martial arts. They will examine how military techniques intended for use in war, policing, and the control of banditry came to be practiced as methods of moral, spiritual, and physical self-cultivation. Students will examine the historical origins of martial arts in Japan and China, their evolution over time, and how they both subverted and served state agendas in the modern era. They will also examine the role of martial arts in popular culture. NOTE: Students may earn credit for only one of ASIA 2156 or HIST 2156 as they are identical courses.

Level: UG

Prerequisite(s): 6 credits from courses at the 1100 level or higher

Cross-listing: HIST 2156

Attributes: ASTR (p. 523), ARTS (p. 521)

**ASIA 2240 3 credits****Sikh Gurus: Life and Teachings**

Students will study the development of the Sikh tradition through the lives and teachings of the Sikh Gurus. They will examine the evolution of Sikh beliefs and practices, within their social, cultural, economic, and political contexts. Students will study primary sources both by and about the Sikh Gurus in English translation. Students will look at how the Sikh religion draws attention to the ways in which people construct ideas of themselves and the world, and explore a wide range of concepts, including life and death, mysticism and war, and time and history. Students will also examine how aspects of Sikh philosophy and ethics may be applied to the contemporary world.

Level: UG

Prerequisite(s): 6 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ASIA 2252 3 credits****Indian Society through Popular Film**

Students will examine Indian culture and society through the medium of popular cinema, ranging from post-1947 Hindi classics to some more recent Bollywood blockbusters. They will investigate the ways in which Indian history and culture are depicted in film, including issues like nation building, gender, caste, nationalism versus regionalism/communalism, and globalization. In doing so, students will explore 'depicted reality' versus 'historical reality', the notion of the family as the symbol of the nation, as well as the relationship between the homeland (desh) and the West/diaspora (pardesh). Students will also study several films made by South Asian filmmakers in the diaspora.

Level: UG

Prerequisite(s): 15 credits of 1100-level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ASIA 2290 3 credits****South Asians around the Globe**

Students will study the South Asian diaspora – the fragment of an ethnic community that exists outside of its "homeland" – with a special focus on the South Asian communities in Western Canada. They will examine social theory related to South Asian migration and social adaptation as well as look at contemporary concerns surrounding globalization and transnationalism. Students will investigate the major social issues that immigrant communities often face in the process of adaptation to Canada at the personal, community, and societal levels. Note: Students may earn credit for only one of ASIA 2290 or SOCI 2290, as they are identical courses.

Level: UG

Prerequisite(s): 6 credits from courses at the 1100 level or higher

Cross-listing: SOCI 2290

Attributes: ASTR (p. 523), ARTS (p. 521)

**ASIA 2351 3 credits****Opium, Alcohol, & Tobacco in Asian History & Culture**

Students will examine the very different ways in which drugs and alcohol have been looked upon over time in different cultural contexts. They will analyze differing interpretations of drugs and alcohol at pivotal moments in Asian history, where arguably, opium, alcohol, and tobacco (among others) have played important economic, geo-political, and social roles, not just as drugs but as strategic resources and cultural 'habits'. Students will also examine the ways in which drugs and alcohol have shaped Asian history, including local and regional economies, social practices, material cultures, imperialisms, and even contemporary governments. NOTE: Students may earn credit for only one of HIST 2351 or ASIA 2351, as they are identical courses.

Level: UG

Prerequisite(s): 6 credits from courses at the 1000 level or higher

Cross-listing: HIST 2351

Attributes: ASTR (p. 523), ARTS (p. 521)

**ASIA 2355 3 credits****The Chinese Overseas: A Global History of Chinese Migration**

Students will undertake an analysis of migration in modern Chinese history, with an emphasis on overseas migration. They will be introduced to relevant theories concerning migration, diaspora, and transnationalism before examining and analyzing the development of ethnic Chinese communities abroad over the past two centuries. NOTE: This course is cross-listed as HIST 2355. Students who have taken HIST 2355 may not receive credits for both HIST 2355 and ASIA 2355.

Level: UG

Prerequisite(s): Any HIST 1100 or higher

Cross-listing: HIST 2355

Attributes: ASTR (p. 523), ARTS (p. 521)

**ASIA 2359 3 credits****Tea in Asia**

Students will explore the rich history, material culture, and practices related to tea in Asia. Beginning as a commodity and drink native to China, tea would eventually come to dominate much of the world. Throughout this course, students will examine the various "ways" and cultures of tea in modern Asia, and how tea has shaped history through economies, social practices, and politics. Students will learn that tea in China, Japan, and India is not just a historical artifact—it is a way of life. From tea plantations to art, commodity chains to literature, tea has become both a national drink and social imperative across Asia. NOTE: This course is cross-listed with HIST 2359. Students may only receive credit for either ASIA 2359 or HIST 2359.

Level: UG

Prerequisite(s): 6 credits from courses at the 1100 level or higher

Cross-listing: HIST 2359

Attributes: ASTR (p. 523), ARTS (p. 521)

**ASIA 2365 3 credits****Pathways to Nirvana: Cultural History of Buddhism**

Buddhism is a religion, a philosophy, a ritual system, and a set of cultural practices in play throughout Asia. Students will look at the cultural history of some aspects of Buddhist thought and practice. They will examine philosophy, ritual, and other impacts of Buddhism within Asian culture including its role in politics and its impact on women, diet, and other key aspects of Asian society. NOTE: This course is cross-listed with HIST 2365. Students may only receive credit for either HIST 2365 or ASIA 2365.

Level: UG

Prerequisite(s): 6 credits from courses at the 1100 level or higher

Cross-listing: HIST 2365

Attributes: ASTR (p. 523), ARTS (p. 521)

**ASIA 2399 3 credits****Readings in Asian Studies**

Students will examine key issues in Asian society, culture, economy, and/or politics under the direction of a faculty member in Asian Studies with expertise in the area. They will examine a selected topic in depth and will be required to complete both readings and research in this area. Students will be required to identify relevant sources of information and demonstrate a comprehensive understanding of the topic. Note: This course may be repeated more than once for credit, to a maximum of 9 credits.

Level: UG

Prerequisite(s): 6 credits from courses at the 1100 level or higher.

Attributes: ASTR (p. 523), ARTS (p. 521)

**ASIA 3130 3 credits****Sikh Culture, Religion and Society**

Students will examine the cultural, religious, social and political developments in the Punjab over the past five centuries from the perspective of the Sikhs. They will focus on the cultural and social forces that shaped and consolidated Sikh religious beliefs, ritual practices, and social institutions. Students will explore the interrelationship among traditional pan-Indian customs, Punjabi folklore, and Sikh religious beliefs and practices. They will also explore the impact of the British Raj, including the Sikh reform movements, and the contemporary issue of the Sikh search for a distinct political identity. NOTE: Students may earn credit for only one of ANTH 3130 or ASIA 3130.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher including 6 credits of ASIA or HIST

Credit Exclusion: ANTH 3130

Attribute: ARTS (p. 521)

**ASIA 3140 3 credits****Environment and Society in East Asia**

Students will critically analyze the interaction between environments and societies in East Asia. They will critically examine environmental history, institutional politics, property rights, and political ecology. Students will analyze the historical background of specific environmental problems, examine the legacies of late imperial, early twentieth, and late twentieth century policies on the use and abuse of natural resources. They will critically examine a broad range of issues including agriculture, forests, wildlife and biodiversity, grasslands, water, and the impact of "mammoth projects". NOTE: Students may earn credit for only one of ASIA 3140 or HIST 3140 as they are identical courses.

Level: UG

Prerequisite(s): 27 credits from courses at the 1100 level or higher, including 6 credits from courses in ASIA or HIST.

Cross-listing: HIST 3140

Attributes: ASTR (p. 523), ARTS (p. 521)

**ASIA 3149 3 credits****Hong Kong: Past, Present, and Future**

Students will undertake an in-depth analysis of Hong Kong's history from its days as a remote fishing outpost and pirate haven, through its development as a British-administered trading port and colony, and finally to its emergence as a Pacific Rim economic powerhouse. They will place historical developments in Hong Kong into a broader regional and global context. Students will also critically analyze contemporary issues such as the impact of Hong Kong's liberation from colonial rule, the role of "One Country - Two Systems" in protecting Hong Kong's unique character, the region's economic prospects following the opening of China's economy, and the ongoing struggle for democratic reform. NOTE: Students may earn credit for only one of ASIA 3149 or HIST 3149, as they are identical courses.

Level: UG

Prerequisite(s): 27 credits from courses at the 1100 level or higher, including 6 credits from courses in ASIA or HIST.

Cross-listing: HIST 3149

Attributes: ASTR (p. 523), ARTS (p. 521)

**ASIA 3150 3 credits****East Asian Immigrants to North America**

Students will critically analyze East Asian immigration to North America over the past two hundred years. They will also examine settlement experiences in North America, with a particular emphasis on the connections between immigrants and their homelands, interactions among East Asian immigrants and other groups in North America, and the development of ethnic communities. Students will critically examine issues including discrimination and racism, anti-immigrant legislation, the creation of ethnic enclaves, Japanese internment, the struggle for civil and political rights, assimilation and multiculturalism, inter-generational tensions within ethnic communities, transnationalism, and contemporary migration issues. Note: ASIA/HIST 2355 strongly recommended. NOTE: Students may earn credit for only one of ASIA 3150 or HIST 3150, as they are identical courses.

Level: UG

Prerequisite(s): 27 credits from courses at the 1100 level or higher, including 6 credits from courses in ASIA or HIST.

Cross-listing: HIST 3150

Attributes: ASTR (p. 523), ARTS (p. 521)

**ASIA 3151 3 credits****Gender in East Asia**

Students will critically analyze the role of gender in contemporary East Asia, and in doing so gain a unique opportunity to explore differences in the conceptualization of gender among countries and regions.

They will, by going beyond dichotomies of East and West, traditional and modern, critically examine gender issues from a theoretically informed and comparative perspective. Students will critique different conceptualizations of feminism, the gendered effects of economic change, the relationship of gender to politics and the state, and the historical and transnational contexts which shape gender relations.

They will, therefore, gain an insight into the situation of women in contemporary East Asia, as well as extend their understanding of the dynamics of gender in the contemporary world.

Level: UG

Prerequisite(s): 27 credits from courses at the 1100 level or higher, including 6 credits from courses in ASIA or HIST.

Attributes: ASTR (p. 523), ARTS (p. 521)

**ASIA 3152 3 credits****Ethnicity in China and Japan**

Students will examine the rich diversity of the Chinese and Japanese populations and their place in East Asian political and historical narratives. They will critically analyze the ways in which these many ethnic groups have dominated, informed, or otherwise played important roles in the governance, social development, and economic development of China and Japan. Students will also critically analyze the narratives of unity produced in the pursuit of nationalism and nation-building, and examine the ways in which these narratives have downplayed the diversity of the region's peoples. They will critically examine the making of majorities and minorities and how these were marked across cultural, regional, and national boundaries. Students will analyze and critique the various ways in which racial, ethnic, and national identities were defined, institutionalized, and reproduced in the early modern and modern periods.

Level: UG

Prerequisite(s): 27 credits from courses at the 1100 level or higher, including 6 credits from courses in ASIA or HIST.

Attributes: ASTR (p. 523), ARTS (p. 521)

**ASIA 3153 3 credits****Folklore of China and Japan**

Students will critically analyze the diversity and changing forms of folklore and folkways in East Asia. They will examine various myths in Japanese and Chinese culture. They will also assess how folklore practices such as festivals, arts and crafts folkways, folk life, and mythology impact culture and every day life in the ancient, pre-modern, and modern eras. They will analyze theoretical understandings of folklore and folkways and reflect critically on current debates and topics. Students will critically examine the formation and transformation of folklore throughout the cultural history of China and Japan, with particular emphasis on their metamorphoses within popular cultural forms in the contemporary world, including narrative, visual, oral, and customary genres. NOTE: HIST 1150 and ASIA 1311 recommended prior to taking this course.

Level: UG

Prerequisite(s): 27 credits from courses at the 1100 level or higher, including 6 credits from courses in ANTH, ASIA or HIST

Credit Exclusion: ASIA 2151

Attribute: ARTS (p. 521)

**ASIA 3154 3 credits****Chinese Cinema and Society**

Students will critically analyze films produced by some of the most recognized directors from China, Hong Kong, and Taiwan. They will examine issues of nationhood, national identity, national trauma, and the national past through these films. Students will also analyze the way in which some directors have begun to focus on the effects of globalization on contemporary Chinese society and culture. They will critically analyze Chinese cinema as a transnational phenomenon with extensive links to Asia and the rest of the world. Students will also critically examine how Chinese cinema has shaped both Chinese and foreign understandings of Chinese history and culture. Note: ASIA 2120 is strongly recommended

Level: UG

Prerequisite(s): 27 credits at the 1100 level or higher including 6 credits of ASIA or HIST or ANTH

Attributes: ASTR (p. 523), ARTS (p. 521)

**ASIA 3230 3 credits****Islam in South Asia**

Students will critically analyze the history and influence of Muslim communities and Islamic institutions in South Asia. They will examine and analyze the broad historical currents of the expansion of Islam on the Indian subcontinent, the nature of Muslim political authority, the interaction among religious communities, and Islamic aesthetics and contributions to material culture. Students will also critically analyze the multiple engagements with and reactions of Muslims to colonial rule, as well as the partition of British India and the creation of Pakistan, the relationship between Islam and gender in South Asia, and the contemporary concerns of South Asia's Muslims. Note: ASIA 1111 highly recommended.

Level: UG

Prerequisite(s): 27 credits from courses at the 1100 level or higher, including 6 credits from courses in ASIA or HIST.

Attributes: ASTR (p. 523), ARTS (p. 521)

**ASIA 3252 3 credits****Bollywood and Contemporary India**

Bollywood and Contemporary India will introduce students to the directors who have begun to produce films that focus on the effects of globalization on contemporary Indian society and culture. Students will explore pertinent social issues pertaining to the cinematic representation of gender & sexuality, religion, politics, and Western influence. They will critically examine how films can serve as a platform for social change and will also critically analyze the politics of the censor board and controversies related to various film releases.

Level: UG

Prerequisite(s): 27 credits from courses at the 1100 level or higher, including 6 credits from courses in ANTH, ASIA or HIST

Attributes: ASTR (p. 523), ARTS (p. 521)

**ASIA 3255 3 credits****Gender in South Asia**

Students will critically examine the influence and impact of dominant gender norms and considerations in shaping lives in South Asia. They will examine historical, political, socio-economic, cultural, and religious challenges and changes; theoretical understandings of gender, class, ethnicity, religion, location, and other variables in subject formation; and, debates and controversies surrounding discourses of femininity and masculinity. Students will analyze primary and secondary scholarly sources, cultural products such as film, literary works, and mass media, and reflect critically on current debates and topics of interest, both in South Asia and in a transnational context within the South Asian diaspora.

Level: UG

Prerequisite(s): 27 credits at the 1100 level or higher including 6 credits of ASIA or ANTH or HIST

Attributes: ASTR (p. 523), ARTS (p. 521)

**ASIA 3310 3 credits****Japanese Culture and Business**

Students will explore the role and characteristics of business in Japan and the powerful influence of business on contemporary Japanese culture. First, they will follow the development of industry and business in Japan from the beginning of the Edo Period until the end of the Second World War. Then students will examine the remarkable recovery and development of Japan's postwar economy that culminated, in 1980s and 90s, in theories and stereotypes relating to the concept of a unique Japanese business style. Finally, students will examine changes in the Japanese economy since the bursting of Japan's "economic bubble" in the mid 1990s, and the effects of these changes on business, society and culture today. Students will read texts as well as current articles in newspapers (such as the Wall Street Journal or The Daily Yomiuri (English edition)), journals and magazines (such as The Economist), and watch movies and documentaries in order to explore a broad range of topics, from the role of business in Japan's international relations to its effects on the lives of individual Japanese and their environment. Note: Students may earn credits for only one of LANC 3310 and JAPN 3310 and ASIA 3310 as they are identical courses. The course will be conducted in English. This course does not serve to fulfill the second language requirement of the Bachelor of Arts degree framework.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher

Attribute: ARTS (p. 521)

**ASIA 3320 3 credits****Japanese Culture Through Film**

Students will deepen their understanding of contemporary Japanese art and culture by viewing important post-war Japanese movies. They will focus on influential directors and characteristic genres, including but not limited to comedies, samurai epics and anime [animation]. Students will view a variety of works (in English or Japanese with English subtitles), discuss important themes and cultural references, and connect these movies to the broader Japanese culture, especially youth culture. They will observe how movies both make and question "culture" and, in turn, how culture determines the content of movies and their popular success. Students will read works by critics who examine various characteristics of Japanese culture, especially its "visual bias", evident in arts ranging from Japanese writing (Kanji) and wood-block prints (ukiyo-e) to contemporary movies, magazines, commercials, and fashion. Students will also identify the contributions of Japanese film to international "movie culture" and discuss, more generally, the importance of visual media in the post-modern, post-literate, non-rhetorical age of film, television and the Internet. Finally, they will consider how the increasing success of Japanese animation in foreign markets might contribute to Japan's cultural integration into the global community and discuss the future of post-modern technological societies. Note: Students may earn credits for only one of LANC 3320 and JAPN 3320 and ASIA 3320 as they are identical courses. The course will be conducted in English. The course does not serve to fulfill the second language requirement of the Bachelor of Arts degree framework.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher

Attribute: ARTS (p. 521)

**ASIA 3860 3 credits****South Asian Folklore**

Students will critically analyze the diversity and changing forms of folklore and folk customs in South Asia. They will look at how and why folklore impacts the culture and the everyday lives of people in South Asia. Students will critically examine the various genres of folklore, including narrative, oral, and customary genres. They will also look at performance traditions, including music and dance, as well as folk life, including folk art and crafts. Note: Students may earn credit for only one of ASIA 3860 or LANC 3860 as they are identical courses.

Level: UG

Prerequisite(s): 27 credits from courses at the 1100 level or higher, including 6 credits from courses in ANTH, ASIA, HIST, LANC or PUNJ

Cross-listing: LANC 3860

Attributes: ASTR (p. 523), ARTS (p. 521)

**ASIA 3870 3 credits****Bhangra Movements and Identity**

Students will critically examine the origins and development of Bhangra within Punjab and the Indian subcontinent as well as its adaptations and hybrid forms within the Punjabi diaspora, in North America and Europe. Students will critically analyze the development of Bhangra from a popular folk dance and music style within Punjab to its modern day status within the diaspora as a largely hybrid music incorporating Punjabi folk music with modern Western music traditions. Students will also analyze the role of Bhangra in the formation of identity for members of the South Asian diaspora. Note: Students may earn credit for only one of ASIA 3870 or LANC 3870 as they are identical courses.

Level: UG

Prerequisite(s): 27 credits from courses at the 1100 level or higher, including 6 credits from ANTH, ASIA, CUST, HIST or PUNJ

Attributes: ASTR (p. 523), ARTS (p. 521)

**ASIA 4350 3 credits****Canadian East and South Asian Communities**

Students will critically examine the theories surrounding the study of migration and adaptation, as well as explore the local experience of East and South Asian communities in Canada, with emphasis on the post-World War II period. They will critically look at immigrants as 'social actors' and active contributors to their own social and cultural transformation as they engage with the new and changing social, economic and political structures of Canadian society. Students will conduct a field research project from a social science perspective on an Asian community in the urban field site of Greater Vancouver or in the Fraser Valley region. Students will develop important field research skills and gain exposure to the pertinent issues surrounding the complexity of the Asian immigrant experience in Canada's multicultural environment. Note: This is a seminar course.

Level: UG

Prerequisite(s): 45 credits at the 1100 level or higher including 6 credits of ASIA or ANTH or HIST at the 3000 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ASIA 4351 3 credits****Advanced Topics in Asian Cinema**

Students will engage in the critical study of selected genres/directors/national film industries within Asia. Students will critically evaluate a number of methodological approaches to the study of Asian cinema, assess the implications of these approaches, and identify their strengths and weaknesses. Students will also critically analyze the global influence of selected Asian cinema genres/directors/national film industries.

Notes: This is a seminar course. Students may take this course more than once, in consultation with the Asian Studies Coordinator. ASIA 2120 or ASIA 2252 or ASIA 3154 strongly recommended

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including 6 credits from courses at the 3000 level or higher in ASIA or HIST.

Attributes: ASTR (p. 523), ARTS (p. 521)

**ASIA 4499 3 credits****Selected Topics in Asian Studies**

Students will engage in the study of a particular issue within the discipline of Asian Studies. They will critically analyze the topic from a broad variety of perspectives, thereby developing a comprehensive understanding of both the issue itself and the related research. Students will critically evaluate a number of methodological approaches, assess the implications of these approaches, and identify their strengths and weaknesses. NOTE: This is a seminar course. This course may be repeated more than once for credit, to a maximum of 12 credits.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher, including 9 credits from courses at the 1100 level or higher in ASIA or HIST

Attribute: ARTS (p. 521)

## Astronomy (ASTR)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**ASTR 1100 4 credits****Introduction to Astronomy**

Students will study a wide range of topics in astronomy from the point of view of a non-scientist. They will study topics including the earth, solar system, stars, the Milky Way, galaxies and cosmology and will discuss and study current events of astronomical interest. The laboratory component will include indoor experiments and outdoor observations. This is an introductory course in astronomy intended for students not specializing in science. No prior study of physics or astronomy is required. Note: This course may not be used for credit towards a science degree or as a prerequisite for further science courses. This course may be used to partially fulfill quantitative requirements for a Bachelor of Arts degree, science requirements for an elementary teacher education program, lab science requirements for an Associate of arts degree, and liberal education/breadth credits for Kwantlen degrees.

Level: UG

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**ASTR 1105 3 credits****Basic Astronomy**

Students will study a wide range of topics in astronomy from the point of view of a non-scientist. They will study topics including the Earth, the Solar System, stars, the Milky Way, galaxies and cosmology and will discuss and study current events of astronomical interest. Note: No prior study of physics or astronomy is required. Only one of ASTR 1100 or ASTR 1105 can be taken for credit.

Level: UG

Attributes: ASTR (p. 523), SCIH (p. 521)

**ASTR 1120 4 credits****Introduction to Astrophysics**

Students will study topics including the solar system, stars, the Milky Way, galaxies and cosmology as well as observational and theoretical techniques used to study these systems. They will apply physical laws and principles in order to analyze and solve problems in astrophysics. Students will conduct indoor experiments and outdoor observations in the lab component. Note: This is an introductory course in astronomy intended for students in science. ASTR 2101/2102 rather than ASTR 1120 are recommended for students who intend to pursue studies in Astronomy.

Level: UG

Prerequisite(s): PHYS 1100 or Principles of Physics 12 (C)

Attributes: ASTR (p. 523), SCIH (p. 521)

**ASTR 3110 3 credits****Exploring the Solar System**

Students will survey, without the use of advanced mathematics, recent discoveries about the planets and other objects in the solar systems. They will also study the sun, the existence of planetary systems around other stars, and the search for life. Note: This is an introductory course in astronomy intended for students not specializing in science. No prior study of physics or astronomy is required. Note: This course may not be used for credit towards a science degree or as a prerequisite for further science courses. This course may be used to partially fulfill quantitative requirements for a Bachelor of Arts degree, science requirements for an elementary teacher education program, lab science requirements for an Associate of arts degree, and liberal education/breadth credits for Kwantlen degrees.

Level: UG

Prerequisite(s): 45 credits of 1100-level or higher courses, including ENGL 1100

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**ASTR 3111 3 credits****Exploring Stars & Galaxies**

Students will survey, without the use of advanced mathematics, recent discoveries in modern astronomy. They will study stars, pulsars, black holes, galaxies, quasars and the origin and evolution of the Universe. Note: This is an introductory course in astronomy intended for students not specializing in science. No prior study of physics or astronomy is required.

Level: UG

Prerequisite(s): 45 credits of 1100-level or higher courses, including ENGL 1100

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

## Automotive Service (ASTA)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**ASTA 1100 3 credits****Safety, Communication, Tools and Fasteners**

Students will learn to operate safely in the automotive shop environment and will learn the proper use of hand tools and fastening devices. They will use precision measurement tools, will take measurements, and will make mathematical calculations relating to the automotive industry. Students will also learn to communicate using automotive industry terminology.

Level: VO

Attribute: TRAD (p. 521)

**ASTA 1110 1.5 credits****General Automotive Services, Practices and Maintenance**

Students will learn to safely service and maintain the modern automobile, selecting the proper fluids and lubricants. They will learn to assess and repair leaks while servicing and replacing gaskets, seals and hoses.

Level: VO

Prerequisite(s): ASTA 1100

Attribute: TRAD (p. 521)

**ASTA 1120 6.5 credits****Electrical Fundamentals, Diagnosis and Repair**

Students in classroom and shop will learn to solve problems related to automotive electrical systems. They will apply scientific principles to explain the fundamentals of magnetism. Students will service, test and diagnose problems related to batteries and will be able to test and repair simple electrical circuits. Students will also learn to explain the operation of starter motors and AC generators as well as test and diagnose them.

Level: VO

Prerequisite(s): ASTA 1110

Attribute: TRAD (p. 521)

**ASTA 1130 6.5 credits****Steering, Frames, Suspension and Wheel Alignment**

Students will learn to identify various types of frame, suspension, and steering systems. They will use the correct procedures for diagnosing and repairing the different types of steering and suspension systems. Students will also learn to perform wheel alignments.

Level: VO

Prerequisite(s): ASTA 1120

Attribute: TRAD (p. 521)

**ASTA 1140 5 credits****Automotive Braking Systems**

Students will learn the scientific principles of the brake system. They will learn to service and repair the hydraulic systems components on both drum and disc brake systems. Students will master brake system diagnosis, service and repair, as well as learn the principles and service of antilock braking systems.

Level: VO

Prerequisite(s): ASTA 1130

Attribute: TRAD (p. 521)

**ASTA 1150 1 credit****Welding**

Students will learn welding safety and the basic operation of oxy-fuel cutting and welding procedures on mild steel plate, light tubing, and 14/18 gauge sheet metal. They will also learn metal inert gas (MIG) welding procedures and applications. Students will demonstrate these three processes through a number of shop projects.

Level: VO

Prerequisite(s): ASTA 1140

Attribute: TRAD (p. 521)

**ASTA 1160 1.5 credits****The Internal Combustion Engine**

Students will learn the operation of the internal combustion engine. They will learn the theory of engine blocks and their related components as well as crankshafts, friction bearings, pistons, piston rings and connecting rods. They will also learn the theory of cylinder head and camshaft design and operation.

Level: VO

Prerequisite(s): ASTA 1150

Attribute: TRAD (p. 521)

**ASTA 1170 2.5 credits****Power Train Fundamentals**

Students will learn to diagnose, service and repair drivelines, universal joints and constant velocity joints. They will learn to diagnose and repair standard transmissions, clutches and their related components, and will learn the operation and service of automatic transmissions and transaxles. Students will also learn to diagnose, service and repair the automotive differential.

Level: VO

Prerequisite(s): ASTA 1160

Attribute: TRAD (p. 521)

**ASTA 1180 5 credits****Engine Management and Control Systems**

Students will learn to diagnose, service and repair automotive fuel delivery and ignition systems, from carburetion to fuel injection, and ignition systems from contact points to direct ignition systems. Students will also learn to test and repair emission control devices.

Level: VO

Prerequisite(s): ASTA 1170

Attribute: TRAD (p. 521)

## Biology (BIOL)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**BIOL 1110 4 credits****Introductory Biology I**

Students will study the diversity of life on Earth, the classification of organisms, and the interactions of organisms with their environments. They will examine the structure and function of tissues and body systems in a variety of organisms. Students will use microscopes and perform a range of experimental procedures in the laboratory.

Level: UG

Prerequisite(s): English 12 (B) or equivalent

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**BIOL 1112 4 credits****Biology Today**

In this course, students will study fundamental concepts in biology including cell biology, genetics, evolution and biodiversity. They will apply this knowledge using an evidence-based approach to examine some of the most exciting and controversial topics in current day biology, such as stem cell research, genetically modified organisms (GMO's) and threats to biodiversity. In the laboratory, students will explore biology via hands on activities that will reinforce concepts learned in class. For graduation with a Bachelor of Science Major in BIOLOGY, this course may only fulfill a requirement for a non-BIOL elective. Students with credit for BIOL 1110 may not take this course for further credit towards graduation requirements.

Level: UG

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**BIOL 1160 4 credits****Anatomy and Physiology I**

Students will study the major organ systems of the human body responsible for support, movement, circulation, respiration and digestion. They will also overview nervous and endocrine control, and microbiology. Students will study these topics using a student-centred laboratory format.

Level: UG

Prerequisite(s): Either (a) BIOL 1110 or (b) both (i) Biology 12 (B) or BIOQ 1099 (B), and (ii) Chemistry 11 (B) or CHEQ 1094 (B)

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**BIOL 1210 4 credits****Introductory Biology II**

Students will study concepts of inheritance and biological evolution. They will examine the major classes of biological molecules, the structure and function of cells, and the processes of cellular respiration and photosynthesis. They will study the patterns and mechanisms of embryological development. Students will apply the scientific method in conducting experimental investigations in the laboratory.

Level: UG

Prerequisite(s): Both (a) BIOL 1110, and (b) English 12 (B) or equivalent.

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**BIOL 1260 4 credits****Anatomy and Physiology II**

Students will continue to study the major organ systems of the human body, focusing on the excretory, nervous, immune and reproductive systems. Examination of these systems will include related basic concepts in microbiology. Students will study these topics using a student-centred laboratory format.

Level: UG

Prerequisite(s): BIOL 1160

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**BIOL 2320 4 credits****Genetics**

Students will examine the principles of heredity, transmission of traits, exchange of genetic information, mutation, linkage, gene action and recombinant DNA technology, with emphasis on problem solving. They will acquire a variety of laboratory skills including sterile techniques, isolation of DNA, electrophoresis and photo microscopy.

Level: UG

Prerequisite(s): BIOL 1110 and BIOL 1210

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**BIOL 2321 4 credits****Cell Biology**

Students will examine the ultrastructure of the eukaryotic and prokaryotic cell along with molecular activities associated with these structures. They will also identify and understand the experimental techniques and data that support the current view of cell structure and function. Students will develop considerable skill in the preparation of materials for microscopic examination.

Level: UG

Prerequisite(s): BIOL 1110, BIOL 1210 and CHEM 1110.

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**BIOL 2322 4 credits****Ecology**

Students will learn the basic properties of ecosystem, community and population ecology, including energy transfer, mineral cycling, community structure and dynamics, competition, predation, evolution and population dynamics. They will perform experimental investigations in the lab and use a range of instruments and equipment to record observations in the field.

Level: UG

Prerequisite(s): BIOL 1110 and BIOL 1210

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**BIOL 2330 4 credits****Microbiology**

Students will survey a variety of microorganisms with an emphasis on bacteria. They will examine several aspects of microorganisms, including diversity, structure and function, metabolism, growth, reproduction and genetics.

Level: UG

Prerequisite(s): BIOL 1210

Co-requisite(s): CHEM 1110 or ENVI 1106

Attributes: ASTR (p. 523), SCIH (p. 521)

**BIOL 2421 3 credits****Cellular Biochemistry**

Students will learn the patterns and reactions of cellular metabolism with particular attention to the structure and function of proteins, the mechanisms of reactions, and the interrelationships and control of catabolism and anabolism.

Level: UG

Prerequisite(s): BIOL 1110, BIOL 1210, BIOL 2321 and CHEM 2320.

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**BIOL 3110 4 credits****Animal Behaviour**

Students will learn the basic theories, principles and concepts associated with the scientific study of animal behaviour. They will examine the relationships between behaviour and adaptation, evolution, physiology and genetics, focusing on topics such as foraging, territoriality, mating and social behaviour. Students will observe, record and analyse the behaviour of a variety of animals; in the lab component of the course.

Level: UG

Prerequisite(s): BIOL 2322

Co-requisite(s): BIOL 3180

Attribute: SCIH (p. 521)

**BIOL 3160 4 credits****Foundational Concepts in Human Anatomy & Physiology**

The students will acquire essential principles and procedures in anatomy, histology, physiology and general pathology for the study of human body systems. Their study will include an introduction to regional anatomy, organ tissues, organ structure, homeostatic mechanisms, electrophysiology, general and systemic pathology and drug kinetics and drug dynamics. The student will apply these essential principles while focusing on the integumentary system and the musculoskeletal system. They will also acquire laboratory skills in anatomical and histological procedures, the use of data acquisition software for collection of human physiological data, and sample diagnostic testing and its use of cellular and molecular experimental tools.

Level: UG

Prerequisite(s): BIOL 2321 and BIOL 2421

Attribute: SCIH (p. 521)

**BIOL 3165 3 credits****Conservation Biology**

Students will examine the science, economics, politics and non-governmental organization activities relating to topical issues in conservation biology on a local, regional and global scale. Students will focus on invasive species, endangered species, pollutants, habitat fragmentation, climate change, government regulation, wildlife biology and sustainable ecosystems. Students will explore these issues further in the field component of the course.

Level: UG

Prerequisite(s): BIOL 1110, BIOL 1210 and BIOL 2322

Attributes: ASTR (p. 523), SCIH (p. 521)

**BIOL 3180 3 credits****Life Science Research Methods**

Students will learn how to conduct research in the life sciences. They will explore concepts of research design and learn methods for collecting data and conducting appropriate statistical analyses. Students will also learn how to critically evaluate research literature, develop a research proposal and present research findings.

Level: UG

Prerequisite(s): BIOL 1210

Co-requisite(s): MATH 2335

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**BIOL 3215 4 credits****Zoology**

Students will investigate animal diversity with an emphasis on the evolutionary relationships and unifying characteristics within and among extant animal taxa. Students will survey major invertebrate and vertebrate taxa in the context of ecological niche diversity, functional morphology, and comparative anatomy, by classroom lectures, observation of live specimens, and dissection. Students will further explore animal diversity and unifying characters among animal taxa by learning about fossil evidence from the Cambrian explosion, Cretaceous-Tertiary extinction and other major events in animal evolution.

Level: UG

Prerequisite(s): BIOL 1110, BIOL 1210 and BIOL 2322

Attributes: ASTR (p. 523), SCIH (p. 521)

**BIOL 3225 4 credits****Biology of Plants: An Ecological and Evolutionary Perspective**

Students will investigate the structure, function, classification and systematics of plants. They will learn about the evolutionary origins, adaptational trends of plants and ecological roles of plants. They will acquire skills in plant identification. They will learn to design and conduct observational and experimental studies of plant biology.

Level: UG

Prerequisite(s): BIOL 2322

Attribute: SCIH (p. 521)

**BIOL 3320 4 credits****Molecular Genetics**

Students will learn mechanisms of gene regulation, both inherited and epigenetic, primarily in eukaryotic organisms. They will study the fundamentals of genomics. They will learn the concepts underlying the most commonly used molecular biology laboratory techniques. In the laboratory, students will conduct experiments using molecular biology techniques including bacterial plasmid transformation, gel electrophoresis and polymerase chain reaction. They will learn how to work with model organisms for investigating inheritance and gene expression.

Level: UG

Prerequisite(s): BIOL 1110, BIOL 1210 and BIOL 2320

Attributes: ASTR (p. 523), SCIH (p. 521)

**BIOL 3321 4 credits****Advanced Cell and Molecular Biology**

Students will build on concepts covered in Cell and Molecular Biology (BIOL 2321) and explore advanced concepts associated with cell and molecular signalling. They will learn about topics including regulation of gene expression, cell to cell signalling, signalling between cells and the extracellular matrix, immunology, cell cycle regulation, apoptosis, and cancer. Students will be required to read and interpret current publications in these subject areas. Students will participate in labs focusing on cell culture and involve the use of advanced cell and molecular techniques such as Western Blot analysis, fluorescent labeling and microscopy, and cell transfection with Green Fluorescent Protein (GFP).

Level: UG

Prerequisite(s): BIOL 2321 and BIOL 2421

Attributes: ASTR (p. 523), SCIH (p. 521)

**BIOL 3330 4 credits****Microbiology II**

Students will learn the principles and laboratory techniques associated with the various fields of microbiology including environmental, medical, food and industrial microbiology. Students will explore the diversity of soilborne Streptomycetes and the role of antibiotic production by these organisms in the laboratory. Students will perform 16srRNA sequencing to identify an unknown microorganism.

Level: UG

Prerequisite(s): BIOL 2330

Attributes: ASTR (p. 523), SCIH (p. 521)

**BIOL 3421 3 credits****Molecular Biochemistry**

Students will examine the structural and functional characteristics of complex organic molecules, such as lipids, amino acids and nucleotides. They will build on their understanding of metabolism and anabolic/catabolic pathways to study the synthesis and breakdown of lipids, amino acids, and nucleotides. Students will investigate the molecular mechanisms and biochemical reactions associated with DNA transcription, DNA repair, and protein synthesis.

Level: UG

Prerequisite(s): BIOL 2421 and CHEM 2420

Attributes: ASTR (p. 523), SCIH (p. 521)

**BIOL 4140 4 credits****Animal Physiology**

Students will examine the diversity and function of animal physiological systems, including the nervous, endocrine, circulatory, respiratory, excretory, digestive and reproductive systems. They will compare and contrast these systems among animals groups from different evolutionary and ecological backgrounds, including domesticated animals. Students will examine the consequences of perturbation to physiological systems. They will investigate the role of different physiological systems in organism function through classroom activities, laboratory experiments, and literature surveys of current topics in animal physiology.

Level: UG

Prerequisite(s): BIOL 2321 and 3215

Attribute: SCIH (p. 521)

**BIOL 4150 3 credits****Evolutionary Biology**

Students will examine key concepts and processes in evolutionary biology including micro- and macroevolution, phylogenetics, population genetics, genome evolution, natural selection, sexual selection, adaptation, speciation, extinction, biodiversity and evolution of development. They will further investigate evolutionary themes by critically analyzing written and graphical material from scientific literature. Students will learn about the relevance of evolutionary biology to modern society by examining research into a range of contemporary topics such as the evolution of disease, and the application of evolutionary theory to conservation.

Level: UG

Prerequisite(s): BIOL 2320 and BIOL 2322

Attribute: SCIH (p. 521)

**BIOL 4160 4 credits****Human Cardiovascular and Respiratory Systems**

The students will apply essential principles and processes of anatomy, histology, physiology and general pathology to the study of human cardiovascular and respiratory systems. Their study will include anatomical and physiological investigations of normal organ activity, pathophysiological descriptions of organ and tissue dysfunctions and analysis of drug categories used for treatment. The students will investigate organ and tissue structure and function using laboratory techniques such as anatomical and histological procedures, data acquisition software, diagnostic tools and basic cell/molecular experimental design.

Level: UG

Prerequisite(s): BIOL 3160

Attribute: SCIH (p. 521)

**BIOL 4199 3 credits****Research Project 1**

Students will use the knowledge and skills gained in BIOL 3180 to develop a research proposal that can be conducted in the field or laboratory setting. Students will prepare a budget for the proposed research.

Level: UG

Prerequisite(s): All of: (a) BIOL 3180, (b) two 4-credit courses in BIOL at the 3100 level or higher, and (c) permission of the instructor.

Attribute: SCIH (p. 521)

**BIOL 4235 3 credits****Marine Biology**

Students will examine a variety of marine habitats and the diversity of algal and animal life forms that reside there. Students will study ecological principles that affect the distribution and abundance of marine life in intertidal, subtidal and pelagic communities. They will learn to identify local marine organisms (rocky and soft sediment intertidal organisms, plankton and nekton) on field trips. Students will also investigate human impact on marine environments and conservation of marine biodiversity.

Level: UG

Prerequisite(s): BIOL 3215 and BIOL 3180

Attributes: ASTR (p. 523), SCIH (p. 521)

**BIOL 4245 4 credits****Developmental Biology**

Students will examine organismal development from fertilization to adulthood with a particular emphasis on the underlying cellular and molecular mechanisms. Students will survey development in a number of animal and plant model systems, and develop an understanding of mammalian development. Students will examine current topics in developmental biology through analysis and discussion of current research papers. In the laboratory, students will conduct a research project examining a facet of development in an invertebrate model organism, and will gain experience in both written and oral reporting of research results.

Level: UG

Prerequisite(s): BIOL 2320, BIOL 2421, and BIOL 3180

Attributes: ASTR (p. 523), SCIH (p. 521)

**BIOL 4255 3 credits****Bioinformatics**

Students will learn the fundamental concepts of Bioinformatics, an encompassing field that connects Molecular Biology, Evolutionary Biology, Genomics and Health Science through the use of advanced computer algorithms and software. Students will learn to access DNA, RNA and protein databases and genomic maps and how to utilize Bioinformatic algorithms and software to understand and predict structure and function of these important biological molecules, and their involvement in human disease. Students will explore and discuss emerging topics in the rapidly advancing field of Bioinformatics. Students will participate in weekly computer labs to obtain hands-on experience accessing and utilizing online bioinformatic tools and resources for Biologists and Health Science professionals.

Level: UG

Prerequisite(s): BIOL 2320, BIOL 2421 and BIOL 3180

Attribute: SCIH (p. 521)

**BIOL 4260 4 credits****Human Neural, Excretory and Endocrine Systems**

The students will apply essential principles and processes of anatomy, histology, physiology and general pathology to the study of human gastrointestinal, urinary and nervous systems. Their study will include anatomical and physiological investigations of normal organ activity, pathophysiological descriptions of organ and tissue dysfunctions and analysis of drug categories used for treatment. The students will investigate organ and tissue structure and function using laboratory techniques such as anatomical and histological procedures, data acquisition software, diagnostic tools and basic cell/molecular experimental design.

Level: UG

Prerequisite(s): BIOL 3160

Attribute: SCIH (p. 521)

**BIOL 4299 3 credits****Research Project 2**

Students will carry out the research project identified in BIOL 4199 (Research Project 1). Students will reflect upon their experimental outcomes and make suggestions for future direction.

Level: UG

Prerequisite(s): BIOL 4199

Attribute: SCIH (p. 521)

**BIOL 4320 3 credits****Human Genetics**

Students will study several human genetic diseases, including examples of single gene mutations, chromosome mutations, and multifactorial traits. Students will investigate the nature of inherited diseases at the biochemical, cellular and phenotypic level. Students will learn how epigenetics, such as imprinting, can affect disease inheritance. They will study emerging fields of human genetics including genome editing and pharmacogenomics. Students will analyze ethical, legal and social issues relevant to human genetics.

Level: UG

Prerequisite(s): BIOL 3320

Attribute: SCIH (p. 521)

**BIOL 4360 4 credits****Human Immune and Reproductive Systems**

The students will apply essential principles and processes of anatomy, histology, physiology and general pathology to the study of the human immune system, reproductive systems and prenatal development. Their study will include anatomical and physiological investigations of normal organ activity, pathophysiological descriptions of organ and tissue dysfunctions and analysis of drug categories used for treatment. The students will investigate organ and tissue structure and function using laboratory techniques such as anatomical and histological procedures, data acquisition software, diagnostic tools and basic cell/molecular experimental design.

Level: UG

Prerequisite(s): BIOL 3160 and BIOL 3321

Attribute: SCIH (p. 521)

**BIOL 4900 3 credits****Special Topics**

Students will undertake an in-depth exploration of current biological research within the field of expertise of a particular faculty member. They will critique and discuss primary research papers in a seminar-style class. Students with credit for HSCI 4950 may not take BIOL 4900 for further credit. NOTE: Students may take this course a maximum of two times for further credit on different topics. The topic in a given semester will be determined in advance. Please check with the department for the current topic.

Level: UG

Prerequisite(s): 4 courses in BIOL at the 3000 level or higher, including BIOL 3180

Credit Exclusion: HSCI 4950

Attribute: SCIH (p. 521)

## Biology Qualifying (BIOQ)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

Note: These upgrading courses are preparatory and are not eligible for a Tuition Tax Credit (T2202A).

**BIOQ 1098 4 credits****Introduction to Biology**

Students will survey the diversity of life through time, and through diverse environments, applying the twin themes of evolution via natural selection and environmental ecology. They will examine the relationships of organisms with other members of the same species, with other species, and with the physical environment.

Level: CP

Prerequisite(s): One of the following: (a) English 12, (b) English 12 First Peoples; (c) English 11 (B), (d) ENGQ 1099; (e) ENGQ 1091, (f) ENGQ 1092, (g) ENGQ 1089, (h) ENGQ 0084 and ENGQ 0085, (i) ELST 0381 (B-), (j) Language Placement Index (LPI) Score (Essay 26 with EU 6+ and Reading Comprehension 16), (k) Academic and Career Preparation (ACP) English Assessment placement at Level 09, (l) KPU English Placement (EPT) into ENGQ 1091 or ENGQ 1092 or ENGQ 1099, (m) International English Language Testing System (IELTS) overall Band 6.0 (Listening Band 6.0, Reading Band 6.0, Writing Band 6.0, and Speaking Band 6.0), (n) Test of English as a Foreign Language (TOEFL) iBT Band 80

Attribute: ACAD (p. 521)

**BIOQ 1099 4 credits****Introduction to Human Biology**

Students will study introductory organic chemistry, bioenergetics, cell structure and function, and inheritance and genetics. Students will also study the anatomy and physiology of the human body, with particular emphasis on nutrition and the body's response to infectious disease.

Level: CP

Prerequisite(s): One of the following: (a) English 12, (b) English 12 First Peoples, (c) English 11 (B), (d) ENGQ 1099, (e) ENGQ 1091, (f) ENGQ 1092, (g) ENGQ 1089, (h) ENGQ 0084 and ENGQ 0085, (i) ELST 0381 (B-), (j) Language Proficiency Index (LPI) Score (Essay 26 with EU 6+ and Reading Comprehension 16), (k) Academic and Career Placement (ACP) English Assessment placement at Level 09, (l) KPU English Placement (EPT) into ENGQ 1091 or ENGQ 1092 or ENGQ 1099, (m) International English Language Testing System (IELTS) overall Band 6.0 (Listening Band 6.0, Reading Band 6.0, Writing Band 6.0, and Speaking Band 6.0), (n) Test of English as a Foreign Language (TOEFL) iBT Band 80  
Attribute: ACAD (p. 521)

## Brewing & Brewery Operations (HOPS)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**HOPS 1100 3 credits****Introduction to Brewing**

Students will be introduced to the history of beer and brewing. They will study the evolution of the brewing industry and the role played by individuals, organizations and governments. They will learn about the historical role of beer in nutrition, the impact of alcohol on the human body and the responsible use of alcohol.

Level: UG

Attributes: F2A5 (p. 521), SCIH (p. 521)

**HOPS 1105 3 credits****Brewing 1**

Students will learn the fundamentals of beer making, be introduced to basic ingredients used in brewing and will operate and perform equipment maintenance.

Level: UG

Attributes: F2A5 (p. 521), SCIH (p. 521)

**HOPS 1110 3 credits****Sensory Evaluation and Ingredients**

Students will learn how various ingredients affect the style and quality of beer. Students will develop skills to critically evaluate a beer's sensory properties, judge quality and detect potential defects in beer. They will investigate the physiology and psychology of sensory perception, and assess and describe the elements of beer quality using the appropriate terminology.

Level: UG

Attributes: F2A5 (p. 521), SCIH (p. 521)

**HOPS 1205 3 credits****Brewing 2**

Students will further develop their understanding of the beer making process. They will learn to select ingredients used in brewing. Students will operate and maintain equipment.

Level: UG

Prerequisite(s): HOPS 1105 and HOPS 1110

Attributes: F2A5 (p. 521), SCIH (p. 521)

**HOPS 1211 4 credits****Brewing Microbiology**

Students will learn about the role of yeasts and other micro-organisms in the brewing process. They will gain the knowledge necessary to manage yeast and control fermentation in order to optimize the brewing process and control the finished beer flavour. They will develop practical skills in brewing microbiological laboratory analysis.

Level: UG

Prerequisite(s): Chemistry 11 (C+) or CHEQ 1094

Attributes: F2A5 (p. 521), SCIH (p. 521)

**HOPS 1212 4 credits****Brewing Chemistry**

Students will review chemistry fundamentals as they apply to the production of beer with emphasis on production, fermentation, and filtration. Students will study the properties of gases and liquids, thermodynamics, pH, and pressure, and how they influence brewery production processes and beer quality. Students will develop knowledge and skills about the different types of chemicals used in beer production and maintenance of brewery hygiene. Students will become familiar with the lab equipment and lab techniques used to measure, monitor, and analyze the different chemical properties of beer.

Level: UG

Prerequisite(s): Chemistry 11 (C+) or CHEQ 1094

Attributes: F2A5 (p. 521), SCIH (p. 521)

**HOPS 1213 3 credits****Brewing Equipment and Technology**

Students will learn the efficient use of unit operations and processing equipment employed by the commercial beer making industry. They will examine safety considerations, quality requirements, environmental issues, and food safety regulations. Students will be introduced to the fundamentals of brewery services such as pumps, process automation, and utilities.

Level: UG

Prerequisite(s): HOPS 1105

Attributes: F2A5 (p. 521), SCIH (p. 521)

**HOPS 1214 3 credits****Introduction to Finishing and Packaging**

Students will study storage and different types of filters as they pertain to the clarification of beer. Students will practice carbonation methods and the stabilizing of beer ready for packaging operations. They will develop a basic knowledge of bottling, canning and kegging beer. Students will practice processing techniques and packaging.

Level: UG

Prerequisite(s): HOPS 1105

Attributes: F2A5 (p. 521), SCIH (p. 521)

**HOPS 2300 2 credits****Brewing Work Experience**

Students will participate in an approved work experience with a craft brewer, brewpub or major brewery (Minimum 455 hours). Students will be assigned to a variety of tasks at their work placement to increase their experience in the brewing and business operations of a brewery.

Level: UG

Prerequisite(s): Completion of all Year 1 HOPS courses

Attributes: F2A5 (p. 521), SCIH (p. 521)

**HOPS 2301 1 credit****Brewing Work Experience Dissemination**

Students will summarize their work experience gained in HOPS 2300 orally and in writing. They will participate in class discussions.

Level: UG

Prerequisite(s): HOPS 2300

Attributes: F2A5 (p. 521), SCIH (p. 521)

**HOPS 2305 3 credits****Brewing 3**

Students will learn advanced brewing techniques. They will independently operate and control brewing facilities. Students will further develop their knowledge of the beer-making process and the critical role of brewery safety.

Level: UG

Prerequisite(s): All of HOPS 1205, 1211 and 1212

Attributes: F2A5 (p. 521), SCIH (p. 521)

**HOPS 2310 3 credits****Product Evaluation and Judging**

Students will evaluate a beer's sensory properties under the categories of style profiles, quality and potential defects. Students will develop the necessary skills to organize and manage basic sensory panels within a brewery setting. They will be introduced to consumer sensory science practices. Students will develop strategies for participation in beer competitions.

Level: UG

Prerequisite(s): HOPS 1110

Attributes: F2A5 (p. 521), SCIH (p. 521)

**HOPS 2314 3 credits****Advanced Finishing and Packaging**

Students will study advanced filtration techniques and filter design. Students will explore the use of different carbonation and clarification methods. They will study methods used to stabilize beer. Students will assess the factors which contribute to proper beer service.

Level: UG

Prerequisite(s): All of HOPS 1212 and 1214

Attributes: F2A5 (p. 521), SCIH (p. 521)

**HOPS 2315 3 credits****Calculations and Recipe Formulation**

Students will develop beer recipes for testing in other brewing courses. They will use calculations to develop a brewery capacity plan, manage materials and determine precise alcohol levels as well as grain and hop usage rates in the beer recipes.

Level: UG

Prerequisite(s): HOPS 1205, 1212 and 1213

Attributes: F2A5 (p. 521), SCIH (p. 521)

**HOPS 2405 6 credits****Brewing 4**

Students in this final capstone course will apply advanced techniques of beer making to create a signature beer. Students will develop signature recipes that reflect a variety of seasonal and specialty beers. They will develop a complete analysis and report of each product.

Level: UG

Prerequisite(s): HOPS 2305, 2314 and 2315

Co-requisite(s): HOPS 2310

Attributes: F2A5 (p. 521), SCIH (p. 521)

**HOPS 2420 3 credits****Beer Marketing and Sales**

Students will be introduced to product marketing, sales management and promotional marketing techniques for the beer industry. Students will learn about important factors to consider in creating a sales and marketing plan and in setting up and running a sales and marketing department.

Level: UG

Attributes: F2A5 (p. 521), SCIH (p. 521)

**HOPS 2421 3 credits****Brewery Management Business Planning**

Students will learn the fundamentals of brewery management business planning. They will study scheduling of brewery operations and personnel, legal compliance, and record keeping. Students will be introduced to the basics of managing employees and teams.

Level: UG

Attributes: F2A5 (p. 521), SCIH (p. 521)

**HOPS 2422 3 credits****The Brewing Industry**

Students will study the scope of the beer industry and its impact on the community and the economy. They will be introduced to the governmental regulatory bodies and industry trade organizations which impact brewing companies. Student will learn about the distribution and container management systems that operate in British Columbia.

Level: UG

Attributes: F2A5 (p. 521), SCIH (p. 521)

## Business & Quantitative Methods (BUQU)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**BUQU 1130 3 credits****Business Mathematics**

Students will learn methods, procedures and applications of business mathematics, including the mathematics of merchandising, simple interest, and compound interest. Applications include discounts and markups, cost-volume-profit, short-term and long-term loans, credit card debt, savings and payment plan annuities, mortgages, bonds and investment decisions. Note: Students may earn credit for only one of ACCT 1130 or BUQU 1130, as they are identical courses.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521), PW\_2 (p. 522), QUAN (p. 532)

**BUQU 1230 3 credits****Business Statistics**

Students will learn statistical concepts, methods and procedures used in business, including descriptive statistics—graphics and numerical presentations, probability theory, sampling, estimation, hypothesis testing and linear regression. The use of statistical software applications will form part of the course. Students will be expected to know, or to acquire on their own, basic Excel skills. Note: Students may earn credit for only one of ACCT 1230 or BUQU 1230, as they are identical courses.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521), QUAN (p. 532)

**BUQU 2100 3 credits****Quantitative Methods for Business and Economics**

Students will learn the mathematical skills required for success in higher-level courses. Students will begin by deriving equations for the relationship between quantities such as national income and expenditure. They will draw graphs to illustrate the relationships they have found, and they will also identify the equilibrium. Students will learn to recognise the slope of a curve in a graph as a representation of a rate of change. They will apply the rate of change to practical economic problems, such as finding the optimum production level for a firm. By the end of the course, they will be able to find profit maxima or cost minima given constraints such as limited labour or machinery.

Level: UG

Prerequisite(s): ECON 1150 and ECON 1250

Attributes: BUSI (p. 521), QUAN (p. 532)

**BUQU 3230 3 credits****Applied Decision Analysis**

Students will learn to identify those business situations that require formal decision-analysis, to select the appropriate computer model, to run the model using computer software, and to interpret and describe the results. Students will investigate several case-studies portraying both good and poor decision-making skills and will make a formal presentation of their findings in a group setting. Students will learn to determine the optimal strategy for an organization, and to present a persuasive case for the adoption of that strategy.

Level: UG

Prerequisite(s): One of the following: ACCT 1230, BUQU 1230, CRIM 2103, MATH 1115, MATH 2315, MATH 2341, PSYC 2300, SOCI 2365, or equivalent first-year statistics course.

Attributes: BUSI (p. 521), QUAN (p. 532)

## Business (BUSI)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**BUSI 1101 3 credits****Canadian Business Education Foundations**

This course provides International students and those new to Canadian education with a greater understanding of expectations in a Canadian business environment, while developing the foundational skills, strategies and communication techniques essential for success in business education in Canada. Students will be introduced to the political, economic, legal, cultural and social landscape that influences Canadian business and will explore a broad range of business concepts in the Canadian context; paying particular attention to BC's business environment. Students will also get an overview of the business communication and academic skills that are required in Canadian business education.

Level: UG

Co-requisite(s): CMNS 1101

Attributes: ASTR (p. 523), BUSI (p. 521), PW\_3 (p. 522)

**BUSI 1110 3 credits****Fundamentals of Business in Canada**

Students will study and apply a broad range of business concepts in a Canadian context. They will learn the basic roles and responsibilities of managers in the major functional areas of business including human resources, industrial relations, information systems, operations, marketing, accounting and finance. Students will also get an overview of economic systems, forms of business ownership, general management principles, Canadian business law and ethics.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521), PW\_2 (p. 522)

**BUSI 1205 3 credits****Supervisory Skills**

This course is designed for students in programs other than business management. It is primarily intended for students in the Horticulture Technology program, but it may also be of interest to students in other disciplines who are preparing for supervisory positions in various fields. The role of supervisor is presented within the framework of the four functions of management: planning, organizing, leading and controlling. Students will be introduced to contemporary supervision techniques, participative leadership and team concepts which can be applied at the supervisory level.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521)

**BUSI 1209 3 credits****Business Management in Horticulture**

Students in Horticulture will learn the basic concepts of business management needed to be successful in the industry, including: budgeting, cash flow management, working with financial statements, basic banking procedures and dealing with financial institutions. The students also learn basic record keeping and inventory management. Key government regulation affecting horticulture businesses and management of risk in British Columbia will also be covered.

Level: UG

Attribute: BUSI (p. 521)

**BUSI 1210 3 credits****Essentials of Management**

Students will learn the principles of management through an in-depth examination of the universal functions of management: planning, organizing, leading and controlling. They will explore the role of managers as decision makers responsible for achieving the strategic goals and objectives of organizations. Students will study contemporary management practices, concepts and issues including key contingency models, strategic analysis tools, quality control techniques and perspectives on managerial ethics.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521)

**BUSI 1215 3 credits****Organizational Behaviour**

Students will learn how the behaviour of individuals and groups in work environments affect organizational performance. Topics will include individual attributes, motivation theories and strategies, group dynamics, teamwork, organizational structure, job design, leadership, organizational culture and politics, communication, conflict, stress and change management. Special emphasis is placed on diversity, cross-cultural issues and ethical conduct in organizations.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521)

**BUSI 1250 3 credits****Human Resources Management I**

Students will learn a strategic approach to human resources management, with special emphasis on current management practices relating to equity, diversity and employee rights. They will study and practise techniques and procedures such as HRM planning, recruiting, selection, employee relations, labour relations, performance management, compensation, training and development, health and safety and international HRM.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521)

**BUSI 2110 3 credits****Values, rationality, and power: Developing wise organizational action**

Students will learn the inner political nature of organizations and begin developing skills to become wise agents of action. This course will focus on three elements required to get things done in an organization: values, rationality, and power. Students will learn how these attributes impact people's ability to achieve goals and how, though they may lead to conflict, they are the means to build supportive alliances. This course will teach actionable strategies students may apply to manage these political dynamics to drive wise organizational action.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher, including ENGL 1100

Attributes: ASTR (p. 523), BUSI (p. 521)

**BUSI 2360 3 credits****Union Management Relations**

This is a survey of the Canadian labour scene: the historical evolution of Canadian Unionism; the impact of trade unions on industry and commerce; union objectives; employer organizations and labour unions as institutions; existing labour legislation and trends; labour-management relations; mediation and arbitration. The course is largely directed to current events, particularly in B.C.

Level: UG

Prerequisite(s): Second year standing including BUSI 1210 and/or BUSI 1215

Attributes: ASTR (p. 523), BUSI (p. 521)

**BUSI 2390 3 credits****Business Law**

Students will learn about the basic operations of the Canadian Legal system, the civil litigation process, and various aspects of substantive law which relate to, and have application in, Business and Commerce, including Torts, Contracts, Forms of Business Organizations, Consumer Law, Property, Employment, etc. Students will also understand how contracts are formed, enforced, and the remedies possible if contracts are breached. As well, students will develop a familiarization with some of the more important provincial and federal statutes that apply to the business environment. Students will apply basic legal principles and concepts to problems which may arise in the business world.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521)

**BUSI 2405 3 credits****Operations Management**

Students will learn and practise the fundamental design and implementation tools and techniques used in Operations Management (OM). They will be exposed to leading practices employed by entrepreneurs and managers in organizations of all sizes, both in manufacturing and service industries, particularly in small and medium-sized enterprises. Students will apply the theoretical qualitative and quantitative approaches to solve practical problems through exercises, case analyses, and a group term project involving work with real-world or simulated organizations.

Level: UG

Prerequisite(s): All of (a) ACCT 1210 or ACCT 2293 (b) BUSI 1210 or BUSI 1215 (c) ECON 1150 (d) MRKT 1199 and (e) BUQU 1230 or MATH 1115 or MATH 2341 or CRIM 2103 or PSYC 2300 or SOCI 2365

Attributes: ASTR (p. 523), BUSI (p. 521), QUAN (p. 532)

**BUSI 2425 3 credits****Enterprise Development and Business Planning**

Students utilize their knowledge of business principles to develop business plans, form companies, and actively manage their companies via a computer simulation. Students will apply several key concepts relating to the major functional areas of a business and will make realistic management decisions in a simulated competitive environment.

Level: UG

Prerequisite(s): 24 credit hours of 1100-level or higher including (ACCT 2293 or ACCT 1210), CMNS 1140, ECON 1150 and MRKT 1199

Co-requisite(s): BUSI 2405

Attributes: ASTR (p. 523), BUSI (p. 521)

**BUSI 2465 3 credits****Business Negotiations**

Students will learn negotiation techniques that may be used to achieve a variety of business objectives. They will experience the negotiation process and apply the principles of distributive and integrative bargaining through a spectrum of role-plays and simulations, with special emphasis on the importance of developing pre-negotiation plans and establishing benchmarks.

Level: UG

Prerequisite(s): BUSI 1210 or BUSI 1215

Attributes: ASTR (p. 523), BUSI (p. 521)

**BUSI 2490 3 credits****International Business**

Students will study modern strategic approaches and implementation activities used in the creation and operation of successful international businesses. They will develop specific managerial skills in order to deal effectively with international business matters from the techniques of international business transactions to the challenges of globalization, including the roles of culture, political economy, and technology. Students will be exposed to leading practices employed by entrepreneurs and managers and will apply the theories and concepts to solve problems through exercises, case analyses, and a term project involving direct or simulated work with real-world organizations. This course is designed for students who already possess a basic understanding of business fundamentals.

Level: UG

Prerequisite(s): 15 credits at 1100-level courses or higher including at least one of BUSI 1210 or 1215. Note: ECON 1250 is recommended.

Attributes: ASTR (p. 523), BUSI (p. 521)

**BUSI 2500 6 credits****Food Systems Field School**

The study of agriculture-business and food systems facilitates transdisciplinary learning and research that is intimately linked to the understanding of sustainability and the cultures that they are embedded in. This Field School will provide opportunities for students to implement problem solving and critical thinking methodologies to help students develop an understanding of the important role that agriculture and food systems play in connecting all aspects of the economy, business, environment and society as well as the value of regional food systems. Students will visit farms and food related businesses locally, nationally and/or internationally. When studying food systems, students will compare and contrast financing, marketing, pricing and logistics of food production. NOTE: Students will spend two weeks at the Field School site in addition to class sessions on campus before and after travel. Students must be nineteen years or older at the start of the course. Students may earn credit for only one of DESN 2500, AGRI 2500 or BUSI 2500 as they are identical courses. Note: Additional fees will apply to meet field trip expenses.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher.

Cross-listing: DESN 2500

Attribute: BUSI (p. 521)

## Business Management (BUSM)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**BUSM 5100 3 credits****Accounting and Financial Management for Managers**

Students will learn to interpret and analyze financial information that managers use for planning operations, controlling activities, and making decisions. They will learn to read financial statements and extract basic information for analysis. Students will explain cost behaviour and apply introductory management accounting techniques such as break-even and cost-volume-profit analysis, identifying relevant costs for decision making, cash flow budgeting, and activity-based costing. Students will be introduced to corporate finance and assess sources of funding to operate a business in terms of borrowing funds or securing equity investment and making long-term capital budgeting decisions. Students will examine business cases and communicate quantitative and qualitative analysis in written reports and oral presentations. Note: This course may be offered in compressed mode. Consult the current timetable.

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

**BUSM 5110 3 credits****Managing Dynamic Teams**

This course will cover the skills needed to build, lead and motivate high-performance teams as a leader. It is intended to provide students with both a conceptual understanding, as well as experiential learning opportunities in initial stages of team construction and development, examining issues of power and control in team functioning, facilitating team problem solving and decision making, evaluating team performance and individual contributions, and providing feedback on team behaviour. Working on virtual teams is an emerging challenge for many leaders and methods for working in these environments will be examined. Note: This course may be offered in compressed mode. Consult the current timetable.

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

**BUSM 5120 3 credits****Project Management**

Students will learn the key project management concepts, tools and techniques through which projects are selected, planned, executed, monitored and controlled, and brought to a close. They will explore and practice competencies in the nine key project management areas: scope, time, cost, quality, human resources, risk, procurement, communication, and integration management. Note: This course may be offered in compressed mode. Consult the current timetable.

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

**BUSM 5130 3 credits****Quantitative Methods for Business Management**

This course will provide the foundation and experience for students to apply a variety of modeling approaches to management problems and decision making in a variety of business functions, e.g., marketing, operations management, finance, accounting, long term strategy and managerial economics. Practical experience in statistics will be provided, and on completion students will be able to critically assess statistical analysis undertaken in their workplace.

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

**BUSM 5140 3 credits****Negotiations and Stakeholder Communications**

This course will help students become more effective communicators and decision-makers by learning proven techniques for building and maintaining relationships, applying appropriate power and influence, structuring agreements, and developing stakeholder buy-in in a variety of negotiation scenarios. Students will examine core decision-making challenges and apply strategies and techniques to effectively engage colleagues, staff, partners, customers, and clients in collaborative negotiations.

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

**BUSM 6100 4 credits****Accounting and Financial Management for Managers**

Students will learn to interpret and analyze financial information that managers use for planning operations, controlling activities, and making decisions. They will learn to read financial statements and extract basic information for analysis. Students will explain cost behaviour and apply introductory management accounting techniques such as break-even and cost-volume profit analysis, identifying relevant costs for decision making, cash flow budgeting, and activity based costing. Students will be introduced to corporate finance and assess sources of funding to operate a business in terms of borrowing funds or securing equity investment and making long term capital budgeting decisions. Students will examine business cases and communicate quantitative and qualitative analysis in written reports and oral presentations. Note: This course may be offered in compressed mode. Consult the current timetable.

Level: GR

Attributes: BUSI (p. 521), F2A9 (p. 521)

**BUSM 6110 3 credits****Project Management**

Students will learn the key project management concepts, tools and techniques through which projects are selected, planned, executed, monitored and controlled, and brought to a close. They will explore and practice competencies in the nine key project management areas: scope, time, cost, quality, human resources, risk, procurement, communication and integration management. This course is key to applying project management techniques to specific knowledge base in the Graduate Diploma in Business Administration (e.g. Green Projects, Green Innovation, Global Business Trade projects). Note: This course may be offered in compressed mode. Consult the current timetable.

Level: GR

Attributes: BUSI (p. 521), F2A9 (p. 521)

**BUSM 6130 3 credits****Change Management and Digital Transformation for Business**

Students in this course will study managing change and some traditional aspects of change management. The course will also cover the emerging field of digital transformation in organizations through the lens of organizational strategy, people, processes and technology. Digital transformation when designed and deployed appropriately has the capacity, at the very core of business to fully leverage changes and opportunities. This course covers the “digital transformation revolution” as part of the new economy and places it at the center of growth and innovation strategies in organizations as well as “holistic optimization” which looks at the broader picture of improvement in organizations, by actually setting in motion the necessary transformations and innovations and its interconnectedness. Last but not least, the course will cover the role that information management plays in digital transformation.

Level: GR

Attributes: BUSI (p. 521), F2A9 (p. 521)

**BUSM 6150 3 credits****Managing Innovation**

Students will learn how to manage innovation using formal processes, frameworks and tools. They will learn about the characteristics of knowledge-based institutions and will learn the role of Intellectual Property management, IP tools. Students will study stimulation of creativity and harnessing of technologies, development of goods, services and processes, business model innovation, and measurement of innovation performance. They will be given the opportunity to examine successful innovation management practices in organizations of all types and sizes including but not limited to design and innovation in operations (e.g. supply-chain management).

Level: GR

Attributes: BUSI (p. 521), F2A9 (p. 521)

**BUSM 6160 3 credits****Strategic Planning**

This course introduces key concepts, tools and principles of strategy formulation. This is an integrative and interdisciplinary course. It helps in the Development of organizational strategy with a broad range of stakeholders, maintaining and advancing ethics and environmental sustainability in the organization. The course covers the identification and building up of competitive advantages in the organization that leads to responsible financial sustainability. The course covers the formulation of short and long-term strategies and policies and the coordination of business activities for the whole enterprise. As mentioned above, this is an integrative course in which the strategy formulation will be framed on a simulated or real business case utilizing skills and knowledge from previous courses, knowledge and skills.

Level: GR

Attributes: BUSI (p. 521), F2A9 (p. 521)

**BUSM 6180 5 credits****Graduate Capstone Experience Practicum**

Professionals will manage, work-hands on and have a professional presentation on a comprehensive project that will meet the requirements of an organization. The project can also be narrow in scope but comprehensive in its design (e.g. new clean technology, innovation of a product or service in an international context, or a business plan with the respective academic framework). They will develop and complete the project in partnership with industry. Professionals will have an opportunity to integrate business theory with polytechnic skills. The business theory will be fully researched and it is not limited to the client organization but includes the broader literature on the subject matter in addition to the client’s primary research. When appropriate, professionals taking the course will provide recommendations that will have metrics attached to the plan, so the operational organization client can measure the success or failure of the activity undertaken.

Level: GR

Attributes: BUSI (p. 521), F2A9 (p. 521)

## **Carpentry/Building Construction (CARP)**

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables/) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**CARP 1102 2 credits****Safe Work Practices**

Students will learn the skills and work habits required for success in the carpentry trade. They will identify the relevant sections of the WorkSafeBC OH&S Regulation and will recognize the potential hazards affecting personal safety and access on the construction site.

Level: VO

Attribute: TRAD (p. 521)

**CARP 1104 3 credits****Hand and Power Tools**

Students will learn to measure, lay out and safely cut and assemble wood into various building components, jigs and projects using hand tools and portable and shop power tools commonly used in the carpentry trade.

Level: VO

Prerequisite(s): CARP 1102

Attribute: TRAD (p. 521)

**CARP 1109 3 credits****Building Materials, Codes and Drawings**

Students will learn and examine basic drafting skills to allow them to read residential blueprints. They will identify the basic elements of wood, and will identify how wood has been engineered for use in modern design through new technology. Students will identify the role of building codes and bylaws to determine proper building practices. They will describe the construction planning process along with trade mathematics.

Level: VO

Attribute: TRAD (p. 521)

**CARP 1115 2 credits****Building Site Layout & Leveling**

Students will apply Pythagoras' theorem to layout procedures for residential foundations. They will learn basic leveling techniques using the automatic levels to current industry standards. Students will also learn to measure, set and record the results in a surveyor's field book. They will lay out a building and prepare batter boards and set building lines for a residential foundation.

Level: VO

Prerequisite(s): CARP 1109

Attribute: TRAD (p. 521)

**CARP 1119 2.5 credits****Building Residential Concrete Formwork Systems**

Students will learn about concrete forming systems used in residential construction and light commercial applications. They will identify foundation requirements, set templates, and form block-outs according to the Building Code and standard construction practices. Students will use concrete fasteners to attach formwork materials to the concrete.

Level: VO

Prerequisite(s): CARP 1115

Attribute: TRAD (p. 521)

**CARP 1125 3.5 credits****Floors and Walls: Residential Framing Systems**

Students will build components of Western Platform Framing applying the British Columbia Building Code to the structures. They will frame floors and walls. Students will follow the WorkSafeBC OH&S Regulation for all activities.

Level: VO

Prerequisite(s): CARP 1119

Attribute: TRAD (p. 521)

**CARP 1130 3.5 credits****Stairs and Decks: Residential Framing Systems**

Students will build decks and stair assemblies used in residential home building according to the British Columbia Building Code. They will frame stairs and decks using standard framing practices in the industry according to the British Columbia Building Code. Students will follow the WorkSafeBC OH&S Regulation for all activities.

Level: VO

Prerequisite(s): CARP 1125

Attribute: TRAD (p. 521)

## Chemistry (CHEM)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**CHEM 1101 4 credits****CSI: Chemical Sciences Investigation**

Students will learn introductory chemical concepts framed in the context of the forensic sciences and will perform some of the techniques seen on crime shows. Students will, for example, examine latent fingerprints by fuming and dusting a variety of surfaces, analyze soil samples, and identify a crime scene plastic sample by density analysis and flame tests. NOTE: This course is intended for students with little background in math and sciences that have a quantitative requirement (or need lab-sciences credit) to complete a degree in a Faculty other than Science (e.g. Arts, Business). This course may not be used as a prerequisite for further chemistry courses. Students with CHEM 1105 or higher may not take this course for further credits towards graduation.

Level: UG

Attributes: ASTR (p. 523), SCIH (p. 521), PW\_3 (p. 522), QUAN (p. 532)

**CHEM 1105 4 credits****Introductory Chemistry**

Students will learn: Chemical formula calculations, stoichiometry, molality of solutions, limiting reagents & percent yields, thermochemistry, freezing point depression, boiling point elevation, liquids and gases, acids and bases, ionic equilibria, chemical equilibria, and oxidation and reduction. They will also perform laboratory work. Students with credit for ENVI 1106 may not take this course for further credit towards graduation requirements.

Level: UG

Prerequisite(s): Level E1 as defined in the Math Alternatives Table (p. 779), and one of the following: CHEQ 1094, Chemistry 12 (P), or Chemistry 11 (C+).

Credit Exclusion: ENVI 1106

Attributes: ASTR (p. 523), SCIH (p. 521), PW\_3 (p. 522)

**CHEM 1110 4 credits****The Structure of Matter**

Students will study the modern view of atomic structure, nuclear chemistry, theories of bonding and molecular structure, organic chemistry (properties and reactions of the major functional groups and isomerism) after a brief review of stoichiometry, gases and the treatment of experimental data. Students will also perform experiments in the laboratory.

Level: UG

Prerequisite(s): Level C1 as defined in the Math Alternatives Table (p. 779), and either CHEM 1105 or Chemistry 12 (C+).

Co-requisite(s): MATH 1112 is strongly recommended.

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**CHEM 1154 4 credits****Chemistry for Engineering**

Students will learn about stoichiometry, gases, liquids, solids and solutions, equilibrium, acids and bases, thermodynamics, and chemical kinetics. They will also perform laboratory work. Note: This course may not be used as a prerequisite for further chemistry courses. This course is designed for students transferring to an engineering program. Students with credit for CHEM 1210 may not take this course for further credit towards graduation requirements.

Level: UG

Prerequisite(s): Level A1 as defined in the Math Alternatives Table (p. 779), and either CHEM 1105 or Chemistry 12 (C+).

Credit Exclusion: CHE 210H, CHE 210P, CHE 210Q, CHEM 1210, CHEM 210

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**CHEM 1210 4 credits****Chemical Energetics and Dynamics**

Students will learn about topics including liquids, solids and solutions, a review of redox reactions, electrochemistry, the laws of thermodynamics, equilibrium, acids and bases, ionic equilibria, and chemical kinetics. They will also perform experiments in the laboratory.

Level: UG

Prerequisite(s): Level A1 as defined in the Math Alternatives Table (p. 779), and CHEM 1110.

Credit Exclusion: CHEM 1154

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**CHEM 2311 3 credits****Physical Chemistry for Life Sciences**

Students will study chemical kinetics, thermodynamics, and spectroscopy at a second year level without some of the mathematical rigor commonly associated with a second-year physical chemistry course. Students with credit for CHEM 3310 may not take this course for further credit.

Level: UG

Prerequisite(s): CHEM 1210 and (MATH 1120 or 1130 or (1140 with a C+ or better))

Co-requisite(s): MATH 1220 or 1230

Credit Exclusion: CHE 310Q, CHE 310R, CHEM 2310, CHEM 310, CHEM 3310

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**CHEM 2315 4 credits****Analytical Chemistry**

Students will learn the fundamental concepts of analytical chemistry. They will study quantitative analysis of aqueous solutions and solid samples, experimental design and data analysis, as well as spectroscopic and chromatographic methods. Students will engage in extensive laboratory work and practical applications.

Level: UG

Prerequisite(s): CHEM 1210

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**CHEM 2320 4 credits****Organic Chemistry I**

Students will study the fundamental aspects of modern organic chemistry as illustrated by the structure, physical and spectroscopic properties and reactions of alkanes, cycloalkanes, alkenes, dienes, alkynes, halogen compounds, alcohols, ethers, aldehydes and ketones. They will also perform experiments in the laboratory.

Level: UG

Prerequisite(s): Either (a) CHEM 1210 or (b) CHEM 1110 (B).

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**CHEM 2420 4 credits****Organic Chemistry II**

Students will study the structure and reactions of aromatics, polycyclic aromatic and heteroaromatic compounds, and their enolates, and an introduction to the chemistry of fats, carbohydrates and proteins. They will also perform experiments in the laboratory. NOTE: This course is a continuation of CHEM 2320.

Level: UG

Prerequisite(s): CHEM 2320

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**CHEM 3310 4 credits****Physical Chemistry**

Students will study chemical kinetics and thermodynamics with the appropriate mathematical rigour. They will also apply these physical chemistry principles in a lab setting. Students with credit for CHEM 2311 may not take this course for further credit.

Level: UG

Prerequisite(s): CHEM 1210 and (MATH 1220 or 1230)

Credit Exclusion: CHEM 2311

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**CHEM 3320 4 credits****Natural Products Chemistry**

Students will study naturally occurring compounds, their structural types, structure elucidation, chemical synthesis, biosynthesis, and biological significance. They will also perform experiments in the laboratory to learn how to isolate, purify, identify and modify compounds of natural origin for pharmaceutical use and for other purposes.

Level: UG

Prerequisite(s): CHEM 2320

Co-requisite(s): CHEM 2420

Attributes: ASTR (p. 523), SCIH (p. 521)

**CHEM 4320 4 credits****Drug Discovery, Design & Development**

Students will learn and understand the principles and strategies for drug discovery, design and development. They will examine the chemical and biochemical principles and reactions vital to drug action and drug design using clinically important drugs as examples. Students will study drug activities against different types of targets, for example enzymes, receptors and oligonucleotides. They will learn drug absorption, distribution, metabolism and elimination process. Students will discover drug discovery processes involving hit discovery, lead optimization and drug synthesis.

Level: UG

Prerequisite(s): CHEM 2320

Co-requisite(s): CHEM 2420

Attributes: ASTR (p. 523), SCIH (p. 521)

**CHEM 4330 3 credits****Modern Alchemy**

Students will investigate aspects of nuclear and radiochemistry: radioactivity; atomic structure and stability; decay processes; interaction of radiation with matter; detection and measurement of radiation; applications of nuclear and radiochemistry. NOTE: It is recommended that students take (PHYS 1102 or 1220) and (MATH 1220 or 1230) as prerequisites.

Level: UG

Prerequisite(s): 45 credits including CHEM 1210

Attribute: SCIH (p. 521)

**CHEM 4399 3 credits****Current Topics in Medicinal Chemistry**

Students will discuss topics related to novel and contemporary areas of Medicinal Chemistry appearing in current literature, such as: aspects of drug research; identification and validation of emerging drug targets; drug design approaches; combinatorial methods; drug receptor interactions on the intermolecular level and structure-activity relationships.

Level: UG

Prerequisite(s): CHEM 2320 and CHEM 2315

Co-requisite(s): CHEM 2420

Attribute: SCIH (p. 521)

**CHEM 4610 4 credits****Instrumental Analysis**

Students will study current mainstream instrumental analysis techniques from both a theoretical and practical perspective. They will discuss the theory behind signal generation and measurement, the importance of optimization of all stages of an analysis, and the theory behind the instrumental techniques to be studied. Students will perform labs to illustrate and reinforce the concepts covered in the lecture.

Level: UG

Prerequisite(s): CHEM 2315

Attributes: ASTR (p. 523), SCIH (p. 521)

## Chemistry Qualifying (CHEQ)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

Note: These upgrading courses are preparatory and are not eligible for a Tuition Tax Credit (T2202A).

**CHEQ 1094 4 credits****Preparation for General Chemistry**

Students will study: exponential notation, significant figures, dimensional analysis, metric system, density, symbols, chemical formula and equations, percentage composition and simplest formula, atomic mass, mole concept, stoichiometry, solutions molarity, classification of matter, gases, periodic table and some descriptive chemistry. They will also perform experiments in the laboratory.

Level: CP

Prerequisite(s): Level G1 as defined in the Math Alternatives Table (p. 779)

Attribute: SCIH (p. 521)

## Communications (COMM)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**COMM 1100 3 credits****Foundations of Communication Studies**

Students will be given a comprehensive overview of what it means to study communications. They will explore classic definitions and models of communications and trace how these notions have changed with the introduction of new media, new messages, new communicators and a more active and participatory audience. They will explore: communication theories, communication media, the key power players in the realm of communications (particularly in North America) and the role of the audience.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**COMM 1110 3 credits****Television and Social Change**

Students will explore the evolution of North American television programs from their beginnings to the present day, in the context of their impact on and reflection of social change. Students will critically view and analyse the iconic television programs produced since World War Two and consider their role in mirroring and/or affecting society at large from a cultural, political and social perspective.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**COMM 1200 3 credits****Visual Literacy**

Students will critically explore visual-literacy concepts and theories that are applicable to a broad range of media including, but not limited to, web sites, television, newspapers, fine art, advertising, social media, photography, zines, comics/graphic novels and film/video. They will learn how to interpret, negotiate and evaluate effective visual communications through screenings, readings, workshops, exercises and classroom discussion. Students will learn how to 'see' the basic graphic composition of images, such as design elements and principles. They will analyze visual-communication problems, discuss solutions and produce personal projects that reflect their understanding of visual literacy. Note: This course may include mandatory field trips.

Level: UG

Attribute: ARTS (p. 521)

**COMM 2100 3 credits****Media Ethics and Law**

Students will learn about the philosophical underpinnings of various approaches to ethical dilemmas, and about current media-related laws. They will consider these theories and laws relative to such issues as privacy, offensive content, freedom of expression, contempt of court and conflict of interest. They will explore these issues as they relate to various communication methods including, but not limited to, social networking, blogs and other interactive media, citizen and professional journalism, and various entertainment media. They will critically examine and analyze content from an ethical and legal perspective and discuss the impact of new technologies on media ethics and law.

Level: UG

Prerequisite(s): 6 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**COMM 2210 3 credits****Media, Audiences and Popular Culture**

Students will be introduced to the study of popular culture. They will map the topic in different media, such as television, movies, advertising, video games, animation, music, public art and the Internet. They will also explore how popular culture has aligned itself historically with different goals: cultural, economic, political, and social. They will explore the major organizations and other players involved in communications around the world with particular focus on North America. Note: This course may include required field trips.

Level: UG

Prerequisite(s): 6 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**COMM 3100 3 credits****Media and Diversity**

Students will examine the media from the perspective of a diverse audience, with a specific focus on issues such as race, religion, gender and culture. They will analyze diversity issues in media content for fairness and balance. Note: This course may include required field trips.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including ENGL 1100

Attributes: ASTR (p. 523), ARTS (p. 521)

**COMM 3200 3 credits****Celebrity and the Media**

Students will explore the evolution and impact of celebrity culture. They will examine how changes in media technology have changed the nature of celebrity. They will study the relationship between celebrity culture and various aspects of society, including politics, consumerism, and privacy. They will explore the impact of celebrity culture on notions of self and identity. They will critically reflect on the ways they engage with celebrity.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including either SOCI 2275 or 3 credits from a course in COMM.

Attributes: ASTR (p. 523), ARTS (p. 521)

**COMM 3210 3 credits****Communication and Everyday Life**

Students will examine the interaction of language and culture in everyday life. They will explore how language gives order not only to communication but to perceptions of the world and how it operates. Students will analyze how historical power relations have shaped language and, subsequently, policy and law. Students will learn discourse analysis techniques to assess and analyze a diverse range of influential "texts" encountered in everyday life, such as gossip, humour, music, film, visual art, and architecture. They will examine how structures of power and oppression are embedded within institutions that employ, manufacture, and broadcast texts, and how dialogic communication and discourse analysis can enable the deconstruction of the underlying forces that shape these texts.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including one of the following: FINA 2147, SOCI 2255, SOCI 2275 or 3 credits from a course in COMM.

Attributes: ASTR (p. 523), ARTS (p. 521)

**COMM 3220 3 credits****Social Media, New Technology, and Society**

Students will examine social media theory and practice, wearable and mobile app technologies, and their relationships to social changes in work, leisure, and everyday life. They will explore the range of imperatives served by these new technologies: from commercial to personal, from political to activist, and from artistic to countercultural. Students will discuss the ethics of social media and mobile and wearable technologies. They will also address intersections of technology and gender, race, sexuality, social justice, identity, policy, and law. Note: Students require access to a computer, tablet, or smart phone with Internet access.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including one of the following: SOCI 2255, SOCI 2275 or 3 credits from a course in COMM.

Attribute: ARTS (p. 521)

**COMM 3230 3 credits****Sports, Media and Audience**

Students will explore the relationship between sports, athletes, media, and audience. They will analyze the relationship between sport media and race, gender, sexuality, nationalism, consumerism, violence, civic life and other issues. They will examine issues relating to journalism ethics and the production of sports media, including mass media and social media.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher.

Attributes: ASTR (p. 523), ARTS (p. 521)

## Community & Health Studies (CAHS)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**CAHS 1101 3 credits****Introduction to Technology and Academic Writing in Health Care**

Students will develop skills in the use of computers and the Internet. They will explore the application of technology in their professional practice as well as its utility in academic writing.

Level: UG

Attribute: HLTH (p. 521)

## Computer Business Systems (CBSY)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**CBSY 1105 3 credits****Computer Business Applications**

Proficiency in the use of computer business applications is an essential requirement in the business environment. Students will learn to use computer application software efficiently and proficiently. The course provides detailed instruction in the use of spreadsheet, word processing, and presentation software. Students will develop and apply computer skills and concepts that are critical for academic and career through business-oriented examples taught in a hands-on environment (i.e. computer lab).

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521), PW\_2 (p. 522)

**CBSY 1110 3 credits****Business Problem Solving with Spreadsheets**

Students will employ spreadsheet software to address real business problems, and will be provided with detailed instruction in the use of it. Students will develop and apply spreadsheet skills and concepts that are critical for academic and career through business-oriented examples taught in a hands-on environment (i.e. computer lab).

Level: UG

Attribute: BUSI (p. 521)

**CBSY 2205 3 credits****Management Information Systems**

Students will examine the use of Information Systems from a management perspective in business. They will study how Information Systems are structured, and how these systems are used to support management decision making and gain a competitive advantage.

Level: UG

Prerequisite(s): 15 credits from undergraduate courses at the 1100 level or higher

Attributes: ASTR (p. 523), BUSI (p. 521)

**CBSY 2306 3 credits****Accounting Systems and Advanced Reporting Applications**

Students will learn how to solve business problems using spreadsheets. Students will learn to use accounting systems to create accounts, define settings, record transactions, perform periodic processing and reporting within the General Ledger, Accounts Payable, Accounts Receivable, Payroll, Inventory and Project Modules. Students will learn to use the results of accounting system reports in spreadsheets to analyze data in support of business decision making.

Level: UG

Prerequisite(s): ACCT 1210 or ACCT 2293

Attribute: BUSI (p. 521)

**CBSY 2310 3 credits****Advanced MS Office and Web Site Applications**

Students will learn to identify business problems and solve them using database, spreadsheet, Web page development and Internet browser software. They will integrate the various current software components of Microsoft Office, industry standard website design applications, and web browsing software in solving these problems. Note: For graduation purposes, credit will not be granted for both CBSY 2310 and 2305.

Level: UG

Prerequisite(s): CBSY 1105

Attributes: ASTR (p. 523), BUSI (p. 521)

## Computer Science (CPSC)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**CPSC 1100 3 credits****Introduction to Computer Literacy**

Students will learn concepts and trends in computer science. Students will gain an understanding of the terminology, current issues and changes in the technology of computing. Students will learn to use major application packages, such as word processing, spreadsheet and relational database. Students will develop structured programs using a high-level language. Students will also examine social and ethical issues in computing.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521), PW\_2 (p. 522)

**CPSC 1103 3 credits****Principles of Program Structure and Design I**

Students will learn fundamental programming concepts using the C++ programming language. Principles of problem solving and algorithm design will be introduced as well as basic techniques for data representation and manipulation. Students will learn how to design, develop, test and document well-structured programs.

Level: UG

Prerequisite(s): Level B1 as defined in the Math Alternatives Table (p. 779)

Attributes: ASTR (p. 523), BUSI (p. 521), QUAN (p. 532)

**CPSC 1204 3 credits****Principles of Program Structure and Design II**

Students will learn fundamental programming design and implementation concepts in the context of object-oriented programming. Students will review elementary concepts and learn more advanced concepts such as: data structures, objects, object interaction, inheritance, polymorphism, interface, abstract classes, and exception handling. Students will also be introduced to concepts and design principles of event-driven programming and graphical user interfaces. Students will learn methods for good analysis, design and style.

Level: UG

Prerequisite(s): CPSC 1103 or INFO 1112

Attributes: ASTR (p. 523), BUSI (p. 521), QUAN (p. 532)

**CPSC 2302 3 credits****Data Structures and Algorithms**

Students will learn fundamental tools of data and program organization including object-oriented programming, algorithms, data abstraction and data structures. They will learn to implement and to use data structures such as Lists, Stacks, Queues, Trees, Hash Tables, and Graphs. Students will learn algorithms for tasks including searching and sorting. They will learn to use mathematical tools for analyzing algorithm efficiency.

Level: UG

Prerequisite(s): CPSC 1204 or INFO 2313

Cross-listing: INFO 2315

Attributes: ASTR (p. 523), BUSI (p. 521), QUAN (p. 532)

**CPSC 3110 3 credits****Simulation**

Students will learn computer simulation and modeling techniques. They will learn simulation methodologies and techniques for random number and stochastic variate generation. They will also learn simulation design, analysis and estimation based on endogenously created data, simulation model validation and variance reduction. Students will implement simulation models for real-life applications using a computer programming language.

Level: UG

Prerequisite(s): (CPSC 2302 or INFO 2315) and MATH 2315

Attributes: ASTR (p. 523), BUSI (p. 521)

## Computer-Aided Design & Drafting (CADD)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**CADD 1100 4 credits****Drafting Fundamentals**

Students will set up drawings using CAD software and use geometric construction and appropriate line-types to produce orthographic and pictorial representations of models. They will use drafting fundamentals to complete the various Industry typical drawing techniques and presentations. Students will apply typical drafting conventions, fill-in title blocks and use quality control procedures to complete drawings. They will prepare an assembly drawing in CAD software and produce hand sketches of sections and assemblies. Students will employ computer technology skills for file management and CAD software.

Level: UG

Attribute: SCIH (p. 521)

**CADD 1110 4 credits****Summative Project**

Students will follow the design process and use sketches, standards and codes to produce a set of drawings that would be suitable to mechanical, industrial or architectural projects. They will produce site and other required plans along with cross sections and elevations. Students will extract details and produce schedules. They will select appropriate presentation scales and apply annotation, dimensions and symbols as per industry standards.

Level: UG

Attribute: SCIH (p. 521)

**CADD 1150 4 credits****Computer Aided Drafting & Design (CADD) Software**

Students will operate CAD software and apply advanced drawing development techniques. They will use CAD software to perform analytical calculations, and to import and export data using external references and other techniques. Students will create three-dimensional (3D) solid and wire frame models. They will use presentation techniques to create two-dimensional (2D) images and 3D rendered images from 3D models. Students will customize the software user interface. Students will employ computer technology skills for working within an office network.

Level: UG

Attribute: SCIH (p. 521)

**CADD 1160 3 credits****Introduction to Office Procedures and Software**

Students will use office software with CADD software to exchange data and graphics. They will follow basic office procedures to produce memos, change orders, and follow document control and revision procedures. Students will describe a variety of disciplines in the Drafting/CADD field, develop an educational plan, and prepare a technical report. They will apply geometric, algebraic, and trigonometric functions to solve problems. Students will employ computer technology skills for office software and file management, research sustainable materials and fabrication/construction processes and explain project management procedures.

Level: UG

Attribute: SCIH (p. 521)

**CADD 1161 4 credits****Office Procedures**

Students will use office software with CADD software to exchange data and graphics. They will follow basic office procedures to produce memos, change orders, and follow document control and revision procedures. Students will describe a variety of disciplines in the Drafting/CADD field, develop a personal educational plan, and prepare a technical report. They will apply geometric, algebraic, and trigonometric functions to solve problems. Students will employ computer technology skills for office software and file management, describe sustainable design and practices, and explain project management procedures. They will apply descriptive geometry procedures to solve problems, and apply surveying fundamentals to calculate contours, latitude and departure. Students will use photo editing software and create an e-Portfolio.

Level: UG

Attribute: SCIH (p. 521)

**CADD 2100 4 credits****CADD Graphics and Models: Rendering and Animation**

Students will render 2D graphics and create 2D perspectives. They will apply color, texture and shadows. Students will create digital 3D models, build physical models from common materials and use photo editing software to insert models into photographs. They will import 3D models into rendering and animation software and apply lighting and camera locations. Students will create motion paths, create flythrough paths and create assembly animations. They will give presentations of completed projects.

Level: UG

Prerequisite(s): 16 credits from courses in either a) CADA b) CADS or c) CADM or CADI

Attribute: SCIH (p. 521)

**CADD 2110 4 credits****Surveying and Site Work**

Students will apply surveying fundamentals and use surveying equipment to collect coordinates and elevations. They will apply algebra, geometry, trigonometry and introductory calculus to perform surveying calculations. Students will prepare a subdivision drawing and indicate boundaries, access, roads and services. They will indicate contour lines and perform cut and fill calculations. Students will prepare a site layout, determine site grading and drainage, prepare retaining walls and outlines of buildings to complete a site plan drawing. They will use 3D modeling software for Civil applications.

Level: UG

Prerequisite(s): (CADD 1100 or DRAF 1100) and (CADD 1110 or DRAF 1110) and (CADD 1150 or DRAF 1150) and (CADD 1160 or DRAF 1160 or DRAF 1270)

Attribute: SCIH (p. 521)

**CADD 2160 4 credits****Professional Practice for Design and Drafting**

Students will explain document control procedures and apply a document change-manage process. They will follow health and safety procedures, describe the effects of office ergonomics, and follow appropriate office department related to design and drafting. Students will explain liability issues, follow ethical principles, and explain basic project management principles related to design and drafting. They will identify the roles of Engineering and Architectural professionals..

Level: UG

Prerequisite(s): 16 credits from courses in either a) CADA b) CADS or c) CADM or CADI

Attribute: SCIH (p. 521)

**CADD 2210 4 credits****Document Control and Web Portfolio**

Students will explain the need for document control and identify roles and responsibilities in document control. They will categorize types of documents and their purposes and implement document control procedures. Students will set up document control websites, create information websites and create portfolio websites. They will participate in online meetings with document and application sharing. Students will give presentations of completed projects.

Level: UG

Prerequisite(s): 16 credits from courses in either a) CADA b) CADS or c) CADM or CADI

Attribute: SCIH (p. 521)

**CADD 2220 4 credits****Sustainable Design**

Students will develop an awareness of sustainability issues and how they influence sustainable practices in design. They will identify regulatory bodies and their roles, identify environmental impact standards and describe sustainable design certification. Students will evaluate and analyze green design strategies, product lifecycle and sustainable materials and systems through a variety of methods including site visits. They will interpret output from a variety of efficiency testing software and conduct cost-benefit analysis of sustainable practices. Students will incorporate sustainable materials, systems and fabrication/construction processes on a project.

Level: UG

Prerequisite(s): 16 credits from courses in either a) CADA, or b) CADS, or c) CADI or CADM

Attributes: ASTR (p. 523), SCIH (p. 521)

**CADD 2250 4 credits****CADD Customization and Networks**

Students will explain the need for CADD customization and identify programming languages used with CADD software. They will determine the appropriate programming language for a variety of CADD custom functions, use programming to customize CADD software and use scripting and macros. Students will explain the fundamentals of operating systems and describe command line interfaces and system utilities. They will install CADD software, set-up multi-user CADD local area network (LAN) with client/server, apply permissions and install printers.

Level: UG

Prerequisite(s): 16 credits from courses in either a) CADA, or b) CADS, or c) CADI or CADM

Attribute: SCIH (p. 521)

**CADD 2900 4 credits****Special Topics in CADD**

Students will engage in an intensive study of a special topic in design and drafting and/or related technology as selected by the instructor. They will research, analyze and demonstrate the theory and application of the selected topic.

Level: UG

Prerequisite(s): 16 credits from courses in either a) CADA b) CADS or c) CADM or CADI

Attribute: SCIH (p. 521)

## Computer-Aided Design & Drafting: Architectural (CADA)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**CADA 1200 3 credits****Architectural Fundamentals**

Students will study and apply architectural theory, the architectural development process, and the design process related to construction. They will study historical practices, methods and materials, identify current practices, and use tools to forecast future trends. Students will study basic building and material terminology. They will study the physical qualities, manufacturing processes, installation techniques and the organizational processes of construction materials and methods. Students will study sustainable development initiatives such as LEED. They will apply and analyze energy efficiency modeling software, and study building envelope design, materials, and create detail drawings.

Level: UG

Prerequisite(s): (CADD 1100 or DRAF 1100) and (CADD 1110 or DRAF 1110) and (CADD 1150 or [DRAF 1150 plus DRAF 1306]) and (CADD 1160 or DRAF 1160)

Attribute: TRAD (p. 521)

**CADA 1201 4 credits****Architectural Principles**

Students will study and apply architectural theory, the architectural development process, and the design process related to construction. They will study historical practices, methods and materials, identify current practices, and use tools to forecast future trends. Students will study basic building and material terminology. They will study the physical qualities, manufacturing processes, installation techniques and the organizational processes of construction materials and methods. Students will study sustainable development initiatives such as LEED. They will apply and analyze energy efficiency modeling software, and study building envelope design, materials, and create detail drawings.

Level: UG

Prerequisite(s): 16 credits from courses in CADD at the 1100 level

Attribute: SCIH (p. 521)

**CADA 1210 4 credits****Single Family Residential**

Students will study architectural design and residential plan set development in a working environment scenario involving the design of single family residence. They will work within a design team and complete a full plan set that will be building permit ready. Students will produce a set of drawings that includes site plan, floor plan, foundation, framing schematic, section and details, and exterior elevations. They will base their project on a unique client portfolio and custom design criteria. Students will prepare a sustainability and energy efficiency analysis of their design. They will make a presentation to the class of their completed project.

Level: UG

Prerequisite(s): 16 credits from courses in CADD at the 1100 level

Attribute: SCIH (p. 521)

**CADA 1220 4 credits****Commercial Buildings**

Students will develop the design and then prepare a site plan, building plans, schematics, sections and details for a commercial building. They will use glazing and storefront components, apply codes and standards, and prepare interior and exterior elevations. Students will develop schedules and specifications, explain coordination procedures to ensure completion of the project, and give a presentation of the project. They will explain Leadership in Energy and Environmental Design (LEED) standards and its applications.

Level: UG

Prerequisite(s): 16 credits from courses in CADD at the 1100 level

Attribute: SCIH (p. 521)

**CADA 1250 4 credits****Introduction to Building Information Modeling (BIM) Software for Architectural**

Students will identify types of 3-dimensional (3D) Architectural software. They will use 3D sketch software to create and combine assemblies to produce a building model. Students will use BIM software interface and identify principles of creating a building information model. They will identify families of components, set up a project, and set up views. Students will apply annotation and scheduling.

Level: UG

Prerequisite(s): 16 credits from courses in CADD at the 1100 level

Attribute: SCIH (p. 521)

**CADA 1900 4 credits****Special Topics - Architecture**

Students will engage in an intensive study of a special topic in Architectural design and drafting and/or related technology as selected by the instructor. They will receive instruction in and perform research in the topic. They will analyze and demonstrate the theory and application of the selected topic.

Level: UG

Prerequisite(s): 16 credits from courses in CADD at the 1100 level or higher

Attribute: TRAD (p. 521)

**CADA 2100 4 credits****Multi-Family Residential**

Students will follow best practice design development procedure to prepare a site plan, floor plans, and a foundation plan for a multi-family residential building. They will prepare framing schematics, sections and details, and exterior elevations and material schedules. Students will prepare documents to applicable codes and standards, follow procedures to ensure completion and coordination of the project and present completed construction documentation. They will prepare and present project features for public reviews.

Level: UG

Prerequisite(s): Certificate in CADD - Architectural Specialty or DRAF 1110 and DRAF 1210 and DRAF 1310

Attribute: SCIH (p. 521)

**CADA 2150 4 credits****Building Information Model (BIM) Software for Architectural - Project**

Students will create advanced components, apply interior fittings, and use Building Information Model (BIM) software to output, input and link information. They will apply collaboration and design integration, use massing and phasing tools, and apply design options. Students will apply detailing, apply site design, and use advanced rendering techniques. They will use BIM software to complete a project.

Level: UG

Prerequisite(s): CADA 1250

Attribute: SCIH (p. 521)

## Computer-Aided Design & Drafting: Industrial (CADI)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**CADI 1200 3 credits****Industrial Applications**

Students will identify industrial processes and codes and standards. They will describe industrial design development, identify information from external resources, and describe types of drawings. Students will prepare a flow chart and a general arrangement, and identify materials handling equipment and components. They will identify piping equipment and components, and participate in industrial field trips.

Level: UG

Prerequisite(s): 16 credits from courses in CADD at the 1100 level

Attribute: SCIH (p. 521)

**CADI 1210 4 credits****Conveyor Systems**

Students will identify types of transfer decks, apply design criteria, and identify design principles to prepare a transfer deck. They will identify types of conveyors, draw and detail a belt conveyor, and prepare chute details. Students will apply appropriate drafting practice.

Level: UG

Prerequisite(s): 16 credits from courses in CADD at the 1100 level

Attribute: SCIH (p. 521)

**CADI 1220 4 credits****Process Piping**

Students will prepare piping and instrumentation diagrams, lay out a general arrangement, and prepare details of piping equipment. They will develop pipe routing and follow design principles to output piping orthographics and isometrics. Students will produce isometric spool drawings and apply appropriate drafting practice.

Level: UG

Prerequisite(s): 16 credits from courses in CADD at the 1100 level

Attribute: SCIH (p. 521)

**CADI 1250 4 credits****Introduction to Industrial 3-Dimensional Modeling Software**

Students will identify 3-dimensional (3D) software for industrial and mechanical applications. They will use 3D parametric modeling software to make effective sketches, model parts and generate 2-dimensional (2D) drawings. Students will create assembly files, presentation drawings and assembly drawings. They will use process piping software to place components into a piping model, create orthographic piping working drawings, and to automatically generate piping isometric drawings with a bill of materials. Students will use piping and instrumentation diagram (P&ID) software to create piping schematics.

Level: UG

Prerequisite(s): 16 credits from courses in CADD at the 1100 level

Attribute: SCIH (p. 521)

**CADI 1900 4 credits****Special Topics - Industrial**

Students will engage in an intensive study of a special topic in Industrial design and drafting and/or related technology as selected by the instructor. They will receive instruction in and perform research in the topic. They will analyze and demonstrate the theory and application of the selected topic.

Level: UG

Prerequisite(s): 16 credits from courses in CADD at the 1100 level or higher

Attribute: SCIH (p. 521)

## Computer-Aided Design & Drafting: Manufacturing and Fabrication (CADM)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**CADM 1155 4 credits****Manufacturing Design and Software**

Students will learn to create 2-dimensional (2D) drawings and 3-dimensional (3D) models using Computer Aided Design and Drafting (CADD) software. They will apply dimensions, symbols and annotation to fabrication drawings. Students will apply Computer Numeric Control (CNC) software to 3D models. They will design a project that can be produced using rapid prototyping or manufactured on CNC equipment. Students may be required to participate in field trips.

Level: UG

Attribute: SCIH (p. 521)

**CADM 1200 3 credits****Fundamentals of Manufacturing and Fabrication**

Students will use manufacturing terms and definitions, follow safety procedures, and describe the characteristics of manufacturing materials. They will identify the roles of manufacturing professionals, and describe the manufacturing process flow. Students will identify manufacturing and fabrication equipment, identify heat treatments, and describe manufacturing and fabrication processes. They will describe assembly processes, identify sources of parts and materials, use measuring tools and techniques and apply geometric tolerance and dimensioning. Students will describe tolerancing and its effect on processes. They will identify welding processes, and identify common material stock shapes.

Level: UG

Prerequisite(s): 16 credits from courses in CADD at the 1100 level

Attribute: SCIH (p. 521)

**CADM 1210 4 credits****Component Assembly and Details**

Students will apply information from reference sources, follow relevant codes and standards, and follow Enterprise Resources Planning (ERP) and Material Resources Planning (MRP) procedures. They will describe the design intent of the assembly, source manufactured components, and prepare assembly and sub-assembly detail drawings. Students will prepare drawings of discrete parts, weldment drawings and sheet metal drawings. They will apply methods of dimensioning and specify machining techniques. Students will follow document control procedure for revised parts and identify quality control procedures. They will prepare bill of materials and material pull sheets, and follow document control procedures.

Level: UG

Prerequisite(s): 16 credits from courses in CADD at the 1100 level

Attribute: SCIH (p. 521)

**CADM 1220 4 credits****Integrated Machine Design Systems**

Students will identify the systems involved in machine design, and differentiate between the design concepts; function and form. They will describe alternative approaches to problem solving and the relationship to design. Students will identify structural, mechanical, electrical, electronic, and electro-mechanical principles related to machine design. They will identify software platforms used in industrial applications, apply trouble-shooting techniques, perform diagnostics, and perform analysis of basic designs.

Level: UG

Prerequisite(s): 16 credits from courses in CADD at the 1100 level

Attribute: SCIH (p. 521)

**CADM 1250 4 credits****3 Dimensional (3D) Parametric Solids Modeling Software**

Students will identify 3D software for each discipline, and list types of 3D parametric modeling software. They will use 3D parametric software interface and viewing commands and use 2 dimensional (2D) sketches to create 3D solids and surfaces. Students will create multiple configurations using tables and apply top-down modeling techniques to create assemblies with constraints. They will identify output formats and their applications. Students will create 2D rendered pictorial drawings, exploded assembly drawings and animation of assemblies.

Level: UG

Prerequisite(s): (CADD 1100 or DRAF 1100) and (CADD 1110 or DRAF 1110) and (CADD 1150 or [DRAF 1150 and DRAF 1306]) and (CADD 1160 or DRAF 1160)

Attribute: SCIH (p. 521)

**CADM 1900 4 credits****Special Topics - Manufacturing**

Students will engage in an intensive study of a special topic in Manufacturing design and drafting and/or related technology as selected by the instructor. They will receive instruction in and perform research in the topic. They will analyze and demonstrate the theory and application of the selected topic.

Level: UG

Prerequisite(s): 16 credits from courses in CADD at the 1100 level or higher

Attribute: SCIH (p. 521)

## Computer-Aided Design & Drafting: Structural (CADS)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables/) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**CADS 1200 4 credits****Introduction to Structural Drafting and Concrete**

Students will describe the structural discipline and apply information from appropriate reference drawings and design notes to prepare concrete floor plans and foundation details, and apply reinforcing information. They will identify concrete characteristics, apply geotechnical information and identify principles of foundation design to prepare anchor bolt and equipment pad details. Students will identify precast / prestressed concrete and calculate reinforcing / concrete quantities. They will develop sections and elevations from plans.

Level: UG

Prerequisite(s): 16 credits from courses in CADD at the 1100 level

Attribute: SCIH (p. 521)

**CADS 1210 4 credits****Structural Steel**

Students will apply structural steel shapes, prepare line diagrams and apply bridging and open web steel joist extensions. They will prepare bolted and welded steel connections and prepare shop drawings. Students will calculate structural steel quantities.

Level: UG

Prerequisite(s): 16 credits from courses in CADD at the 1100 level

Attribute: SCIH (p. 521)

**CADS 1220 4 credits****Wood Frame and Heavy Timber**

Students will apply wood framing fundamentals. They will prepare drawings and details for a bridge approach span, a bridge main span and an abutment for a timber bridge. Students will indicate high and low water levels and prepare timber connections and an expansion joint detail.

Level: UG

Prerequisite(s): 16 credits from courses in CADD at the 1100 level

Attribute: SCIH (p. 521)

**CADS 1250 3 credits****Introduction to Building Information Model (BIM) Software for Structural**

Students will identify types of 3-dimensional (3D) used in structural applications. They will use 3D sketch software to model structural components and combine components to create a building model. Students will identify fundamentals of building modeling and will use Building Information Modeling software (BIM). They will identify hierarchies of components, set up drawings and output, import and export information. Students will apply annotation and scheduling.

Level: UG

Prerequisite(s): (CADD 1100 or DRAF 1100) and (CADD 1110 or DRAF 1110) and (CADD 1150 or [DRAF 1150 plus DRAF 1306]) and (CADD 1160 or DRAF 1160)

Attribute: SCIH (p. 521)

**CADS 1251 4 credits****Building Information Modeling (BIM) for Structural**

Students will identify types of 3-dimensional (3D) software used in structural applications. They will use 3D sketch software to model structural components and combine components to create a building model. Students will identify fundamentals of building modeling and will use Building Information Modeling software (BIM). They will identify hierarchies of components, set up drawings and output, import and export information. Students will apply annotation and scheduling to drawings. They will create advanced components, prepare structural connections, apply detailing for engineering drawings, and use BIM software to complete a project.

Level: UG

Prerequisite(s): 16 credits from courses in CADD at the 1100 level

Attribute: SCIH (p. 521)

**CADS 1900 4 credits****Special Topics - Structural**

Students will engage in an intensive study of a special topic in Structural design and drafting and/or related technology as selected by the instructor. They will receive instruction in and perform research in the topic. They will analyze and demonstrate the theory and application of the selected topic.

Level: UG

Prerequisite(s): 16 credits from courses in CADD at the 1100 level or higher

Attribute: SCIH (p. 521)

**CADS 2100 4 credits****Site Work**

Students will indicate contour lines, prepare site layout, and determine site grading. They will prepare site drainage, retaining walls, outline of buildings and prepare site access. Students will complete a site plan drawing.

Level: UG

Prerequisite(s): Certificate in CADD - Structural Specialty or DRAF 1360

Attribute: SCIH (p. 521)

**CADS 2150 4 credits****Building Information Model (BIM) for Structural - Project**

Students will explain document control procedures and apply a document change-manage process. They will follow health and safety procedures, describe the effects of office ergonomics, and follow appropriate office department related to design and drafting. Students will explain liability issues, follow ethical principles, and explain basic project management principles related to design and drafting. They will identify the roles of Engineering and Architectural professionals, and apply algebraic and trigonometric concepts and methods to solve problems.

Level: UG

Prerequisite(s): CADS 1250

Attribute: SCIH (p. 521)

## Cooperative Education (COOP)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**COOP 1101 1 credit****Job Search Techniques**

Students will learn the philosophy and goals of co-operative education. They will also learn to develop effective job search techniques, including preparing effective resumes and cover letter, and practicing interview skills, in order to secure their first co-op placement.

Level: UG

Prerequisite(s): Declaration of a Co-op specialization

**COOP 1150 9 credits****Co-op Work Semester 1**

Students will integrate academic studies with a full-time, paid work experience in a program related position with an employer organization. Students will apply academic knowledge and acquire more competence through relevant experience in their field of study while completing their first 12- to 16- week work term. The work term will be monitored by Co-op faculty. Students will examine how the application of new skills affects their work and their relationships with others in the organization. They will also assess their interest in and attitude towards their field of study.

Notes: 1. This course may be taken part-time over two consecutive semesters and will appear on the transcript as COOP 1150A and COOP 1150B. Successful completion of COOP 1150 requires completion of both courses and will be equivalent to one completed Co-op work term. Students registering in COOP 1150A are committing to register in COOP 1150B in the subsequent term. The same grade will be assigned to both courses regardless of outcome. . 2. Credits for Co-op work term courses may only be used to satisfy graduation requirements for the Co-op option of designated programs. These credits do not contribute to the overall required academic credits. . 3. Students must register for their Co-op work term only at the advisement of the Co-op office. Should a student accept a Co-op position and not follow the normal registration procedure, the Co-op office will proceed with manual registration for that student and Co-op work term course.

Level: UG

Prerequisite(s): COOP 1101 and declaration of a Co-op specialization

**COOP 1150A 4.5 credits****Co-op Work Semester 1**

Students will integrate academic studies with a full-time, paid work experience in a program related position with an employer organization. Students will apply academic knowledge and acquire more competence through relevant experience in their field of study while completing their first 12- to 16- week work term. The work term will be monitored by Co-op faculty. Students will examine how the application of new skills affects their work and their relationships with others in the organization. They will also assess their interest in and attitude towards their field of study.

Notes: 1. This course may be taken part-time over two consecutive semesters and will appear on the transcript as COOP 1150A and COOP 1150B. Successful completion of COOP 1150 requires completion of both courses and will be equivalent to one completed Co-op work term. Students registering in COOP 1150A are committing to register in COOP 1150B in the subsequent term. The same grade will be assigned to both courses regardless of outcome. . 2. Credits for Co-op work term courses may only be used to satisfy graduation requirements for the Co-op option of designated programs. These credits do not contribute to the overall required academic credits. . 3. Students must register for their Co-op work term only at the advisement of the Co-op office. Should a student accept a Co-op position and not follow the normal registration procedure, the Co-op office will proceed with manual registration for that student and Co-op work term course.

Level: UG

Prerequisite(s): COOP 1101 and declaration of a Co-op specialization

**COOP 1150B 4.5 credits****Co-op Work Semester 1**

Students will integrate academic studies with a full-time, paid work experience in a program related position with an employer organization. Students will apply academic knowledge and acquire more competence through relevant experience in their field of study while completing their first 12- to 16- week work term. The work term will be monitored by Co-op faculty. Students will examine how the application of new skills affects their work and their relationships with others in the organization. They will also assess their interest in and attitude towards their field of study.

Notes: 1. This course may be taken part-time over two consecutive semesters and will appear on the transcript as COOP 1150A and COOP 1150B. Successful completion of COOP 1150 requires completion of both courses and will be equivalent to one completed Co-op work term. Students registering in COOP 1150A are committing to register in COOP 1150B in the subsequent term. The same grade will be assigned to both courses regardless of outcome. . 2. Credits for Co-op work term courses may only be used to satisfy graduation requirements for the Co-op option of designated programs. These credits do not contribute to the overall required academic credits. . 3. Students must register for their Co-op work term only at the advisement of the Co-op office. Should a student accept a Co-op position and not follow the normal registration procedure, the Co-op office will proceed with manual registration for that student and Co-op work term course.

Level: UG

Prerequisite(s): COOP 1101 and declaration of a Co-op specialization

**COOP 2150 9 credits****Co-op Work Semester 2**

Students will integrate academic studies with a full-time, paid work experience in a program related position with an employer organization. Students will apply academic knowledge and acquire more competence through relevant experience in their field of study while completing a second 12- to 16- week work term. The work term will be monitored by Co-op faculty. Students will analyze the significance of the application of new skills in their work and examine their own working relationships as well as those of the organization. They will also further define their interest in and attitude towards their field of study. Notes: 1. This course may be taken part-time over two consecutive semesters and will appear on the transcript as COOP 2150A and COOP 2150B. Successful completion of COOP 2150 requires completion of both courses and will be equivalent to one completed Co-op work term. Students registering in COOP 2150A are committing to register in COOP 2150B in the subsequent term. The same grade will be assigned to both courses regardless of outcome. 2. Credits for Co-op work term courses may only be used to satisfy graduation requirements for the Co-op option of designated programs. These credits do not contribute to the overall required academic credits. 3. Students must register for their Co-op work term only at the advisement of the Co-op office. Should a student accept a Co-op position and not follow the normal registration procedure, the Co-op office will proceed with manual registration for that student and Co-op work term course.

Level: UG

Prerequisite(s): COOP 1150 and declaration of a Co-op specialization

**COOP 2150A 4.5 credits****Co-op Work Semester 2**

Students will integrate academic studies with a full-time, paid work experience in a program related position with an employer organization. Students will apply academic knowledge and acquire more competence through relevant experience in their field of study while completing a second 12- to 16- week work term. The work term will be monitored by Co-op faculty. Students will analyze the significance of the application of new skills in their work and examine their own working relationships as well as those of the organization. They will also further define their interest in and attitude towards their field of study. Notes: 1. This course may be taken part-time over two consecutive semesters and will appear on the transcript as COOP 2150A and COOP 2150B. Successful completion of COOP 2150 requires completion of both courses and will be equivalent to one completed Co-op work term. Students registering in COOP 2150A are committing to register in COOP 2150B in the subsequent term. The same grade will be assigned to both courses regardless of outcome. 2. Credits for Co-op work term courses may only be used to satisfy graduation requirements for the Co-op option of designated programs. These credits do not contribute to the overall required academic credits. 3. Students must register for their Co-op work term only at the advisement of the Co-op office. Should a student accept a Co-op position and not follow the normal registration procedure, the Co-op office will proceed with manual registration for that student and Co-op work term course.

Level: UG

Prerequisite(s): COOP 1150 and declaration of a Co-op specialization

**COOP 2150B 4.5 credits****Co-op Work Semester 2**

Students will integrate academic studies with a full-time, paid work experience in a program related position with an employer organization. Students will apply academic knowledge and acquire more competence through relevant experience in their field of study while completing a second 12- to 16- week work term. Successful completion of COOP 2150 requires completion of both courses and will be equivalent to one completed Co-op work term. Students registering in COOP 2150A are committing to register in COOP 2150B in the subsequent term. The same grade will be assigned to both courses regardless of outcome. 2. Credits for Co-op work term courses may only be used to satisfy graduation requirements for the Co-op option of designated programs. These credits do not contribute to the overall required academic credits. 3. Students must register for their Co-op work term only at the advisement of the Co-op office. Should a student accept a Co-op position and not follow the normal registration procedure, the Co-op office will proceed with manual registration for that student and Co-op work term course.

Level: UG

Prerequisite(s): COOP 1150 and declaration of a Co-op specialization

**COOP 3150 9 credits****Co-op Work Semester 3**

Students will integrate academic studies with a full-time, paid work experience in a program related position with an employer organization. Students will apply academic knowledge and acquire more competence through relevant experience in their field of study while completing a third 12- to 16- week work term. The work term will be monitored by Co-op faculty. Students will identify and analyze new skills in relation to their work and develop professional learning goals for the term. Students will further assess their interest in and attitude towards their field of study and prepare a potential career plan for after graduation. Notes: 1. This course may be taken part-time over two consecutive semesters and will appear on the transcript as COOP 3150A and COOP 3150B. Successful completion of COOP 3150 requires completion of both courses and will be equivalent to one completed Co-op work term. Students registering in COOP 3150A are committing to register in COOP 3150B in the subsequent term. The same grade will be assigned to both courses regardless of outcome. 2. Credits for Co-op work term courses may only be used to satisfy graduation requirements for the Co-op option of designated programs. These credits do not contribute to the overall required academic credits. 3. Students must register for their Co-op work term only at the advisement of the Co-op office. Should a student accept a Co-op position and not follow the normal registration procedure, the Co-op office will proceed with manual registration for that student and Co-op work term course.

Level: UG

Prerequisite(s): COOP 2150 and declaration of a Co-op specialization

**COOP 3150A 4.5 credits****Co-op Work Semester 3**

Students will integrate academic studies with a full-time, paid work experience in a program related position with an employer organization. Level: UG

Prerequisite(s): COOP 3150 and declaration of a Co-op specialization

## Counselling Psychology (CNPS)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**CNPS 3310 3 credits****Theories of Counselling**

Students will be introduced to major theoretical approaches that underlie the work of counsellors. They will examine psychodynamic, behavioral, cognitive, existential, humanistic, post-modern, and family systems theoretical frameworks in their broad sociological, historical, and philosophical contexts, while critically evaluating their own assumptions regarding health, dysfunction, and change. Note: Students may get credit for only one of CNPS 3310 or LCOM 3310.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**CNPS 3320 3 credits****Career Counselling and Career Education**

Students will develop a broad understanding of major theories of career development and related assessments. They will explore historical and cross-cultural perspectives on the meaning of work and considerations for career development, counselling, and education with diverse populations and in diverse settings (i.e., elementary, secondary, post-secondary, and community agencies). Students will also critically examine moral and ethical issues related to this work, and they will apply theoretical concepts to their own process of career development. Note: Students may get credit for only one of CNPS 3320, EDUC 3320 or LCOM 3320.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher

Cross-listing: EDUC 3320

Attributes: ASTR (p. 523), ARTS (p. 521)

**CNPS 3330 3 credits****Cultural Considerations in Counselling**

Students will be introduced to issues of diversity as they pertain to the helping professions in contemporary multicultural societies. They will develop an understanding of the situated nature of identity, examine the relationship between cultural assumptions and the counselling process, and explore Western and non-Western conceptions of psychological health and healing. Students will also examine issues of cultural competence and engage in reflection regarding their own assumptions, strengths, and challenges in relation to living and working in a pluralist society. Note: Students may get credit for only one of CNPS 3330 or LCOM 3330.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**CNPS 4300 3 credits****Counselling Relationships and Basic Skills**

Students will examine how helping relationships are developed and learn basic interviewing skills. They will learn active listening skills and examine the values, knowledge, and abilities necessary for communicating in a professional helping context. Students will participate in role-plays and simulated helping interactions including video recording to receive feedback on their communication skills. Note: Students may get credit for only one of CNPS 4300 or LCOM 4300.

Level: UG

Prerequisite(s): LCOM 3310 or CNPS 3310

Attributes: ASTR (p. 523), ARTS (p. 521)

**CNPS 4310 3 credits****The Reflective Practitioner**

Students will survey a range of reflective practice models. They will examine their own expectations, assumptions, and developmental issues in becoming a helping professional through the process of journaling, reflection, and reading. Students will examine both theoretical and pragmatic issues related to reflective practice and ongoing self-supervision. They will consider professional issues in dealing with challenging clients, power struggles, boundaries, and counsellor over-involvement. Students will consider occupational challenges associated with the helping profession and personal needs for self-care..

Level: UG

Prerequisite(s): CNPS 3310

Attributes: ASTR (p. 523), ARTS (p. 521)

**CNPS 4330 3 credits****Group Facilitation**

Students will learn a wide spectrum of both theoretical and experiential approaches to group facilitation, with particular emphasis on core facilitation skills. They will examine group dynamics and evolution, interpersonal relationships (e.g., conflicts, alliances and other structures), leadership styles, curriculum development, and the role of health and healing practices. Students will develop effective facilitation strategies through achieving greater self-awareness and active sensing. They will also learn about the emerging models of group work which focus on collaboration, community-building and creativity. Note: This is a seminar course. Students may get credit for only one of CNPS 4330 or LCOM 4330.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

# Creative Writing (CRWR)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

## CRWR 1100 3 credits

### Introduction to Creative Writing I

Students will study and apply the fundamental techniques of writing fiction and poetry. They will also read and critique assigned published works, as well as the works of their peers.

Level: UG

Prerequisite(s): One of: (a) English 12 (B), (b) ENGL 1099, ENGQ 1099 (C), ABEE 0091, PSPE 1091 or ENGP 1091, (c) Kwantlen English Placement Test placement, or (d) LPI Essay score of 26.

Attributes: ASTR (p. 523), ARTS (p. 521)

## CRWR 1110 3 credits

### Introduction to Creative Writing II

Students will study and apply the fundamental techniques of writing drama (stage plays, radio plays, or screenwriting), and will continue developing their skills in the writing of fiction and poetry.

Level: UG

Prerequisite(s): CRWR 1100 (C+)

Attributes: ASTR (p. 523), ARTS (p. 521)

## CRWR 1200 3 credits

### Introduction to Craft and Process in Creative Writing

Students will study the relationship between the creative process and the craft of creative writing. They will examine and explore diverse methods of encouraging and enhancing literary creativity, developing and sustaining the craft of writing, and constructing narratives from their own creative processes. Students will focus on topics such as sourcing material, creative discipline and habits, and tools of the writer's life.

Level: UG

Prerequisite(s): One of: (a) English 12 (B), (b) ENGQ 1099, (c) Kwantlen English Placement Test placement, or (d) LPI Essay score of 26.

Attributes: ASTR (p. 523), ARTS (p. 521)

## CRWR 1240 3 credits

### New Forms and Media: Networked Narratives

Students will learn and practice new forms of creative writing such as collaborative composition, writing for new and social media, blogging, and writing for digital publications. They will study emerging uses of online technologies and will learn writing skills through individual composition, group work, and the development of electronic portfolios. Note: Students may earn credit for only one of CRWR 1240 or IDEA 1240, as they are identical courses.

Level: UG

Cross-listing: IDEA 1240

Attributes: ASTR (p. 523), ARTS (p. 521)

## CRWR 2140 3 credits

### Writing and Creativity on the Web

Students will study current and emergent creative modalities on the Web, with particular emphasis on writing, design, promotion, and publishing. They will learn how to create an engaging online presence for their creative work and will explore approaches to developing a creative identity on the Web. They will develop these skills through individual designs and compositions, group work, and the creation of digital portfolios.

Level: UG

Prerequisite(s): CRWR 1240

Attributes: ASTR (p. 523), ARTS (p. 521)

## CRWR 2300 3 credits

### Fiction and Poetry

Students will develop their skills in poetry and fiction in a workshop setting. In consultation with the instructor, they will undertake individualized programs of study which include writing, reading, revision of their own work, and critiquing of their peers' work.

Level: UG

Prerequisite(s): 6 credits from courses in CRWR, including CRWR 1100 (C+)

Attributes: ASTR (p. 523), ARTS (p. 521)

## CRWR 2310 3 credits

### Drama, Fiction and Poetry II

Students will continue to develop their writing skills in the genre of their choice in an open-workshop setting. In consultation with the instructor, they will undertake individualized programs of study which include writing, reading, revision of their own work, and critiquing of their peers' work.

Level: UG

Prerequisite(s): CRWR 2300 (C+)

Attributes: ASTR (p. 523), ARTS (p. 521)

## CRWR 2900 3 credits

### Special Topics

Students will learn and practice creative writing and workshop skills as they create and revise a writing project based on the course theme. In this workshop-based course, students will learn about established and developing themes and ideas in literary work while studying relevant aspects of craft chosen by the instructor such as intention, process, technique and response. Students will also practice close reading, critical analysis, and discussion through the critique of thematic literary texts and the analysis and critique of their peers' work. Note: Special Topics in Creative Writing focuses on a different genre, theme or aspect of literary writing each time it is offered. Please check with the department for proposed offerings. Students may take this course no more than two times (for 6 total credits), each time on a different topic.

Level: UG

Prerequisite(s): CRWR 1100 (C+) and 3 Credits of either (a) CRWR at the 1100 level or higher or (b) ENGL at the 2000 level or higher.

Attributes: ASTR (p. 523), ARTS (p. 521)

## CRWR 3100 3 credits

### Techniques in Short Fiction

Students will study, develop, and practice the various techniques of the short fiction. They will apply that genre knowledge through a critical examination of short fiction by established authors.

Level: UG

Prerequisite(s): 9 credits, including (a) CRWR 1100 and (b) 3 credits from courses in CRWR at the 2000 level or higher.

Attributes: ASTR (p. 523), ARTS (p. 521)

## CRWR 3110 3 credits

### Techniques in Poetry

Students will learn advanced poetic techniques through lectures and the study of the poetic traditions. They will also develop and practice techniques through the writing and workshopping of their poems.

Level: UG

Prerequisite(s): 9 credits, including (a) CRWR 1100 and (b) 3 credits from courses in CRWR at the 2000 level or higher.

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRWR 3120 3 credits****Screenwriting and Drama: Character and Dialogue**

Students will develop and practice screenwriting and playwriting techniques through the writing of their own work and through the critique of their peers' work, in a combination lecture/workshop setting. Students will learn screen and playwriting techniques for writing character, dialogue and conflict at the scene level. Students will analyze screen and stage plays from a writer's perspective through close reading, viewing and informed discussion. Students will learn the differences between writing for stage and for screen and be introduced to professional writing practices for both mediums.

Level: UG

Prerequisite(s): 9 credits, including (a) CRWR 1100 and (b) 6 credits from courses in CRWR, ENGL or JRNL at the 2000 level or higher.

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRWR 3130 3 credits****Creative Nonfiction: Writing from the Self**

Students will develop and practice writing, reading, and revision of creative nonfiction (personal essay, memoir and literary travelogue) through the writing of their own work, and through the critique of their peers' work, in a combination lecture/workshop setting. Students will also analyze published creative nonfiction from a writer's perspective through close reading, informed discussion, and writing.

Level: UG

Prerequisite(s): 9 credits, including (a) CRWR 1100 and (b) 6 credits from courses in CRWR, ENGL or JRNL at the 2000 level or higher.

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRWR 3140 3 credits****New Forms and Media: Sites and Platforms**

Students will develop their creative writing through fiction, poetry, creative non-fiction, and experimental writing. They will express their writing through a variety of alternative forms and new media including site-specific sound and installation. Students will critically analyze theory and criticism of new media and the history of creative writing in alternative forms and new media, as well as conduct research into contemporary writers working in these forms. CRWR 2140 is recommended before taking this course.

Level: UG

Prerequisite(s): 9 credits, including (a) CRWR 1100 and (b) 6 credits from courses in CRWR, ENGL or JRNL at the 2000 level or higher.

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRWR 3200 3 credits****Short Fiction**

Students will practice writing, reading, and revision of short fiction through the writing of their own work, and through the critique of their peers' work, in a combination lecture/workshop setting. They will also analyze published short fiction from a writer's perspective through close reading, informed discussion, and writing. CRWR 3100 is recommended before taking this course.

Level: UG

Prerequisite(s): 9 credits, including (a) CRWR 1100 and (b) 6 credits from courses in CRWR at the 2000 level or higher.

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRWR 3210 3 credits****Poetic Forms**

Students will learn the function of form in poetry through lectures and the study of poetic traditions. They will also develop and practice form through writing and analyzing their poems. CRWR 3110 is recommended before taking this course.

Level: UG

Prerequisite(s): 9 credits, including (a) CRWR 1100 and (b) 6 credits from courses in CRWR at the 2000 level or higher.

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRWR 3220 3 credits****Screenwriting and Drama: Structure and Plot**

Students will learn screen and playwriting techniques for writing plot, building dramatic structure and sustaining story tension for narrative projects. Students will develop dramatic writing techniques and revision skills through the writing of their own work and through the critique of their peers' work, in a combination lecture/workshop setting. Students will learn to analyze screen and stage plays from a writer's perspective through close reading, viewing and informed discussion. Students will define the differences between writing for stage and for screen and be introduced to professional writing practices for both mediums. CRWR 3120 is recommended before taking this course.

Level: UG

Prerequisite(s): 9 credits, including (a) CRWR 1100 and (b) 6 credits from courses in CRWR, ENGL or JRNL at the 2000 level or higher.

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRWR 3230 3 credits****Creative Nonfiction: Writing Beyond the Self**

Students will continue to develop and practice writing, reading, and revision of creative nonfiction through the writing of their own work, and through the critique of their peers' work, in a combination lecture/workshop setting. Students will also analyze published creative nonfiction from a writer's perspective through close reading, informed discussion, and writing. CRWR 3130 is recommended before taking this course.

Level: UG

Prerequisite(s): 9 credits, including (a) CRWR 1100 and (b) 6 credits from courses in CRWR, ENGL or JRNL at the 2000 level or higher.

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRWR 3240 3 credits****New Forms and Media: Web Series**

In this course students will collaborate to create an original web series pilot. Taking a DIY approach, students will write, storyboard, shoot and edit short narrative comedic or dramatic videos using personal devices and equipment at hand. Emphasis will be on the writing of character driven narratives, how to tell a story visually, how to craft comedic and dramatic moments and the conceptualizing of an episodic series. Students will examine narrative video made specifically for dissemination on the internet; how writers are using this low cost and accessible form to create and distribute their work, as well the effect that the internet has had on the democratization of film, video and television production. Recommended to be taken following CRWR 3140 and in conjunction with either CRWR 3120 or 3220.

Level: UG

Prerequisite(s): 9 credits, including (a) CRWR 1100 and (b) 6 credits from courses in CRWR, JRNL, or ENGL at the 2000 level or higher.

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRWR 3302 3 credits****Themes in Literary Writing**

Students will learn about established and developing themes and ideas in literary work while studying relevant aspects of craft chosen by the instructor such as intention, process, technique and response. They will also develop and practice relevant creative writing techniques and strategies in relation to their own writing. Note: Themes in Literary Writing is a creative writing course that focuses on a different genre, theme or aspect of literary writing each time it is offered.

Level: UG

Prerequisite(s): 9 credits, including (a) CRWR 1100 and (b) 6 credits from courses in CRWR, ENGL or JRNL at the 2000 level or higher.

Attribute: ARTS (p. 521)

**CRWR 3303 3 credits****The Business of Writing**

Students will study business, marketing and professional skills that will help prepare them, as writers, to better navigate the publishing industry. They will learn about traditional and nontraditional literary markets, granting bodies, standard contracts, fair compensation, interviewing techniques, professional writing organizations and issues significant to working writers.

Level: UG

Prerequisite(s): 9 credits, including (a) CRWR 1100 and (b) 6 credits from courses in CRWR, ENGL or JRNL at the 2000 level or higher.

Attribute: ARTS (p. 521)

**CRWR 3400 3 credits****Advanced Special Topics**

Students will learn and practice creative writing and workshop skills as they create and revise a writing project based on the course theme. In this workshop-based course, students will learn about established and developing themes and ideas in literary work while studying relevant aspects of craft chosen by the instructor such as intention, process, technique and response. Students will also practice close reading, critical analysis, and discussion through the critique of thematic literary texts and the analysis and critique of their peers' work. Note: Advanced Special Topics in Creative Writing focuses on a different genre, theme or aspect of literary writing each time it is offered. Please check with the department for proposed offerings. Students may take this course no more than two times (for 6 total credits) on different topics.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher, including 3 credits from courses in ENGL or CRWR.

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRWR 4100 3 credits****Advanced Fiction Workshop**

Students will develop and practice the writing, reading, and revision of short or long form fiction on a sustained project, or series of projects, of their choice. They will critique their peers' work, in a workshop setting. Students will also analyse published short stories, novellas and/or novels from a writer's perspective through close reading, informed discussion, and writing.

Level: UG

Prerequisite(s): Two of the following: CRWR 3100, 3200, 3130, 3230 or 3400.

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRWR 4110 3 credits****Advanced Poetry Workshop**

Students will develop and apply advanced poetic techniques and forms, and reading and revision skills through the writing of their own work in an individual project, and they will also discuss and analyze assigned readings of poetry and poetics. Primarily, they will create a project proposal, and then work toward a substantial poetry portfolio which will be extensively revised.

Level: UG

Prerequisite(s): Two of the following: CRWR 3110, 3210 or 3400.

Attribute: ARTS (p. 521)

**CRWR 4120 3 credits****Screenwriting and Drama: Advanced Workshop**

Students will continue to develop and deepen stage and screen writing techniques and revision skills through the writing of their own work, and through the critique of their peers' work, in a combination lecture/workshop setting. In this course students will work on a sustained dramatic narrative project for either stage or screen. Students will continue to develop effective techniques for criticism and revision of their writing through analysis and discussion.

Level: UG

Prerequisite(s): Two of the following: CRWR 3120, 3220 or 3400.

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRWR 4130 3 credits****Advanced Creative Nonfiction Workshop**

Students will develop and practice writing, reading, and revision of creative nonfiction on a sustained project, or series of projects, of their choice. They will critique their peers' work in a workshop setting and analyze published creative nonfiction from a writer's perspective through close reading, informed discussion, and writing.

Level: UG

Prerequisite(s): Two of the following: CRWR 3100, 3200, 3130, 3230 or 3400.

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRWR 4140 3 credits****Advanced New Forms and Media II**

Students will study multi-genre, interdisciplinary, and web-based creativity grounded in the craft of writing. They will examine and explore diverse methods of developing and implementing literary projects that utilize modalities such as movement, multi-sensory experience, digital platforms and interaction, theatre and community performance, and other media forms. Students will focus on topics such as the creative process, interdisciplinarity, performance and theatre, web development, social media, and the transgression of genre boundaries.

Level: UG

Prerequisite(s): Two of the following: CRWR 3140, 3240 or 3400

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRWR 4150 3 credits****Writers' Studio**

Students will develop a substantial body of work based on personal research, with the goal of articulating their practice in relation to contemporary literary production. They are required to identify an area of practice to be developed, which could include experimentation and innovation in different creative writing forms. Students will create a culminating body of work accompanied by a written thesis in which the intentions of the work are articulated and theorized.

Level: UG

Prerequisite(s): 21 credits from courses in CRWR, including (a) 6 credits from courses at the 3000 level or higher, and (b) one of CRWR 4100, 4110, 4120, 4130 or 4140.

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRWR 4200 3 credits****Advanced Short Fiction II**

Students will learn about and practice advanced techniques in writing, reading, and revision of short fiction. They will develop professional quality work on a sustained project, or series of projects, of their choice.

Level: UG

Prerequisite(s): CRWR 4100

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRWR 4210 3 credits****Advanced Poetry Workshop II**

Students will apply advanced poetic techniques, reading and revision skills through the writing of their own work in an individual project. They will primarily work toward a substantial poetry portfolio which will be revised intensively with the goal of publication. Students will research literary avenues of publication for their work.

Level: UG

Prerequisite(s): CRWR 4110

Attribute: ARTS (p. 521)

**CRWR 4220 3 credits****Advanced Screenwriting II**

Students will continue to develop mastery of screenwriting techniques, and reading and revision skills through the writing of their own work. They will create a speculative television script for a possible series, or a feature-length screenplay. Students will develop guidelines for effective criticism and revision of their writing through analysis and discussion.

Level: UG

Prerequisite(s): CRWR 4120 or permission of instructor (Note: For permission of instructor, students are required to have CRWR 3220 and sample screenplay portfolio.)

Attribute: ARTS (p. 521)

**CRWR 4230 3 credits****Advanced Creative Nonfiction II**

Students will apply advanced creative nonfiction techniques, reading and revision skills through the writing of their own work in an individual project with instructor approval. They will prioritize work toward a substantial portfolio of creative nonfiction which will be revised intensively with the goal of publication.

Level: UG

Prerequisite(s): CRWR 4130

Attribute: ARTS (p. 521)

**CRWR 4250 3 credits****The Writers' Studio II**

Students will develop a substantial body of work based on personal research, with the goal of articulating their practice in relation to contemporary literary production. They are required to identify an area of practice to be developed, which could include experimentation and innovation in different creative writing forms. Students will create a culminating body of work accompanied by a written thesis in which the intentions of the work are articulated and theorized. Note: This course may be taken more than once, in different genres.

Level: UG

Prerequisite(s): 21 credits from courses in CRWR, including (a) 6 credits from courses at the 3000 level or higher, and (b) one of CRWR 4100, 4110, 4120, 4130 or 4140.

Attribute: ARTS (p. 521)

## Criminology (CRIM)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables/) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](http://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**CRIM 1100 3 credits****Introduction to Criminology**

Students will examine the core concepts, basic data sources, and general research findings in the field of criminology, with particular attention to Canadian developments. They will study elements of continuity and discontinuity between traditional and contemporary theories of crime, deviance, criminality, and social control. Students will also be exposed to the major forms of criminal behaviour.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_3 (p. 522)

**CRIM 1101 3 credits****Introduction to the Criminal Justice System**

Students will study the various components that form the processes by which Canada responds to criminal behaviour. They will survey each of these components, such as the police, courts, and corrections, and will evaluate their impact on achieving justice.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_3 (p. 522)

**CRIM 1107 3 credits****Canadian Legal Systems**

Students will study Canada's legal systems, the different ways law is made in Canada, how law is organized, different explanations and perspectives of law, and its role in Canadian society. They will examine the court system and its processes, the selection and role of judges, how people become lawyers, and lawyers' responsibilities and regulation. Students will learn basic concepts in public and private law, including constitutional, criminal, and tort law. They will learn basic techniques of legal reasoning and research.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRIM 1207 3 credits****Introduction to Criminal Law**

Students will study the elements of criminal offenses and defenses in statute and case law in Canada. They will examine the historical, philosophical, and social roots of current criminal law and their impact on the definition of crime in Canada. Students will study how criminal law issues have been defined in the past, and how the Charter of Rights and Freedoms has contributed to the resolution of some issues and created new ones.

Level: UG

Prerequisite(s): CRIM 1107

Co-requisite(s): CRIM 1101

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRIM 1208 3 credits****Methods of Research in Criminology**

Students will examine the nature, logic, and structure of scientific research in the field of criminology. They will study fundamental elements of research design and methods of data collection in criminological research. Students will also conduct elementary data analysis.

Level: UG

Prerequisite(s): 15 credits at the 1100 level or higher including CRIM 1100

Attributes: ASTR (p. 523), ARTS (p. 521), QUAN (p. 532)

**CRIM 1215 3 credits****Interpersonal and Professional Development in Criminology**

Students will be introduced to the values and skills essential to working competently and ethically in justice and human service systems. They will learn and practice various aspects of interpersonal communication, including effective listening, empathic engagement, appropriate self-disclosure, ethical decision making, teambuilding, advocacy skills, and interviewing techniques. Students will focus on self-awareness, critical thinking, and reflection, while embracing the values of diversity and humility. They will be active participants, engaging in experiential exercises and various practice sessions throughout the course.

Level: UG

Prerequisite(s): 15 credits of 1100-level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRIM 2103 3 credits****Quantitative Data Analysis I**

Students will explore the logic and techniques of quantitative data analysis in criminal justice research, focusing on both descriptive and inferential statistics. They will use computer software to prepare data sets for analysis and describe and interpret univariate distributions and bivariate relationships.

Level: UG

Prerequisite(s): CRIM 1208

Attributes: ASTR (p. 523), ARTS (p. 521), QUAN (p. 532)

**CRIM 2204 3 credits****Criminal Justice and Psychology**

Students will critically examine and evaluate the Canadian criminal justice system from a legal psychological perspective. They will study the structure and functions of the criminal justice system and its principal participants by examining current knowledge in the field of forensic and social psychology. Students will analyze theories and research relevant to the role of the police, prosecutor, defence lawyer, judge, jury, witness, and defendant. They will review the relevance and admissibility of psychological knowledge in criminal adjudications through case law analysis. Students will also explore the influences on the criminal justice process from the community, the public, and the media. Students may earn credit for only one of CRIM 2204 and PSYC 3451.

Level: UG

Prerequisite(s): CRIM 1101

Credit Exclusion: PSYC 3451

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRIM 2205 3 credits****Crime, Criminal Justice, and the Media**

Students will critically examine the various ways in which crime and criminal justice are constructed in the media. They will explore crime and criminal justice representations in various media including films, television, print, and new media. Students will analyze how media constructions influence and shape historical and contemporary perceptions of crime and justice issues.

Level: UG

Prerequisite(s): CRIM 1100

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRIM 2211 3 credits****Introduction to Policing**

Students will examine the organizations, structures, and operations of Canadian policing. They will explore the institution of the public police and the practice of policing, policing history, theoretical perspectives on the role and function of policing, police subculture, and police-community relationships. Students will analyze police powers and the exercise of discretion, police procedures, operations, and governance accountability. They will also learn about emerging dimensions in policing research, including the expansion of pluralized or private forms of policing.

Level: UG

Prerequisite(s): CRIM 1101

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRIM 2214 3 credits****Corrections: Theory and Practice**

Students will develop an understanding of the history, theory, and philosophy of corrections and correctional practice, including the role of ideology in punishment and control, alternatives to incarceration, the organization and interaction of various correctional agencies and offender populations, and current trends in correctional practice. They will consider the lived experience of correctional staff and offenders and relationships of power, resistance, and identity within correctional settings. Students will explore international and North American developments in corrections.

Level: UG

Prerequisite(s): CRIM 1100 and CRIM 1101

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRIM 2249 3 credits****Youth Justice**

Students will study the definition and control of youth misconduct in an historical and contemporary context. They will become familiar with the ways in which the definition of youth delinquency changes with shifting philosophical and sociopolitical circumstances with an emphasis on how these circumstances play out in a Canadian context. Students will critically analyze the historical and contemporary youth justice models in Canada. They will also learn theories of juvenile delinquency. Students will assess the social impact of programs and services implemented to deal with young offenders.

Level: UG

Prerequisite(s): CRIM 1101

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRIM 2330 3 credits****Psychological Explanations of Criminal Behaviour**

Students will be introduced to and critically examine neurophysiological, bio-genetic, psychiatric, and psychological explanations of deviant and criminal behaviour. They will give special attention to research that explores associations between criminality and genetics, brain chemistry, the endocrine system, mental disorders, personality, moral development, and various forms of social learning.

Level: UG

Prerequisite(s): PSYC 1100 or PSYC 1200

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRIM 2331 3 credits****Sociological Explanations of Criminal Behaviour**

Students will explore various sociological explanations for crime, criminality, and disorder. They will examine topics such as functionalism, social disorganization, sub-cultural theory, differential association, differential opportunity, strain theory, control theory, labelling, conflict theory, radical, feminist, and other critical perspectives including postmodern approaches. Students will critically evaluate each approach for strengths and weaknesses and assess each perspective as an explanation for contemporary forms of crime and disorder.

Level: UG

Prerequisite(s): CRIM 1100 or SOCI 1125

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRIM 2341 3 credits****Canadian Criminal Justice Administration**

Students will examine issues in the administration of criminal justice in Canada with regard to accountability, change and impact. They will use theories of state and society to analyze criminal justice events, institutions, organizations, and processes, and locate them within a broader socio-political context. Students will examine the role of the judiciary, the administration, the legislature, and other groups and movements in the development of criminal justice policy and will consider the impact and application of scholarly research and views on policy development.

Level: UG

Prerequisite(s): CRIM 1101 and 1107

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRIM 2355 3 credits****Police Deviance and Accountability**

Students will analyze the issue of police accountability and address the social, political, organizational, and psychological factors that contribute to police deviance. They will examine corruption, perjury, the use of excessive force, and personal or family repercussions of work pressures. Students will also examine systemic racial, gender, and class discrimination and society's response to police deviance. They will spend time analyzing the unique Canadian aspects of this topic.

Level: UG

Prerequisite(s): CRIM 1101

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRIM 3000 3 credits****Justice/Injustice**

Students will critically examine the concept of justice with respect to ongoing struggles for a just society. They will use a historical overview to explore how contemporary societies position themselves in relation to justice and injustice, including colonialism, post-colonialism, globalization, and counter-hegemonic movements. Students will be provided an opportunity to deconstruct taken for granted notions of how "justice" has become embedded in contemporary society. They will critically examine the interface between individual, collective, institutional, and global forces, and their impact on justice-related issues. Students will focus on the following paradigms of justice: social, restorative, retributive, distributive, and community. They will gain a critical understanding of the relationship between justice and injustice using both theory and praxis, while working in the classroom and the field. Note: This is a seminar course.

Level: UG

Prerequisite(s): CRIM 2341 and 6 credits of ENGL at the 1100 level or higher

Attribute: ARTS (p. 521)

**CRIM 3100 3 credits****Advanced Theories of Crime and Community**

Students will critically examine theoretical and empirical issues in crime and community research. They will study the ways in which structural, cultural, and institutional components of communities impact crime and delinquency. Students will also examine the effect of crime and delinquency on communities. Note: This is a seminar course.

Level: UG

Prerequisite(s): CRIM 2330 and 2331 and 6 credits of ENGL at the 1100 level or higher

Attribute: ARTS (p. 521)

**CRIM 3104 3 credits****Qualitative Research Methods**

Students will learn the theory and practice of qualitative inquiry in criminological and criminal justice research. They will examine and assess data collection procedures that may include interviews, observation, and focus groups, and will evaluate strategies for organizing and analyzing qualitative data. Students will apply learned principles to selected examples.

Level: UG

Prerequisite(s): CRIM 1208 and 6 credits of ENGL at the 1100 level or higher

Attribute: ARTS (p. 521)

**CRIM 3111 3 credits****Contemporary Sociological Criminology**

Students will examine contemporary trends in sociological criminology. They will review current themes and debates arising from a variety of theoretical perspectives. Students also will explore how an increasing emphasis on integrative model building influences sociological thinking in criminology. They will critically assess policy implications arising from recent developments in sociological criminology. Note: This is a seminar course.

Level: UG

Prerequisite(s): 60 undergraduate credits including CRIM 2331 and 6 credits of ENGL at the 1100 level or higher

Attribute: ARTS (p. 521)

**CRIM 3113 3 credits****Critical Criminology**

Students will examine the core elements of critical analysis within criminology and will assess their application to the study of crime and social control. They will differentiate between alternative critical perspectives in terms of underlying assumptions and conceptions of power and inequality in society.

Level: UG

Prerequisite(s): CRIM 1100 and 2331 and 6 credits of ENGL at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRIM 3115 3 credits****Crime Mapping**

Students will examine the use of geographic information systems (GIS) techniques as applied to crime analysis and criminal investigations. They will critically analyze the developments within the past decade in the use of geographical concepts/methodology toward the spatial-statistical analysis of criminal activity. Students will conduct spatial analyses of criminal activity and criminal patterns via geographic software. They will critically analyze the interrelationships between various methodological and practical issues pertaining to applied crime mapping versus academic criminological spatial analyses.

Level: UG

Prerequisite(s): CRIM 2103 and 6 credits of ENGL at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRIM 3118 3 credits****White-Collar and Corporate Crime**

Students will critically analyze conceptualizations of white-collar crime, corporate crime, and elite deviance. They will examine constructions of social harm and theoretical explanations of political, environmental, occupational, and corporate criminality. Students will study societal reactions to, and the prevention and regulation of, white-collar crime, corporate crime and elite deviance.

Level: UG

Prerequisite(s): CRIM 1100 and (CRIM 2331 or 2341) and 6 credits of ENGL at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRIM 3120 3 credits****Organized Crime**

Students will apply criminological theory with a specific application to the phenomenon of organized crime. They will analyze the construction of "gang" and "organized crime." Students will study the global issues surrounding organized crime being a global issue that involves drug trafficking, human trafficking, money laundering, and other forms of crime. They will examine this issue from basic street gangs to sophisticated organized crime groups with a focus on prevention, intervention, and suppression. Students will also contest notions of organized crime and the relationship that often exists between organized crime and legitimate entities such as corporations and the state. Students will examine in depth the "push" and "pull" of gang life in British Columbia.

Level: UG

Prerequisite(s): 45 credits at the 1100 level or higher and 6 credits of ENGL at the 1100 level or higher

Attribute: ARTS (p. 521)

**CRIM 3211 3 credits****Policing and Community**

Students will analyze the history, theory, and organizational features of community policing, with an emphasis on the Canadian context. They will critically examine the history and current dynamics of police-community relations. Students will explore the historical antecedents of contemporary community policing strategies, relationships between current and emerging policing models, and research on the impact and effectiveness of community policing. They will examine problem-oriented, preventative, and intelligence-led models of policing. Students will examine critiques of police-community relations.

Level: UG

Prerequisite(s): CRIM 2211 and 6 credits from ENGL courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRIM 3213 3 credits****Community Corrections**

Students will critically evaluate the role of community corrections as an alternative to incarceration and as an approach to rehabilitation and community integration. They will critically examine such community-based programs as probation and intermediate sanctions including conditional sentencing. Students will critically evaluate conditional release programs such as parole and statutory release. They will critically analyze community corrections models and existing programs and sanctions as well as the challenges of working with offenders in community settings.

Level: UG

Prerequisite(s): (CRIM 2214 or 2341) and 6 credits of ENGL at the 1100 level or higher

Attribute: ARTS (p. 521)

**CRIM 3217 3 credits****Women, Crime, and Justice**

Students will develop an historical and analytical overview of female offending and female victimization. They will take into account the function of gender in criminality and victimization and the social responses to crime and victimization. Students will examine various theories of female crime and delinquency, with an emphasis on feminist theories. They will focus on patterns of control, punishment, and policies and their implementation, as they affect women and girls in contact with the law. For graduation purposes students with credit for CRIM 2213 cannot take CRIM 3217 for further credit.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including (a) ENGL 1100 (b) 3 further credits from a course in ENGL, (c) CRIM 1100 and CRIM 1101

Credit Exclusion: CRIM 2213

Attribute: ARTS (p. 521)

**CRIM 3249 3 credits****Issues in Youth Justice**

Students will critically and comparatively analyze current issues in youth justice. They will study issues such as the over-representation of aboriginal youth and/or other minority youth in the youth justice system, gender justice, models of youth justice, policy implications of theories of youth justice, sentencing youth, violent and/or persistent youth offenders, rehabilitation, and youth and the media.

Level: UG

Prerequisite(s): CRIM 1101 and 6 credits from courses in ENGL at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRIM 3270 3 credits****Substance Use and Harm Reduction**

Students will critically examine substance use regulation and harm reduction policies in Canada. They will examine core concepts, policies, harm reduction programs, and theories of addiction within historical and current social, political, and legal contexts. Students will analyze different approaches to managing substance use (e.g., punishment, harm reduction). They will focus on how legislation and drug policies are differentially and strategically applied and enforced with an emphasis on gender and racism.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including (a) CRIM 1100 or CRIM 1101, and (b) 6 credits from courses in ENGL

Attribute: ARTS (p. 521)

**CRIM 3302 3 credits****Procedure and Evidence**

Students will learn the fundamentals of the law of criminal procedure and criminal evidence in Canada and will critically assess the policies behind the law. They will examine issues relating to charges, bail hearings, preliminary hearings, trials and appeals. Students will study the law on collecting and presenting evidence in light of current constitutional, statutory and common law limitations, and will compare criminal process with civil process.

Level: UG

Prerequisite(s): CRIM 2341 and 1207 and 6 credits of ENGL at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRIM 3305 3 credits****Law and Society**

Students will learn about the relationship of law to different social and political structures. They will study the processes of making, enforcing and reforming law, from different sociological, historical, and jurisprudential perspectives. Students will study the development of public opinion about law within communities and in the broader society, and the role of public opinion in law reform. They will consider the role of legal reform in defining crime and deviance.

Level: UG

Prerequisite(s): CRIM 2341 and (CRIM 2330 or CRIM 2331) and 6 credits of ENGL at the 1100 level or higher

Attribute: ARTS (p. 521)

**CRIM 3307 3 credits****Issues in Conflict Resolution**

Students will learn and practice theories of conflict resolution such as negotiation, mediation, nonviolent communication, and advocacy. They will study emerging uses of conflict resolution in the justice system and in other settings within the community. Students will develop conflict resolution skills through study, role-playing, and group work. Note: This is a seminar course.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher, including (a) CRIM 1215 and (b) 6 credits from courses in ENGL

Attribute: ARTS (p. 521)

**CRIM 3310 3 credits****Restorative Justice**

Students will critically examine the restorative justice paradigm and the history, philosophy, vision, and practices of restorative justice. They will analyze issues related to the pursuit of justice through restorative and community-based approaches to conflict. Students will gain insight by juxtaposing the lens of crime and punishment with the lens of harm and healing, exploring in the process the importance of values and relationships. Students will critically examine the roles of victims, offenders, community, and government. They will assess Canadian and international examples of restorative approaches in a variety of settings.

Level: UG

Prerequisite(s): 45 credits of 1100 or higher, including (CRIM 1101) and (6 credits of ENGL at the 1100 level or higher)

Attribute: ARTS (p. 521)

**CRIM 3351 3 credits****Philosophy of Law**

Students will study theories about the purpose and function of law from various historical eras. They will study major philosophical movements and perspectives on law including natural law, legal positivism, legal formalism, legal realism, critical legal studies, critical race theory, feminist legal theory, and Indigenous legal frameworks. Students will develop and understanding of law in theory and practice and how to apply legal philosophy to current legal issues. NOTE: This is a seminar course.

Level: UG

Prerequisite(s): CRIM 2341 and 6 credits from courses in ENGL at the 1100 level or higher

Attribute: ARTS (p. 521)

**CRIM 3512 3 credits****Mental Disorder and Canadian Law**

Students will critically examine the role mental disorder plays in Canadian civil and criminal proceedings. They will focus on the ways in which mentally disordered individuals are subject to different legal procedures and considerations in Canada. Students will examine the forensic assessment of mental disorder and its relationship to various legal standards and issues including civil commitment, the right to refuse treatment, fitness to stand trial, criminal responsibility, and dangerous and long-term offender hearings.

Level: UG

Prerequisite(s): CRIM 2341 and 6 credits of ENGL at the 1100 level or higher

Attribute: ARTS (p. 521)

**CRIM 3800 6 credits****Service Learning in Criminology and Justice**

Students will volunteer for a not-for-profit social service agency or other community group that is mandated to address issues related to criminology and/or social justice. They will integrate criminological theory, concepts, and methods with their own direct experience of working in a community agency. Students will also be involved in weekly classroom meetings with classmates to share experiences, self-reflections, and insights about their volunteer work. They will reflect on, and analyze, the connections and disconnections between 'academic' and other sources of knowledge at play at the community level. Note: This is a seminar course combined with service learning. Note: The volunteer placement will be established in advance in consultation with the instructor.

Level: UG

Prerequisite(s): 45 credits of 1100 or higher including CRIM 1215 and 6 credits of ENGL at the 1100 level or higher

Attribute: ARTS (p. 521)

**CRIM 4112 3 credits****Contemporary Psychological Criminology**

Students will study theoretical advancements that span a diverse spectrum of contemporary perspectives in psychological criminology. They will evaluate the explanatory scope and testability of models that examine a wide range of antisocial and criminal behaviour. Students will critically assess policy implications arising from recent developments in psychological criminology.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher, including: CRIM 2330 and 6 credits from courses at the 1100 level or higher in ENGL.

Attribute: ARTS (p. 521)

**CRIM 4201 3 credits****Community Safety and Crime Prevention**

Students will critically examine initiatives that can be undertaken at the community level to prevent crime and promote public safety. They will study crime prevention approaches that target elements of the built environment as well as the social and economic conditions that are linked to offending behaviour. Students will assess crime prevention and public safety not only in local neighbourhoods, but also at the municipal, provincial, national, and international levels. Note: This is a seminar course.

Level: UG

Prerequisite(s): CRIM 2331 and 6 credits of ENGL at the 1100 level or higher

Attribute: ARTS (p. 521)

**CRIM 4235 3 credits****Minorities and the Criminal Justice System**

Students will critically analyze the practices of othering. They will learn how these practices separate, exclude and disempower based on profiles organized by race, ethnicity, nationality, gender, sexuality, religion, education, ability, socio-economic status and/or other such categorizations. Students will examine relations of power between minorities and majorities within and with the criminal justice system, investigating processes of criminalization, victimization, oppression, colonization and resistance. Note: This is a seminar course.

Level: UG

Prerequisite(s): All of: (a) CRIM 2331 or 2341 (b) ENGL 1100 and (c) 3 credits from courses in ENGL at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRIM 4240 3 credits****Indigenous Peoples and Justice**

Students will examine the historical and contemporary experiences of Indigenous peoples and the justice system in Canada utilizing a decolonized perspective. They will explore systemic and institutional racism as well as the impacts of residential schools and the effects of colonialism on traditional values and culture. Students will learn about evolving Indigenous legal rights and the challenges Indigenous peoples face relating to land claims, self-government, and access to resources. They will also examine risk factors relating to victimization and criminalization. Students will gain insight and understanding of various Indigenous teachings, worldviews, culturally relevant healing, crime prevention, and restorative justice, through learning from an Indigenous perspective.

Level: UG

Prerequisite(s): 45 credits of 1100 or higher including 6 credits of ENGL at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRIM 4245 3 credits****Indigenous Activism**

Students will examine historical and contemporary Indigenous activism in the Americas. They will critically assess government and corporate intrusion on Indigenous rights and lands, and Indigenous people's collective resistance and attempts to protect inherent rights and lands. Students will study Indigenous mobilization, political organization, self-determination, resurgence, and regeneration of communities and cultures. They will examine collective strategies and tactics, specific examples of struggle, visions of social alternatives (anti-capitalist, anti-statist, anti-colonial, etc.), and community social relations. Note: Students may earn credit for only one of CRIM 4245 and INDG 4245 as they are identical courses.

Level: UG

Prerequisite(s): 45 credits at the 1100 or higher, including 6 credits of ENGL at the 1100 level or higher

Cross-listing: INDG 4245

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRIM 4300 3 credits****Administrative and Regulatory Law**

Students will critically examine the phenomenon of public regulation in Canada. They will evaluate the range of options, apart from the criminal law, that the state may use to advance its concept of the public interest, comparing strategies and enforcement as well as implications and consequences. Students will also investigate and apply the principles of administrative law developed by courts and legislatures to provide oversight to administrative and regulatory regimes. Note: This is a seminar course.

Level: UG

Prerequisite(s): CRIM 2341 and 6 credits of ENGL at the 1100-level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRIM 4301 3 credits****Community Advocacy and Human Rights**

Students will study the national and international evolution of human rights in public attitudes, political and legal theory, and practice. They will contrast ideas about individual human rights with collective rights, diversity, and equality. Students will consider and evaluate various strategies used by marginalized groups to achieve their goals. Students will become familiar with the legal framework of human rights in Canada, including provincial and federal legislation, the Constitution, case law, international law, and various means of articulating and advancing human rights claims and interests.

Level: UG

Prerequisite(s): CRIM 2341 and 6 credits of ENGL at the 1100 level or higher

Attribute: ARTS (p. 521)

**CRIM 4400 3 credits****Ethics and Professional Development**

Students will analyze, critique, and apply moral and ethical reasoning in preparation for their role as practitioners in the justice field. They will examine contemporary ethical issues in justice and human service systems. Students will examine, develop, and express their own values and positions relative to ethical issues they may face as practitioners in the field. They will be active participants throughout the course, focusing on self-awareness, critical thinking, and reflection. Students will develop written, oral, reasoning, and interpersonal skills required to respond to ethically challenging situations in a competent and professional manner. Note: This is a seminar course.

Level: UG

Prerequisite(s): 60 credits at the 1100 or higher including CRIM 1215 and 6 credits of ENGL at the 1100 level or higher

Attribute: ARTS (p. 521)

**CRIM 4410 3 credits****Policy and Program Evaluation**

Students will critically analyze the approaches to developing and conducting policy and program evaluations within the criminal justice system. They will examine quantitative, qualitative, and quasi-experimental methods for analyzing criminal justice initiatives, explore various goals and theories of evaluation, and learn how to interpret appropriately and communicate results. Students will analyze specific criminal justice policies and programs to illustrate possible alternative responses to social problems and the varying effects of criminal justice policies. Note: This is a seminar course.

Level: UG

Prerequisite(s): CRIM 2341 and (CRIM 2103 or PSYC 2300 or SOCI 2365 or MATH 1115) and 6 credits of ENGL at the 1100 level or higher

Attribute: ARTS (p. 521)

**CRIM 4800 12 credits****Practicum in Criminology and Justice**

Students will work within a justice related or community organization for one semester under the supervision of the faculty practicum coordinator and an agency representative. They will further their personal and professional development, integrating knowledge and skills acquired from the degree curriculum in the context of their practical field experience.

Students will complete assignments addressing theoretical and practical issues relating to their placement, as well as attend periodic seminars as a class. Note: Students must work with the faculty practicum coordinator to obtain a mutually agreed upon placement at the beginning of the semester prior to the start of this course. Only those students who obtain a placement with approval from the practicum coordinator will be able to register; it is a competitive process and a placement cannot be guaranteed. All of (a.) 90 credits from courses at the 1100 level or higher, including CRIM 4400, and (b.) 6 credits from courses in ENGL at the 1100 level or higher, and (c.) Permission of the Department Practicum Coordinator

Level: UG

Attribute: ARTS (p. 521)

**CRIM 4900 3 credits****Special Topics**

Students will examine a selected topic in criminology, criminal justice, or law and advocacy. They will critically analyze relevant literature and develop a comprehensive understanding of the topic. Students will examine and evaluate recent developments in the specific field, assess the implications of these developments, and identify future directions of research or policy development. Note: This is a seminar course. Note: The area of study will be established in advance by the department. Please check with the department for proposed offerings. Students may take this course twice on different topics.

Level: UG

Prerequisite(s): 45 credits of 1100-level or higher, including (CRIM 1100 or 1101) and 6 credits of ENGL at the 1100 or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**CRIM 5000 3 credits****Honours Thesis I**

Students will carry out a detailed investigation of a criminological topic of interest. They will conduct the investigation, under the supervision of a faculty member with expertise in the area, in the form of a literature review. Students will identify and review relevant sources of information to develop a comprehensive understanding of their topic. They will submit to their Honours supervisor a final paper reviewing the literature relating to their topic and identifying potential research questions for further investigation. Note: The literature review and the research issues identified in this course will be used for the completion of a research proposal in CRIM 5010 and completion of a thesis in CRIM 5020.

Level: UG

Prerequisite(s): CRIM 3104 and acceptance into a Criminology honours program

Co-requisite(s): CRIM 5010

Attribute: ARTS (p. 521)

**CRIM 5010 3 credits****Honours Seminar**

Students will critically analyze issues relating to the conduct of research in criminology, beginning with the development of research questions through to the dissemination of research results in academic journals and at conferences. They will write a proposed research design or method of inquiry to investigate a specific research hypothesis or issue. Students will present their research proposal to their supervising committee in an open forum. Note: This is a seminar-based course. The research proposal for this course is based on an examination of the literature carried out in CRIM 5000 and will be used for the subsequent completion of CRIM 5020. Level: UG

Prerequisite(s): CRIM 3104

Co-requisite(s): CRIM 5000

Attribute: ARTS (p. 521)

**CRIM 5020 6 credits****Honours Thesis II**

Students will carry out the original research project proposed in CRIM 5010 under the supervision of a faculty member with expertise in the area selected. They will, using appropriate methods, collect and interpret data, and write a thesis on the results of the project. Students will orally defend their thesis in an open forum.

Level: UG

Prerequisite(s): CRIM 5000 and CRIM 5010 and permission of the instructor

Attribute: ARTS (p. 521)

## Culture Studies (CUST)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (https://www.bctransferguide.ca/) - for information about course transfer in B.C.

**CUST 2147 3 credits****Issues in Contemporary Art I**

Students will study theoretical issues relevant to the production and reception of visual art and popular culture in the last 35 years, including debates around semiotics, modernism/postmodernism, feminism(s), postcolonialism, and the attendant politics of identities produced through structures of race, class, gender and sexual preferences/practices.

Students will examine the emergence of new technologies and their use in art practices. Students will visit exhibition venues, including public museums and galleries, commercial galleries and artist run centres. Note: Students may earn credit for only one of FINA 2147 and CUST 2147 as they are identical courses. This is a seminar-based course.

Level: UG

Prerequisite(s): ARTH 1120, ARTH 1121, ENGL 1100 and FINA 1167.

Cross-listing: FINA 2147

Attributes: ASTR (p. 523), ARTS (p. 521)

**CUST 3147 3 credits****Issues in Contemporary Art II**

Students will expand their knowledge of issues in the field of contemporary art. They will explore principles of critical and cultural studies that inform contemporary art praxis. Students will actively participate in this seminar-based course, which is structured around a series of required readings and facilitated discussions, supplemented by relevant slides, video and digital materials. Students will also go on local field trips to galleries, museums and artist run centres. Note: Students may earn credit for only one of FINA 3147 and CUST 3147 as they are identical courses.

Level: UG

Prerequisite(s): ARTH 2120, ARTH 2122, ARTH 2222, CUST 2147 or FINA 2147.

Cross-listing: FINA 3147

Attributes: ASTR (p. 523), ARTS (p. 521)

## Design (DESN)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (https://www.bctransferguide.ca/) - for information about course transfer in B.C.

**DESN 2000 3 credits****Academic Research and Writing for Design**

Students will study and practice academic research methods, and written and oral communication skills as these apply to design studies. They will acquire a variety of research, communication, and editing skills.

They will learn principles, theories, and techniques required for creating design documents, proposals, reports, and project plans. Students will develop their writing skills through assignments that focus on describing, analyzing, and discussing topics relevant to their area of design focus.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher

Attribute: DESN (p. 521)

**DESN 2001 3 credits****Design Thinking and Methodology**

Students will study the iterative process of designing. They will evaluate how current social perspectives on sustainability, ethics, and universality drive design decisions. They will define a design problem, and begin to develop a personal methodology for design.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher

Co-requisite(s): DESN 2002

Attribute: DESN (p. 521)

**DESN 2002 3 credits****Design Concept and Process Studio**

Students will research, explore, and ideate the principles and elements involved in creating design solutions. They will test design concepts in two- and three-dimensions, documenting their discoveries in a process book.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher

Co-requisite(s): DESN 2001

Attribute: DESN (p. 521)

**DESN 2003 3 credits****East Meets West – Vancouver Field School**

Students will critically examine, interact with, and document the power of Vancouver's natural landscape and its effect on the unique cultural heritage of "North America's gateway to the Asia Pacific". They will explore through the region's built and natural environments the cultural, creative collision that happens when east meets west. Students will share their conceptual analysis and conclusions through social media with communities around the world.

Level: UG

Attribute: DESN (p. 521)

**DESN 2004 3 credits****Design Thinking & Innovation**

Students apply design thinking methodologies to create solutions for social, cultural, environmental, and/or organizational challenges. They will engage in collaborative processes to research, develop, test, and present innovative solutions to benefit user group experiences through project work that reflects student areas of interest. (Design thinking is creative problem solving that involves critical analysis of problems and contexts employing interdisciplinary perspectives, an emphasis on human-centric research to determine user needs, iterative processes of idea generation and testing, and development of innovative strategies to arrive at creative and viable solutions.)

Level: UG

Prerequisite(s): ENGL 1100

Attributes: ASTR (p. 523), DESN (p. 521)

**DESN 2100 3 credits****The Vancouver Design Experience**

Learners will engage in an intensive field study around the Metro Vancouver region and Canada's West Coast for a period of two weeks (14 days). They will take part in scheduled immersion activities and explore design applications in an integrative learning environment. They will explore the region's built and natural environments from a design lens and contextualize their field learning with respect to the context of site, culture, history, climate, and geography. They will develop interdisciplinary skills in creativity, design thinking, academic inquiry, as well as cultural awareness. Students will share their analysis and conclusions through social media. Note: Students must be nineteen years or older at the start of the course. The cost of travel and related expenses are borne by the student.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher

Attribute: DESN (p. 521)

**DESN 2500 6 credits****Design Thinking: Food System Connectivity in Design, Business and Agriculture**

The study of agriculture-business and food systems facilitates transdisciplinary learning and research that is intimately linked to the understanding of sustainability and the cultures that they are embedded in. This Field School will provide opportunities for students to implement problem solving and critical thinking methodologies to help students develop an understanding of the important role that agriculture and food systems play in connecting all aspects of the economy, business, environment and society as well as the value of regional food systems. Students will visit farms and food related businesses locally, nationally and/or internationally. When studying food systems, students will compare and contrast financing, marketing, pricing and logistics of food production. NOTE: Students will spend two weeks at the Field School site in addition to class sessions on campus before and after travel. Students must be nineteen years or older at the start of the course. Students may earn credit for only one of DESN 2500, AGRI 2500 or BUSI 2500 as they are identical courses.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher.

Cross-listing: BUSI 2500

Attributes: ASTR (p. 523), DESN (p. 521)

**DESN 3000 6 credits****Interdisciplinary Amazon Field School**

Learners will engage in an intensive interdisciplinary field school in the Amazon rain forest. They will take part in cultural and creative immersion activities, participate in community engagement projects, and contextualize their field learning by classroom-based analysis and critical reflection before and after their field experiences. They will develop interdisciplinary skills in creativity, academic inquiry, ecology and conservation, cultural awareness, environmental design, design thinking, and community development. Learners will become familiar with various expressive modalities of the Amazon region (e.g. design, writing, music, movement, expressive arts, materiality, storytelling, etc.) and will explore the application of those modalities in an integrative learning environment. Note: Students will spend two weeks at the Field School site in addition to class sessions on campus before and after travel. Students must be nineteen years or older at the start of the course. Students may earn credit for only one of DESN 3000 or ARTS 3000 as they are identical courses.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher

Cross-listing: ARTS 3000

Attribute: DESN (p. 521)

**DESN 3100 3 credits****Design Field School**

Learners will engage in an intensive field study in another city or country for a period of two weeks. They will take part in scheduled immersion activities and contextualize their field learning by classroom-based analysis and critical reflection before and after their field experiences. Students will assimilate design theory and knowledge with respect to the context of site, culture, climate, geography, and explore design applications in an integrative learning environment. They will develop interdisciplinary skills in creativity, design thinking, academic inquiry, and cultural awareness. Students must be 19 years or older at the start of the course. There will be class sessions on campus before and after the travel portion.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher

Attribute: DESN (p. 521)

**DESN 3900 3 credits****Special Topics**

Students will examine a selected topic relating to the field of design through a critical analysis of relevant literature, case studies, recent developments, and/or contemporary issues. They will engage in research and analysis, dialogue, presentations, and project work. Note: The specific topic for the course will be established in advance by the department. Please check with the department for proposed offerings. Students may take this course twice, so long as each time the course is taken, the specific topics under examination are different.

Level: UG

Prerequisite(s): 30 credits from courses at 1100-level or higher, including ENGL 1100

Attribute: DESN (p. 521)

**DESN 4100 3 credits****Innovation Project**

Students will critically examine complex, open-ended challenges and issues that impact people, services, systems, workplaces, and organizations in an innovation project. They will apply design thinking to an innovation project. They will apply methodologies, stakeholder and user group research, trans-disciplinary theories, and collaborative approaches to ideate, iterate, create, and test innovative strategies and solutions that have the potential to initiate positive, transformational change. (Design thinking is a creative, human-centric, problem-solving process that can help communities, small businesses, corporations, not-for-profits, institutions, and others create responsive and innovative solutions for services, products, systems, environments, and technologies).

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher, including ENGL 1100 and 6 credits from courses at the 3000 level or higher.

Attribute: DESN (p. 521)

## Economics (ECON)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**ECON 1101 3 credits****Foundations of Economics**

Students will study basic economic principles and economic issues facing the Canadian economy. They will analyze and discuss such issues as free trade, environmental problems, economic growth, unemployment and inflation. Note: Students with credit for ECON 1150 or ECON 1250 may not take ECON 1101 for further credit.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521)

**ECON 1110 3 credits****Making Economic Sense of Life**

Students are introduced to the explanatory power of microeconomic reasoning. They learn and practice basic methods for the appropriate economic explanation of human behavior. Students will consider behaviour such as discrimination, sexual activity, divorce, traffic patterns, and military participation.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521)

**ECON 1150 3 credits****Principles of Microeconomics**

Students will learn how economists view the choices of households and firms. Topics covered include the nature and method of economics, scarcity, specialization and exchange, supply and demand analysis, elasticity, consumer behaviour, economics of the firm, perfect competition, monopoly and market failure. Students planning to take both ECON 1150 and ECON 1250 are recommended to successfully complete ECON 1150 first.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521), PW\_3 (p. 522), QUAN (p. 532)

**ECON 1250 3 credits****Principles of Macroeconomics**

Students will study macroeconomic theory at an introductory level. Topics treated include macroeconomic performance measures, economic growth, inflation, unemployment, money and banking, interest rates, exchange rates and government policy in a small, open economy like Canada. Students planning to take both ECON 1150 and ECON 1250 are recommended to successfully complete ECON 1150 first.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521), PW\_3 (p. 522), QUAN (p. 532)

**ECON 2210 3 credits****Money and Banking**

Students will examine the economics of the Canadian financial system. They will study the structure and operation of the banking system, money, financial and foreign exchange markets; theories of financial markets and financial intermediation; processes of monetary control and the regulation of the banking and financial systems. They will examine the role of the central bank in the conduct of monetary policy.

Level: UG

Prerequisite(s): ECON 1150 and ECON 1250

Attributes: ASTR (p. 523), BUSI (p. 521), QUAN (p. 532)

**ECON 2255 3 credits****Globalization in an Economic Framework**

Students will address theoretical and policy issues related to globalization. They will learn about economic implications of lowered barriers to the international flow of information, capital, labour, and goods. Students will study topics including theoretical foundations of globalization, international economic institutions, and the role of globalization in the process of economic development. Students will be introduced to the relevant models, examine the evidence and discuss various arguments that figure in the debate.

Level: UG

Prerequisite(s): ECON 1150 and ECON 1250

Attributes: ASTR (p. 523), BUSI (p. 521)

**ECON 2260 3 credits****Environmental Economics**

Students will examine the links between the economy and the environment. They will use economic principles to explain why environmental problems occur in a market economy and study how economic policy instruments can be used to deal with these problems.

Level: UG

Prerequisite(s): ECON 1150 and ECON 1250

Attributes: ASTR (p. 523), BUSI (p. 521)

**ECON 2280 3 credits****Labour Economics**

Students will use economic theory to examine the decision-making processes that underlie the supply of and the demand for labour in the Canadian economy, with emphasis on the role of labour markets in determining wages and employment levels. They will analyze relevant labour market structures, theories that predict the outcome of collective bargaining, and policies with respect to unemployment and retraining.

Level: UG

Prerequisite(s): ECON 1150 and ECON 1250

Attributes: ASTR (p. 523), BUSI (p. 521)

**ECON 2350 3 credits****Intermediate Microeconomics**

Students will study the price theory aspects of intermediate microeconomics, with a focus on consumer theory, production and cost, the firm under perfect and imperfect competition, markets for factor inputs, and general equilibrium. Students will learn to identify, analyze, and solve microeconomic problems within these topic areas. For graduation purposes students with credit for ECON 2350 cannot take ECON 3150 for further credit.

Level: UG

Prerequisite(s): All of (a) ECON 1150, (b) ECON 1250 and (c) MATH 1120, 1130, or 1140

Credit Exclusion: ECON 3150

Attributes: ASTR (p. 523), BUSI (p. 521), QUAN (p. 532)

**ECON 3100 3 credits****Economics of Sustainability Policy**

Students will study current sustainability issues and policies from an economic perspective. Students will learn about the Neoclassical Growth Theory. The students will study several topics including: the values and the limitations of the alternative measures of economic welfare, policy reports and studies, and the implications of complementarity between natural and human-made capital. Students may earn credit for only one of ECON 3100 and POST 3100 as they are identical courses.

Level: UG

Prerequisite(s): ECON 1150 and 1250

Cross-listing: POST 3100

Attribute: BUSI (p. 521)

**ECON 3150 3 credits****Managerial Economics**

Students will apply microeconomic theory and quantitative techniques to managerial decision making. They will use these tools to solve problems faced by firms. Students will examine such topics as demand analysis and estimation, production and cost analysis, pricing and output decisions within various market structures, and competitive strategies.

For graduation purposes students with credit for ECON 2350 cannot take ECON 3150 for further credit

Level: UG

Prerequisite(s): ECON 1150 and 1250 and one of the following:

BUQU 1230; ACCT 1230; MATH 1115; MATH 2315; MATH 2341;

PSYC 2300; CRIM 2103; SOCI 2365; or equivalent first-year statistics

course

Attributes: ASTR (p. 523), BUSI (p. 521)

**ECON 3208 3 credits****History of Economic Thought**

Students will survey the ideas of the major figures in the development of economic thought from the medieval period to the present. They will examine the characteristics of the prevailing economic theories in relation to the economic conditions of the time. Students will trace the evolution of economic theory from Classical Economics, the Marxist and Historicist challenges to Classicism, and proceed through a discussion of the development of Marginalism, the Neo-classical Economics of Alfred Marshall, the criticisms of Neo-classical Economics, and the Keynesian revolution and counter-revolution.

Level: UG

Prerequisite(s): ECON 1150, ECON 1250 and 6 credits of 2000-level ECON courses

Attribute: BUSI (p. 521)

**ECON 3211 3 credits****Economic History of Canada**

Learning about economic history of Canada is essential to understanding how Canada has become the country it is now. Beginning with the Aboriginal economies and spanning more than 150 years, the economic history of Canada has been developing a *Mari usque ad Mare*, harvesting fish and lumber and wheat and numerous talents of numerous people - and controversy. War and peace, land and poverty, trade and Confederation: the course offers a modern economic approach to interpreting the economic past of Canada

Level: UG

Prerequisite(s): ECON 1150 and ECON 1250, and 6 credits from courses in ECON at the 2000 level or higher.

Attributes: ASTR (p. 523), BUSI (p. 521)

**ECON 3251 3 credits****Women and the Economy**

Students will learn how gender differences impact women in both the household and the marketplace. They will obtain an introduction to the theoretical and empirical literature and use basic microeconomic tools to study specific women's issues. Students will explore economic aspects of family formation; occupational and work choices; household versus market production; explanations of gender differences in earnings; the human capital investment theory; and how public policies affect paid work and the family.

Level: UG

Prerequisite(s): ECON 1150 and 1250, and 6 credits from courses in ECON at the 2000 level or higher.

Attribute: BUSI (p. 521)

**ECON 3270 3 credits****Industrial Organization**

Students will examine the economics of imperfect competition. They will learn how different market structures operate, study pricing strategies and examine government policy in these market structures and in various industries. Students will analyze the theory of the firm, monopoly, monopolistic competition, oligopoly, government policies and their effects, Canadian competition policies, regulation and deregulation. They will also discuss game theory and various aspects of strategic behaviour such as price discrimination.

Level: UG

Prerequisite(s): All of: (a) ECON 1150, (b) ECON 1250 and (c) 6 credits from courses in ECON at the 2000 level or higher.

Attribute: BUSI (p. 521)

**ECON 3333 3 credits****Introductory Econometrics**

Students will be introduced to the techniques employed in the estimation and inference of economic modeling. They will learn the intuitive and practical application of the single-equation linear regression model and the use of statistical software.

Level: UG

Prerequisite(s): ECON 1150, ECON 1250, and (one of BUQU 1230, MATH 1115, MATH 2315, MATH 2341, PSYC 2300, CRIM 2103, SOCI 2365) and 6 credits of 2000-level ECON courses.

Attribute: BUSI (p. 521)

**ECON 3350 3 credits****Intermediate Microeconomics II**

Students will study advanced and applied topics in microeconomic theory. Student will learn topics that include choice under uncertainty, inter-temporal decision-making, transaction cost economics, and the game theory aspects of competitive strategy. Students, within these areas, will learn to identify, analyze, and solve problems commonly experienced in the business world.

Level: UG

Prerequisite(s): (ECON 1150 and ECON 1250 and ECON 2350) and (MATH 1120 or MATH 1130 or MATH 1140)

Attribute: BUSI (p. 521)

**ECON 3362 3 credits****Natural Resource Economics**

Students will address theoretical and policy issues related to the use of natural resources. They will start with some basic concepts used for decision making over time, and will build the foundations (including biological and/or physical aspects) of the theoretical models used in the economics of renewable and non-renewable resources, in both the static and dynamic cases. Students will enrich the analysis by including the effects of market structure and regulations. They will also study the models for fisheries, forestry and mining.

Level: UG

Prerequisite(s): ECON 1150, ECON 1250, (one of BUQU 2100, MATH 1120, MATH 1130, MATH 1140), and 6 credits of 2000-level ECON courses

Attribute: BUSI (p. 521)

**ECON 3450 3 credits****Intermediate Macroeconomics**

Students will study intermediate macroeconomic theory and will use it to help explain long- and short-run macroeconomic performance. They will analyze economic fluctuations and growth, income and employment theories, monetary theory, theory of exchange rate determination, and interest rates. Students will also examine macroeconomic policy debates, open economy issues and recent developments in macroeconomic theory.

Level: UG

Prerequisite(s): ECON 1150, ECON 1250, (one of BUQU 2100, MATH 1120, MATH 1130, MATH 1140) and 6 credits of 2000-level ECON courses

Attributes: BUSI (p. 521), QUAN (p. 532)

**ECON 3451 3 credits****Macroeconomic Policy I**

Students will examine a modern approach to macroeconomics that builds macro models from microeconomic principles – an approach consistent with how macro research is done today. Students will use this theoretical apparatus to understand, interpret and predict the macroeconomic consequences of changes in physical environment and government policies.

Level: UG

Prerequisite(s): ECON 1150, ECON 1250 and 6 credits of 2000-level ECON courses

Attribute: BUSI (p. 521)

**ECON 3455 3 credits****International Economics**

Students will examine economics of international trade and finance with an emphasis on international economic policy. They will study the determinants of international trade, balance of payments, and the determination of exchange rates. Students will also analyze trade policy including tariff and non-tariff barriers, capital mobility and the political economy of protection and exchange rate policy.

Level: UG

Prerequisite(s): ECON 1150, 1250 and 6 credits of 2000-level ECON courses

Attribute: BUSI (p. 521)

**ECON 3555 3 credits****Issues in Economic Development**

Students will investigate sources of economic growth in developing countries and the requirements for successful development. They will explore the development challenges faced by emerging countries and alternative models for economic development. Students will examine both the theoretical foundations and empirical evidence associated with economic development, and consider current areas of research. Issues related to the development process - such as trade liberalization and poverty, trade versus aid as a development strategy, child labour, migration, debt, and the linkage between poverty and terrorism - are discussed as part of the course.

Level: UG

Prerequisite(s): All of: (a) ECON 1150, (b) ECON 1250 and (c) 6 credits from courses in ECON at the 2000 level or higher

Attribute: BUSI (p. 521)

**ECON 4451 3 credits****Macroeconomic Policy II**

Students will study and analyze various macroeconomic models developed to understand the behaviour and impact of economic growth and business cycles. They will learn how these models have addressed the issues related to business cycles. Students will examine the important differences between fiscal and monetary policy as a tool to minimize business cycle fluctuations and bring about greater stabilization in economic growth. Students will use this theoretical apparatus to understand, interpret and predict the macroeconomic consequences of changes in physical environment and government policies.

Level: UG

Prerequisite(s): ECON 3451

Attribute: BUSI (p. 521)

**ECON 4710 3 credits****Law and Economics**

Students will apply microeconomic tools and concepts to the analysis of legal institutions and legal doctrines in the area of common law (property, tort, family law and contract). They will analyze the economic consequences of common property, the assignment of property rights, various kinds of liability rules, marriage and divorce, and remedies for breach of contract. Students will analyze legal cases from law and economics perspectives.

Level: UG

Prerequisite(s): All of (a) ECON 1150, (b) ECON 1250, (c) 6 credits of ECON courses at the 2000 level and (d) 39 credits from courses at the 1100 level or higher.

Attribute: BUSI (p. 521)

**ECON 4900 3 credits****Special Topics in Economics**

Students will engage in an intensive study of selected topics in Economics. They will examine and evaluate recent developments in the topics area and assess the implications of these developments. Students will undertake a literature review associated with a particular course topic area and identify future directions for research and/or policy development. NOTE: Students may take this course multiple times for further credit on different topics.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher, including all of (a) ECON 1150, (b) ECON 1250, and a minimum of (c) 3 credits from courses in ECON at the 3000 level or higher.

Attribute: BUSI (p. 521)

## Education Assistant (EDAS)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**EDAS 1101 3 credits****Including Diverse Learners in Schools**

Students will examine and reflect upon the philosophical, historical, organizational, and daily aspects of inclusive schooling. They will explore the diversity of individual student strengths and needs. Students will examine their own values, beliefs, and attitudes in supporting students and teachers in the school community. They will explore the role of an education assistant, guided by person-centred principles, working within the context of the education system.

Level: UG

Attributes: ARTS (p. 521), F2A2 (p. 521)

**EDAS 1105 3 credits****Supporting Learning in Schools**

Students will explore the elements and processes of effective instruction and the role of the education assistant in supporting learning. They will investigate models of instruction and learning, and discuss how they apply to classroom instructional practice. Students will apply strategies and positive approaches to instruct and support diverse school-aged learners based on principles of person-centred-practice.

Level: UG

Attributes: ARTS (p. 521), F2A2 (p. 521)

**EDAS 1120 3 credits****Introduction to Practice and Positive Behaviour Support**

Students will examine the principles of Positive Behaviour Support (PBS) and classroom management from the core philosophical concept of a person-centered perspective. They will examine their own values, beliefs and attitudes in relation to their role in supporting children and youth with challenging behaviours. Students will focus on observation methods and the recording of observations in different settings. They will develop behaviour support plans based on information acquired from a Functional Assessment.

Level: UG

Attributes: ARTS (p. 521), F2A2 (p. 521)

**EDAS 1130 2 credits****Interpersonal Communications 1**

Students will examine basic principles of effective interpersonal communication. They will examine their own style of communicating. Students will demonstrate competency in areas of verbal and nonverbal communication.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), F2A2 (p. 521)

**EDAS 1161 1.5 credits****Change and Development: Childhood**

Students will explore the human passage from conception through middle childhood. They will draw on theory and personal experience to investigate and reflect on child development, change, and diversity in relation to self and others.

Level: UG

Attributes: ARTS (p. 521), F2A2 (p. 521)

**EDAS 1162 1.5 credits****Change and Development: Adolescence Through Middle Adulthood**

Students will explore the human passage from adolescence through middle adulthood. They will draw on theory and personal experience to investigate and reflect on adolescent and adult development, change, and diversity in relation to self and others.

Level: UG

Attributes: ARTS (p. 521), F2A2 (p. 521)

**EDAS 1225 1.5 credits****Alternative and Augmentative Communication**

Students will examine issues related to the education of individuals who use nonverbal forms of communication. They will explore strategies for the creation and support of technical and non-technical augmentative and alternative systems for communication and written output. Students will examine their role, and the role of other professionals, in enhancing participation and interaction for children with severe communication challenges.

Level: UG

Prerequisite(s): EDAS 1101, 1105, 1120, and either EDAS 1161 or PSYC 2320

Attributes: ASTR (p. 523), ARTS (p. 521), F2A2 (p. 521)

**EDAS 1230 2 credits****Interpersonal Communications 2**

Students will examine the concepts of power and conflict in interpersonal communication. They will demonstrate effective conflict resolution strategies in a variety of contexts.

Level: UG

Prerequisite(s): EDAS 1130

Attributes: ARTS (p. 521), F2A2 (p. 521)

**EDAS 1271 3 credits****Practicum One**

Students will participate in a four-week, full-time practicum in an elementary, middle or secondary school setting. They will observe, assist, and work with children and/or adolescents requiring learning, behavioral, and/or physical support under the guidance and supervision of professional staff. Students will also participate in seminars to discuss self, theory and practice issues.

Level: UG

Prerequisite(s): 7.5 credits from courses in EDAS at the 1100 level

Attributes: ARTS (p. 521), F2A2 (p. 521)

**EDAS 1281 2 credits****Health and Personal Care**

Students will explore physical health, mental health and personal care issues and needs for children and adolescents with disabilities, and the role of the education assistant in supporting them.

Level: UG

Prerequisite(s): 9 credits from courses in EDAS at the 1100 level.

Attributes: ASTR (p. 523), ARTS (p. 521), F2A2 (p. 521)

**EDAS 1305 3 credits****Overview of Curriculum for Inclusive Schools**

Students will examine the philosophy, goals, and content of curriculum in elementary and secondary schools in British Columbia. They will explore the philosophy of inclusive education and their role within the context of curriculum delivery. Students will apply the principles of adapting and modifying curriculum to learning activities based on principles of person-centred-practice. They will identify and develop strategies to facilitate learning, based on students' strengths and needs.

Level: UG

Prerequisite(s): 9 credits from courses in EDAS at the 1100 level.

Attributes: ASTR (p. 523), ARTS (p. 521), F2A2 (p. 521)

**EDAS 1371 3 credits****Practicum Two**

Students will integrate and apply theoretical concepts from their coursework in a final, four-week practicum that is a full-time experience in an elementary, middle or secondary school setting. They will actively observe, assist, and work with children and/or adolescents requiring learning, behavioural, and/or physical support under the guidance and supervision of professional staff. Students will also participate in seminars to discuss self, theory, and practice issues.

Level: UG

Co-requisite(s): EDAS 1271 and 8 credits from courses in EDAS at the 1200 level, including EDAS 1281

Attributes: ARTS (p. 521), F2A2 (p. 521)

**EDAS 2120 2.5 credits****Supporting Students with Autism Spectrum Disorders**

Students will develop an understanding of the nature and characteristics of autism spectrum disorders. They will examine the current research on best practices for supporting students with autism spectrum disorders in a variety of educational settings. Students will explore functional assessment practices, positive behaviour supports, and a wide range of strategies and materials that enhance learning, communication, and social skills.

Level: UG

Prerequisite(s): 9 credits from courses in EDAS at the 1100 level.

Attributes: ARTS (p. 521), F2A2 (p. 521)

## Educational Studies (EDUC)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**EDUC 1100 3 credits****Introduction to Higher Education**

Students will develop an understanding of the purpose of post-secondary education and the ways in which becoming educated can enhance the quality of their lives and their communities. They will explore their place in the university through examining the history and functions of education (e.g., the exclusion of certain groups, the relation of education to living in a democratic society). Students will also begin to develop necessary skills to maximize their education including the ability to participate in scholarly discourse, recognize connections between disciplines, understand the world, and act within it in new and creative ways through discussions, group work, special events, and service learning projects. Note: Students may get credit for only one of UNIV 1100, UNIV 1101, LCOM 1100, LCOM 1101, LCOM 1102, LCOM 1190, EDUC 1100, EDUC 1101, EDUC 1102, EDUC 1150 or EDUC 1190.

Level: UG

Credit Exclusion: EDUC 1101, EDUC 1102, EDUC 1150, EDUC 1190, LCOM 1101, LCOM 1102, LCOM 1190, UNIV 1100, UNIV 1101

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_2 (p. 522)

**EDUC 1101 3 credits****Introduction to Higher Education for Student Athletes**

Student athletes will develop a strong understanding of the purpose and value of higher education in the context of playing a university sport. They will be introduced into a culture of academia through scholarly writing and discussion about relevant links between sport and society. Students will also identify and address key challenges to striking a balance between academic and athletic success. They will support each other in the process of self-discovery and academic learning through engaging in a scholarly community. Note: Students may get credit for only one of UNIV 1100, UNIV 1101, LCOM 1100, LCOM 1101, LCOM 1102, LCOM 1190, EDUC 1100, EDUC 1101, EDUC 1102, EDUC 1150 or EDUC 1190.

Level: UG

Attributes: ARTS (p. 521), PW\_2 (p. 522)

**EDUC 1102 3 credits****Introduction to Higher Education for Aboriginal Students**

Aboriginal students will explore the purpose and value of higher education, and the many ways in which becoming educated can not only enhance their own lives, but also the communities to which they belong. They will discuss the relationship between Aboriginal worldviews and traditional academia. Students will develop their abilities to engage in academic discourse through focused discussion of readings of interest to First Nations, Métis, and Inuit peoples. They will examine various academic disciplines and explore the interdisciplinary nature of a polytechnic education. Students will find their academic voices through individual and group work, and they will develop their academic reading and writing abilities with ongoing instructor feedback. Note: Students may get credit for only one of UNIV 1100, UNIV 1101, LCOM 1100, LCOM 1101, LCOM 1102, LCOM 1190, EDUC 1100, EDUC 1101, EDUC 1102, EDUC 1150 or EDUC 1190.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_2 (p. 522)

**EDUC 1150 3 credits****Introduction to Higher Education for International Students**

Students will understand the purpose and values of higher education in a Canadian context. They will use the analysis of higher educational institutions as a basis for the cultivation of the skills, strategies, abilities, and traits that can enable academic and personal success in higher education and beyond. Students will create a service learning portfolio. Students may get credit for only one of: UNIV 1100, UNIV 1101, LCOM 1100, LCOM 1190, LCOM 1101, LCOM 1102, EDUC 1100, EDUC 1101, EDUC 1102, EDUC 1150, EDUC 1190 for credit. Note: This course is intended for International students.

Level: UG

Credit Exclusion: EDUC 1100, EDUC 1101, EDUC 1102, EDUC 1190, LCOM 1100, LCOM 1101, LCOM 1102, LCOM 1190, UNIV 1100, UNIV 1101

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_2 (p. 522)

**EDUC 2210 3 credits****Philosophical Foundations of Education**

Students will be introduced to the philosophy of education via its foundational theories, methods of argumentation, and issues. They will gain an understanding of the role played by ethics, epistemology, political and legal philosophy, metaphysics, and aesthetics in pedagogical thought.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**EDUC 2220 3 credits****Introduction to Educational Psychology**

Students will develop a broad understanding of major theories and research in educational psychology, as well as their application in classroom settings. They will develop an understanding of the history and continually evolving role of psychology in the classroom. They will explore theories of cognitive, social/emotional, and moral development as well as their implications for instruction and understanding motivation, learning and problem-solving, abilities and disabilities, and peer interactions in diverse, inclusive educational settings. Students will also learn how educational psychology can be utilized to develop strong student-teacher relationships and create dynamic learning environments.

Level: UG

Prerequisite(s): 15 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**EDUC 3210 3 credits****Supportive Relations in Educational Settings**

Students will develop a broad understanding of contemporary approaches to supportive relations in classrooms and other educational settings (e.g., non-profit organizations) and how these approaches translate into specific skills and interventions. They will reflect on how personal beliefs, values and worldviews about what constitutes appropriate behaviour influences instructional practices and approaches to supportive relations in educational settings

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**EDUC 3220 3 credits****Children's Social and Emotional Development in Educational Settings**

Students will be introduced to major theories, research, and practice concerning children's social and emotional development in educational settings. Through multi-media, readings, lectures, online discussions, and presentations they will gain an understanding of the role of social interactions and relationships in development and the role of educators in promoting positive interactions.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**EDUC 3230 3 credits****Curriculum Theory and Design**

Students will be introduced to the complex network of concerns surrounding the creation, revision, and enactment of curricula. They will examine the curriculum as it is conceived, taught, and experienced by individual students. Students will also deal with the "hidden" curriculum of tacit assumptions and conditions. They will begin the work of creating and evaluating curricula for K-12 schools, community organizations, childhood education, and education in the workplace

Level: UG

Prerequisite(s): 30 credits at the 1100-level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**EDUC 3240 3 credits****Social Justice and Diversity in Education**

Students will be introduced to social justice and diversity issues in educational settings. They will examine gender equality, racial equality, religious toleration, sexual diversity, economic inequality, exceptionality and disability, and colonialism through issues-based analysis.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**EDUC 3250 3 credits****Assessment Practices in Education**

Students will be introduced to theoretical and practical aspects of assessment in educational settings. They will develop an understanding of how learning occurs and the various ways it can be evaluated. Students will examine qualitative and quantitative assessment strategies and how and when each can be used in an effective manner. They will also interpret standardized educational assessments and gain an understanding of how assessment affects motivation and learning.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**EDUC 3320 3 credits****Career Counselling and Career Education**

Students will develop a broad understanding of major theories of career development and related assessments. They will explore historical and cross-cultural perspectives on the meaning of work and considerations for career development, counseling, and education with diverse populations and in diverse settings (i.e., elementary, secondary, post-secondary, and community agencies). Students will also critically examine moral and ethical issues related to this work, and they will apply theoretical concepts to their own process of career development. Note: Students may get credit for only one of CNPS 3320, EDUC 3320 or LCOM 3320 as these are identical courses.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher

Cross-listing: CNPS 3320

Attributes: ASTR (p. 523), ARTS (p. 521)

**EDUC 4100 3 credits****Post University Transition**

Students will develop representational portfolios in the transition from university into work, graduate studies, and post-university life. They will integrate their educational experiences by tracing their intellectual journey through reflective writing and examining artifacts from their undergraduate career. Students will prepare for the job search process through developing resume writing, cover letters, job search strategies as well as simulated employment interviews. They will investigate graduate school admission, international work and educational opportunities as well as cultivating a professional disposition. Students will consider what it means to be educated in the context of leadership roles in their alumni, national, and international communities and will participate in a service-learning project. Note: Students may get credit for only one of UNIV 4100, LCOM 4100 or EDUC 4100.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher

Attribute: ARTS (p. 521)

**EDUC 4210 3 credits****Best Practices in Educational Settings**

Students will begin to understand themselves as prospective educators as they explore connections between theory, research, and practice in diverse educational settings (e.g., nonprofit organizations, classrooms, life skills programs). They will examine issues related to instructional methods, learning, lesson planning, and assessment, and how these practices contribute to healthy learning communities. Students will analyze various instructional styles and develop their own instructional skills through classroom and homework activities, including a service learning project. They will use these experiences as a foundation to examine their own values and beliefs about education and instruction.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**EDUC 4220 3 credits****The Self in Education and Counselling**

Students will develop an understanding of the influence of historical, social, and cultural contexts on conceptions of self and personhood. They will investigate conceptions and practices of the self through the lens of critical history, and the development of selfhood, identity, and agency through enculturation. Students will critically examine theoretical and empirical programs of inquiry regarding the self, and the impact of these programs on educational and counselling practice.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher.

Attributes: ASTR (p. 523), ARTS (p. 521)

## Electrical (ELEC)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**ELEC 1100 2 credits****Basic Skills**

Students will study effective learning, the shared responsibilities for workplace learning and job search techniques. They will problem-solve using mathematics and apply science concepts appropriate to the electrical trade.

Level: VO

Attribute: TRAD (p. 521)

**ELEC 1110 1 credit****Workplace Safety**

Students will be exposed to and learn the application of safe work practices, Worksafe BC standards and regulations, confined space requirements, and lock-out and tag-out procedures. They will perform practical components involving ropes, scaffolding, ladders and electrical lockout and verification. Students will also receive an orientation in Workplace Hazardous Materials Information System (WHMIS).

Level: VO

Attribute: TRAD (p. 521)

**ELEC 1120 5 credits****Basic Electrical Theory**

Students will be introduced to the nature and principles of electricity, the operation of electrical devices and the operation of testing / metering equipment. They will focus on the analysis and problem solving of Direct Current (DC) circuits. Students will learn the basic principles of magnetism and the principles of alternating current (AC).

Level: VO

Attribute: TRAD (p. 521)

**ELEC 1130 1 credit****Code and Blueprint Reading**

Students will be introduced to the history and importance of the Canadian Electrical Code (CEC). They will learn the CEC and other related regulatory standards. Students will be introduced to the use of construction drawings, manufacturer's specifications, and job and material planning.

Level: VO

Attribute: TRAD (p. 521)

**ELEC 1140 1 credit****Wiring Devices, Lighting and Controls**

Students will learn the safety procedures and operating principles of manual and magnetic motor starters and control circuits. In addition, students will learn the operation of LED and incandescent lighting and will connect and test three-way and four-way switches to control these types of lighting. The installation of lighting standards, and their various types, as well as the ratings of switches and receptacles will be examined. Students will also perform data cable terminations.

Level: VO

Attribute: TRAD (p. 521)

**ELEC 1150 10 credits****Installation of Low-Voltage Distribution Systems**

Students will use shop projects and hands-on activities to reinforce electrical theory and Electrical Code knowledge. They will receive practical training for the job site. Students will learn the importance of workplace safety.

Level: VO

Attribute: TRAD (p. 521)

**ELEC 1300 4 credits****Elec Design & Renewable Energy**

Students will apply the principles of electricity to analyze the operation of electrical devices and verify the operating conditions of electrical systems using testing /metering equipment. They will compare different types of renewable energy sources and equipment and the cost-effectiveness of each type. Students will use grid-tie equipment to modify the energy collected from a renewable supply and test the output of the equipment to verify that it is compatible with the utility supply. They will design a stand-alone renewable power supply that will perform in a manufacturing environment.

Level: UG

Attributes: F2A5 (p. 521), TRAD (p. 521)

## English (ENGL)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (https://www.bctransferguide.ca/) - for information about course transfer in B.C.

**ENGL 1100 3 credits****Introduction to University Writing**

In this introductory university writing course, students will develop their abilities in critical reading, analysis, critical thinking, and clear written expression. Through selected readings and a variety of media, students will explore, assess, and respond to arguments and issues from across disciplines and relevant to contemporary cultures. This course will also introduce students to research methods, including finding, evaluating, integrating, and documenting sources.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), WRIT (p. 533)

**ENGL 1104 3 credits****Reading and Writing Skills for Educational Assistants**

Students will apply the principles of effective reading, writing, and thinking in a variety of assignments intended to prepare them for the practical demands of working as educational assistants. They will develop personal and professional literacy skills, both generally and for application in the workplace.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 1202 3 credits****Reading and Writing about Selected Topics: An Introduction to Literature**

Students will engage in writing-intensive activities as they analyze a topic or theme in selected literary texts. They will apply skills of literary analysis to literature through close reading, informed discussion, and formal writing.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 1204 3 credits****Reading and Writing About Genre: An Introduction to Literature**

Students will engage in writing-intensive activities as they analyze the conventions of poetry, drama, and fiction in selected literary texts. They will apply skills of literary analysis to literature through close reading, informed discussion, and formal writing.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 1207 3 credits****Film, Television and Online Narratives**

Students will study select film, television and online narratives, ranging from mainstream and independent cinema to network and web television, as well as personal blogs and story-telling sites. This course may also include the analysis of cinematic and digital adaptations of poetic, dramatic or fictional works of literature. Students will develop critical reading and writing skills by analysing film, television and digital media narratives through classroom discussion and written assignments.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 1300 3 credits****Writing and Research in the Social Sciences and the Humanities**

Students will develop their critical reading, writing, and thinking skills while furthering their research and argumentation abilities. They will engage in the critical analysis of different forms of writing, such as essays, articles, and narratives from a selection of disciplines. Topics will reflect current issues across the Social Sciences and the Humanities, and students will write at least one major research paper.

Level: UG

Prerequisite(s): 3 credits of English at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 2200 3 credits****Foundations of Western Literature**

Designed to prepare students for the practice of literary analysis, this course will introduce students to some of the myths, stories, symbols, and ideas that have formed and informed the Western literary tradition. Students will also explore some of the ways that writers past and present have received, questioned, and redeployed these elements for their own historical and cultural contexts.

Level: UG

Prerequisite(s): All of (a) ENGL 1100 and (b) 3 credits from courses in ENGL at the 1200 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 2300 3 credits****Writing in the Digital Age**

Digital technologies have changed the ways we produce, consume, and share information. This course explores multimedia writing and research strategies in both theory and practice. Through an engagement with digital content – which could include podcasts, film, music, tweets, and blog posts – students will build skills in media analysis, visual rhetoric, multimedia composition, and online research and citation.

Level: UG

Prerequisite(s): ENGL 1100 and any 1200-level ENGL course

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 2301 3 credits****Canadian Literature in English**

Students will study representative Canadian literature drawn primarily from the nineteenth to the twenty-first centuries from a variety of genres. They will focus on major figures, historical and literary periods, and themes in Canadian literature and will respond to these works through discussion and written assignments.

Level: UG

Prerequisite(s): ENGL 1100 and 3 credits from courses in ENGL at the 1200 level or higher.

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 2309 3 credits****Literature of the United States of America**

Students will study representative American literature drawn primarily from the nineteenth and twentieth centuries from a variety of genres. They will focus on major figures and themes in American literature and will respond to these works through discussion and written assignments.

Level: UG

Prerequisite(s): ENGL 1100 and 3 credits from courses in ENGL at the 1200 level or higher.

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 2315 3 credits****The Comic Voice**

Students will study representative works of literature that demonstrate the scope and depth of the comic voice. They will focus on the theory, conventions, and practice of comedy. Students will respond to these works through discussion and written assignments.

Level: UG

Prerequisite(s): ENGL 1100 and 3 credits from courses in ENGL at the 1200 level or higher.

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 2316 3 credits****English Literature: 14th to 18th Centuries**

Students will study representative works of English literature from the 14th to the 18th centuries as literature within social, cultural, and historical contexts. They will respond to these works through written and oral work.

Level: UG

Prerequisite(s): ENGL 1100 and 3 credits from courses in ENGL at the 1200 level or higher.

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 2317 3 credits****English Literature: 18th to 20th Centuries**

Students will study representative works of English literature from the 18th to 20th centuries within their social, cultural, political, historical, aesthetic, and/or religious contexts. They will respond to these works of literature through written and oral work.

Level: UG

Prerequisite(s): ENGL 1100 and 3 credits from courses in ENGL at the 1200 level or higher.

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 2320 3 credits****Studies in Poetry**

Students will study the relationship between form and meaning in a variety of poems, and the social, intellectual, and historical influences on those poems. They will study the traditions, conventions, and elements of different poetic forms drawn from different times and socio-cultural contexts.

Level: UG

Prerequisite(s): ENGL 1100 and 3 credits from courses in ENGL at the 1200 level or higher.

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 2330 3 credits****Studies in Drama**

Students will study drama drawn from different times and different socio-cultural contexts. They will study plays from a wide variety of dramatic genres such as tragedy, romance, history, comedy, theatre of the absurd, realism, naturalism, and postmodernism.

Level: UG

Prerequisite(s): ENGL 1100 and 3 credits from courses in ENGL at the 1200 level or higher.

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 2340 3 credits****Studies in Fiction**

Students will study various fictional forms. They will study works from a wide variety of genres such as romance, realism, science fiction or fantasy, the mystery or gothic novel, the modern, postmodern, or cyberpunk novel, drawn from different times and different socio-cultural contexts.

Level: UG

Prerequisite(s): ENGL 1100 and 3 credits from courses in ENGL at the 1200-level or higher.

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 2341 3 credits****Science Fiction and Fantasy**

Students will study a range of representative Science Fiction and/or Fantasy texts written over a period of at least a century. Students will learn to identify and write about genre conventions from a variety of critical perspectives. The works may be drawn from several forms (novels, short stories, graphic novels, film, television, digital narratives, etc.) and historical periods.

Level: UG

Prerequisite(s): All of (a) ENGL 1100 and (b) 3 credits from courses in ENGL at the 1200 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 2350 3 credits****Critical Studies in Film**

Students will study select films from the silent era to the present day, paying particular attention to the formal elements of film as a narrative art form. They will focus on representative films from different historical periods and genres and will respond to these films through discussion and written assignments.

Level: UG

Prerequisite(s): ENGL 1100 and 3 credits from courses in ENGL at the 1200 level or higher.

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 2355 3 credits****Literary Classics on Film**

Students will study select film adaptations of classic works of literature. In addition to exploring the relationship between literature and film, they will consider what makes a work of literature a classic and what is involved in translating these works from one medium to another.

Level: UG

Prerequisite(s): All of (a) ENGL 1100 and (b) 3 credits from courses in ENGL at the 1200 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 2430 3 credits****Children's Literature**

Students will undertake a survey of literature written for and read by children and young adults spanning at least a century to understand how Children's Literature developed over time. They will apply relevant critical and theoretical perspectives to this literature.

Level: UG

Prerequisite(s): All of (a) ENGL 1100 and (b) 3 credits from courses in ENGL at the 1200 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3300 3 credits****Critical Theory**

Students will examine topics in critical theory. They will consider critical theory as a socially engaged mode of inquiry. Students will develop critical thinking and writing skills through discussions and essay assignments.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100-level or higher, including 6 credits of ENGL at the 1100-level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3301 3 credits****19th-Century Canadian Literature in English**

Students will study Canadian literature in English from the nineteenth century. They will focus on work by aboriginal peoples, explorers, sojourners, early settlers, and writers of the Confederation period. Students will study the changes and developments in the literature and respond to works through discussion and written assignments. They will write at least one research paper that incorporates critical source material.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100-level or higher, including 6 credits of ENGL at the 1100-level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3302 3 credits****Canadian Prose in English from 1900**

Students will study the changes and developments in Canadian prose in English from 1900 to the present and write critical essays about the prose. They will respond to the texts through discussion and written assignments. Students will write at least one research paper that incorporates critical source material.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100-level or higher, including 6 credits of ENGL at the 1100-level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3303 3 credits****Canadian Poetry in English from 1880 to the Present**

Students will study the changes and developments in Canadian poetry in English from 1880 to the present and write critical essays about the poetry. They will focus on texts starting with the pre-modernist poetry of the end of the nineteenth century and study the changes and developments in poetry up to the present. They will respond to the works through discussion and written assignments. Students will write at least one research paper that incorporates critical source material.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100-level or higher, including 6 credits of ENGL at the 1100-level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3304 3 credits****Canadian Drama in English**

Students will study Canadian drama in English written primarily after 1967. They will examine the relationship between form and content in a selection of dramatic works from different decades, regions, and cultures. Students will respond critically to these plays through discussion, written assignments, and at least one research paper that incorporates critical source material. They will undertake informal or formal stagings of portions of these dramatic works, and/or performance analysis, as appropriate.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 6 credits from courses in ENGL

Attribute: ARTS (p. 521)

**ENGL 3305 3 credits****Film Theory**

Students will study select topics chosen from the history of film theory, which may include but are not restricted to the following: formalism, structuralism/semiotics, auteur theory, feminist/psychoanalytic approaches to spectatorship, post-colonial theory, queer theory. Students will view films and learn to apply critical and theoretical perspectives to the analysis of select films from the silent era to the present day.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 6 credits from courses in ENGL

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3306 3 credits****Literature of the United States: Beginnings to 1865**

Students will study the literature of the United States in English from beginnings to 1865, focusing on themes and issues related to the developing nation and to the forging of a national literature. Students will study several different types of expression, chosen from among the following genres: explorers' accounts, histories and autobiographies, sermons, pamphlets and treatises, letters and addresses, essays, novels, stories, and poems. They will respond to these works through discussion and written assignments, including at least one research paper that incorporates critical source material.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100-level or higher, including 6 credits of ENGL at the 1100-level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3307 3 credits****Literature of the United States: 1865 to 1910**

Students will study American Literature written in English between 1865 and 1910. Students will study the literature of the period in the context of important social phenomena such as the Civil War, industrialization and urbanization, and social radicalism. They will respond to this literature through discussion and written assignments, including at least one research paper that incorporates critical source material.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100-level or higher, including 6 credits of ENGL at the 1100-level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3308 3 credits****Literature of the United States: 1910 to 1945**

Students will study American literature written in English between 1910 and 1945. Topics of study may include Modernism in literature and the arts, the Harlem Renaissance, women writers of the interwar period, and developments in drama. Students will respond to the literature of the period through discussion and written assignments, including at least one research paper that incorporates critical source material.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 6 credits of ENGL

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3309 3 credits****Literature of the United States: 1945 to the Present**

Students will study representative literary works written in English in the United States from 1945 to the present. Topics of study may include the impact of the Civil Rights and Women's movements upon both the production and reception of literature, post-modernism as a literary and cultural phenomenon, the relationship of literature to other contemporary art forms such as film, music, and the fine arts, and the influence of multiculturalism upon contemporary American society and literary culture. Students will write at least one research paper that integrates critical source material.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 6 credits of ENGL

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3310 3 credits****Literature in Translation**

Students will study literary works in translation. They will focus on literature from one or more non-anglophone cultural/literary tradition(s) such as European, African, Latin American or Asian. Students will respond to these works through discussion and written assignments, and will write at least one research paper that incorporates critical source material.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 6 credits from courses in ENGL

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3311 3 credits****Shakespearean Afterlives**

Students will study the diverse ways in which Shakespeare's plays speak to contemporary audiences through adaptations, appropriations and afterlives in television, film and literature. In addition to exploring the relationship between theatre, film, television and literature, they will consider the unique place that Shakespeare occupies in world literature and what is involved in translating his plays from one medium to another.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100-level or higher, including 6 credits from courses in ENGL

Attribute: ARTS (p. 521)

**ENGL 3313 3 credits****Studies in Major Writers**

Students will undertake an extensive study of the works of one or two major authors of literature in English. Emphasis will be placed on taking the time to grasp thoroughly the writers' perspectives, concerns, and ideas as well as their development and influence. Students may also explore the cultural conversation revealed by comparing the work of two complimentary or contrasting writers.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100-level or higher, including 6 credits of ENGL at the 1100-level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3315 3 credits****Studies in Chaucer**

Students will study literary works of Geoffrey Chaucer. They will focus on *Troilus and Criseyde*, *The Canterbury Tales*, and selections from shorter works. They will consider these works in their historical, cultural, and literary contexts such as social class, gender, the church, the tradition of courtly love, and sex. Students will respond to these works through discussion and written assignments, and will write at least one research paper that incorporates critical source material.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100-level or higher, including 6 credits of ENGL at the 1100-level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3317 3 credits****Readings in the History of Ideas**

Students will study influential texts that have helped shape Western culture, imagination, and intellectual history. They will read texts drawn from philosophical, political, scientific, religious, and literary discourses. Students will respond to these works through discussion and written assignments and will write at least one research paper that incorporates critical source material.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100-level or higher, including 6 credits of ENGL at the 1100-level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3320 3 credits****Studies in Shakespeare**

Students will study literary works written by Shakespeare. They will study plays and may study poems representative of a range of Shakespeare's work, which may include histories, comedies, tragedies, romances, and nondramatic verse. Students will respond to these works through discussion and written assignments, and will write at least one research paper that incorporates critical source material.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100-level or higher, including 6 credits of ENGL at the 1100-level or higher.

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3321 3 credits****English Renaissance Drama, Excluding Shakespeare**

Students will study a variety of dramatic works, which may include plays, masques, processions and closet dramas, from the period beginning in the 1570s and ending with the closing of the theatres in 1642. They will examine such work as Beaumont, Fletcher, Jonson, Marlowe, Marston, Middleton, Webster and Ford. Students will respond to these works through discussion, analytical staging and performance, and written assignments, and will write at least one research paper that incorporates critical source material.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 6 credits from courses in ENGL

Attribute: ARTS (p. 521)

**ENGL 3323 3 credits****Seventeenth-Century British Literature**

Students will study literary works of the earlier seventeenth century, 1590 to 1649. They will focus on major works of prose and verse, both dramatic and non-dramatic. They will respond to these works through discussion and written assignments. Students will write at least one research paper that incorporates critical source material.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100-level or higher, including 6 credits of ENGL at the 1100-level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3325 3 credits****Eighteenth-Century British Literature**

Students will study British literature of the "long" eighteenth century (1688-1815). They will focus on selected poetry, fiction, drama, and non-fiction. They will respond to these works through discussion and written assignments. Students will write at least one research paper that incorporates critical source material.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100-level or higher, including 6 credits of ENGL at the 1100-level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3328 3 credits****Romantic Poetry and Poetics**

Students will study poetry and poetic theory from the British Romantic Period. They will respond to these works through discussion and written assignments. Students will write at least one research paper that incorporates critical source material.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100-level or higher, including 6 credits of ENGL at the 1100-level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3330 3 credits****Studies in Children's Literature**

Students will study literature written for and read by children and young adults with a focus on specific sub-genres and/or themes. Students will analyze primary works, which may be drawn from poetry, fiction, drama, pedagogical texts, life writing, graphic novels, and film. Materials may include Young Adult Literature, Children's Fantasy, dystopias, and/or children's and young adult fandoms.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 6 credits from courses in ENGL

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3331 3 credits****Young Adult Literature**

Students will study a range of texts and media to understand how Young Adult Literature has developed into today's forward-looking and massively popular genre. Among other topics, students will explore the roles of diversity, fandoms, and adolescent agency in coming-of-age narratives. They will apply relevant critical and theoretical perspectives to the texts studied.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100-level or higher, including 6 credits of ENGL at the 1100-level or higher.

Attribute: ARTS (p. 521)

**ENGL 3332 3 credits****Victorian Poetry and Non-Fiction**

Students will study poetry and non-fiction in English from the British Victorian period. They will respond to these works through discussion and written assignments. Students will write at least one research paper.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100-level or higher, including 6 credits of ENGL at the 1100-level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3336 3 credits****The Victorian Novel, 1837-1900**

Students will study three or more major Victorian novels and will acquire knowledge of the formal features, thematic preoccupations, and cultural contexts of Victorian fiction. They will respond to the readings through discussion and written assignments, and will compose at least one research paper that incorporates critical source material.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100-level or higher, including 6 credits of ENGL at the 1100-level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3340 3 credits****Cross-Cultural World Literature**

Students will study works of world literature drawn mainly from the twentieth and twenty-first centuries. They will explore critical concepts and issues that arise in cross-cultural fields of study identified as "World Literature," "Postcolonial Literature," "Global Anglophone Literature," and "Transcultural Literature," such as the influences and effects of colonization and decolonization on world literature. They will respond to the literature through discussion and written assignments and will write at least one research paper that incorporates critical source material.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 6 credits from courses in ENGL

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3345 3 credits****Diasporic Literatures**

Students will study literary works in English or in translation concerned with displaced, minority, and diasporic narratives. They will focus on literature from various parts of the world written in various genres and periods. Students will respond to these works through discussion and written assignments, and will write at least one research paper that incorporates critical source material.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100-level or higher, including 6 credits of ENGL at the 1100-level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3350 3 credits****Literature and Film**

Students will study literary works and their cinematic interpretations. They will focus on film adaptations of literary works drawn from a variety of genres, periods, and cultures. Students will respond to these works through discussion and written assignments, and will write at least one research paper that incorporates critical source material.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100-level or higher, including 6 credits of ENGL at the 1100-level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3351 3 credits****Studies in Modernism**

Students will study literary works by Modernist writers in English. Students will focus on literature that reflects the political, moral, philosophical, and psychological concerns of the first half of the twentieth century. They will consider the aesthetic innovations that emerged in response to the complexities of the modern period. Students will write at least one research paper that incorporates critical source material.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100-level or higher, including 6 credits of ENGL at the 1100-level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3352 3 credits****The British Novel, 1900-1945**

Students will study the development of the modern British novel from 1900 to 1945. They will examine the ways British Modernism departed from previously held ideas about fiction. They will respond to the readings through discussion and written assignments. Students will write at least one research paper.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100-level or higher, including 6 credits of ENGL at the 1100-level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3355 3 credits****Modern and Contemporary Drama**

Students will study works written for dramatic performance from the modern period to the present. They will focus primarily on works written for the theatre, and students may also examine scripts written for film, television, and radio. They will respond to these works through discussion and written assignments. Students will write at least one research paper.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100-level or higher, including 6 credits of ENGL at the 1100-level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3356 3 credits****Modern and Contemporary Poetry**

Students will study representative poems by modern and contemporary poets writing in English. They will critically analyze these poems in relevant social, literary-historical and cultural contexts, and also within the context of important developments in modern and contemporary poetic theory.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 6 credits from courses in ENGL

Attribute: ARTS (p. 521)

**ENGL 3358 3 credits****British Fiction since 1945**

Students will study British fiction since 1945. They will study literature in its socio-historical context with respect to issues such as class, gender, individual and communal identities, and changing demographics. Students will respond to these works through discussion and written assignments, and they will write at least one research paper that incorporates critical source material.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100-level or higher, including 6 credits of ENGL at the 1100-level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3360 3 credits****Writing Women/Women Writing**

Students will study literature by and about women. They will examine issues central to women's identities, creativity, and lived experiences. Students will apply critical methods of literary analysis in written and oral responses to the literature, and will write at least one research paper that incorporates scholarly source material.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 6 credits from courses in ENGL

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3370 3 credits****Life-Writing**

Students will study various kinds of life-writing: autobiography, biography, memoirs, reflections, journals, films, poems, and letters, drawn from different times and socio-cultural contexts. They will respond to these works through discussion and written assignments, including at least one major research paper that incorporates critical source material.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100-level or higher, including 6 credits of ENGL at the 1100-level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3380 3 credits****Popular Writing and Culture**

Students will study works of popular writing and culture. They will analyze the primary texts in relation to literary criticism and/or theory, examining how these primary works reinforce or challenge dominant ideology, the conventions of genre, and mainstream cultural, social, political, and aesthetic values. Students will respond to these works through discussion and written assignments and will write at least one major research paper that incorporates critical source material.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100-level or higher, including 6 credits of ENGL at the 1100-level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 3390 3 credits****Studies in Indigenous Literature and Cultural Expression**

This course will explore the social, cultural, and political roles of Indigenous storytelling on Turtle Island (North America) through a close engagement with literary texts, oral narratives, and new media. Students will draw on Indigenous and non-Indigenous methodologies and critical perspectives to examine topics such as de/colonization, representation, gender, history, and self-determination.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 6 credits from courses in ENGL

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 4300 3 credits****Writing and Persuasion Beyond the Classroom**

Students will study theories of writing and rhetoric, and applications of writing in various community and cultural contexts. Students will also gain practical experience through a minimum of twelve hours of volunteer (non-paid practicum) writing or editing service in a community organization such as a business or non-profit or government agency. Students will complete a portfolio of their writings for this course, and will write a final paper that integrates writing theory and practice.

Level: UG

Prerequisite(s): 3 credits from courses in ENGL at the 3000 level or higher

Attribute: ARTS (p. 521)

**ENGL 4350 3 credits****Topics in Film Studies**

Students will study select topics in film as chosen by the instructor. They will write at least one documented essay requiring the use of both primary and secondary materials. In addition to attending class regularly, students may be required to attend scheduled film screenings outside of regular class time. Notes: As the topic for this course will vary from semester to semester, students may take this course more than once, provided they have received the permission of the instructor and the department chair. Students are expected to have some knowledge of the critical language of film studies. If they do not, they should consult with the instructor before registering for this course.

Level: UG

Prerequisite(s): 3 credits from courses in ENGL at the 3000 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 4400 3 credits****English Studies and the Classroom**

Students will study theory and practice related to education, literacy studies, and English in the classroom. They will do a 12-hour volunteer practicum in an educational setting, and complete a major project that integrates reflection, theory and practice. Students will produce a portfolio of written work in different genres

Level: UG

Prerequisite(s): 3 credits from a course in ENGL at the 3000 level.

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 4401 3 credits****Topics in Canadian Literature**

Students will study a topic (or topics) in Canadian literature in one or more genres as chosen by the instructor. They will trace this topic through several texts, discussing it in the broader context of Canadian literature and culture and considering it from various theoretical perspectives. In addition to continuing to develop their own ability to analyze, discuss, and write about individual texts, students will also read relevant literary criticism and will write at least one research paper that incorporates critical source material. Notes: The specific topic for this course will be available on the English department website when the course is being offered. Students may take this course more than once, provided that both the instructor and the topic are different.

Level: UG

Prerequisite(s): 3 credits from courses in ENGL at the 3000 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 4409 3 credits****Topics in Literature of the United States**

Students will study topics related to the literature of the United States, which may include the pre-national period. Students will analyze primary works, which may be drawn from various genres (e.g. poetry, fiction, drama, sermons, personal essays, aboriginal writing, life writing). They will read recent scholarship of primary works, as well as literary and cultural theory relevant to the selected topic. This may include a consideration of the relationship between the political categories of race, gender, and class and the themes, characters, events, and language of the works studied, as well as newer approaches such as transnational approaches to American literature. Students will engage with the topics through integrative study of materials that contextualize the primary literature, in-class presentations, discussion, and written assignments. They will write at least one research essay that incorporates current critical responses to the literature under consideration.

Level: UG

Prerequisite(s): 3 credits from courses in ENGL at the 3000 level or higher

Attribute: ARTS (p. 521)

**ENGL 4420 3 credits****Topics in British Literature**

Students will study a selection of British literature through a topic chosen by their instructor. They will explore and develop this topic through a selection of primary and secondary material, including scholarly critical resources. Students will discover how the topic alters, deepens, or problematizes our understanding of British literature, history, and culture. In addition to developing their own ability to analyze, discuss, and write about primary texts, students will also read relevant literary criticism and will write at least one research paper that incorporates critical source material.

Level: UG

Prerequisite(s): 3 credits from courses in ENGL at 3000 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**ENGL 4700 3 credits****Special Topics in Literature**

Students will study special topics in literature selected by instructors, and will focus on primary texts, critical writing by the authors, and readings in literary and cultural theory relevant to the topic. They will analyze the topics through in-class presentations, discussion, and written assignments, and will write at least one research essay that incorporates current critical responses to the literature under consideration.

Level: UG

Prerequisite(s): 3 credits from courses in ENGL at the 3000 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

## English for Trades (ENGT)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**ENGT 1015 1.5 credits****Communication Skills for Trades I**

Students will develop the basic oral and written communication skills needed to complete their trades courses and to function efficiently on the job site. They will practice and develop skills in active listening and speaking and learn correct presentation for classroom and work-related writing. Students will also develop skills in technical reading.

Level: VO

Attribute: TRAD (p. 521)

## English Language Studies (ELST)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables/) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

Note: These upgrading courses are preparatory and are not eligible for a Tuition Tax Credit (T2202A).

**ELST 0041 6 credits****English for Academic Purposes - Foundations Level**

Students at the lower-intermediate level will learn and practise academic reading, writing and study skills.

Level: CP

Prerequisite(s): One of the following: (a) ELSQ 0031 (B-) and ELSQ 0033

(B-) (b) KPU ELST Placement into ELST 0041 and one of ELSQ 0033

(B-) or KPU ELST Placement into ELST 0043 (c) KPU ELST Placement

into ELST 0043 and one of ELSQ 0031 (B-) or KPU ELST Placement into

ELST 0041 (d) Test of English as a Foreign Language (TOEFL) iBT Band

32 (Writing Band 12, Speaking Band 12, Listening Band 6, and Reading

Band 6), (e) International English Language Testing System (IELTS)

Overall Band 4.5 (Writing Band 4, Speaking Band 4, Listening Band 4, and

Reading Band 4)

Attributes: ACAD (p. 521), F2D (p. 521)

**ELST 0043 6 credits****Foundation Level - Listening and Speaking**

Students at the intermediate level will learn and practice listening and speaking skills in preparation for further studies in English.

Level: CP

Prerequisite(s): One of the following: (a) ELSQ 0031 (B-) and ELSQ 0033

(B-) (b) KPU ELST Placement into ELST 0041 and one of ELSQ 0033

(B-) or KPU ELST Placement into ELST 0043 (c) KPU ELST Placement

into ELST 0043 and one of ELSQ 0031 (B-) or KPU ELST Placement into

ELST 0041 (d) Test of English as a Foreign Language (TOEFL) iBT Band

32 (Writing Band 12, Speaking Band 12, Listening Band 6, and Reading

Band 6), (e) International English Language Testing System (IELTS)

Overall Band 4.5 (Writing Band 4, Speaking Band 4, Listening Band 4, and

Reading Band 4)

Attributes: ACAD (p. 521), F2D (p. 521)

**ELST 0061 3 credits****Intermediate Pronunciation**

Students at the intermediate and upper-intermediate levels will work on improving the overall clarity of their speech. They will practice identifying, producing, and predicting English sounds patterns accurately.

Level: CP

Prerequisite(s): ELST 0033 with B- or Accuplacer 78 or TOEFL iBT 32 or

Cb-TOEFL 97 or TOEFL 400 or IELTS 4.5 with no sub-score less than 4.0

Attributes: ACAD (p. 521), F2D (p. 521)

**ELST 0162 3 credits****Grammar 1**

Students will study the meaning, form and use of grammar at the intermediate level. They will also develop strategies to identify and correct common grammar and usage errors.

Level: CP

Prerequisite(s): (ELST 0041 with B- and 0043 with B-) or [Accuplacer 88

or TOEFL iBT 45 or cb-TOEFL 450] and (Kwantlen ESL Writing Band 4 or

TOEFL iBT writing sub-score 15 or TWE 3)] or IELTS 5.0 with no sub-score less than 4.5

Attributes: ACAD (p. 521), F2D (p. 521)

**ELST 0181 6 credits****English for Academic Purposes - Level 1**

Students at the upper-intermediate level will learn and practice academic reading, writing, and study skills.

Level: CP

Prerequisite(s): ELST 0041 with a B- or KPU ELST Placement into

ELST 0181 or TOEFL iBT 45 with no sub-score less than 15 or IELTS 5.0

with 5.0 in Reading/Writing and no sub-score less than 4.5.

Attributes: ACAD (p. 521), F2D (p. 521)

**ELST 0183 6 credits****Academic Listening and Speaking Skills - Level 1**

Students at the upper-intermediate level will learn and practice listening and speaking skills in preparation for further studies in English.

Level: CP

Prerequisite(s): One of the following: (a) ELST 0043 (B-), (b) KPU ELST Placement into ELST 0183, (c) Test of English as a Foreign Language (TOEFL) iBT overall Band 45 (Listening Band 11, Speaking Band 11), (d) International English Language Testing System (IELTS) overall Band 5 (Listening Band 5, Speaking Band 5, Reading Band 4.5, and Writing Band 4.5)

Attributes: ACAD (p. 521), F2D (p. 521)

**ELST 0261 3 credits****Advanced Pronunciation**

Students at the lower and upper-advanced level will learn and practice skills needed to improve speech clarity.

Level: CP

Prerequisite(s): One of the following: (a) ELST 0183 (B-) (b) KPU ELST Placement into ELST 0283 (c) International English Language Testing System (IELTS) Speaking Band 5.5 (d) Test of English as a Foreign Language (TOEFL) iBT Overall Band 61 (Listening Band 15, Speaking Band 15)

Attributes: ACAD (p. 521), F2D (p. 521)

**ELST 0262 3 credits****Grammar II**

Students will learn how to identify and correct common grammatical and stylistic errors made by English as a Second Language learners. They will also develop strategies to expand their knowledge of idiomatic usage.

Level: CP

Prerequisite(s): One of the following: (a) ELST 0181 (B-) (b) KPU ELST Placement into ELST 0281 (c) International English Language Testing System (IELTS) Writing Band 5.5 (d) Test of English as a Foreign Language (TOEFL) iBT Overall Band 61 (Reading Band 15, Writing Band 15)

Attributes: ACAD (p. 521), F2D (p. 521)

**ELST 0281 6 credits****English for Academic Purposes - Level 2**

Students at the lower-advanced level will learn and practise academic reading, writing, and study skills.

Level: CP

Prerequisite(s): One of the following: (a) ELST 0181 (B-) (b) KPU ELST Placement into ELST 0281 (c) Test of English as a Foreign Language (TOEFL) iBT Overall Band 61 (Reading Band 18, Writing Band 18) (d) International English Language Testing System (IELTS) Overall Band 5.5 (Reading 5.5, Writing Band 5.5, Listening 5.0, Speaking 5.0) (e) Canadian Academic English Language (CAEL) Overall Band Score 50 (Reading sub-test score 50, Writing sub-test score 50, Listening sub-test score 40, Speaking sub-test score 40)

Attributes: ACAD (p. 521), F2D (p. 521)

**ELST 0283 3 credits****Academic Listening and Speaking Skills - Level 2**

Students at the lower-advanced level will learn and practice listening and speaking skills in preparation for further studies in English.

Level: CP

Prerequisite(s): One of the following: (a) ELST 0183 (B-), (b) KPU ELST Placement into ELST 0283, (c) Test of English as a Foreign Language (TOEFL) iBT Overall Band 79 (Listening Band 15, Speaking Band 15), (d) International English Language Testing System (IELTS) Overall Band of 5.5 (Listening Band 5.5, Speaking Band 5.5, Reading Band 5, and Writing Band 5) (e) Canadian Academic English Language (CAEL) Overall Band Score 50 (Listening sub-test score 50, Speaking sub-test score 50, Reading sub-test score 40, Writing sub-test score 40)

Attributes: ACAD (p. 521), F2D (p. 521)

**ELST 0381 6 credits****English for Academic Purposes - Level 3**

Students at the advanced level will develop and practice academic reading, writing and study skills.

Level: CP

Prerequisite(s): One of the following: (a) ELST 0281 (B-) (b) KPU ELST Placement into ELST 0381 (c) Test of English as a Foreign Language (TOEFL) iBT Overall Band 79 (with writing sub-score 21) (d) International English Language Testing System (IELTS) Overall Band 6.0 (Reading Band 6.0, Writing Band 6.0 Listening Band 5.5, Speaking Band 5.5) (e) Canadian Academic English Language (CAEL) Overall Band Score 60 (Reading sub-test score 60, Writing sub-test score 60, Listening sub-test score 50, Speaking sub-test score 50)

Attributes: ACAD (p. 521), F2D (p. 521)

**ELST 0383 3 credits****Academic Listening and Speaking Skills - Level 3**

Students at the advanced level will practice listening and speaking skills in preparation for further academic studies.

Level: CP

Prerequisite(s): One of the following: (a) ELST 0283 (B-) (b) KPU ELST Placement into ELST 0383, (c) Test of English as a Foreign Language (TOEFL) iBT Overall Band 79 (Listening Band 19, Speaking Band 19), (d) International English Language Testing System (IELTS) Overall Band 6.0 (Listening Band 6.0, Speaking Band 6.0, Reading Band 5.5, Writing Band 5.5) (e) Canadian Academic English Language (CAEL) Overall Band Score 60 (Listening sub-test score 60, Speaking sub-test score 60, Reading sub-test score 50, Writing sub-test score 50)

Attributes: ACAD (p. 521), F2D (p. 521)

## English Language Studies Qualifying (ELSQ)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

Note: These upgrading courses are preparatory and are not eligible for a Tuition Tax Credit (T2202A).

**ELSQ 0015 6 credits****Basic English Communication**

Students with very limited English will, in this combined-skills course, develop their speaking, listening, reading, and writing skills in a classroom environment.

Level: CP

Prerequisite(s): KPU ELST placement into ELSQ 0015

Attributes: ACAD (p. 521), F2D (p. 521)

**ELSQ 0021 6 credits****Introductory Reading and Writing**

Students will learn and practise introductory reading and writing. They will focus primarily on upper beginner functional English for university studies.

Level: CP

Prerequisite(s): KPU ELST placement into ELSQ 0021

Attributes: ACAD (p. 521), F2D (p. 521)

**ELSQ 0023 6 credits****Introductory Listening and Speaking**

Students will learn and practise listening and speaking in English. They will develop essential English listening and conversation skills at the upper beginner level on topics related to university studies.

Level: CP

Prerequisite(s): ELSQ 0015 with a B- or KPU ELST placement into ELSQ 0023.

Attributes: ACAD (p. 521), F2D (p. 521)

**ELSQ 0031 6 credits****Pre-Foundation Reading and Writing**

Students will develop reading and writing skills to a lower intermediate level of competence. They will improve their reading strategies, grammar control, spelling accuracy, and critical thinking skills by participating in learning tasks related to university studies.

Level: CP

Prerequisite(s): One of the following: (a) ELSQ 0021 (B-) (b) KPU ELST placement into ELSQ 0031

Attributes: ACAD (p. 521), F2D (p. 521)

**ELSQ 0033 6 credits****Pre-Foundation Listening and Speaking**

Students will develop listening and speaking skills to a lower intermediate level of competence. They will practise using listening strategies and new vocabulary in English conversation by participating in a variety of communicative learning tasks related to university studies.

Level: CP

Prerequisite(s): One of the following: (a) ELSQ 0023 (B-) (b) KPU ELST placement into ELSQ 0033

Attributes: ACAD (p. 521), F2D (p. 521)

## English Qualifying (ENGQ)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (https://www.bctransferguide.ca/) - for information about course transfer in B.C.

Note: These upgrading courses are preparatory and are not eligible for a Tuition Tax Credit (T2202A).

**ENGQ 0024 0 credits****Detailed English Assessment**

Students will complete a thorough assessment and placement process and will, in consultation with the instructor, develop a specific educational plan in relation to achieving their academic goals. Students will understand the demands of learning in an individually-paced continuous-intake classroom. NOTE: Students enrolled in this course in continuous-intake format may be required to satisfy a learning contract in order to renew their enrollment.

Level: CP

Prerequisite(s): Academic and Career Preparation (ACP) English Assessment placement into ENGQ 0024

Attribute: ACAD (p. 521)

**ENGQ 0044 3 credits****Basic Writing Skills 1A**

Students with English as a first language who have little or no writing experience will acquire the basic grammar and mechanical skills necessary for writing different kinds of simple, clear and correct sentences. They will acquire basic level writing skills and prepare for ENGQ 0054. NOTE: Students enrolled in this course in continuous-intake format may be required to satisfy a learning contract in order to renew their enrollment.

Level: CP

Prerequisite(s): One of the following: (a) Academic and Career Preparation (ACP) English Assessment placement into ENGQ 0044 (b) ENGQ 0024 (EXP)

Attribute: ACAD (p. 521)

**ENGQ 0045 3 credits****Basic Reading Skills 1A**

Students with English as a first language who have had little or no experience with the printed word will learn basic reading comprehension skills in an individualized self-paced study mode. They will acquire basic level reading skills and prepare for entry into ENGQ 0055. NOTE: Students enrolled in this course in continuous-intake format may be required to satisfy a learning contract in order to renew their enrollment.

Level: CP

Prerequisite(s): One of the following: (a) Academic and Career Preparation (ACP) English Assessment placement into ENGQ 0045 (b) ENGQ 0024 (EXP)

Attribute: ACAD (p. 521)

**ENGQ 0054 3 credits****Basic Writing Skills 1B**

Students with limited writing experience will acquire the basic grammar and mechanical skills necessary for writing different kinds of simple, clear and correct sentences. They will acquire basic level writing skills and prepare for ENGQ 0064. NOTE: Students enrolled in this course in continuous-intake format may be required to satisfy a learning contract in order to renew their enrollment.

Level: CP

Prerequisite(s): One of the following: (a) Academic and Career Preparation (ACP) English Assessment placement into ENGQ 0054 (b) ENGQ 0044 (MAS)

Attribute: ACAD (p. 521)

**ENGQ 0055 3 credits****Basic Reading Skills 1B**

Students with English as a first language who have had little or no experience with the printed word will learn basic reading comprehension skills in an individualized individually-paced study mode. The students will acquire basic skills and prepare for entry into ENGQ 0065. NOTE: Students enrolled in this course in continuous-intake format may be required to satisfy a learning contract in order to renew their enrollment.

Level: CP

Prerequisite(s): One of the following: (a) Academic and Career Preparation (ACP) English Assessment placement into ENGQ 0055 (b) ENGQ 0045 (MAS)

Attribute: ACAD (p. 521)

**ENGQ 0056 3 credits****Phonetic Reading and Spelling Skills 1**

Students who have had little or no experience with the English phonemic system will learn basic phonetic reading and spelling skills, and basic word analysis skills in an individualized study mode. They will acquire basic phonemic awareness and prepare for ENGQ 0066. NOTE: Students enrolled in this course in continuous-intake format may be required to satisfy a learning contract in order to renew their enrollment. NOTE: A required corequisite for this course is an appropriate level reading comprehension course as identified through ACP Assessment.

Level: CP

Prerequisite(s): One of the following: (a) Academic and Career Preparation (ACP) English Assessment placement into ENGQ 0056 (b) ENGQ 0024 (EXP) (c) ACP Instructor Placement

Attribute: ACAD (p. 521)

**ENGQ 0064 3 credits****Basic Writing Skills 2**

Students will acquire the basic grammar and mechanical skills necessary for writing a variety of sentence types and simple paragraphs. They will prepare for ACP Intermediate Level English. NOTE: Students enrolled in this course in continuous-intake format may be required to satisfy a learning contract in order to renew their enrollment.

Level: CP

Prerequisite(s): One of the following: (a) Academic and Career Preparation (ACP) English Assessment placement into ENGQ 0064 (b) ENGQ 0054 (MAS)

Attribute: ACAD (p. 521)

**ENGQ 0065 3 credits****Basic Reading Skills 2**

Students who have had limited experience with the printed word will learn basic reading comprehension skills in an individually-paced study mode. They will prepare for entry into intermediate level ACP reading courses. NOTE: Students enrolled in this course in continuous-intake format may be required to satisfy a learning contract in order to renew their enrollment.

Level: CP

Prerequisite(s): One of the following: (a) Academic and Career Preparation (ACP) English Assessment placement into ENGQ 0065 (b) ENGQ 0055 (MAS)

Attribute: ACAD (p. 521)

**ENGQ 0066 3 credits****Phonetic Reading and Spelling Skills 2**

Students who have had limited experience with the English phonemic system will learn phonetic reading and spelling skills and basic word analysis skills in an individualized study mode. NOTE: Students enrolled in this course in continuous-intake format may be required to satisfy a learning contract in order to renew their enrollment. NOTE: Appropriate level reading comprehension course as identified through ACP Assessment.

Level: CP

Prerequisite(s): One of the following: (a) Academic and Career Preparation (ACP) English Assessment placement in ENGQ 0066 (b) ENGQ 0024 (EXP) (c) ENGQ 0056 (MAS) (d) ACP Instructor Placement

Attribute: ACAD (p. 521)

**ENGQ 0074 3 credits****Directed Studies: Intermediate Writing and Communication**

Students will work intensively on improving their writing and/or communication skills. Students will, in consultation with the instructor, choose and complete assignments at the intermediate level pertinent to their specific goals. They will study in a self-paced, continuous-intake mode. NOTE: Students enrolled in this course in continuous-intake format may be required to satisfy a learning contract in order to renew their enrollment.

Level: CP

Prerequisite(s): One of the following: (a) Academic and Career Preparation (ACP) English Assessment placement into ENGQ 0074 (b) ENGQ 0064 (MAS)

Attribute: ACAD (p. 521)

**ENGQ 0075 3 credits****Directed Study: Intermediate Reading**

Students at intermediate level will work in a self-paced individualized study mode on individualized, specific objectives. They will work on basic reading improvement, listening comprehension, spelling improvement, vocabulary development, and/or reading in content areas appropriate to the students' goals. NOTE: Students enrolled in this course in continuous-intake format may be required to satisfy a learning contract in order to renew their enrollment.

Level: CP

Prerequisite(s): One of the following: (a) Academic and Career Preparation (ACP) English Assessment placement into ENGQ 0075 (b) ENGQ 0065 (MAS)

Attribute: ACAD (p. 521)

**ENGQ 0084 3 credits****Directed Studies: Advanced Writing and Communications**

Students will work intensively on improving their writing and/or communication skills. Student will, in consultation with the instructor, choose and complete assignments at the Advanced level pertinent to their specific goals. They will study in a self-paced, continuous-intake mode. NOTE: Students enrolled in this course in continuous-intake format may be required to satisfy a learning contract in order to renew their enrollment.

Level: CP

Prerequisite(s): One of the following: (a) Academic and Career Preparation (ACP) English Assessment placement into ENGQ 0084 (b) ENGQ 0074 (MAS)

Attribute: ACAD (p. 521)

**ENGQ 0085 3 credits****Directed Study: Advanced Reading**

Students at advanced level will work in a self-paced individualized study mode on individualized, specific objectives. They will work on reading improvement, listening comprehension, spelling improvement, vocabulary development, and/or reading in content areas appropriate to the students' goals. NOTE: Students enrolled in this course in continuous-intake format may be required to satisfy a learning contract in order to renew their enrollment.

Level: CP

Prerequisite(s): One of the following: (a) Academic and Career Preparation (ACP) English Assessment placement into ENGQ 0085 (b) ENGQ 0075 (MAS)

Attribute: ACAD (p. 521)

**ENGQ 1079 3 credits****Writing Skills - Focus On Sentences**

Students will learn and practise effective writing, with major focus on correct and effective sentences. They will study and practise the writing process and will write basic paragraphs. Students will practise writing in response to reading critically. Note: This course does not offer instruction at the Fundamental level of English skills or English as a Second Language. It is strongly recommended that students seek an individual assessment through the ACP Department and register for supplemental coursework as required.

Level: CP

Prerequisite(s): English 11 (C) or Comm 12 (C+) or ELST 0281 (C) or ACP assessment or EPT placement

Attribute: ACAD (p. 521)

**ENGQ 1089 3 credits****Writing Skills - Focus on Paragraphs**

Students will acquire, review and practise grammar skills for writing effective sentences and paragraphs. They will study and practise the process of composition (including brainstorming ideas, thesis creation, composing an outline, writing a draft, revising a draft, editing and proofreading). Students will practise writing in response to reading critically, and they will practise summarizing. They will focus on sentences and paragraphs. Note: This course does not offer instruction at the Fundamental level of English skills or English as a Second Language.

Level: CP

Prerequisite(s): English 12 (P) or English 12 First Peoples (P) or English 11 (C+) or Comm 12 (B) or ENGQ 1079 (C) or ENGQ 1097 (C) or ABEE 0070 (C) or LPI score 23, level 3 or ACP assessment or EPT or ELST 0381 (C+)

Attribute: ACAD (p. 521)

**ENGQ 1091 3 credits****Provincial Level English (English 12)**

Students will study English literature, including Canadian literature, in order to prepare for university-level English courses and/or qualify for the B.C. Adult Graduation Diploma. They will read, analyze and respond, orally and in writing, to selected works of literature from fiction, poetry and drama.

Level: CP

Prerequisite(s): One of the following: (a) English 12, (b) English 12 First Peoples, (c) English 11 (B), (d) ENGQ 1089, (e) ENGQ 1098, (f) ENGQ 1079 (B), (g) ELST 0381 (B-) and ELST 0383 (B-), (h) Language Proficiency Index (LPI) with an Essay Score of 26, English Usage (EU) score of 6, and Reading Comprehension (RC) score of 16, (i) Academic and Career Preparation (ACP) English Assessment placement at Level 9, (j) KPU English Placement (EPT) into any of ENGQ 1091, ENGQ 1092, or ENGQ 1099, (k) International English Language Testing System (IELTS) Overall Band 6.0 (Listening Band 6.0, Reading Band 6.0, Writing Band 6.0, and Speaking Band 6.0), (l) Test of English as a Foreign Language (TOEFL) iBT 80

Co-requisite(s): Students who are entering with a C grade in ENGL 12 are strongly recommended to take ENGQ 1096 concurrently.

Attribute: ACAD (p. 521)

**ENGQ 1092 3 credits****Professional and Technical English 12**

Students will prepare for post-secondary studies through the acquisition of skills in critical reading, listening/viewing, speaking and technical writing. They will apply oral and writing skills by studying, preparing and presenting a variety of business and technical communications and essays.

Level: CP

Prerequisite(s): One of the following: (a) English 12, (b) English 12 First Peoples, (c) English 11 (B), (d) ENGQ 1089, (e) ENGQ 1098 (f) ENGQ 1079 (B), (g) ELST 0381 (B-) and ELST 0383 (B-), (h) Language Proficiency Index (LPI) Essay Score of 26 (English Usage (EU) score of 6 and Reading Comprehension (RC) score of 16), (i) Academic and Career Preparation (ACP) English Assessment placement at Level 9, (j) KPU English Placement (EPT) into ENGQ 1091, ENGQ 1092 or ENGQ 1099, (k) International English Language Testing System (IELTS) Overall Band 6.0 (Listening Band 6.0, Reading Band 6.0, Writing Band 6.0, and Speaking Band 6.0), (l) Test of English as a Foreign Language (TOEFL) iBT 80  
Co-requisite(s): Students who are entering with a C grade in ENGL 12 are strongly recommended to take ENGQ 1096 concurrently.

Attribute: ACAD (p. 521)

**ENGQ 1096 1.5 credits****University Writing Workshop**

Students will improve their writing skills by receiving instruction and practice in the writing process, editing techniques and the active reading process. They will also study selected language, mechanics and grammar topics chosen according to the needs of the students. Students will use their own completed and graded assignments to study and practice writing in a workshop environment. Note: This course will support students who are taking Qualifying and Preparatory English courses (ENGQ 1091, ENGQ 1092, ENGQ 1099)

Level: CP

Prerequisite(s): ENGL 12 (C) or English 12 First Peoples (C) or KUC EPT or LPI score 26 or higher Level 4 or ENGQ 1091 (C-) or ABEE 0091 (C-) or ENGQ 1092 (C+) or ABEE 0092 (C-) or ELST 0381 (C+) or ENGQ 1098 (C) or ABEE 0081 (B) or ACP Placement into ENGQ 1096 or EPT or IELTS 6.0 (no band less than 6.0) or iBT 80 or PBT 550 (TWE 4.5)

Co-requisite(s): It is strongly recommended that students registering in this course take one of ENGQ 1091, ENGQ 1092 or ENGQ 1099 concurrently

Attribute: ACAD (p. 521)

**ENGQ 1099 3 credits****Writing Skills with Readings**

Students will study and practise the process of composition (including brainstorming ideas, thesis creation, composing an outline, writing a draft, revising a draft, editing and proofreading). They will acquire, review and practise grammar skills. Students will practise writing in response to reading critically. They will apply the writing process to the composition of paragraphs and short essays. Note: This course does not offer instruction at the Fundamental or Intermediate level of English skills or English as a Second Language.

Level: CP

Prerequisite(s): One of the following: (a) English 12, (b) English 12 First Peoples, (c) ENGQ 1079 (B),(d) ENGQ 1089, (e) ENGQ 1098, (f) ELST 0381 (B-), (g) Language Proficiency Index (LPI) Essay Score of 26 (English Usage (EU) score of 6 and Reading Comprehension (RC) score of 16), (h) Academic and Career Preparation (ACP) English Assessment placement at Level 9, (i) KPU English Placement (EPT) into ENGQ 1091 or ENGQ 1092 or ENGQ 1099 (j) International English Language Testing System (IELTS) Overall Band 6.0 (Listening Band 6.0, Reading Band 6.0, Writing Band 6.0, and Speaking Band 6.0), (k) Test of English as a Foreign Language (TOEFL) iBT 80

Co-requisite(s): Students who are entering with a C grade in ENGL 12 are strongly recommended to take ENGQ 1096 concurrently.

Attribute: ACAD (p. 521)

## Entrepreneurial Leadership (ENTR)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**ENTR 3000 3 credits****Advanced Professional Business Communications**

Students will study theories and principles for writing correspondence including electronic proposals, business plans, executive summaries and other research reports, including a collaborative report. They will complete written and oral communication assignments that emphasize interpersonal, team-building and leadership skills.

Level: UG

Cross-listing: CMNS 3000

Attribute: BUSI (p. 521)

**ENTR 3100 3 credits****Business Analysis and Decision Making**

Students will apply previously learned analytical tools to address a wide range of organizational issues. They will develop and assess options based on sound strategic analysis and research. Students will recommend solutions supported by quantitative and qualitative rationale. They will develop their problem solving, judgment, analysis, evaluation and decision making skills through case analyses and applied exercises. Students will be required to undertake both individual and group work, drawing from the full range of business courses completed thus far.

Level: UG

Prerequisite(s): BUQU 1130, BUQU 1230, ECON 1150, MRKT 1199, CMNS 1140, BUSI 2405, and ACCT 2293 or ACCT 1210

Attribute: BUSI (p. 521)

**ENTR 3110 3 credits****Advanced Organizational Behaviour**

Students will complete a diagnosis of an organizational setting for the purposes of: managing change, improving performance and increasing organizational effectiveness. Students will use their diagnosis to develop a portfolio that will include: activity management, personal management, conflict and stress management, values, attitudes, group dynamics, leadership and team development, corporate politics and business negotiations.

Level: UG

Prerequisite(s): 45 credit hours including BUSI 1215 or BUSI 1210.

Co-requisite(s): CMNS 3000 or ENTR 3000

Attribute: BUSI (p. 521)

**ENTR 3120 3 credits****Managerial Accounting for Entrepreneurs**

Students will learn managerial accounting tools to help make decisions in a business environment. Students will review and analyze managerial accounting practices of different industries. Students will study topics which include relevant costs and revenues, budget development and analysis, capital budgeting and performance measurement tools. Students will apply concepts learned by using cases and applied exercises.

Level: UG

Prerequisite(s): 45 credits from courses including all of the following:

(a) ACCT 2293 or ACCT 1210, (b) ECON 1150, (c) ENTR 3100 and (d) BUQU 1230 or CRIM 2103 or MATH 1115 or MATH 2341 or PSYC 2300 or SOCI 2365

Attribute: BUSI (p. 521)

**ENTR 3130 3 credits****Production and Operations Management**

Students will learn and practise the fundamental design and implementation tools and techniques used in Production and Operations Management (POM). They will be exposed to leading practices employed by entrepreneurs and managers in organizations of all sizes, both in manufacturing and service industries. Students will apply these tools and techniques to solve practical POM problems through exercises and a group term project involving work with real-world or simulated organizations.

Level: UG

Prerequisite(s): 45 credit hours including (ACCT 2293 or ACCT 1210) and ECON 1150 and (BUQU 1230 or MATH 1115 or MATH 2341 or CRIM 2103 or PSYC 2300 or SOCI 2365)

Attribute: BUSI (p. 521)

**ENTR 3140 3 credits****Entrepreneurial Marketing**

Students will learn to address complex marketing problems that need to be addressed with limited resources and recognition of the financial, operational, and HR consequences of the chosen strategy. Students will develop their problem solving, decision-making and planning skills through case analyses and applied exercises. They will also complete a marketing project for a local small business or community organization. Students will be required to undertake both individual and group work, drawing from the full range of business courses taken thus far.

Level: UG

Prerequisite(s): 45 credit hours including (ACCT 2293 or ACCT 1210) and ECON 1150 and (BUQU 1230 or MATH 1115 or MATH 2341 or CRIM 2103 or PSYC 2300 or SOCI 2365)

Attribute: BUSI (p. 521)

**ENTR 3150 3 credits****Business Economics**

Students will learn and apply economic concepts that directly relate to decisions made in small and medium-sized businesses. They will develop broad analytical skills useful for entrepreneurial decision-making.

Level: UG

Prerequisite(s): 45 credit hours including (ACCT 2293 or ACCT 1210) and ECON 1150 and (BUQU 1230 or MATH 1115 or MATH 2341 or CRIM 2103 or PSYC 2300 or SOCI 2365)

Attribute: BUSI (p. 521)

**ENTR 3160 3 credits****Information Technology for Business**

Students will learn and practice how Information Technology (IT) can assist decision makers in business to be more efficient and effective. They will also learn and practice how to plan, analyze, develop, implement, use and manage information and systems that support the business process from a strategic and competitive advantage perspective.

Level: UG

Prerequisite(s): : ENTR 3100

Attribute: BUSI (p. 521)

**ENTR 3170 3 credits****Entrepreneurial Finance**

Students will learn current financial management theories along with the technical skills necessary to maximize the economic value of the firm for its shareholders. Using the case-study method, students will learn how to identify, define and resolve the issues faced by financial managers in small and medium-sized companies.

Level: UG

Prerequisite(s): 45 credit hours including (ACCT 2293 or ACCT 1210) and ECON 1150 and (BUQU 1230 or MATH 1115 or MATH 2341 or CRIM 2103 or PSYC 2300 or SOCI 2365)

Attribute: BUSI (p. 521)

**ENTR 3230 3 credits****Supply Chain and Logistics Management**

Students will learn how to design, manage and assess end-to-end supply chains and logistics in manufacturing as well as in service industries. They will study the latest concepts and formal tools for planning and auditing supply chains and logistics. Included in this study will be the choices of the most appropriate locations, transportation systems and facilities. Students will practice creating value-adding systems, eliminating waste, and developing sustainable supply chains and logistics networks, both locally and globally, in order to generate a significant positive impact to the organization's triple bottom line. They will apply their knowledge and skills in exercises and projects involving real-world or simulated organizations.

Level: UG

Prerequisite(s): All of (a) BUSI 2405 and (b) ACCT 3320 or ENTR 3120

Attribute: BUSI (p. 521)

**ENTR 3240 3 credits****Entrepreneurial Marketing**

Students will understand and address strategic marketing issues in an entrepreneurial environment while recognizing the impact of marketing on the broader organization. Students will develop their analytical, problem solving, decision-making and planning skills through cases, simulations and applied assignments. Students will be required to undertake both individual and group work, drawing from the full range of business courses taken thus far.

Level: UG

Prerequisite(s): ENTR 3100

Attribute: BUSI (p. 521)

**ENTR 4110 3 credits****Business Leadership**

Students will study the business leadership process as well as applied and practical leadership techniques. They will develop and practice leadership skills through self-assessment exercises, role-playing simulations and other 'hands-on' experience. Students will study other topics such as leadership in entrepreneurial and intrapreneurial settings, small- to medium-size business culture, effective team leadership and self-leadership.

Level: UG

Prerequisite(s): (CMNS 3000 or ENTR 3000 or ENTR 3500) and (ENTR 3110 or HRMT 3115)

Attribute: BUSI (p. 521)

**ENTR 4120 3 credits****Human Resource Management**

Students will acquire an in depth understanding of the human resource (HR) management needed to enable an organization to face changes and challenges. Students will engage in research, present key findings and engage in best practice dialogues around a variety of key human resource management concepts, including legal and diversity issues, employee acquisition and deployment, performance management, career development, employee compensation and rewards, employee communications and discipline, union- management relations, occupational health and safety, and international human resource management.

Level: UG

Prerequisite(s): ENTR 3110

Attribute: BUSI (p. 521)

**ENTR 4130 3 credits****Entrepreneurial Mgt for Service Orgs**

Students will analyze and gain insights into a variety of services industry sectors. They will assess, analyze and manage process and resources that support the building of entrepreneurial service organizations. Students will acquire a holistic understanding of the unique variables and principles associated with the service industry.

Level: UG

Prerequisite(s): ENTR 3140 or [ENTR 3100 and (ENTR 3240 or MRKT 3000)]

Cross-listing: ENTR 4300

Attributes: ASTR (p. 523), BUSI (p. 521)

**ENTR 4140 3 credits****Entrepreneurial Sales and Customer Service**

Students will be introduced to the basic selling process, make formalized sales presentations and learn and practice effective customer service with emphasis placed on understanding loyalty, total quality management (TQM), benchmarking, internal customers and communications.

Level: UG

Prerequisite(s): ENTR 3140 or ENTR 3240

Attribute: BUSI (p. 521)

**ENTR 4150 3 credits****Management of Innovation**

Students will learn how to manage innovation using formal processes, frameworks and tools. They will study the latest innovation management approaches in the areas of design of innovation strategies. Students will study stimulation of creativity and harnessing of technologies, development of goods, services and processes, business model innovation, and measurement of innovation performance. They will be given the opportunity to examine successful innovation management practices in organizations of all types and sizes. Students will apply their knowledge and skills in exercises and projects involving real-world or simulated organizations.

Level: UG

Prerequisite(s): BUSI 2405 and (ENTR 3240 OR MRKT 3000)

Attribute: BUSI (p. 521)

**ENTR 4200 3 credits****Business Strategy**

Students will focus on the conceptual and practical aspects of strategic decision making in business. They will learn how to formulate strategies, evaluate strategic alternatives using financial and non financial criteria, implement strategies and manage strategic change in organizations through a series of case analyses, business exercises and current examples from industry.

Level: UG

Prerequisite(s): [ENTR 3130 and 3140 and either (ENTR 3170 OR ACCT 2380 or ACCT 3380)] or [CMNS 3000, ENTR 3100, (ENTR 3120 or ACCT 3320), ECON 1250, ACCT 3380 and 15 additional credits of 3000 level or higher of MKTG, ACCT, ENTR, or HRMT]

Attribute: BUSI (p. 521)

**ENTR 4250 6 credits****Entrepreneurial Leadership Practicum**

Students will manage, design, prepare and present a comprehensive project that will meet the requirements of a client organization. They will develop and complete a significant project in partnership with businesses or as part of developing an entrepreneurial endeavour. Students will also gain the opportunity to practise the integration of business skills and concepts through a real life business launch exercise.

Level: UG

Prerequisite(s): 27 credits from courses in ENTR at the 3100 level or higher, including ENTR 4140 and 4200

Attribute: BUSI (p. 521)

**ENTR 4300 3 credits****Entrepreneurial Management for Service Companies**

Students will analyze and gain insight into a variety of service industry sectors such as the tourism and sports and entertainment industries. They will design and implement a plan for the marketing of services and service companies through the use of cases, industry projects and applied assignments. Students will acquire a practical and strategic understanding of how the marketing of services and service companies differs from that of product marketing.

Level: UG

Prerequisite(s): ENTR 3140

Cross-listing: ENTR 4130

Attribute: BUSI (p. 521)

## Environmental Protection Technology (ENVI)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**ENVI 1106 4 credits****Environmental Chemistry I**

Students will study chemistry with a focus on environmental issues and applications. They will study volumetric and gravimetric analysis, general equilibrium reactions, intermolecular forces, basic organic chemistry concepts, and oxidation-reduction reactions relevant to natural and environmental applications. Students with credit for CHEM 1110 may not take this course for further credit.

Level: UG

Prerequisite(s): Level E1 as defined in the Math Alternatives Table (p. 779), and one of: CHEQ 1094 (C), Chemistry 11 (C+) or Chemistry 12 (C-).

Credit Exclusion: CHEM 1105

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**ENVI 1121 3 credits****Environmental Issues**

Students will learn to identify the basic scientific and social principles that underlie the main current environmental issues. They will also examine local and global case studies and will study the effects of pollution and resource degradation on society.

Level: UG

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**ENVI 1206 4 credits****Environmental Chemistry II**

Students will study chemistry with a focus on environmental issues and applications. They will study gases and phase equilibria as well as key organic chemistry concepts (basic compound families, important reaction types) relevant to environmental applications such as toxicity, persistence, and mobility.

Level: UG

Prerequisite(s): Level C1 as defined in the Math Alternatives Table (p. 779), and (ENVI 1106 or CHEM 1110)

Attributes: ASTR (p. 523), SCIH (p. 521)

**ENVI 1216 4 credits****Introduction to Earth Sciences**

Students will study the basic principles of geology, hydrogeology, hydrology, and atmospheric science. They will learn the key physical mechanisms that affect the transport and transformation of pollutants released in the environment.

Level: UG

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**ENVI 1226 3 credits****Health & Safety**

Students will study the dangers of hazardous materials using standard industrial classification systems and will learn safe emergency response procedures for spill incidents and the use of protective suits and respirators. They will also learn to recognize and control common contaminated sites hazards through the development of site health and safety plans.

Level: UG

Prerequisite(s): ENVI 1106 or CHEM 1110

Attribute: SCIH (p. 521)

**ENVI 2305 3 credits****Environmental Toxicology**

Students will study the principles of toxicology and the toxicological testing of chemicals, with emphasis on environmental pollutants.

Level: UG

Prerequisite(s): BIOL 1210 and one of: CHEM 1210 or ENVI 1206.

Attributes: ASTR (p. 523), SCIH (p. 521)

**ENVI 2307 4 credits****Environmental Physics**

Students will learn the basic principles of physics that apply to environmental concerns. They will study topics in fluid mechanics and electricity and perform labs that illustrate the physical principles underlying common environmental instrumentation.

Level: UG

Prerequisite(s): Both (a) PHYP 1011, PHYQ 1098 or Physics 11 (C), and one of: (b) MATH 1112, MATH 1117, or Principles of Math 12 (C), or (c) MATH 1111 and MATH 1113.

Attribute: SCIH (p. 521)

**ENVI 2310 3 credits****Solid Waste Management**

Students will learn the principles of pollution prevention, waste minimization, recycling, landfill operation, incineration, and composting. They will also study the basic concepts of environmental management systems and environmental audits.

Level: UG

Prerequisite(s): Level C1 as defined in the Math Alternatives Table (p. 779).

Attributes: SCIH (p. 521), QUAN (p. 532)

**ENVI 2315 4 credits****Water and Soil Sampling**

Students will gain experience with the field sampling procedures, instrumentation and analytical methods used in water, soil, and sediment assessment and control.

Level: UG

Prerequisite(s): CHEM 1110 or ENVI 1106.

Attribute: SCIH (p. 521)

**ENVI 2405 3 credits****Environmental Legislation**

Students will study current environmental legislation at the federal, provincial, and municipal levels. They will learn the correct procedures for adhering to current legislation. Students will participate in a project to propose a new legislation or by-law, and will identify and interact with relevant stakeholders.

Level: UG

Prerequisite(s): ENVI 1121

Attribute: SCIH (p. 521)

**ENVI 2410 3 credits****Water Resources Protection**

Students will learn the principles of operation of physical, chemical, and biological treatment systems for water and wastewater. They will also learn the principles of flood control, erosion prevention, and other methods of aquatic habitat protection.

Level: UG

Prerequisite(s): ENVI 1216 and ENVI 2315

Attribute: SCIH (p. 521)

**ENVI 2415 4 credits****Air Quality Monitoring**

Students will gain experience with comprehensive sampling, instrumentation and analytical techniques used in ambient air and source monitoring, and will learn to apply the scientific principles underlying air monitoring and air quality issues.

Level: UG

Prerequisite(s): ENVI 1216

Attribute: SCIH (p. 521)

**ENVI 2420 4 credits****Contaminated Sites Management**

Students will learn the basic principles of contaminated sites management, including site assessment procedures, remediation methods, and the regulatory framework. They will also study the movement of contaminants in soils and groundwater.

Level: UG

Prerequisite(s): Both (a) CHEM 1210 or ENVI 1206, and (b) ENVI 1216.

Attribute: SCIH (p. 521)

**ENVI 2901 1 credit****Environmental Research Seminar**

Students will discuss the scope of research projects in environmental protection in the context of their relevance to the environmental industry and needs of society. They will make a preliminary research project selection, discuss how to carry it out, and provide feedback to their classmates on their proposed research.

Level: UG

Prerequisite(s): Both (a) CHEM 1110 or ENVI 1106, and (b) ENVI 2315.

Co-requisite(s): MATH 1115

Attribute: SCIH (p. 521)

**ENVI 2902 2 credits****Environmental Research Project**

Students will engage in an intensive study of a selected topic in environmental protection technology. They will select a research topic, collect and interpret data, write a report on the results of the project, and present their results.

Level: UG

Prerequisite(s): ENVI 2901 and MATH 1115

Attribute: SCIH (p. 521)

**ENVI 3112 3 credits****Environment and Society**

Students will analyze environmental issues within their social contexts. They will examine the origins of public perception of environmental issues, including the role of the media, activists, whistle-blowers, and the artistic community. Students will debate the respective importance of science and public perception in influencing government policy in selected case studies

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher.

Attribute: SCIH (p. 521)

**ENVI 3212 3 credits****The Urban Environment**

Students will analyze environmental issues within the contexts of community projects. They will conduct a local project, from initial fact-finding and community liaison to formal proposal, and will quantify its potential impacts using local case studies as a guide.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher.

Attribute: SCIH (p. 521)

## Farrier Training (FARR)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables/](http://www.kpu.ca/registration/timetables/) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**FARR 1121 2 credits****Introduction to Farriery**

Students will learn the professional responsibilities of the trade and the role of the modern farrier within the equine industry. They will learn and practice the essential requirements and habits of a safe work environment for both farrier and horse. Students will develop and execute a personal fitness plan. They will also review the fundamentals of effective horse handling.

Level: VO

Attribute: TRAD (p. 521)

**FARR 1122 2 credits****Introduction to Equine Anatomy**

Students will study the conformation of the horse. They will explore the anatomy of the horse with an emphasis on the limb and hoof in preparation for basic shoeing exercises.

Level: VO

Attribute: TRAD (p. 521)

**FARR 1123 2 credits****Introduction to Equine Management for Farriers**

Students will study and practice the basic elements of horse care and management relevant to farriery. Students will manage average and difficult horses in preparation for both trimming and shoeing.

Level: VO

Attribute: TRAD (p. 521)

**FARR 1124 2 credits****Introduction to Forge Work**

Students will learn the basic skills to hot forge mild steel using hand tools. They will learn how to operate natural gas and propane forges and use a variety of anvils common in the farrier industry.

Level: VO

Attribute: TRAD (p. 521)

**FARR 1125 2 credits****Introduction to Horse Hoof Trimming**

The student will learn to assess hoof health and conformation and the trimming needs of average horses to be barefoot. They will practice trimming fore and hind hooves on horses kept barefoot.

Level: VO

Attribute: TRAD (p. 521)

**FARR 1126 2 credits****Introduction to Forging Horseshoes**

The student will learn the techniques to efficiently produce hot forged horse shoes, from mild steel, for the average horse.

Level: VO

Attribute: TRAD (p. 521)

**FARR 1221 2 credits****Intermediate Farriery**

Students will learn the essentials of running a small business servicing the equine industry. They will examine the diversity of equine conformation and how it is connected to leg and hoof problems. They will work with moderately challenging horses and will execute a personal fitness plan.

Level: VO

Prerequisite(s): FARR 1121 and 1123

Attribute: TRAD (p. 521)

**FARR 1222 2 credits****Physiology of the Equine Leg and Hoof**

Student will learn the physiology of individual tissues and the limb, of the horse, as a complete unit. They will study extrinsic and intrinsic factors affecting limb physiology. They will learn trimming and shoeing adaptations to improve hoof function and comfort of the horse.

Level: VO

Prerequisite(s): FARR 1122

Attribute: TRAD (p. 521)

**FARR 1223 2 credits****Equine Hoof Trimming**

Students will work with moderately challenging horses, trimming fore and hind hooves for both barefoot and shoeing situations. They will practice trimming tool repair and maintenance.

Level: VO

Prerequisite(s): FARR 1123 and FARR 1125

Attribute: TRAD (p. 521)

**FARR 1224 3 credits****Intermediate Horseshoe Forging**

Students will learn and practice a variety of forging techniques to modify horseshoes to meet the demands of a variety of equine sports. They will also explore horse show rules governing farriery.

Level: VO

Prerequisite(s): FARR 1124 and 1126

Attribute: TRAD (p. 521)

**FARR 1225 3 credits****Intermediate Horseshoeing**

Students will practice efficient fitting and application of horseshoes to fore and hind hooves of horses. Students will shoe client horses with premade and custom forged shoes for a range of equine disciplines, and individual needs of the horse-owner. Students will modify shoes to meet individual needs of various horses.

Level: VO

Prerequisite(s): FARR 1121 and 1222 and 1123 and 1124 and 1125 and 1126

Attribute: TRAD (p. 521)

**FARR 1321 2 credits****Advanced Farriery**

Students will learn the techniques to efficiently produce tools used in the farrier and blacksmith trade. They will explore the use of non-traditional materials for hoof repair and shoeing of horses. Students will execute a personal fitness plan.

Level: VO

Prerequisite(s): FARR 1221

Attribute: TRAD (p. 521)

**FARR 1322 2 credits****Equine Disease and Lameness**

Students will study diseases of the horse with an emphasis on diseases of the limbs and hooves and the relationship to lameness. They will examine the correlation between conformation, management and disease. Students will study the gaits of the horse to develop understanding how gait relates to evidence of lameness. They will explore the role of the farrier and the relationship to veterinary practice.

Level: VO

Prerequisite(s): FARR 1222

Attribute: TRAD (p. 521)

**FARR 1323 3 credits****Farrier Podiatry**

Students will study basic theories, principles and processes for the treatment of disease and lameness of the limb and hoof of the horse from a farrier perspective. Students will conduct lameness exams and develop trimming and shoeing solutions for live horses.

Level: VO

Prerequisite(s): FARR 1222 and 1224 and 1225

Attribute: TRAD (p. 521)

**FARR 1324 5 credits****Advanced Horseshoeing**

Students will learn and practice methods to work safely and successfully on the most difficult horses. They will learn management techniques for horses displaying a variety of behavior challenges. They will study the development of the equine limb from birth to maturity. Students will practice efficient trimming and shoeing methods.

Level: VO

Prerequisite(s): FARR 1223 and 1224 and 1225

Attribute: TRAD (p. 521)

## Fashion & Technology (FASN)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**FASN 1100 3 credits****Fundamentals of Fashion Design**

Students will examine the foundational elements and principles of design and their application in the creation of apparel. They will develop their ability to experiment with design in two- and three-dimensions through exploration of creative methodologies. Students will formulate solutions to basic fashion design problems, considering the human form, colour theory, and material application.

Level: UG

Attribute: DESN (p. 521)

**FASN 1116 3 credits****The Apparel Industry**

Students will examine the local, national, and global apparel industry through retail environment and brand positioning field analysis. They will acquire an awareness of the historical and current contextual developments affecting the industry. Students will identify the organization of the industry from raw materials through to design, production, marketing, and retail sectors specific to segmented target markets and apparel products.

Level: UG

Attribute: DESN (p. 521)

**FASN 1121 3 credits****Fundamentals of Apparel Pattern Drafting**

Students will practise the fundamental techniques of apparel pattern drafting. They will investigate the correlation between 2D patterns and their application to 3D human form. They will manually draft flat patterns for basic garments and apparel components using industry standard drafting tools and techniques.

Level: UG

Co-requisite(s): FASN 1130

Attribute: DESN (p. 521)

**FASN 1130 3 credits****Fundamentals of Apparel Construction**

Students will practise the fundamental techniques of apparel construction utilizing basic industrial sewing and finishing equipment. They will apply construction techniques and develop their machine operating skills to create basic garments and apparel components. They will apply industry standards in apparel construction, including equipment protocols and quality assurance practices.

Level: UG

Co-requisite(s): FASN 1121

Attribute: DESN (p. 521)

**FASN 1205 3 credits****Fundamentals of Digital Communication**

Students will examine computer applications and digital communication utilized in the fashion industry. They will develop solutions for apparel business activities including formatting of data, visuals, and presentations. Students will explore the capabilities of industry-standard multimedia technology applications such as Adobe Illustrator and Photoshop to design and build print-ready digital fashion files.

Level: UG

Attribute: DESN (p. 521)

**FASN 1215 3 credits****Textiles & Technology I**

Students will explore the textile industry and inherent technologies specific to apparel applications. They will gain an introductory understanding of fabric science through the study of fibre and yarn properties, fabric characteristics and textiles production. They will explore industry-related issues in the production of textiles and their impact on design, manufacturing and marketing of apparel. They will analyze fibre and fabric property performance using textile testing technology.

Level: UG

Prerequisite(s): FASN 1116

Cross-listing: FMRK 1215

Attribute: DESN (p. 521)

**FASN 1225 3 credits****Fundamentals of Apparel Production**

Students will practise the fundamental techniques of apparel production and utilize industry standards of selecting and manipulating block patterns to create prototype garments for new style development. They will create basic technical production specification documents that communicate fabric selection, style details, and garment measurements. Students will construct garments applying basic apparel manufacturing processes while practising industry standards, such as quality assurance and sustainable materials utilization.

Level: UG

Prerequisite(s): FASN 1121 and 1130

Attribute: DESN (p. 521)

**FASN 1231 3 credits****Fundamentals of Fashion Drawing**

Students will explore a variety of free-hand and digital drawing methods and applications utilized in the apparel industry. They will study garment components and fashion terminology for design ideation sketching and technical flat drawing applications. They will experiment with drawing media and techniques to communicate a variety of human forms and fabric rendering solutions. Students will analyze and apply techniques used in historical and current fashion illustrations to communicate and market fashion designs.

Level: UG

Attribute: DESN (p. 521)

**FASN 2100 3 credits****Fashion Design Theory and Process I**

Students will engage in design process and documentation methods utilized in the apparel industry. They will investigate the balance of creativity and marketability required in style development. They will examine and interpret creative design theories and methods. Students will formulate design solutions for apparel products specific to target market segments while developing their individual creative process.

Level: UG

Prerequisite(s): Both: (a) FASN 1230 or FASN 1231 and (b) MRKT 1199

Co-requisite(s): FASN 2121

Attribute: DESN (p. 521)

**FASN 2116 3 credits****Fashion History I**

Students will examine historic costume and the transformation of clothing to the end of the 19th century through analysis of decorative and fine art, and apparel artefacts. They will survey each historical era and the interrelatedness of social, economic, political, cultural and technological events and effects on dress at the time. Students will establish timelines and context for fashion as part of culture, interpret historical design references, and analyze the historical development of the apparel industry.

Level: UG

Prerequisite(s): FASN 1115 or 1116

Attribute: DESN (p. 521)

**FASN 2121 3 credits****Style Production I**

Students will apply drafting and construction skills to create industry standard block patterns for apparel prototype style development. They will expand their skills in pattern manipulation, sewing operations, and industrial equipment use through experimentation with a variety of fabrications, including knits and technical textiles, and increasingly complex garment design. They will apply industry standard technical design skills through development of specification packages and the analysis of fit, quality assurance, and costing in style production.

Level: UG

Prerequisite(s): FASN 1220 or 1225

Co-requisite(s): FASN 2100

Attribute: DESN (p. 521)

**FASN 2201 3 credits****Fashion Design Theory and Process II**

Students will interpret the design and merchandising process utilized in the creation of apparel collections, expanding their knowledge of industry practices and design documentation. They will individually and collaboratively employ fashion design theories and processes in the formulation of design solutions for a range of target market segments. Students will identify production and sustainability considerations in the design process while continuing to explore individual creative practice.

Level: UG

Prerequisite(s): FASN 2100

Co-requisite(s): FASN 2221

Attribute: DESN (p. 521)

**FASN 2215 3 credits****Textiles & Technology II**

Students will integrate their knowledge of the textile industry and inherent technologies for specific apparel applications. They will investigate textile dyeing, printing, and finishing techniques and develop skills in colour management. Technological and environmental innovations and their applications in fashion and performance textiles will be critically examined. Students will apply aesthetic and technological properties of fabric development for apparel through the introduction of composite material and textile design.

Level: UG

Prerequisite(s): FASN 1215

Attribute: DESN (p. 521)

**FASN 2216 3 credits****Fashion History II**

Students will examine historical fashion in the context of the 20th and 21st centuries. They will analyze contemporary history through the interrelatedness of social, economic, political, technological, and cultural events and their effects on dress and the apparel industry. Students will integrate the study of historical dress and cyclical consumer trend analysis to formulate apparel and textiles fashion forecasting presentations specific to target markets.

Level: UG

Prerequisite(s): ENGL 1100 and FASN 2116

Attribute: DESN (p. 521)

**FASN 2221 6 credits****Style Production II**

Students will draft patterns and construct styles for specific markets to explore techniques working with a variety of production equipment and fabrications. They will expand technical design skills through the creation of industry standard specification packages that include detailed production analyses. Students will develop prototype analysis and evaluation techniques to critically assess fit, technical performance, quality, and sustainable practices. Students will utilize critical thinking skills to solve problems encountered through the style production process while employing industry techniques and standards.

Level: UG

Prerequisite(s): FASN 2121

Co-requisite(s): FASN 2201

Attribute: DESN (p. 521)

**FASN 2241 3 credits****CAD Drafting Methodologies**

Students will learn to operate computer-aided-design (CAD) technology to practise pattern manipulation techniques conforming to apparel industry standards. They will transfer manual pattern drafting skills and knowledge to computer-based pattern manipulation methods, with emphasis on creating and determining solutions for new style development.

Level: UG

Prerequisite(s): FASN 1205 and 2121

Attribute: DESN (p. 521)

**FASN 3100 3 credits****Surface Design**

Students will create unique textiles through analysis of fabric traditions of various cultures and the exploration and application of surface design techniques. They will increase their knowledge of structural and sustainable surface design processes by producing textiles using a variety of contemporary media and techniques. Students will engage in creative exploration of surface design problems and prepare presentations of textile and fashion design solutions through tactile, visual, verbal and written communication.

Level: UG

Prerequisite(s): FASN 2215

Attribute: DESN (p. 521)

**FASN 3101 3 credits****Apparel Product Development**

Students will analyze product development design and merchandising processes utilized in the global apparel industry. They will collaborate to formulate seasonal collection design solutions utilizing consumer analysis, strategic planning, and forecasting research. They will propose solutions that consider the balance of ethical, social, environmental, and economic interests throughout the line development process. Students will expand their knowledge and creative application of industry standard technology throughout the product development planning, communication, and presentation process.

Level: UG

Prerequisite(s): All of (a) FASN (2200 or 2201) and (b) FASN 2216

Attribute: DESN (p. 521)

**FASN 3110 3 credits****Advanced Technical Apparel Design & Production**

Students will analyze design processes and manufacturing techniques required for technical and performance apparel production. They will study anthropometrics, ergonomics, and textiles technology to determine articulation, fit, and materials required for the design of performance garments. Students will assemble prototype apparel solutions for identified applications and environments with the use of specific industrial machinery, equipment, materials, and construction techniques.

Level: UG

Prerequisite(s): Both (a) FASN 2220 or 2221 and (b) FASN 2240 or 2241

Attribute: DESN (p. 521)

**FASN 3121 3 credits****Manufacturing Methodology**

Students will interpret manufacturing methodologies and their applications for apparel production environments. They will apply the fundamentals of apparel engineering including productivity concepts, apparel production systems, and operation time studies. They will analyze costing and quality assurance processes in apparel manufacturing and examine domestic and global sustainable production sourcing strategies. Students will study manual and computer-aided-design (CAD) pattern grading and marker-making systems for size range development and sustainable fabric utilization, as part of apparel manufacturing processes.

Level: UG

Prerequisite(s): FASN 3101 and 3110

Attribute: DESN (p. 521)

**FASN 3131 3 credits****Draping Methodology**

Students will experiment with various methods of fabric draping utilized in apparel design. They will create draped three-dimensional (3D) prototypes and apparel components and analyze them for translation into flat patterns. They will explore innovative draped designs through interpretation of historical and current draping techniques used in fashion. Students will determine manufacturing solutions for complex draped garments using advanced pattern making and garment finishing techniques.

Level: UG

Prerequisite(s): FASN 2220 or 2221

Attribute: DESN (p. 521)

**FASN 3151 3 credits****Professional Practices**

Students will develop skills in personal career assessment and professional practices to secure an apparel industry practicum placement with a design/manufacturing company. They will manage skills in resumé and cover letter writing, portfolio development, and interview techniques. They will analyze career opportunities within the local apparel industry and examine practicum procedures, human relations, and leadership principles for success in the workplace.

Level: UG

Prerequisite(s): All of: (a) CMNS 1140, (b) FASN 2200 or FASN 2201 and (c) FASN 2220 or FASN 2221

Attribute: DESN (p. 521)

**FASN 3250 3 credits****Professional Practicum**

Students will engage in professional industry practices through a workplace practicum with a design/manufacturing company in the apparel industry. They will practice applied skills, develop contacts in the industry, and identify opportunities for their place as future professionals in the field. They will utilize critical thinking and reflective practice to synthesize practical knowledge acquisition with prior learning.

Level: UG

Prerequisite(s): FASN 3151

Attribute: DESN (p. 521)

**FASN 3900 3 credits****Special Topics**

Students will critically engage in an intensive study of a special topic in fashion design and/or technology as selected by the instructor. They will research and analyse the theory and application of a particular or emerging fashion topic.

Level: UG

Prerequisite(s): 48 credits from courses in FASN at the 1100 level or higher

Attribute: DESN (p. 521)

**FASN 4101 6 credits****Collection: Design Development**

Students will integrate personal creative direction with industry practice through the identification, validation, and conceptualization of an apparel collection for a viable consumer market. They will refine verbal communication and visual presentation skills utilizing advanced technology applications in proposals of individual line concepts and multiple design solutions. Students will synthesize prior experience, education, knowledge, and skills while critically assessing the balance of creativity, marketability, and sustainability required for leadership in the profession.

Level: UG

Prerequisite(s): FASN 3200 or 3101

Co-requisite(s): FASN 4151

Attribute: DESN (p. 521)

**FASN 4120 3 credits****Innovative Pattern Cutting**

Students will explore contemporary and emergent sustainable apparel industry practices of innovative pattern cutting techniques. They will research the development of these practices and determine their applications for design, manual and computer-aided-design (CAD) pattern making, and manufacturing. Students will experiment with Zero Waste fashion design methods, specialized cutting techniques, three-dimensional (3D) design applications, and material manipulations in the creation of apparel.

Level: UG

Prerequisite(s): FASN 3130 or 3131

Attribute: DESN (p. 521)

**FASN 4130 3 credits****Advanced Digital Communication**

Students will synthesize their visual communication skills in fashion design, illustration, and print and media production integrating industry-standard applications to design and produce a professional digital portfolio. They will design and implement a fashion webpage as a marketing tool. Students will use animation software to create dynamic visual presentations, integrating computer-aided-design (CAD) skills to produce 2-dimensional (2D) to 3-dimensional (3D) garment simulations.

Level: UG

Prerequisite(s): FASN 4101

Co-requisite(s): FASN 4211 and 4221

Attribute: DESN (p. 521)

**FASN 4151 3 credits****Apparel in the Global Economy**

Students will critically analyze the apparel industry in relation to the global and local economy. Through study of the interrelatedness of consumer purchasing patterns, international trade regulations, and raw materials and production sourcing they will examine the global apparel supply chain. Students will manage manufacturing cost and quality analyses while evaluating the integration of ethical supply chain management in the development of a business scenario for an identified apparel collection.

Level: UG

Prerequisite(s): FASN 3120 or 3121

Co-requisite(s): FASN 4101

Attribute: DESN (p. 521)

**FASN 4211 3 credits****Professional Promotion**

Students will present and promote their individual apparel design, production, marketing, and technological skills. They will develop a personal cohesive brand, and professional communication and leadership skills. Students will create marketing materials to promote an individually designed fashion portfolio of work for media and industry professionals, including buyers and potential employers.

Level: UG

Prerequisite(s): FASN 4101

Co-requisite(s): FASN 4130 and 4221

Attribute: DESN (p. 521)

**FASN 4221 6 credits****Collection: Production**

Students will synthesize production knowledge and technical design skills in the creation of a cohesive collection of constructed garments for an identified market. They will evaluate and apply appropriate industry standard pattern making, production, and finishing techniques. Students will create and produce complete specification packages for complex styles and critically evaluate and refine final apparel prototypes for quality, fit, performance, and promotion.

Level: UG

Prerequisite(s): FASN 4120

Co-requisite(s): FASN 4130 and 4211

Attribute: DESN (p. 521)

**FASN 4250 3 credits****Self-Directed Study**

Students will have the opportunity in their final year to integrate personal areas of interest with practice in the profession (subject to faculty approval). They will gain proficiency in entry level job knowledge and skills, as well as develop habits of independent learning through planning, researching, developing and presenting a negotiated area of fashion study.

Level: UG

Prerequisite(s): FASN 3250

Attribute: DESN (p. 521)

## Fashion Marketing (FMRK)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables/) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**FMRK 1105 3 credits****Computer Applications for Fashion Marketing**

Students will examine the role of computers in the business world of fashion. They will be introduced to the Microsoft Windows operating system, and will use the Internet and the Microsoft Office spreadsheet, presentation and word processing software to develop solutions for fashion marketing related business activities. Students will explore the capabilities of industry-standard software applications such as Adobe Illustrator, Photoshop and InDesign to create fashion marketing-related artwork and to design and build print-ready digital media.

Level: UG

Co-requisite(s): FMRK 1115

Cross-listing: DEPD 1240

Attribute: DESN (p. 521)

**FMRK 1115 2.5 credits****The Apparel Market**

Students will acquire an historical awareness of the apparel industry and the current workings of the industry in local, national and global contexts. They will learn to identify the sectors of the industry from raw materials through to design, production and marketing to the consumer. Through market research students will explore and attend events, network with store owners and develop job contacts for marketing related opportunities. They will also explore a variety of careers available in design and marketing and how these positions interrelate.

Level: UG

Co-requisite(s): FMRK 1105

Attribute: DESN (p. 521)

**FMRK 1150 2 credits****Fashion Retail Work Experience**

Students will work 80 hours, paid or volunteer, to gain an understanding of the retail component of fashion in order to further their fashion marketing knowledge and skills. They will provide evidence of their learning in journal form, self-assessment, and reference letters.

Level: UG

Attribute: DESN (p. 521)

**FMRK 1205 3 credits****Visual Communication for Fashion Marketing**

Students will develop their fashion communication skills in a visual context. They will explore the fundamental elements and principles of design, and apply them to current visual fashion marketing strategies. Students will experiment with concepts of layout using fashion figures, terminology, and fashion product such as apparel and accessories. They will create a variety of fashion marketing images to increase their visual literacy in relation to prevailing industry formats.

Level: UG

Prerequisite(s): FMRK 1105, FMRK 1115 and MRKT 1199.

Attribute: DESN (p. 521)

**FMRK 1215 3 credits****Textile Science**

Students will develop their knowledge of how fabrics are created and used, and will be able to apply that understanding to communicate textile knowledge for marketing purposes. They will learn how factors such as industry issues, sourcing practices, labeling laws, fabric finishes and care instructions affect design, production and marketing decisions.

Level: UG

Prerequisite(s): FMRK 1115 and MRKT 1199.

Cross-listing: FASN 1215

Attribute: DESN (p. 521)

**FMRK 1250 3 credits****Fashion and Consumers**

Students will study the supply and demand for fashion products and services and business opportunities for local retail and wholesale markets. They will practice matching consumer preferences to finished product. Students will investigate job opportunities and entrepreneurial ventures in sales and marketing and explore local fashion districts. They will research, write market reports and present a marketing plan for a new start-up fashion business.

Level: UG

Prerequisite(s): FMRK 1105, FMRK 1115, FMRK 1150 and MRKT 1199.

Attribute: DESN (p. 521)

**FMRK 2105 3 credits****Visual Fashion Merchandising and Promotion**

Students will explore visual concepts of fashion marketing and promotion in 2-dimensional and 3-dimensional formats. They will interpret the elements and principles of design as they relate to 3-D areas, such as retail display spaces. Students will examine careers in visual merchandising and fashion promotion by experimenting with window and in-store display, creating merchandising floor plans for retail, styling still-photography shoots and creating fashion looks with garments. Students will identify current local and global trends in apparel, display, advertising and promotion as it pertains to the fashion industry.

Level: UG

Prerequisite(s): FMRK 1150 and 1205

Attribute: DESN (p. 521)

**FMRK 2115 3 credits****Fashion Forecasting**

Students will engage in examination of historical fashion trends to determine how influences such as politics, economics, social and cultural movements impact the evolution of apparel and textiles. Through analysis of consumer trends and market segmentation, students will research applicable influences from areas such as design, art, music, architecture and lifestyle. Students will present a visual, verbal, and written proposed forecast with a rationale, based on interpretation and resulting analysis.

Level: UG

Prerequisite(s): FMRK 1205

Attribute: DESN (p. 521)

**FMRK 2120 3 credits****Fashion Writing**

Students will examine techniques for effective writing in the context of fashion marketing and promotion. Students will practice various fashion writing techniques such as web and social media writing, print and broadcast advertising, public relations copy, and editorial content in newspapers and magazines. Students will apply research, critical thinking, and writing skills using case studies and industry profiles.

Level: UG

Prerequisite(s): FMRK 1205 and FMRK 1215.

Attribute: DESN (p. 521)

**FMRK 2205 3 credits****Fashion Buying**

Students will expand their knowledge of the retail industry including development and distribution of consumer apparel products. They will examine the financial aspects of merchandising including pricing strategies, sales planning and purchasing of retail inventories. Students will also analyze merchandise control, productivity assessment, and in-store presentation.

Level: UG

Prerequisite(s): FMRK 2105 and 2115.

Attribute: DESN (p. 521)

**FMRK 2215 3 credits****Fashion Events and Promotions**

Students will learn to organize and manage a fashion marketing event including: event project management, research and design of on-site coordination, logistics, budgeting, promotion, fundraising, and evaluating the event's success. They will determine venue, theme, activities and will stage the event in the semester. Students will learn about publicity and will prepare media releases, public service announcements, and event communications plans.

Level: UG

Prerequisite(s): FMRK 2120

Attribute: DESN (p. 521)

**FMRK 2240 1.5 credits****Fashion Marketing Work Experience**

Students will conduct a 40 hour work placement in an apparel marketing organization. They will increase their knowledge of fashion marketing practices, develop contacts in the industry and identify opportunities for their place as professionals in the field.

Level: UG

Prerequisite(s): FMRK 2105

Attribute: DESN (p. 521)

## Financial Services (FNSR)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**FNSR 3350 3 credits****Securities Analysis**

Students will study the central elements of the securities industry: financial products, markets and intermediaries. They will analyze different types of investment products, how they are sold and what role they play in a well-planned portfolio.

Level: UG

Prerequisite(s): ECON 1150 and ECON 1250 and (ACCT 2293 or [ACCT 1110 and 1210]) and (ACCT 1130 or BUQU 1130 or [MATH 1112 or higher])

Attribute: BUSI (p. 521)

## Fine Arts (FINA)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**FINA 1100 3 credits****Introduction to Drawing**

Students will learn the fundamentals of drawing in the field of visual art. They will study and practice various technical approaches to drawing. Students will focus primarily on observational drawing including still life, perspective, and the human figure.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_3 (p. 522)

**FINA 1106 3 credits****Drawing for Design**

Students will be introduced to the fundamental principles and techniques of drawing and design for communication. They will explore a variety of media and methods to describe: form, surface, motion, space, and light. Students will learn through observational studies of still lifes, life models, and architectural forms. They will study the relationship of form to content, explore various methods of expression, and develop critical and analytical skills through group critiques and discussions.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 1110 3 credits****Introduction to Painting**

Students will study the fundamental materials, methods, and techniques of painting. They will practice and develop painting skills through technical and creative challenges. Students will also explore personal subjectivity in relation to historical movements and current trends in art through studio activity, lectures, and class discussions.

Level: UG

Co-requisite(s): FINA 1100

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 1130 3 credits****Ceramics I**

Students will learn fundamental processes of handling and firing ceramic materials of different sizes, thicknesses, and textures. They will work with basic techniques of clay preparation, joining, building, drying, glazing, and firing while developing personal expression through form, colour, and texture.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 1131 3 credits****Sculpture I**

Students will be introduced to the fundamental concepts, methods, and materials of contemporary sculpture. They will survey major movements in sculpture over the last century through slide lectures, demonstrations, and individual and group critiques. Students will integrate theory and practice through technical challenges presented by processes and materials.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 1135 3 credits****Introduction to Digital Media I**

Students will learn to use digital software such as Photoshop™ and Imovie™ in a lab setting. They will create artwork that emphasizes the historical and conceptual elements of digital technologies in contemporary art.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 1142 3 credits****Introduction to Print Media**

Students will study the historical and contemporary role of print in the field of visual arts. They will develop visual imagery by exploring conceptual interests and learning technical aspects of relief, screenprinting, and intaglio.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 1145 3 credits****Monotype - The Painted Print**

Students will explore processes that combine painting and drawing with printmaking. They will investigate the interdisciplinary possibilities in these areas of study. Students will experiment with a variety of different techniques under the categories of both monotype and monoprint.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 1166 3 credits****Colour Theory and Practice**

Students will be introduced to the fundamental principles and application of colour theory in the fine arts. Students will gain skills in colour mixing and application to create specific visual effects. They will study the relationship of colour perception to content, explore various methods of colour expression, and develop critical and analytical skills through group critiques and discussion.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 1167 3 credits****Visual Language: Making and Meaning**

Students will be introduced to the visual concepts and principles of constructing and analyzing two-dimensional images. Studio-based exercises and assignments will emphasize process, materials, and the exploration of formal principles. Students will explore the visual relationships between formal elements, media, and content. Students will be introduced to the role of the artist as a producer of meaning through the use of historical and contemporary examples.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 1170 3 credits****Introduction to Film Photography**

Students will explore conceptual and practical approaches to black-and-white photography. They will learn to operate a 35mm single-lens-reflex camera, and learn to use basic darkroom techniques. Students will study the history of photography, and contemporary photography through class critiques and lectures.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 1175 3 credits****Form, Structure and Materials**

Students will study the fundamental principles behind the conception and design of three-dimensional form and space within the field of contemporary art. They will explore the relationships between form, structure, and materials through a range of processes and the realization of three-dimensional objects and compositions.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 1200 3 credits****Drawing II**

Students will investigate both traditional and non-traditional strategies for creating art through drawing. They will practice the fundamentals of drawing while expanding their artistic expression in relation to contemporary art.

Level: UG

Prerequisite(s): FINA 1100

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 1210 3 credits****Painting II**

Students will focus on the fundamental materials, methods, and issues of contemporary painting. They will also develop their abilities to complete projects in an innovative and creative manner.

Level: UG

Prerequisite(s): FINA 1110

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 1230 3 credits****Ceramics II**

Students will review and reinforce skills and develop them to a higher degree of sophistication and complexity. They will focus on developing complete control of the medium at this level and will accept more responsibility for firing. Students will search for unusual approaches to, and ways of, using ceramic materials and will work toward defining their own personal style.

Level: UG

Prerequisite(s): FINA 1130

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 1231 3 credits****Sculpture II**

Students will build on concepts and materials introduced in Sculpture I and will investigate and debate a blend of traditional and non-traditional strategies for making sculpture. They will be introduced to new processes and materials to reflect the complex nature of contemporary sculptural practice and will participate in slide lectures, demonstrations, and individual and group critiques. Students will also use local resources such as libraries, galleries, and museums.

Level: UG

Prerequisite(s): FINA 1131

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 1242 3 credits****Print Media II**

Students will explore a wide variety of techniques in both intaglio and screenprinting including photographic and digital imaging. They will explore the potentials of mixed media prints on different surfaces in two- or three-dimensional structures. Students will also develop their conceptual interests and visual language through assigned projects and class discussions.

Level: UG

Prerequisite(s): FINA 1142

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 1270 3 credits****Photography II**

Students discuss and develop a body of photo-based works, which explore issues related to concepts and visual representations in photography. They will study works of past and contemporary artists and explore photography as art. Students will learn alternative processes in black and white, archival printing techniques, and basic digital manipulations in photography.

Level: UG

Prerequisite(s): FINA 1170

Cross-listing: FINA 2170

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 2135 3 credits****Digital Media: Design in Contemporary Art**

Students will learn to work with Adobe Illustrator™ software to create vector based artwork. They will expand their knowledge of digital software such as Photoshop™. They will apply these programs to create artwork that will encompass digital stills, an artist book and online work. Students will also learn to locate contemporary digital practices in the context of contemporary cultural production.

Level: UG

Prerequisite(s): FINA 1135 or permission of the instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 2147 3 credits****Issues in Contemporary Art I**

Students will study theoretical issues relevant to the production and reception of visual art and popular culture in the last 35 years, including debates around semiotics, modernism/postmodernism, feminism(s), postcolonialism, and the attendant politics of identities produced through structures of race, class, gender and sexual preferences/practices. Students will examine the emergence of new technologies and their use in art practices. Students will visit exhibition venues, including public museums and galleries, commercial galleries and artist run centres. Note: This is a seminar-based course. Note: Students may earn credit for only one of FINA 2147 and CUST 2147 as they are identical courses.

Level: UG

Prerequisite(s): ARTH 1120 and 1121 and FINA 1167 and ENGL 1100 or by permission of the instructor

Cross-listing: CUST 2147

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 2170 3 credits****Intermediate Film Photography**

Students will continue to develop and expand their knowledge of black-and-white film techniques and digital camera techniques, in addition to learning archival print processing, film scanning, digital manipulation, and studio lighting. Students continue to explore contemporary issues by viewing and analyzing photography as art. Students will develop a coherent body of work that reflect critical thought, contemporary art practices, issues and theory.

Level: UG

Prerequisite(s): FINA 1170

Cross-listing: FINA 1270

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 2235 3 credits****Digital Media: Interactive Art on the Web**

Students will expand their knowledge of various digital software such as Photoshop™, Dreamweaver™, Director™ and Flash™. They will apply these programs to create artwork that will encompass digital stills, online work, installation, video and sound. Students will also learn to locate contemporary digital practices within the broader history of cultural production.

Level: UG

Prerequisite(s): FINA 1135

Attribute: ARTS (p. 521)

**FINA 2270 3 credits****Digital Photography**

Students will explore digital photography as an artistic medium. Students will learn Photoshop™ skills for photographers and digital darkroom techniques. Student attention will be placed on the development of personal work and refining technical skills. Students will develop a knowledge of contemporary visual arts practices in digital imaging and photography. Students will focus on critical content in personal work and learn to see their own work in relation to current issues and contexts in art. Students must have a digital camera and basic computer experience to enroll in this class.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 2300 3 credits****Advanced Drawing I**

Students will focus on developing their abilities to respond, in a personal and creative way, to the challenges of assignments. They will investigate and research alternative forms of expression as they develop and re-evaluate their work. To assist in this investigation, students will study contemporary trends in art and various artistic practices, both current and historical.

Level: UG

Prerequisite(s): FINA 1200

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 2310 3 credits****Advanced Painting Studio I**

Students will develop their abilities to respond in a self-directed manner to the challenges of painting assignments. They will investigate and research alternative forms of expression as they develop and re-evaluate their work. Students will study contemporary trends in art and various artistic practices, both current and historical, to assist in this process.

Level: UG

Prerequisite(s): FINA 1210

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 2330 3 credits****Ceramics III**

Students will build on existing skills and engage in personal research, experimentation and self-directed learning. They will use additional techniques such as slip casting and mural tile production with the goal of developing greater expression, originality, and a defined personal style.

Level: UG

Prerequisite(s): FINA 1230

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 2331 3 credits****Sculpture III**

Students will build on the materials and concepts explored in Sculpture I and Sculpture II. They will further develop and be challenged with projects which address craft, process, concepts, and materials. They will explore contemporary sculpture practices including the creation of independent sculptures and sculptural installations. Students will work within a framework of thematic and site-specific projects. They will explore assignments centered on advanced uses of the studio.

Level: UG

Prerequisite(s): FINA 1231

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 2335 3 credits****Digital Media: Video and Installation**

Students will expand their knowledge of various digital software such as Imovie™ and Photoshop™. They will also learn to use digital video software such as Final Cut Express™ in a lab setting. They will apply these programs to create artwork that will encompass online work, installation, video and sound. Students will also learn to locate contemporary digital practices within the broader history of cultural production

Level: UG

Prerequisite(s): FINA 1135 or permission of the instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 2342 3 credits****Print Media III**

Students will continue to explore different techniques in both intaglio and screenprinting. They will investigate and research the possibilities of interdisciplinary approach to print in contemporary print context. Students will also develop their conceptual interests and visual language through assigned and self-directed projects.

Level: UG

Prerequisite(s): FINA 1242

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 2371 3 credits****Photo-based Alternative Processes & Installation**

Students will work with photo-based methods and techniques that go beyond the conventional photographic print by exploring a variety of contemporary photo-based practices, including alternative, antique and experimental approaches. The students will develop skills in wet, dry and mixed media photo-based techniques, working with original and found images to produce projects and installations. Note: No prior photography experience is required. It is recommended that students have access to their own digital or film camera.

Level: UG

Prerequisite(s): Any 6 credits of FINA 1100 level courses or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 2400 3 credits****Advanced Drawing II**

Students will pursue and define their own personal approach to drawing in the field of contemporary art. They will conduct research and complete both assigned and self-directed projects. Students will lead discussions and critique the work of contemporary artists, as well as the work of their peers.

Level: UG

Prerequisite(s): FINA 2300

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 2410 3 credits****Advanced Painting Studio II**

Students will pursue and define their own approach to painting in the field of contemporary art. They will conduct research and complete both assigned and self-directed projects. Students will lead discussions and critique the work of contemporary artists, as well as the work of their peers.

Level: UG

Prerequisite(s): FINA 2310

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 2430 3 credits****Ceramics IV**

Students will concentrate on the integration of ceramic forms, surfaces, and materials in the development of a personal style and will aim for originality and expressiveness. They will set many of their own objectives within the framework of specific assignments and learn advanced firing techniques.

Level: UG

Prerequisite(s): FINA 2330

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 2431 3 credits****Sculpture IV**

Students will work with the material and technical possibilities afforded by the sculpture studios to develop independent projects under supervision of the instructor. The student and instructor will agree on timelines, material and conceptual research, and a detailed series of questions guiding the students' inquiry. Students will initiate their own body of research and work closely with the instructor to develop work that encompasses a strong conceptual element as well as a focused material exploration. They will prepare for and generate class discussions.

Level: UG

Prerequisite(s): FINA 2331

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 2442 3 credits****Print Media IV**

Students will specialize in one or more print media to develop a portfolio of works. Building on independent work habits, students will examine ideas and practices in contemporary print media through assigned and self-initiated projects. They will investigate the possibilities of extending print media into multi-media prints, print-based installation or other art forms. They will develop an increased insight into their work and will improve their ability to articulate conceptual and critical issues in class discussions.

Level: UG

Prerequisite(s): FINA 2342

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 3100 3 credits****Advanced Studio Practice and Seminar I**

Students will pursue and define individual and collaborative approaches to their art practice. They will be expected to develop artwork based on thematic assignments with the goal of understanding their own practice in relation to contemporary art production. Students are required to identify an area of practice to be developed. To assist in this investigation, students will study trends in art and various artistic practices, both contemporary and historical.

Level: UG

Prerequisite(s): (FINA 1167, 1175, 1200, and 2147) and (Any other 6 credits of FINA 2000 level courses) and (ARTH 1120 and 1121) and (Any 3 credits of ARTH 1130, 2122, 2124, 2126 or 2222) and ENGL 1100

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 3110 3 credits****Introduction to Curatorial Studies**

Students will be engaged in discussions and workshops around various aspects of working in museum or gallery environments. They will explore the issues and procedures of mounting an exhibition which include organization, documentation, curatorial responsibilities, financial and budgetary matters, ethical and legal implications, and conservation of artwork. They will visit public art galleries and museums, artist-run centres, and alternative art exhibitions to analyze and respond to the theme and genre for those venues. Students are required to organize and curate an exhibition

Level: UG

Prerequisite(s): (Any 6 credits of FINA 2300, FINA 2310, FINA 2330, FINA 2331, FINA 2335, FINA 2342, FINA 2370 or FINA 2400) and (FINA 1120 or FINA 1121 or FINA 1147 or ARTH 1120 or ARTH 1121) and ENGL 1100

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 3111 3 credits****Professional Practices**

Students will study professional issues and practices useful to visual artists, arts administrators, and cultural workers in the field of art. They will focus on developing skills relating to portfolio development and documentation, grant proposals, and curriculum vitae writing, and acquiring knowledge towards issues including copyright law, promotional practices, and art institutions.

Level: UG

Prerequisite(s): (Any 6 credits of FINA 2300, 2310, 2330, 2331, 2335, 2342, 2370 or 2400) and (FINA 1120 or 1121 or 2147 or ARTH 1120 or 1121) and ENGL 1100

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 3112 3 credits****Public Art: Theory and Practice**

Students will explore, both in theory and in practice, the questions raised by public art. They will study the solutions offered by artists working in the field as well as the critical issues surrounding its diverse audience. Students will create a public art proposal exploring model making and other presentation methods for review by their peers.

Level: UG

Prerequisite(s): (Any 6 credits of FINA 2300, FINA 2310, FINA 2330, FINA 2331, FINA 2335, FINA 2342, FINA 2370 or FINA 2400) and (ARTH 1120 or ARTH 1121 or FINA 1120 or FINA 1121 or FINA 1147) and ENGL 1100

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 3113 3 credits****Subversive Art**

Students will examine critically subversive intentions of art practices that "talk back" to dominant culture, including institutions of art and art history. Students will apply a critical point of view in their own contemporary art practices to critique social, cultural or art institutions, working in traditional art media and/or other formats such as digital media, performance, zines, graphic novels, street art (postering, stencilling, etc.) Students will also focus their studio practice through assigned readings, discussions and writing. Note: Students may earn credits for only one of FINA 3113 or FINA 3202 Special Topic: Subversive Art.

Level: UG

Prerequisite(s): ENGL 1100, and any 6 credits of (2000-level FINA courses), and one of (ARTH 1120, ARTH 1121 or FINA 2147)

Attribute: ARTS (p. 521)

**FINA 3131 3 credits****Wall Works**

Students will study the processes and ideas surrounding the creation of sculptural works for the wall. Students will explore low and high relief sculpture, ranging from the abstract to the representational. They will also learn to understand contemporary art practice of developing personal compositions and integrated architectural works, through conducting independent research.

Level: UG

Prerequisite(s): (FINA 1175) and (Any 3 credits of FINA 2300, 2310, 2330, 2331, 2335, 2342, 2370 or 2400) and (FINA 1120 or 1121 or 2147 or ARTH 1120 or 1121) and ENGL 1100

Attribute: ARTS (p. 521)

**FINA 3133 3 credits****Forming Stories**

Students will study clay modeling, mold-making, sculpture, and casting as it relates to narration in contemporary sculpture. Students will specifically research and develop stories, using historical examples as a starting point, that can be translated visually and materially through the form, structure and surface of clay. They will then further transform these narrative, modeled sculptures through the process of mold-making and casting.

Level: UG

Prerequisite(s): (FINA 1175) and (Any 3 credits of FINA 2300, 2310, 2330, 2331, 2335, 2342, 2370 or 2400) and (FINA 1120 or 1121 or 2147 or ARTH 1120 or 1121) and ENGL 1100

Attribute: ARTS (p. 521)

**FINA 3135 3 credits****Advanced Digital Media: Open Studio 1**

Students will pursue and define individual and collaborative approaches to their digital art practice. They will develop artwork based on thematic assignments with the goal of understanding their own practice in relation to contemporary art production. Students will work in a number of digital medias such as Photoshop™, Illustrator™, Dreamweaver™, Flash™, Premiere Pro™ and After Effects™.

Level: UG

Prerequisite(s): FINA 2235 or FINA 2335 or permission of the instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 3147 3 credits****Issues in Contemporary Art II**

Students will expand their knowledge of issues in the field of contemporary art. They will explore principles of critical and cultural studies that inform contemporary art praxis. Students will actively participate in this seminar-based course, which is structured around a series of required readings and facilitated discussions, supplemented by relevant slides, video and digital materials. Students will also go on local field trips to galleries, museums and artist-run centres. Note: Students may earn credit for only one of FINA 3147 and CUST 3147 as they are identical courses.

Level: UG

Prerequisite(s): FINA 2147/CUST 2147 or ARTH 2122 or ARTH 2222 or ANTH 2120

Cross-listing: CUST 3147

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 3150 3 credits****Telling Lies Again - Making Narrative Art**

Students will explore various approaches to creating narrative imagery through painting and drawing. They will apply both contemporary and historical strategies to storytelling in single-scene and serial formats. Students will examine the gap between text and visual imagery through their own work as well as in class readings and group critiques. Note: Credit will not be given for both FINA 3202 Special Topics in Studio Arts: Telling Lies Again - Making Narrative Art and FINA 3150 Telling Lies Again - Making Narrative Art.

Level: UG

Prerequisite(s): FINA 1167, 2300, 2310 and ARTH 1120, 1121 and ENGL 1100 or by permission of the instructor

Attribute: ARTS (p. 521)

**FINA 3170 3 credits****Advanced Film Photography**

Students will continue to expand on their knowledge of film photography as an art practice and focus on developing a cohesive body of work that reflects critical thought, contemporary art issues and theory. Students will be introduced to large format photography, advanced darkroom techniques and professional large scale fine art printing, while continuing to refine their colour, black and white, medium format photography and lighting skills. Student will focus on the development of personal work and technical skills through both assigned and self-directed projects.

Level: UG

Prerequisite(s): FINA 1170 and (FINA 1270 or FINA 2170 or FINA 2270)

Attribute: ARTS (p. 521)

**FINA 3200 3 credits****Advanced Studio Practice and Seminar II**

Students will continue to pursue and define individual and collaborative approaches to their art practice and writing skills. They will be expected to develop artwork based on thematic assignments and also to identify an area of independent, self-directed work with the goal of understanding their own practice in relation to contemporary art production. To assist in this investigation, students will study trends in art and various artistic practices, both contemporary and historical.

Level: UG

Prerequisite(s): FINA 3100 or by permission of instructor

Attribute: ARTS (p. 521)

**FINA 3201 3 credits****Artistic Practice In The Community**

Students will study the various forms and methods of introducing art, and issues surrounding art, into the community. They will formulate a plan and initiate an individual or group driven, community-based project, for which guidelines will be varied and tailored to each student's interests in the arts. Students might choose a commercial art project, long-term volunteer or committee work in the arts, a public art project, developing and teaching workshops, giving docent tours, and performing non-profit work relating to the arts.

Level: UG

Prerequisite(s): [FINA 3112 or (Any 6 credits of FINA 2300, FINA 2310, FINA 2330, FINA 2331, FINA 2335, FINA 2342, FINA 2370 or FINA 2400)] and (FINA 1120 or FINA 1121 or FINA 1147 or ARTH 1120 or ARTH 1121) and ENGL 1100

Attribute: ARTS (p. 521)

**FINA 3202 3 credits****Special Topics in Studio Arts**

Students will engage in an intensive study of a special topic in studio arts chosen by the instructor. They will study the techniques of a particular art process and/or consider a topic from a specific thematic or conceptual approach.

Level: UG

Prerequisite(s): (Any 6 credits of FINA 2300, FINA 2310, FINA 2330, FINA 2331, FINA 2335, FINA 2342, FINA 2370 or FINA 2400)] and (FINA 1120 or FINA 1121 or FINA 1147 or ARTH 1120 or ARTH 1121) and ENGL 1100

Attribute: ARTS (p. 521)

**FINA 3235 3 credits****Advanced Digital Media: Open Studio 2**

Students will develop a substantial body of work based on personal research, with the goal of articulating their digital art practice in relation to contemporary art production. They will be required to identify an area of practice to be developed, which could include experimentation and innovation in different digital media such as Photoshop™, Illustrator™, Flash™, Premiere Pro™, Final Cut Pro™ and After Effects™. Students will also focus their studio practice critically through reading, research and writing.

Level: UG

Prerequisite(s): FINA 3135

Attribute: ARTS (p. 521)

**FINA 3270 3 credits****Advanced Digital Photography**

Students will expand on their knowledge of digital photography as an artistic medium and focus on the critical content in personal work through both assigned and self-directed projects. Students will refine their Photoshop™ skills for photographers, learn advanced digital darkroom techniques and be introduced to large scale fine art printing. Students will focus on the development of personal projects, leading to a cohesive body of work. Students will develop and analyze their own work and the work of their peers in the context of contemporary visual arts practices and theory in digital imaging, art and photography.

Level: UG

Prerequisite(s): (FINA 1170 and 2270) or [FINA 1170 and (one of FINA 1270 or 2170) and FINA 1135]

Attribute: ARTS (p. 521)

**FINA 3280 3 credits****Performance Art I**

Students will be introduced to performance art through a variety of approaches including live performance, group collaborations, sound work and performance for video and still images. They will explore the possibilities of interdisciplinary and ephemeral art forms through performance and body art practices. Students will develop knowledge of contemporary visual arts practices and become familiar with the history of performance art. Students will focus on critical content in their own personal work and learn to recognize current issues and contexts in art. Note: This is a studio seminar. Credit will not be given for both FINA 3280 and FINA 3202 - Special Topics: Performance Art.

Level: UG

Prerequisite(s): ENGL 1100 and 6 credits of (2000-level FINA courses), and one of (ARTH 1120 or 1121 or FINA 2147)

Attribute: ARTS (p. 521)

**FINA 3380 3 credits****Performance Art II**

Students will develop advanced personal approaches to performance art and conduct research for both assigned and self-directed projects. Students will develop and analyze their work and the work of their peers in the context of contemporary visual art and the history of performance art. They will refine the critical content in their personal work in relation to current issues and contexts in art.

Level: UG

Prerequisite(s): FINA 3280 or FINA 3202

Attribute: ARTS (p. 521)

**FINA 4300 6 credits****Advanced Studio Practice and Thesis I**

Students will begin to develop a body of work in relation to their personal research. They are required to identify an area of practice to be developed, along with experimentation and innovation in different media and materials. Students will also focus their studio practice critically through reading, research and writing.

Level: UG

Prerequisite(s): FINA 3200 and (Any 6 credits ARTH 3000 or 4000 level) and (Any other 6 credits FINA 3000 level)

Attributes: ASTR (p. 523), ARTS (p. 521)

**FINA 4400 6 credits****Advanced Studio Practice and Thesis II**

Students will develop a substantial body of work based on personal research, with the goal of articulating their practice in relation to contemporary art production. They are required to identify an area of practice to be developed, which could include experimentation and innovation in different media and materials. Students will create a culminating body of work accompanied by a written thesis in which the intentions of the work are articulated and theorized.

Level: UG

Prerequisite(s): FINA 4300 or by permission of the instructor

Attribute: ARTS (p. 521)

## Foundations in Design (FIND)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables/) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**FIND 1100 3 credits****Design Processes, Methods and Materials**

Students will study basic design processes, methods and materials common to a variety of design disciplines. They will plan, produce and present creative solutions to design problems in two and three dimensions.

Level: UG

Attributes: DESN (p. 521), PW\_3 (p. 522)

**FIND 1110 3 credits****Drawing for Design**

Students will develop drawing and rendering skills to communicate two- and three-dimensional objects. They will explore drawing (sketching, rapid visualization, perspective systems, and scaling and rendering techniques) in order to develop and convey ideas for design-related projects.

Level: UG

Attributes: DESN (p. 521), PW\_3 (p. 522)

**FIND 1121 3 credits****Design Connections: Then and Now**

Students will examine the ways in which the past and present are connected through designed objects, particularly how designs from the past have inspired contemporary design ideas. They will analyze examples of design in the context of various world cultures, consider design influences throughout history, and investigate issues relating to cultural appropriation.

Level: UG

Attributes: ASTR (p. 523), DESN (p. 521)

**FIND 1130 3 credits****Design Explorations**

Students will examine design-related issues, theories and practices as a basis for expanding their knowledge of the field of design. They will participate in seminar discussions and project work to promote communication, research, team building, and critical thinking. Students will also investigate opportunities for continuing design studies and potential career options.

Level: UG

Attribute: DESN (p. 521)

**FIND 1140 3 credits****Colour Theories**

Students learn colour theories and explore their application within design contexts. They will review and examine the physical characteristics, psychological effects, and the cultural and social implications of colour.

Level: UG

Attributes: DESN (p. 521), PW\_3 (p. 522)

**FIND 1150 3 credits****Designing for Humanity**

Students will examine the relationship between design decisions, humanity and current and historical environmental issues. They will understand the way design impacts individuals, society and the environment through research, case studies and field trips. Students will also investigate such things as over-packaging, built-in obsolescence, toxic materials and sustainable development.

Level: UG

Attribute: DESN (p. 521)

**FIND 1160 3 credits****Communication through Visual Language**

Students will explore the historical, theoretical and contextual developments of signs and symbols (semiotics) as they relate to visual language. They will study the concepts, theories and roles text and images play in contemporary visual information and communication across a variety of design disciplines.

Level: UG

Attribute: DESN (p. 521)

**FIND 1200 3 credits****Two-Dimensional Design**

Students will design solutions for a series of comprehensive, two-dimensional projects that emphasize the development of creative conceptualization and problem-solving skills relating to a range of design disciplines. They will create designs for a variety of contexts and will utilize diverse mediums, materials and presentation methods.

Level: UG

Prerequisite(s): FIND 1100 and FIND 1110 or IDDS 1160 and IDDS 1161

Attributes: ASTR (p. 523), DESN (p. 521)

**FIND 1210 3 credits****Three-Dimensional Design**

Students will apply creative conceptualization and problem-solving skills to comprehensive three-dimensional design projects. They will explore principles and processes, mediums and materials as well as three-dimensional modeling techniques and presentation methods relating to a range of design disciplines.

Level: UG

Prerequisite(s): FIND 1100 and FIND 1110 or IDDS 1160 and IDDS 1161

Attribute: DESN (p. 521)

**FIND 1220 3 credits****Design History: 19th Century Onward**

Students will examine developments in architecture, graphic design, interior design, product design, fashion design, and fine arts from the Industrial Revolution to the present day, primarily in the context of the Western world. They will utilize concepts from design and fine art history, sociology, and cultural anthropology to analyze examples of design, as well as the ideologies, theories, and social factors that have influenced designers, design movements, and consumers of design.

Level: UG

Attributes: ASTR (p. 523), DESN (p. 521)

**FIND 1230 3 credits****Drafting For Design**

Students will learn to produce drawings using computer assisted drafting software relating to a variety of design disciplines. They will create two- and three-dimensional drawings that will communicate design ideas visually through a variety of design projects.

Level: UG

Attributes: DESN (p. 521), PW\_3 (p. 522)

**FIND 1240 3 credits****Introduction to Digital Studio**

Students will learn to use industry-standard, design-related software such as Adobe Photoshop, Illustrator, and InDesign. They will explore the creative potential of software applications and tools to articulate their design ideas and enhance problem-solving abilities. Students will originate and edit digital photography, capture and manipulate text and image, produce and present digital design solutions, and create a digital design portfolio.

Level: UG

Attributes: ASTR (p. 523), DESN (p. 521)

## French (FREN)

Visit the BC Transfer Guide - [bctransferguide.ca](https://bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**FREN 1100 3 credits****French for Beginners I**

Students will use the communicative approach to develop basic oral, listening, reading, and writing skills in French while exploring Francophone cultures. Note: Any student with Grade 12 French or with previous language skills meeting or exceeding the learning outcomes of FREN 1100 is not permitted to register in this introductory course. Students with strong capabilities speaking, reading and writing in French may be asked to withdraw from the course.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_3 (p. 522)

**FREN 1101 3 credits****French for Beginners II**

Students will use the communicative approach to build on basic skills and continue to develop oral, listening, reading, and writing skills while exploring Francophone cultures.

Level: UG

Prerequisite(s): FREN 1100, or French 11 (with a C or higher), or assessment by instructor.

Attributes: ASTR (p. 523), ARTS (p. 521)

**FREN 2200 3 credits****Intermediate French I**

Students will build on previously acquired listening, speaking, reading, and writing skills. They will continue developing interpersonal and intercultural communication skills while further exploring Francophone cultures.

Level: UG

Prerequisite(s): FREN 1101, or French 12 (with a grade C or higher), or assessment by instructor.

Attributes: ASTR (p. 523), ARTS (p. 521)

**FREN 2201 3 credits****Intermediate French II**

Students will reinforce and expand previously acquired listening, speaking, reading, and writing skills. They will continue developing interpersonal and intercultural communication skills while further exploring Francophone cultures.

Level: UG

Prerequisite(s): FREN 2200, or assessment by instructor.

Attributes: ASTR (p. 523), ARTS (p. 521)

**FREN 2220 3 credits****French Oral Skills**

Students will consolidate oral and listening skills at an intermediate level of proficiency. Students will enrich their vocabulary through structured and meaningful practice while exploring the cultures of the French speaking world and discussing current events.

Level: UG

Prerequisite(s): One of: FREN 2201, French 12 immersion, or assessment by instructor.

Attributes: ASTR (p. 523), ARTS (p. 521)

**FREN 3100 3 credits****French Oral & Writing Skills**

Students will enhance their oral and written skills in French at an upper-intermediate level of proficiency. Students will expand their oral proficiency through a broad range of activities using authentic materials based on current events and popular culture from the Francophone world. Students will also consolidate their writing skills through the study and review of complex grammatical structures, specialized vocabulary, idiomatic expressions, and style.

Level: UG

Prerequisite(s): FREN 2201 or FREN 2220 or French 12 immersion or assessment by instructor.

Attributes: ASTR (p. 523), ARTS (p. 521)

**FREN 3110 3 credits****Francophone Culture Through Film**

Students will deepen their understanding of contemporary Francophone culture and art by viewing and critiquing important Francophone movies, connecting them to the broader Francophone culture, and discussing important themes and cultural references in current popular culture. Seeing movies and reflecting, critiquing, and producing "culture", learners will also analyze works by critics who examine various characteristics of contemporary popular culture as seen in other cultural productions, such as magazines, commercials, music, social media, and fashion. Note: Students may earn credits for only one of FREN 3110 or LANC 3110 as they are identical courses. The course will be conducted in English. This course does not serve to fulfill the second language requirement of the Bachelor of Arts degree framework.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher.

Attributes: ASTR (p. 523), ARTS (p. 521)

**FREN 3300 3 credits****Upper Intermediate French I**

Students will consolidate the foundations established in earlier courses and will increase proficiency in all language skills at an upper-intermediate level. They will focus on complex grammatical structures and specialized vocabulary. Students will read and discuss the works of Francophone writers and journalists, as well as analyze contemporary Francophone movies.

Level: UG

Prerequisite(s): Either FREN 2220, or French 12 immersion.

Attributes: ASTR (p. 523), ARTS (p. 521)

**FREN 3301 3 credits****Upper Intermediate French II**

Students will further consolidate the foundations established in earlier courses and increase proficiency in all language skills at an upper-intermediate level. They will continue their advanced study of complex grammatical structures and specialized vocabulary. They will read and discuss the works of Francophone writers and journalists, as well as analyze contemporary Francophone movies.

Level: UG

Prerequisite(s): Either FREN 3300, or assessment by instructor.

Attributes: ASTR (p. 523), ARTS (p. 521)

## Geography (GEOG)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables/](http://www.kpu.ca/registration/timetables/) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**GEOG 1101 3 credits****Human Geography**

Students will examine the nature and diversity of human geography, and learn to understand and describe the spatial characteristics of human population change, distribution and settlement, social-cultural interactions, and economic activities. Students will also learn how the natural environment facilitates or constrains these activities, and how human activities in turn affect the natural environment. They will learn and apply basic cartographic, qualitative and quantitative techniques commonly used in human geography.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**GEOG 1110 3 credits****Atmospheric Science**

Students will apply basic scientific principles to study the atmosphere, examine weather processes, and describe patterns of climate worldwide. They will study the flows and transfer of energy and water to and from the Earth's surface. They will examine the integration of a variety of atmospheric phenomena ranging from microscale weather events, such as local convection and clouds with vertical development, to macroscale frontal systems, wind belts, and general air mass circulation. Students will also discuss evidence and theories concerning long term climate change. Students will learn and apply a variety of quantitative and qualitative techniques commonly used in Geography.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), QUAN (p. 532)

**GEOG 1120 3 credits****Earth Science**

Students will examine the origin, composition, and evolution of the Earth through a study of its rocks and minerals, the geologic time scale, the role of tectonic processes in creating and modifying continents, volcanism, and seismic activity. Students will also examine how the Earth's surface has been modified by weathering and erosion through fluvial (stream), glacial, aeolian, coastal, and slope processes. They will apply this knowledge to understanding local landscapes and the human impact on them. Students will be introduced to a variety of cartographic, quantitative, and qualitative techniques used by geographers.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), QUAN (p. 532)

**GEOG 1160 3 credits****Geography of British Columbia**

Students will examine the evolution of regional patterns of socio-economic growth and development in British Columbia from a geographical perspective. They will examine how the physical environment facilitates or constrains the economic and social development of British Columbia. Students will also investigate contemporary issues such as natural resource conservation, socio-economic development, urbanization, and life in the rural areas.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_3 (p. 522)

**GEOG 2140 3 credits****Regional Geography of Canada**

Students will examine how geographic, historical, economic, and cultural factors intersect in the various regions of Canada. They will discuss selected issues like regional disparity, immigration, climate change, Aboriginal sovereignty and Canada's integration into the global economy.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**GEOG 2185 3 credits****Regional Geography of East Asia**

Students will examine the physical and human environments of East Asia, including China, Hong Kong, Taiwan, Japan, and North and South Korea, from a geographical perspective. They will critically analyze the roles played by physical, cultural, and economic resources in the development of this region. Students will examine the current interactions between the countries of this region within national and international contexts and consider possible futures for East Asia.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**GEOG 2190 3 credits****Regional Geography of South Asia**

Students will explore the physical and human geography of South Asia. They will examine South Asia's landforms, climate, settlement, population, historical geography, economic activities, and cultural landscapes. Students will gain an understanding of the major geographical patterns, processes, issues, and problems of South Asia.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**GEOG 2250 3 credits****The City**

Students will study cities as distinctive spaces of human settlement. They will investigate the early origins of cities and the process of urbanization as it has unfolded over the course of human history. Students will explore spatial and temporal variations in urban function, urban form, and urban social organization. They will examine how these characteristics of cities are influenced by, and in turn shape, natural environmental conditions, technological innovations, economic development, demographic trends, and political organization. Students will apply the concepts of urban geography to understand cities around the world and, in particular, the landscape of metropolitan Vancouver.

Level: UG

Prerequisite(s): 9 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**GEOG 2310 3 credits****Climatology**

Students will apply scientific principles and methods to climatological processes. They will analyze climatological and meteorological concepts such as the radiation and energy balance, lapse rates and stability, water budgets and general circulation modelling. Students will examine the use of the concepts in weather and climate forecasting, as well as their use in understanding climatic change.

Level: UG

Prerequisite(s): 9 credits from courses at the 1100 level or higher, including GEOG 1110

Attributes: ASTR (p. 523), ARTS (p. 521), QUAN (p. 532)

**GEOG 2320 3 credits****Geomorphology**

Geomorphology is the study of landforms and the processes that shape them. The aim is to understand why landscapes look the way they do and what processes are responsible for their formation. Landscapes can be studied at different scales, so we will look at processes that impact large areas such as mountain building due to plate tectonics, and much more local events such as mass wasting events on hill slopes. Landforms evolve in response to a combination of natural and anthropogenic processes and every landscape is a representation of its history.

Level: UG

Prerequisite(s): 9 credits from courses at the 1100 level or higher, including GEOG 1120

Attributes: ASTR (p. 523), ARTS (p. 521), QUAN (p. 532)

**GEOG 2380 3 credits****Qualitative Methods in Geography**

Students will learn and apply qualitative methods of information gathering, interpretation, and presentation. They will consider past and present usage of these methods in geography, and the ethical and practical considerations which guide qualitative approaches. They will practice a range of qualitative methods of information gathering and analysis, such as archival research, discourse analysis, questionnaires, and interviews. Students will also practice written, graphical, and oral methods of qualitative information communication and dissemination. They will consider the importance of these qualitative skills to their academic, professional, and social lives.

Level: UG

Prerequisite(s): 9 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**GEOG 2390 3 credits****Quantitative Methods in Geography**

Students will explore techniques for describing, visualizing, and analyzing quantitative data in geography. They will examine the application of descriptive and inferential statistical methods with particular attention to issues concerning spatial data. Students will develop basic proficiency using industry-standard computer software.

Level: UG

Prerequisite(s): 18 credits at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521), QUAN (p. 532)

**GEOG 2400 3 credits****Introduction to GIS**

Students will study the basic theory of Geographic Information Systems (GIS) and apply GIS concepts to practical problems in geography at an introductory level. They will discuss a range of GIS technical issues, apply GIS operations using a popular desktop GIS software package, and through these applications improve their skills in designing and creating appropriate graphics.

Level: UG

Prerequisite(s): 3 credits from GEOG courses at the 1100 level or higher.

Attributes: ASTR (p. 523), ARTS (p. 521), QUAN (p. 532)

**GEOG 3120 3 credits****Economic Geography**

Students will critically examine the location and distribution of economic activities with particular emphasis at the urban scale. They will examine the unequal distribution of economic activity around the world and discuss processes of globalization and development. They will analyze theories explaining the location of natural resource industries, manufacturing and services, and changes in local and regional economies. Students will critically evaluate relationships among urban land use, transportation infrastructure, and environmental sustainability.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including ECON 1101 or GEOG 1101.

Attribute: ARTS (p. 521)

**GEOG 3130 3 credits****Society and Urban Space**

Students will examine society from a geographic, or 'spatial' perspective, with particular attention to the urban setting. They will explore how various facets of social identity such as race, ethnicity, disability, class, gender/sexuality, family status, age, and criminality, are expressed in the landscape. They will also examine how identities are shaped, and social relations influenced, by the organization of space. Students will explore and evaluate positions on a variety of related urban issues, such as housing affordability, gentrification, accessibility, crime prevention, and residential segregation. They will conduct research that addresses contemporary social geographic issues in metropolitan Vancouver.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including GEOG 1101 or SOCI 1125

Attributes: ASTR (p. 523), ARTS (p. 521)

**GEOG 3220 3 credits****Urban Planning and Politics**

Students will examine the principles and practices of urban planning, and the political organization of urban space, with special attention to Canadian cities. They will investigate the origins and development of urban planning, and critically assess principles and practices of contemporary land use zoning, transportation planning, and social planning. Students will learn about the political organization of urban areas, with attention to the development and characteristics of local and metropolitan-scale government. They will also examine relationships between urban governmental bodies and other political actors, including indigenous peoples and senior levels of government. Students will critically assess public participation in urban planning and urban electoral politics.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including GEOG 1101, POLI 1123 or POLI 1125.

Attributes: ASTR (p. 523), ARTS (p. 521)

**GEOG 3260 3 credits****Geographic Thought**

Students will critically examine the perspectives, concepts, theories, and methodologies characteristic of geographic thought and of the discipline of Geography. They will survey the historical development of geographic thought and will assess contemporary approaches to geographic knowledge within physical and human geography. Students will review discussion about Geography's ability to provide holistic perspectives regarding the challenges facing humanity.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including GEOG 1101, GEOG 1110 or GEOG 1120.

Attributes: ASTR (p. 523), ARTS (p. 521)

**GEOG 3310 3 credits****Natural Hazards**

Students will investigate physical processes and initiation of natural hazards such as geologic hazards (earthquakes, volcanoes), atmospheric hazards (hurricanes, tornadoes), hydrologic hazards (flooding, water pollution), biologic hazards (pests, disease), as well as more general topics such as global climate change and its perceived effects on hazard frequency. Students will analyze why certain populations are at risk and how humans try to prepare for and mitigate hazardous conditions. They will examine new technologies and investigate historic and recent events in case studies, lab and field trip settings.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including one of the following: GEOG 1110 or GEOG 1120.

Attributes: ASTR (p. 523), ARTS (p. 521)

**GEOG 3320 3 credits****Environment and Resources**

Students will examine the principles and practices of environmental resource management. They will explore how resources are conceptualized and assess the effectiveness of resource management systems in addressing environmental issues, preserving ecological capital, and achieving socio-economic goals. They will critically analyse the character, roles and interactions among various actors involved in environmental resource management. They will, in examining these issues, pay particular attention to city-environment relationships. Students will conduct research that addresses a current environmental resource management issue.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including GEOG 1101, GEOG 1110 or GEOG 1120.

Attributes: ASTR (p. 523), ARTS (p. 521)

**GEOG 3330 3 credits****Hydrology**

Students will critically examine theoretical and applied aspects of the hydrologic cycle near the Earth's surface. They will critically analyze precipitation, evaporation, groundwater flow, surface runoff and snowmelt processes. Students will examine and evaluate applied techniques including the collection, compilation and processing of field data.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including GEOG 1110 and 1120.

Attributes: ASTR (p. 523), ARTS (p. 521), QUAN (p. 532)

**GEOG 3340 3 credits****Biogeography**

Students will examine the past and present geographic distribution of wild plants and animals. They will study terms and theories applicable to biogeography, and the systems used to classify wild animals and plants. Students will investigate the various factors that influence the spatial and temporal patterns in the distribution of the earth's biomes, as well as the evolution and extinction of species. They will examine the impacts of humans on the biosphere, and human awareness of, and responses to, these impacts. Students will identify plants and classify specific biogeoclimatic zones on a field trip.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including two of the following: BIOL 1110, GEOG 1110, or GEOG 1120

Attribute: ARTS (p. 521)

**GEOG 3390 3 credits****Methods in Environmental Geography**

Students will learn current methods in Environmental Geography including field data collection, lab analysis, and computer modelling techniques. Students will examine research methodologies including field site choice, sampling strategies, primary and secondary data collection, and analysis of collected data. This course will include field trips, collection and analysis of data, and report writing.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including (a) GEOG 2310 or GEOG 2320, and (b) GEOG 2390

Attributes: ASTR (p. 523), ARTS (p. 521), QUAN (p. 532)

**GEOG 4100 3 credits****Research Design in Geography**

Students will develop a primary research proposal on a selected topic of relevance to human geography or physical geography. They will formulate a research question or questions rooted in a literature review of the issue in question. They will identify a methodology for the proposed research and outline an a data instrument and sampling method, as appropriate. They will address the practical demands of geographic research, including scheduling, budgeting, and institutional oversight. and consider ways to disseminate results.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including one of the following: GEOG 2380, GEOG 2390 or GEOG 2400.

Attributes: ASTR (p. 523), ARTS (p. 521)

**GEOG 4320 3 credits****Advanced Studies in Geomorphology**

Students will further their geomorphological knowledge by critically examining landforms and the processes acting upon them through geomorphic applications, case studies, and field trips. They will use geomorphic techniques to explore landforms and the complex combination of natural and anthropogenic processes that influence landform evolution. Students will investigate glacial, fluvial, and coastal landforms and landscapes in the Lower Mainland through field trips and research projects.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100-level or higher, including GEOG 2320

Attribute: ARTS (p. 521)

**GEOG 4350 3 credits****Climate Change**

Students will investigate climate change through geological time with a strong focus on the Holocene. They will be introduced to different aspects of climate change, including the measurement of present and past climates, the causes of climate change, the consequences of changing climates, and the methods used to predict future climates. Students will apply this knowledge to understand how climate has changed throughout the Holocene and how these changes have influenced humans (e.g., the demise of the Mayan culture, settling and abandonment of Greenland), in order to better anticipate the processes and impacts of future climate change and to evaluate efforts to mitigate these impacts.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including GEOG 2310.

Attributes: ASTR (p. 523), ARTS (p. 521)

**GEOG 4380 3 credits****Applications in GIS**

Students will further their knowledge of Geographic Information Systems (GIS) by applying GIS technology to spatial analysis problems. They will use GIS to analyze case studies in fields such as environmental science, resource management, urban planning, social science, criminology and medicine. Students will explore the techniques, methods and processes involved in the development of a GIS, technical issues and project management.

Level: UG

Prerequisite(s): All of (a) 18 credits from courses at the 1100 level or higher, and (b) GEOG 2400

Attributes: ASTR (p. 523), ARTS (p. 521)

**GEOG 4501 3 credits****Current Geographic Issues**

Students will engage in an intensive study of a selected topic in geography, as determined by the instructor. They will review relevant literature, develop a research proposal, write a comprehensive report, and present the results of their research. Note: the topic of study will be established in advance by the department. Please check with the department for proposed offerings. Students may take this course multiple times for further credit on different topics.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher

Attribute: ARTS (p. 521)

## Global Competencies (GLBL)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**GLBL 1101 1 credit****Global Competencies: Global Awareness**

This course demonstrates one level of a student's global competency focused particularly on developing a curiosity and awareness about the world beyond their immediate environment. Through a portfolio-based assessment, students will show evidence they have achieved mastery of the learning outcomes from reflections on experiences in their academic coursework, local intercultural experience and/or international experience.

Level: UG

Prerequisite(s): 15 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**GLBL 1102 1 credit****Global Competencies: Global Perspectives**

This course demonstrates one level of a student's global competency focused particularly on recognizing their own and others' diverse perspectives. Through a portfolio-based assessment, students will show evidence they have achieved mastery of the learning outcomes from reflections on experiences in their academic coursework, local intercultural experience and/or international experience.

Level: UG

Prerequisite(s): 15 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**GLBL 1103 1 credit****Global Competencies: Languages and Cultures**

This course demonstrates one level of a student's global competency focused particularly on developing and demonstrating a commitment to inclusion, participation, and cooperation with diverse audiences. Through a portfolio-based assessment, students will show evidence they have achieved mastery of the learning outcomes from reflections on experiences in their academic coursework, local intercultural experience and/or international experience.

Level: UG

Prerequisite(s): 15 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**GLBL 1104 1 credit****Global Competencies: Global Engagement**

This course demonstrates one level of a student's global competency focused particularly on demonstrating their ability to translate their ideas and findings into appropriate actions. Through a portfolio-based assessment, students will show evidence they have achieved mastery of the learning outcomes from reflections on experiences in their academic coursework, local intercultural experience and/or international experience.

Level: UG

Prerequisite(s): 15 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

## Graduate Nurse Internationally Educated Re-entry (GNIE)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables/) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**GNIE 1102 3 credits****Relational Engagement in Nursing Practice**

Students will explore the concept of relational engagement through a discovery of self and self in relation to others. They will enhance their awareness and understanding of how personal beliefs, values, and experiences influence caring relationships within nursing practice. Students will develop communication skills essential for establishing professional supportive relationships within the context of person centered care. Note: portions of this course may be offered in an online format.

Level: UG

Attribute: HLTH (p. 521)

**GNIE 1104 2 credits****Pharmacology for Nurses**

Students will learn the fundamental principles of pharmacology. They will explore relevant legislation, drug action, routes of administration, principles of medication administration, and calculation of dosages for drugs used for common health challenges in Canada. Students will become familiar with the generic and trade names of drugs prescribed for common health challenges. Note: this course is offered partially online.

Level: UG

Attribute: HLTH (p. 521)

**GNIE 1117 9 credits****Professional Nursing Practice 1**

Students will be introduced to registered nursing practice in a Canadian adult acute care unit. They will adapt previously learned nursing knowledge and skills to the Canadian context. Students will learn how to collect and critically analyze client information, formulate plans of care, set appropriate priorities, and provide nursing care for two to three clients within the Canadian healthcare setting. They will learn the process of developing professional caring person centred relationships with clients and effective working relationships with peers and the health care team.

Level: UG

Attribute: HLTH (p. 521)

**GNIE 1118 5 credits****Professional Nursing Theory 1**

Students will prepare for licensure and practice in Canada by exploring fundamental concepts of nursing in the Canadian setting. They will examine social epidemiology, prevalent health challenges, and the Canadian health care system. Students will explore personal, public and professional values and expectations related to health care. They will develop sensitivity and awareness to cultural influences on health beliefs and practices in relation to Canada's multicultural and Aboriginal populations. Note: Portions of this course may be offered in an online format.

Level: UG

Attribute: HLTH (p. 521)

**GNIE 1218 7 credits****Professional Nursing Theory 2**

Students will prepare for licensure and practice in Canada by reviewing nursing care of clients experiencing health challenges within the Canadian context. They will examine the professional role of the nurse in promoting health and assisting individuals and families with specific health challenges. Students will examine the relevant ethical, legal, and professional imperatives that influence nursing practice within the Canadian health care system. Note: portions of this course may be offered in an online format.

Level: UG

Prerequisite(s): All of GNIE 1102, 1104, 1117 and 1118

Attribute: HLTH (p. 521)

**GNIE 1227 6 credits****Professional Nursing Practice 2**

Students will continue to develop and consolidate knowledge and skills consistent with the scope of registered nursing practice in Canada. They will integrate Canadian nursing standards and competencies in the planning and implementation of care for two to four clients in an acute care setting. Students will initiate professional caring relationships with clients and their families, and affective working relationships with peers and the health care team. This course includes a lab component.

Level: UG

Prerequisite(s): GNIE 1118, GNIE 1117, GNIE 1102, GNIE 1104

Attribute: HLTH (p. 521)

**GNIE 1328 7 credits****Professional Nursing Theory 3**

Students will prepare for licensure and practice in Canada by exploring community, maternal /newborn, children/pediatric, and mental health/ psychiatric nursing within the Canadian context. They will explore the professional role of the nurse in diverse settings and with diverse and vulnerable populations. Note: portions of this course will be offered in an online format.

Level: UG

Prerequisite(s): All of GNIE 1218 and 1227

Attribute: HLTH (p. 521)

**GNIE 1337 8 credits****Professional Nursing Practice 3**

Students will increase their autonomy by gradually assuming nursing responsibility for increasingly complex client assignments. They will develop leadership skills in working with other members of the health care team in preparation for the role of a professional Registered Nurse.

Level: UG

Prerequisite(s): All of GNIE 1227 and 1218

Attribute: HLTH (p. 521)

## Graduate Nurse Qualifying (GNQU)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**GNQU 1301 3 credits****Fundamentals of Mental Health Nursing**

Students will recognize the effects of mental health challenges and will assess the bio-psychosocial, environmental, spiritual, cultural and economic influences that affect mental health. They will apply mental health nursing concepts based on the lived experience of the individual. Students will complete the self-paced modules online.

Level: UG

Attribute: HLTH (p. 521)

**GNQU 1305 3 credits****Mental Health Preceptorship**

Students will be working with a preceptor in a mental health care setting. They will apply knowledge and skills necessary for caring for mental health clients.

Level: UG

Prerequisite(s): GNQU 1301

Attribute: HLTH (p. 521)

**GNQU 1309 3 credits****Fundamentals of Maternal-Child Nursing**

Students will focus on competency-based theory and processes inherent in maternal/newborn nursing. They will learn to assess and plan care for Canadian childbearing families during pregnancy, labour, delivery, and early parenthood. Students will apply principles of health promotion, prevention, holistic assessment, primary health care, and the social determinants of health in their course work. Students will complete the self-paced modules on-line.

Level: UG

Attribute: HLTH (p. 521)

**GNQU 1317 3 credits****Maternal / Child Preceptorship**

Students will be working with a preceptor in a maternal child setting. They will apply knowledge and skills necessary for caring for clients in maternal child settings.

Level: UG

Prerequisite(s): GNQU 1309

Attribute: HLTH (p. 521)

**GNQU 1321 3 credits****Fundamentals of Pediatric Nursing**

Students will explore the role of the Canadian nurse in caring for children. They will study the effects of illness and treatment on the child and family within the contexts of the stages of growth and development. Students will complete the self-paced modules on-line.

Level: UG

Attribute: HLTH (p. 521)

**GNQU 1327 3 credits****Pediatric Preceptorship**

Students will be working with a preceptor in a pediatric setting. They will apply knowledge and skills necessary for caring for pediatric client.

Level: UG

Prerequisite(s): GNQU 1321

Attribute: HLTH (p. 521)

## Graphic Design for Marketing (GDMA)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**GDMA 1100 3 credits****Typographic Design I**

Students will learn the fundamentals of typography and will apply and evaluate design processes while designing basic print communications that require typographic design solutions. They will draw rough, comprehensive and production layouts using page layout applications and colour specification systems.

Level: UG

Co-requisite(s): All of GDMA 1110 and 1121 and 1140

Attribute: DESN (p. 521)

**GDMA 1110 3 credits****Image Development I**

Students apply design processes to develop concepts and images for basic marketing communications. They learn and apply the elements and principles of design by developing messages through such methods as story telling, image making and applying colour theory. Students also create abstract, symbolic, and representational images to visually communicate ideas and emotions using a variety of mediums.

Level: UG

Co-requisite(s): All of GDMA 1100 and 1121 and 1140

Attribute: DESN (p. 521)

**GDMA 1121 3 credits****Print Production Software Applications 1**

Students learn how to generate, manipulate, transport, and print graphic, typographic, photographic and illustrative images for graphic communication designs. They will use industry-standard software applications such as InDesign, Photoshop, and Illustrator on a Macintosh platform to produce digital layouts. Students learn the fundamentals of creating and producing layouts for graphic communication design using industry-standard software such as InDesign, Photoshop and Illustrator on a Macintosh platform. They will utilize typesetting tools and techniques; industry-standard systems for colour reproduction, type management and layout; and digital production and troubleshooting processes.

Level: UG

Co-requisite(s): All of GDMA 1100 and 1110 and 1140

Attribute: DESN (p. 521)

**GDMA 1140 3 credits****Graphic Design and Society I**

Students examine social, cultural, and historical contexts of graphic design from the Renaissance to the end of World War I. They research and analyze politics, ideologies, technologies, consumerism, and trends that influenced design and design's audiences using basic concepts from design history, sociology, semiotics (the study of signs and symbols), and cultural studies.

Level: UG

Attribute: DESN (p. 521)

**GDMA 1200 3 credits****Typographic Design 2**

Students apply the fundamentals of typography and typographic theory (including typeface anatomy, classifications, measurement systems, etc.) while creating manual and digital typographic layouts for print communication. They will iterate and communicate design concepts and solutions based on research and critical analyses of communication problems related to marketing and promotion.

Level: UG

Prerequisite(s): All of GDMA 1100, 1110, 1121 and 1140

Co-requisite(s): All of GDMA 1210, 1220 and 1240

Attribute: DESN (p. 521)

**GDMA 1210 3 credits****Image Development 2**

Students develop concepts and images for marketing applications of graphic design using manual and digital production technologies. They create images (typographic, photographic, and illustrative) that effectively communicate information and marketing communications concepts and messages, and address the needs and preferences of clients and their target audiences.

Level: UG

Prerequisite(s): All of GDMA 1100, 1110, 1121, and 1140

Co-requisite(s): All of GDMA 1200, 1220, and 1240

Attribute: DESN (p. 521)

**GDMA 1220 3 credits****Print Production Software Applications 2**

Students design and produce layouts using industry-standard software applications such as InDesign, Photoshop and Illustrator on a Macintosh platform. They utilize digital tools and techniques to work on projects that involve features such as colour specification systems, type formatting, style sheets, and editing.

Level: UG

Prerequisite(s): All of GDMA 1100, 1110, 1121, and 1140

Co-requisite(s): All of GDMA 1200, 1210, and 1240

Attribute: DESN (p. 521)

**GDMA 1240 3 credits****Graphic Design and Society 2**

Students examine diverse forms of graphic communication design and other related types of design that emerged from approximately the 1920s onward, primarily in Europe and North America. They will utilize various analytical frameworks to consider historical and emerging ideas and theories relating to the design and communication of information, human interactions with design, and design's social, cultural, and economic significance.

Level: UG

Attributes: ASTR (p. 523), DESN (p. 521)

**GDMA 2100 3 credits****Publication Design 1**

Students design and produce publication layouts to attract and engage end-users, and organize and enrich the content of books, newspapers, and miscellaneous publications, both in print and online. They work with key components of publication design such as typography, photography, illustration, page formats and grids.

Level: UG

Prerequisite(s): All of GDMA 1200 and 1210 and 1220 and 1240 and MRKT 1199

Co-requisite(s): All of GDMA 2110, GDMA 2120, GDMA 2140 and CMNS 2140

Attributes: ASTR (p. 523), DESN (p. 521)

**GDMA 2110 3 credits****Introduction to Advertising Design**

Students learn how to identify client and end-user needs and analyze market research data. They strategically plan, conceptualize, design and produce advertising to promote products or services, raise public awareness, or communicate information in order to engage with specific target audiences.

Level: UG

Prerequisite(s): All of GDMA 1200 and 1210 and 1220 and 1240 and MRKT 1199

Co-requisite(s): All of GDMA 2100, GDMA 2120, GDMA 2140 and CMNS 2140

Attribute: DESN (p. 521)

**GDMA 2120 3 credits****Print Technologies**

Students prepare electronic files and write specifications for mechanical, photomechanical and electronic pre-press, print production and print finishing processes. Students also specify ink, paper, colour and other elements of a printed communication, and how proofing systems and other quality control procedures are used in the printing industry.

Level: UG

Prerequisite(s): All of GDMA 1200 and 1210 and 1220 and 1240 and MRKT 1199

Co-requisite(s): All of GDMA 2100, GDMA 2110, GDMA 2140 and CMNS 2140

Attribute: DESN (p. 521)

**GDMA 2140 3 credits****Communications Design, Consumerism And Popular Culture**

Students will examine contemporary visual communication design, consumerism, and popular culture using concepts from sociology, marketing, cultural studies, cultural anthropology, and semiotics (signs and symbols) to inform their analyses. They will also apply their knowledge and skills to an end of term, research and design-based project. Advertising design, product and packaging design, retail and display design, environmental graphics, and various types of design found in popular culture (comics, movies, sports, music, etc.) may be among the topics covered in the course.

Level: UG

Prerequisite(s): ENGL 1100 and GDMA 1240.

Attributes: ASTR (p. 523), DESN (p. 521)

**GDMA 2200 3 credits****Publication Design 2**

Students research social, cultural, and historical factors and apply fundamentals associated with the design, production and distribution of print and online publications. They identify market opportunities, develop concepts, and produce comprehensive designs for print and digital publications.

Level: UG

Prerequisite(s): All of GDMA 2100, 2110, 2120 and 2140, and CMNS 2140

Co-requisite(s): GDMA 2210, 2220, 2230 and 2240

Attribute: DESN (p. 521)

**GDMA 2210 3 credits****Interactive & Integrated Media Design**

Students use manual and electronic visualization procedures to design text and images for interactive and integrated marketing communications. They will apply critical analysis and problem-solving capabilities while developing and evaluating concepts, messages and images for screen-based interactive and integrated media (such as video, web, mobile devices).

Level: UG

Prerequisite(s): All of GDMA 2100, 2110, 2120 and 2140, and CMNS 2140

Co-requisite(s): All of GDMA 2200, 2222 and 2230

Attribute: DESN (p. 521)

**GDMA 2222 3 credits****Integrated Media Software Applications**

Students will utilize current, industry-standard, video-editing software to create short animations and videos that integrate image, text, sound, motion, and time (i.e. integrated media). They will design and produce or promotional videos appropriate to for clients, targeted audiences, and other end-users.

Level: UG

Prerequisite(s): All of GDMA 2100, 2110, 2120 and 2140, and CMNS 2140

Co-requisite(s): All of GDMA 2200, 2210 and 2230

Attribute: DESN (p. 521)

**GDMA 2230 3 credits****Introduction to Marketing Communications**

Students develop marketing plans before formulating concepts and images that communicate messages to specific target audiences. They design marketing communications for placement in a variety of media. Students focus on the use of effective copy, typography, photography and illustrations to convey marketing messages.

Level: UG

Prerequisite(s): All of GDMA 2100, 2110, 2120 and 2140, and CMNS 2140

Co-requisite(s): GDMA 2200, 2210, and 2222

Attribute: DESN (p. 521)

**GDMA 3100 3 credits****Information Design**

Students will research, analyze, organize and integrate information hierarchies into designs of systems that respond to specific audience needs and incorporate contextual, spatial, narrative and navigational requirements. They will conceptualize, design, and produce visual representations of qualitative and quantitative information (i.e. 'infographics' and/or data visualizations) to make multi-layered information or complex data more accessible, understandable, and interesting to a viewer.

Level: UG

Prerequisite(s): All of GDMA 2200, 2210, 2222 and 2230

Co-requisite(s): All of GDMA 3110, 3122, 3130 and 3140

Attribute: DESN (p. 521)

**GDMA 3110 3 credits****User Experience and Interface Design 1**

Students will learn the concepts and methods required to design interactive communications such as websites and mobile apps. They will employ user research, client journey maps, wireframes, flowcharts, site maps and prototypes. They will plan and create the information architecture, interaction, and visual design required for digital interfaces that deliver desirable experiences for users.

Level: UG

Prerequisite(s): All GDMA 2200, 2210, 2222 and 2230

Co-requisite(s): All of GDMA 3100, 3122, 3130 and 3140

Attribute: DESN (p. 521)

**GDMA 3122 3 credits****Interactive Software Applications 1**

Students use industry-standard software applications to plan, develop, test, and deploy screen-based visual communications that feature simple user interactivity. They use scanners and digital photography, apply methods of image generation, process and optimize images, and use current mark-up and style sheet languages.

Level: UG

Prerequisite(s): All of GDMA 2200, 2210, 2222 and 2230

Co-requisite(s): All of GDMA 3100, 3110, 3130 and 3140

Attribute: DESN (p. 521)

**GDMA 3130 3 credits****Marketing Communications Design 1**

Students analyze and interpret a client's marketing objectives before formulating concepts, messages and images for marketing communications, such as in-store promotions, advertisements, posters and specialty advertising items.

Level: UG

Prerequisite(s): All of GDMA 2200, 2210, 2222 and 2230

Co-requisite(s): All of GDMA 3100, 3110, 3122 and 3140

Attribute: DESN (p. 521)

**GDMA 3140 3 credits****Interactive Technologies and Society**

Students critically analyze the social and cultural impact of interactive technologies. They examine theories relating to interactivity, human factors, and user-centred design, and apply design research methods to analyses of various types of interactivity. Students will respond to a design problem by developing concepts for a range of interactive experiences to suit a particular social context and target audience, and present and rationalize their design ideas.

Level: UG

Prerequisite(s): All of ENGL 1100 and GDMA 2140

Attribute: DESN (p. 521)

**GDMA 3200 3 credits****Corporate Communications Design 1**

Students formulate, conceptualize and design communications that reflect a corporation's positioning, marketing and public relations goals. They research, analyze and address professional, social, cultural and historical needs and preferences present in typical corporate cultures.

Level: UG

Prerequisite(s): All of GDMA 3100, 3110, 3122, 3130 and 3140

Co-requisite(s): All of GDMA 3210, 3220, 3222, and 3230

Attribute: DESN (p. 521)

**GDMA 3210 3 credits****Packaging Design**

Students learn concepts, theories, principles and strategies for designing packaging. They analyze legal, environmental, social and ethical issues that impact the design of packaging for a variety of clients and products. In addition, students learn to work with regulatory and production requirements, client marketing objectives and budgets, distribution and display requirements, timelines, presentation guidelines, and a range of other factors that directly affect the design and production of three-dimensional packaging.

Level: UG

Prerequisite(s): All of GDMA 3100, 3110, 3122, 3130, and 3140

Co-requisite(s): All of GDMA 3200, 3220, 3222, and 3230

Attribute: DESN (p. 521)

**GDMA 3220 3 credits****User Experience and Interface Design 2**

Students will research, strategize, conceive, develop content, design and produce a screen-based project for a specific audience. They will create an interactive user experience to meet specified marketing communication outcomes. They will learn strategies for meeting business, marketing, and communication goals; allocating resources; evaluating elements of user experience; and applying interactive and web-based design processes to deliver prototypes, templates, and/or style guides.

Level: UG

Prerequisite(s): All of GDMA 3100, 3110, 3122, 3130 and 3140

Co-requisite(s): GDMA 3200, 3210, 3222 and 3230

Attribute: DESN (p. 521)

**GDMA 3222 3 credits****Interactive Software Applications 2**

Students use industry-standard, interactive software applications and services to plan, develop, test, and deploy screen-based interactive experiences. They employ interface design practices, current font technologies, markup and scripting languages, and code libraries and plugins to create dynamic interactive experiences for users of various screen-based devices.

Level: UG

Prerequisite(s): All of GDMA 3100, 3110, 3122, 3130 and 3140

Co-requisite(s): GDMA 3200, 3210, 3220, and 3230

Attribute: DESN (p. 521)

**GDMA 3230 3 credits****Marketing Communications Design 2**

Students analyze and interpret corporate strategies in business-to-business marketing plans. They create communication and design strategies to support marketing plans, and design marketing communications solutions using digital and print media. Students design collateral items such as digital presentations, corporate and operational brochures, product and service brochures, and technical information sheets.

Level: UG

Prerequisite(s): All of GDMA 3100, 3110, 3122, 3130 and 3140

Co-requisite(s): All of GDMA 3200, 3210, 3220, and 3222

Attribute: DESN (p. 521)

**GDMA 4100 3 credits****Corporate Communications Design 2**

Students implement visual identity programs and graphic standards while designing external communications for a corporation. They design annual and quarterly reports, shareholder advisories and promotions, corporate newsletters, advertisements, and public relations communications that are consistent with corporate strategies, objectives, and business and marketing plans.

Level: UG

Prerequisite(s): All of GDMA 3200, 3210, 3220, 3222, and 3230

Co-requisite(s): All of (a) GDMA 4120, (b) GDMA 4130, and (c) MRKT 4177 or MRKT 4201

Attribute: DESN (p. 521)

**GDMA 4120 3 credits****Major Project**

Students will demonstrate their ability to synthesize and apply the skills and knowledge learned throughout the Graphic Design for Marketing program to a major design project identifying a hypothetical client. They will outline research methods and processes to be implemented, and will propose, articulate and rationalize their design and communication strategies. Students will complete a major project incorporating the design and presentation of a significant and substantial body of work.

Level: UG

Prerequisite(s): All of GDMA 3200 and 3210 and 3220, 3222 and 3230

Co-requisite(s): All of GDMA 4100, 4130 and MRKT 4177 or MRKT 4201

Attribute: DESN (p. 521)

**GDMA 4130 3 credits****Small Business Essentials**

Students will learn fundamental business procedures relevant to working as employees, employers, or freelancers in the graphic design profession. Topics include government regulations, business planning and ethics, and administrative procedures for small businesses. They will estimate costs and formulate pricing strategies, prepare proposals, budgets, and schedules, and create components used in the day-to-day management of a design practice

Level: UG

Prerequisite(s): All of GDMA 3200, 3210, 3220, 3222 and 3230

Co-requisite(s): All of (a) GDMA 4100, (b) GDMA 4120, and (C) MRKT 4177 or MRKT 4201

Attribute: DESN (p. 521)

**GDMA 4200 3 credits****Advertising Design**

Students will research and analyze client and end-user needs. They will explore the influence of new mediums on marketing advertising. Using manual and electronic processes, students will develop concepts and design solutions for a variety of media based on marketing plans and strategies. They will create advertising campaigns to be implemented through such communication channels as print and interactive media advertising, sales promotions, events, and direct marketing.

Level: UG

Prerequisite(s): All of (a) GDMA 4100, (b) GDMA 4120, (c) GDMA 4130, and (d) MRKT 4177 or MRKT 4201

Co-requisite(s): All of GDMA 4216, 4221, 4230 and 4240

Attribute: DESN (p. 521)

**GDMA 4216 3 credits****Advanced Typographic Communications**

Students will employ advanced typographic methods and techniques to strategize, conceptualize, design, and produce refined interconnected systems of typographic communications for a variety of purposes. They will focus on requirements such as client and end-user needs, strategic positioning, content meaning and structure, information hierarchy, technical and aesthetic development, and typographic form, selection, and composition.

Level: UG

Prerequisite(s): All of (a) GDMA 4100, (b) GDMA 4120, (c) GDMA 4130, and (d) MRKT 4177 or MRKT 4201

Co-requisite(s): All of GDMA 4200, 4221, 4230 and 4240

Attribute: DESN (p. 521)

**GDMA 4221 3 credits****Strategic Portfolio Development**

Students demonstrate proficiency in marketing communication design through rigorous refinement of previous project work that reflects their preferred areas of employment specialization. They create a marketing strategy that is represented through research and the design, production, documentation, presentation and defense of a comprehensive portfolio of work.

Level: UG

Prerequisite(s): All of (a) GDMA 4100, (b) GDMA 4120, (c) GDMA 4130, and (d) MRKT 4177 or MRKT 4201

Co-requisite(s): All of GDMA 4200, 4216, 4230 and 4240

Attribute: DESN (p. 521)

**GDMA 4230 3 credits****Mentorship for Professional Practice**

Students will learn about procedures, practices, and issues relevant to gaining employment and working in the graphic design profession. They create and design self-promotion materials, prepare an employment search plan, and gain industry experience through a mentorship placement in a professional advertising, design or marketing environment.

Level: UG

Prerequisite(s): All of (a) GDMA 4100, (b) GDMA 4120, (c) GDMA 4130, and (d) MRKT 4177 or MRKT 4201

Co-requisite(s): All of GDMA 4200, 4216, 4221 and 4240

Attribute: DESN (p. 521)

**GDMA 4240 3 credits****Contemporary Issues in Graphic Design**

Students will develop a critical awareness of social, cultural, philosophical, environmental, technological, and professional issues that impact contemporary graphic design practice. They will actively contribute to in-class discussions, interact with guest speakers, and engage in multifaceted research and analysis. Student teams will also develop, produce and lead comprehensive workshops relating to current "hot" topics in design such as cyberspace ethics, "professionalization" of the industry, plagiarism and copyright concerns, speculative work, sustainable graphic design, and 'calls to action' by the design community.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher, including ENGL 1100

Attribute: DESN (p. 521)

## Green Business Management (GRMT)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**GRMT 6100 3 credits****Sustainability and Business Administration**

Students will learn how to integrate, evaluate, report sustainability in organizations. Students will learn specific reporting techniques on sustainability, including but not limited to the Global Reporting Initiative (GRI) and Principles of ISO 14001. This course is also heavy on Corporate Social Responsibility (CSR) policy and programs as they relate to governance and sustainability.

Level: GR

Attributes: BUSI (p. 521), F2A9 (p. 521)

**GRMT 6110 3 credits****Green Marketing Management**

This course will prepare professionals in understanding and applying green marketing concepts in organizations. Green marketing is marketing products and services based on environmental factors or awareness.

Companies involved in green marketing make decisions relating to the entire process of companies' products, from design, methods of processing, packaging and distribution. This course will also help identify global business opportunities. The conceptual opportunities in this course can be applied on the Green Marketing Plan, in Green Project Management course or even the Capstone course.

Level: GR

Attributes: BUSI (p. 521), F2A9 (p. 521)

**GRMT 6120 3 credits****Ecological Economics for Organizations**

This course explores new ways of thinking about how we manage our lives and our planet to achieve a sustainable, equitable, and prosperous future. By the end of the course, students will have an understanding of the integration of "nature's household" and "humankind's household" under ecological economics as well as the trans-disciplinary and inter-disciplinary nature of management analysis. Students should have an applied understanding of the interdependence and co-evolution of human economies and natural ecosystems and natural ecosystems over time and space. The above follows the type of system's thinking that is necessary in organizations and societies all over the world.

Level: GR

Attributes: BUSI (p. 521), F2A9 (p. 521)

**GRMT 6130 3 credits****Principles of Green and Clean Technologies for Business and Society's Sustainability**

This course covers the introduction to physical and technological principles of solar, indirect solar, and non-solar energies with an environmental policy, social and economic backgrounds. This course introduces students to Green and Clean Technologies for business professionals. Introduction to waste management, e-waste, green buildings and water filtration training is also provided in order to ladder into other professional, corporate or on the-job-training as well. Further knowledge of technologies or industry/corporate knowledge applied to specific companies can/should be developed for those interested in the Green Project Management course or Capstone.

Level: GR

Attributes: BUSI (p. 521), F2A9 (p. 521)

**GRMT 6140 3 credits****Sustainable Operations**

This course develops students' ability to define and analyze sustainable business practices within the value chain of the product or service in order to develop and integrate sustainable practices at each step of the value chain. Students will learn how to measure and account for sustainability initiatives as a means of creating value at the operations management level within an organization. Students will be challenged to consider the sustainability challenges from the different stakeholder perspectives and priorities in developing and implementing sustainable operational practices and initiatives. Students will analyze graduate level papers on a variety of current research.

Level: GR

Attributes: BUSI (p. 521), F2A9 (p. 521)

## Health (HEAL)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables/) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**HEAL 1100 3 credits****Mental Wellness and Communication**

Students will explore relevant concepts to promote mental health and wellness from personal, interpersonal, organizational and cultural perspectives. They will discuss adaptive coping related to stress, emotions, and life circumstances for enhanced mental health, motivation and learning. Students will also learn and apply basic therapeutic communication skills essential for healthy personal and professional relationships.

Level: UG

Attributes: ASTR (p. 523), F2A5 (p. 521), HLTH (p. 521)

**HEAL 1150 3 credits****Personal Care Skills: Lab 1**

This is an introductory course for pre-nursing and healthcare assistant students. They will acquire skills for providing personal care to clients aimed at maintaining and promoting the comfort, safety, and independence.

Level: UG

Attributes: F2A5 (p. 521), HLTH (p. 521)

**HEAL 1180 3 credits****Introduction to Health Research**

Students will understand, use and critique health care research. They will learn how to conduct literature reviews, explore various research designs and methods for both qualitative and quantitative research, and critically appraise several research studies. Students will also examine ways to apply research findings to promote evidence informed practice in the health professions. Students will work in class and/or online.

Level: UG

Prerequisite(s): Level D1 as defined in the Math Alternatives Table (p. 779), and ENGL 1100.

Attributes: ASTR (p. 523), F2A5 (p. 521), HLTH (p. 521), QUAN (p. 532)

**HEAL 2110 3 credits****First Nations Health**

Students are introduced to the study of health and well-being of First Nations, Metis and Inuit (FNMI) in Canada. They will learn the history of the First Nations Health Authority and the FNMI need for multifaceted approach to strengthen healthcare outcomes by addressing strategies that consider the social determinants of health. Students will also explore the contemporary and historical concepts of health and challenges to health with special consideration of the ancient cultural principles that strengthen wellness. This course may be offered in class and/or online.

Level: UG

Attributes: ASTR (p. 523), F2A5 (p. 521), HLTH (p. 521)

**HEAL 2150 3 credits****Health Lab Practice 2**

Students will build upon previous lab skills performance. They will practice skills in the lab and simulated setting to prepare them to care for clients in a variety of settings. Students will also learn to manage client scenarios and perform select psychomotor skills with increased complexity using assessment, planning, implementation and evaluation of client care.

Level: UG

Co-requisite(s): Either (a) NRSRG 2145, or (b) PSYN 2110, PSYN 2125, PSYN 2145, and PSYN 2160.

Attributes: F2A5 (p. 521), HLTH (p. 521)

**HEAL 2250 3 credits****Health Lab Practice 3**

Students will build upon previous lab skills to continue to prepare them to care for clients in a variety of settings. They will practice skills in the lab and simulated setting, with a focus on high fidelity simulation, to prepare them to care for multiple clients who experience complex health situations. Students will also learn to manage scenarios with increased complexity.

Level: UG

Prerequisite(s): HEAL 2150

Co-requisite(s): Either (a) NRSRG 3121, NRSRG 3145, NRSRG 3165 and NRSRG 3175, or (b) PSYN 2230 and PSYN 2245.

Attributes: F2A5 (p. 521), HLTH (p. 521)

**HEAL 3101 3 credits****Conceptual Paradigms: A Feminist Perspective**

Students will apply women-centred leadership theories while analyzing how patriarchal and capitalistic values affect health care policy. They will examine the significance of feminist philosophies and their influence on health care. Students will also analyze classroom dynamics and interplay of power and authority structures. This course may be offered in class and/or online.

Level: UG

Prerequisite(s): ENGL 1100, ANTH 2163, HEAL 2110, HEAL 2250, PSYN 2230 and 2245

Co-requisite(s): All of PSYN 3130, 3145, 3146 and PSYC 3920

Attributes: ASTR (p. 523), F2A5 (p. 521), HLTH (p. 521)

**HEAL 3120 6 credits****Evidence Based Practice**

This course addresses decision making processes using evidence based data. This course examines nursing theories and their application with theoretical frameworks. Students will demonstrate acquired competencies to generate the skills and competencies at an intermediate level by successfully completing comprehensive assignments based on the following four areas: theory, integration, reflection, application. This is an online course.

Level: UG

Attributes: F2A5 (p. 521), HLTH (p. 521)

**HEAL 3180 3 credits****Nursing Science 4: Health Research for Evidence Informed Practice**

Students will perform various quantitative and qualitative methods of data analysis so that they can critically examine and incorporate health care research into their practice. Content will include understanding and performing select descriptive and inferential statistics in quantitative research along with text analysis methods in ethnographic, phenomenological, interpretive inquiry and grounded theory qualitative research. Data analysis will be performed using computer assisted methods where possible.

Level: UG

Prerequisite(s): Either a) All of NRSRG 3121, 3145, 3165 and 3175 OR b) All of PSYN 3130 and 3145

Attributes: F2A5 (p. 521), HLTH (p. 521), QUAN (p. 532)

## Health Care Assistant (HCAP)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables/](http://www.kpu.ca/registration/timetables/) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

#### **HCAP 1100 2 credits**

##### **Health 1: Interpersonal Communication**

Students will develop self-awareness, increased understanding of others and effective interpersonal communication skills that can be used in a variety of care-giving contexts. Students will reflect on the impact of their own communication choices and patterns. They will have opportunities to develop and use effective communication techniques and strategies to enhance personal and professional relationships.

Level: VO

Attribute: HLTH (p. 521)

#### **HCAP 1110 3 credits**

##### **Healing 1A: Caring for Individuals Experiencing Common Health Challenges**

Students will identify normal structure and function of the human body and normal bodily changes associated with aging. Students will explore common challenges to health and healing in relation to each body system with aging. Students will also be encouraged to explore person-centred practice as it relates to the common challenges to health.

Level: VO

Attribute: HLTH (p. 521)

#### **HCAP 1121 1 credit**

##### **Health 2: Lifestyle and Choices**

Students are introduced to a holistic concept of health and the components of a health enhancing lifestyle. Students will reflect on their own experiences of health, recognizing challenges and resources that can impact lifestyle choices. Students will be introduced to a model that can be applied in other courses to understand the multi-faceted aspects of health and healing.

Level: VO

Attribute: HLTH (p. 521)

#### **HCAP 1130 3 credits**

##### **Healing 3A: Personal Care Skills**

In the lab setting, students will acquire knowledge and apply skills needed to provide personal care that promotes the physical, psychological, social, cognitive, and spiritual well-being of clients/residents with complex health challenges. They will apply this knowledge in a variety of practice settings. Students will develop caring relationships with individuals and enhance problem solving skills and critical thinking skills in the lab setting which will transfer to the clinical areas.

Level: VO

Attribute: HLTH (p. 521)

#### **HCAP 1136 3 credits**

##### **Health and Healing: Concepts for Practice**

Students will be introduced to the philosophical values and theoretical understandings that provide a foundation for competent practice as a Health Care Assistant. Students focus on concepts of caring and person-centred care; basic human needs and human development; family, culture and diversity as they relate to health and healing. Students will also be introduced to a problem-solving model that will be critical to their practice.

Level: VO

Attribute: HLTH (p. 521)

#### **HCAP 1150 5 credits**

##### **Clinical Practice: Complex Care**

Students will provide care in a variety of clinical settings, under supervision to promote the physical, psychological, social, cognitive and spiritual well-being of clients/residents with complex health challenges. They will gain experience in a complex care setting. Students will develop caring relationships with individuals and enhance their problem solving and critical thinking skills.

Level: VO

Co-requisite(s): HCAP 1130

Attribute: HLTH (p. 521)

#### **HCAP 1210 3 credits**

##### **Healing 1B: Complex Health Challenges**

Students continue to explore the structure and function of the human body focusing on more complex challenges of each body system as associated with aging. Students will also explore person-centred practice as it relates to the complex challenges to health and in particular to end-of-life care.

Level: VO

Prerequisite(s): All of HCAP 1100, 1110, 1121, 1130, 1136 and 1150

Attribute: HLTH (p. 521)

#### **HCAP 1220 4 credits**

##### **Healing 2: Caring for Individuals with Cognitive or Mental Health Challenges**

Students will explore concepts and models applicable to the care of individuals with dementia or mental health challenges as they age. They will identify communication strategies that facilitate providing care. The emphasis in this course is on supporting clients with dementia, recognizing responsive behaviours and identifying person-centred intervention strategies. Students will have a practical experience on an adult special care unit.

Level: VO

Prerequisite(s): All of HCAP 1100, 1110, 1121, 1130, 1136 and 1150

Attribute: HLTH (p. 521)

#### **HCAP 1230 3 credits**

##### **Healing 3B: Advanced Personal Care Skills**

Students acquire advanced personal care and assistance skills within the parameters of the Health Care Assistant role. Students will integrate theory from other courses to develop care-giver skills that maintain and promote the comfort, safety and independence of individuals in community and facility contexts, including acute care.

Level: VO

Prerequisite(s): All HCAP 1100, 1110, 1121, 1130, 1136 and 1150

Attribute: HLTH (p. 521)

#### **HCAP 1236 1 credit**

##### **Intro to Practice**

Students will explore the role of the Health Care Assistant within the British Columbia health care system. Students will identify roles of the interdisciplinary health care team members. They will articulate the role and function of Health Care Assistants within that team. Students will also have opportunities to develop self-reflective skills required for competent practice. They will develop the skills required for effective job-finding approaches.

Level: VO

Prerequisite(s): HCAP 1100, 1110, 1121, 1130, 1136 and 1150

Attribute: HLTH (p. 521)

**HCAP 1250 5 credits****Health Care Assistant: Final Practicum**

Students will consolidate knowledge and skills in preparation for assuming the role and responsibilities of a beginning practitioner. They will provide care to during a full time placement in a Complex Care Facility, Assisted Living and Adult Day Center or Group Home setting.

Level: VO

Prerequisite(s): All of HCAP 1210, 1220, 1230, 1236 and 1260

Attribute: HLTH (p. 521)

**HCAP 1260 1 credit****Technology for Health Care**

Students will develop their skills in the use of computers and the Internet. They will explore the application of technology in healthcare.

Level: VO

Prerequisite(s): All of HCAP 1100, 1110, 1121, 1130, 1136 and 1150

Attribute: HLTH (p. 521)

## Health Sciences (HSCI)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**HSCI 1115 3 credits****Introduction to Health Science**

Students will be introduced to the multifaceted field of health science and the foundations of promoting health and wellness. Students will explore concepts of health, science and health science from a variety of perspectives including biological, clinical, cultural, environmental, political and socioeconomic. Students will be introduced to the variety of health care careers that contribute to the effective delivery of health care and the promotion of health and wellness in the community. Students will learn the benefits of well-organized cross-functional teams in generation of innovation, productivity and effective service.

Level: UG

Prerequisite(s): Level D1 as defined in the Math Alternatives Table (p. 779), and one of the following: (a) English 12 (B), (b) English 12 First Peoples (B), (c) ENGQ 1091 (B), (d) ENGQ 1092 (B), (e) ENGQ 1099 (B) or (f) 3 credits from courses in ENGL at the 1100 level or higher

Attributes: ASTR (p. 523), SCIH (p. 521)

**HSCI 1220 3 credits****Health Science Writing**

Students will learn how to analyze audience and context in order to communicate effectively in the field of health science. They will learn basic research strategies, document conventions, teamwork strategies, health science proposal and report creation, conflict resolution approaches, and health science language usage. Students will develop their written and oral communication skills, as well as critical thinking and research skills. They will learn the principles, theories, techniques, and common formats required for writing and communicating scientific research, proposals, reports, and reviews.

Level: UG

Prerequisite(s): BIOL 1110, ENGL 1100, and HSCI 1115.

Attributes: ASTR (p. 523), SCIH (p. 521)

**HSCI 2220 3 credits****Medical Terminology**

Students will learn the basic Greek and Latin constructs upon which science and medical language is based. Students will learn to identify, articulate, and spell classic nouns, prefixes, and suffixes. They will learn how to translate non-science language into biomedical terminology and how to deconstruct biomedical terminology into clear and accurate non-science language.

Level: UG

Prerequisite(s): ENGL 1100 and one of: BIOL 1110 or BIOL 1160.

Attribute: SCIH (p. 521)

**HSCI 3215 3 credits****Complementary Medicine**

Students will learn to undertake an evidence-based evaluation of complementary, alternative and integrated approaches to medicine. They will examine various modalities that include the full scope of naturopathic modalities, Indigenous philosophies, and body and mind therapies.

Level: UG

Prerequisite(s): 30 credits from courses at the 2000 level or higher, ENGL 1100 (B) or HSCI 2220 (B), and one of: (a) BIOL 1110 and BIOL 1210, or (b) BIOL 1160 and BIOL 1260.

Attribute: SCIH (p. 521)

**HSCI 3225 3 credits****Nutrition**

Students will learn the fundamentals of the macronutrients (i.e., carbohydrates, lipids, and protein), fluids, fiber, alcohol, vitamins, and minerals including their integration, regulation, and roles in promoting health. Students will review nutritional requirements and dietary patterns of healthy individuals throughout the life span, and evidence-based examination of the role of nutrition in the prevention of chronic disease will be discussed. Students will also review topical issues in the field of nutrition will be explored.

Level: UG

Prerequisite(s): BIOL 2421

Attribute: SCIH (p. 521)

**HSCI 4110 3 credits****Health Program Planning and Evaluation**

Students will understand the processes for developing, implementing, and evaluating community or public health programs. Grounded in both theory and practice, students will gain the skills necessary to create change in health behaviour or outcomes by developing both a program and evaluation plan. By the course completion, students will have practiced teamwork skills to accomplish both individual and group objectives. In addition, they will have been exposed to various tools and resources that can enable them to design health programs that will meet diverse stakeholder needs.

Level: UG

Prerequisite(s): 60 credits of courses at the 1100 level or higher, including HSCI 1115 and BIOL 3180

Attribute: SCIH (p. 521)

**HSCI 4140 3 credits****Health and Aging**

Students will review age-related physiological changes and key health issues that occur throughout the adult human life span. Students will also explore interdisciplinary perspectives on human development and the complex interaction of physical, psychosocial, and environmental issues that influence health and well-being. Students will examine factors in healthy aging in relation to the design of the current health care system, major challenges, and capacity- building options. Using personal reflections and community service learning, students will learn through civic engagement.

Level: UG

Prerequisite(s): 90 credits from courses including (a) BIOL 1110 or BIOL 1160, and (b) HSCI 1115 or SOCI 2280

Attribute: SCIH (p. 521)

**HSCI 4245 3 credits****Populations and Policy**

Students will examine the process, outcome and implementation of health policy and will focus on key issues in Canadian federal and British Columbia healthcare systems. They will review key topics that include the organization and financing of health care delivery, the determinants of health, primary care and providers' payment, quality improvement and performance measurement, private health insurance, prevention, and health disparities. Students will study the various participants in the health policy process, the different arenas where health policy is created, and the various policy instruments that are used. Students will compare Canada's health policies with those of other nations with specific attention to the United States and Europe.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including BIOL 3180, HSCI 1115, HSCI 1220, and SOCI 2280.

Attribute: SCIH (p. 521)

**HSCI 4250 3 credits****Health Business**

Students will learn fundamental business principles, survey potential career paths, and acquire professional, intrapreneurial and entrepreneurial knowledge and skills that are in demand in health science. They will learn private and public sector health business models along with relevant regulatory, legal, financial, and market force considerations. Through practical opportunities, students will propose an original health venture idea and realistically assess the potential of their venture idea, and the feasibility of establishing a business.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher

Attribute: SCIH (p. 521)

**HSCI 4380 3 credits****Critical Evaluation**

Students will learn to critically evaluate scientific literature and apply it to evidence-based decision making and best practice principles. They will develop advanced literature search, retrieval, and synthesis skills. Students will examine various types and levels of evidence such as systematic reviews, meta-analyses, and realist syntheses and translate the research findings to evidence-based health care, and informed decision making.

Level: UG

Prerequisite(s): 90 credits from courses at the 1100 level or higher, including BIOL 3180, HSCI 1115, HSCI 1220, and SOCI 2280.

Attributes: ASTR (p. 523), SCIH (p. 521)

**HSCI 4950 3 credits****Senior Seminar**

Students will use primary research literature to study a variety of current and relevant topics in biological and health science research. Students will explore how modern research techniques, research design and data analysis are advancing human health and wellbeing. Seminars will include engaging research article presentations by faculty and students, followed by focused discussion and critique of the presented research. Students with credit for BIOL4900 may not take HSCI 4950 for further credit.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher, including all of the following: HSCI 1220, BIOL 2421 and BIOL 3180.

Credit Exclusion: BIOL 4900

Attribute: SCIH (p. 521)

**HSCI 4990 4 credits****Honours Thesis Project I**

Students registered in the honours option will design and propose a research project that will be conducted in HSCI 4995 under the supervision of a KPU faculty member with expertise relating to the research topic. Students will learn to organize an advisory committee, develop and present a full research proposal for approval, conduct pilot work as needed, obtain ethics approval where relevant, and prepare a knowledge dissemination plan. Students will also review and provide feedback on research proposals of their colleagues. Note: This course is available to Honours Program students only.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher including all of the following: HSCI 1115, HSCI 1220, BIOL 2421, BIOL 3160 and BIOL 3180.

Attribute: SCIH (p. 521)

**HSCI 4995 4 credits****Honours Thesis Project 2**

Honours candidates will perform a research project designed in HSCI 4990. Under the direct supervision of a KPU faculty member, students will apply scientific principles and methodology in a creative hands-on research experience. Upon completion of the research project, students will construct and present a research formal report and presentation. Opportunity will be given for students to disseminate findings of their research project. Note: This course is available to Honours Program students only.

Level: UG

Prerequisite(s): HSCI 4990

Attribute: SCIH (p. 521)

## Health Unit Coordinator (HAUC)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**HAUC 1150 3 credits****Unit Coordinator Role**

Students will explore communicating professionally and accurately with the health care team and how to utilize communication systems in health agencies. They will learn the importance of maintaining accuracy while communicating patient information verbally and in writing. Students will explore confidentiality guidelines and related policies to work as a Unit Coordinator and examine procedures for common emergency codes.

Level: UG

Co-requisite(s): HAUC 1160 and 1190

Attributes: F2A4 (p. 521), HLTH (p. 521)

**HAUC 1160 3 credits****Medical Language Foundations**

Students will learn to identify and define combining forms, suffixes and prefixes of medical terms. Students will learn to recognize, articulate and spell medical terms that describe the anatomy and physiology of each body system. They will identify and decode symbols and abbreviations used in medical language. Students will complete course requirements online or in class.

Level: UG

Co-requisite(s): HAUC 1150 and 1190

Attributes: F2A4 (p. 521), HLTH (p. 521)

**HAUC 1190 2 credits****Clinical 1**

Students will begin to perform the Unit Coordinator role with preceptor supervision. They will apply classroom theory in a clinic setting. The focus will be on development of communication skills and working relationships in a health care environment.

Level: UG

Co-requisite(s): HAUC 1150 and 1160

Attributes: F2A4 (p. 521), HLTH (p. 521)

**HAUC 1250 1 credit****Transition to Role**

Students will prepare to practice their Unit Coordinator skills off site by completing objectives in class, orientation modules online and attend off-site computer training sessions. Students will also complete a resume and interview skills workshop and should expect to complete learning objectives in class, online and off campus. This is a 20 hour preparatory course for the final clinical course.

Level: UG

Prerequisite(s): HAUC 1190

Co-requisite(s): HAUC 1260, 1270, 1280 and 1290

Attributes: F2A4 (p. 521), HLTH (p. 521)

**HAUC 1260 4 credits****Medical Applications**

Students will learn drug administration concepts, processes and protocols for safe transcription of patient medication orders. They will learn the components of a medication order and how to prioritize prescribers orders. Students will identify medications by classification(s), trade and generic names. Students will utilize pharmaceutical resources to ensure accurate transcription and to locate information. They will process medication orders, select and transcribe onto appropriate patient forms and records.

Level: UG

Prerequisite(s): HAUC 1190

Co-requisite(s): HAUC 1250, 1270, 1280 and 1290

Attributes: F2A4 (p. 521), HLTH (p. 521)

**HAUC 1270 4 credits****Diagnostic Applications**

Students will learn to accurately process prescriber's orders for the most commonly ordered diagnostic tests, referrals and consultations using appropriate reference resources. Students will learn to communicate test results with the appropriate personnel and/or departments.

Level: UG

Prerequisite(s): HAUC 1190

Co-requisite(s): HAUC 1250, 1260, 1280 and 1290

Attributes: F2A4 (p. 521), HLTH (p. 521)

**HAUC 1280 3 credits****Specialty Services**

Students will experience the role of the Unit Coordinator in specialty acute care units, interacting with health care teams, clients and families. They will be exposed to the forms, orders and procedures for these environments.

Level: UG

Prerequisite(s): HAUC 1190

Co-requisite(s): HAUC HAUC 1250, 1260, 1270 and 1290

Attributes: F2A4 (p. 521), HLTH (p. 521)

**HAUC 1290 4 credits****Clinical 2**

Students will perform the Unit Coordinator role in a healthcare agency with preceptor supervision. Students will perform tasks accurately and proficiently to master the role and responsibilities of a Unit Coordinator. Upon completion of this course, students will be prepared to function independently in a healthcare setting.

Level: UG

Prerequisite(s): HAUC 1190

Co-requisite(s): HAUC 1250, 1260, 1270 and 1280

Attributes: F2A4 (p. 521), HLTH (p. 521)

## History (HIST)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**HIST 1100 3 credits****Reel History: History through Film**

Students will watch films that portray watershed moments in human history. They will be asked to rethink the relationships between "reality" and "representation", and think critically about "history", film, "fact" and "fiction". Students will be guided in the use of films as ways to understand and critique the stories we tell ourselves about our own past, and the purposes behind our particular versions of our past. This course will focus on skills building through a variety of different assignments such as film reviews and blogs.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_3 (p. 522)

**HIST 1105 3 credits****Changemakers: 12 Little-known Individuals Who Changed the World**

Canadian professor and humourist Stephen Leacock once tried to list everything he remembered from his history classes: "Peter the Great, Alfred the Great, Frederick the Great, John the Great, Tom the Great, Jim the Great, Jo the Great, etc., etc." In this class, we take a different approach: Changemakers is a course about twelve ordinary people who effected positive change, spoke truth to power, innovated radically, or fought for justice against long odds. These are people who accomplished much but whose stories History has quietly forgotten—or actively silenced. Turning away from the Greats, we discover the profound possibilities of viewing history "from below." Along the way, we will seek to shatter stereotypes and bust myths, both historical and contemporary. And we will come to understand the ways in which everyday people have made not only history, but also the world we live in today.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 1113 3 credits****Cultures in Collision: Canada to 1867**

Students will study the political, social, cultural, and economic history of pre-Confederation Canada. They will examine topics such as indigenous relations, imperial rivalries, the impact of wars and rebellions, political reform, and social conflict. Students will gain an understanding of Canada's past, as well as an appreciation of how historical forces have shaped Canadian society today.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 1114 3 credits****Forged in Fire: Canada since 1867**

Students will be introduced to the political, social, cultural, and economic history of post-Confederation Canada. They will examine change and conflict in a variety of areas including government policies, native rights, social welfare, Canadian-American relations, cultural nationalism, women's roles, international affairs, Quebec separatism, labour relations, and multiculturalism. Students will examine a variety of perspectives on each of these topics and will gain an understanding of Canada's past, as well as an appreciation of the role of historical forces in shaping our current society.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 1120 3 credits****The Age of Barbarism: Europe 1900 to 1939**

Students will study the major political, social, economic, and intellectual currents in European history from the beginning of the twentieth century to 1939. They will consider the origins and impact of the First World War and its role in shaping Europe's history after 1918. Students will also examine the impact of the Bolshevik Revolution and of the rise of fascism. They will learn to construct and develop historical arguments and to assess primary and secondary sources.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 1121 3 credits****From Total War & Genocide to Coexistence: Europe since 1939**

Students will examine the major political, social, economic, and intellectual currents in European history from 1939 to the present. They will identify the causes and consequences of the Second World War and the connection between the war and the development of the Cold War. Students will also consider the impact of decolonization, as well as the role of European integration in this era. They will learn to construct and develop historical arguments and to assess primary and secondary sources.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 1125 3 credits****Origins of the Modern West: The Great Transformations**

Students will be introduced to the most significant social, political, economic, and cultural developments that contributed to the making of the modern western world. Beginning with the print revolution and concluding with the revolutions in Russia, students will analyze the origins and implications of the great transformations that shaped the western world between the 15th and the 20th Centuries. They will also consider the global implications of the rise of the West during this era.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 1130 3 credits****Empires in Arms: Twentieth Century World 1900-1945**

Students will examine important global developments in the first half of the twentieth century. They will evaluate the impact of imperialism, the causes and effects of the First World War, the nature of revolutionary movements in China, Japan, and Russia, as well as the global results of the postwar settlement. Students will also analyze the appeal of fascism in Europe and South America, the global impact of the Great Depression, and the factors leading to war in Asia and in Europe.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 1131 3 credits****Atom Bombs to the Internet: Twentieth Century World 1945-2000**

Students will examine some of the major global developments in the latter half of the twentieth century, including the devastating impact of the Second World War, genocide, and the atomic bomb. They will also analyze key issues in the postwar world, including the emergence of a bipolar world and the global impact of the power wielded by the Soviet Union and the United States; the causes and consequences of decolonization and the roots of neo-colonialism; the results of the fall of Soviet-style communism; and the impact of globalization.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 1145 3 credits****Expansion, Revolution, & Civil War: American History 1607-1865**

Students will examine the development of the United States from the colonial era to the Civil War years. They will study the origins of the Thirteen Colonies, the impact of the Revolutionary War, the development of the early Republic, slavery, the origins of the Civil War, and early industrialization. Students will pay special attention to the evolution of American politics, economic and social trends, race relations, and westward expansion.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 1146 3 credits****World Wars, Reform, & Cold War. American History 1865-1974**

Students will examine the major political, economic and social developments in the United States from 1865 to the 1970s. They will study the growth of the United States into a superpower and the accompanying changes in domestic society which have taken place since the Civil War era.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 1150 3 credits****Beyond the Middle Kingdom: Introduction to East Asian History**

Students will examine select themes in the history of East Asia. They will examine major developments in China and Japan to approximately 1600, focusing on religious, social, cultural, economic, and political developments, as well as the interactions among the cultures and states of this region.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 1160 3 credits****A Passage to South Asia: Introduction to South Asian History**

Students will examine major developments in South Asian society, economics, and culture from the beginnings of civilization on the subcontinent, through the development of new political structures under the early and medieval kingdoms, the establishment of the Mughal Empire, and the period of the British Raj. They will also examine the origins and growth of the independence movement and the emergence of post-colonial independent states on the subcontinent.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 1190 3 credits****Explorations in History**

Explorations in History will introduce students to a range of current thematic topics in the discipline. The topic will vary depending on the instructor and the semester. Students will evaluate arguments and their supporting evidence, interrogate sources for bias and reliability, and write persuasively mindful of audience, purpose, and situation. The topics will focus on similarities and differences among peoples and cultures across time and geographic space.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 2101 3 credits****Europe in the Middle Ages**

Students will examine the evolution of medieval society and its institutions from the end of the Roman Empire to the later Middle Ages. They will evaluate the contributions made by the medieval world to the modern era, and will be asked to challenge traditional assumptions about the "Dark Ages". Students will examine and analyze key developments in this time period including the rise of the Frankish Empire, the agricultural revolution, the evolution of the Western Church, the 12th Century Renaissance, and the catastrophes of the 14th Century. They will also evaluate the vital relationship between the West and its neighbours, in particular the Byzantine Empire and the Islamic world, during this era.

Level: UG

Prerequisite(s): Any 6 credits at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 2102 3 credits****Europe 1450 to 1789**

Students will survey the major political, social, economic and cultural trends in European history from the Renaissance to the French Revolution, focusing on some of the key issues which emerged during this period. They evaluate the nature and impact of the eras of Renaissance and Reformation, and will examine the development of Western influence in the world. Students will also focus on the connections between the early modern world and later historical developments.

Level: UG

Prerequisite(s): Any 6 credits at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 2119 3 credits****Europe 1789 to 1914**

Students will examine the revolutionary era which began in France in 1789 and evaluate its political, economic, social, and cultural impact across Europe. They will also study the impact of the Industrial Revolution and the ways in which it rewrote Europe's socio-economic history and created new challenges for its political system. Students will also identify those elements of tradition that transcended the constant upheavals of this period.

Level: UG

Prerequisite(s): Any 6 credits at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 2156 3 credits****Martial Arts of China and Japan**

Students will challenge the portrayal of East Asia martial arts as ancient, timeless, and even mystical, by examining the history of the martial arts. They will examine how military techniques intended for use in war, policing, and the control of banditry came to be practiced as methods of moral, spiritual, and physical self-cultivation. Students will examine the historical origins of martial arts in Japan and China, their evolution over time, and how they both subverted and served stage agendas in the modern era. They will also examine the role of martial arts in popular culture. Note: Students may earn credit for only one of HIST 2156 or ASIA 2156, as they are identical courses.

Level: UG

Prerequisite(s): 6 credits from courses at the 1100 level or higher

Cross-listing: ASIA 2156

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 2300 3 credits****Introduction to World Civilizations**

Students will analyze the rise and fall of some of the major civilizations of the world. They will focus primarily on non-western civilizations including China, Japan, Islam, India, and the civilizations of Africa and the Americas. Students will conclude by examining the rise of Western Civilization and the resultant struggles between tradition and westernization which have become an increasingly prominent feature of the modern world. They will also evaluate the nature and adequacy of terms such as "civilization," "tradition," and "modernity."

Level: UG

Prerequisite(s): 3 credits of HIST or ASIA at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 2301 3 credits****The Ancient World**

Students will survey the major cultures of the Near East, Egypt, Greece, and Rome in antiquity, focusing on the rise of civilizations, the development of social, political, religious, and philosophical systems, and the transmission of culture. They will consider the origin of cities, the rise and fall of empires, the relationship between citizen and state, between religion and politics, and between politics and art. Students will evaluate the contributions these ancient civilizations have made to the modern world, and will learn to evaluate both primary and secondary sources in order to assemble evidence in support of an historically sound argument.

Level: UG

Prerequisite(s): Any 6 credits at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 2302 3 credits****Consuming Passions: A Global History of Food**

Food is perhaps the most basic of all human needs, but how often do we pause to consider the ways in which food has transformed the world around us? In this course, students will focus on key periods in global history, from the Paleolithic era to the post-industrial world, and study the ways in which food and its production have shaped, transformed, and enhanced global development. This course has been designed to encourage students from a variety of disciplines to contribute their knowledge to the class.

Level: UG

Prerequisite(s): 6 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 2303 3 credits****Bleat, Bark, Buzz: Animals in Global History**

Animals are everywhere. Throughout history, humans have lived with them, worked with them, caught diseases from them, worshipped them, consumed them, and bred them into different shapes and sizes. Despite these entangled pasts, animals remain strangely elusive in the study of the history. Do animals have history? This course introduces students to more-than-human history on a global scale, emphasizing the past five centuries. Students will read and produce cutting-edge scholarship as they learn to "think with animals."

Level: UG

Prerequisite(s): 3 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 2304 3 credits****Canadian-American Relations**

Students will examine the major events and themes which have shaped the Canadian-American relationship from the American Revolution to the present. They will identify how this relationship has affected culture and the mass media, trade and investment, resource policies, defence, external affairs, and trade unionism.

Level: UG

Prerequisite(s): Any 6 credits at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 2307 3 credits****Twentieth Century Britain**

Students will thematically examine the socio-political impact of the First World War; the inter-war period and the rise of leftist politics; the trauma of the Great Depression; appeasement and the Second World War; post-war recovery and Britain under the American shadow; the impact of the decline of the British Empire; the social upheaval of the sixties; the gradual swing to the right under Margaret Thatcher; and, the rise of "New Labour". They will conclude this course with an examination of Britain in the new Europe.

Level: UG

Prerequisite(s): Any 6 credits at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 2314 3 credits****Gender and Sexuality in Canada**

Students will examine the shifting roles, experiences, and meanings of gender and sexuality in Canada from its earliest colonial moments to the present day. History 3314 explores how the perceptions of gender and sexuality have changed across time, as well as how these changing concepts have shaped the historical development of northern North America. We will come to understand gender and sexuality as fundamental factors affecting the lived experience of different communities, as well as the construction of various social, political, cultural, and economic structures. In doing so, students will gain critical frameworks for reassessing the gendered dynamics of both the past and present world.

Level: UG

Prerequisite(s): 6 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 2315 3 credits****Canadian Crime in Historical Perspective**

Students will examine the history of crime, criminals, and criminal justice from the 17th to the 21st centuries. They will focus on the way crime has been defined and managed over time and assess how factors such as class, ethnicity, race, religion, and gender have affected criminal justice and the people accused or convicted of crime. Students will gain an understanding of how historical forces have shaped modern Canadian views of crime and its treatment.

Level: UG

Prerequisite(s): Any 6 credits at the 1100-level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 2335 3 credits****War in the Modern World**

Students will analyze the role of warfare in modern history. They will consider the relationship between war and society and the ways in which changes in one area produce changes in the other. Students will examine the "military revolution" of the sixteenth century, and trace the subsequent developments in the evolution of modern warfare up to and including the age of Total War. Students will analyze these developments within a broader global context where appropriate.

Level: UG

Prerequisite(s): Any 6 credits at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 2350 3 credits****Late Imperial China**

Students will examine the history of the late Imperial period in China from the Qing conquest of 1644 to the Boxer Rebellion of 1900 and the fall of the dynasty in 1911. Students will examine the strengths and weaknesses of traditional society from political, economic, social, and cultural perspectives, in order to understand China's resilience in the nineteenth century. Students will also examine the role of key personalities who guided China's various attempts to come to grips with the new challenges of foreign imperialism and internal collapse.

Level: UG

Prerequisite(s): Any 6 credits at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 2351 3 credits****Opium, Alcohol, & Tobacco in Asian History & Culture**

Students will examine the very different ways in which drugs and alcohol have been looked upon over time in different cultural contexts. They will analyze differing interpretations of drugs and alcohol at pivotal moments in Asian history, where arguably, opium, alcohol, and tobacco (among others) have played important economic, geo-political, and social roles, not just as drugs but as strategic resources and cultural 'habits'. Students will also examine the ways in which drugs and alcohol have shaped Asian history, including local and regional economies, social practices, material cultures, imperialisms, and even contemporary governments. Note: Students may earn credit for only one of HIST 2351 or ASIA 2351, as they are identical courses.

Level: UG

Prerequisite(s): 6 credits from courses at the 1100 level or higher

Cross-listing: ASIA 2351

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 2355 3 credits****The Chinese Overseas: A Global History of Chinese Migration**

Students will undertake an analysis of migration in modern Chinese history, with an emphasis on overseas migration. They will be introduced to relevant theories concerning migration, diaspora, and transnationalism before examining and analyzing the development of ethnic Chinese communities abroad over the past two centuries. NOTE: Students may earn credit for only one of HIST 2355 or ASIA 2355, as they are identical courses.

Level: UG

Prerequisite(s): 6 credits in courses at the 1100 level or higher

Cross-listing: ASIA 2355

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 2359 3 credits****Tea in Asia**

Students will explore the rich history, material culture, and practices related to tea in Asia. Beginning as a commodity and drink native to China, tea would eventually come to dominate much of the world. Throughout this course, students will examine the various "ways" and cultures of tea in modern Asia, and how tea has shaped history through economies, social practices, and politics. Students will learn that tea in China, Japan, and India is not just a historical artifact—it is a way of life. From tea plantations to art, commodity chains to literature, tea has become both a national drink and social imperative across Asia. NOTE: This course is cross-listed with ASIA 2359. Students may only receive credit for either ASIA 2359 or HIST 2359.

Level: UG

Prerequisite(s): 6 credits from courses at the 1100 level or higher

Cross-listing: ASIA 2359

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 2365 3 credits****Pathways to Nirvana: Cultural History of Buddhism**

Buddhism is a religion, a philosophy, a ritual system, and a set of cultural practices in play throughout Asia. Students will examine the cultural history of select aspects of Buddhist thought and practice. They will examine philosophy, ritual, and other impacts of Buddhism within Asian culture including its role in politics and its impact on women, diet, and other key aspects of Asian society. Note: Students may earn credit for only one of HIST 2365 or ASIA 2365, as they are identical courses.

Level: UG

Prerequisite(s): 6 credits from courses at the 1100 level or higher

Cross-listing: ASIA 2365

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 2375 3 credits****Japan under the Shoguns, 1600 to 1868**

Students will critically examine the history of Japan during the Tokugawa era (1600 to 1868). They will analyze the creation and structure of the Tokugawa shogunate, as well as Japan's interactions with the West and China during the seventeenth and eighteenth centuries. Students will analyze intellectual, cultural, and economic developments during the long Tokugawa peace, including the emergence of Bushido; Genroku culture and the Floating World; and, the Japanese response to Western imperialism in the mid-nineteenth century.

Level: UG

Prerequisite(s): Any 6 credits at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 2380 3 credits****Global Environmental History**

Students will engage with the intellectual diversity of environmental history, its varied approaches, and its treatment of regions across the globe. They will study key issues such as land use, agriculture, water, fire, forests, grasslands, fisheries, animals, rural, peri-urban, and urban environments, and environmentalism. Students will also investigate environmental science and history, conservationism, environmental historiography, and technology and degradation in a global context.

Level: UG

Prerequisite(s): Any 6 credits at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 3140 3 credits****Environment and Society in East Asia**

Students will critically analyze the interaction between environments and societies in East Asia. They will critically examine environmental history, institutional politics, property rights, and political ecology. Students will analyze the historical background of specific environmental problems, examine the legacies of late imperial, early twentieth, and late twentieth century policies on the use and abuse of natural resources. They will critically examine a broad range of issues including agriculture, forests, wildlife and biodiversity, grasslands, water, and the impact of "mammoth projects". NOTE: Students may earn credit for only one of HIST 3140 or ASIA 3140, as they are identical courses

Level: UG

Prerequisite(s): 27 credits from courses at the 1100 level or higher, including 6 credits from courses in ASIA or HIST.

Cross-listing: ASIA 3140

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 3145 3 credits****Earth & Air / Fire & Water: An Introduction to Eco-Activist Movements**

History 3145 will introduce students to environmentalism and eco-activist movements. Environmental movements are some of the most successful, and controversial, social movements of the last two centuries, and they have helped reshape many aspects of popular culture, academic disciplines and public policy. While this is especially true of North America and Europe, this is also true in the developing world. Students will critically examine the ideologies of some of the founders of "secular" North American environmental movements, including Henry David Thoreau, Aldo Leopold, and John Muir, as well as some of the environmentalist ideas found among many Indigenous groups and in a number of religious traditions. This foundation will then lead to an examination of several key environmentalist social movements around the globe.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 6 credits from courses in HIST

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 3149 3 credits****Hong Kong: Past, Present, and Future**

Students will undertake an in-depth analysis of Hong Kong's history from its days as a remote fishing outpost and pirate haven, through its development as a British-administered trading port and colony, and finally to its emergence as a Pacific Rim economic powerhouse. They will place historical developments in Hong Kong into a broader regional and global context. Students will also critically analyze contemporary issues such as the impact of Hong Kong's liberation from colonial rule, the role of "One Country - Two Systems" in protecting Hong Kong's unique character, the region's economic prospects following the opening of China's economy, and the ongoing struggle for democratic reform. NOTE: Students may earn credit for only one of HIST 3149 or ASIA 3149, as they are identical courses.

Level: UG

Prerequisite(s): 27 credits from courses at the 1100 level or higher, including 6 credits from courses in ASIA or HIST.

Cross-listing: ASIA 3149

Attribute: ARTS (p. 521)

**HIST 3150 3 credits****East Asian Immigrants to North America**

Students will critically analyze East Asian immigration to North America over the past two hundred years. They will also examine settlement experiences in North America, with a particular emphasis on the connections between immigrants and their homelands, interactions among East Asian immigrants and other groups in North America, and the development of ethnic communities. Students will critically examine issues including discrimination and racism, anti-immigrant legislation, the creation of ethnic enclaves, Japanese internment, the struggle for civil and political rights, assimilation and multiculturalism, inter-generational tensions within ethnic communities, transnationalism, and contemporary migration issues. Note: ASIA/HIST 2355 strongly recommended. Note: Students may earn credit for only one of HIST 3150 or ASIA 3150, as they are identical courses.

Level: UG

Prerequisite(s): 27 credits from courses at the 1100 level or higher, including 6 credits from courses in ASIA or HIST

Cross-listing: ASIA 3150

Attribute: ARTS (p. 521)

**HIST 3180 3 credits****North American Environmental History**

Students will critically analyse the ecological, historical, and political diversity of environmental history in North America. They will engage with issues related to land use, agriculture, hydro and wind power, forestry, fisheries, rural-urban development, resource extraction, and environmentalism. Students will investigate and analyse the development of environmental policy, environmental science and technology, issues related to the impact of the Cold War, and environmental degradation in the United States and Canada, and within a global context.

Level: UG

Prerequisite(s): 18 credits at the 1100 level or higher, including either (a)

HIST 2380 or (b) 9 credits from courses in HIST

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 3310 3 credits****The Fibre of Society: Textile Production in Global History**

Students will critically analyze the connection between the production of textiles and global development. They will learn that textile production has created, shaped, and transformed the world in which we live since the Paleolithic era. Students will analyze topics such as the Paleolithic string revolution; textile production in Ancient Egypt, Greece, and China; the role and impact of the Silk Road; and the interconnections among textiles, slavery, colonialism, industrialization, and capitalism.

Level: UG

Prerequisite(s): 60 credits at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 3315 3 credits****Radicalism, Resistance, and Revolution**

Students will critically examine the history of left-wing activism, protest politics, and social movements in Canada and the United States since the 1960s. They will critically analyze a diverse array of topics including case-studies of specific groups such as the Black Panther Party, thematic issues such as the notion of the "long-Sixties," the development of new forms of feminism, transformations in Indigenous activism and the growth of Red Power, and debates over the morality and practicality of political tactics, including sabotage and self-defence. Students will also investigate debates over the definition and nature of different "movements," and probe the complicated relationships that exist among ideology, culture, politics, and identity.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 6 credits from courses in HIST

Attribute: ARTS (p. 521)

**HIST 3327 3 credits****History of Russia to 1917**

Students will critically analyze the major developments in, and the role of individuals who shaped pre-Bolshevik Russia. They will evaluate and analyze political, cultural, and social developments beginning with the rise of Muscovite Russia and the evolution of Russian absolutism, and concluding with an analysis of the last years of Imperial Russia, war, and revolution. Students will focus on the relationship between the autocratic state and Russian society. Students will also be introduced to the historiography of Imperial Russia.

Level: UG

Prerequisite(s): 18 credits at the 1100 level or higher, including 6 credits of HIST

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 3328 3 credits****History of the Soviet Union**

Students will critically analyze the major developments in, and the role of the individuals who shaped Soviet history from 1917 to 1991. They will evaluate and analyze political, cultural, and social developments, including the revolutionary era, the New Economic Policy, Stalinism and its implications, Destalinization under Khrushchev, and the Brezhnev era. Students will critically evaluate the Gorbachev era and analyze the reasons for and implications of the eventual disintegration of the Soviet Union. They will also analyze the ways in which historians have approached the history of the Soviet era.

Level: UG

Prerequisite(s): 18 credits at the 1100 level or higher, including 6 credits of HIST

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 3331 3 credits****Twentieth Century Germany**

Students will analyze the political, economic, social, and cultural development of Germany in the twentieth century. They will critically examine the impact of the First World War on the creation and ultimate failure of the Weimar Republic. Students will also examine the connection between the failure of Weimar and the rise of Adolf Hitler and the National Socialists. They will critically analyze the global impact of the rise of Nazism and of the Holocaust, linking these events to the postwar development in East - West Germany and the events which led to reunification in 1990. Students will also examine and critique important historiographical debates throughout the course.

Level: UG

Prerequisite(s): 18 credits at the 1100 level or higher, including 6 credits of HIST

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 3340 3 credits****The Civil War and Reconstruction**

Students will critically analyze the events leading to the American Civil War, the four years of the conflict, and the subsequent Reconstruction era. They will critically evaluate and analyze the development of the Southern plantation economy versus the industrial North, the growing division between North and South over the issue of the expansion of slavery into the west, the breakdown of the major national parties, the rise of the Republican Party, and secession. They will critically analyze the social, economic, political, and military nature of the war and its effects on race and gender in the United States. Students will also evaluate the impact of the freeing of slaves and the consequences of Reconstruction on American society up to 1877. They will examine and critique the latest scholarship on the Civil War and Reconstruction.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 6 credits from courses in HIST

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 3344 3 credits****Colonial America**

Students will critically analyze the social, cultural, religious, economic, and political development of Colonial America from the time of contact between indigenous peoples and the European explorers and colonizers to the eve of the American Revolution. They will evaluate the growth and nature of the Southern, Middle and New England colonies, the interaction between indigenous, European, and African peoples; and the imperial struggle between the English, French, and Spanish empires in America. Students will examine in detail the diversity of peoples in Colonial America and the formation of an American political culture by the 1760s. They will also analyze the ways in which historians have approached the history of Colonial America.

Level: UG

Prerequisite(s): 18 credits at the 1100 level or higher, including 6 credits of HIST

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 3345 3 credits****History of the American West**

Students will critically analyze the history of the American West, from the time of colonization to the twentieth century. They will critically examine key topics such as the interaction of diverse peoples west of the Mississippi River, the policies of the United States government in directing western settlement, the rise of territorial governments and communities, exploitation of natural resources, the role of women and ethnic minorities in western life, and the significance of the West in the history of the United States as a whole. Students will critically analyze various historical perspectives on the American West throughout the course.

Level: UG

Prerequisite(s): 18 credits at the 1100 level or higher, including 6 credits of HIST

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 3346 3 credits****History of the American Revolution 1760-1791**

Students will examine the various causes and consequences of the American Revolution. They will explore the political, social, economic, and cultural impact that the War for Independence had upon the formation of the United States. Students will develop critical reading and research skills by evaluating the historiography of the American Revolution.

Level: UG

Prerequisite(s): 18 credits at the 1100 level or higher, including 6 credits of HIST

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 3347 3 credits****The United States since 1945**

Students will critically examine the emergence of the United States as a global superpower in 1945. They will analyze the impact of rising national prosperity, coupled with growing tensions with the Soviet Union, and the profound changes which these two factors brought to American society. Students will examine the pressures placed upon an enlarged federal government to expand social programs and civil rights, even as many Americans deplored the growth of the welfare state. Students will undertake an in-depth analysis of the impact of the Cold War on American foreign policy and society, the politics of the social welfare state, the civil rights struggles, the war in Vietnam, cultural trends, Watergate, environmentalism, the neo-conservative revolution, and the challenges of a changing world order since the 1990s. Note: Students may earn credit for only one of HIST 2370 or HIST 4445.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 6 credits from courses in HIST

Credit Exclusion: HIST 2370, HIST 4445

Attribute: ARTS (p. 521)

**HIST 3350 3 credits****China in the Twentieth Century: Reforms and Revolutions**

Students will undertake a critical examination of the history of China from the end of the nineteenth century to the dawn of the twenty-first century. They will critically analyze the sweeping changes experienced by the Chinese, starting with the slow collapse of the traditional imperial order and culminating in China's emergence as an economic powerhouse. Students will critically examine the impacts of imperialism, rebellion, revolution, invasion, civil war, Maoist utopianism, and finally the economic reforms and social upheavals of the post-Mao era.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 6 credits from courses in HIST

Attribute: ARTS (p. 521)

**HIST 3360 3 credits****British India 1857 to 1947**

Students will critically examine developments in Indian society and culture during the period of British Raj, including the establishment and structure of British rule, the origins and growth of the independence movement, the evolution of political institutions, and the emergence of postcolonial independent states on the subcontinent.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 6 credits from courses in HIST

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 3361 3 credits****Indian Subcontinent since 1947**

Students will critically analyze the political, social, and cultural developments since independence in 1947 in the states of the Indian subcontinent: India, Pakistan, and Bangladesh. They will examine developments such as the evolution of nationalism, the construction of political and administrative systems, cultural and social changes, inter-state relations, and major political and economic events and developments to the end of the twentieth century.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 6 credits from courses in HIST

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 3370 3 credits****History of Modern Japan**

Students will critically examine the history of Japan during the late nineteenth and twentieth centuries. They will analyze the impact of the West, the formation of the modern imperial state, social conflict during the Taisho period, the creation of the Japanese empire, the China and Pacific Wars, the Occupation Era, and the structural realignments of the postwar period. In addition to exploring social, cultural, political, and economic changes during this period, students will also critically examine the evolution of Japanese understandings of 'modernity' and 'tradition' and the construction of modern Japanese identity.

Level: UG

Prerequisite(s): 18 credits at the 1100 level or higher, including 6 credits of HIST

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 3385 3 credits****From the Stone Age to the Drone Age: A Global History of Technology & War**

In response to the increasing destructiveness of modern weapons the famous physicist Albert Einstein once noted that while he did not know what weapons would be used to fight World War III, he was certain that World War IV would be fought with sticks and stones! How did humanity come to develop the capacity to destroy civilization and possibly even exterminate the human race? Students in this course will seek out answers to this question by critically examining the symbiotic relationship between war and technology throughout history. We will start by exploring the rise of the first empires and the technology of war in the ancient world, and finish with an examination of how computers and robotics are transforming war in the 21st century. Along the way we will examine how warfare has driven technological development, and how technology in turn has shaped the conduct and outcome of wars.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 6 credits from courses in HIST

Attribute: ARTS (p. 521)

**HIST 3394 3 credits****The Two World Wars**

Students will undertake a critical analysis of the two world wars of the twentieth century from a military, political, economic, and social perspective. Students will critically examine the causes and conduct of the wars, as well as their larger social and economic impacts, on both the local and global fronts.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 6 credits from courses in HIST

Attribute: ARTS (p. 521)

**HIST 3397 3 credits****Guerillas in the Mist: Terrorism in the Modern World**

Students will critically examine the role and impact of guerilla organizations and terrorist groups in the modern world. They will weigh popular claims that terrorist groups accomplish little of substance against the actual achievements of guerilla organizations and terrorist groups in the twentieth century and at present. Students will analyze movements which emerged in such places as China, Japan, the Middle East, Europe, Central and South America, Africa, and Central Asia. They will also critically examine the major theorists of guerilla warfare including Mao Zedong, Vo Nguyen Giap, Carlos Marighella, and Che Guevara and will critically examine the nature and implications of terms such as 'guerilla', 'terrorist', and 'freedom fighter'. Note: HIST 2335 recommended

Level: UG

Prerequisite(s): 18 credits at the 1100 level or higher, including 6 credits of HIST

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 4400 3 credits****Applications of History**

Students will critically evaluate whether the pursuit of an understanding of the past is either a desirable or an attainable objective. They will undertake a critical examination of historical methodology as currently practiced, analyzing key issues such as the nature of historical thinking; the validity of historical research and evidence; the uniqueness of historical analysis; and the significance of competing schools of historical interpretation. Students will also critically analyze why the past is so often the subject of controversy in popular and public culture; the nature of history outside the classroom; and the relationship between popular presentations of the past and scholarly writings about history. Note: This is a seminar-based course.

Level: UG

Prerequisite(s): 45 credits at the 1100 level or higher, including 9 credits of HIST

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 4405 3 credits****Doing Digital History: Apps, Video Games, and the Future of the Past**

Students will critically evaluate and contribute to the fields of digital and public history. Working as a production team in close partnership with the City of Surrey Archives, students will expand the "Global Surrey" history app, a free smartphone application that melds local and global history. Note: This is a seminar-based course. Note: Students may earn credit for only one of HIST 2390 or HIST 4450.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including 9 credits from courses in HIST

Credit Exclusion: HIST 2390

Attribute: ARTS (p. 521)

**HIST 4407 3 credits****British Society and Culture, 1900-2000**

Students will interpret key issues in the development of Britain's social and cultural history through the twentieth century. They will critique the concept of the nation in decline, in light of Britain's continuing cultural contributions. Students will also explore the changing face of social class and the interplay between this and the development of modern British culture—both 'high-' and 'low-brow'. Students will analyze developments as far-ranging as the decline of aristocracy and the emergence of Pop Art in the 1960s, to the emergence of a middle class hegemony and the creation of Margaret Thatcher's "nation of home owners". Note: This is a seminar-based course.

Level: UG

Prerequisite(s): 45 credits at the 1100 level or higher, including 9 credits of HIST

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 4414 3 credits****Race and Ethnicity in Canadian History**

Students will critically analyze the historical evolution of notions of race and ethnicity in Canada. They will pay particular attention to how ideas, social structures, and experiences relating to race and ethnicity have changed across time and geographic space, as they critically examine the relationship between historically-rooted ideas of race and ethnicity, and other variables including class, gender, sexuality, religion, culture, law, and politics. Note: this is a seminar-based course.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including 9 credits from courses in HIST

Attribute: ARTS (p. 521)

**HIST 4420 3 credits****Europe in the "Age of the Dictators"**

Students will undertake an in-depth analysis of European dictatorships from 1918 to 1945. They will examine and critically analyze the phenomenon of dictatorship within its European political, social, economic, and cultural context. Students will focus primarily on the dictatorships of the Soviet Union and Nazi Germany, but other European dictatorships will receive consideration as well. Students will develop a stronger and more sophisticated understanding of European dictatorship through an examination of the extensive and controversial literature that exists on the topic. Note: This is a seminar-based course.

Level: UG

Prerequisite(s): 45 credits at the 1100 level or higher, including 9 credits of HIST

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 4430 3 credits****The Holocaust in History**

Students will critically analyze the origins, causes, progression, and development of the National Socialist campaign against the Jews and the so-called "Undesirables" who found themselves living in Hitler's Europe. They will utilize an interdisciplinary approach to examine and analyze the groups and individuals involved in the Holocaust, including perpetrators, victims, bystanders, resistance fighters, and rescuers. Students will also critically evaluate the meaning, impact, and aftermath of the Holocaust through readings, films, and discussions, paying particular attention to the interrelationships among technology, bureaucracy, and genocide. They will evaluate in-depth the historiographical debates concerning the origins, evolution, impact, and memorialization of the Holocaust. Note: This is a seminar-based course.

Level: UG

Prerequisite(s): 45 credits at the 1100 level or higher, including 9 credits of HIST

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 4450 3 credits****China and the West**

Students will critically analyze the mutually influential relationship between China and the West from early medieval contact through to the end of the twentieth century. They will examine and analyze both sides of this 'Great Encounter' through a combination of chronological and thematic perspectives. Students will investigate myths such as China's supposed backwardness or its reputedly 'monolithic, unchanging, and isolationist' attitudes towards other cultures. They will also apply the same critical perspective to the examination of the West's own periodic bouts of Sinomania and Sinophobia. Note: This is a seminar-based course.

Level: UG

Prerequisite(s): 45 credits at the 1100 level or higher, including 9 credits of HIST

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 4460 3 credits****Gandhi in History**

Students will critically analyze the evolution of Mohandas K. (Mahatma) Gandhi's concept of Satyagraha, or non-violent non-cooperation. They will critically analyze the application of this concept during Gandhi's political activities in South Africa and as the recognized leader of the independence movement in India. Students will also critically evaluate Gandhi's influence on other non-violent, non-cooperative methods of political activism during the Twentieth Century, including the Civil Rights movement in the United States and the anti-apartheid movement in South Africa. Note: This is a seminar-based course.

Level: UG

Prerequisite(s): 45 credits at the 1100 level or higher, including 9 credits of HIST

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 4470 3 credits****Warriors of Japan: The Samurai**

Students will examine and critically analyze the unique history and culture of Japan's samurai warrior class, from its ancient origins to its transformation under the Tokugawa regime and its spiritual reincarnation in modern times. They will also critically examine the construction and transformation of bushido (the way of the warrior) from pre-history to the present. Students will focus on two central themes: the historical reality of the samurai and the construction of samurai mythology both in Japan and abroad. They will analyze the course material through a variety of sources, including primary documents relating to samurai life, the samurai tales of the pre-modern period, and Japanese and foreign cinematic portrayals of the samurai and bushido. Note: This is a seminar-based course.

Level: UG

Prerequisite(s): 45 credits at the 1100 level or higher, including 9 credits of HIST

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 4480 3 credits****The Vietnam War in Historical Perspective**

Students will analyze key issues related to the history of American involvement in Vietnam. They will critically examine topics such as the French role in Indochina and the outcome of the first Indochinese War; the motivations behind American involvement in the region; the nature of the war itself; cultural assumptions underlying the war; the impact of the war both within the United States and in Indochina; the legacy of the war with respect to regional and global history; and the representations of the war in film, literature, music, and monuments. Note: This is a seminar-based course. Note: HIST 1146 strongly recommended.

Level: UG

Prerequisite(s): 45 credits at the 1100 level or higher, including 9 credits of HIST

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 4485 3 credits****The Great Strategists**

Students will critically analyze the evolution of military strategy around the world, its relationship to technology, politics, and culture, and its impact on the conduct of warfare throughout history. They will critically analyze the influence of selected writings by strategists such as Sun Zi, Thucydides, Chinggis Khan, Khalid ibn al-Walid, Napoleon, Carl von Clausewitz, Antoine-Henri Jomini, Alfred Thayer Mahan, Ivan Bloch, Giulio Douhet, Hans Guderian, and Mao Zedong. Students will also critically analyze the concept of "Just War", the role of morality in war, and the writings of influential pacifists and critics of war such as Leo Tolstoy and Aldous Huxley. Note: This is a seminar-based course.

Level: UG

Prerequisite(s): 45 credits at the 1100 level or higher, including 9 credits of HIST

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 4486 3 credits****World War II in the Pacific**

Students will critically examine the history of the Second World War in the Pacific. They will analyze various aspects of the conflict, including the rise of militarism in Japan, the origins of the Sino-Japanese War, the Rape of Nanjing, the attack on Pearl Harbor, the reasons for the early Japanese victories, the Allied counter-offensive, the war at sea, the role of race and propaganda, strategic bombing, the decision to drop the Atomic Bombs, and the aftermath of the war in Asia. Students will also explore the impact of the war on individuals through the critical examination of memoirs from participants on all sides of the conflict. Note: This is a seminar course. Note: Students may earn credit for only one of HIST 3380 or HIST 4486.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 6 credits from courses in HIST

Credit Exclusion: HIST 3380

Attribute: ARTS (p. 521)

**HIST 4490 3 credits****History of British Columbia**

Students will critically examine some of the most significant social, cultural, political, and economic developments in British Columbia's history, including colonization, settlement, ethnic relations, environmental issues, women's roles, government policies, counterculture, and public education. Students will assess the province's past and, through this, gain an understanding of how historical forces have shaped our society. Students will critically analyze B.C.'s distinctive development, guided by the 1870 dictum of Dr. John Sebastian Helmcken, who stated that "British Columbia is in, but not of Canada". Note: This is a seminar-based course.

Level: UG

Prerequisite(s): 45 credits at the 1100 level or higher, including 9 credits of HIST

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 4492 3 credits****Canadian Social History: Order & Disorder**

Students will critically analyze a key element of Canadian social history, namely protest, and the resulting responses by Canadian governments to activities ranging from strikes and riots, to campaigns for free speech, Indigenous rights, gender equality, environmental protection, and treason. They will critically examine the landmark legal cases that have crystallized these issues. Students will evaluate trials to reveal not only a society's practice of adjudication and system of jurisprudence, but also its often hidden beliefs, customs, and cultural values. Note: This is a seminar course. Students may earn credit for only one of HIST 3313 or 4492.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 6 credits from courses in HIST

Credit Exclusion: HIST 3313

Attribute: ARTS (p. 521)

**HIST 4496 3 credits****Canada and World War I**

Students will analyze key issues related to Canada's participation in the First World War. They will critically examine the impact of war on Canada including topics such as propaganda, military leadership, conscription, pacifism, government programs, the suspension of civil liberties, reform movements, and the legacy of the war. Students will critically analyze questions such as whether Billy Bishop was a Canadian hero; whether Canada achieved international recognition and emerged as a distinct nation due to its role in the war; and how the war has been remembered in film, literature, music, and monuments. Students will learn to evaluate both primary and secondary sources in order to assemble evidence in support of a historically sound argument. Note: this is a seminar-based course.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including 9 credits of HIST

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 4497 3 credits****Canada and World War II**

Students will analyze key issues related to Canada's participation in the Second World War including patriotism, morality, leadership, propaganda, state intervention, the suspension of civil liberties, technology, foreign relations, gender roles, and the legacy of the war. Students will focus on the homefront as well as the battlefield. Note: This is a seminar based course.

Level: UG

Prerequisite(s): 45 credits at the 1100 level or higher, including 9 credits of HIST

Attributes: ASTR (p. 523), ARTS (p. 521)

**HIST 4499 3 credits****Selected Topics in History**

Students will engage in the study of a particular issue in the discipline of history. They will critically analyze the topic from a broad variety of perspectives, thereby developing a comprehensive understanding of both the issue itself and the related historiography. Students will critically evaluate a number of methodological approaches, assess the implications of these approaches, and identify their strengths and weaknesses. Note: This is a seminar course. This course may be repeated more than once for credit, to a maximum of 12 credits.

Level: UG

Prerequisite(s): 45 Credits at the 1100 level or higher courses, including 9 credits of HIST

Attribute: ARTS (p. 521)

## Horticulture (HORT)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**HORT 1102 3 credits****Botany for Horticulture**

Students will study the morphology, anatomy, physiology, and sexual reproduction of plants. They will be introduced to the characteristics of major plant families. Students will work with fresh and preserved plant material, and demonstrate different aspects of plant physiology in the laboratory in order to provide an understanding of current horticultural practices.

Level: UG

Attribute: SCIH (p. 521)

**HORT 1104 3 credits****Soils and Growing Media**

Students will study the components and properties of soils and growing media. They will discuss the characteristics of organic matter and biological activity within the soil profile. Students will study how plant growth is affected by soil and growing media properties such as pH, nutrient retention, salinity, and the movement and retention of water. They will examine plant nutrient deficiencies, fertilizer types, and liming recommendations. Students will practice basic soil sampling and testing methods and discuss environmental issues involving soil and growing media practices.

Level: UG

Prerequisite(s): Level G1 as defined in the Math Alternatives Table (p. 779).

Attributes: SCIH (p. 521), QUAN (p. 532)

**HORT 1105 1 credit****BC Pesticide Applicator Certification**

Students will learn how to protect human health and minimize the risks to the environment when selecting and applying pesticides. They will study federal and provincial legislation and municipal bylaws that govern pesticide use in British Columbia. Students will learn how pesticides are registered, classified and labeled for legal use in Canada. They will identify components and calibration of pesticide application equipment and perform related calculations. Students will write the BC Ministry of Environment Pesticide Applicator examination upon course completion. Students must achieve a 1 year BC Provincial Pesticide Applicator Certification to pass this course.

Level: UG

Attributes: SCIH (p. 521), PW\_3 (p. 522)

**HORT 1110 3 credits****Introduction To Sustainable Horticulture**

Students will consider horticulture within a context of social responsibility, exploring the interrelatedness between environment, society, and economy. They will differentiate between conventional and sustainable practices in different horticultural disciplines: greenhouse production, nursery, turf, and landscape. Students will examine the core issues of water use, soil management, energy consumption and waste, air quality/pollution, and land use. They will analyze the underlying topics of population pressure, pollution, urban land planning, crop diversity, genetic modification, and bioproducts/bioprocessing. Students will investigate sustainability within a frame work of the history of agriculture and horticulture, food and amenity systems, and the rise of ecological approaches to cultivation systems.

Level: UG

Attributes: ASTR (p. 523), SCIH (p. 521)

**HORT 1118 3 credits****Basic Machinery Operation and Maintenance**

Students will be introduced to horticulture machinery. They will perform preventative maintenance. Students will safely demonstrate machinery operation. Students will complete a Workplace Hazardous Materials Information System (WHMIS) Certificate.

Level: UG

Attributes: SCIH (p. 521), PW\_3 (p. 522)

**HORT 1124 3 credits****Landscape Gardening Methods**

Students will be introduced to professional landscape gardening. They will explore products, services, equipment, tools, and resources associated with the landscape horticulture industry. Students will study gardening techniques and standards, and will participate in hands-on activities to develop gardening skills.

Level: UG

Attributes: SCIH (p. 521), PW\_3 (p. 522)

**HORT 1132 3 credits****Turf Maintenance Operations**

Students will operate machinery at the School of Horticulture Field Lab to gain practical experience in turf maintenance. They will engage in tasks including mowing, cultivation, topdressing, seeding, sodding, and sand trap maintenance. Students will explore employment opportunities in the turfgrass industry.

Level: UG

Attributes: SCIH (p. 521), PW\_3 (p. 522)

**HORT 1155 3 credits****Introduction To Plant Materials**

Students will practise skills that will enable them to identify a wide range of plants used in all segments of horticulture. They will study the physical characteristics used in field identification of plants. Students will learn to recognize patterns of growth common to plant family and genera. They will perform plant classification for a number of plants.

Level: UG

Attribute: SCIH (p. 521)

**HORT 1193 3 credits****Crop Production Practices**

Students will explore selected principles and practices of horticulture production. They will perform basic seasonal horticultural crop operations in the greenhouse and nursery facilities. Students will maintain and harvest seasonal flower and vegetable crops. They will also identify plant species important in commercial production. Students will attend field trips to horticulture industry operations as an essential part of this course.

Level: UG

Attributes: SCIH (p. 521), PW\_3 (p. 522)

**HORT 1217 3 credits****Foundations of Plant Health**

Students will study the biology of pests (including insects, mites, and vertebrates) to select a combination of biological, cultural, physical, and chemical control methods. They will work with diseases and disorders of plants to demonstrate the spread of disease and the steps of disease diagnosis. Students will examine weed specimens to select appropriate control measures. They will discuss the tenets of integrated pest management and apply them to commercial horticulture situations.

Level: UG

Attributes: SCIH (p. 521), PW\_3 (p. 522)

**HORT 1230 3 credits****Sustainable Turf Management**

Students will study and apply principles for the establishment and maintenance of sustainable turf. They will select and apply fertilizers, compost materials, and other amendments. Students will develop cultural programs for low maintenance lawns, lawns in sustainable landscapes, and organic lawns. They will review and discuss current issues affecting the ecology, function, use, and maintenance of turf in modern society.

Level: UG

Attributes: SCIH (p. 521), PW\_3 (p. 522)

**HORT 1232 3 credits****Sports Turf Management Practices**

Students will explore management techniques for specialized turf areas such as football, rugby and soccer fields, baseball diamonds, bowling greens, and grass tennis and croquet courts. They will examine the management of alternative sports surfaces such as synthetic turf athletic fields, skinned baseball infields, clay and asphalt tennis courts, and hybrid turf and synthetic sports fields. Students will practice sports turf maintenance. They will prepare abstracts from relevant journal articles.

Level: UG

Prerequisite(s): HORT 1230

Cross-listing: HORT 2335

Attribute: SCIH (p. 521)

**HORT 1240 3 credits****Arboriculture I**

Students will study the relationships between plant function, growth, form and structure. They will gain practical experience, as weather permits, in pruning a wide range of trees and shrubs using hand pruning tools, power hedge trimmers, and a chipper.

Level: UG

Prerequisite(s): HORT 1155 or equivalent

Co-requisite(s): HORT 1102

Attribute: SCIH (p. 521)

**HORT 1261 3 credits****Plant Propagation**

Students will discuss the main topics of plant propagation with a view towards sustainable practices. They will perform all aspects of seed propagation including seed storage, seed quality, seed dormancy, and the maintenance of environmental factors affecting seed germination. Students will perform micropropagation in a tissue culture laboratory. They will also perform traditional vegetative propagation (cuttings, grafting, division, layering, and specialized stems and roots) and discuss the proper environment used for each technique. Students will discuss plant breeding and contrast propagation methods used for native plants and plant clones.

Level: UG

Prerequisite(s): HORT 1102 or equivalent

Attribute: SCIH (p. 521)

**HORT 1293 3 credits****Crop Production Operations**

Students will perform and evaluate basic operations in horticulture crop production systems. They will maintain and harvest seasonal greenhouse crops. Students will evaluate the process of crop selection and scheduling. They will also identify plant species important in commercial production. Students will attend field trips to commercial operations as an essential part of this course.

Level: UG

Attributes: SCIH (p. 521), PW\_3 (p. 522)

**HORT 2302 1 credit****Horticulture Work Experience**

Students will engage in paid employment at an instructor-approved landscape, turf or production work setting. They will record workplace activities and insights about their work experiences. Students will document 455 hours of work experience to achieve mastery in this course.

Level: UG

Prerequisite(s): 9 credits from HORT courses at the 1100 level

Attribute: SCIH (p. 521)

**HORT 2306 1 credit****Work Experience Report**

Students will summarize their work experience and insights orally and in writing. They will participate in class discussions.

Level: UG

Co-requisite(s): HORT 2302

Attribute: SCIH (p. 521)

**HORT 2308 3 credits****Landscape Pest Management**

Students will undertake a detailed study of specific pest and disease problems common to ornamental and native trees, shrubs, ground covers, annuals, and turfgrasses, with an emphasis on diagnosis. They will apply knowledge of pest life cycles, site analysis, and customer expectations to make appropriate control recommendations for various scenarios as consultants. Students will practice the use of a variety of pest control application technologies.

Level: UG

Prerequisite(s): All of the following: HORT 1102, 1105, 1155 and 1217.

Attribute: SCIH (p. 521)

**HORT 2327 3 credits****Sustainable Landscape Design I**

Students will learn to document and communicate various aspects of the residential landscape design process. They will study and practice basic drafting techniques and standards for producing residential conceptual and technical landscape drawings. They will measure, document and analyze actual landscape sites for design ideas. Students will create scaled concept and planting plans. They will survey sustainability principles as they apply to urban landscape design.

Level: UG

Prerequisite(s): HORT 1155

Attribute: SCIH (p. 521)

**HORT 2330 3 credits****Turfgrass and Environmental Stress**

Students will examine the effects of environmental stresses (including atmospheric, climatic, soil, and biotic stresses) on turfgrass growth, development, and function. They will discuss and apply management techniques, and will study the development of new techniques.

Level: UG

Prerequisite(s): HORT 1104 and 1230, or all of the following: HRTA 1230, 1231 and 1232.

Attribute: SCIH (p. 521)

**HORT 2332 3 credits****Environmental Turf Management**

Students will explore turfgrass industry environmental issues. They will assess societal positions, conduct site assessments and investigate environmental protection techniques. Students will develop an action plan for the promotion of environmental protection practices on intensely managed turfgrass sites.

Level: UG

Prerequisite(s): HORT 1230 and one of the following: HORT 1132 or 1134. Or equivalent.

Attribute: SCIH (p. 521)

**HORT 2333 3 credits****Turfgrass Pest Management**

Students will undertake a detailed study of the pests and weeds common to turfgrasses, and plants associated with turfgrass areas. They will examine and discuss pest life cycles, plant symptoms, pest prevention and control, and pesticide storage and use. Students will also learn about the importance of integrated weed, pest, and disease management using a variety of methods including Internet resources, diagnostic CD-ROMs, and interaction with pest management colleagues. Students will practice using pest control equipment on outdoor turfgrass.

Level: UG

Prerequisite(s): All of the following: HORT 1105, 1217 and 1230. Or equivalent.

Attribute: SCIH (p. 521)

**HORT 2334 3 credits****Irrigation, Drainage and Lighting**

Students will study the soil-water-plant relationship as it applies to landscape irrigation and drainage within the context of water conservation. They will explore the fundamental concepts of irrigation and drainage system design, installation and maintenance. Students will also practice system installation and maintenance of residential and small-scale irrigation and drainage systems.

Level: UG

Prerequisite(s): Both (a) HORT 1104 and (b) Level G1 as defined in the Math Alternatives Table (p. 779)

Attribute: SCIH (p. 521)

**HORT 2335 2.5 credits****Sports Turf Management Practices**

Students will study and apply management techniques for specialized turf areas such as football, rugby and soccer fields, baseball diamonds, bowling greens, grass tennis and croquet courts. They also examine the management of alternate sports surfaces including synthetic turf athletic fields, skinned baseball infields, clay and asphalt tennis courts, and hybrid turf/synthetic sports fields. Students will practice sports turf maintenance.

Level: UG

Prerequisite(s): HORT 1230 or all of the following: HRTA 1230, 1231 and 1232.

Cross-listing: HORT 1232

Attribute: SCIH (p. 521)

**HORT 2355 3 credits****Plant Materials II**

Students will develop a general knowledge of plant material suitable for use in landscaped areas. They will identify, compare and classify over 200 different plant species hardy in the Pacific Northwest and other Canadian regions. Students will explain the ecological, cultural, morphological and architectural characteristics of plant material used in landscaped or remediated areas. They will begin to recognize the relationships between the ecological and cultural functions of plants.

Level: UG

Prerequisite(s): HORT 1155 or equivalent

Attribute: SCIH (p. 521)

**HORT 2375 3 credits****Production Facilities and Systems**

Students will study the essential elements of greenhouse site selection and site layout. They will analyse the features and benefits of common types of greenhouse structures and covering materials. Students will investigate benching types and layouts, irrigation systems, and greenhouse components. Students will monitor and maintain greenhouse facilities and equipment. Students will also explore related greenhouse systems such as heating, cooling and motorized screens/blankets. Students will investigate mechanization and ergonomics in crop production and describe these aspects following visits to commercial greenhouse operations.

Level: UG

Prerequisite(s): HORT 1193 or 1293

Attribute: SCIH (p. 521)

**HORT 2378 3 credits****Production Horticulture Pests**

Students will study the major pests and diseases (including insects and mites; bacteria, fungi, nematodes, parasitic plants, and viruses) of greenhouse and nursery crops, and mushroom farms. They will learn pest identification in the laboratory and on site by working with live specimens that they have collected. Students will practice monitoring and implementing control methods in crops. They will evaluate integrated pest management programs using a variety of resources.

Level: UG

Prerequisite(s): All of the following: HORT 1102, 1105 and 1217 (or equivalent).

Attribute: SCIH (p. 521)

**HORT 2393 3 credits****Crop Production Performance**

Students will evaluate production practices used in commercial greenhouse crops. They will examine the horticulture crop production industries in BC and Canada. Students will attend field trips to commercial horticulture operations.

Level: UG

Prerequisite(s): All of (a) HORT 1217, (b) HORT 1104 and (c) HORT 1193 or 1293

Attribute: SCIH (p. 521)

**HORT 2412 3 credits****Landscape Estimating and Contract Administration**

Students will learn to prepare, administer and manage contracts and estimates for landscape projects. They will study and practice techniques for writing landscape contracts, and discuss multiple approaches to preparing landscape estimates. Students will summarize insurance, bonds, liens, and explore the relationships between financial, cost and cash flow accounting systems as they relate to the operation and management of a landscape company.

Level: UG

Prerequisite(s): A minimum 6 HORT credits at the 2000 level or higher and one of the following: BUSI 1209, BUSI 1210 or ACCT 1110.

Co-requisite(s): HORT 2426

Attribute: SCIH (p. 521)

**HORT 2426 3 credits****Landscape Construction**

Students will explore both the theory and practice of landscape construction. They will practice the construction and installation of landscape elements such as patios, decks, garden walls, fences, arbors, and water features.

Level: UG

Prerequisite(s): One of the following: HORT 1122, 1124, 1132 or 1134

Attribute: SCIH (p. 521)

**HORT 2427 3 credits****Sustainable Landscape Design II**

Students will explore conventional and sustainable approaches to landscape design challenges associated with residential sites and small scale spaces. They will draft landscape plans using computer assisted software. Students will practice design skills such as client interviews, preparing site inventory and analysis diagrams, and grading sloped sites for level areas. They will assess plant and material choices and design solutions that promote sustainability in landscape design. Students will prepare a portfolio including concept and working drawings such as planting, grading and layout plans, and construction details.

Level: UG

Prerequisite(s): Both (a) HORT 2355 and (b) HORT 2327

Attributes: ASTR (p. 523), SCIH (p. 521)

**HORT 2432 3 credits****Grounds Machinery Maintenance**

Students will perform maintenance on turfgrass machinery used on a golf course or in parks facilities. They will repair and maintain machinery used for turf cultivation, renovation, mowing, spraying, and other types of grounds maintenance. Students will design a layout plan of a mechanics shop and storage facility following environmental and safety guidelines.

Level: UG

Prerequisite(s): (HORT 1118 or HORT 1116) and (HORT 1132 or HORT 1134) and HORT 1230 or equivalent

Attribute: SCIH (p. 521)

**HORT 2436 3 credits****Golf Course Management**

Students will study the operation and management of the golf course in the context of golf as a recreational activity, a competitive activity, and a business. Students will assess the impacts of the rules of golf, the play of the game, environmental stewardship, the organization of the turf care operations, and the organization of the golf business on golf maintenance operations. They will also analyze best management practices.

Level: UG

Prerequisite(s): HORT 2330

Attribute: SCIH (p. 521)

**HORT 2437 3 credits****Golf Course Irrigation Systems, Designs, And Operations**

Students will design, analyze, and maintain golf course and athletic field irrigation systems. They will analyze sprinkler head selection and performance, pumping systems, valves types, controllers, software, and pipe characteristics. Students will discuss issues of water use and water quality. Through laboratory exercises students will perform irrigation audits, calculate water delivery, and schedule irrigation.

Level: UG

Prerequisite(s): HORT 1230 and 2334.

Attribute: SCIH (p. 521)

**HORT 2442 3 credits****Arboriculture II**

Students will evaluate the benefits and processes for preserving urban trees. They will discuss and formulate preventative tree preservation strategies. Students will learn basic tree inventory methods and analyze and practice tree risk assessment and plant diagnosis methods.

Level: UG

Prerequisite(s): Both: (a) HORT 1240 and (b) HORT 1217

Attributes: ASTR (p. 523), SCIH (p. 521)

**HORT 2463 3 credits****Woody Plant Production and Development**

Students will discuss sustainable methods of tree and shrub production in containers and in the field to produce plant structure and form that meet industry standards. They will examine best methods of nutrient application, irrigation, and weed control. They will demonstrate propagation methods and plant maintenance practices.

Level: UG

Prerequisite(s): HORT 1104

Attribute: SCIH (p. 521)

**HORT 2473 3 credits****Greenhouse Climate Control**

Students will study the control of climate factors within a greenhouse including temperature, humidity, air circulation, light, and carbon dioxide. They will monitor and adjust greenhouse climate using various methods, including modern integrated computerized control systems. Students will explore energy management strategies which are critical to sustainability in modern commercial greenhouse operations.

Level: UG

Prerequisite(s): One of the following: HORT 1171, 1193, 1271 or 1293.

Attribute: SCIH (p. 521)

**HORT 2477 3 credits****Production Management**

Students will explore the decisions facing a production manager in a commercial greenhouse or nursery business, including crop selection, scheduling, space, time management, and costing. Students will develop a crop production plan as a major term project.

Level: UG

Prerequisite(s): One of (a) HORT 1193, or (b) HORT 1293, or (c) HORT 2393

Co-requisite(s): Either (a) HORT 2463 or (b) HORT 2493

Attribute: SCIH (p. 521)

**HORT 2490 3 credits****Organic Crop Production**

Students will differentiate between various crop production systems against a background of traditional systems, sustainability, plant breeding and genetic modification (GM) of organisms. They will examine current organic accreditation standards and processes in Canada. Students will investigate crop rotations, describe characteristics of good quality growing media, and describe common organic crop nutrition inputs. Students will develop an integrated pest management (IPM) plan within organic constraints for a specific greenhouse or field crop and investigate the marketing claims of organic food. Students will examine safe food production practices within the context of organic systems. Students will apply studies in each of these areas to a review of a food system model as typified by a school community or municipality.

Level: UG

Prerequisite(s): 6 credits from HORT courses at the 1100 level or higher, or permission of instructor.

Attribute: SCIH (p. 521)

**HORT 2493 3 credits****Crop Production Development**

Students will manage selected greenhouse crops to commercial industry standards. They will research the impact of cultural practices on crop development or investigate potential for new production systems. Students will describe safe food hygiene legislation and practices as related to commercial food production. Students will attend field trips to local greenhouse operations.

Level: UG

Prerequisite(s): HORT 2378 and 2393.

Attribute: SCIH (p. 521)

**HORT 2599 3 credits****Special Topics in Horticulture**

Students will engage in an intensive study of a selected topic in horticulture. They will critically analyze relevant literature and develop a working knowledge of particular theories, methods, practices, and themes. Students will question and evaluate recent developments in the topic area. Note: the specific course content will be established in advance by the department. Students may take this course multiple times for further credit on different topics.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher.

Attribute: SCIH (p. 521)

**HORT 3210 3 credits****Applied Urban Ecosystems**

Students will examine the relationship between people, the urban environment, and green spaces. They will analyze these landscapes for patterns of successful design, biodiversity, and physical connections between urban green patches in the same geographic area. Students will also assess public landscapes for community accessibility and social interaction. They will prepare and present plans which will improve the sustainability and value of urban green spaces.

Level: UG

Prerequisite(s): HORT 1155 and one of the following: 4 credits from BIOL courses or 3 credits from GEOG courses)

Attribute: SCIH (p. 521)

**HORT 3230 3 credits****Urban Watershed Planning**

Students will examine watershed function and analyze water flow through urban areas and urban watersheds. They will study innovative watershed and stormwater management techniques and develop sustainable stormwater management solutions by using Low Impact Development (LID) strategies

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher, including one of the following: (a) HORT 1104, (b) AGRI 2220, (c) ENVI 1121 (d) 4 credits BIOL, or (e) 3 credits GEOG

Attribute: SCIH (p. 521)

**HORT 3250 3 credits****Monitoring, Inventory, and Assessment of Plant Communities**

Students will monitor and inventory plant populations and plant communities to assess levels of biodiversity within urban ecosystems. They will design a monitoring study, implement the study in the field, and analyze the results.

Level: UG

Prerequisite(s): HORT 1155

Attribute: SCIH (p. 521)

**HORT 3251 3 credits****Landscape and Environment 1**

Students will analyze the convergence between principles of sustainable development and landscape conservation in constructed landscapes. They will perform a site assessment of features, site conditions, and existing plant material. Students will determine the criteria appropriate for analyzing and rating the sustainability of landscape development.

Level: UG

Prerequisite(s): 45 credits or permission from the instructor

Attribute: SCIH (p. 521)

**HORT 3270 3 credits****Urban Agriculture**

Students will review the history, scope, and current application of urban agriculture. They will compare the production requirements and techniques for a variety of urban agriculture production models. Students will assess the impacts of urban agriculture on social, economic and environmental sustainability of communities.

Level: UG

Prerequisite(s): 9 credits from courses at the 2000-level

Attribute: SCIH (p. 521)

**HORT 3310 3 credits****Entomology**

Students will study the relationship of arthropods to humans and human activities. They will study arthropod morphology, anatomy, physiology, development, classification, nomenclature, and identification. Students will analyze pest scenarios, and national and international quarantine concerns. They will work with live and preserved specimens in the laboratory and field, and will investigate aspects of arthropod physiology and behaviour in the laboratory. Students will prepare an arthropod collection of preserved and pinned specimens and are encouraged to begin the collection prior to the start of course.

Level: UG

Prerequisite(s): 45 credits or permission from the instructor

Attribute: SCIH (p. 521)

**HORT 3320 3 credits****Plant Pathology**

Students will work with fresh and preserved specimens to recognize and diagnose plant diseases using a variety of laboratory tools and resources. Students will examine different types of plant parasitism in a variety of situations to evaluate appropriate control strategies. They will measure disease and predict the effects of various control tactics on disease progress and spread. Students will examine current horticultural practices to recommend strategies that reduce losses. They will examine plant protection legislation and apply it to current plant health issues.

Level: UG

Prerequisite(s): 45 credits or permission from the instructor

Attribute: SCIH (p. 521)

**HORT 3330 3 credits****Biological Control in Pest Management**

Students will examine the biology, population ecology, reproduction strategies, life cycles, and commercialization of biological control agents. They will demonstrate the mechanisms of biological control using arthropod, fungal, viral, nematode, and bacterial biological control agents. Students will apply biological control agents in various agriculture settings and monitor their establishment and success. They will evaluate existing quality control standards for guarantee, viability, and efficacy. Students will investigate the development, production, and marketing biological control agents. They will work with regulatory agencies and commercial rearing and fermentation facilities.

Level: UG

Prerequisite(s): 45 credits or permission from the instructor

Attribute: SCIH (p. 521)

**HORT 3360 3 credits****Scouting, Monitoring, and Assessment of Pests**

Students will utilize the current technologies and techniques to monitor populations of pests (vertebrates, arthropods, disease agents, and weeds) and beneficial organisms. They will analyze data and produce reports that delineate pest introduction, infestation, and spread. Students will monitor field crops, inspect plant shipments, and in conjunction with pest management professionals, they will apply appropriate regulations. Students will model pest population changes using monitoring data, geographic information systems (GIS) data, meteorological data, and other relevant data.

Level: UG

Prerequisite(s): HORT 3310 and MATH 1115

Attribute: SCIH (p. 521)

**HORT 4231 3 credits****Riparian Management**

Students will discuss the functions of waterways and wetlands. Students will assess the design and management strategies used for riparian habitats and areas adjacent to these waterways. They will restore waterways, riparian areas, and wetlands including the installation of natural water filtration and waterway bank stabilization systems. The student will evaluate filtration and stabilization installations for ecosystem function as well as erosion control, slope maintenance requirements, and public safety.

Level: UG

Prerequisite(s): HORT 1104 or AGRI 2220

Attribute: SCIH (p. 521)

**HORT 4252 3 credits****Landscape and the Environment: Applications**

Students will examine the nature of the interface between social and ecological systems. They will analyze the impact of community land use and climate change on the function and integrity of ecosystems, with a focus on the design of urban landscapes. Students will evaluate the flows of material and energy among social, ecological, and industrial components of the urban landscape. They will formulate recommendations that lead to ecosystem integrity and congruence in the dynamic balance of the planning, design, and construction of urban landscapes.

Level: UG

Prerequisite(s): 45 credits of undergraduate level courses

Attribute: SCIH (p. 521)

**HORT 4253 3 credits****Urban Ecology**

Students will compare selected frameworks, models, and theories related to urban ecology. They will evaluate urban ecological research in the study of relationships between humans, their built environment, and biophysical processes. Students will communicate effectively with specific audiences regarding urban ecology and innovations for healthy and desirable urban landscapes.

Level: UG

Prerequisite(s): 45 credits or permission from the instructor

Attribute: SCIH (p. 521)

**HORT 4340 3 credits****Pest Management**

Students will examine the control of a variety of pests using cultural, behavioural, biological, physical, mechanical, chemical, genetic, and legal means in diverse horticultural settings. They will discuss the ramifications of control measures from social, economic, environmental, political, and sustainable perspectives. Students will work with infested plants to study the effects of control tactics on pest populations, as well as the relationship between plant injury and damage. They will apply models of pest and disease population spread in a variety of situations. Students will develop integrated management strategies for horticultural commodities with consideration of provincial, federal, and international policies.

Level: UG

Prerequisite(s): HORT 3310, 3320, 3330 and 3360.

Attribute: SCIH (p. 521)

**HORT 4350 3 credits****Environmental Effects of Plant Health Management**

Students will study the effects of plant health practices on the environment. They will assess the impacts of plant health management tactics in a variety of settings. Students will formulate plant health strategies that mitigate environmental impacts; consider population dynamics, pesticide resistance, pest evolution, habitat biodiversity and preservation. They will compile and evaluate case studies that examine the impacts of a plant health management problem.

Level: UG

Prerequisite(s): HORT 3360 and one of the following: CHEM 1110 or ENVI 1106.

Attribute: SCIH (p. 521)

**HORT 4370 3 credits****National and Global Regulatory Issues**

Students will study the international movement of potentially destructive plant pests from a global perspective. They will select case studies that focus on the implications of pest movement via waterways, air, and road transportation. Students will also study Canadian legislative, regulation, and certification requirements, as well as regulations for countries that import or export plant material to and from Canada. They will present and discuss innovative methods used to manage or eradicate pests.

Level: UG

Prerequisite(s): 6 credits from HORT courses at the 3000 level.

Attribute: SCIH (p. 521)

**HORT 4440 3 credits****Vegetation Management**

Students will assess the natural history of plants considered to be weeds; and the economic, social, and environmental impacts of managing weeds. They will examine and choose vegetation management strategies for sites such as public green spaces, built landscapes, commercial horticulture operations, water features, and rights-of-way. Students will debate issues such as escaped, genetically modified plants and plant management regulations.

Level: UG

Prerequisite(s): 45 credits or permission from the instructor

Attribute: SCIH (p. 521)

**HORT 4480 3 credits****Society and Horticulture**

Students will analyze the social, economic, and ecological effects of horticulture from historical and contemporary perspectives. They will evaluate the implications for the sustainability of the natural resource base, and for present and future levels of production and consumption. Students will analyze issues and divergent intellectual traditions affecting sustainable horticulture. They will formulate horticultural solutions for social, environmental, and economic justice.

Level: UG

Prerequisite(s): 45 credits or permission from the instructor

Attribute: SCIH (p. 521)

**HORT 4599 3 credits****Special Topics in Horticulture**

Students will engage in an advanced study of a selected topic in horticulture. They will critically analyze relevant literature and develop a working knowledge of particular theories, methods, practices, and themes. Students will question and evaluate recent developments in the topic area. Note: the specific course content will be established in advance by the department. Students may take this course multiple times for further credit on different topics.

Level: UG

Prerequisite(s): 18 credits from courses at the 2000 level or higher

Attribute: SCIH (p. 521)

**HORT 4810 3 credits****Applied Research Project 1 Horticulture**

Students will design and prepare an applied research plan. They will prepare a budget and prepare a phased implementation plan for their research project. Students will prepare funding proposals. They will prepare and present an evaluation of the cost structure and a final budget. Students will seek a mentor's guidance to help consolidate previous learning and to help advance and broaden their understanding of the business ramifications of their research.

Level: UG

Prerequisite(s): ENGL 1100 and approval of instructor

Attribute: SCIH (p. 521)

**HORT 4820 3 credits****Applied Research Project 2**

Students will undertake the applied research project developed in Hort 4810 Applied Research Project 1. They will reflect on the applied research outcomes needed to generate solutions to problems and identify direction for future investigation.

Level: UG

Prerequisite(s): HORT 4810

Attribute: SCIH (p. 521)

## Human Resources Management (HRMT)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**HRMT 3105 3 credits****Human Resources Information Systems and Data**

Students will study the concepts of selecting, managing and leveraging the applications of Human Resource Information technologies to support the delivery of efficient and effective HR services. Students will also develop an understanding of the role and importance of HR analytics by being introduced to the concepts and the business application of human resources data, metrics, analyses and reporting techniques to support HR decision-making. Students will apply the course concepts to develop their knowledge and skills through the use of exercises and projects involving cases or simulated organizational situations. Note: MS Excel proficiency is recommended prior to enrolling in this course.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including BUSI 2405

Attribute: BUSI (p. 521)

**HRMT 3115 3 credits****Human Relations in Organizations**

Students will demonstrate understanding and apply key concepts of human behaviour in organizations, with in-depth focus on the phenomena of communication, leadership, decisionmaking, conflict and change at the individual, group, and organizational levels. They will further their development of interpersonal skills that contribute to effective functioning in organizational settings. Students will assess their human relations strengths and weaknesses and identify opportunities to substantively increase individual contribution to the organization and achieve higher levels of personal fulfillment in their careers and lives. Note: BUSI 1250 is a recommended elective prior to enrolling in this course.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including BUSI 1215

Attribute: BUSI (p. 521)

**HRMT 3125 3 credits****Employment Law**

Students will research, review and apply the applicable statute and common law regulating the employment relationship, including employment agreements, the duties of the employer and employee, and termination of the relationship, including the law of wrongful dismissal. Students will also address the statutory schemes which affect the employment relationship including the Employment Standards Act, and attention will also be paid to Human Rights legislation including the Duty to Accommodate. Students will also investigate emerging privacy law issues. Note: BUSI 1250 is a recommended elective prior to enrolling in this course.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including ENGL 1100 and BUSI 2390

Co-requisite(s): CMNS 3000 or ENTR 3000

Attribute: BUSI (p. 521)

**HRMT 3135 3 credits****Recruitment and Selection**

Students will use the most up-to-date aspects of the current issues and methodologies used in recruiting and selecting employees for organizations as essential components of strategic human resources planning, with an emphasis on their strategic role in enhancing organizational performance. They will deal with contemporary developments and their practical applications related to organization and job analysis, competencies and performance management, employee recruitment, screening and selection, testing, interviewing and related decision making. Note: BUSI 1250 is a recommended elective prior to enrolling in this course.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including ENGL 1100 and BUSI 1215

Attribute: BUSI (p. 521)

**HRMT 3145 3 credits****Occupational Health and Safety**

Students will work as a member of a team to identify strategic organizational practices for Occupational Health and Safety consistent with the organization's strategy; improve occupational health and safety practices through the assessment of education and communication needs and the provision of appropriate programs; and analyze program effectiveness and track accident reports and health outcomes based on information and data from a Human Resource Information System.

Level: UG

Prerequisite(s): HRMT 3115, HRMT 3125 and HRMT 3105

Attribute: BUSI (p. 521)

**HRMT 3255 3 credits****Total Compensation**

Students will evaluate and implement a road map to evolving compensation strategy and design. They will use the process a Human Resource practitioner follows in order to put together an effective compensation program according to current best practices, focusing on performance based approaches to compensation that help create programs that support an organization's broad-based strategic needs. Students will review the most advanced thinking in job analysis, job evaluation, compensation surveys, contingency-based compensation plans, executive compensation packages, productivity measurements and the use of technology in managing compensation programs in the course. Note: MS Excel proficiency is recommended prior to enrolling in this course.

Level: UG

Prerequisite(s): All of: (a) HRMT 3115, (b) HRMT 3135 and (c) ENTR 3120 or ACCT 3380 or ENTR 3170

Co-requisite(s): HRMT 3105

Attribute: BUSI (p. 521)

**HRMT 3265 3 credits****Employee Development and Coaching**

Students will use best professional practices focusing on the management of training and development as a critical investment in an organization's human resources capital. They will demonstrate processes centered around the roles and responsibilities of Human Resource Development professionals, a model of training, the importance of needs analysis, strategic goal setting, program design, on and off-the-job training methodologies, transfer of training, training evaluation and costing, the diversity of training programs, as well as the management development process. Students will also utilize coaching techniques as a powerful intervention to enhance organizational results by influencing the way people think and work together.

Level: UG

Prerequisite(s): HRMT 3115 and HRMT 3135

Attribute: BUSI (p. 521)

**HRMT 4115 3 credits****Labour Relations**

Students will practice the application of collective agreement language in an organizational setting through a series of grievance cases covering all aspects of a collective agreement. Students will use grievance decisions to prepare proposals for negotiations using collective agreement language, and will confront issues surrounding labour disruptions and the application of Labour Relations legislation.

Level: UG

Prerequisite(s): HRMT 3145 and HRMT 3255

Attribute: BUSI (p. 521)

**HRMT 4125 3 credits****Organizational Development**

Students will research, review and present key findings on best practices related to a variety of key organization development concepts, such as: the process of organization development; human process interventions; techno-structural interventions; human resources management intervention; strategic interventions and special applications of organization development, including corporate coaching

Level: UG

Prerequisite(s): All of: (a) HRMT 3265 and (b) ENTR 3100 or ENTR 3150 or ECON 3150 or ECON 2350

Attribute: BUSI (p. 521)

**HRMT 4500 6 credits****Strategic Human Resources Management**

Students will manage, design, prepare and present a comprehensive Human Resource Management project that will meet the requirements of a client organization. Students will synthesize developmental, leadership and application experiences to analyze factors internal and external to an organization and provide strategic recommendations based on an organization's human capital; develop strategic human resource plans in concert with the organization's strategic plan; and implement plans to address gaps in an organization's capabilities in order to carry out strategic plans. They will also design strategic staffing processes to maintain organizational effectiveness, analyze trends in the organization's environment and develop appropriate Human Resources responses. Note: HRMT 4125 is recommended prior to enrolling in this course.

Level: UG

Prerequisite(s): HRMT 3125, HRMT 3135, HRMT 3145, HRMT 3255 and HRMT 3265

Co-requisite(s): HRMT 4115 and HRMT 4125

Attribute: BUSI (p. 521)

## Indigenous Studies (INDG)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**INDG 1100 3 credits****Introduction to Indigenous Studies**

Students will learn about the histories, cultures, and contemporary situation of Indigenous peoples in North America, with special attention to Indigenous peoples in Canada. They will explore pre-contact histories and cultures, and critically examine and challenge assumptions acquired from colonial culture. Students will develop informed views on Indigenous cultures and histories. Students will be exposed to elements of Indigenous teachings and traditional knowledge from various Indigenous perspectives, including those of Elders and local communities.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**INDG 3155 3 credits****Indigenous Perspectives on Settler Colonial Societies**

Students will explore Indigenous perspectives on settler colonial societies and the consequences of ongoing colonial occupation for Indigenous nations. Students will draw upon critical Indigenous studies scholarship, Indigenous traditional knowledge, narrative accounts and oral histories. Students will explore the misattribution and denial of Indigenous contributions to human social development and analyze strategies for decolonization, Indigenization, and self-determination.

Note: Students may earn credit for only one of SOCI 3155 and INDG 3155 as they are identical courses.

Level: UG

Prerequisite(s): 30 credits at the 1100 level or higher including SOCI 1125 or INDG 1100

Cross-listing: SOCI 3155

Attribute: ARTS (p. 521)

**INDG 4245 3 credits****Indigenous Activism**

Students will examine historical and contemporary Indigenous activism in the Americas. They will critically assess government and corporate intrusion on Indigenous rights and lands, and Indigenous people's collective resistance and attempts to protect inherent rights and lands. Students will study Indigenous mobilization, political organization, self-determination, resurgence, and regeneration of communities and cultures. They will examine collective strategies and tactics, specific examples of struggle, visions of social alternatives (anti-capitalist, anti-statist, anti-colonial, etc.), and community social relations. Note: Students may earn credit for only one of CRIM 4245 and INDG 4245 as they are identical courses.

Level: UG

Prerequisite(s): 45 credits at the 1100 or higher, including 6 credits of ENGL at the 1100 level or higher

Cross-listing: CRIM 4245

Attribute: ARTS (p. 521)

## Information Technology (INFO)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables/) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**INFO 1111 3 credits****Introduction to Computer Hardware and Software**

Students will learn general computer hardware and software concepts. They will study the general architecture of the computer and examine hardware components such as microprocessors, memory, motherboards, expansion buses, power supplies, hard disk drives, removable media, peripherals, input/output devices, video, audio, and network interface cards. They will compare differences between hardware used in enterprise, personal and mobile computing devices. Students will also study the functions of operating systems and device drivers and will be provided an overview of popular application software.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521), PW\_2 (p. 522)

**INFO 1112 3 credits****Principles of Program Structure and Design I**

Students will learn the fundamental logic and structure of computer programs. They will develop skills in different aspects of the problem-solving and programming process including analyzing requirements, designing solutions, coding, testing and writing documentation with emphasis on structured programming and modular design techniques. Students will be required to design and implement a software application.

Level: UG

Prerequisite(s): Level E1 as defined in the Math Alternatives Table (p. 779)

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 1113 3 credits****Systems Analysis and Design**

Students will study current strategies, methodologies and techniques of systems analysis and design with an emphasis on the role of systems analysts in an organization and collaboration within the overall process. Students will learn how to elicit general information system requirements, perform object-oriented system analysis and design, and generate user documentations. Students working in groups will analyze and design small information systems using object-oriented methodology. Students will examine from an ethical perspective issues specific to information technology professionals, such as intellectual property, access, security and protection of private information, and codes of conduct.

Level: UG

Prerequisite(s): Level E1 as defined in the Math Alternatives Table (p. 779)

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 1211 3 credits****Operating Systems Principles And Applications**

Students will learn the fundamentals of operating systems and system utilities. They will study principles such as operating system architecture, input/output systems, file systems, process management and thread management. Students will work with multi-user, multi-tasking operating systems such as Windows, UNIX and Linux.

Level: UG

Prerequisite(s): INFO 1111 and Level E1 as defined in the Math Alternatives Table (p. 779).

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 1212 3 credits****Networking Technologies I**

Students will learn the fundamental architecture, functions and components of computer networks. They will build local area networks with routers and switches and implement Internet Protocol (IP) addressing schemes.

Level: UG

Prerequisite(s): INFO 1111 and Level E1 as defined in the Math Alternatives Table (p. 779)

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 1213 3 credits****Web Application Development**

Students will learn the operating principles of the World Wide Web and its relationship with the Internet. They will learn the client-server model, Internet protocols, domain names and URLs, websites and Web hosting. They will also learn HTML, CSS, JavaScript and XML. Students will program both in client and server-side environments and develop data-driven Web applications. They will also learn to deploy applications on web hosting servers.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 1214 3 credits****Discrete Mathematics for Information Technology**

Students will learn the basic mathematical concepts which form the foundations of computing systems. They will be able to apply mathematical logic and methods to software development. They will learn the principles and applications of discrete mathematics, data organization and data representation.

Level: UG

Prerequisite(s): Level E1 as defined in the Math Alternatives Table (p. 779).

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 2311 3 credits****Networking Technologies II**

Students will learn the operation details of routers and switches in small to medium size computer networks. They will acquire skills for configuring and troubleshooting routers and switches. They will also develop skills in resolving common issues which exist when routing between different protocols.

Level: UG

Prerequisite(s): INFO 1212

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 2312 3 credits****Database Management Systems**

Students will learn the concepts and theory of database models, with particular emphasis on the relational model. They will learn and practice database designs utilizing Entity-Relationship Modeling, functional dependencies, and database table normalization. Students will learn Structured Query Language (SQL) and use SQL statements to design, query and maintain databases.

Level: UG

Prerequisite(s): INFO 1112 and INFO 1113

Attribute: BUSI (p. 521)

**INFO 2313 3 credits****Object-Oriented Programming**

Students will learn the principles and concepts of object-oriented programming. They will learn class definition, objects, object interaction, inheritance, polymorphism, interface, abstract classes, and exception handling. They will also learn event-driven programming and object-oriented analysis and design.

Level: UG

Prerequisite(s): INFO 1112

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 2315 3 credits****Data Structure**

Students will learn the data structures and associated algorithms commonly used in system development. They will learn Application of Linked Lists, Stacks, Queues, Binary Trees, Balanced Trees, Searching of Trees, Lists, Inverted Lists, Multi-lists and Graphs. These are the fundamental tools available for contemporary programming languages for implementation of complex algorithms.

Level: UG

Prerequisite(s): INFO 2313

Cross-listing: CPSC 2302

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 2411 3 credits****Foundations of Computer Security**

Students will learn fundamental concepts, theories, methodologies and techniques of computer and network security. Students will gain an understanding of the importance of security within and between organizations, including the ongoing threats and vulnerabilities on networks. In this course the significance of being ethical is emphasized. It covers the aspects of systems security from the perspective of providing security mechanisms for protecting networks. Students will learn several software tools and techniques related to computer security using mechanisms such as cryptographic systems, authentication and access control methods. Different types of network and computer attacks are studied. Tools to discover network designs, functionality, resources and vulnerabilities are introduced.

Level: UG

Prerequisite(s): INFO 1112 and INFO 1212

Attribute: BUSI (p. 521)

**INFO 2412 3 credits****Management of Information Systems**

Students will learn information system management in the global economy. They will learn how to plan information systems and design corporate information technology architectures. Students will also learn how to manage corporate information resources and how to select technologies for developing effective information systems. They will be introduced to issues in managing systems that support knowledge-based work and managing information system security.

Level: UG

Prerequisite(s): INFO 1113

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 2413 3 credits****System Development Project**

Students will work on real-world computer information system projects on a team basis. They will integrate computer and system concepts learned in the first two years of the program to analyze project requirements, design and implement a software based information system using appropriate tools.

Level: UG

Prerequisite(s): All of (a) INFO 2312 (b) INFO 2313 and (c) 15 credits from courses in INFO at the 1100 level or higher

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 2416 3 credits****Server Operating Systems**

Students will learn the principles, techniques and strategies used in planning, installing, testing, and administering a server operating system. Students will learn to create and manage user accounts using Active Directory, and to install and configure server roles including Dynamic Host Configuration Protocol (DHCP), Domain Name System (DNS), printer server, Internet Information Services (IIS), and Virtual Private Network (VPN). Students will be required to plan, design, and install an application server to simulate real-world scenarios. Students will have hands-on experience in installing, troubleshooting, fine-tuning, and administering a server operating system.

Level: UG

Prerequisite(s): INFO 1211 and INFO 1212

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 3110 3 credits****Professional Communications in Information Technology**

Students will address the activities and techniques for developing proposals, specifications, user guides, reports, memoranda, executive summaries and other documentation commonly used in information technology. Students will present a variety of individual and group written and oral communication assignments, reflecting current Information Systems models.

Level: UG

Prerequisite(s): All of (a) CMNS 1140 (b) ENGL 1100 and (c) 9 credits from courses in INFO at the 2000 level or higher

Attribute: BUSI (p. 521)

**INFO 3120 3 credits****Web Programming with Java**

Students will learn the syntax, resources and utilities package of Java related to web applications. Students will also examine web design principles, apply their knowledge to construct web components, including Java Server Pages (JSP), Servlets and JavaBeans for both Internet and Intranet environments, and implement dynamic web applications using a Java web server and a relational database management system.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher, or permission of the instructor.

Attribute: BUSI (p. 521)

**INFO 3135 3 credits****Advanced Web Application Development**

Students will learn PHP and MySQL and use them to develop dynamic, secure and commercially usable websites. They will learn the basics of PHP and MySQL and will also learn how to access the data in a MySQL database through the Web using PHP. The students will be able to develop shopping carts and Web forums using PHP and MySQL.

Level: UG

Prerequisite(s): All of (a) 6 credits from courses in INFO at the 2000 level, (b) INFO 1213 and (c) INFO 2313 or CPSC 1204

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 3150 3 credits****Object-Oriented Software Engineering**

Students will learn the methods of identifying system requirements and producing object models and designs based on the requirements. They will learn the concepts of Unified Modeling Language (UML). They will identify use cases and expand them into object-oriented designs. Students will use the concepts of software engineering to analyze, design and implement software systems. The students will also be introduced to the concepts of Agile Software Development.

Level: UG

Prerequisite(s): All of (a) 6 credits from courses in INFO at the 2000 level and (b) INFO 2313 or CPSC 1204

Attribute: BUSI (p. 521)

**INFO 3160 3 credits****Network Operating Systems**

Students will learn the principles, techniques and strategies used in planning, installing, testing, and administering a server operating system. The course covers creating and managing users using Active Directory, installing and configuring Dynamic Host Configuration Protocol (DHCP), Domain Name System (DNS), Printer Server, Internet Information Services (IIS), Web Server, and a Virtual Private Network (VPN). Students will be required to plan, design, and install an application server simulating real-world scenarios. Students will have hands-on experience in installing, troubleshooting, fine-tuning, and administering a server operating system.

Level: UG

Prerequisite(s): Acceptance into Bachelor of Technology in Information Technology

Attribute: BUSI (p. 521)

**INFO 3170 3 credits****Security of Enterprise Networks**

Students will learn the fundamentals of network security and the principles of firewalls and Virtual Private Networks (VPN). They will learn how to identify network security threats. They will also learn how to select and deploy firewalls and manage VPNs.

Level: UG

Prerequisite(s): INFO 2411, plus 6 credits from courses in INFO at the 2000 level.

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 3171 3 credits****System Security**

Students will learn fundamental concepts, theories and practical skills of system security. This course covers vulnerabilities of operating systems and covers how systems can be penetrated. Students will learn digital data integrity to ensure the data is unchanged. It also covers data security, network security, web server security and web application security. Tools to discover network designs, functionality, resources, and vulnerabilities are introduced. Security mechanisms for protecting networks are evaluated and security planning is considered. In this course the significance of being ethical is emphasized.

Level: UG

Prerequisite(s): INFO 2411 and 6 credits from courses in INFO at the 2000 level

Attribute: BUSI (p. 521)

**INFO 3180 3 credits****Wireless Networks**

Students will learn the concepts and practical skills of wireless local area networks (WLANs). They will learn the fundamentals of radio frequency (RF) signals, mathematical skills required in RF signal power calculations, wireless antennas, antenna accessories, and spread spectrum technologies. The students will also learn WLAN infrastructure devices, WLAN organizations and standards, WLAN network architectures, wireless site survey and WLAN troubleshooting techniques.

Level: UG

Prerequisite(s): INFO 2311 plus 6 credits from courses in INFO at the 2000 level

Attribute: BUSI (p. 521)

**INFO 3210 3 credits****Distributed Systems**

Students will learn principles, techniques and strategies used in design and implementation of distributed applications and system solutions that are robust, scalable, and secure. Students focus on modeling distributed systems and building distributed objects using .NET framework. Students will be required to develop a distributed business solution using C# and .NET Remoting.

Level: UG

Prerequisite(s): Acceptance into 3rd year of the BTech program.

Attribute: BUSI (p. 521)

**INFO 3225 3 credits****Web Multimedia**

Students will learn the different types of multimedia (e.g. text, images, sound, animation and video) required in website development. They will learn the theoretical foundations and the practical tools for creating graphics, sound, animation and video content that will be used in websites, as well as multimedia design considerations.

Level: UG

Prerequisite(s): All of (a) 9 credits of courses in INFO at the 2000 level, (b) INFO 1213 and (c) INFO 2313 or CPSC 1204

Attribute: BUSI (p. 521)

**INFO 3230 3 credits****Advanced Object-Oriented Application Development**

Students will learn to use object-oriented methodology to analyze, design and implement real-world software applications. Students will learn the best practices for iterative software development recommended by the Unified Process (UP). Student will learn the advanced features of the Unified Modeling Language (UML) in modeling distributed software applications. Students also will learn the concepts of software design patterns and how these patterns can be used to create flexible and extensible software.

Level: UG

Attribute: BUSI (p. 521)

**INFO 3235 3 credits****Software Quality Assurance**

Students will learn the essential features involved in developing timely, cost-effective and high-quality software products that meet the user's requirements. They will examine the effective deployment of quality assurance procedures throughout the entire software development process. They will learn the concepts of Total Quality Management (TQM), the development of quality assurance plans, the implementation of verification and validation functions, the selection of tools to support quality assurance, the application of software metrics to measure quality, and the International Standards Organization (ISO) certification process.

Level: UG

Prerequisite(s): INFO 3150

Attribute: BUSI (p. 521)

**INFO 3240 3 credits****Enterprise Resource Planning Systems**

Students will learn the concepts in Enterprise Resource Planning (ERP). They will learn the basis of how integrated information systems such as ERP systems can help companies to optimize business processes. Students also will learn business process modeling, process improvement and ERP implementation. They will explore the role of ERP in electronic commerce. Students will gain hands-on experience through working on an ERP system.

Level: UG

Prerequisite(s): 9 credits from courses in INFO at the 2000 level

Attribute: BUSI (p. 521)

**INFO 3241 3 credits****Identity Management**

Students will learn the fundamental concepts of digital identity management. They will learn the concepts of digital identity, digital identity lifecycles, digital rights management and identity management architecture building. They will also examine industrial software and tools and use them to build identity management systems.

Level: UG

Prerequisite(s): INFO 3160

Attribute: BUSI (p. 521)

**INFO 3245 3 credits****Mobile Programming**

Students will learn the skills for developing Android-based mobile applications. They will be introduced to the basics of wireless technologies associated with a smartphone such as cellular networks, Wi-Fi networks, satellite networks, and GPS systems. They will learn the Android fundamentals and the methods for designing and developing Android software programs for database, audio, video and communication applications.

Level: UG

Prerequisite(s): All of (a) 9 credits from courses in INFO at the 2000 level and (b) INFO 2313 or CPSC 1204

Attribute: BUSI (p. 521)

**INFO 3246 3 credits****Mobile Programming II**

Students will learn software application development for iOS, the mobile operating system from Apple Inc. They will be introduced to programming in Objective-C and will learn the skills in designing, developing and deploying different types of mobile applications for both iPad and iPhone.

Level: UG

Attribute: BUSI (p. 521)

**INFO 3250 3 credits****Content Management and Information Architecture**

Students will learn the concepts of content management and information architecture. They will learn to apply the enterprise content management (ECM) methodology for managing digital assets, records, and knowledge throughout an organization. They will learn how to analyze and plan ECM solutions based on an organizations needs and business requirements. Students will also learn to design information architecture and implement taxonomy in organizing content throughout the information life cycle.

Level: UG

Prerequisite(s): 9 credits from courses in INFO at the 2000 level

Attribute: BUSI (p. 521)

**INFO 3280 3 credits****Information Technology Project Management**

Students will learn topics in Information Technology (IT) project management. They will examine various issues related to the development and implementation of complex information systems. Students will explore the use of new technologies in IT project management and will use a project management software tool to complete assignments, case studies and a term project.

Level: UG

Prerequisite(s): 9 credits from courses in INFO at the 2000 level

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 3290 3 credits****Virtualization**

Students will learn the fundamentals of virtualization. They will learn the internals of a Virtual Machine (VM), how to install and deploy VM Applications on desktop computers and enterprise servers, back up and recovering VMs, use virtual file systems, implement failover clusters, create load-balanced clusters, build VM clusters. They will also be introduced to storage networking and storage virtualization, and virtualized information systems.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 3390 3 credits****Networking Technologies III**

Student will learn the architecture, components, and operations of routers and switches in a larger and complex network. They will configure and troubleshoot routers and switches and resolve common issues related to routing and switching in both Internet Protocol version 4 (IPv4) and Internet Protocol version 6 (IPv6) networks.

Level: UG

Prerequisite(s): 9 credits from courses in INFO at the 2000 level, including INFO 2311

Attribute: BUSI (p. 521)

**INFO 4105 3 credits****Search Engine Principles**

Students will learn the principles of search engines and information retrieval. Information filtering and retrieval drives some of the world's most successful and high-tech businesses. Students will learn various methods of search engine optimization (SEO), ranging from theory to implementation. Students will learn how to use tools and methods to perform searches and utilize results effectively. They will also learn how large data sources such as social media affects information retrieval.

Level: UG

Prerequisite(s): INFO 3135, plus 9 credits from courses in INFO at the 3000 level.

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 4110 3 credits****Cloud Computing**

Students will learn cloud computing basics, benefits and limitations, cloud computing technologies (hardware and infrastructure), cloud accessing technologies, cloud storage, standards in cloud computing, software as a service, platform as service and cloud application development.

Level: UG

Prerequisite(s): INFO 3390, plus 12 credits from courses at the 3000 level.

Attribute: BUSI (p. 521)

**INFO 4115 3 credits****Human Factors and Website Design**

Students will learn computer interface design requirements based on perceptual and cognitive factors; learnability; recall, recognition and retention; speed and accuracy of performance, and apply them in Web design process. They will learn website planning and design, usability, website navigation design, graphics and color selection, text formatting using cascaded style sheet (CSS), browser compatibility testing and interactivity design using JavaScripts.

Level: UG

Prerequisite(s): INFO 3135 plus 9 credits from courses in INFO at the 3000 level

Attribute: BUSI (p. 521)

**INFO 4120 3 credits****Digital Forensics**

Students will learn the foundations of digital forensics. They will learn the key technical concepts, the methodologies used and the tools needed in digital forensics. Students will learn how to perform examinations for computers, networks, mobile devices, GPS, the Cloud and the Internet. Students will also learn how to collect evidence, document the scenes, and recover deleted data.

Level: UG

Prerequisite(s): INFO 3170 plus 9 credits from courses in INFO at the 3000 level

Attribute: BUSI (p. 521)

**INFO 4125 3 credits****Website and Cloud Security**

Students will learn the core mechanisms and tools for Web and cloud security. They will learn the principles of Web attacks on authentication, users, application servers, data stores, back-end components, application logic and bypassing client side controls. They will learn how to discover and prevent Web security flaws during Web application development and measures to improve Web security. They will also learn how to identify and resolve the security issues specific to public and private clouds.

Level: UG

Prerequisite(s): INFO 2411 plus 12 credits from courses in INFO at the 3000 level

Attribute: BUSI (p. 521)

**INFO 4190 3 credits****Integration Project I**

Students will conduct an extensive literature review and research for projects originating from faculty or the stakeholders from the industry or local communities. Students will carry out detailed project designs and complete the overall project design documentation in this capstone course. They will report the design results through presentations that are open to all faculty and students in the department and industry sponsors. Students will apply in great depth and breadth the system, hardware, software and project management knowledge they learned in the program to the accomplish the tasks of the project. Note: This course is a prerequisite for INFO 4290 Integration Project II where the students will implement their designs using software and/or hardware.

Level: UG

Prerequisite(s): 24 credits from courses in INFO at the 3000 level

Attribute: BUSI (p. 521)

**INFO 4210 3 credits****Human Factors and Computer Interface Design**

Students will study procedures for analyzing human-computer interaction (HCI) and will translate this information into design criteria. They will learn to ensure that computer interface design specifications meet end-user requirements for perceptual and cognitive factors; learnability; recall, recognition and retention; speed and accuracy of performance; cultural factors; and job satisfaction. They will identify task and system requirements and perform usability testing methodologies for both desktop and small screen interfaces.

Level: UG

Prerequisite(s): 12 credits from courses in INFO at the 3000 level, and acceptance into 3rd year of the BTech program.

Attribute: BUSI (p. 521)

**INFO 4225 3 credits****Animations**

Students will learn the skills of using professional software to create animations for Web applications. They will learn simple and complex graphics, graphics on multiple layers, symbols and basic animation, motion and shape Tweening, buttons and actions, and action programming.

Level: UG

Prerequisite(s): INFO 3225

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 4235 3 credits****Special Topics in Web and Mobile Application Development**

This course offers selected topics on web and mobile application development. The topics will be based on emerging industrial technologies, including but not limited to application design, service integration, system development, and application deployment on both web and mobile platforms. Students will learn novel concepts of web and mobile technologies required by the IT industry.

Level: UG

Prerequisite(s): INFO 3135, plus 9 credits from courses in INFO at the 3000 level.

Attribute: BUSI (p. 521)

**INFO 4250 3 credits****Special Topics in Network Administration and Security**

Students will learn special topics in network administration and security. This course is designed to cover emerging technologies that the department deems important but are not covered in other courses. Currently the course covers data center fundamentals. Topics include introduction to server farms, infrastructure protocols, security and load balancing, server health management, persistence mechanisms on load balancers and data center design.

Level: UG

Prerequisite(s): INFO 3160

Attribute: BUSI (p. 521)

**INFO 4260 3 credits****Networking Technologies IV**

Students will learn Wide Area Network (WAN) technologies and network services in a complex network. They will analyse and evaluate network devices and WAN technologies to meet network requirements. Students will also develop the knowledge and skills needed to implement Internet Protocol Security (IPSec) and Virtual Private Network (VPN) operations in large network.

Level: UG

Prerequisite(s): 12 credits from courses in INFO at the 3000 level, including INFO 3390.

Attribute: BUSI (p. 521)

**INFO 4290 3 credits****Integration Project II**

Students will implement the project designs they produced in the course INFO 4190 (Integration Project I) using suitable software tools and selected hardware. They will test and debug the project implementations and generate the final system prototype and project documentation. They will report and demonstrate the final project results through presentations which are open to all faculty and students in the department, as well as industrial sponsors.

Level: UG

Prerequisite(s): INFO 4190

Attributes: ASTR (p. 523), BUSI (p. 521)

**INFO 4310 3 credits****Entrepreneurial Development in Information Technology**

Students will gain an understanding of entrepreneurship fundamentals in the information technology sector, including business planning, financing and venture capital, operations, human resources, marketing and personal selling.

Level: UG

Prerequisite(s): 12 credits from courses in INFO at the 3000 level.

Attribute: BUSI (p. 521)

**INFO 4320 3 credits****Software Quality Assurance**

Students will learn the essential features involved developing timely, cost-effective and high quality software products that meet the user's requirements. They will examine the effective deployment of quality assurance procedures throughout the entire software development process. Other topics covered in this course will include: the concepts of Total Quality Management (TQM), development of quality assurance plans, implementation of verification and validation functions, selection of tools to support quality assurance, application of software metrics to measure quality, and the International Standards Organization (ISO) certification process.

Level: UG

Attribute: BUSI (p. 521)

**INFO 4330 3 credits****Data Warehousing and Data Mining**

Students will examine the problems caused by having too much information and the methods, processes and tools for extracting useful information from multidimensional databases and data marts stored on different system platforms. They will also acquire the techniques for defining, selecting, implementing and evaluating data warehousing and data mining solutions for businesses.

Level: UG

Prerequisite(s): INFO 2312, plus 12 credits from courses in INFO at the 3000 level.

Attribute: BUSI (p. 521)

**INFO 4350 3 credits****Wireless Technologies and Programming**

Students will learn the concepts and principles of wireless technologies, wireless devices, wireless signals, wireless networks and wireless access technologies. They will learn wireless programming techniques and will develop wireless applications using technologies that include Wireless Markup Language (WML), WMLScript, Java and Microsoft .NET based wireless application development environments.

Level: UG

Attribute: BUSI (p. 521)

**INFO 4370 3 credits****Security of Wireless Systems**

Students will learn about wireless security technologies such as advanced user authentication, robust encryption, and intrusion prevention. They also will learn concepts of wireless discovery, wireless attack identification and monitoring, and wireless security policies and solutions. Students will be required to conduct research and work on a project to solve real-world wireless system security problems in a simulated environment.

Level: UG

Prerequisite(s): INFO 3180, plus 9 credits from courses in INFO at the 3000 level.

Attribute: BUSI (p. 521)

**INFO 4381 3 credits****Internet of Things and Applications**

Students will learn the concepts of "Internet of Things" (IoT) and their related applications. The underlying principles and architectures of sensors and actuators are discussed. The course also examines IoT's connectivity, platforms and different application domains. Data analytics and IoT system security are also explored in the course. In addition, students will do a course project using selected hardware, software and development tools.

Level: UG

Prerequisite(s): INFO 3180 and 9 credits from courses in INFO at the 3000 level

Attribute: BUSI (p. 521)

## Interdisciplinary Expressive Arts (IDEA)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**IDEA 1100 3 credits****Interdisciplinary Foundations**

Students will explore various practices, skills, and disciplines to further their academic, personal, and professional development. They will examine interdisciplinary inquiry and creativity, the uses of interdisciplinary academic approaches, and the applications of interdisciplinarity in culture, education, and professional domains. They will learn interdisciplinary skills through individual projects, group work, and the development of online portfolios.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_2 (p. 522)

**IDEA 1240 3 credits****New Forms and Media: Networked Narratives**

Students will learn and practice new forms of creative writing such as collaborative composition, writing for new and social media, blogging, and writing for digital publications. They will study emerging uses of online technologies and will learn writing skills through individual composition, group work, and the development of electronic portfolios. Note: Students may earn credits for only one of CRWR 1240 or IDEA 1240, as they are the same course.

Level: UG

Cross-listing: CRWR 1240

Attributes: ASTR (p. 523), ARTS (p. 521)

**IDEA 1400 3 credits****Explorations in Expressive Arts through Drama and Theatre**

Learners will explore and develop their creative imaginations through an expressive arts approach to drama, theatre, and community-oriented performances. They will engage with and contribute to an expressive arts community through the creation of interdisciplinary imaginative projects. Learners will have opportunities to achieve personal growth and to develop critical and empathic sensibilities through mentorship activities. They will participate in expressive arts presentations in a variety of venues.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**IDEA 2100 3 credits****Creativity, Ecology, and Nature Experience**

Students will learn about the interconnected themes of creativity, ecology, sustainability, nature experience, and personal and academic development. They will contextualize their creative and academic inquiries by way of experiences in nature and will broaden their understanding of the relationship between humanity and the natural world.

Level: UG

Prerequisite(s): 3 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**IDEA 3100 3 credits****Interdisciplinary Expressive Arts 1**

Students will learn about the history, philosophy, and current application of interdisciplinary approaches within the expressive arts. They will develop interdisciplinary skills in creativity and academic inquiry, will become familiar with multiple expressive modalities (creative writing, music, movement, fine arts, theatre, expressive arts therapies, storytelling, photography, film making, etc.) and will explore the application of those modalities in an integrated learning environment.

Note: Students may earn credits for only one of IDEA 3100 and CUST 3100, as they are the same course.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher

Attribute: ARTS (p. 521)

**IDEA 3200 3 credits****Theatre for Social Change**

In this class, learners improvise, create and perform live drama based on their own experiences and the issues they encounter in the world around them. Learners will analyze psycho-social forces which they feel require change, and experiment with how to creatively resist and transform such forces. Learners will study the history of political theatre and learn how practitioners from diverse cultural contexts have used theatre to respond to social issues. Drawing on a range of performance practices, members of this improvisational performing arts community mentor one another and learn to construct their own dramatic plots, characters and scenes, eventually presenting an interactive performance to an audience. This collaborative creative process facilitates personal growth, risk-taking and empathy, while building a critical and political consciousness.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher

Attribute: ARTS (p. 521)

**IDEA 3301 3 credits****Myth, Culture, and Creativity**

Students will learn about the role of mythological traditions in culture and creativity throughout the world. They will contextualize their own creative and academic inquiries within the multicultural streams of mythological expression and will broaden their understanding of the roots of creativity.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher

Attribute: ARTS (p. 521)

**IDEA 3302 3 credits****Creativity and Leadership in Groups**

Students will experience, learn to facilitate, and lead the interpersonal and creative process within a group context. They will participate in and examine creative modalities, self-awareness practices, and group dynamics. They will apply facilitation and leadership strategies for promoting creativity, community, and personal development.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**IDEA 4100 3 credits****Interdisciplinary Expressive Arts 2**

Students will learn to apply a diverse number of current interdisciplinary approaches within the expressive arts. They will develop the interdisciplinary skills to employ creativity across multiple expressive modalities (creative writing, music, movement, fine arts, theatre, expressive arts therapies, storytelling, mythopoetics, photography, film making, etc.) and will explore potential academic and career directions within the cultural and social services sectors.

Level: UG

Prerequisite(s): IDEA 3100, or permission from the instructor.

Attribute: ARTS (p. 521)

## Interior Design (IDSN)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**IDSN 1113 4 credits****Studio 1**

Students will experiment with and make discoveries about the principles and elements of design. They will develop their problem-solving skills by creating solutions for two- and three-dimensional design problems. They will work individually and in teams, with a focus on critical analysis, design process and student progress. They will develop and apply design vocabulary to various sizes and types of exercises related to spatial definition and organization.

Level: UG

Co-requisite(s): IDSN 1135

Attribute: DESN (p. 521)

**IDSN 1121 3 credits****Materials**

Students will learn about materials and associated technologies of processing and installation. They will learn about the properties, and will explore conventional and potential applications of a variety of materials such as wood, glass, metal, and fabric, with emphasis on understanding form, workability, strength, and durability. Students will produce an inventory of fundamental materials.

Level: UG

Attribute: DESN (p. 521)

**IDSN 1135 3 credits****Design Awareness 1**

Students acquire a critical awareness of the importance and impact of design through research, analysis, discussion of both historical and contemporary issues. They will learn, explore and apply the principles and elements of design by executing projects. Students will discuss and debate interior design and built environment issues. They will learn and employ the vocabulary of interior design.

Level: UG

Co-requisite(s): IDSN 1113

Attribute: DESN (p. 521)

**IDSN 1141 3 credits****Technical Drawing 1**

Students will be introduced to professional interior design drafting standards. They will practise the fundamental skills of manual drafting: line weight, line quality, line type and lettering. They will produce drawings and document two and three-dimensional objects, furniture and spaces through various drawing types such as plans, elevations, sections and paraline drawings.

Level: UG

Attribute: DESN (p. 521)

**IDSN 1202 4 credits****Studio 2**

Students will continue to apply the principles and elements of design to three-dimensional design projects. They will analyze and experiment with spatial definition and organization, light and colour, and heighten their ability to use space as a design tool. Students will learn how to determine project requirements and criteria, utilize design processes, and create design solutions that are appropriate to purpose and how people interact with the built environment.

Level: UG

Prerequisite(s): IDSN 1113 (C+) and 1121 and 1135 and 1141

Attribute: DESN (p. 521)

**IDSN 1221 3 credits****Components**

Students will learn about component materials of the built environment and manufacturing processes. They will discover the properties and characteristics of manufactured component materials such as plywood, concrete, ceramics, textiles, carpet, wallcovering, hardware, lighting, window covering and furniture. They will explore conventional and potential applications. Emphasis will be on understanding the history, development, characteristics and behavior of the components.

Level: UG

Prerequisite(s): IDSN 1113 (C+) and 1121 and 1135 and 1141

Attribute: DESN (p. 521)

**IDSN 1235 3 credits****Design Awareness 2**

Students will continue to acquire a critical awareness of the importance and impact of design. Students will explore the social, political and physical influences affecting historical changes in interior design by researching and analyzing the evolution and development of the built environment from antiquity to the 20th century. They will discuss and link issues across chronological, geographic, cultural and sociological contexts. They will increase their understanding of the vocabulary of interior design through problem-based learning.

Level: UG

Prerequisite(s): IDSN 1113 (C+) and 1121 and 1135 and 1141

Attribute: DESN (p. 521)

**IDSN 1241 3 credits****Technical Drawing 2**

Students will continue to draft technical drawings manually, communicating ideas, objects, and interior spaces. They will begin to explore material specifications, construction methods, and produce a simple set of orthographic drawings. Students will draw three dimensional paraline views and measured perspective drawings.

Level: UG

Prerequisite(s): IDSN 1113 (C+) and 1121 and 1135 and 1141

Attribute: DESN (p. 521)

**IDSN 2300 4 credits****Studio 3**

Students will produce, individually and in groups, original designs that respond to specific, conceptual, behavioural, and contextual criteria for living spaces. They will focus on meeting the complex needs of individuals and families in the built environment.

Level: UG

Prerequisite(s): IDSN 1202 (C+) and 1221 and 1235 and 1241 and 3 credits of ENGL 1100 or higher or approved 3 credit writing-intensive course at the 1100-level or higher

Co-requisite(s): IDSN 2331

Attribute: DESN (p. 521)

**IDSN 2325 3 credits****Building Systems 1**

Students will learn about technical aspects of built environment systems, such as structural, electrical and mechanical. They will learn about how the constituent subsystems of floor, wall, ceilings, penetrations, comfort systems, power, data communication, lighting, and water use function. Students will produce technical drawings, applying this knowledge in concurrent courses. Emphasis will be on understanding current building techniques and exploring sustainable innovations and choices.

Level: UG

Prerequisite(s): IDSN 1202 (C+) and 1221 and 1235 and 1241 and 3 credits of ENGL 1100 or higher or approved 3-credit writing-intensive course at the 1100-level or higher

Attribute: DESN (p. 521)

**IDSN 2331 3 credits****Design Theories 1**

Students will study fundamental principles and processes involved in creating design solutions for living environments. They will study the theories related to typologies of living spaces such as entry, socializing and relaxing, sleeping, dressing, cooking and eating spaces. Students will research and explore 20th century and current design history and ideologies. They will also explore, discuss and debate a range of built environment issues.

Level: UG

Prerequisite(s): IDSN 1202 (C+) and 1221 and 1235 and 1241 and 3 credits of ENGL 1100 or higher, or approved 3 credit writing-intensive course at the 1100-level or higher

Co-requisite(s): IDSN 2300

Attribute: DESN (p. 521)

**IDSN 2345 3 credits****Drawing and Rendering 1**

Students will investigate design process communication through drawing and ideation exercises. They will expand their technique depicting objects in context to environmental conditions. They will be introduced to digital drawing software and will manipulate drawings using digital programs and experiment with a range of drawing and rendering techniques using manual and digital means.

Level: UG

Prerequisite(s): IDSN 1202 (C+) and 1221 and 1235 and 1241 and 3 credits of ENGL 1100 or higher or approved 3 credit writing-intensive course at the 1100-level or higher

Attribute: DESN (p. 521)

**IDSN 2375 3 credits****Environmental Human Factors**

Students will study how humans relate to the built environment and how it affects behaviour. Students will develop an understanding of human factors research methods and their application to interior design. They will learn how to shape interior spaces by applying knowledge of anthropometrics, ergonomics, proxemics, universal design, sustainable design and human behavior. Students will actively engage in problem-based learning (PBL) modules.

Level: UG

Prerequisite(s): IDSN 1202 (C+) and 1221 and 1235 and 1241 and 3 credits of ENGL 1100 or higher or approved 3 credit writing-intensive course at the 1100-level or higher

Attribute: DESN (p. 521)

**IDSN 2400 4 credits****Studio 4**

Students will continue to produce, individually and in teams, original designs that respond to specific conceptual, behavioural, and contextual criteria for living spaces. They will focus on process, space planning, and spatial volume development.

Level: UG

Prerequisite(s): IDSN 2300 (C+) and 2325 and 2331 and 2345 and 2375

Co-requisite(s): IDSN 2431

Attribute: DESN (p. 521)

**IDSN 2425 3 credits****Building Systems 2**

Students will explore technical aspects of building environments. They will learn about and draw various assemblies found within building systems to expand their understanding and application of building code principles. They will study lighting design systems, acoustics, energy management, and sustainable systems, applying this knowledge in concurrent courses. They will focus on understanding multi-unit built environments and communicate knowledge through digital technical drawings.

Level: UG

Prerequisite(s): IDSN 2300 (C+) and 2325 and 2331 and 2345 and 2375

Attribute: DESN (p. 521)

**IDSN 2431 3 credits****Design Theories 2**

Students will expand their understanding of applied and theoretical issues, principles and processes involved in creating design solutions, emphasizing space planning and spatial volume development. Students will investigate, analyze and discuss historical, contemporary, and future design issues, ideologies and approaches. Students will explore and connect ideological concepts with their own interior design applications.

Level: UG

Prerequisite(s): IDSN 2300 (C+) and 2325 and 2331 and 2345 and 2375

Co-requisite(s): IDSN 2400

Attribute: DESN (p. 521)

**IDSN 2445 3 credits****Drawing and Rendering 2**

Students will continue to develop drawing and rendering skills to effectively visualize design concepts and ideas within the built environment. They will further develop their ability to communicate design intent and deliver effective visual presentations, practicing manual drawing, rendering, and digital manipulation skills.

Level: UG

Prerequisite(s): IDSN 2300 (C+) and 2325 and 2331 and 2345 and 2375

Attribute: DESN (p. 521)

**IDSN 3500 4 credits****Studio 5**

Students will produce creative, experiential design solutions. They will work on various commercial projects such as retail, workplace and public spaces. They will expand their design skills, refining their process and design methodology.

Level: UG

Prerequisite(s): IDSN 2400 (C+) and 2425 and 2431 and 2445

Co-requisite(s): IDSN 3531

Attribute: DESN (p. 521)

**IDSN 3525 3 credits****Building Systems 3**

Students will communicate how and why materials and components are connected through drawing technical details. They will study construction assemblies common to public spaces. Students will resolve building connections (such as floor to wall, wall to ceiling), penetrations, architectural woodwork, case goods, and furniture. They will produce a set of computer-drawn, construction-ready details incorporating appropriate technical specifications and interior design industry drafting standards, based on their own designs from Studio projects.

Level: UG

Prerequisite(s): IDSN 2400 (C+), 2425, 2431, and 2445.

Attribute: DESN (p. 521)

**IDSN 3531 3 credits****Design Theories 3**

Students will study public space typologies and programming processes for specialized areas of practice in interior design, such as retail and the workplace. They will research theoretical and practical design considerations using problem definition and problem solving tools. They will explore, discuss, and debate historical, current, and future interior design and building environment issues. Students will apply this knowledge in studio projects.

Level: UG

Prerequisite(s): IDSN 2400 (C+), 2425, 2431 and 2445.

Co-requisite(s): IDSN 3500

Attribute: DESN (p. 521)

**IDSN 3600 4 credits****Studio 6**

Students will produce creative and experiential design solutions. They will work on various complex project types such as hospitality, institutional and public spaces. They will expand their design skills, refining their process and design methodology. They will collaborate with team members and present comprehensive design solutions incorporating stakeholder needs, public health and safety issues, and sustainability.

Level: UG

Prerequisite(s): IDSN 3500 (C+) and 3525 and 3531

Co-requisite(s): IDSN 3635

Attribute: DESN (p. 521)

**IDSN 3625 3 credits****Contract Documentation**

Students will learn about the production of interior design contract documentation. They will prepare and coordinate working drawings, schedules, product and material specifications, and bid documents. Students will learn about construction contracts and various industry regulations.

Level: UG

Prerequisite(s): IDSN 3500 (C+) and 3525 and 3531

Attribute: DESN (p. 521)

**IDSN 3635 3 credits****Design Theories 4**

Students will study theoretical approaches and their practical considerations for specialized area(s) of practice, such as hospitality, institutional, and health care, informing studio project(s) in IDSN 3600. They will continue to explore, discuss, and debate historical, current, and future interior design and building environment issues. Students will develop objective criteria for critical analysis and generate a personal design philosophy. They will utilize and develop writing skills, culminating in a research paper.

Level: UG

Prerequisite(s): IDSN 3500 (C+) and 3525 and 3531

Co-requisite(s): IDSN 3600

Attribute: DESN (p. 521)

**IDSN 4001 4 credits****Senior Studio 1**

Students will consolidate previous learning to advance and broaden their understanding of interior design. They will undertake a comprehensive, individually focused, interior design project. Students will choose a project topic and a specific building in which to develop extensive research and programming, culminating in a detailed interior design solution. Note: Senior Studio is taken over two consecutive semesters and will appear on the transcript as IDSN 4001 and IDSN 4002. Students registering in IDSN 4001 are committing to register in IDSN 4002 in the subsequent term.

Level: UG

Prerequisite(s): IDSN 3600 (C+)

Co-requisite(s): IDSN 4720

Attribute: DESN (p. 521)

**IDSN 4002 4 credits****Senior Studio 2**

Students will consolidate previous learning to advance and broaden their understanding of interior design. They will undertake a comprehensive, individually focused, interior design project. Students will choose a project topic and a specific building in which to develop extensive research and programming, culminating in a detailed interior design solution. Note: Senior Studio is taken over two consecutive semesters and will appear on the transcript as IDSN 4001 and IDSN 4002.

Level: UG

Prerequisite(s): IDSN 4001 (C)

Attribute: DESN (p. 521)

**IDSN 4720 3 credits****Advanced Design Studies 1**

Students will enhance their knowledge through research and critical evaluation of topics of interest and relevant concerns. They will develop a deeper understanding of historical, current, emerging, and future interior design and built environment issues. Students will formalize their research and disseminate findings in public forums such as presentations, publications, or installations. Note: Advanced Design Studies is taken over two consecutive semesters and will appear on the transcript as IDSN 4720 and IDSN 4820. Students registering in IDSN 4720 are committing to register in IDSN 4820 in the subsequent term.

Level: UG

Prerequisite(s): IDSN 3600 and 3625 and 3635

Co-requisite(s): IDSN 4001

Attribute: DESN (p. 521)

**IDSN 4785 3 credits****Professional Practice 1**

Students will be introduced to basic business practices for professional interior designers including how to market themselves through a professional resume and portfolio. They will explore the design project as a commercial venture considering the successive phases of the design process. They will debate issues such as global perspective, professionalism, professional organizations, licensure, and ethical standards of practice.

Level: UG

Prerequisite(s): All of IDSN 3600 (C+) and 3625 and 3635

Attribute: DESN (p. 521)

**IDSN 4820 3 credits****Advanced Design Studies 2**

Students will enhance their knowledge through research and critical evaluation of topics of interest and relevant concerns. They will develop a deeper understanding of historical, current, emerging, and future interior design and built environment issues. Students will formalize their research and disseminate findings in public forums such as presentations, publications, or installations. Note: Advanced Design Studies is taken over two consecutive semesters and will appear on the transcript as IDSN 4720 and IDSN 4820.

Level: UG

Prerequisite(s): IDSN 4001 and 4720 and 4785

Co-requisite(s): IDSN 4002

Attribute: DESN (p. 521)

**IDSN 4880 3 credits****Professional Practice 2**

Students will continue to examine business and professional practice relevant to interior design. They will prepare themselves to enter the interior design profession through improving communication skills such as interview techniques and business writing. Students will report and reflect critically upon their previous practical experience with peers and instructors. They will discuss business procedures such as fee proposals, project management and contracts as well as legal, ethical, and professional liability issues.

Level: UG

Prerequisite(s): All of IDSN 4001 and 4720 and 4785

Attribute: DESN (p. 521)

**IDSN 4900 3 credits****Self-Directed Study**

Students in their final years of study will have the opportunity to explore and integrate personal areas of interest and career objectives within the interior design profession (subject to faculty approval). They will gain proficiency in career knowledge and skills required for entry level employment, as well as hone independent learning through research, planning, and presenting a project related to a negotiated area of study.

Level: UG

Prerequisite(s): IDSN 3500

Attribute: DESN (p. 521)

## International Business (IBUS)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**IBUS 6100 3 credits****Intercultural Communication for Business**

The course is aimed at increasing participant's awareness of and sensitivity towards their own culture, as well as the culture of others. The content develops specific skills competence in cultural settings including business management techniques which can be used/ deployed in a variety of business settings. These settings include not just global settings but also domestic contexts with cultural diversity. This course also provides a rich environment for discussion that builds on elements of global citizenship and global world view.

Level: GR

Attributes: BUSI (p. 521), F2A9 (p. 521)

**IBUS 6110 3 credits****International Operations In Trade**

This course is designed to develop an applied understanding of developments in global trade operations and the way in which businesses position themselves to optimally harness opportunities within a global competitive environment. It introduces both operational and strategic aspects of global trade operations through analyzing current trade procedures, practices and policies related to the exchange of goods or services along international borders.

Level: GR

Attributes: BUSI (p. 521), F2A9 (p. 521)

**IBUS 6120 3 credits****Marketing for International Organization**

This course covers marketing theory and methods as they apply to world markets. The main aim of the course is to link international marketing with the overall strategy of the business while examining the impact of cultural, political and legal issues and the economic differences in global strategies. Emphasis is placed on market entry strategies and developing the marketing mix appropriate to various international global environments. A global marketing strategic plan will be designed from real organization or for a start-up or born-global type company.

Level: GR

Attributes: BUSI (p. 521), F2A9 (p. 521)

**IBUS 6130 3 credits****E-commerce Design and Digital Marketing**

This course links online marketing theory and practice to traditional business strategy, competitiveness, consumer behaviour, models as well as e-commerce development and design. Upon completion of this course, students will have a comprehensive understanding of the impact of digital marketing and e-commerce. Students will build an e-commerce site within a capstone project for marketing goods or services or providing e-commerce solutions to clients. Some of the applied topics in this course include identifying the business model, plan, research audience, technology hosting, budgeting, as well as web content development. The course also covers models of commercial transactions, payments, customer services and fulfillment as well as transactional risks and ethical issues of e-commerce.

Level: GR

Attributes: BUSI (p. 521), F2A9 (p. 521)

**IBUS 6140 3 credits****Advanced Topics in International Business and Economics**

Students will be able to further their knowledge of international business practices in a world context paying attention to operations, trade, investments, international financial markets, new financial instruments, etc. Through case studies, students will analyze current international business environments as well as specific industries and their success and challenges. In addition, students study a variety of industries across the globe. Advanced topics on international economics are also covered in the course and they present an applied knowledge of economics for business decision-making by managers. Possible topics include: dislocations on globalization, the globalization process, opportunities provided by free trade and free trade challenges, economic development perspectives, likelihood of economic recessions and global integration and innovation.

Level: GR

Prerequisite(s): 9 credits in courses at the 6000 level.

Attributes: BUSI (p. 521), F2A9 (p. 521)

## Japanese (JAPN)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**JAPN 1100 3 credits****Basic Japanese I**

Students who have little or no previous knowledge of Japanese will learn basic communication skills used in a Japanese cultural context. They will develop their ability to speak, comprehend, read, and write Japanese through various communicative tasks.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_3 (p. 522)

**JAPN 1101 3 credits****Basic Japanese II**

Students who have completed Japanese 1100 or an equivalent course will continue learning spoken and written Japanese. They will develop basic oral and written communication skills used in a Japanese cultural context through the study of vocabulary, pronunciation, grammar, and short essay writing.

Level: UG

Prerequisite(s): JAPN 1100 or assessment by instructor.

Attributes: ASTR (p. 523), ARTS (p. 521)

**JAPN 1200 3 credits****Introduction to Contemporary Japanese Society and Culture**

Students who have an interest in Japan, but little or no background in Japanese studies, will gain a broad overview of contemporary Japanese society and culture. They will read, watch, listen to, discuss, and write about a variety of materials introducing topics such as Japan's geography, history, customs and events, social structure, religion, family, demographics, regional cultures, minority groups and subcultures, politics, economy, sports, literature and arts. Note: Students may earn credit for only one of JAPN 1200 or LANC 1200, as they are identical courses.

Level: UG

Cross-listing: LANC 1200

Attributes: ASTR (p. 523), ARTS (p. 521)

**JAPN 2200 3 credits****Intermediate Japanese I**

Students will build on previously acquired listening, speaking, reading, and writing skills. They will further develop intercultural communication skills and increase their understanding of modern Japanese culture.

Level: UG

Prerequisite(s): JAPN 1101 or assessment by instructor.

Attributes: ASTR (p. 523), ARTS (p. 521)

**JAPN 2201 3 credits****Intermediate Japanese II**

Students will build on previously acquired skills and become more fluent and accurate in speech and listening comprehension. They will develop reading and writing skills while increasing their understanding of modern Japanese society and culture. Students will further develop intercultural communication skills in both social and workplace situations.

Level: UG

Prerequisite(s): JAPN 2200 or assessment by instructor.

Attributes: ASTR (p. 523), ARTS (p. 521)

**JAPN 3300 3 credits****Upper Intermediate Japanese I**

Students will develop their proficiency in a variety of contexts with written and spoken Japanese to an upper-intermediate level. They will focus on complex grammatical structures and specialized vocabulary. Students will identify aspects of Japanese culture reflected in the language they learn. They will be introduced to strategies for becoming independent language learners.

Level: UG

Prerequisite(s): JAPN 2201 or assessment by instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**JAPN 3301 3 credits****Upper Intermediate Japanese II**

Students will extend their proficiency in a variety of contexts with written and spoken Japanese at an upper-intermediate level. They will further explore complex grammatical structures, particularly those related to levels of formality, and will focus on expanding specialized vocabulary and analyzing aspects of Japanese culture reflected in the language they learn. Students will be encouraged to use strategies for directing their own learning.

Level: UG

Prerequisite(s): JAPN 3300 or assessment by instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**JAPN 3310 3 credits****Japanese Culture and Business**

Students will explore the role and characteristics of business in Japan and the powerful influence of business on contemporary Japanese culture. First, they will follow the development of industry and business in Japan from the beginning of the Edo Period until the end of the Second World War. Then students will examine the remarkable recovery and development of Japan's postwar economy that culminated, in 1980s and 90s, in theories and stereotypes relating to the concept of a unique Japanese business style. Finally, students will examine changes in the Japanese economy since the bursting of Japan's "economic bubble" in the mid 1990s and the effects of these changes on business, society and culture today. Students will read texts as well as current articles in newspapers (such as the Wall Street Journal or The Daily Yomiuri (English edition)), journals and magazines (such as The Economist), and watch movies and documentaries in order to explore a broad range of topics, from the role of business in Japan's international relations to its effects on the lives of individual Japanese and their environment. Note: Students may earn credits for only one of JAPN 3310 and LANC 3310 and ASIA 3310 as they are identical courses. The course will be conducted in English. This course does not serve to fulfill the second language requirement of the Bachelor of Arts degree framework.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher.

Cross-listing: LANC 3310

Attributes: ASTR (p. 523), ARTS (p. 521)

**JAPN 3320 3 credits****Japanese Culture Through Film**

Students will deepen their understanding of contemporary Japanese art and culture by viewing important post-war Japanese movies. They will focus on influential directors and characteristic genres, including but not limited to comedies, samurai epics and anime [animation]. Students will view a variety of works (in English or Japanese with English subtitles), discuss important themes and cultural references, and connect these movies to the broader Japanese culture, especially youth culture. They will observe how movies both make and question "culture" and, in turn, how culture determines the content of movies and their popular success. Students will read works by critics who examine various characteristics of Japanese culture, especially its "visual bias", evident in arts ranging from Japanese writing (Kanji) and wood-block prints (ukiyo-e) to contemporary movies, magazines, commercials, and fashion. Students will also identify the contributions of Japanese film to international "movie culture" and discuss, more generally, the importance of visual media in the post-modern, post-literate, non-rhetorical age of film, television and the Internet. Finally, they will consider how the increasing success of Japanese animation in foreign markets might contribute to Japan's cultural integration into the global community and discuss the future of post-modern technological societies. Note: Students may earn credits for only one of JAPN 3320 and LANC 3320 and ASIA 3320 as they are identical courses. The course will be conducted in English. This course does not serve to fulfill the second language requirement of the Bachelor of Arts degree framework.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher

Cross-listing: LANC 3320

Attributes: ASTR (p. 523), ARTS (p. 521)

**JAPN 4400 3 credits****Advanced Japanese I: Conversation**

Students will expand their proficiency in a variety of social and academic contexts with spoken Japanese at an advanced level. They will refine their knowledge of Japanese oral communication skills, including complex grammatical structures and specialized vocabulary, as well as analyze aspects of Japanese culture reflected in the language they learn. They will further develop discourse and sociolinguistic competence through a variety of activities using authentic materials in the popular media. Students will also learn how to utilize texts and written work in support of their developing oral skills.

Level: UG

Prerequisite(s): JAPN 3301 or assessment by instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**JAPN 4410 3 credits****Advanced Japanese for Business**

Students will develop their Japanese language skills at an advanced level for careers in business, trade, and commerce. They will learn how to prepare documents of the type commonly used in Japanese business environments. They will also expand their intercultural communication skills in the Japanese business environment and enhance their ability to participate in various business activities in Japanese in a culturally appropriate manner.

Level: UG

Prerequisite(s): JAPN 3301 or assessment by instructor

Attribute: ARTS (p. 521)

## Journalism (JRNL)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables)

(<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](http://bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**JRNL 1160 3 credits****Introduction to Journalism**

Students will explore how journalism fits in a media landscape that includes both traditional mainstream news sources and alternative information sources such as social networking, YouTube, Twitter and blogs. They will also explore reporting by citizen journalists. Students will explore the ramifications of economic and technological change in the industry. They will also study its impact on journalism, citizenship, human rights, community and democracy.

Level: UG

Prerequisite(s): English 12 (B) or equivalent.

Attributes: ASTR (p. 523), ARTS (p. 521)

**JRNL 1220 3 credits****Citizen Journalism**

Students will explore the role of citizen journalism in the dissemination of information. They will explore the investigative techniques commonly employed by professional journalists, including but not limited to court searches and Freedom of Information requests. They will learn how to use many of these techniques to find information important to themselves and their communities. They will discover how tools such as blogging, social networking and search engine optimization can be used to share this information with the larger community. They will learn how to write clearly and concisely. Students will also explore how media law affects citizen journalism, and vice versa.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**JRNL 2120 3 credits****Storytelling: Writing for Journalism**

Students will be introduced to and practice journalistic writing, which is a distinct style of writing. In this class, students will learn the fundamental skills of news writing and reporting, including conducting interviews, covering news events, analyzing source documents and writing clearly and concisely. They will use the Canadian Press Style guide, which is the standard for journalistic writing in Canada.

Level: UG

Prerequisite(s): JRNL 1160 and JRNL 1220

Attributes: ASTR (p. 523), ARTS (p. 521)

**JRNL 2230 3 credits****Multimedia Storytelling**

Students will explore the types of multimedia journalism and other non-fiction storytelling made possible by inexpensive hardware and software tools, and the ability to easily publish on the internet and through social media. They will explore the role of audio, video and interactivity in creating rich, immersive stories, through profiles, event coverage, journalistic storytelling and other modes. Students will learn storytelling and technical skills needed to create and publish effective stories of their own.

Level: UG

Prerequisite(s): JRNL 1160 or JRNL 1220

Attribute: ARTS (p. 521)

**JRNL 2240 3 credits****Beyond News: Feature Writing**

Students will practice and develop feature writing skills in subject areas including, but not limited to, health and science, education, sports, entertainment, fashion and lifestyles, and opinion writing. Students will explore the evolving mediascape, which includes traditional media and new-media competitors, and examine differences in writing styles and presentation. They will examine the potential for accessing and providing in-depth information in specialist and niche areas, analyze publications, and develop and publish traditional or non-traditional feature stories.

Level: UG

Prerequisite(s): JRNL 1160, JRNL 1220, JRNL 2120

Attributes: ASTR (p. 523), ARTS (p. 521)

**JRNL 2360 3 credits****Visual Storytelling**

Students will explore a range of visual storytelling techniques and technologies, with an emphasis on still photography for print and online publications, and for social media storytelling. They will gain practical experience while capturing subjects in a variety of lighting conditions and locations, requiring different techniques. Students will learn visual imaging software and the principles of visual journalism design and publishing. Note: Students are required to have camera capable of full manual operation for this course. Specifications will be provided by the department. NOTE: Students may earn credit for only one of JRNL 2360 or JRNL 3160.

Level: UG

Prerequisite(s): JRNL 1160 or JRNL 1220

Attributes: ASTR (p. 523), ARTS (p. 521)

**JRNL 2370 3 credits****Audio Storytelling**

Students will learn the fundamentals of telling true stories using audio. Effective use of recording, editing and publishing tools will be taught, alongside planning, reporting, structuring, writing and editing skills, and ethics. Students will study, produce, and publish audio stories in styles including professional-level broadcast and podcasts.

Level: UG

Prerequisite(s): JRNL 1160 or JRNL 1220

Attributes: ASTR (p. 523), ARTS (p. 521)

**JRNL 3165 3 credits****Data Visualization**

Students will learn how to use data visualization techniques to present information in interesting and compelling ways, including interactive maps and graphics. They will explore the principles of data visualization, learn the strengths and weaknesses of various chart types, and create charts that convey information as clearly as possible. They will learn how to use spreadsheets to find interesting patterns in their data and how to turn that data into engaging online tools. They will also learn how to obtain raw data from open-data portals and other sources. NOTE: Students may earn credit for only one of JRNL 3165 or JRNL 4165.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher

Attributes: ARTS (p. 521), QUAN (p. 532)

**JRNL 3170 3 credits****Narrative Nonfiction**

Students will learn about the art of narrative nonfiction, which marries strong journalism with literary technique to produce compelling stories. Students will analyze published narrative nonfiction, such as magazine articles, books, and personal essays. They will develop their voices as narrative nonfiction writers by practicing the art of this type of journalism.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including JRNL 2240 and ENGL 1100.

Attributes: ASTR (p. 523), ARTS (p. 521)

**JRNL 3180 3 credits****Sports Journalism**

Students will explore the full range of sports journalism, analyzing how sports reporters operate across the platforms of print, broadcast, online and social media. They will examine and create a wide range of sports journalism, including but not limited to game coverage and features, sports beat coverage, long-form sports storytelling and in-depth sports packages using text, images, video and interactivity. Students will also analyze the history, contemporary issues and ethics of sports journalism.

Level: UG

Prerequisite(s): JRNL 2230 and JRNL 2240

Attributes: ASTR (p. 523), ARTS (p. 521)

**JRNL 3260 3 credits****Media Economics and Entrepreneurial Journalism**

Students will explore the economics of existing and emerging media. They will also explore the implications and opportunities for journalists working in traditional and new media. They will learn skills, techniques and technologies needed for developing a professional reputation and personal brand. Students will learn the organizational, business and personal skills needed for freelance employment, and for leading or working as a team member with media start-up companies.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including ENGL 1100, JRNL 1220, JRNL 2120, and JRNL 2230.

Attribute: ARTS (p. 521)

**JRNL 3270 3 credits****Advanced Visual Storytelling**

Students will expand their visual storytelling skills with an emphasis on filming, editing and producing video. They will explore the legal and ethical aspects of video storytelling and consider its role in public discourse. They will learn how to apply basic visual storytelling skills to video, and the role images, sound, music and text play in video storytelling. Students will learn video-editing skills using professional-level software and will produce a long-form video documentary.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including JRNL 2230, JRNL 2240, and JRNL 2360.

Attribute: ARTS (p. 521)

**JRNL 3370 3 credits****Advanced Audio Storytelling**

Students will expand their audio storytelling skills while working throughout the semester, as part of a production team, to produce a long-form audio story. They will explore the legal and ethical aspects of storytelling and consider its role in public discourse. They will further develop technical skills in capturing and editing audio.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including JRNL 2230, JRNL 2240 and JRNL 2370

Attribute: ARTS (p. 521)

**JRNL 4141 3 credits****Work Experience**

Students will work for 120 hours, or equivalent, as journalists in one or more media businesses or organizations. They will further their personal and professional development, integrating knowledge and skills acquired from the Journalism curriculum in the context of their practical experience. They will investigate potential job markets through the work-experience placements they choose, such as freelance work, job shadowing and fixed-term placements. They will develop their journalistic skills in areas of interest to build contacts and create networks that will help them in their careers. NOTE: Placements must be approved by the department. NOTE: Students must be registered in the Bachelor of Journalism and have a minimum GPA of 3.3. NOTE: Equivalency to 120 hours is determined by the department based on work produced in a project-based placement or placements.

Level: UG

Prerequisite(s): 90 credits from courses at the 1100 level or higher, including 18 credits from courses in JRNL at the 3000 level or higher.

Attribute: ARTS (p. 521)

**JRNL 4180 3 credits****Advanced Sports Journalism**

Students will deepen their sports journalism reporting skills, while exploring sports journalism as a profession. They will interview local professional sports journalists and attend and cover large-scale sports events alongside them. They will also explore the differences and similarities in coverage when sports stories move beyond the sports page and into wider public interest, by discussing and covering issues such as: concussion in sports; the relationship between sports and racism; and issues of sexism in sports and sports journalism.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher, including ENGL 1100 and JRNL 3180

Attribute: ARTS (p. 521)

**JRNL 4190 3 credits****Directed Study Honours I - Research**

Students working under the supervision of a faculty member will identify a topic for their honours thesis and undertake a research program that includes an extensive reading list developed by the student and faculty supervisor. They will design an outline for their thesis project.

Level: UG

Prerequisite(s): JRNL 3200

Attribute: ARTS (p. 521)

**JRNL 4240 3 credits****Social Issues Journalism**

Students will analyze social-issues journalism, do research and write social-issues journalism on subjects of their choice. They will learn, and draw on, the traditions of social-issues journalism, a long-established branch of journalism that ranges from the work of early social commentators such as Charles Dickens to today's investigative reporters. Students will combine narrative writing and investigative reporting to cover important issues by issuing readers an invitation to work for change.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including ENGL 1100 and JRNL 2240.

Attributes: ASTR (p. 523), ARTS (p. 521)

**JRNL 4250 3 credits****Politics and Journalism II**

Students will produce political journalism by conducting in-depth research and interviews using a variety of sources. They will also explore issues such as the watchdog role of journalism in a democracy and the relationship among politicians, bureaucrats, non-governmental organizations (NGOs) and journalists. Students will learn the importance of political journalism to democracy.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher courses, including ENGL 1100, JRNL 2230, and JRNL 2240.

Attribute: ARTS (p. 521)

**JRNL 4260 3 credits****Computer Coding for Journalists**

Students will be exposed to, and work in several programming and scripting languages, including, but not limited to HTML, CSS and JavaScript. These programs are used to create visually rich, interactive apps, websites and webpages. They will apply a range of skills to create and publish interactives; and also, design, develop and deploy applications. NOTE: This is a hands-on course, which requires basic computer literacy; previous knowledge of computer and website programming is not required.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100-level or higher, including JRNL 2230 and JRNL 2240.

Attribute: ARTS (p. 521)

**JRNL 4270 3 credits****Advanced Storytelling**

Students will work as a newsroom team during the semester to report and produce stories for a single-theme on-line publication (a story package). Students will develop the initial concept and identify stories using the full-range of storytelling methods (narrative text, visualized data, video, audio, photography, etc.). They will also learn or deepen skills in story planning, storytelling, story presentation and interactivity. They will produce a final project that will be a rich and interactive website on the assigned topic.

Level: UG

Prerequisite(s): 60 credits of 1100-level or higher, including all of the following: (a) ENGL 1100, (b) JRNL 3165, (c) JRNL 3170 or 4240, and (d) JRNL 3270 or 3370

Attribute: ARTS (p. 521)

**JRNL 4290 3 credits****Honours Thesis**

Students working under the supervision of a faculty member will write an honours thesis based on the research and outline completed in Journalism 4190. Students will engage in an extensive process of draft-writing and revisions to produce the final thesis.

Level: UG

Prerequisite(s): JRNL 4190

Attribute: ARTS (p. 521)

**JRNL 4295 3 credits****Journalism Honours Seminar**

Students will explore contemporary mass communication and journalism issues and research strategies. They will examine advanced methodological approaches to mass communications and journalism research through critical evaluation and evaluate the strengths and weaknesses of a variety of research methods. This course is mandatory for those students registered in the Bachelor of Applied Journalism Honours Degree.

Level: UG

Prerequisite(s): Admission to the Bachelor of Applied Journalism

Attribute: ARTS (p. 521)

## Language & Culture (LANC)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**LANC 1150 3 credits****Introduction to Intercultural Competencies: Thinking, Speaking, Acting Globally**

How can citizens of an increasingly globalizing world communicate effectively and work together successfully? This course is designed to help students explore what it means to interact with people from diverse cultural backgrounds. They will reflect on their own cultural mores, analyze what comprises intercultural competencies, and develop the knowledge and skills to communicate competently in a global context. They will also examine current theories and communication practices to gain an understanding of how language learning involves not only linguistic dimensions but also cultural dimensions.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**LANC 1200 3 credits****Introduction to Contemporary Japanese Society and Culture**

Students who have an interest in Japan, but little or no background in Japanese studies, will gain a broad overview of contemporary Japanese society and culture. They will read, watch, listen to, discuss, and write about a variety of materials introducing topics such as Japan's geography, history, customs and events, social structure, religion, family, demographics, regional cultures, minority groups and subcultures, politics, economy, sports, literature and arts. Note Students may earn credit for only one of LANC 1200 or JAPN 1200, as they are identical courses.

Level: UG

Cross-listing: JAPN 1200

Attributes: ASTR (p. 523), ARTS (p. 521)

**LANC 1870 3 credits****Intro to Bhangra Dance: Modern and Traditional**

This course provides an introduction to the popular Indian dance form, Bhangra. Students will learn and perform modern and traditional choreography to Punjabi music. The class will learn a corpus of movements on which Bhangra improvisation and choreography are based. Emphasis will be on North American style modern Bhangra, trends, variations, charisma, facial expression, and lyrical dance. Students will present projects that demonstrate the use of traditional and modern Bhangra movements in their own sequences and participate in a large group performance with the class.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_3 (p. 522)

**LANC 2120 3 credits****Introduction to Chinese and Japanese Cinema**

Students will be introduced to select films produced in China and Japan. They will examine the ways in which these films view and critique Chinese and Japanese traditions and modernity. They will also explore issues related to gender, identity, and nationalism. Students will develop an appreciation of the aesthetic and cultural values of East Asia and an understanding of recent Chinese and Japanese society through the lens of the assigned films, discussions, and readings. Note: Students may earn credit for only one of LANC 2120 and ASIA 2120 as they are identical courses.

Level: UG

Prerequisite(s): 6 credits from courses at the 1100 level or higher

Cross-listing: ASIA 2120

Attributes: ASTR (p. 523), ARTS (p. 521)

**LANC 2252 3 credits****Indian Society through Film**

Students will examine Indian culture and society through the medium of popular cinema, ranging from post-1947 Hindi classics to some more recent Bollywood blockbusters. They will investigate the ways in which Indian history and culture are depicted in film, including issues like nation building, gender, caste, nationalism versus regionalism/communalism, and globalization. In doing so, students will explore 'depicted reality' versus 'historical reality', the notion of the family as the symbol of the nation, as well as the relationship between the homeland (desh) and the West/diaspora (pardesh). Students will also study several films made by South Asian filmmakers in the diaspora. Note: Students may earn credit for only one of LANC 2252 and ASIA 2252 as they are identical courses.

Level: UG

Prerequisite(s): 15 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**LANC 3110 3 credits****Francophone Culture Through Film**

Students will deepen their understanding of contemporary Francophone culture and art by viewing and critiquing important Francophone movies, connecting them to the broader Francophone culture, and discussing important themes and cultural references in current popular culture. Seeing movies and reflecting, critiquing, and producing "culture", learners will also analyze works by critics who examine various characteristics of contemporary popular culture as seen in other cultural productions, such as magazines, commercials, music, social media, and fashion. The course will be conducted in English. This course does not serve to fulfill the second language requirement of the Bachelor of Arts degree framework. Note Students may earn credit for only one of FREN 3110 or LANC 3110, as they are identical courses.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher

Attribute: ARTS (p. 521)

**LANC 3150 3 credits****Advanced Intercultural Competencies**

Students will examine models of intercultural competence development that are fundamental for developing awareness of intercultural competencies. They will discuss and analyze personal, professional and global settings where cultural boundaries are crossed and identify best practices for effective intercultural relations. Students will also reflect and create a personal plan to develop their knowledge of intercultural competencies.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher, including one of the following: ANTH 1100, ASIA 1111, ASIA 1131, HIST 1131, LANC 1150, or SOCI 1125

Attribute: ARTS (p. 521)

**LANC 3154 3 credits****Chinese Cinema and Society**

Students will critically analyze films produced by some of the most recognized directors from China, Hong Kong, and Taiwan. They will examine issues of nationhood, national identity, national trauma, and the national past through these films. Students will also analyze the way in which some directors have begun to focus on the effects of globalization on contemporary Chinese society and culture. They will critically analyze Chinese cinema as a transnational phenomenon with extensive links to Asia and the rest of the world. Students will also critically examine how Chinese cinema has shaped both Chinese and foreign understandings of Chinese history and culture. Note ASIA 2120 is strongly recommended. Note Students may earn credit for only one of ASIA 3154 or LANC 3154, as they are identical courses.

Level: UG

Prerequisite(s): 27 credits from courses at the 1100 level or higher, including 6 credits from courses in ANTH, ASIA, HIST or MAND.

Attribute: ARTS (p. 521)

**LANC 3310 3 credits****Japanese Culture and Business**

Students will explore the role and characteristics of business in Japan and the powerful influence of business on contemporary Japanese culture. First, they will follow the development of industry and business in Japan from the beginning of the Edo Period until the end of the Second World War. Then students will examine the remarkable recovery and development of Japan's postwar economy that culminated, in 1980s and 90s, in theories and stereotypes relating to the concept of a unique Japanese business style. Finally, students will examine changes in the Japanese economy since the bursting of Japan's "economic bubble" in the mid 1990s, and the effects of these changes on business, society and culture today. Students will read texts as well as current articles in newspapers (such as the Wall Street Journal or The Daily Yomiuri (English edition)), journals and magazines (such as The Economist), and watch movies and documentaries in order to explore a broad range of topics, from the role of business in Japan's international relations to its effects on the lives of individual Japanese and their environment. Note: The course will be conducted in English. This course does not serve to fulfill the second language requirement of the Bachelor of Arts degree framework. Students may earn credit for only one of LANC 3310 or JAPN 3310, as they are identical courses.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher

Cross-listing: JAPN 3310

Attributes: ASTR (p. 523), ARTS (p. 521)

**LANC 3320 3 credits****Japanese Culture Through Film**

Students will deepen their understanding of contemporary Japanese art and culture by viewing important post-war Japanese movies. They will focus on influential directors and characteristic genres, including but not limited to comedies, samurai epics and anime [animation]. Students will view a variety of works (in English or Japanese with English subtitles), discuss important themes and cultural references, and connect these movies to the broader Japanese culture, especially youth culture. They will observe how movies both make and question "culture" and, in turn, how culture determines the content of movies and their popular success. Students will read works by critics who examine various characteristics of Japanese culture, especially its "visual bias", evident in arts ranging from Japanese writing (Kanji) and wood-block prints (ukiyo-e) to contemporary movies, magazines, commercials, and fashion. Students will also identify the contributions of Japanese film to international "movie culture" and discuss, more generally, the importance of visual media in the post-modern, post-literate, non-rhetorical age of film, television and the Internet. Finally, they will consider how the increasing success of Japanese animation in foreign markets might contribute to Japan's cultural integration into the global community and discuss the future of post-modern technological societies. Note: Students may earn credits for only one of LANC 3320 and JAPN 3320 and ASIA 3320 as they are identical courses. The course will be conducted in English. The course does not serve to fulfill the second language requirement of the Bachelor of Arts degree framework.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher

Cross-listing: JAPN 3320

Attributes: ASTR (p. 523), ARTS (p. 521)

**LANC 3390 3 credits****Indigenous Languages in Canada**

Students will acquire an understanding of Indigenous histories, cultures, and knowledge through the lens of the Indigenous languages in Canada. Students will gain an awareness of the diversity of Indigenous languages across Canada. They will identify the impact of past, current and ongoing colonialism and its consequences for Indigenous languages in Canada. Students will critically examine the major contemporary issues facing Indigenous languages and will investigate examples of community-based language activism across Canada. Note: Students may earn credit for only one of LANC 3390 or LING 3390, as they are identical courses.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher

Cross-listing: LING 3390

Attribute: ARTS (p. 521)

**LANC 3450 3 credits****Culture and Society in the Spanish- Speaking World**

Students will deepen their understanding of Spanish-speaking cultures and communities through the study of cultural traditions, values, and norms that are most common to and shared within the Spanish-speaking world. They will examine selected portions of television programs, films, music videos, photographs, advertisements, and figurative language where these traditions, values, and norms are represented. Students will discuss, analyze, and evaluate how these traditions, values, and norms are used to organize behaviours (verbal and non-verbal), expectations, and to structure life within the Spanish-speaking world. Students will also be able to reflect on current and future interactions with Spanish-speaking people and societies. The course is taught in English and prior knowledge of Spanish is not required. Note: Students may earn credits for only one of SPAN 3450 or LANC 3450 as they are identical courses.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100-level or higher

Cross-listing: SPAN 3450

Attribute: ARTS (p. 521)

**LANC 3860 3 credits****South Asian Folklore**

Students will critically analyze the diversity and changing forms of folklore and folk customs in South Asia. They will look at how and why folklore impacts the culture and the everyday lives of people in South Asia. Students will critically examine the various genres of folklore, including narrative, oral, and customary genres. They will also look at performance traditions, including music and dance, as well as folk life, including folk art and crafts. Note: Students may earn credit for only one of ASIA 3860 or LANC 3860, as they are identical courses.

Level: UG

Prerequisite(s): 27 credits from courses at the 1100 level or higher,

including 6 credits from ANTH, ASIA, HIST, LANC or PUNJ

Cross-listing: ASIA 3860

Attribute: ARTS (p. 521)

**LANC 3870 3 credits****Bhangra Movements and Identity**

Students will critically examine the origins and development of Bhangra within Punjab and the Indian subcontinent as well as its adaptations and hybrid forms within the Punjabi diaspora, in North America and Europe. Students will critically analyze the development of Bhangra from a popular folk dance and music style within Punjab to its modern day status within the diaspora as a largely hybrid music incorporating Punjabi folk music with modern Western music traditions. Students will also analyze the role of Bhangra in the formation of identity for members of the South Asian diaspora. Note: Students may earn credit for only one of ASIA 3870 or LANC 3870, as they are identical courses.

Level: UG

Prerequisite(s): 27 credits from courses at the 1100 level or higher,

including 6 credits from ANTH, ASIA, HIST, LANC or PUNJ

Attribute: ARTS (p. 521)

**LANC 4320 3 credits****Understanding Japanese Culture through Literature**

Students will deepen their understanding of the history, complexity and beauty of Japanese culture by exploring its writing systems and literature. They will closely examine, in English translation, examples from various genres, in order to better understand how the written language interrelates with other aspects of Japanese culture. They will critique theories that attempt to explain Japanese culture in relation to writing. Students will observe how Japanese literature represents the living culture of Japan at various timeperiods (but especially since the Meiji Restoration of 1868), and they will question how these representations contribute to nation-making and to forming Japanese identity. Note: The course will be conducted in English. It isn't necessary for students to be able to speak or read Japanese, as all texts will be in English translation. Students may earn credit for only one of LANC 4320 or JAPN 4320, as they are identical courses.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher, including one of the following: (a) ANTH 1100, (b) ENGL at the 2000 level or higher (c) HIST 1150 (d) JAPN 1101 or, Oral and Written Competency Assessment Score of 68% or higher (e) JAPN/LANC 1200 (f) JAPN/LANC 3310 (g) JAPN/LANC 3320 (h) LING 1300

Attribute: ARTS (p. 521)

## Learning Communities (LCOM)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**LCOM 0101 6 credits****Literacy for Students with Intellectual Disabilities**

Students with intellectual disabilities will learn and practice basic language, math and computer skills. An Individualized Learning Plan (ILP) will be developed based on the student's self-identified goals and the results of the student's entrance assessment. Students will work in small groups, one-on-one with the instructor or tutor, and independently on a curriculum designed to meet the goals of their ILP.

Level: CP

Prerequisite(s): ACP Functional Literacy Assessment and Instructor Interview

Attribute: ARTS (p. 521)

## Legal Administrative Studies (LGLA)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables/) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**LGLA 1110 1.5 credits****Bookkeeping for the Law Office**

Students will practice basic bookkeeping functions for a law office. They will record and post basic bookkeeping transactions, reconcile bank statements, perform basic payroll functions, and recognize the distinctions between general and trust funds.

Level: UG

Attribute: BUSI (p. 521)

**LGLA 1125 3 credits****Introduction To Legal Office Procedures And Legal Research**

Students will study and apply the procedures and documentation related to a general legal office for success in the workplace. They will work in teams to examine statute and case law.

Level: UG

Attribute: BUSI (p. 521)

**LGLA 1135 3 credits****Legal Administrative Computer Applications II**

Students will be instructed in the detailed use of file management, PDF, presentation, electronic communications, and spreadsheet software useful in a legal administrative environment. Using legal administrative-oriented examples taught in a hands-on environment (i.e. a computer lab), students will develop and apply skills and concepts that are critical for success in their academic studies and career.

Level: UG

Prerequisite(s): LGLA 1145

Attribute: BUSI (p. 521)

**LGLA 1145 3 credits****Legal Administrative Computer Applications I: Document Preparation/ Production**

Legal assistants require proficiency and advanced skills in document production to service all practice areas in a legal firm. Students will learn to create and format complex legal documents and layouts efficiently using the industry current document production program(s).

Level: UG

Attribute: BUSI (p. 521)

**LGLA 1150 1.5 credits****Law Office Relations and Conflict Resolution**

Students will learn basic principles and skills for developing interpersonal skills to increase effectiveness in the law office environment. Topics explored include self-awareness, relationship development, assertiveness, group dynamics, intercultural communication, stress management and conflict resolution strategies, with a focus on enabling students to be successful and to reach their personal goals in the workplace.

Level: UG

Attribute: BUSI (p. 521)

**LGLA 1202 3 credits****Corporate Law and Procedures**

Students will develop an understanding of the procedures and terminology relating to corporate law, and will become familiar with the requirements of the BC Business Corporations Act. Students will prepare the documentation required for: incorporation of a company; post-incorporation matters; annual requirements; and changes during a company's life cycle. Students will also learn how to maintain and file the appropriate documents in a Corporate Records Book.

Level: UG

Attribute: BUSI (p. 521)

**LGLA 1203 3 credits****Conveyancing**

Students will apply the procedures and documentations related to the transfer of real estate in British Columbia. They will focus on the transfer of title of residential properties, including strata title and mortgage financing.

Level: UG

Prerequisite(s): All of (a) LGLA 1145, 1202, 1205 and (b) CMNS 1140

Attribute: BUSI (p. 521)

**LGLA 1204 3 credits****Wills and Estates**

Students will prepare and process wills, codicils, applications for Letters Probate and Letters of Administration, correspondence regarding estates, distribution and passing of accounts

Level: UG

Prerequisite(s): All of (a) LGLA 1145, 1202, 1205 and (b) CMNS 1140

Attribute: BUSI (p. 521)

**LGLA 1205 3 credits****Litigation and Civil Procedure**

Students will study the process of civil litigation in BC. They will learn the preparation and processing of civil litigation documents, including application and trial procedures.

Level: UG

Attribute: BUSI (p. 521)

**LGLA 1206 3 credits****Family Law and Procedures**

Students will be introduced to family law in BC. They will learn the preparation and processing of family law documents, including trial procedures and collections procedures resulting from court judgments. Student centered instruction will focus on the legal procedures and documentation related to marriage agreements, separation agreements, division of family assets and defended and undefended divorces. Students will become familiar with the requirements of the Divorce Act and the Family Law Act.

Level: UG

Prerequisite(s): All of (a) LGLA 1145, 1202, 1205 and (b) CMNS 1140

Attribute: BUSI (p. 521)

**LGLA 1399 3 credits****Legal Assistant Work Experience/Project**

Students will apply academic and practical knowledge and skills through relevant experience in the workplace or through the completion of a comprehensive project.

Level: UG

Prerequisite(s): All of (a) LGLA 1125, 1145, 1150, 1202, 1205 and (b) CMNS 1140

Co-requisite(s): All of LGLA 1110, 1135, 1203, 1204, and 1206

Attribute: BUSI (p. 521)

## Linguistics (LING)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**LING 1100 3 credits****Introduction to Language Structure**

Students will acquire a basic understanding of the structural properties of languages in general. They will learn how words and sentences are formed and how sounds are articulated and patterned. Students will analyze examples from a variety of languages and discuss applications of linguistic findings to language learning and teaching.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_3 (p. 522)

**LING 1300 3 credits****Languages of the World**

Students will learn fundamental facts about the world's languages and will examine topics critical to language. They will examine a range of questions: the regional and historical similarity and diversity of languages, linguistic typology and language universals, sound and structural features of the world's languages, issues of languages in contact, minority language endangerment, and the role of English as a world language.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**LING 2120 3 credits****Grammatical Patterns in Language**

Students will examine the principles that govern the way that words are created and organized into sentences, and how the meanings of words and sentences are interpreted. They will investigate the systems that underlie the organization and structure of natural languages and apply these principles to the description and analysis of individual languages. Students will evaluate and analyze data from a variety of languages around the world.

Level: UG

Prerequisite(s): LING 1100

Attributes: ASTR (p. 523), ARTS (p. 521)

**LING 2400 3 credits****First and Second Language Acquisition**

Students will study processes and issues associated with a child learning a first language and an adult studying a second language. Topics will include the acquisition of vocabulary, grammar and pronunciation. Students will become familiar with typical language development and review fundamental questions in current theoretical models. Note: Students may earn credits for only one of LING 2400 and PSYC 2323 as they are the same course.

Level: UG

Prerequisite(s): (LING 1100 and any 3 credits at the 1100 level or higher) or (PSYC 1100 and 1200)

Cross-listing: PSYC 2323

Attributes: ASTR (p. 523), ARTS (p. 521)

**LING 3390 3 credits****Indigenous Languages in Canada**

Students will acquire an understanding of Indigenous histories, cultures, and knowledge through the lens of the Indigenous languages in Canada. Students will gain an awareness of the diversity of Indigenous languages across Canada. They will identify the impact of past, current and ongoing colonialism and its consequences for Indigenous languages in Canada. Students will critically examine the major contemporary issues facing Indigenous languages and will investigate examples of community-based language activism across Canada. NOTE: Students may earn credit for only one of LING 3390 and LANC 3390 as they are identical courses.

Level: UG

Prerequisite(s): 30 credits from courses at the 1000 level or higher

Cross-listing: LANC 3390

Attribute: ARTS (p. 521)

## Mandarin (MAND)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**MAND 1100 3 credits****Beginner Mandarin I**

Students will develop basic skills in listening, speaking, reading and writing in Mandarin Chinese while exploring the Chinese culture. Note: This course is intended for students who cannot write more than 200 Chinese characters.

Level: UG

Prerequisite(s): None. Any student with Grade 12 Mandarin or with previous language skills meeting or exceeding the learning outcomes of MAND 1100 is not permitted to register in this introductory course. Students with a competence in the language beyond the level of the course in which they are registered may be required to withdraw.

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_3 (p. 522)

**MAND 1101 3 credits****Beginner Mandarin II**

Students will build on the basic skills and continue to develop oral, listening, reading and writing skills while further exploring the Chinese culture in the Canadian context.

Level: UG

Prerequisite(s): MAND 1100, or Mandarin 11 (with a grade C or higher), or assessment by instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**MAND 2200 3 credits****Intermediate Mandarin I**

Students will practice and enhance the basic linguistic skills developed in Mandarin 1101 and will acquire additional grammatical structures and vocabulary for achieving intermediate proficiency in conversation, reading, writing and translation as well as further understanding of the Chinese culture and customs.

Level: UG

Prerequisite(s): MAND 1101, or Mandarin 12 (with a grade C or higher), or assessment by instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**MAND 2201 3 credits****Intermediate Mandarin II**

Students will build on previously acquired linguistic skills to further the development of speaking and writing skills and the understanding of the Chinese culture. They will focus on intermediate reading, conversation, translation and composition.

Level: UG

Prerequisite(s): MAND 2200, or assessment by instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**MAND 3310 3 credits****Upper Intermediate Mandarin: Reading And Writing I**

Students will use a communicative approach to reinforce and expand their reading, writing, listening and speaking skills at the upper intermediate level with a special focus on the first two linguistic skills. They will study more complex grammatical structures and vocabulary as well as a variety of topics on social and cultural issues. They will achieve upper intermediate proficiency in both reading and writing in various social and cultural contexts. Note: Students with a competence in the language beyond the level of the course in which they are registered may be required to withdraw.

Level: UG

Prerequisite(s): MAND 2201 or MAND 12 with an A or assessment by instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**MAND 3311 3 credits****Upper Intermediate Mandarin II: Reading and Writing**

MAND 3311 is a continuation of MAND 3310. Students will use a holistic approach to develop their reading, writing, speaking and listening skills of the Chinese language at the upper intermediate level with a special focus on the first two linguistic skills. They will consolidate their language knowledge with more complex grammatical structures, phrases and idioms. Students will gain more writing skills with various forms in Chinese social and cultural contexts. They will achieve upper intermediate proficiency in both reading and writing with more sophisticated skills and advanced usages

Level: UG

Prerequisite(s): MAND 3310 or assessment by instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**MAND 4321 3 credits****Business Chinese I**

Students will learn specialized Chinese business vocabulary, conventions of business interaction and correspondence so as to be able to participate adequately in various business activities, and to process different Chinese business documents. Note: Students must know approximately 2000 Chinese characters

Level: UG

Prerequisite(s): MAND 3311 or assessment by instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**MAND 4323 3 credits****Business Chinese II**

Students will continue to learn specialized Chinese business vocabulary, conventions of business interaction and correspondence so as to further enhance their ability to participate fully in various Chinese business activities, and to deal with different business documents.

Level: UG

Prerequisite(s): MAND 4321 or assessment by instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**MAND 4481 3 credits****Modern Chinese Literature I**

Students will study modern Chinese literature from the May 4th Movement in 1919 to 1949 when the People's Republic of China was founded. They will read a selection of the best known modern Chinese fiction, prose and poetry written during this period by writers in China, Taiwan and Hong Kong as well as by overseas Chinese writers. Students will also learn basic literary theories so as to cultivate their ability for literary analysis, appreciation and research.

Level: UG

Prerequisite(s): MAND 3311 or assessment by the instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**MAND 4483 3 credits****Modern Chinese Literature II**

Students will study modern Chinese literature from 1949 when the People's Republic of China was founded to the beginning of the 21st century. They will read a selection of the best known modern Chinese fiction, prose and poetry written during this period by writers in China, Taiwan and Hong Kong as well as by overseas Chinese writers. Students will continue to learn literary theories to further aid their literary understanding, appreciation and research.

Level: UG

Prerequisite(s): MAND 4481 or assessment by the instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

## Marketing (MRKT)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**MRKT 1199 3 credits****Introduction to Marketing**

Students will learn the fundamentals of marketing and explore the relationships between companies, their customers and their competition. They will examine concepts that are integral to the field of marketing including marketing environment, customer behaviour, marketing research, product analysis, distribution, pricing strategies and promotion. They apply these concepts in solving marketing problems.

Level: UG

Attributes: ASTR (p. 523), BUSI (p. 521)

**MRKT 1299 3 credits****Consumer Behaviour**

Students will explore buyer behaviour and motivation using key theories from various social sciences (including Anthropology, Sociology and Psychology) and apply these theories in contemporary marketing situations.

Level: UG

Prerequisite(s): MRKT 1199

Attributes: ASTR (p. 523), BUSI (p. 521)

**MRKT 2111 3 credits****Introduction to e-Marketing**

Students will engage with e-marketing practices in the rapidly changing online environment. Students will study and evaluate various business models employing e-marketing strategies with a range of outcomes. Students will learn the key strategic and technological elements of digital marketing explained through theory and practical analysis. Students will become familiar with a variety of online marketing tools that support the online marketing functions including layout, optimization, testing, promotion, evaluation (analytics) to achieve overall marketing objectives.

Level: UG

Prerequisite(s): MRKT1199

Attributes: ASTR (p. 523), BUSI (p. 521)

**MRKT 2235 3 credits****Small Business Start-up**

Students will learn the fundamentals of small business start-ups in a Canadian context and learn to make decisions on entrepreneurship. They will also learn the elements needed to identify and develop successful business ideas, and apply these to the business planning process in an entrepreneurial environment. Opportunities will be provided for students to further explore the industry within which their own business idea may exist.

Level: UG

Prerequisite(s): MRKT 1199 and (ACCT 1110 or ACCT 1210 or ACCT 2293)

Attributes: ASTR (p. 523), BUSI (p. 521)

**MRKT 2321 3 credits****Retail Management**

Students will be introduced to both theoretical knowledge and practical skills in a variety of retail business models. They will learn consumer behavior, store design and layout, merchandise planning, services marketing, retail pricing strategy, advertising and selling.

Level: UG

Prerequisite(s): MRKT 1199

Attributes: ASTR (p. 523), BUSI (p. 521)

**MRKT 2333 3 credits****Fundamentals of Marketing Management**

In the Fundamentals of Marketing Management course, students will focus on the critique, evaluation, and revision of marketing plans to provide students a thorough overview of the marketing planning process. Students will focus particular attention on the strategic tools used to develop marketing plans and undergo a detailed examination of marketing research methodologies, strategic development, and tactical considerations outlined in marketing plans. In addition, students will engage in professional skills development as they relate to launching successful careers in the modern marketing environment.

Level: UG

Prerequisite(s): All of: (a) MRKT 1199, (b) 6 credits from courses in MRKT at the 2000 level or higher, and (c) BUQU 1230, CRIM 2103, MATH 1115, MATH 2341, PSYC 2300 or SOCI 2365

Attributes: ASTR (p. 523), BUSI (p. 521)

**MRKT 2340 3 credits****Marketing Insights**

Students will learn about basic marketing information needs as it relates to supporting the development and evaluation of a marketing plan, or to solve a given marketing problem. Through the use of case studies and real life examples, students will identify, gather and analyze marketing information in order to recommend actions for maximizing or improving an organization's online and offline marketing efforts.

Level: UG

Prerequisite(s): MRKT 1199

Attributes: ASTR (p. 523), BUSI (p. 521)

**MRKT 2360 3 credits****Selling and Sales Management**

Students will learn the theory and skills of professional selling and demonstrate these skills through completion of a practical selling project. Students will study basic selling processes, including prospecting, needs analysis, and formal sales presentations. Students will undertake a real life sales project that will require them to meet activity and sales targets. Students will begin this course with the theory and skills of professional selling, preparing them to complete a practical selling project. Students will also examine the sales management function.

Level: UG

Prerequisite(s): MRKT 1199

Attributes: ASTR (p. 523), BUSI (p. 521)

**MRKT 2401 3 credits****Introduction to Integrated Marketing Communications**

Students will work in creative teams to develop and present a comprehensive marketing communications proposal for a domestic marketing organization. They will thoroughly review the field of contemporary advertising and promotion in Canada throughout the course. Students will closely examine the evolving theory and practice of developing an overall communications program as well as the client/agency relationship. Students will emerge from this course with the skills to expand their comprehension of Integrated Marketing Communications (IMC) in subsequent courses.

Level: UG

Prerequisite(s): MRKT 1199

Attributes: ASTR (p. 523), BUSI (p. 521)

**MRKT 2444 3 credits****Marketing Management 2**

Students will apply marketing principles and methods from previous courses in the preparation of a detailed professional marketing plan for a real client. Students will develop and present their detailed marketing plan with strong emphasis placed on demonstration of analytical, critical thinking and research skills as well as a solid application of marketing. Students will work independently in the field and one-on-one with the instructor for much of the semester.

Level: UG

Prerequisite(s): MRKT 2333 and MRKT 2340

Attributes: ASTR (p. 523), BUSI (p. 521)

**MRKT 2455 3 credits****International Marketing**

Students will focus on the export needs of a local small to medium sized enterprise (SME), and on how its current product line can be marketed abroad. They will investigate how marketers must adapt to foreign environments and adeptly resolve conflicts between political, cultural and legal forces in order to be successful.

Level: UG

Prerequisite(s): MRKT 1199

Attributes: ASTR (p. 523), BUSI (p. 521)

**MRKT 3000 3 credits****Strategic Marketing Decision Making**

Students will apply marketing principles and methods from previous courses to conduct marketing analysis, make strategic marketing decisions, develop marketing plans, assess results, and adapt to resulting outcomes. Students will synthesize learning through the preparation of a detailed, professional marketing plan for a real client. Students will develop and present their detailed marketing plan with strong emphasis placed on demonstration of analytical, critical thinking and research skills as well as a solid application of marketing principles.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including (a) ACCT 1210 or ACCT 2293, (b) BUQU 1130 or BUQU 1230 or MATH 1115 or MATH 1120 or MATH 1130 or MATH 1140 or MATH 2341 or CRIM 2103 or PSYC 2300 or SOCI 2365, (c) CMNS 1140, (d) MRKT 1299, and (e) MRKT 2111

Attributes: ASTR (p. 523), BUSI (p. 521)

**MRKT 3211 3 credits****Managing the Communication Process**

Students will learn the essential project management skills associated with strategic planning, briefing creative services, and delivering creative projects through a variety of traditional and modern marketing media. They will learn how key messages and graphic standards are delivered effectively and consistently to achieve marketing objectives.

Level: UG

Prerequisite(s): MRKT 3000

Attribute: BUSI (p. 521)

**MRKT 3240 3 credits****Marketing Information Management**

Students will learn to collect, analyze and interpret data available from a variety of sources, internal and external to the organization, to uncover the marketing insights that will provide competitive advantage for an organization. Students will use contemporary data tools and emerging information technologies of marketing information management.

Level: UG

Prerequisite(s): Either ENTR 3140, or both (a) MRKT 3000, and (b) BUQU 1230, CRIM 2103, MATH 1115, MATH 2341, PSYC 2300 or SOCI 2365.

Attribute: BUSI (p. 521)

**MRKT 3311 3 credits****Marketing in a Digital World**

Students will learn the key business and technological elements of digital marketing. Students will become familiar with and use a variety of online marketing tools that support the online marketing functions that help drive traffic to a website, improve conversion rates and achieve overall marketing objectives. Students will prepare audits of real-world organizations and industrial sectors. Students will publish marketing-related analyses as part of the creation of an online project.

Level: UG

Prerequisite(s): MRKT 3000

Attribute: BUSI (p. 521)

**MRKT 4160 3 credits****Business Development**

Students will learn to manage and direct the sales function to achieve organizational goals. They will develop consultative selling skills through study of key account management, group negotiations, and the preparation of proposals and quotations. Students will study leadership and managing a sales force, sales channels and the importance of strategic alliances which will prepare students to assume sales leadership roles in the organization.

Level: UG

Prerequisite(s): All of ENTR 3100, ENTR 3110 and MRKT 3000

Attribute: BUSI (p. 521)

**MRKT 4177 3 credits****Contemporary Issues in Marketing**

Students will analyze and gain insight into significant contemporary marketing issues such as globalization and cross-cultural marketing, online marketing and e-commerce, modern corporate culture, outsourcing and marketing and business ethics. Students will interact with guest speakers, plan and lead seminar discussions, research and analyze contemporary marketing strategies and theories, and produce and present a comprehensive research project.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher, including ENGL 1100 and MRKT 1199.

Attribute: BUSI (p. 521)

**MRKT 4201 3 credits****Integrated Marketing Communication**

Students will learn the fundamentals of market segmentation, positioning and targeting while acquiring skills in the alignment of all aspects of an organization's communication, covering a complete range of target audiences, to create a coherent integrated communication program. They will manage the organization's brand identity and communication with consumers, media, governments, employees, shareholders and community groups. Students will learn how to use a comprehensive variety of communication options in order to maximize return-on-marketing investment.

Level: UG

Prerequisite(s): MRKT4331 or GDMA 3230

Attribute: BUSI (p. 521)

**MRKT 4330 6 credits****Bachelor Business Administration in Marketing - Practicum**

Students will apply marketing theory to undertake a major marketing analysis and develop a detailed marketing plan for an operational client/organization. They will practice the integration of marketing and business concepts learned throughout the degree; manage, design, prepare and present a comprehensive project that will meet the requirements of the operational organization. Students will develop and complete substantial primary research that includes the design, implementation, and analysis of the client's marketing issue. They will develop a marketing plan that will be fully costed with all numbers justified. Students will provide recommendations that will have metrics attached to it so the operational organization/client can measure the success or failure of the activity undertaken. Student teams will develop, launch and manage an online business or participate in a competitive marketing business simulation program. The teams will make decisions and be held accountable for them through achievement of specified measurable Web Analytics, profit and loss results and other metrics in a competitive team environment.

Level: UG

Prerequisite(s): Both (a) ENTR 3000, ENTR 3110, ENTR 3120, ENTR 3130, ENTR 3140, ENTR 4140, MRKT 3240, MRKT 4160 and MRKT 4201, and (b) ECON 2350, ECON 3150 or ENTR 3150.

Co-requisite(s): MRKT 4177

Attribute: BUSI (p. 521)

**MRKT 4331 3 credits****Individual Client Marketing Plan**

Students will work individually to apply marketing theory to undertake a major industry and business analysis and develop a comprehensive consulting plan for an operational client organization. They will practice the integration of marketing and business concepts learned throughout the degree; manage, design, prepare and present a comprehensive project that will meet the requirements of the operational organization. Students will develop and complete substantial primary research that includes the design, implementation, and analysis of the client's critical issues. They will develop a marketing plan that will be fully costed with all numbers justified. Students will provide recommendations that will have metrics attached to the plan so the operational organization client can measure the success or failure of the activity undertaken.

Level: UG

Prerequisite(s): (a) ACCT 3380, BUSI 2390, CMNS 3000, ENTR 3100, ENTR 3110, ENTR 3120, MRKT 3211, MRKT 3240, MRKT 3311] or (b) BUSI 2390, ENTR 3000, ENTR 3110, ENTR 3120, ENTR 3130, MRKT 3211, MRKT 3240 MRKT 3311

Attribute: BUSI (p. 521)

**MRKT 4332 3 credits****Online Business Launch/Simulation**

Student teams will develop, launch and manage an online business and/or participate in a competitive marketing business simulation program. The teams will make decisions and be held accountable for them through achievement of specified measurable Web Analytics, profit and loss results and other metrics in a competitive team environment. NOTE: It is highly recommended that students complete MRKT 2235 before taking this course.

Level: UG

Prerequisite(s): MRKT 4331

Attribute: BUSI (p. 521)

## Masonry (MSRY)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**MSRY 1001 1.5 credits****Masonry History and Communication**

Students will describe the evolution of the bricklaying trade and will identify major historical architecture. They will know the role of the apprentice, business and labour organizations, and will recognize the responsibilities of employers and employees. Students will also learn to identify employability and leadership skills required in the bricklaying industry. Methods of communication and the current tools used in communication will be studied.

Level: VO

Attribute: TRAD (p. 521)

**MSRY 1005 2.5 credits****First Aid and Safety in the Masonry Trade**

Students will describe workplace hazards and demonstrate their knowledge of WorkSafeBC and OHS regulations. Students will demonstrate fall protection and personal protection equipment systems. Students will describe fire safety procedures and WHMIS standards and procedures.

Level: VO

Prerequisite(s): MSRY 1001

Attribute: TRAD (p. 521)

**MSRY 1010 3 credits****Materials in the Masonry Trade**

Students will describe materials used in the masonry trade relative to their sizes, composition, manufacture, and how they might be handled at the job site. Students will describe and demonstrate the use of masonry mortars used to install various masonry materials. Students will become familiar with job site conditions and particular preparation methods specified for the job at hand; envelope details, tarp systems for inclement weather, structural considerations etc.

Level: VO

Prerequisite(s): MSRY 1005

Attribute: TRAD (p. 521)

**MSRY 1015 2 credits****Mortar, Grout, Layout and Construction in Brick Masonry**

Students will demonstrate the appropriate use of mortar and grout in the layout and construction of masonry projects. They will use the appropriate bricks, blocks and stone to complete these projects in an organized and safe manner complying with all OHS and WorkSafeBC regulations.

Level: VO

Prerequisite(s): MSRY 1010

Co-requisite(s): MSRY 1120

Attribute: TRAD (p. 521)

**MSRY 1020 3 credits****Hand Tools, Ladders, Scaffolds and Elevated Platforms**

Students will demonstrate competent use and handling of hand tools in the masonry trade, including levels, trowels, hammers, jointing tools and line blocks with mason's line. Students will demonstrate their ability to set up scaffolding, ladders and elevated work platforms commonly used on masonry projects while safely adhering to WorkSafeBC regulations.

Level: VO

Co-requisite(s): MSRY 1015

Attribute: TRAD (p. 521)

**MSRY 1025 3 credits****Power Tools and Related Equipment**

Students will demonstrate the use and handling of power tools commonly used in the masonry trade which may include masonry saws, mortar/cement mixers, grinders, rotary hammer drills, powder actuated tools and pallet jacks. Students will describe and demonstrate knot tying and rigging/hoisting procedures utilized on masonry job sites.

Level: VO

Prerequisite(s): MSRY 1020

Attribute: TRAD (p. 521)

**MSRY 1030 1 credit****Blueprint Reading, Estimating, Layout and Restoration**

Students will demonstrate the ability to interpret building codes and symbols used in the bricklaying trade. They will also demonstrate their understanding of terminology, and construction drawings, to a level where they can proceed with layout to complete a project. Students will describe the use of surveying equipment and their uses on masonry projects. Students will learn methods for cleaning and sealing masonry.

Level: VO

Attribute: TRAD (p. 521)

## Math for Trades (MATT)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**MATT 1015 3 credits****Mathematics/Science for Manufacturing and Mechanical Trades 1**

Students will learn to use whole numbers, decimals, fractions, proportions, percentages, equations, formulas, measurement, geometry, Pythagoras' theorem and right angle trigonometry in the context of manufacturing and mechanical trades. They will apply electrical, metallurgical, and other scientific principles and will be prepared to the National Occupational Analysis standard for these trades.

Level: VO

Prerequisite(s): ABEM 0008 or MATP 1008 or Vocational Placement Test

Attribute: TRAD (p. 521)

## Math Qualifying (MATQ)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (https://www.bctransferguide.ca/) - for information about course transfer in B.C.

Note: These upgrading courses are preparatory and are not eligible for a Tuition Tax Credit (T2202A).

**MATQ 0027 0 credits****Directed Study: Math**

Students will work on a variety of units taken from other ABE math courses at the Intermediate or Advanced level. The student and instructor will draw up a list of units appropriate to the student's needs.

Level: CP

Prerequisite(s): ACP Assessment

Attribute: ACAD (p. 521)

**MATQ 1071 0.5 credits****Adult Literacy Fundamental Mathematics Level 1**

Students will learn beginning math concepts including addition and subtraction without carrying or borrowing, rounding whole numbers, ordering whole numbers to 100, counting by 2's, 5's, 10's up to 100, estimating time, applying addition and subtraction in real life situations, identifying geometric figures, recognizing time concepts (i.e., a.m./p.m., hours, min, sec.) NOTE: Students enrolled in this course in continuous-intake format may be required to satisfy a learning contract in order to renew their enrollment.

Level: CP

Prerequisite(s): Academic and Career Preparation (ACP) Math Assessment placement into MATQ 1071

Attribute: ACAD (p. 521)

**MATQ 1072 0.5 credits****Adult Literacy Fundamental Mathematics Level 2**

Students will learn addition and subtraction with carrying and borrowing, round whole numbers, order numbers using greater than, less than, and equal. Students will learn multiplication of a single digit by multiple digits, making change, telling time, adding time, and solving problems using perimeter of squares and rectangles. NOTE: Students enrolled in this course in continuous-intake format may be required to satisfy a learning contract in order to renew their enrollment.

Level: CP

Prerequisite(s): One of the following: (a) MATQ 1071 or (b) Academic and Career Preparation (ACP) Math Assessment placement into MATQ 1072

Attribute: ACAD (p. 521)

**MATQ 1073 0.5 credits****Adult Literacy Fundamental Mathematics Level 3**

Students will learn the divisibility rules for 2, 3, 5, and 10. Students will learn to multiply and divide larger numbers. Students will learn to add and subtract time and learn to make change. Students will find areas and perimeters of squares and rectangles. NOTE: Students enrolled in this course in continuous-intake format may be required to satisfy a learning contract in order to renew their enrollment.

Level: CP

Prerequisite(s): One of the following: (a) MATQ 1072 or (b) Academic and Career Preparation (ACP) Math Assessment placement into MATQ 1073

Attribute: ACAD (p. 521)

**MATQ 1074 0.5 credits****Adult Literacy Fundamental Mathematics Level 4**

Students will learn to add, subtract, multiply, and divide decimals. Students will apply decimal calculations to various problems including area, perimeter, metric measurement, record keeping, and unit pricing. NOTE: Students enrolled in this course in continuous-intake format may be required to satisfy a learning contract in order to renew their enrollment.

Level: CP

Prerequisite(s): One of the following: (a) MATQ 1073 or (c) Academic and Career Preparation (ACP) Math Assessment placement into MATQ 1074

Attribute: ACAD (p. 521)

**MATQ 1075 0.5 credits****Adult Literacy Fundamental Mathematics Level 5**

Students will learn to add, subtract, multiply, and divide fractions and mixed numbers. Students will also convert between fractions and decimals. NOTE: Students enrolled in this course in continuous-intake format may be required to satisfy a learning contract in order to renew their enrollment.

Level: CP

Prerequisite(s): One of the following: (a) MATQ 1074 or (b) Academic and Career Preparation (ACP) Math Assessment placement into MATQ 1075

Attribute: ACAD (p. 521)

**MATQ 1076 0.5 credits****Adult Literacy Fundamental Mathematics Level 6**

Students will learn ratio, rate, proportion, percentage, and descriptive statistics.

Level: CP

Prerequisite(s): One of the following: (a) MATQ 1075 or (b) Academic and Career Preparation (ACP) Math Assessment placement into MATQ 1076

Attribute: ACAD (p. 521)

**MATQ 1079 3 credits****Basic Mathematics**

Students will briefly review fundamental arithmetic. They will then study the following topics in beginning algebra: introductory statistics, signed numbers, evaluation of expressions, solution of equations and inequalities, and word problems with one variable. Students will also learn basic geometry and measurement with an emphasis on metric conversion. NOTE: Students enrolled in this course in continuous-intake format may be required to satisfy a learning contract in order to renew their enrollment.

Level: CP

Attribute: ACAD (p. 521)

**MATQ 1089 3 credits****Intermediate Algebraic Math**

Students will study operations with rational numbers, ratio, proportion, percent, powers, roots, scientific notation, measurement, geometry, and right angle trigonometry. They will also perform operations on, factor, and evaluate algebraic expressions as well as solve and graph equations and inequalities. In addition students will solve direct and inverse variation problems. NOTE: Students enrolled in this course in continuous-intake format may be required to satisfy a learning contract in order to renew their enrollment.

Level: CP

Prerequisite(s): Level G1 as defined in the Math Alternatives Table (p. 779)

Attribute: ACAD (p. 521)

**MATQ 1094 3 credits****Foundations of Mathematics**

Students will study financial math, measurement, ratio, proportion, percent, linear relations, systems of linear equations and inequalities, quadratic functions, geometry, statistics, logical reasoning, and trigonometry. NOTE: Students enrolled in this course in continuous-intake format may be required to satisfy a learning contract in order to renew their enrollment.

Level: CP

Prerequisite(s): Level F1 as defined in the Math Alternatives Table (p. 779)

Attribute: ACAD (p. 521)

**MATQ 1099 3 credits****Qualifying Studies Math**

Students will review real numbers, operations with rational numbers, polynomials, solving and graphing linear equations and inequalities. They will also study quadratic, radical and rational expressions, equations, and functions as well as systems of linear equations and inequalities. NOTE: Students enrolled in this course in continuous-intake format may be required to satisfy a learning contract in order to renew their enrollment. Note: Students preparing for programs in the sciences, engineering, and other related fields may use this as a qualifying course.

Level: CP

Prerequisite(s): Level F1 as defined in the Math Alternatives Table (p. 779).

Attribute: ACAD (p. 521)

## Mathematics (MATH)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**MATH 1102 3 credits****Precalculus Algebra**

Students will develop the computational skills and conceptual understanding of algebra, functions, and graphs necessary to proceed to more advanced mathematics thinking. They will study equations, inequalities, graphs, functions, right angle trigonometry, and applications to problem solving.

Level: UG

Prerequisite(s): Level E1 as defined in the Math Alternatives Table (p. 779).

Attributes: SCIH (p. 521), PW\_3 (p. 522)

**MATH 1112 3 credits****Pre-Calculus**

Students will develop the conceptual understanding and computation skills that will provide a solid foundation for the study of calculus. They will study functions, their graphs, and their applications to problem solving. In particular they will study, polynomial, rational, exponential, logarithmic, and trigonometric functions. They will develop their ability to use and understand the concepts and language of mathematics

Level: UG

Prerequisite(s): Level C1 as defined in the Math Alternatives Table (p. 779)

Attributes: ASTR (p. 523), SCIH (p. 521), PW\_3 (p. 522), QUAN (p. 532)

**MATH 1115 3 credits****Statistics I**

Students will summarize and display data and perform inferences about proportions, means and standard deviations for one and two populations. Students will summarize and display data, find confidence intervals, and perform hypothesis tests for proportions, means, and standard deviations, for one and two populations, both large and small. They will also perform regression analysis, and determine probabilities.

Level: UG

Prerequisite(s): Level C1 as defined in the Math Alternatives Table (p. 779)

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 1116 3 credits****Mathematical Explorations**

Students will study the structure and development of Mathematics from the point of view of the non-mathematician. They will study historical material on the development of classical mathematical ideas as well as the evolution and structure of more recent mathematics, gaining an appreciation of historical and contemporary mathematical thinking. This is an exploratory course in mathematics for students who have minimal mathematical background and whose major interests lie outside of the sciences. This course can be used to partially fulfill the quantitative requirement of the BA degree. It may not be used as a prerequisite for further Mathematics courses.

Level: UG

Prerequisite(s): Level E1 as defined in the Math Alternatives Table (p. 779)

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 1117 3 credits****Environmental Mathematics**

Students will study algebraic concepts and methods, making use of them in general and environmental problem solving. They will study basic trigonometry, sequences and series, as well as functions (polynomial, rational, exponential, and logarithmic), and using functions to model data.

Level: UG

Prerequisite(s): Level E1 as defined in the Math Alternatives Table (p. 779)

Attributes: SCIH (p. 521), PW\_3 (p. 522)

**MATH 1120 3 credits****Differential Calculus**

Students will learn to differentiate algebraic and elementary transcendental functions and to apply these skills to graphing, maxima and minima, related rates, and rectilinear motion. They will be introduced to parametric curves and their differential calculus. Students with credit for MATH 1130 may not take this course for further credit.

Level: UG

Prerequisite(s): Level A1 as defined in the Math Alternatives Table (p. 779)

Credit Exclusion: MATH 1130

Attributes: ASTR (p. 523), SCIH (p. 521), PW\_3 (p. 522), QUAN (p. 532)

**MATH 1130 3 credits****Calculus for Life Sciences I**

Students will study differential calculus and its applications to biological sciences. In particular, they will study limits and differentiation of algebraic and elementary transcendental functions, with applications to graphing and optimization. Students with credit for MATH 1120 may not take MATH 1130 for further credit.

Level: UG

Prerequisite(s): Level B1 as defined in the Math Alternatives Table (p. 779)

Credit Exclusion: MATH 1120

Attributes: ASTR (p. 523), SCIH (p. 521), PW\_3 (p. 522), QUAN (p. 532)

**MATH 1135 3 credits****Problems and Concepts**

Students will develop skills in solving mathematical problems. They will study propositional and quantifier logic and apply this knowledge to solving problems and to elementary set theory, including relations and functions.

Level: UG

Prerequisite(s): Level C1 as defined in the Math Alternatives Table (p. 779)

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 1140 3 credits****Calculus I (Business Applications)**

Students will study the differentiation of algebraic and elementary transcendental functions and apply these skills to graphing, finding maxima and minima and solving problems in business, economics and social sciences. Students will also study first and second order partial derivatives

Level: UG

Prerequisite(s): Level B1 as defined in the Math Alternatives Table (p. 779)

Attributes: ASTR (p. 523), SCIH (p. 521), PW\_3 (p. 522)

**MATH 1152 3 credits****Matrix Algebra for Engineers**

Students will solve systems of linear equations, and study the algebra of matrices, determinants, invertibility, eigenvalues and eigenvectors, diagonalizability and systems of linear Ordinary Differential Equations (ODE's). They will study the geometry of Euclidean space, dot and cross products, the arithmetic of complex numbers, exponentials and logarithms of complex numbers, and the complex plane. Students will use a Computer Algebra System to solve problems in matrix algebra.

Level: UG

Prerequisite(s): One of: MATH 1120, MATH 1130 (C+), MATH 1140 (B-), MATH 1230 or MATH 1240

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 1190 4 credits****Mathematics for Elementary School Teachers**

Students will study the theory and applications of arithmetic, geometry and data analysis (statistics). This course is designed for students planning a career as an elementary school teacher.

Level: UG

Prerequisite(s): Level E1 as defined in the Math Alternatives Table (p. 779), and 9 credits from courses at the 1100 level or higher.

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 1216 3 credits****Mathematics in the Visual Arts**

Students will study the mathematical principles, methods, and structures used in the visual arts. They will study Euclidean and non-Euclidean geometry, symmetry, tilings in the plane, fractal geometry, and perspective. Note: this course may not be used as a prerequisite for further mathematics courses.

Level: UG

Prerequisite(s): Level E1 as defined in the Math Alternatives Table (p. 779).

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 1220 3 credits****Integral Calculus**

Students will learn to integrate algebraic and elementary transcendental functions and to apply these skills to appropriate problems. In addition, they will learn the fundamental theorem of calculus, the integral calculus of parametric curves, Taylor polynomials, sequences and series and simple differential equations.

Level: UG

Prerequisite(s): MATH 1120, MATH 1130 (C+), or MATH 1140 (B-)

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 1230 3 credits****Calculus for Life Sciences II**

Students will study integral calculus and its applications to biological sciences. In particular, they will study the techniques of integration, including integration by parts and partial fractions; differential equations, including systems of linear differential equations; and mathematical models in the biological sciences.

Level: UG

Prerequisite(s): MATH 1120, MATH 1130, or MATH 1140 (C+).

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 2232 3 credits****Linear Algebra**

Students will study systems of linear equations, matrices, determinants, eigenvalues and eigenvectors, dot products, cross products, the Gram-Schmidt process, vector and scalar projections, lines and planes in Euclidean space. Students will also study vector spaces, including general vector spaces and subspaces, linear independence, spanning sets, bases, and linear transformations. Students will write simple proofs.

Level: UG

Prerequisite(s): One of the following: MATH 1120 (C), MATH 1130 (C+), MATH 1140 (B-), MATH 1220 (C), MATH 1230 (C) or MATH 1240 (C).

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 2315 3 credits****Probability and Statistics**

Students will study introductory probability and statistics using a background of calculus. They will study concepts including randomness, probability, probability distributions for discrete and continuous random variables, descriptive statistics, multivariate distributions, laws of expectation, functions of random variables, statistical inference, and hypothesis testing. Distributions studied will include binomial, normal, geometric, hypergeometric, exponential and Poisson distributions.

Level: UG

Prerequisite(s): One of: MATH 1220, MATH 1230, MATH 1240

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 2321 3 credits****Multivariate Calculus (Calculus III)**

Students will study the calculus of three dimensions. They will study vectors, lines, planes, cylinders and surfaces; vector functions, space curves and motion in space; and differential and integral calculus of functions of several variables. Students will study optimization, including Lagrange Multipliers. They will study rectangular, polar, cylindrical and spherical coordinate systems. Students will study applied problems and use of a computer algebra system.

Level: UG

Prerequisite(s): One of: MATH 1220 (C), MATH 1230 (C+), MATH 1240 (B-)

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 2331 3 credits****Introduction to Analysis**

Students will study the theory that underlies calculus. In particular, they will study real numbers, limits of sequences, limits of functions, continuity, and will learn how to construct proofs involving these concepts.

Level: UG

Prerequisite(s): One of MATH 1220, MATH 1230 (C+), MATH 1240 (B-) or MATH 2232

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 2335 3 credits****Statistics for Life Sciences**

Students will learn statistical techniques and their application to life sciences. They will study descriptive statistics, elementary probability, probability distributions, in particular, the binomial, normal, t and chi-square distributions, confidence intervals and hypothesis testing for population means, and proportions, as well as for differences in population means and proportions. Students will also study linear regression, and the chi-square goodness-of-fit test. Students with credit for MATH 2341 may not take MATH 2335 for further credit.

Level: UG

Prerequisite(s): One of: MATH 1120 (C), MATH 1130 (C), MATH 1140 (C)

Credit Exclusion: MATH 2341

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 2341 4 credits****Introduction to Statistics for Business**

Students will learn statistical techniques and their application to business and economics. They will study descriptive statistics, elementary probability, random variables, sampling distributions, linear regression, correlation, estimation and hypothesis testing. They will also learn how to apply statistical software to descriptive and inferential statistics. Distributions studied will include binomial, normal, t- and chi-square distributions. Students with credit for MATH 2335 may not take MATH 2341 for further credit.

Level: UG

Prerequisite(s): Level C1 as defined in the Math Alternatives Table (p. 779), and 9 credits from courses at the 1100 level or higher.

Credit Exclusion: MATH 2335

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 2410 3 credits****Discrete Mathematics**

Students will study the basic techniques of discrete mathematics, including methods of logic, formal reasoning, induction, recursion, counting, functions and relations, modular arithmetic, and structures such as graphs and trees.

Level: UG

Prerequisite(s): CPSC 1103 and one of the following: MATH 1120, MATH 1130 or MATH 1140

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 2721 3 credits****Complex Numbers and Linear Algebra**

Students will use row reduction to solve systems of linear equations. They will study the algorithms for matrix multiplication, inversion, transposition, determinants, eigenvalues and eigenvectors, and diagonalization, and apply these skills to practical problems. They will study the geometry of Euclidean space. They will study the arithmetic, exponentials and logarithms of complex numbers, and use them to solve a variety of applied problems in physics and engineering. Students will use a Computer Algebra System to solve problems in matrix algebra.

Level: UG

Prerequisite(s): MATH 1220 or MATH 1230

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 2821 3 credits****Multivariate and Vector Calculus**

Students will study the principles of multivariate and vector calculus. They will study surfaces, partial derivatives, gradients, and multiple integrals in polar, cylindrical, and spherical coordinate systems. Students will also study derivatives of vector-valued functions, differential operators, line integrals and Green's theorem, surface integrals including the divergence and Stokes' theorems, conservative fields, and potentials, with an emphasis on applications.

Level: UG

Prerequisite(s): (MATH 1220 or MATH 1230) and (MATH 2721 or MATH 1152)

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 3120 3 credits****Introduction to Applied Mathematics**

Students will learn a variety of techniques and methods useful in applied mathematics. They will study the gamma function and hyperbolic trigonometric functions. Students will investigate power series and Frobenius series methods for solving ordinary differential equations, including selected important differential equations in mathematical physics. Furthermore, they will study Sturm-Liouville problems and orthogonal series. A brief introduction to partial differential equations and separation of variables will be provided.

Level: UG

Prerequisite(s): MATH 2321 and MATH 3421, and one of: MATH 2232 or MATH 1152

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 3130 3 credits****Introduction to the Mathematics Classroom**

Students will study and implement theories related to the teaching of mathematics. They will review and investigate current and past mathematics teaching practices. They will complete a project that integrates theory with practice and produce a portfolio of written work. Students will be required to apply theory through activities such as tutoring mathematics, assisting in a classroom, or developing curriculum materials.

Level: UG

Prerequisite(s): One of: MATH 2232 (C), MATH 2321 (C), MATH 2331 (C), MATH 2410 (C). Note: EDUC 2220 (C) is recommended.

Attributes: ASTR (p. 523), SCIH (p. 521)

**MATH 3140 3 credits****Mathematical Computing**

Students will design and implement MATLAB and Maple programs to solve problems from mathematics and the applications of mathematics. They will be introduced to mathematical word-processing with LaTeX. Students are required to have a portable computer able to run software as designated by the instructor.

Level: UG

Prerequisite(s): All of: (a) CPSC 1103 and MATH 2321; (b) MATH 1152 or 2232; and (c) one of MATH 1115, 2315, 2335, or 2341

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 3150 3 credits****The Structure of Mathematics**

Students will study the underlying structure of mathematics, including mathematical symbolism, introduction to set theory and introduction to logic. They will develop an understanding of methods of proof and an appreciation for the structure of mathematics.

Level: UG

Prerequisite(s): MATH 2232 (C) and one of: MATH 1220 (C), MATH 1230 (C+), or MATH 1240 (B-).

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 3160 3 credits****Group Theory**

Students will study the fundamental concepts and results of group theory. They will study groups and subgroups, Lagrange's theorem, homomorphisms, normal subgroups, factor groups, Cauchy's theorem and direct products.

Level: UG

Prerequisite(s): Both (a) MATH 1220, MATH 1230 (C+) or MATH 1240 (B-), and (b) MATH 2232.

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 3170 3 credits****Complex Variables**

Students will study complex numbers, functions of complex numbers, analytic functions, Cauchy-Riemann equations, elementary functions, contour integration, Cauchy's integral theorem and formula, series representations of analytic functions, poles and residues, with applications to physics and engineering.

Level: UG

Prerequisite(s): Both (a) MATH 1152, MATH 2232 or MATH 2721, and (b) MATH 2321 or MATH 2821

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 3250 3 credits****Geometry**

Students will study Euclidean and other geometries, and construct geometrical proofs and objects. They will apply geometric concepts and reasoning to practical problems.

Level: UG

Prerequisite(s): MATH 2232 (C) and one of the following: MATH 1220 (C), 1230 (C+), or 1240 (B-)

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 3315 3 credits****Applied Inferential Statistics**

Students will be introduced to the standard techniques of multiple regression analysis. They will study simple regression, ANOVA, multivariable distributions, analysis of residuals and general linear models and their role in research.

Level: UG

Prerequisite(s): 15 credits from courses at the 1100 level or higher and one of: MATH 1115 (C), MATH 2335 (C), MATH 2341 (C), or MATH 2315 (C).

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 3322 3 credits****Vector Calculus (Calculus IV)**

Students will study the calculus of vector valued functions and vector fields. They will study derivatives of vector valued functions, the chain rule, Jacobians and invertibility, differential operators, line integrals and Green's theorem, surface integrals including divergence and Stokes' theorems, path independence and conservative fields and potentials.

Level: UG

Prerequisite(s): MATH 2321 (C) and one of: MATH 2232 (C), MATH 1152 (C)

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 3421 3 credits****Ordinary Differential Equations**

Students will study solving first order differential equations, second order linear differential equations with constant coefficients, Laplace transforms, systems of linear differential equations, and applications of differential equations. Students will also be using a computer algebra system.

Level: UG

Prerequisite(s): Both (a) MATH 1152 or 2232, and (b) MATH 1220, MATH 1230 (C+) or MATH 1240 (B-)

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 3431 3 credits****Partial Differential Equations**

Students will study the wave equation, the heat equation, Laplace's equation, and other classical equations of mathematical physics. They will study characteristic curves, solutions to the heat and wave equations on the infinite, semi-infinite and finite line, Fourier series, Laplace transforms, and numerical solutions using finite differences.

Level: UG

Prerequisite(s): MATH 3421

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 3450 3 credits****History of Mathematics**

Students will study the aspects of the history of mathematics from its earliest beginnings in solving concrete problems through the development of abstraction and rigour in the nineteenth and early twentieth centuries. They will examine and analyze both the growth of ideas and the context in which they developed, with emphasis on the mathematics taught in secondary school and the first two years of university study.

Level: UG

Prerequisite(s): Both (a) MATH 1220, MATH 1230 (C+) or MATH 1240 (B-), and (b) MATH 2232

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 4130 3 credits****Theory of Mathematics Education**

Students will explore theories and trends in mathematics education. They will survey significant historical, philosophical, psychological and societal factors influencing the development of mathematics education as a field of inquiry, and will critically examine and discuss current theories and research in mathematics instruction. They will investigate problem solving, reasoning and communication in mathematics.

Level: UG

Prerequisite(s): One of: MATH 2232 (C), MATH 2321 (C), MATH 2331 (C), MATH 2410 (C). Note: EDUC 2220 (C) is recommended.

Attributes: ASTR (p. 523), SCIH (p. 521)

**MATH 4150 3 credits****Number Theory**

Students will study the following topics: divisibility, properties of types of integer numbers, primes, congruences, Diophantine equations, primitive roots, and quadratic residues.

Level: UG

Prerequisite(s): Both (a) MATH 1220, MATH 1230 (C+) or MATH 1240 (B-), and (b) MATH 2232.

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 4190 3 credits****Introduction to Point-Set Topology**

Students will study the fundamental concepts and results of point-set (general) topology. They will study sets, relations and functions, order, cardinality, Axiom of Choice, topological spaces, bases and subbases, continuity and homeomorphisms, metric spaces, countability and compactness.

Level: UG

Prerequisite(s): MATH 2232 (C) and MATH 2331 (C) and one of the following: MATH 1220 (C), 1230 (C+), or 1240 (B-)

Attributes: ASTR (p. 523), SCIH (p. 521)

**MATH 4210 3 credits****Biomathematics**

Students will study mathematical modelling and data analysis for biological systems. They will focus on developing and analysing dynamic models of biological systems and processes. They will study the mathematics of population dynamics, models of metabolic processes, genomics and epidemiology.

Level: UG

Prerequisite(s): MATH 2315 and MATH 3421.

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 4220 3 credits****Numerical Methods**

Students will study the theory and practical application of numerical methods for approximating solutions of linear and nonlinear problems. They will study solutions to nonlinear equations, interpolation and splines, numerical differentiation and integration, solution of initial and boundary value problems, and error sources and analysis. Students are required to have a portable computer able to run software as designated by the instructor.

Level: UG

Prerequisite(s): MATH 2321; and one of: MATH 2232, MATH 1152, MATH 2721; and one of: CPSC 1204, MATH 3140

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 4240 3 credits****Mathematical Modelling**

Students will study the formation, analysis, and interpretation of mathematical models drawn from the physical, biological, economic, and social sciences. They will study continuous and discrete, deterministic and stochastic models. Students will use techniques such as differential and difference equations, matrix analysis, optimization, simple stochastic processes, and numerical methods. NOTE: Students are required to have a portable computer able to run software as designated by the instructor.

Level: UG

Prerequisite(s): MATH 2321 and MATH 2315 and MATH 3421 and one of: CPSC 1204, MATH 3140

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 4250 3 credits****Special Topics in Mathematics**

Students will study a particular advanced topic in mathematics, depending upon student interest and faculty availability. Note: Students may take this course multiple times for further credit on different topics.

Level: UG

Prerequisite(s): MATH 2232 (C) and one of: MATH 1220 (C), MATH 1230 (C+), MATH 1240 (B-)

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**MATH 4350 3 credits****Senior Project**

Students will complete a substantial research project under the supervision of an instructor. They will identify relevant sources of information, in the form of a literature search and review, and submit a final paper investigating a research question. Note: The student's topic must be approved by the Mathematics Department.

Level: UG

Prerequisite(s): 9 credits from courses in MATH at the 3000 level or higher.

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

# Mechatronics and Advanced Manufacturing Technology (MAMT)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

## MAMT 1100 4 credits

### Electrical Components

Students will describe the functions and physical properties of electrical components and their roles in a mechatronic system. They will apply troubleshooting techniques and strategies to analyze and repair a faulty system. Students will create technical documentation to report abnormalities and the process used to return the system to normal. They will be introduced to current occupational safety regulations and apply safe work practices.

Level: UG

Co-requisite(s): MAMT 1110, 1120, 1130

Attributes: F2A5 (p. 521), TRAD (p. 521)

## MAMT 1110 3 credits

### Mechanical Components and Electrical Drives

Students will describe the functions and physical properties of mechanical components and electrical drives and their roles in a mechatronic system. They will compare the properties of, and the relationship between, alternating current (AC) and direct current (DC) in electrical drives. Students will apply mechanical principles and analyze material and lubrication selections to increase efficiency in a mechanical system. They will apply troubleshooting techniques and strategies to analyze and repair a faulty system and produce relevant documentation. Students may be required to participate in field trips.

Level: UG

Co-requisite(s): MAMT 1100, 1120, 1130

Attributes: F2A5 (p. 521), TRAD (p. 521)

## MAMT 1120 4 credits

### Electro-pneumatic and Hydraulic Control Circuits

Students will describe the functions and physical properties of pneumatic, electro-pneumatic and hydraulic control circuits and their roles in a mechatronic system. They will calculate volumes, determine effective operating conditions and apply safe operating parameters of pneumatic and hydraulic components. Students will apply troubleshooting techniques to identify and correct malfunctions. They will create technical documentation to report abnormalities and the process used to return the system to normal.

Level: UG

Co-requisite(s): MAMT 1100, 1110, 1130

Attributes: F2A5 (p. 521), TRAD (p. 521)

## MAMT 1130 4 credits

### Digital Fundamentals and Programmable Logic Controllers (PLC)

Students will describe the role of programmable logic controllers (PLCs) and trace the flow of information in a mechatronic system. They will apply the fundamentals of digital logic to write basic programs for PLCs and test these programs. Students will apply troubleshooting strategies to localize problems caused by malfunctioning PLC hardware and produce relevant documentation. They will complete a project to digitally control a mechatronic system.

Level: UG

Co-requisite(s): MAMT 1100, 1110, 1120

Attributes: F2A5 (p. 521), TRAD (p. 521)

## MAMT 1200 2 credits

### Process Control Technologies

Students will apply the principles of closed-loop control in a mechatronic system. They will create charts for time-based changes of process variables and establish controller operating parameters. Students will describe On/Off and Proportional/Integral/Derivative (PID) controllers and optimize the performance of each. They will apply troubleshooting techniques to analyze, repair and document a faulty system.

Level: UG

Prerequisite(s): MAMT 1100, MAMT 1110, MAMT 1120, MAMT 1130

Co-requisite(s): MAMT 1210, 1220, 1230

Attributes: F2A5 (p. 521), TRAD (p. 521)

## MAMT 1210 6 credits

### Integrated Automation and Automation Systems

Students will write programs using a variety of functions for Programmable Logic Controllers (PLC) and connect sensors to PLC analogue modules. They will create different types of networks and apply troubleshooting techniques to re-establish a faulty network. Students will apply programming techniques to operate microcontrollers and microprocessors in a mechatronic system. They will use Computer Aided Design (CAD) software to create three-dimensional models, and Computer Aided Manufacturing (CAM) software to create programs for the Computer Numerical Control (CNC) equipment. Students may be required to participate in field trips.

Level: UG

Prerequisite(s): MAMT 1100, MAMT 1110, MAMT 1120, MAMT 1130

Co-requisite(s): MAMT 1200, MAMT 1220, MAMT 1230

Attributes: F2A5 (p. 521), TRAD (p. 521)

## MAMT 1220 5 credits

### Motor Control and Mechanical Systems

Students will apply the principles of motor control, motor loading and types of braking to optimize the performance of a mechatronic system. They will analyze performance data to determine causes of motor failure and apply preventive strategies to protect motors. Students will apply the principles of kinetics and perform calculations to determine force, stress and wear on mechanical components. They will apply troubleshooting techniques to analyze and repair a faulty system and produce relevant documentation.

Level: UG

Prerequisite(s): MAMT 1100, MAMT 1110, MAMT 1120, MAMT 1130

Co-requisite(s): MAMT 1200, MAMT 1210, MAMT 1230

Attributes: F2A5 (p. 521), TRAD (p. 521)

## MAMT 1230 2 credits

### Manufacturing Processes

Students will carry out the duties of assigned roles in a factory simulation. They will analyze factory performance results, recommend improvements, reflect on their process and revise until the optimized design is achieved. Students will work in teams to design a factory that will meet the requirements of a client's need for a particular product. They will give presentations on the outcomes of the project and their learning process throughout.

Level: UG

Prerequisite(s): MAMT 1100, MAMT 1110, MAMT 1120, MAMT 1130

Co-requisite(s): MAMT 1200, MAMT 1210, MAMT 1220

Attributes: F2A5 (p. 521), TRAD (p. 521)

**MAMT 1300 4 credits****Manufacturing Trends and Technology**

Students will describe the history and evolution of manufacturing and explore how the principles of lean manufacturing create efficient systems. They will describe types of manufacturing, categorize types of equipment and identify the issues related to raw material procurement. Students will describe the environmental impact of manufacturing and describe the cradle-to-grave life cycle of products. They will compare the types of packaging used to deliver products, storage issues and the challenges of different types of transportation for manufactured products in a global system. Students may be required to participate in field trips.

Level: UG

Attributes: F2A5 (p. 521), TRAD (p. 521)

**MAMT 1400 4 credits****Professional Skills and Work Practicum**

Students will participate in a work placement practicum in a manufacturing environment. They will apply office procedures and software to perform professionally in the manufacturing industry. Students will apply time management procedures to work efficiently and employ stress management strategies to help maintain a healthy work/life balance. They will create a resume and an online portfolio of their training and give presentations to share their experiences in the manufacturing sector. Students may be required to participate in field trips.

Level: UG

Attributes: F2A5 (p. 521), TRAD (p. 521)

## Metal Fabrication (MFAB)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**MFAB 1100 2.5 credits****Safe Working Procedures**

Students will use personal protective equipment, adhere to applicable safety regulations and use fire suppression equipment. They will employ safe lifting techniques, use cranes, lift trucks and material handling equipment, as well as tie knots, bends, and hitches in ropes to be used in the rigging of equipment. Students will use safety procedures to erect ladders and scaffolding and investigate the common causes of accidents in metal fabrication shops and job sites and address special precautions to be taken in adverse weather conditions.

Level: VO

Attribute: TRAD (p. 521)

**MFAB 1110 2 credits****Trade-Specific Tools**

Students will select and use appropriate tools for various tasks with an emphasis on safety. They will complete various assignments and projects using hand tools, bench and hand grinders, portable power tools, and drill presses specific to the metal fabrication industry.

Level: VO

Prerequisite(s): MFAB 1100

Attribute: TRAD (p. 521)

**MFAB 1115 2 credits****Basic Stationary Power Equipment**

Students will operate metal fabrication equipment including power shears, power brake press, power plate rolls, ironworker, pipe cutters, hole punches, and power metal saws. They will safely complete various basic projects using stationary shop equipment as they relate to the metal fabrication industry.

Level: VO

Prerequisite(s): MFAB 1100

Attribute: TRAD (p. 521)

**MFAB 1120 2 credits****Oxy-fuel and Cutting Equipment**

Students will assemble and disassemble cutting equipment and use safety procedures for oxy-fuel equipment. They will use oxy-fuel equipment to heat and cut various plate and structural shapes and pipe smoothly and accurately, with hand-held torches and machines.

Level: VO

Prerequisite(s): MFAB 1100

Attribute: TRAD (p. 521)

**MFAB 1125 2.5 credits****Welding for Metal Fabrication**

Students will learn the theory of oxy-fuel and arc welding. They will weld various gauges of metal with oxy-fuel, and arc weld various shapes of metal using Shielded Metal Arc Welding (SMAW) and Gas Metal Arc Welding (GMAW) practices. Students will learn the theory of air carbon arc cutting and plasma arc cutting, and will use air carbon arc cutting equipment to complete various practical projects. They will also use mechanical testing equipment for testing weld specimens.

Level: VO

Prerequisite(s): MFAB 1100

Attribute: TRAD (p. 521)

**MFAB 1130 2 credits****Read Basic Drawings**

Students will interpret basic blueprints, and sketch or draw objects in a variety of methods including orthographic projection, isometric projection, and secondary views of objects. They will interpret drafting and welding symbols, multi-view shop drawings as well as basic structural drawings. Students will lay out simple templates, identify common structural shapes, use basic layout terms, and develop patterns using parallel line development.

Level: VO

Attribute: TRAD (p. 521)

**MFAB 1141 4 credits****Basic Metal Fabrication**

Students will perform shop layout tasks, math calculations, and will prepare work orders. They will differentiate among common fitting considerations and procedures, safe work practices, standard allowances, required accuracy, and shop tolerances. Students will complete a variety of metal fabrication practical projects using different types of equipment, metals, and structural shapes. They will utilize common methods of metal preparation for fine finishing of projects and application of a variety of coatings and paints.

Level: VO

Prerequisite(s): MFAB 1100

Attribute: TRAD (p. 521)

**MFAB 1150 1.5 credits****Metallurgy Theory**

Students will describe the effects of heat and stress on metals and differentiate among the types, grades and properties of steels, as well as choose appropriate stress relieving techniques for metals. They will employ standard destructive testing inspection techniques.

Level: VO

Attribute: TRAD (p. 521)

**MFAB 1206 2 credits****Metal Fabrication Math**

Students will study applied trades mathematics required by metal fabricators. They will solve problems involving dimension, area, weight and volume. Students will calculate ratio and proportion. They will apply geometric construction, trigonometry and Pythagoras theorem to practical applications.

Level: VO

Attribute: TRAD (p. 521)

## Millwright (MILL)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**MILL 1300 4 credits****Machining and Computer Numerical Control (CNC) Programming**

Students will use hand and power tools and follow instructions on fabrication drawings to create metal projects. They will use manual milling equipment and describe correct equipment settings for characteristics of different materials. Students will use a variety of Computer Numerical Control (CNC) equipment and tools, and compare types of motor operation. They will apply estimating procedures to determine the cost of projects and write a project report.

Level: UG

Attributes: F2A5 (p. 521), TRAD (p. 521)

## Millwright/Industrial Mechanic (MWIN)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables/) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**MWIN 1101 2 credits****Millwright Trade Safety**

Students will address safe work practices and how they pertain to industrial work sites. They will examine the Occupational Health and Safety Regulation and Guidelines of WorkSafeBC applicable to the millwright trade. Students will practice the safe handling and storage methods for materials and equipment. They will participate in weekly toolbox safety orientation sessions. Students will interact with other students on a program safety committee to achieve an effective safe working environment.

Level: VO

Attribute: TRAD (p. 521)

**MWIN 1106 1 credit****Print Reading and Sketching**

Students will identify the types of drawings and diagrams associated with the millwright trade. They will produce sketches, using the elements common to all drawings, plans and sketches.

Level: VO

Co-requisite(s): MWIN 1101

Attribute: TRAD (p. 521)

**MWIN 1112 1 credit****Measuring Tools**

Students will use a variety of measuring tools and measuring techniques appropriate and necessary to make non-precision and precision measurements in either inch or metric standard. They will complete assignments that challenge them to make informed decisions on selection, use, concepts and procedures used with each tool or combination of tools taught. Students will develop an understanding of the need for consistency and accuracy based on equipment use. They will make sketches that use detailed methods of reporting.

Level: VO

Co-requisite(s): MWIN 1101

Attribute: TRAD (p. 521)

**MWIN 1113 1.5 credits****Layout and Machine Foundations**

Students will perform two distinctly different types of layouts; shop layout and machine foundation layout. In shop layout, the student will develop strategy from a blueprint or sketch, then lay out the shapes of objects (parts) for manufacturer. In machine foundation layout, the student details all aspects of machine foundations, including identifying types of bases, methods of anchoring, setting, and leveling bases to correct elevations. They will identify, select, and use the appropriate layout tools to produce machine foundation layouts to the desired accuracy required for setting industrial machines.

Level: VO

Co-requisite(s): MWIN 1101

Attribute: TRAD (p. 521)

**MWIN 1121 1 credit****Hand Tools and Bench Work**

Students will develop basic hand skills that are the foundation for becoming a millwright (industrial mechanic) craftsperson. They will complete shop projects that involve bench work to practice hand skills using metal cutting tools, holding tools, striking tools, and assembling tools. Students will develop knowledge and skill in tool identification, tool selection, and tool maintenance.

Level: VO

Co-requisite(s): MWIN 1101

Attribute: TRAD (p. 521)

**MWIN 1131 1 credit****Power Hand Tools**

Students will develop and practise the skills required to safely use a large selection of power hand tools used in industrial applications. They will use electric, pneumatic, as well as powder actuated power tools. Students will plan and develop strategies to complete projects, and will create written maintenance reports on pieces of equipment or procedures for tool use. They will be certified in the use of selected powder actuated (explosive) tools.

Level: VO

Co-requisite(s): MWIN 1101

Attribute: TRAD (p. 521)

**MWIN 1135 2 credits****Rigging**

Students practice and develop the skills to tie knots, bends and hitches for specific rigging applications. They will select ropes, slings, hoists, attachments, and other rigging equipment to safely lift and move heavy objects. Students demonstrate their knowledge of Provincial Occupational Health and Safety Regulations pertaining to rigging through practical competencies and written tests.

Level: VO

Co-requisite(s): MWIN 1101

Attribute: TRAD (p. 521)

**MWIN 1140 4 credits****Machine Tool Basics**

Students will operate standard machine tools like metal-cutting saws, drilling machines, bench grinders and surface grinders. They will learn machining fundamentals and common methods of machining and shaping parts to meet given specifications. Students will practice common machining techniques to accurately produce shapes of various types on these machine tools. They will use reasoning and problem solving skills to interpret print information, plan machine tool operations and demonstrate safety awareness when using the machine tools.

Level: VO

Prerequisite(s): MWIN 1131

Attribute: TRAD (p. 521)

**MWIN 1141 3 credits****Machine Tool Basics**

Students will operate standard machine tools like metal-cutting saws, drilling machines and bench grinders. They will learn machining fundamentals and common methods of machining and shaping parts to meet given specifications. Students will practice common machining techniques to accurately produce shapes of various types on these machine tools. They will use reasoning and problem solving skills to interpret print information, plan machine tool operations and demonstrate safety awareness when using the machine tools.

Level: VO

Co-requisite(s): MWIN 1101

Attribute: TRAD (p. 521)

**MWIN 1150 2 credits****Machine Tools**

Students will operate machine tools like milling machines, lathes and a variety of other machine tools to produce industrial components/parts. They will develop machining knowledge and skills while accurately producing these various parts to given specifications. Students will use reasoning and problem solving skills to interpret print information, plan machine tool operations and demonstrate safety awareness when using the machine tools.

Level: VO

Prerequisite(s): MWIN 1140

Attribute: TRAD (p. 521)

**MWIN 1160 1 credit****Fasteners and Fittings**

Students will identify and use a wide variety of fasteners to complete assignments that require them to differentiate between thread systems. They will use drawings, parts catalogues and service manuals to locate technical information on fasteners. Students will select the necessary and appropriate hand tools to make bolted and screwed connections and ensure that parts are assembled to specifications.

Level: VO

Co-requisite(s): MWIN 1101

Attribute: TRAD (p. 521)

**MWIN 1170 1.5 credits****Metallurgy**

Students will participate in lectures and will work in small discussion groups to examine and differentiate the properties of metals, interpret heat-treatment terms, and learn the requirements for different metal heat-treatments. They will learn the basics of different metal manufacturing processes. Students will experiment with identifying different properties of metals and non-metals, with conducting heat-treatments, and with destructive and non-destructive tests on metal samples in the shop.

Level: VO

Prerequisite(s): MWIN 1121

Attribute: TRAD (p. 521)

**MWIN 1180 2.5 credits****Level 1 Welding for Millwrights**

Students will use a variety of welding processes, welding equipment and other metal working tools appropriate and necessary for the task of joining metals. They will learn and practise procedures, terminology and appropriate safety precautions, as applied to oxy-acetylene use and shielded metal arc welding processes.

Level: VO

Prerequisite(s): MWIN 1101

Attribute: TRAD (p. 521)

**MWIN 1205 1 credit****Lubrication**

Students will study principles of friction, lubrication theory, and the function of lubricating products. They will dismantle, inspect, assemble, and test mechanical lubrication systems for maintenance then complete maintenance reports.

Level: VO

Co-requisite(s): MWIN 1101

Attribute: TRAD (p. 521)

## Music (MUSI)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**MUSI 1105 2 credits****Major Instrument - Foundation I**

Students will work one-on-one with an instructor (vocal or instrumental) on the interpretation and performance of repertoire. Students will also develop a foundation of technical, musical, and sight reading skills essential for advanced study.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1111 3 credits****History of Popular Music**

Students will survey the evolution of Western popular music from the early 20th century through to the present. Students will examine the various influences and exclusions that have shaped the development of different styles of popular music. They will also consider how musical elements, lyrics, and technology have shaped popular music.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_3 (p. 522)

**MUSI 1113 3 credits****Introduction to the Music Industry**

Students will undertake a comprehensive overview of the music industry as well as familiarize themselves with the factors that contribute to success in the music business. They will also gain an understanding of the inter-relatedness of the many facets of the music industry, an essential element in professional growth, viability, and success.

Level: UG

Credit Exclusion: MUSI 1112

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1115 3 credits****Classical Music in Western Culture**

Students will cultivate an understanding of classical music in western culture by listening to and studying musical works representing different styles, genres, geographical regions, and time periods. Students will also gain an understanding of the social, political, economic, and artistic context in which this music emerged. They will also develop basic aural skills in hearing rhythm, melody, harmony, colour, texture, form, and orchestration. To further enhance their aural skills, students will attend specified concerts (with costs incurred) and will actively listen to and analyse the performances. Note: Not for credit towards the Bachelor of Music in Musical Arts degree.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_3 (p. 522)

**MUSI 1120 3 credits****Music Rudiments**

Students will study the basic written aspects of musical language, acquiring the knowledge of all common clefs, intervals, common scales, basic chord structures and progressions, cadences, transposition, rhythm and fundamental musical terms. NOTE: This course is open to non-music majors, and MUSI 1120 replaces MUSI 1100 & MUSI 1200. Students may only receive credit for either MUSI 1100 & 1200 or MUSI 1120.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_2 (p. 522)

**MUSI 1130 3 credits****Music Technology I**

MUSI 1130 provides an introduction to music technology and desktop recording. Key topics include digital audio workstations, music notation software, music composition and sound design. Students will present an online portfolio of their work in the final weeks of the course. NOTE: MUSI 1130 replaces MUSI 1102. Students may only receive credit for either MUSI 1130 or 1102.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_2 (p. 522)

**MUSI 1133 2 credits****Fretboard Studies I**

Students will begin to develop a full knowledge of the harmonic and melodic capabilities of the guitar fretboard. They will study fretboard harmony (using four-note chord voicings), scales, and arpeggios, and will cultivate music reading skills in lower and intermediate positions. Note: For students whose first instrument is guitar. This course is offered every second year.

Level: UG

Prerequisite(s): Audition and/or interview

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1150 3 credits****The Language of Music I**

Students will review basic musical concepts, including notation, intervals, scales, modes, chords, and rhythm. They will then study elementary acoustics, effective melodic design and begin writing basic four-part harmony. They will see illustrations of all concepts through the analysis of representative historical examples.

Level: UG

Prerequisite(s): Acceptance into the BMMA or Music Diploma and (MUSI 1200 with a "B" OR Kwantlen Music Placement into MUSI 1150/1151)

Co-requisite(s): Both MUSI 1151 and MUSI 1154 recommended

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1151 2 credits****Aural Musicianship I**

Students will work toward the development of essential musicianship skills, including sight singing, rhythm, conducting, error detection, as well as melodic, harmonic, and rhythmic dictation.

Level: UG

Prerequisite(s): Acceptance into the BMMA or Music Diploma and (MUSI 1200 with a "B" or Kwantlen Music Placement into MUSI 1150/51)

Co-requisite(s): MUSI 1150 and MUSI 1154

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1153 3 credits****History of Music I: Cornerstones of Music History**

This music history survey course engages students in an overview of major innovations in Western art music from antiquity to the present under the theme "Cornerstones of Music History." Students will be introduced to salient musical characteristics through selected examples of Western music, and will discuss how these characteristics were affected by contextual factors including socio-cultural developments and geo-political events. Students will also cultivate aural skills by critically listening to music and studying representative compositions, and will begin to develop the skills that music historians use to research and write about music.

Level: UG

Prerequisite(s): MUSI 1115 or MUSI 1203 with a "B" or 75% (B) or above on the KPU Music Placement Test

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1154 1 credit****Keyboard Skills I**

Students will begin to develop basic keyboard skills. They will study keyboard harmony (chord progressions and harmonization) and will develop the ability to use simple accompaniment patterns and to harmonize simple melodies. Students will also develop skills in sight-reading and transposition.

Level: UG

Prerequisite(s): Acceptance into the BMMA or Music Diploma

Co-requisite(s): MUSI 1150

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1155 1 credit****Secondary Instrument - I**

Students will work one-on-one with an instructor (vocal or instrumental) on the interpretation and performance of repertoire, and on fundamental technical and sight-reading requirements. Note: Students will normally take no more than four (4) semesters of secondary instrument instruction.

Level: UG

Prerequisite(s): Students must successfully pass an audition to meet all requirements of MUSI 1154, MUSI 1254, MUSI 2354, MUSI 2454, or have permission of the department chair.

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1156 3 credits****Major Instrument - Performance I**

Students will work one-on-one with an instructor (vocal or instrumental) on the interpretation and performance of repertoire, and on fundamental technical and sight-reading requirements.

Level: UG

Prerequisite(s): Successful audition

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1157 2 credits****Major Instrument - Concentration I**

Students will work one-on-one with an instructor (vocal or instrumental) on the interpretation and performance of repertoire, and on fundamental technical and sight-reading requirements. Note: Diploma students will normally take no more than four (4) semesters of private lessons in courses ending in the numbers 56 or 57.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1167 2 credits****Kwantlen String Orchestra I**

Students will rehearse and perform a wide variety of orchestral repertoire from the 16th to the 20th century, as well as works by contemporary Canadian composers. Note: Placement in the ensemble is by audition and interview. This course is open to all music majors and other Kwantlen students. Members of the community may participate on a non-credit basis.

Level: UG

Prerequisite(s): Ensemble placement according to instrumentation by audition and/or interview in consultation with performance faculty at the discretion of the conductor of each ensemble.

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_2 (p. 522)

**MUSI 1168 2 credits****Kwantlen Wind Ensemble I**

Students will rehearse and perform works of the Wind Literature repertoire from the 16th century to the present day. They will study and perform new works by Canadian composers each semester. Students will perform major works from the 400-year repertoire of Wind Ensemble, Chamber Winds and Brass Ensemble literature. Note: Placement in ensemble is by audition and/or interview. This course is open to all music majors and other Kwantlen students. Members of the community may participate on a non-credit basis.

Level: UG

Prerequisite(s): Ensemble placement according to instrumentation by audition and/or interview in consultation with performance faculty at the discretion of the conductor of each ensemble.

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_2 (p. 522)

**MUSI 1169 2 credits****Kwantlen Chorus I**

Students will rehearse and perform choral works from the 16th century to the present in Western Classical tradition as well as works from the folk, jazz, popular, and musical theatre idioms. Note: Placement in ensemble is by audition and/or interview. This course is open to all Music majors and other Kwantlen students. Members of the community may participate on a non-credit basis.

Level: UG

Prerequisite(s): Placement according to voice type by interview

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_2 (p. 522)

**MUSI 1171 2 credits****Guitar Chamber Ensemble I**

Students will perform duo, trio, and/or quartet music for guitar ensemble. They will study classical compositions but may also perform arrangements or transcriptions of standard jazz compositions, world, and folk music.

Level: UG

Prerequisite(s): Admission to the Diploma in Music program and/or permission of instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1172 2 credits****Piano Chamber Ensemble I**

Students will be placed in small ensembles for the study, preparation and performance of four-hand and eight-hand piano repertoire and works involving piano and different instrumental or vocal combinations. They will work with an assigned instrumental or vocal partner and will accompany that person in recital and at the final jury.

Level: UG

Prerequisite(s): Permission of the instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1173 2 credits****Percussion Ensemble I**

Students will study and perform repertoire for percussion instruments of both definite and indefinite pitch. They will also study selected rhythmic systems of world music cultures such as African drumming and Indonesian Gamelan. Note: Both percussion and non-percussion majors may take this course.

Level: UG

Prerequisite(s): Permission of the instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1174 2 credits****Woodwind Ensemble I**

Students will study, rehearse and perform original compositions and arrangements of repertoire for different woodwind instrument combinations. Students will, depending on enrolment and instrument type, study and perform in quartets, quintets, and larger woodwind choirs. They will perform major works from the 400-year repertoire of the woodwind ensemble literature.

Level: UG

Prerequisite(s): Permission of the instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1175 2 credits****Brass Ensemble I**

Students will study, rehearse and perform original compositions and arrangements of repertoire for different brass instrument combinations. Students will, depending on enrolment and instrument type, study and perform in quartets, quintets, and larger brass choirs. They will perform major works from the 400-year repertoire of the brass ensemble literature.

Level: UG

Prerequisite(s): Permission of the instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1176 2 credits****Vocal Chamber Ensemble I: Madrigal to Jazz**

Students will study, rehearse and perform vocal repertoire in a variety of musical styles, ranging from Renaissance to the present. They will audition for the ensemble at the beginning of each semester. Students will perform in concerts both on- and off-campus.

Level: UG

Prerequisite(s): Successful audition

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1177 2 credits****Jazz Band I**

Students will work on improvisation skills and chart reading in an ensemble setting. They will perform selections from the standard jazz band repertoire. Students will perform in concert both on- and off-campus throughout the semester.

Level: UG

Prerequisite(s): Permission of the instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1178 2 credits****Jazz Combo I**

Students will work on improvisation skills and chart reading in a small jazz combo setting. They will also prepare and perform selections from the standard jazz band repertoire. Students will perform in concert both on- and off-campus throughout the semester.

Level: UG

Prerequisite(s): Permission of the instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1179 2 credits****String Chamber Ensemble I**

Students will study, prepare and perform works for string duos, trios and/or quartets. Students may also work in mixed ensembles involving piano, woodwinds, brass, and/or guitar.

Level: UG

Prerequisite(s): Acceptance into the Diploma in Music or permission of instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1180 2 credits****Opera Workshop Ensemble I**

Students will study, rehearse and perform staged solo, small ensemble and chorus repertoire from a variety of musical styles, including Opera, Oratorio, Musical Theatre and Operetta. Students will perform in concerts both on and off campus. Note: Students will be required to perform in a variety of languages.

Level: UG

Prerequisite(s): Placement according to voice type or successful audition

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1181 2 credits****Kwantlen Chamber Singers I**

Students will study, rehearse and perform chamber choir repertoire in a variety of musical styles, ranging from Renaissance to the present day. They will audition for the ensemble at the beginning of each semester. Students will perform in concerts both on and off campus. Note:

Students may perform in a variety of languages

Level: UG

Prerequisite(s): Successful audition

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1205 2 credits****Major Instrument - Foundation II**

Students will continue to work one-on-one with an instructor (vocal or instrumental) on the interpretation and performance of repertoire. Students will also continue to establish a foundation of technical, musical, and sight reading skills essential for advanced study.

Level: UG

Prerequisite(s): MUSI 1105

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1233 2 credits****Fretboard Studies II**

Students will continue to develop a full knowledge of the harmonic and melodic capabilities of the guitar fretboard. They will undertake advanced level studies in fretboard harmony, scales, arpeggios, and modes, and will cultivate music reading skills in upper positions. Note: For students whose first instrument is guitar. This course is offered every second year.

Level: UG

Prerequisite(s): MUSI 1133 or permission of the instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1250 3 credits****The Language of Music II**

Students will study late-Baroque and Classical diatonic harmony through writing and analysis. They will examine the function of all diatonic seventh chords and complete writing exercises in choral and keyboard styles. They will also look at musical form (period, binary, rounded binary, ternary) and combine their knowledge of harmony and form in the composition of a short original work.

Level: UG

Prerequisite(s): MUSI 1150

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1251 2 credits****Aural Musicianship II**

Students will continue to develop essential musicianship skills, including sight singing, rhythm, conducting, error detection, as well as melodic, harmonic, and rhythmic dictation.

Level: UG

Prerequisite(s): MUSI 1151 or permission of instructor

Co-requisite(s): MUSI 1250 and MUSI 1254 (recommended)

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1253 3 credits****History of Music II: Heroes, Politics, and War**

This music history survey course engages students in an intensive overview of major developments in Western art music under the theme "Heroes, Politics, and War." Students will examine changes to musical genres, forms, and aesthetics from antiquity to the present, and will relate them to significant socio-cultural developments and geo-political events. They will compare and contrast the careers and artistic outputs of leading composers in the history of Western music, and examine how these composers' successes and failures were often associated with external social, cultural, and technological factors. Students will continue to cultivate aural skills by critically listening to music and studying representative compositions, and will further develop skills in researching, writing, and thinking about music.

Level: UG

Prerequisite(s): MUSI 1153

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1254 1 credit****Keyboard Skills II**

Students will develop basic keyboard skills by furthering their study of keyboard harmony (chord progressions and harmonization) and by developing their ability to harmonize melodies using simple accompaniment patterns. They will also continue to improve their reading skills (sight-reading and transposition).

Level: UG

Prerequisite(s): MUSI 1154 or audition and/or interview

Co-requisite(s): MUSI 1250 or permission of instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1255 1 credit****Secondary Instrument - II**

Students will continue to work one-on-one with an instructor (vocal or instrumental) on the interpretation and performance of repertoire, and on fundamental technical and sight-reading requirements. Note: Students will normally take no more than four (4) semesters of secondary instrument instruction.

Level: UG

Prerequisite(s): MUSI 1155 or permission of the department head.

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1256 3 credits****Major Instrument - Performance II**

Students will work one-on-one with an instructor (vocal or instrumental) on the interpretation and performance of assigned repertoire, and on technical and sight reading requirements. They will participate in master classes as required by the instructor.

Level: UG

Prerequisite(s): MUSI 1156 (or MUSI 1157 with successful audition)

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1257 2 credits****Major Instrument - Concentration - II**

Students will continue to work one-on-one with an instructor (vocal or instrumental) on the interpretation and performance of repertoire, and on fundamental technical and sight reading requirements. Note: Diploma students will normally take no more than four (4) semesters of private lessons in courses ending in the numbers 56 or 57.

Level: UG

Prerequisite(s): MUSI 1157 or (MUSI 1165 with successful audition)

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1267 2 credits****Kwantlen String Orchestra II**

Students will rehearse and perform a wide variety of orchestral repertoire from the 16th to the 20th century, as well as works by contemporary Canadian composers. Note: Placement in the ensemble is by audition and interview. This course is open to all music majors and other Kwantlen students. Members of the community may participate on a non-credit basis.

Level: UG

Prerequisite(s): MUSI 1167

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_2 (p. 522)

**MUSI 1268 2 credits****Kwantlen Wind Ensemble II**

Students will rehearse and perform Wind Literature repertoire from the 16th Century to the present day. Students will study and perform contemporary works by Canadian composers. Students will perform major works from the 400-year repertoire of Wind Ensemble, Chamber Winds, and Brass Ensemble literature. Note: Placement in ensemble is by audition and/or interview. This course is open to all Music majors and other Kwantlen students. Members of the community may participate on a non-credit basis.

Level: UG

Prerequisite(s): MUSI 1168

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_2 (p. 522)

**MUSI 1269 2 credits****Kwantlen Chorus II**

Students will rehearse and perform choral works from the 16th century to the present in Western Classical tradition as well as works from the folk, jazz, popular, and musical theatre idioms. Note: Placement in ensemble is by audition and/or interview. This course is open to all Music majors and other Kwantlen students. Members of the community may participate on a non-credit basis.

Level: UG

Prerequisite(s): MUSI 1169

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_2 (p. 522)

**MUSI 1271 2 credits****Guitar Chamber Ensemble II**

Students will continue to perform duo, trio, and/or quartet music for guitar ensemble. They will study classical compositions but may also perform arrangements or transcriptions of standard jazz compositions, world, and folk music.

Level: UG

Prerequisite(s): MUSI 1171

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1272 2 credits****Piano Chamber Ensemble II**

Students will be placed in small ensembles for the study, preparation and performance of four-hand and eight-hand piano repertoire and works involving piano and different instrumental or vocal combinations. They will work with an assigned instrumental or vocal partner and will accompany that person in recital and at the final jury.

Level: UG

Prerequisite(s): MUSI 1172

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1273 2 credits****Percussion Ensemble II**

Students will study and perform repertoire for percussion instruments of both definite and indefinite pitch. They will also study selected rhythmic systems of work music cultures such as African drumming and Indonesian Gamelan. Note: Both percussion and non-percussion majors may take this course.

Level: UG

Prerequisite(s): MUSI 1173

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1274 2 credits****Woodwind Ensemble II**

Students will study, rehearse and perform original compositions and arrangements of repertoire for different woodwind instrument combinations. Students will, depending on enrolment and instrument type, study and perform in quartets, quintets, and larger woodwind choirs. They will perform major works from the 400-year repertoire of the woodwind ensemble literature.

Level: UG

Prerequisite(s): MUSI 1174

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1275 2 credits****Brass Ensemble II**

Students will study, rehearse and perform original compositions and arrangements of repertoire for different brass instrument combinations. Students will, depending on enrolment and instrument type, study and perform in quartets, quintets, and larger brass choirs. They will perform major works from the 400-year repertoire of the brass ensemble literature.

Level: UG

Prerequisite(s): MUSI 1175

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1276 2 credits****Vocal Chamber Ensemble II: Madrigal to Jazz**

Students will study, rehearse and perform vocal repertoire in a variety of musical styles, ranging from Renaissance to the present. They will audition for the ensemble at the beginning of each semester. Students will perform in concerts both on- and off-campus.

Level: UG

Prerequisite(s): MUSI 1176 and successful audition

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1277 2 credits****Jazz Band II**

Students will work on improvisation skills and chart reading in an ensemble setting. They will perform selections from the standard jazz band repertoire. Students will perform in concert both on- and off-campus throughout the semester.

Level: UG

Prerequisite(s): MUSI 1177

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1278 2 credits****Jazz Combo II**

Students will work on improvisation skills and chart reading in a small jazz combo setting. They will also prepare and perform selections from the standard jazz band repertoire. Students will perform in concert both on- and off- campus throughout the semester.

Level: UG

Prerequisite(s): MUSI 1178

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1279 2 credits****String Chamber Ensemble II**

Students will study, prepare and perform works for string duos, trios and/or quartets. Students may also work in mixed ensembles involving piano, woodwinds, brass, and/or guitar.

Level: UG

Prerequisite(s): MUSI 1179

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1280 2 credits****Opera Workshop Ensemble II**

Students will study, rehearse and perform staged solo, small ensemble and chorus repertoire from a variety of musical styles, including Opera, Oratorio, Musical Theatre and Operetta. Students will perform in concerts both on and off campus. Note: Students will be required to perform in a variety of languages.

Level: UG

Prerequisite(s): MUSI 1180 or successful audition

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1281 2 credits****Kwantlen Chamber Singers II**

Students will study, rehearse and perform chamber choir repertoire in a variety of musical styles, ranging from Renaissance to the present day. They will audition for the ensemble at the beginning of each semester.

Students will perform in concerts both on and off campus. Note:

Students may perform in a variety of languages.

Level: UG

Prerequisite(s): MUSI 1181 and a successful audition

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 1291 3 credits****Songwriting and Arranging**

Students will study popular song styles from the beginning of the 19th century to the present in order to identify and understand key elements of song writing, and to develop original text and melodic ideas. Students will combine melodic and rhythmic ideas with popular harmonic progressions to create original material. They will also develop scoring skills through the creation of full scores (arrangements) and/or charts (lead sheets).

Level: UG

Prerequisite(s): MUSI 1120

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_3 (p. 522)

**MUSI 2340 2 credits****Collaborative Piano I**

Students will explore the collaborative art of performing with vocalists. They will study and perform assigned works that are representative of standard vocal repertoire, including (but not limited to) Italian art songs of the 17th and 18th centuries, German Lieder, French mélodies, and orchestral transcriptions of oratorio and opera solos. Note: MUSI 2340, MUSI 2440, MUSI 3540, and MUSI 3640 (Collaborative Piano I - IV) are not sequential and may be taken in any order. This course is for piano majors.

Level: UG

Prerequisite(s): MUSI 1256 or MUSI 1257 or permission of the instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2350 3 credits****The Language of Music III**

Students will study advanced diatonic harmony and begin the study of chromaticism. They will cover sequences, secondary-function chords, modulation, modal borrowing, and continue the study of form, relating it to large-scale harmonic plans. They will combine their knowledge of harmony and form in the composition of a short original work.

Level: UG

Prerequisite(s): MUSI 1250

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2351 2 credits****Aural Musicianship III**

Students will work toward the development of more advanced musicianship skills, including sight singing, rhythm, conducting, error detection, as well as melodic, harmonic, and rhythmic dictation.

Level: UG

Prerequisite(s): MUSI 1251 or permission of instructor

Co-requisite(s): MUSI 2350 and MUSI 2354 (Recommended)

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2353 3 credits****History of Music III: Music and the Arts**

This music history survey course engages students in an intensive study of the interdisciplinary aspects of Western art music from antiquity to the present under the theme "Music and the Arts." Students will focus on the development of genres and forms that feature or complement vocal and instrumental music, and will be introduced to leading figures in music's creation and performance. Students will examine music as an interdisciplinary expression of Western culture by relating it to changing artistic, social, and political contexts. Students will continue cultivating aural skills by critically listening to music and studying representative compositions, and will further develop skills in researching, writing, and thinking about music.

Level: UG

Prerequisite(s): MUSI 1253

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2354 1 credit****Keyboard Skills III**

Students will develop a higher level of keyboard proficiency by furthering their study of keyboard harmony (chord progressions and harmonization) and by cultivating their ability to harmonize melodies using simple accompaniment patterns. They will also continue to improve their reading skills (sight-reading and transposition).

Level: UG

Prerequisite(s): MUSI 1254 or audition and/or interview

Co-requisite(s): MUSI 2350 or permission of instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2355 1 credit****Secondary Instrument - III**

Students will continue to work one-on-one with an instructor (vocal or instrumental) on the interpretation and performance of repertoire, and on intermediate technical and sight-reading requirements. Note: Students will normally take no more than four (4) semesters of secondary instrument instruction.

Level: UG

Prerequisite(s): MUSI 1255 or permission of the department head

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2356 3 credits****Major Instrument - Performance III**

Students will continue to work one-on-one with an instructor (vocal or instrumental) on the interpretation and performance of assigned repertoire, and on intermediate technical and sight-reading requirements.

Note: Diploma students will normally take no more than four (4) semesters of private lessons in courses ending in the numbers 56 or 57

Level: UG

Prerequisite(s): MUSI 1256 (or MUSI 1257 and a successful audition)

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2357 2 credits****Major Instrument - Concentration III**

Students will continue to work one-on-one with an instructor (vocal or instrumental) on the interpretation and performance of repertoire, and on intermediate technical and sight reading requirements. Note: Diploma students will normally take no more than four (4) semesters of private lessons in courses ending in the numbers 56 or 57.

Level: UG

Prerequisite(s): MUSI 1257 or (MUSI 1265 with successful audition)

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2359 1 credit****Lyric Diction I**

Students will learn the symbols and sounds of the International Phonetic Alphabet. They will then learn the basic phonetics and principles of lyric diction of Italian and German as used in standard concert and operatic repertoire for voice.

Level: UG

Prerequisite(s): Acceptance into the Diploma Program - Vocal Performance or permission of instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2367 2 credits****Kwantlen String Orchestra III**

Students will rehearse and perform a wide variety of orchestral repertoire from the 16th to the 20th century, as well as works by contemporary Canadian composers. Note: Placement in the ensemble is by audition and interview. This course is open to all music majors and other Kwantlen students. Members of the community may participate on a non-credit basis.

Level: UG

Prerequisite(s): MUSI 1267

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2368 2 credits****Kwantlen Wind Ensemble III**

Students will rehearse and perform Wind Literature repertoire from the 16th century to the present day. Students will study and perform contemporary works by Canadian composers. Students will perform major works from the 400-year repertoire of Wind Ensemble, Chamber Winds, and Brass Ensemble literature. Note: Placement in ensemble is by audition and/or interview. This course is open to all Music majors and other Kwantlen students. Members of the community may participate on a non-credit basis.

Level: UG

Prerequisite(s): MUSI 1268

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2369 2 credits****Kwantlen Chorus III**

Students will rehearse and perform choral works from the 16th century to the present in Western Classical tradition as well as works from the folk, jazz, popular, and musical theatre idioms. Note: Placement in ensemble is by audition and/or interview. This course is open to all Music majors and other Kwantlen students. Members of the community may participate on a non-credit basis.

Level: UG

Prerequisite(s): MUSI 1269

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2371 2 credits****Guitar Chamber Ensemble III**

Students will continue to perform duo, trio, and/or quartet music for guitar ensemble. They will study classical compositions but may also perform arrangements or transcriptions of standard jazz compositions, world, and folk music.

Level: UG

Prerequisite(s): MUSI 1271

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2372 2 credits****Piano Chamber Ensemble III**

Students will be placed in small ensembles for the study, preparation and performance of four-hand and eight-hand piano repertoire and works involving piano and different instrumental or vocal combinations. They will work with an assigned instrumental or vocal partner and will accompany that person in recital and at the final jury.

Level: UG

Prerequisite(s): MUSI 1272

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2373 2 credits****Percussion Ensemble III**

Students will study and perform repertoire for percussion instruments of both definite and indefinite pitch. They will also study selected rhythmic systems of work music cultures such as African drumming and Indonesian Gamelan. Note: Both percussion and non-percussion majors may take this course.

Level: UG

Prerequisite(s): MUSI 1273

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2374 2 credits****Woodwind Ensemble III**

Students will study, rehearse and perform original compositions and arrangements of repertoire for different woodwind instrument combinations. Students will, depending on enrolment and instrument type, study and perform in quartets, quintets, and larger woodwind choirs. They will perform major works from the 400-year repertoire of the woodwind ensemble literature.

Level: UG

Prerequisite(s): MUSI 1274

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2375 2 credits****Brass Ensemble III**

Students will study, rehearse and perform original compositions and arrangements of repertoire for different brass instrument combinations. Students will, depending on enrolment and instrument type, study and perform in quartets, quintets, and larger brass choirs. They will perform major works from the 400-year repertoire of the brass ensemble literature.

Level: UG

Prerequisite(s): MUSI 1275

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2376 2 credits****Vocal Chamber Ensemble III: Madrigal to Jazz**

Students will study, rehearse and perform vocal repertoire in a variety of musical styles, ranging from Renaissance to the present. They will audition for the ensemble at the beginning of each semester. Students will perform in concerts both on- and off-campus.

Level: UG

Prerequisite(s): MUSI 1276 and successful audition

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2377 2 credits****Jazz Band III**

Students will work on improvisation skills and chart reading in an ensemble setting. They will perform selections from the standard jazz band repertoire. Students will perform in concert both on- and off-campus throughout the semester.

Level: UG

Prerequisite(s): MUSI 1277

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2378 2 credits****Jazz Combo III**

Students will work on improvisation skills and chart reading in a small jazz combo setting. They will also prepare and perform selections from the standard jazz band repertoire. Students will perform in concert both on- and off- campus throughout the semester.

Level: UG

Prerequisite(s): MUSI 1278

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2379 2 credits****String Chamber Ensemble III**

Students will study, prepare and perform works for string duos, trios and/or quartets. Students may also work in mixed ensembles involving piano, woodwinds, brass, and/or guitar.

Level: UG

Prerequisite(s): MUSI 1279

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2380 2 credits****Opera Workshop Ensemble III**

Students will study, rehearse and perform staged solo, small ensemble and chorus repertoire from a variety of musical styles, including Opera, Oratorio, Musical Theatre and Operetta. Students will perform in concerts both on and off campus. Note: Students will be required to perform in a variety of languages.

Level: UG

Prerequisite(s): MUSI 1280 or a successful audition

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2381 2 credits****Kwantlen Chamber Singers III**

Students will study, rehearse and perform chamber choir repertoire in a variety of musical styles, ranging from Renaissance to the present day. They will audition for the ensemble at the beginning of each semester. Students will perform in concerts both on and off campus. Note: Students may perform in a variety of languages.

Level: UG

Prerequisite(s): MUSI 1281 and successful audition

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2440 2 credits****Collaborative Piano II**

Students will work on the collaborative art of playing with orchestral string instruments. They will study and perform assigned works that are representative of standard string repertoire, including (but not limited to) baroque continuo keyboard parts, sonata repertoire, and orchestral reductions of concerted works. Note: MUSI 2340, 2440, 3540, and 3640 (Collaborative Piano I - IV) are not sequential and may be taken in any order.

Level: UG

Prerequisite(s): MUSI 1256 or 1257 or permission of the instructor.

Attribute: ARTS (p. 521)

**MUSI 2450 3 credits****The Language of Music IV**

Students will study advanced chromatic harmony, including Neapolitan chords, augmented sixth chords, added dissonance chords, and remote modulations. They will also examine sonata form, text/music relationships in art songs, and compose a short original work using concepts studied.

Level: UG

Prerequisite(s): MUSI 2350

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2451 2 credits****Aural Musicianship IV**

Students will work toward the development of advanced musicianship skills, including sight singing, rhythm, conducting, error detection, as well as melodic, harmonic, and rhythmic dictation.

Level: UG

Prerequisite(s): MUSI 2351 or permission of instructor

Co-requisite(s): MUSI 2450 and MUSI 2454 (Recommended)

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2453 3 credits****History of Music IV: Challenging the Conventions of Music**

This music history survey course engages students in an intensive study of contemporary musical developments from 1900 to the present. Students will encounter a diversity of genres, compositional approaches, and aesthetic ideals that emerged during this timeframe, and will situate salient features of contemporary music through a comparative examination of "common-practice" characteristics established in the Baroque, Classical, and Romantic periods. While considering how social, cultural, and technological developments since 1900 fundamentally changed music's sound and structure, students will be challenged to answer the question at the heart of the course: "What is music?" Students will continue to cultivate aural skills by critically listening to music and studying representative compositions, and will further develop skills in researching, writing, and thinking about music.

Level: UG

Prerequisite(s): MUSI 2353

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2454 1 credit****Keyboard Skills IV**

Students will develop a higher level of keyboard proficiency by furthering their study of keyboard harmony (chord progressions and harmonization) and by cultivating their ability to harmonize melodies using simple accompaniment patterns. They will also continue to improve their reading skills (sight-reading and transposition).

Level: UG

Prerequisite(s): MUSI 2354 or audition and/or interview

Co-requisite(s): MUSI 2450 or permission of instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2455 1 credit****Secondary Instrument - IV**

Students will continue to work one-on-one with an instructor (vocal or instrumental) on the interpretation and performance of repertoire, and on intermediate technical and sight-reading requirements. Note: Students will normally take no more than four (4) semesters of secondary instrument instruction.

Level: UG

Prerequisite(s): MUSI 2355 or permission of the department head

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2456 3 credits****Major Instrument - Performance IV**

Students will work one-on-one with an instructor (vocal or instrumental) in the interpretation and performance of assigned repertoire, and on technical and sight-reading requirements. They will participate in master classes as required by the instructor.

Level: UG

Prerequisite(s): MUSI 2356 (or MUSI 2357 with successful audition)

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2457 2 credits****Major Instrument - Concentration IV**

Students will continue to work one-on-one with an instructor (vocal or instrumental) in the interpretation and performance of repertoire, and on intermediate technical and sight-reading requirements. Note: Diploma students will normally take no more than four (4) semesters of private lessons in courses ending in the numbers 56 or 57.

Level: UG

Prerequisite(s): MUSI 2357 or (MUSI 2365 with successful audition)

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2459 1 credit****Lyric Diction II**

Students will review the symbols and sounds of the International Phonetic Alphabet. They will then learn the basic phonetics and principles of lyric diction of French, Spanish and English as used in standard concert and operatic repertoire for voice.

Level: UG

Prerequisite(s): MUSI 2359 or permission of instructor.

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2467 2 credits****Kwantlen String Orchestra IV**

Students will rehearse and perform a wide variety of orchestral repertoire from the 16th to the 20th century, as well as works by contemporary Canadian composers. Note: Placement in the ensemble is by audition and interview. This course is open to all music majors and other Kwantlen students. Members of the community may participate on a non-credit basis.

Level: UG

Prerequisite(s): MUSI 2367

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2468 2 credits****Kwantlen Wind Ensemble IV**

Students will rehearse and perform works of the Wind Literature repertoire from the 16th century to the present day. They will study and perform new works by Canadian composers each semester. Students will perform major works from the 400-year repertoire of Wind Ensemble, Chamber Winds, and Brass Ensemble literature. Note: Placement in ensemble is by audition and/or interview. This course is open to all Music majors and other Kwantlen students. Members of the community may participate on a non-credit basis.

Level: UG

Prerequisite(s): MUSI 2368 for Music majors

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2469 2 credits****Kwantlen Chorus IV**

Students will rehearse and perform choral works from the 16th century to the present in Western Classical tradition as well as works from the folk, jazz, popular, and musical theatre idioms. Note: Placement in ensemble is by audition and/or interview. This course is open to all Music majors and other Kwantlen students. Members of the community may participate on a non-credit basis.

Level: UG

Prerequisite(s): MUSI 2369

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2471 2 credits****Guitar Chamber Ensemble IV**

Students will continue to perform duo, trio, and/or quartet music for guitar ensemble. They will study classical compositions but may also perform arrangements or transcriptions of standard jazz compositions, world, and folk music.

Level: UG

Prerequisite(s): MUSI 2371

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2472 2 credits****Piano Chamber Ensemble IV**

Students will be placed in small ensembles for the study, preparation and performance of four-hand and eight-hand piano repertoire and works involving piano and different instrumental or vocal combinations. They will work with an assigned instrumental or vocal partner and will accompany that person in recital and at the final jury.

Level: UG

Prerequisite(s): MUSI 2372

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2473 2 credits****Percussion Ensemble IV**

Students will study and perform repertoire for percussion instruments of both definite and indefinite pitch. They will also study selected rhythmic systems of world music cultures such as African drumming and Indonesian Gamelan. Note: Both percussion and non-percussion majors may take this course.

Level: UG

Prerequisite(s): MUSI 2373

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2474 2 credits****Woodwind Ensemble IV**

Students will study, rehearse and perform original compositions and arrangements of repertoire for different woodwind instrument combinations. Students will, depending on enrolment and instrument type, study and perform in quartets, quintets, and larger woodwind choirs. They will perform major works from the 400-year repertoire of the woodwind ensemble literature.

Level: UG

Prerequisite(s): MUSI 2374

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2475 2 credits****Brass Ensemble IV**

Students will study, rehearse and perform original compositions and arrangements of repertoire for different brass instrument combinations. Students will, depending on enrolment and instrument type, study and perform in quartets, quintets, and larger brass choirs. They will perform major works from the 400-year repertoire of the brass ensemble literature.

Level: UG

Prerequisite(s): MUSI 2375

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2476 2 credits****Vocal Chamber Ensemble IV: Madrigal to Jazz**

Students will study, rehearse and perform vocal repertoire in a variety of musical styles, ranging from Renaissance to the present. They will audition for the ensemble at the beginning of each semester. Students will perform in concerts both on- and off-campus.

Level: UG

Prerequisite(s): MUSI 2376 and successful audition

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2477 2 credits****Jazz Band IV**

Students will work on improvisation skills and chart reading in an ensemble setting. They will perform selections from the standard jazz band repertoire. Students will perform in concert both on- and off-campus throughout the semester.

Level: UG

Prerequisite(s): MUSI 2377

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2478 2 credits****Jazz Combo IV**

Students will work on improvisation skills and chart reading in a small jazz combo setting. They will also prepare and perform selections from the standard jazz band repertoire. Students will perform in concert both on- and off- campus throughout the semester.

Level: UG

Prerequisite(s): MUSI 2378

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2479 2 credits****String Chamber Ensemble IV**

Students will study, prepare and perform works for string duos, trios and/ or quartets. Students may also work in mixed ensembles involving piano, woodwinds, brass, and/or guitar.

Level: UG

Prerequisite(s): MUSI 2379

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2480 2 credits****Opera Workshop Ensemble IV**

Students will study, rehearse and perform staged solo, small ensemble and chorus repertoire from a variety of musical styles, including Opera, Oratorio, Musical Theatre and Operetta. Students will perform in concerts both on and off campus. Note: Students will be required to perform in a variety of languages.

Level: UG

Prerequisite(s): MUSI 2380 or a successful audition

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 2481 2 credits****Kwantlen Chamber Singers IV**

Students will study, rehearse and perform chamber choir repertoire in a variety of musical styles, ranging from Renaissance to the present day. They will audition for the ensemble at the beginning of each semester. Students will perform in concerts both on and off campus. Note: Students may perform in a variety of languages.

Level: UG

Prerequisite(s): MUSI 2381 and successful audition

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 3113 3 credits****The Social History of the Guitar**

Students will survey the history and repertoire of the guitar as a means to understand how people of other times and places interpreted human experience, and how these beliefs and values affected music creation and expression. They will also use examples of guitar music from both history and the present to explore long-standing debates and fundamental issues regarding the role of music in society. Note: Students need no formal training or background in music although a keen interest in the guitar and its history will be valuable.

Level: UG

Prerequisite(s): Any 1200-level English course

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 3500 3 credits****Special Topics**

Students will engage in intensive study of special topics in the music of the 20th and 21st centuries. They will examine, analyze, and perform music from various repertoires, such as classical, jazz, world, and popular. Students will write at least one research paper. Note: The specific area of study will be established in advance by the music faculty.

Level: UG

Prerequisite(s): MUSI 1150 or equivalent or permission of instructor and ENGL 1100

Attribute: ARTS (p. 521)

**MUSI 3501 3 credits****Selected Topics in Western Music**

Students will investigate one aspect of art music in Western culture, such as a major body of works, a subject (e.g., women and the piano in the nineteenth century), or one or more questions inviting historical inquiry (e.g., the challenges of recreating Baroque opera). They will use selected musical works as the basis for study. Students will first relate the topic to its cultural and historical context, and then examine the selected works in greater analytical and historical depth, which will include attending and evaluating professional performances. Note: The topic will be established in advance by the Music Department. Students may take this course multiple times for further credit on different topics. Students are responsible for the costs of attending performances.

Level: UG

Prerequisite(s): Any 60 credits of 1100-level or higher, including ENGL 1100. Non-Music students must have permission of instructor.

Attribute: ARTS (p. 521)

**MUSI 3512 3 credits****The Business of Music**

Students will survey common business practices related to the music industry. They will also develop business-related knowledge and skills essential for managing a music career.

Level: UG

Prerequisite(s): MUSI 1112 and 60 credits of 1100-level or higher coursework, including ENGL 1100

Attribute: ARTS (p. 521)

**MUSI 3535 1.5 credits****Jazz Improvisation I**

Students will learn basic skills essential to effective improvisation, including listening and memorization skills, techniques for melodic development, and the use of simple harmonies. They will develop various practice techniques essential to improving improvisational skills.

Level: UG

Prerequisite(s): 60 credits of 1100-level or higher coursework, including ENGL 1100

Attribute: ARTS (p. 521)

**MUSI 3540 2 credits****Collaborative Piano III**

Students will work on the collaborative art of performing with woodwind instruments. They will study and perform assigned works that are representative of standard woodwind repertoire, including (but not limited to) sonata repertoire, French conservatory test pieces and orchestral reductions of concerted works. Note: MUSI 2340, 2440, 3540, and 3640 (Collaborative Piano I - IV) are not sequential and may be taken in any order.

Level: UG

Prerequisite(s): MUSI 1256 or 1257 or permission of the instructor.

Attribute: ARTS (p. 521)

**MUSI 3550 3 credits****The Language of Music V: Jazz and Pop**

Students will learn the fundamental theoretical and aural skills associated with jazz and pop idioms including nomenclature, harmonic progressions, turnarounds, chord substitutions, polychords, non-functional harmony, as well as chord/scale relationships of the major, harmonic and melodic minor scales, symmetrical scales, and modes. They will develop their skills through writing and analysis of representative historical examples.

Level: UG

Prerequisite(s): MUSI 2450 or permission of instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 3551 3 credits****Conducting I**

Students will learn the necessary skills to conduct ensembles (instrumental/choral) at a basic to intermediate level. They will learn the craft of conducting including clear, proficient hand and baton technique in basic conducting patterns, coordinating the use of the body (including cuing) and the fundamentals of score reading and score preparation. Students will develop a responsible attitude to rehearsal preparation by using a gestural approach to control tempo, dynamics, articulation, phrasing, fermatas and releases. Note: Some piano proficiency is required.

Level: UG

Prerequisite(s): 60 credits of 1100-level or higher coursework, including ENGL 1100

Attribute: ARTS (p. 521)

**MUSI 3553 3 credits****History of Jazz and Pop Music**

Students will survey the history of jazz and popular music in North America. They will examine the issues and theories regarding the relationship between music and culture. Students will explore such topics as race and ethnicity, gender and sexuality, class, mass media, and aesthetics.

Level: UG

Prerequisite(s): Any 60 credits of 1100-level or higher, including ENGL 1100. Non-music students must have permission of the instructor.

Attribute: ARTS (p. 521)

**MUSI 3556 4 credits****Major Instrument - Performance V**

Students will work one-on-one with an instructor (vocal or instrumental) in the interpretation and performance of assigned repertoire, and on technical and sight-reading requirements. They will participate in master classes as required by the instructor.

Level: UG

Prerequisite(s): MUSI 2456 or (MUSI 2457 and a successful audition)

Attribute: ARTS (p. 521)

**MUSI 3557 2 credits****Major Instrument - Concentration V**

Students will work one-on-one with an instructor (vocal or instrumental) in the interpretation and performance of repertoire, and on technical and sight reading requirements.

Level: UG

Prerequisite(s): A minimum of 54 credits at the 1100 level or higher, including MUSI 2457

Attribute: ARTS (p. 521)

**MUSI 3567 2 credits****Kwantlen String Orchestra V**

Students will rehearse and perform a wide variety of orchestral repertoire from the 16th to the 20th century, as well as works by contemporary Canadian composers. Note: Placement in the ensemble is by audition and interview. This course is open to all music majors and other Kwantlen students. Members of the community may participate on a non-credit basis.

Level: UG

Prerequisite(s): MUSI 2467

Attribute: ARTS (p. 521)

**MUSI 3568 2 credits****Kwantlen Wind Ensemble V**

Students will rehearse and perform works of the Wind Literature repertoire from the 16th century to the present day. They will study and perform new works by Canadian composers each semester. Students will perform major works from the 400-year repertoire of Wind Ensemble, Chamber Winds, and Brass Ensemble literature. Note: Placement in ensemble is by audition and/or interview. This course is open to all Music majors and other Kwantlen students. Members of the community may participate on a non-credit basis.

Level: UG

Prerequisite(s): MUSI 2468 for Music majors

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 3569 2 credits****Kwantlen Chorus V**

Students will rehearse and perform choral works from the 16th century to the present in Western Classical tradition as well as works from the folk, jazz, popular, and musical theatre idioms. Placement in ensemble is by audition and/or interview. This course is open to all Music majors and other Kwantlen students. Members of the community may participate on a non-credit basis.

Level: UG

Prerequisite(s): MUSI 2469

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 3571 2 credits****Guitar Chamber Ensemble V**

Students will continue to perform duo, trio, and/or quartet music for guitar ensemble. They will study classical compositions but may also perform arrangements or transcriptions of standard jazz compositions, world, and folk music.

Level: UG

Prerequisite(s): MUSI 2471

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 3572 2 credits****Piano Chamber Ensemble V**

Students will be placed in small ensembles for the study, preparation and performance of four-hand and eight-hand piano repertoire and works involving piano and different instrumental or vocal combinations. They will work with an assigned instrumental or vocal partner and will accompany that person in recital and at the final jury.

Level: UG

Prerequisite(s): MUSI 2472

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 3573 2 credits****Percussion Ensemble V**

Students will study and perform repertoire for percussion instruments of both definite and indefinite pitch. They will also study selected rhythmic systems of world music cultures such as African drumming and Indonesian Gamelan. Note: Both percussion and non-percussion majors may take this course.

Level: UG

Prerequisite(s): MUSI 2473

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 3574 2 credits****Woodwind Ensemble V**

Students will study, rehearse and perform original compositions and arrangements of repertoire for different woodwind instrument combinations. Students will, depending on enrolment and instrument type, study and perform in quartets, quintets, and larger woodwind choirs. They will perform major works from the 400-year repertoire of the woodwind ensemble literature.

Level: UG

Prerequisite(s): MUSI 2474

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 3575 2 credits****Brass Ensemble V**

Students will study, rehearse and perform original compositions and arrangements of repertoire for different brass instrument combinations. Students will, depending on enrolment and instrument type, study and perform in quartets, quintets, and larger brass choirs. They will perform major works from the 400-year repertoire of the brass ensemble literature.

Level: UG

Prerequisite(s): MUSI 2475

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 3576 2 credits****Vocal Chamber Ensemble V: Madrigal to Jazz**

Students will study, rehearse and perform vocal repertoire in baroque and jazz styles. They will audition for the ensemble at the beginning of each semester. Students will perform in concerts both on- and off-campus.

Level: UG

Prerequisite(s): MUSI 2476 and successful audition

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 3577 2 credits****Jazz Band V**

Students will work on improvisation skills and chart reading in an ensemble setting. They will perform selections from the standard jazz band repertoire. Students will perform in concert both on- and off-campus throughout the semester.

Level: UG

Prerequisite(s): MUSI 2477

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 3578 2 credits****Jazz Combo V**

Students will work on improvisation skills and chart reading in a small jazz combo setting. They will also prepare and perform selections from the standard jazz band repertoire. Students will perform in concert both on- and off-campus throughout the semester.

Level: UG

Prerequisite(s): MUSI 2478

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 3579 2 credits****String Chamber Ensemble V**

Students will study, prepare and perform works for string duos, trios and/or quartets. Students may also work in mixed ensembles involving piano, woodwinds, brass, and/or guitar.

Level: UG

Prerequisite(s): MUSI 2479

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 3580 2 credits****Opera Workshop Ensemble V**

Students will study, rehearse and perform staged solo, small ensemble and chorus repertoire from a variety of musical styles, including Opera, Oratorio, Musical Theatre and Operetta. Students will perform in concerts both on and off campus. Note: Students will be required to perform in a variety of languages.

Level: UG

Prerequisite(s): MUSI 2480 or successful audition

Attribute: ARTS (p. 521)

**MUSI 3581 2 credits****Kwantlen Chamber Singers V**

Students will study, rehearse and perform chamber choir repertoire in a variety of musical styles, ranging from Renaissance to the present day. They will audition for the ensemble at the beginning of each semester. Students will perform in concerts both on and off campus. Note: Students may perform in a variety of languages.

Level: UG

Prerequisite(s): MUSI 2481 and successful audition

Attribute: ARTS (p. 521)

**MUSI 3585 2 credits****Vocal Repertoire I**

Students will study the origins and development of the art song within the standard vocal repertoire. They will perform from selected art song repertoire and will study and analyze art song repertoire from the Italian, French, German and English art song literature as it relates to all voice types. Students will study compositional techniques of the art song, with a focus given to the relationship between the vocal melody and piano accompaniment.

Level: UG

Prerequisite(s): 60 credits of 1100 level or higher coursework, including ENGL 1100

Attribute: ARTS (p. 521)

**MUSI 3586 3 credits****Introduction to Music Pedagogy**

Students will examine the skills, concepts and methodologies for teaching music in both private and ensemble/classroom settings. Students will study different teaching and learning styles and develop analytical and critical thinking skills in regards to teaching and learning. They will study aspects of teaching that constitute excellence in teaching music.

Level: UG

Prerequisite(s): 60 credits of 1100-level or higher coursework, including ENGL 1100

Attribute: ARTS (p. 521)

**MUSI 3591 3 credits****Composition**

Students will produce original work using traditional compositional methods. They will explore various modes of expression that reflect contemporary music styles, structures, and techniques.

Level: UG

Prerequisite(s): MUSI 2450 or permission of the instructor

Attribute: ARTS (p. 521)

**MUSI 3602 3 credits****Audio Recording and Production Techniques**

Students will acquire essential sound recording and reproduction techniques utilizing a Mac digital audio workstation. They will learn the fundamentals of sound, microphones, mixing, dynamic processing, equalization, effects, analog/digital recording, MIDI (Musical Instrument Digital Interface) production, and mastering.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including ENGL 1100

Attribute: ARTS (p. 521)

**MUSI 3635 1.5 credits****Jazz Improvisation II**

Students will develop intermediate skills essential to effective improvisation including listening and memorization skills, techniques for melodic development, and the use of more elaborate harmonies and chord progressions. They will continue to develop various practice techniques essential to improving improvisational skills.

Level: UG

Prerequisite(s): MUSI 3535 and MUSI 3550

Attribute: ARTS (p. 521)

**MUSI 3640 2 credits****Collaborative Piano IV**

Students will work on the collaborative art of playing with brass instruments. They will study and perform assigned works that are representative of standard brass repertoire, including (but not limited to) sonata repertoire, French conservatory pieces and orchestral reductions of concerted works. Note: MUSI 2340, 2440, 3540 and 3640 (Collaborative Piano I - IV) are not sequential and may be taken in any order.

Level: UG

Prerequisite(s): MUSI 1256 or 1257 or permission of the instructor.

Attribute: ARTS (p. 521)

**MUSI 3650 3 credits****The Language of Music VI: Contemporary**

Students will explore various facets of twentieth-century music as well as emerging trends in the present century. They will examine the main trends in the Western classical tradition; the interrelationships/mutual influences of these repertoires; and their connections with the other arts and with changes in society. Students will examine these repertoires from theoretical and historical perspectives, deepening their understanding by analyzing historically significant works.

Level: UG

Prerequisite(s): MUSI 2450

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 3653 3 credits****World Music**

Students will engage in an intensive examination of musical genres from various world cultures. They will study historical and contemporary examples of popular and folkloric music of Latin American, African, Arabic, Middle Eastern, Central Asian, Indian, Indonesian, Japanese, and Chinese traditions. Students will listen to selected examples of world music, through which they will develop strategies for analyzing music outside the tradition of Western art music in Europe and the Americas. Note: This course is open to non-music students.

Level: UG

Prerequisite(s): Any 60 credits of 1100-level or higher, including ENGL 1100

Attribute: ARTS (p. 521)

**MUSI 3656 4 credits****Major Instrument - Performance VI**

Students will work one-on-one with an instructor (vocal or instrumental) in the interpretation and performance of assigned repertoire, and on technical and sight-reading requirements. They will participate in master classes as required by the instructor and present a half recital (solo).

Level: UG

Prerequisite(s): MUSI 3556

Attribute: ARTS (p. 521)

**MUSI 3657 2 credits****Major Instrument - Concentration VI**

Students will work one-on-one with an instructor (vocal or instrumental) in the interpretation and performance of repertoire, and on technical and sight reading requirements.

Level: UG

Prerequisite(s): MUSI 3557

Attribute: ARTS (p. 521)

**MUSI 3667 2 credits****Kwantlen String Orchestra VI**

Students will rehearse and perform a wide variety of orchestral repertoire from the 16th to the 20th century, as well as works by contemporary Canadian composers. Note: Placement in the ensemble is by audition and interview. This course is open to all music majors and other Kwantlen students. Members of the community may participate on a non-credit basis.

Level: UG

Prerequisite(s): MUSI 3567

Attribute: ARTS (p. 521)

**MUSI 3668 2 credits****Kwantlen Wind Ensemble VI**

Students will rehearse and perform works of the Wind Literature repertoire from the Renaissance period through to the present day. They will study and perform new works by Canadian composers each semester. Student will perform major works from the 400-year repertoire of Wind Ensemble, Chamber Winds, and Brass Ensemble literature. Note: Placement in ensemble is by audition and/or interview. This course is open to all Music majors and other Kwantlen students. Members of the community may participate on a non-credit basis.

Level: UG

Prerequisite(s): MUSI 3568 for Music majors

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 3669 2 credits****Kwantlen Chorus VI**

Students will rehearse and perform choral works from the 16th century to the present in Western Classical tradition as well as works from the folk, jazz, popular, and musical theatre idioms. Note: Placement in ensemble is by audition and/or interview. This course is open to all Music majors and other Kwantlen students. Members of the community may participate on a non-credit basis.

Level: UG

Prerequisite(s): MUSI 3569

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 3671 2 credits****Guitar Chamber Ensemble VI**

Students will continue to perform duo, trio, and/or quartet music for guitar ensemble. They will study classical compositions but may also perform arrangements or transcriptions of standard jazz compositions, world, and folk music.

Level: UG

Prerequisite(s): MUSI 3571

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 3672 2 credits****Piano Chamber Ensemble VI**

Students will be placed in small ensembles for the study, preparation and performance of four-hand and eight-hand piano repertoire and works involving piano and different instrumental or vocal combinations. They will work with an assigned instrumental or vocal partner and will accompany that person in recital and at the final jury.

Level: UG

Prerequisite(s): MUSI 3572

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 3673 2 credits****Percussion Ensemble VI**

Students will study and perform repertoire for percussion instruments of both definite and indefinite pitch. They will also study selected rhythmic systems of world music cultures such as African drumming and Indonesian Gamelan. Note: Both percussion and non-percussion majors may take this course.

Level: UG

Prerequisite(s): MUSI 3573

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 3674 2 credits****Woodwind Ensemble VI**

Students will study, rehearse and perform original compositions and arrangements of repertoire for different woodwind instrument combinations. Students will, depending on enrolment and instrument type, study and perform in quartets, quintets, and larger woodwind choirs. They will perform major works from the 400-year repertoire of the woodwind ensemble literature.

Level: UG

Prerequisite(s): MUSI 3574

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 3675 2 credits****Brass Ensemble VI**

Students will study, rehearse and perform original compositions and arrangements of repertoire for different brass instrument combinations. Students will, depending on enrolment and instrument type, study and perform in quartets, quintets, and larger brass choirs. They will perform major works from the 400-year repertoire of the brass ensemble literature.

Level: UG

Prerequisite(s): MUSI 3575

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 3676 2 credits****Vocal Chamber Ensemble VI: Madrigal to Jazz**

Students will study, rehearse and perform vocal repertoire in baroque and jazz styles. They will audition for the ensemble at the beginning of each semester. Students will perform in concerts both on- and off-campus.

Level: UG

Prerequisite(s): MUSI 3576 and successful audition

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 3677 2 credits****Jazz Band VI**

Students will work on improvisation skills and chart reading in an ensemble setting. They will perform selections from the standard jazz band repertoire. Students will perform in concert both on- and off-campus throughout the semester.

Level: UG

Prerequisite(s): MUSI 3577

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 3678 2 credits****Jazz Combo VI**

Students will work on improvisation skills and chart reading in a small jazz combo setting. They will also prepare and perform selections from the standard jazz band repertoire. Students will perform in concert both on- and off-campus throughout the semester.

Level: UG

Prerequisite(s): MUSI 3578

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 3679 2 credits****String Chamber Ensemble VI**

Students will study, prepare and perform works for string duos, trios and/or quartets. Students may also work in mixed ensembles involving piano, woodwinds, brass, and/or guitar.

Level: UG

Prerequisite(s): MUSI 3579

Attributes: ASTR (p. 523), ARTS (p. 521)

**MUSI 3680 2 credits****Opera Workshop Ensemble VI**

Students will study, rehearse and perform staged solo, small ensemble and chorus repertoire from a variety of musical styles, including Opera, Oratorio, Musical Theatre and Operetta. Students will perform in concerts both on and off campus. Note: Students will be required to perform in a variety of languages.

Level: UG

Prerequisite(s): MUSI 3580 or successful audition

Attribute: ARTS (p. 521)

**MUSI 3681 2 credits****Kwantlen Chamber Singers VI**

Students will study, rehearse and perform chamber choir repertoire in a variety of musical styles, ranging from Renaissance to the present day. They will audition for the ensemble at the beginning of each semester.

Students will perform in concerts both on and off campus. Note:

Students may perform in a variety of languages.

Level: UG

Prerequisite(s): MUSI 3581 and a successful audition

Attribute: ARTS (p. 521)

**MUSI 3685 2 credits****Vocal Repertoire II**

Students will study and perform operatic and oratorio solo repertoire from the 17th century to present day. Students will study and analyze musical components of style and compositional techniques of recitative and aria for all voice types, with a focus given to the relationship of solo operatic and oratorio repertoire and orchestral accompaniment.

Level: UG

Prerequisite(s): 60 credits of 1100 level or higher coursework, including ENGL 1100

Attribute: ARTS (p. 521)

**MUSI 3686 3 credits****Approaches to Music Education**

Students will examine the educational philosophies, techniques, and musical methods of Orff, Kodaly, Suzuki, Dalcroze, Music for Young Children, Kindermusik and Gordon's Learning Theory. They will research teaching techniques that motivate learning behaviours. Students will compare the different approaches to developing music skills at various ages and stages of a child's development.

Level: UG

Prerequisite(s): 60 credits of 1100 level or higher coursework, including ENGL 1100

Attribute: ARTS (p. 521)

**MUSI 3688 2 credits****Studio Pedagogy I**

Students will study teaching methods and explore material in a systematic manner for beginner through elementary level private students. Students will examine different technical approaches and become familiar with suitable studio teaching material through directed reading, discussion, and practical assignments. Students may be required to perform selected repertoire in class. Note: MUSI 3688, 4788, and 4888 (Studio Pedagogy I - III) are not sequential and may be taken in any order.

Level: UG

Prerequisite(s): 60 credits of 1100 level or higher, including ENGL 1100

Co-requisite(s): MUSI 3586

Attribute: ARTS (p. 521)

**MUSI 4599 3 credits****Directed Studies in Western Music**

Students will carry out a detailed investigation of a topic relevant to the development of art music, jazz, or pop music within the Western tradition. They will do so under the supervision of a faculty member through a survey and review of written and audio/visual resources and, if appropriate, musical analysis as well as the consideration of cultural milieu. Students will develop a comprehensive understanding of their topic, in addition to submitting a final assignment.

Level: UG

Prerequisite(s): MUSI 1153 and MUSI 1253 and MUSI 2353 and MUSI 2453 and (MUSI 3501 or MUSI 3553)

Attribute: ARTS (p. 521)

**MUSI 4602 3 credits****Music Video Production**

Students will study music video production (MVP) in order to acquire the skills required to produce music videos using a Mac digital audio workstation, DSLR (Digital Single-Lens Reflex) cameras and video editing software. Students will learn film production and editing practices specifically as they relate to music videos.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including ENGL 1100

Attribute: ARTS (p. 521)

**MUSI 4756 4 credits****Major Instrument - Performance VII**

Students will work one-on-one with an instructor (vocal or instrumental) in the interpretation and performance of assigned repertoire, and on technical and sight reading requirements. They will participate in master classes as required by the instructor.

Level: UG

Prerequisite(s): MUSI 3656

Attribute: ARTS (p. 521)

**MUSI 4757 2 credits****Major Instrument - Concentration VII**

Students will work one-on-one with an instructor (vocal or instrumental) in the interpretation and performance of repertoire, and on technical and sight reading requirements.

Level: UG

Prerequisite(s): MUSI 3657

Attribute: ARTS (p. 521)

**MUSI 4760 3 credits****Psychophysiology of Music**

Students will explore the psychological/physical relationship in music performance as well as the mental and emotional factors that affect learning and teaching. They will develop body awareness (posture, movement, and breathing) and its relationship to musical performance, as well as learn how to amend their physical movements to play more efficiently with less effort. Students will also investigate different approaches in developing musical skill, expressivity, interpretation, musical memory, and motivation, as well as survey different techniques for managing and utilizing performance anxiety.

Level: UG

Prerequisite(s): 60 credits of 1100-level or higher coursework, including ENGL 1100

Attribute: ARTS (p. 521)

**MUSI 4767 2 credits****Kwantlen String Orchestra VII**

Students will rehearse and perform a wide variety of orchestral repertoire from the 16th to the 20th century, as well as works by contemporary Canadian composers. Note: Placement in the ensemble is by audition and interview. This course is open to all music majors and other Kwantlen students. Members of the community may participate on a non-credit basis.

Level: UG

Prerequisite(s): MUSI 3667

Attribute: ARTS (p. 521)

**MUSI 4768 2 credits****Kwantlen Wind Ensemble VII**

Students will rehearse and perform works of the Wind Literature repertoire from the Renaissance period to the present day. They will study and perform new works by Canadian composers each semester. Students will perform major works from the 400-year repertoire of Wind Ensemble, Chamber Winds, and Brass Ensemble literature. Note: Placement in ensemble is by audition and/or interview. This course is open to all Music majors and other Kwantlen students. Members of the community may participate on a non-credit basis.

Level: UG

Prerequisite(s): MUSI 3668

Attribute: ARTS (p. 521)

**MUSI 4769 2 credits****Kwantlen Chorus VII**

Students will rehearse and perform choral works from the 16th century to the present in Western Classical tradition as well as works from the folk, jazz, popular, and musical theatre idioms. Note: Placement in ensemble is by audition and/or interview. This course is open to all Music majors and other Kwantlen students. Members of the community may participate on a non-credit basis.

Level: UG

Prerequisite(s): MUSI 3669

Attribute: ARTS (p. 521)

**MUSI 4771 2 credits****Guitar Chamber Ensemble VII**

Students will perform duo, trio, and/or quartet music for guitar ensemble. They will study classical compositions but may also perform arrangements or transcriptions of standard jazz compositions, world, and folk music.

Level: UG

Prerequisite(s): MUSI 3671

Attribute: ARTS (p. 521)

**MUSI 4772 2 credits****Piano Chamber Ensemble VII**

Students will be placed in small ensembles for the study, preparation and performance of four-hand and eight-hand piano repertoire and works involving piano and different instrumental or vocal combinations. They will work with an assigned instrumental or vocal partner and will accompany that person in recital and at the final jury.

Level: UG

Prerequisite(s): MUSI 3672

Attribute: ARTS (p. 521)

**MUSI 4773 2 credits****Percussion Ensemble VII**

Students will study and perform repertoire for percussion instruments of both definite and indefinite pitch. They will also study selected rhythmic systems of world music cultures such as African drumming and Indonesian Gamelan. Note: Both percussion and non-percussion majors may take this course.

Level: UG

Prerequisite(s): MUSI 3673

Attribute: ARTS (p. 521)

**MUSI 4774 2 credits****Woodwind Ensemble VII**

Students will study, rehearse and perform original compositions and arrangements of repertoire for different woodwind instrument combinations. Students will, depending on enrolment and instrument type, study and perform in quartets, quintets, and larger woodwind choirs. They will perform major works from the 400-year repertoire of the woodwind ensemble literature.

Level: UG

Prerequisite(s): MUSI 3674

Attribute: ARTS (p. 521)

**MUSI 4775 2 credits****Brass Ensemble VII**

Students will study, rehearse and perform original compositions and arrangements of repertoire for different brass instrument combinations. Students will, depending on enrolment and instrument type, study and perform in quartets, quintets, and larger brass choirs. They will perform major works from the 400-year repertoire of the brass ensemble literature.

Level: UG

Prerequisite(s): MUSI 3675

Attribute: ARTS (p. 521)

**MUSI 4776 2 credits****Vocal Chamber Ensemble VII: Madrigal to Jazz**

Students will study, rehearse and perform vocal repertoire in a variety of musical styles, ranging from Renaissance to the present. They will perform in concerts both on and off campus. Note: Students will audition for the ensemble at the beginning of each semester.

Level: UG

Prerequisite(s): MUSI 3676 or successful audition

Attribute: ARTS (p. 521)

**MUSI 4777 2 credits****Jazz Band VII**

Students will expand on improvisation skills and chart reading in an ensemble setting. They will perform selections from the standard jazz band repertoire. Students will perform in concert both on and off campus throughout the semester.

Level: UG

Prerequisite(s): MUSI 3677

Attribute: ARTS (p. 521)

**MUSI 4778 2 credits****Jazz Combo VII**

Students will expand on improvisation skills and chart reading in a small jazz combo setting. They will also prepare and perform selections from the standard jazz band repertoire. Students will perform in concert both on and off campus throughout the semester.

Level: UG

Prerequisite(s): MUSI 3678

Attribute: ARTS (p. 521)

**MUSI 4779 2 credits****String Chamber Ensemble VII**

Students will study, prepare and perform works for string duos, trios and/or quartets. Students may also work in mixed ensembles involving piano, woodwinds, brass, and/or guitar.

Level: UG

Prerequisite(s): MUSI 3679

Attribute: ARTS (p. 521)

**MUSI 4780 2 credits****Opera Workshop Ensemble VII**

Students will study, rehearse and perform staged solo, small ensemble and chorus repertoire from a variety of musical styles, including Opera, Oratorio, Musical Theatre and Operetta. Students will perform in concerts both on and off campus. Note: Students will be required to perform in a variety of languages.

Level: UG

Prerequisite(s): MUSI 3680 or successful audition

Attribute: ARTS (p. 521)

**MUSI 4781 2 credits****Kwantlen Chamber Singers VII**

Students will study, rehearse and perform chamber choir repertoire in a variety of musical styles, ranging from Renaissance to the present day. They will audition for the ensemble at the beginning of each semester.

Students will perform in concerts both on and off campus. Note:

Students may perform in a variety of languages.

Level: UG

Prerequisite(s): MUSI 3681 and successful audition

Attribute: ARTS (p. 521)

**MUSI 4786 3 credits****Ensemble Rehearsal Techniques**

Students will choose either the choral or instrumental section of the course. Students in the choral section will explore standard choral repertoire and the application of rehearsal techniques as they apply to vocal development within choral ensembles. Students in the instrumental section will study standard instrumental repertoire and the application of rehearsal techniques as they apply to instrumental ensembles. Note: This course consists of two independent sections: choral and instrumental

Level: UG

Prerequisite(s): MUSI 3551 or MUSI 4751 or MUSI 4752

Attribute: ARTS (p. 521)

**MUSI 4788 2 credits****Studio Pedagogy II**

Students will study teaching methods and explore material in a systematic manner for intermediate level private students. Students will examine different technical approaches and become familiar with suitable studio teaching material through directed reading, discussion, and practical assignments. Students may be required to perform selected repertoire in class. Note: MUSI 3688, 4788, and 4888 (Studio Pedagogy I - III) are not sequential and may be taken in any order.

Level: UG

Prerequisite(s): 60 credits of 1100-level or higher coursework, including ENGL 1100

Co-requisite(s): MUSI 3586

Attribute: ARTS (p. 521)

**MUSI 4851 3 credits****Conducting II**

Students will gain the skills necessary to prepare and conduct instrumental and choral music selected from standard choral, wind and orchestral literature. Students will gain practical experience conducting the laboratory instrumental and choral ensembles. They will develop aspects of rehearsal techniques demonstrated through development and use of a range of effective conducting gestures. Students will do score reading, preparation and analysis as it pertains to both the instrumental and choral ensemble settings. Note: MUSI 4851 replaces MUSI 4751 & 4752. Students may only receive credit for either MUSI 4751 & 4752 or MUSI 4851.

Level: UG

Prerequisite(s): MUSI 3551

Attribute: ARTS (p. 521)

**MUSI 4856 4 credits****Major Instrument - Performance VIII**

Students will work one-on-one with an instructor (vocal or instrumental) in the interpretation and performance of assigned repertoire, and on technical and sight reading requirements. They will participate in master classes as required by the instructor. Students will give a full recital (solo).

Level: UG

Prerequisite(s): MUSI 4756

Attribute: ARTS (p. 521)

**MUSI 4857 2 credits****Major Instrument - Concentration VIII**

Students will work one-on-one with an instructor (vocal or instrumental) in the interpretation and performance of repertoire, and on technical and sight reading requirements.

Level: UG

Prerequisite(s): MUSI 4757

Attribute: ARTS (p. 521)

**MUSI 4867 2 credits****Kwantlen String Orchestra VIII**

Students will rehearse and perform a wide variety of orchestral repertoire from the 16th to the 20th century, as well as works by contemporary Canadian composers. Note: Placement in the ensemble is by audition and interview. This course is open to all music majors and other Kwantlen students. Members of the community may participate on a non-credit basis.

Level: UG

Prerequisite(s): MUSI 4767

Attribute: ARTS (p. 521)

**MUSI 4868 2 credits****Kwantlen Wind Ensemble VIII**

Students will rehearse and perform works of the Wind Literature repertoire from the Renaissance period to the present day. They will study and perform new works by Canadian composers each semester. Students will perform major works from the 400-year repertoire of Wind Ensemble, Chamber Winds, and Brass Ensemble literature. Note: Placement in ensemble is by audition and/or interview. This course is open to all Music majors and other Kwantlen students. Members of the community may participate on a non-credit basis.

Level: UG

Prerequisite(s): MUSI 4768

Attribute: ARTS (p. 521)

**MUSI 4869 2 credits****Kwantlen Chorus VIII**

Students will rehearse and perform choral works from the 16th century to the present in Western Classical tradition as well as works from the folk, jazz, popular, and musical theatre idioms. Note: Placement in ensemble is by audition and/or interview. This course is open to all Music majors and other Kwantlen students. Members of the community may participate on a non-credit basis.

Level: UG

Prerequisite(s): MUSI 4769

Attribute: ARTS (p. 521)

**MUSI 4871 2 credits****Guitar Chamber Ensemble VIII**

Students will perform duo, trio, and/or quartet music for guitar ensemble. They will study classical compositions but may also perform arrangements or transcriptions of standard jazz compositions, world, and folk music.

Level: UG

Prerequisite(s): MUSI 4771

Attribute: ARTS (p. 521)

**MUSI 4872 2 credits****Piano Chamber Ensemble VIII**

Students will be placed in small ensembles for the study, preparation and performance of four-hand and eight-hand piano repertoire and works involving piano and different instrumental or vocal combinations. They will work with an assigned instrumental or vocal partner and will accompany that person in recital and at the final jury.

Level: UG

Prerequisite(s): MUSI 4772

Attribute: ARTS (p. 521)

**MUSI 4873 2 credits****Percussion Ensemble VIII**

Students will study and perform repertoire for percussion instruments of both definite and indefinite pitch. They will also study selected rhythmic systems of world music cultures such as African drumming and Indonesian Gamelan. Note: Both percussion and non-percussion majors may take this course.

Level: UG

Prerequisite(s): MUSI 4773

Attribute: ARTS (p. 521)

**MUSI 4874 2 credits****Woodwind Ensemble VIII**

Students will study, rehearse and perform original compositions and arrangements of repertoire for different woodwind instrument combinations. Students will, depending on enrolment and instrument type, study and perform in quartets, quintets, and larger woodwind choirs. They will perform major works from the 400-year repertoire of the woodwind ensemble literature.

Level: UG

Prerequisite(s): MUSI 4774

Attribute: ARTS (p. 521)

**MUSI 4875 2 credits****Brass Ensemble VIII**

Students will study, rehearse and perform original compositions and arrangements of repertoire for different brass instrument combinations. Students will, depending on enrolment and instrument type, study and perform in quartets, quintets, and larger brass choirs. They will perform major works from the 400-year repertoire of the brass ensemble literature.

Level: UG

Prerequisite(s): MUSI 4775

Attribute: ARTS (p. 521)

**MUSI 4876 2 credits****Vocal Chamber Ensemble VIII: Madrigal to Jazz**

Students will study, rehearse and perform vocal repertoire in a variety of musical styles, ranging from Renaissance to the present. They will perform in concerts both on and off campus. Note: Students will audition for the ensemble at the beginning of each semester.

Level: UG

Prerequisite(s): MUSI 4776 or successful audition

Attribute: ARTS (p. 521)

**MUSI 4877 2 credits****Jazz Band VIII**

Students will continue to expand on improvisation skills and chart reading in an ensemble setting. They will perform selections from the standard jazz band repertoire. Students will perform in concert both on and off campus throughout the semester.

Level: UG

Prerequisite(s): MUSI 4777

Attribute: ARTS (p. 521)

**MUSI 4878 2 credits****Jazz Combo VIII**

Students will continue to work on improvisation skills and chart reading in a small jazz combo setting. They will also prepare and perform selections from the standard jazz band repertoire. Students will perform in concert both on and off campus throughout the semester.

Level: UG

Prerequisite(s): MUSI 4778

Attribute: ARTS (p. 521)

**MUSI 4879 2 credits****String Chamber Ensemble VIII**

Students will study, prepare and perform works for string duos, trios and/or quartets. Students may also work in mixed ensembles involving piano, woodwinds, brass, and/or guitar.

Level: UG

Prerequisite(s): MUSI 4779

Attribute: ARTS (p. 521)

**MUSI 4880 2 credits****Opera Workshop Ensemble VIII**

Students will study, rehearse and perform staged solo, small ensemble and chorus repertoire from a variety of musical styles, including Opera, Oratorio, Musical Theatre and Operetta. Students will perform in concerts both on and off campus. Note: Students will be required to perform in a variety of languages.

Level: UG

Prerequisite(s): MUSI 4780 or successful audition

Attribute: ARTS (p. 521)

**MUSI 4881 2 credits****Kwantlen Chamber Singers VIII**

Students will study, rehearse and perform chamber choir repertoire in a variety of musical styles, ranging from Renaissance to the present day. They will audition for the ensemble at the beginning of each semester. Students will perform in concerts both on and off campus. Note: Students may perform in a variety of languages.

Level: UG

Prerequisite(s): MUSI 4781 and successful audition

Attribute: ARTS (p. 521)

**MUSI 4899 3 credits****Music Practicum**

Students will participate in a practicum where they will integrate and apply theoretical/practical concepts from various courses. They will have an introduction to music in the community by observing various teaching/learning practices and assessment skills. Students will have opportunities in a variety of workplace settings to experience the daily and/or weekly approaches of musicians / conductors / teachers / administrators. They will observe and participate in the concept of music-making and arts education in a community environment. Students will also participate in class seminars to discuss and present issues arising from the practicum experience.

Level: UG

Prerequisite(s): MUSI 3512 and (MUSI 3586 or MUSI 3686)

Attribute: ARTS (p. 521)

## Nursing (NRSG)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables/) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**NRSG 2121 3 credits****Professional Identity 1**

Students will explore the profession of nursing and distinguish how nurses embody and project a professional presence. They will recognize how nurses fulfill various roles and how all nursing is guided by Professional Standards and a Code of Ethics. Students will also begin to describe ethical responsibilities and legal obligations related to maintaining the Standards of Practice and relevant legislation.

Level: UG

Co-requisite(s): HEAL 2150, NRSG 2135, NRSG 2145 and NRSG 2175

Attribute: HLTH (p. 521)

**NRSG 2135 3 credits****Relational Practice: Advanced Communications**

Students will explore the meaning of relational practice from various perspectives and comprehend how relational practice is the foundation of all nursing practice. Building upon previous learning, students will develop communication strategies that prepare them to communicate therapeutically, respectfully, and compassionately with clients. Students will examine how various approaches to engaging with clients can enhance a client's well-being.

Level: UG

Co-requisite(s): NRSG 2121, NRSG 2145, NRSG 2175 and HEAL 2150

Attribute: HLTH (p. 521)

**NRSG 2145 6 credits****Nursing Practice 1**

Students will engage in nursing practice experiences with clients in various settings. Primary healthcare and the determinants of health will be emphasized. Students will have opportunities to practice collaboratively with interdisciplinary and multi-sectorial groups integrating beginning leadership and communication skills. They will provide nursing care to clients from a variety of ages experiencing health situations impacted by the determinants of health. They will demonstrate personal and professional growth in their practice as they develop their professional identity. Note: Students will be required to provide their own transportation to and from a variety of clinical placement agencies in the Lower Mainland. Seminar debriefing may also be included on campus.

Level: UG

Co-requisite(s): HEAL 2150, NRSG 2121, NRSG 2135 and NRSG 2175.

Attribute: HLTH (p. 521)

**NRSG 2175 3 credits****Nursing Applications 1**

Students will explore and begin to develop a repertoire of nursing applications in relation to people's experience with health promotion and primary health care. They will begin to apply knowledge from clients' experiences, nursing theories, professional standards, science, humanities, ethics, and relational practice to assess and plan nursing care for clients in a variety of community settings. Students will apply critical thinking, clinical decision making, interpersonal and organizational skills in a theoretical context. They will reflect upon nursing care and anticipate and plan subsequent care for clients in a select context, setting or population with guidance.

Level: UG

Co-requisite(s): HEAL 2150, NRSG 2121, NRSG 2135 and NRSG 2145.

Attribute: HLTH (p. 521)

**NRSG 2245 6 credits****Nursing Practice 2**

Students will engage with clients in a variety of settings who are experiencing predictable health situations. Practice experience includes instructor guided and supervised client care in acute care settings. Students will have opportunities to apply knowledge from nursing theory and the sciences to their clinical practice and start to develop clinical decision making abilities. They will explore and use the expertise of health team members in a variety of contexts. Note: Students will be required to provide their own transportation to and from a variety of clinical placement agencies in the Lower Mainland. Seminar debriefing may also be included on campus.

Level: UG

Prerequisite(s): HEAL 2150, NRSG 2121, NRSG 2135, NRSG 2145 and NRSG 2175.

Co-requisite(s): NRSG 2265, NRSG 2266 and NRSG 2275.

Attribute: HLTH (p. 521)

**NRSG 2265 3 credits****Nursing Science 1: Pathophysiology Part 1**

Students will explore pathophysiology in relation to homeostasis, pathogenesis, and the effects of dysfunction of normal homeostatic processes. They will draw on existing knowledge of human anatomy and physiology by examining selected disease processes related to body systems. Students will explore interdisciplinary care including diagnostics and collaborative management.

Level: UG

Prerequisite(s): All of a) NRSG 2121, 2135, 2145, 2175 and b) HEAL 2150

Co-requisite(s): NRSG 2245, NRSG 2266 and NRSG 2275.

Attribute: HLTH (p. 521)

**NRSG 2266 3 credits****Nursing Science 2: Pharmacology**

Students will learn the basic principles and concepts of pharmacology in a Canadian context. An introduction to selected drug classifications and medication administration will emphasize client safety. Students will use a systematic approach to drug research, client condition, client education with consideration of special client populations, and ethno-cultural contexts.

Level: UG

Prerequisite(s): HEAL 2150, NRSG 2121, NRSG 2135, NRSG 2145 and NRSG 2175.

Co-requisite(s): NRSG 2265

Attribute: HLTH (p. 521)

**NRSG 2275 3 credits****Nursing Applications 2**

Students will continue to explore and develop a repertoire of nursing applications in relation to people's experience with predictable health situations in a theoretical context. They will begin to integrate knowledge from clients' experiences, nursing theories, professional standards, science, humanities, ethics, research and relational practice to assess and plan nursing care for individuals and families experiencing birth, surgery, or medical management of acute and chronic health challenges, with predictable outcomes. Students will begin to apply higher order thinking and clinical decision making reflecting on their practice experience in order to deepen and broaden their skills in assessing, planning, implementing and evaluating nursing care. They will integrate knowledge to both prepare for subsequent clinical learning and analyze previous clinical experiences.

Level: UG

Prerequisite(s): NRSG 2121, NRSG 2135, NRSG 2145, NRSG 2175 and HEAL 2150.

Co-requisite(s): NRSG 2245, NRSG 2265 and NRSG 2266.

Attribute: HLTH (p. 521)

**NRSG 3121 3 credits****Professional Identity 2**

Students will continue their exploration of the nursing profession and examine how nurses influence the health of Canadians and the evolution of the health care system. They will formulate their perspective on issues being addressed by the profession and health care system in a theoretical context related to economic, political, cultural and social influences. Students will also distinguish between ethical responsibility and legal obligations and their relevance in providing care as collaborative team members.

Level: UG

Prerequisite(s): NRSG 2245, NRSG 2265, NRSG 2266 and NRSG 2275.

Co-requisite(s): HEAL 2250, NRSG 3145, NRSG 3165 and NRSG 3175.

Attribute: HLTH (p. 521)

**NRSG 3130 3 credits****Self and Others 2: Advanced Interpersonal Communications & Reflection on Practice**

Students will build upon theories and concepts from Self and Others 1. They will reflect on and enhance interpersonal relational communications and intervention strategies with individuals, families, groups, and the interdisciplinary team, including intercultural communication.

Level: UG

Prerequisite(s): (NRSG 2211 or NRSG 2212) and NRSG 2220 and (NRSG 2241 or NRSG 2242) and NRSG 2260 and a Semester 4 term GPA of 2.33 or higher

Attribute: HLTH (p. 521)

**NRSG 3142 4 credits****Nursing Practice 5: Mental Health**

Students will engage in nursing practice experiences in mental health settings, with an emphasis on healing, preventative health, and health promotion. They will broaden their experiences within interdisciplinary teams and have opportunities to demonstrate leadership skills. Students will examine the significance of ethics when engaging in caring relations that promote health and healing for clients with mental health challenges.

Note: This course includes a weekly seminar

Level: UG

Prerequisite(s): (NRSG 2350 or NRSG 2242) and (NRSG 2211 or NRSG 2212) and NRSG 2220 and NRSG 2260 and a Semester 4 term GPA of 2.33 or higher

Co-requisite(s): NRSG 3161

Attribute: HLTH (p. 521)

**NRSG 3143 4 credits****Nursing Practice 5: Child and Family Health**

Students will engage in nursing practice experiences in pediatric care settings with an emphasis on healing, preventative health and health promotion. They will broaden their experiences within interdisciplinary teams and have opportunities to demonstrate leadership skills. Students will examine the significance of ethics when engaging in caring relations that promote health and healing in the child and family. Note: This course includes a weekly seminar.

Level: UG

Prerequisite(s): (NRSG 2350 or NRSG 2242) and (NRSG 2211 or NRSG 2212) and NRSG 2220 and NRSG 2260 and a Semester 4 term GPA of 2.33 or higher

Co-requisite(s): NRSG 3161

Attribute: HLTH (p. 521)

**NRSG 3145 6 credits****Nursing Practice 3**

Students will engage with clients who are experiencing predictable and some unpredictable health situations in a variety of acute care settings. The practice experience includes instructor guided and supervised client care. Students will have opportunities to apply knowledge from nursing theory and the sciences to their clinical practice and continue to develop clinical decision making abilities. They will explore and use the expertise of health team members in a variety of contexts. Note: Students will be required to provide their own transportation to and from a variety of clinical placement agencies in the Lower Mainland. Seminar debriefing may also be included on campus.

Level: UG

Prerequisite(s): NRSG 2245, NRSG 2265, NRSG 2266 and NRSG 2275.

Co-requisite(s): HEAL 2250, NRSG 3121, NRSG 3165 and NRSG 3175.

Attribute: HLTH (p. 521)

**NRSG 3161 3 credits****Health Sciences 5: Health Challenges for Children and Mental Health Issues Across the Lifespan**

Students will build on their nursing knowledge and understanding of healing, preventative health and health promotion in relation to caring for children and families, and clients with mental health challenges across the lifespan. They will explore issues, concepts and current topics related to complex episodic and chronic health challenges.

Level: UG

Prerequisite(s): NRSG 2350 or NRSG 2242

Co-requisite(s): NRSG 3142 and NRSG 3143

Attribute: HLTH (p. 521)

**NRSG 3165 3 credits****Nursing Science 3: Pathophysiology Part 2**

Students will continue to explore pathophysiology in relation to homeostasis, pathogenesis, and the effects of dysfunction of normal homeostatic processes. They will draw on existing knowledge of human anatomy and physiology by examining selected disease processes related to body systems. Students will explore interdisciplinary care, including diagnostics and collaborative management.

Level: UG

Prerequisite(s): NRSG 2245, NRSG 2265, NRSG 2266 and NRSG 2275.

Co-requisite(s): HEAL 2250, NRSG 3121, NRSG 3145 and NRSG 3175.

Attribute: HLTH (p. 521)

**NRSG 3175 3 credits****Nursing Applications 3**

Students will continue to develop a repertoire of nursing applications in relation to client experience with more unpredictable health situations. They will continue to integrate knowledge from clients' experiences and relevant theory to assess and plan nursing care for individuals and families experiencing more unpredictable maternal/child, acute and chronic health challenges. Students continue refining higher order thinking and clinical decision making in a theoretical context by reflecting on their practice experience to deepen and broaden their skills. They will integrate knowledge to both prepare for subsequent clinical learning and analyze previous clinical experiences.

Level: UG

Prerequisite(s): NRSG 2245, NRSG 2265, NRSG 2266 and NRSG 2275.

Co-requisite(s): HEAL 2250, NRSG 3121, NRSG 3145 and NRSG 3165.

Attribute: HLTH (p. 521)

**NRSG 3212 3 credits****Health 2: Health Promotion and Community Empowerment**

Students will focus on community as client from a health promotion perspective. They will explore community empowerment including concepts such as; primary health care, levels of prevention, population health, health prerequisites and determinants, capacity, assets, social justice and empowerment. Students will analyze community development as a philosophy and a process for health promotion with a focus on local, national and global health care issues.

Level: UG

Prerequisite(s): [NRSG 3141 or (NRSG 3142 and NRSG 3143)] and NRSG 3161 and (NRSG 3231 or NRSG 3130) and PHIL 3010 and a Semester 5 term GPA of 2.33 or higher.

Co-requisite(s): (NRSG 3244 or NRSG 3241)

Attribute: HLTH (p. 521)

**NRSG 3213 3 credits****Public Health & Maternity Nursing Theory**

Students will be introduced to the theory underlying Public Health and Maternity Nursing practice. They will explore the historical evolution and current practices for these two fields of nursing. Students will focus on concepts of health promotion/empowerment and relational caring as they relate to maternal-child, family, community and population health.

Level: UG

Prerequisite(s): NRSG 3142, 3143, 3130, PHIL 3010 and (NRSG 3160 or 3161) and a Semester 5 cumulative GPA of a minimum of 2.33

Co-requisite(s): NRSG 3243 and NRSG 3244

Attribute: HLTH (p. 521)

**NRSG 3242 2 credits****Nursing Practice 6: Public Health**

Students will explore public health nursing practice with a focus on concepts related to health promotion, disease prevention, harm reduction, and health surveillance. They will work collaboratively with public health nurses to explore community-based care for child-bearing families and vulnerable populations, such as youth, Aboriginals, immigrants, and homeless people. Students will learn to work in partnership with clients and the health care team. They will focus on client as family, group/aggregate, population, and/or community. Note: This is a practice course with a weekly seminar.

Level: UG

Prerequisite(s): NRSG 3142, 3143, 3130, (3160 or 3161) and PHIL 3010, and a Semester 5 term GPA of 2.3 or higher

Co-requisite(s): NRSG 3213 and NRSG 3243

Attribute: HLTH (p. 521)

**NRSG 3243 3 credits****Nursing Practice 6: Maternal Child**

Students will engage in nursing practice experiences, caring for mothers and babies and their families during the perinatal period. They will develop caring relationships with childbearing families while collaborating with the interdisciplinary team to provide evidence-informed, health promoting/empowering and culturally-safe care. Note: This is a practice course with a weekly seminar.

Level: UG

Prerequisite(s): NRSG 3142, 3143, 3130, 3161 and PHIL 3010, and (NRSG 3160 or 3161) and a Semester 5 term GPA of 2.33 or higher

Co-requisite(s): NRSG 3213, NRSG 3242

Attribute: HLTH (p. 521)

**NRSG 3244 6 credits****Nursing Practice 6: Community Development**

Students will work with a community on an identified health issue enabling them to apply principles of community development and capacity building. They will broaden their experiences working with diverse groups and communities to promote health with an emphasis on empowerment. Students will apply community development philosophy and processes recognizing the impact of the social determinants of health. Note: This is a practice course with a weekly seminar.

Level: UG

Prerequisite(s): NRSG 3142, 3143, 3130 and (NRSG 3161 or NRSG 3160) and PHIL 3010 and a Semester 5 term GPA of 2.33 or higher

Co-requisite(s): NRSG 3212

Attribute: HLTH (p. 521)

**NRSG 3245 6 credits****Nursing Practice 4**

Students will engage with clients who are experiencing unpredictable health situations. Practice experience includes instructor guided and supervised client care in a variety of acute care settings. Students will have opportunities to apply knowledge from nursing theory and the sciences to their clinical practice and continue to develop clinical decision making abilities. They will explore and use the expertise of health team members in a variety of contexts. Note: Students will be required to provide their own transportation to and from a variety of clinical placement agencies in the Lower Mainland. Seminar debriefing may also be included on campus.

Level: UG

Prerequisite(s): NRSG 3121, NRSG 3145, NRSG 3165, NRSG 3175 and HEAL 2250.

Co-requisite(s): NRSG 3275 and HEAL 3180.

Attribute: HLTH (p. 521)

**NRSG 3275 3 credits****Nursing Applications 4**

Students will integrate learning from previous course work and clinical experiences to refine their ability to care for complex clients with unpredictable health challenges. They will begin to exhibit independent, higher order thinking and problem solving in a theoretical context. Students will continue to integrate knowledge to both prepare for subsequent clinical learning and analyze previous clinical experiences.

Level: UG

Prerequisite(s): NRSG 3121, NRSG 3145, NRSG 3165, NRSG 3175 and HEAL 2250

Co-requisite(s): NRSG 3245 and HEAL 3180

Attribute: HLTH (p. 521)

**NRSG 3350 4.5 credits****Consolidated Nursing Practice 1**

Students will have opportunities to integrate learning from previous semesters and advance their professional nursing practice. They will consolidate learning and enhance their clinical decision-making skills in a variety of settings. Students will have opportunities to provide care for clients within complex episodic and/or chronic health challenges, and will develop independence in their nursing practice. Note: This is a 5 week fulltime preceptorship course.

Level: UG

Prerequisite(s): (NRSG 3211 or NRSG 3212) and NRSG 3213 and (NRSG 3241 or 3244) and (NRSG 3242 and NRSG 3243) with a Semester 6 term GPA of 2.33 or higher

Attribute: HLTH (p. 521)

**NRSG 3500 2 credits****Program Orientation: Introduction to Nursing**

Students will participate in a two-week on-campus residency that includes an orientation to the program, orientation to online learning, and an introduction to case-based learning. They will be introduced to nursing skills related to physical assessment, professional nursing practice standards and essentials of Canada's health care system. They will begin to practice relational engagement, critical thinking and a variety of clinical decision-making models, including aboriginal frameworks. Students will apply knowledge of physical assessment, critical thinking and relational engagement in case studies and in the simulation lab. They will begin to develop a learning ePortfolio.

Level: UG

Co-requisite(s): NRSG 3510

Attributes: F2A4 (p. 521), HLTH (p. 521)

**NRSG 3510 4 credits****Practice and Praxis 1: Episodic Health Challenges**

Students will engage in a relational process with individuals and families experiencing episodic health challenges in the home, community, agencies and care facilities. They will enhance their knowledge and develop awareness of and sensitivity to the experience of health perceived by individuals and families. Students will apply theoretical learning in practice settings and praxis seminars. Note: Praxis is delivered fully online.

Level: UG

Co-requisite(s): NRSG 3500, NRSG 3530

Attributes: F2A4 (p. 521), HLTH (p. 521)

**NRSG 3520 2 credits****Relational Engagement 1**

Students will focus on their personal discovery of self, and self in mutual relational engagement with others. They will explore how personal beliefs, values, experiences, world views (including Aboriginal), and perceptions relate to and impact personal development and caring experiences with self and others, such as individuals, families, and groups, within increasingly complex practice settings. Note: Delivered fully online.

Level: UG

Co-requisite(s): NRSG 3500, NRSG 3510

Attributes: F2A4 (p. 521), HLTH (p. 521)

**NRSG 3530 3 credits****Health Promotion 1: Episodic Health Challenges**

Students will explore at an introductory level, from a health promotion perspective, people's experiences related to pathophysiology, episodic health challenges and healing. They will build on nursing practice skills by discussing and critiquing client experiences, and creating plans for nursing care. They will apply critical thinking, clinical decision-making, relational and organizational skills to promote healing. NOTE: Delivered fully online.

Level: UG

Co-requisite(s): NRSG 3500, NRSG 3510

Attributes: F2A4 (p. 521), HLTH (p. 521)

**NRSG 3540 1.5 credits****Critical Inquiry 1: Quantitative Research**

Students will enhance their abilities to participate in the research process through critical reflection of various quantitative research methodologies. They will develop their abilities to comprehend, critique, and utilize quantitative research. Students will use statistical analysis and deductive reasoning. They will explore ways to apply research findings to promote evidence-informed practice to support health, ecological well-being and sustainability. Note: Delivered fully online.

Level: UG

Co-requisite(s): NRSG 3500, NRSG 3510

Attributes: F2A4 (p. 521), HLTH (p. 521), QUAN (p. 532)

**NRSG 3550 2 credits****Professional Role 1**

Students will be introduced to the complexities of professional nursing roles. They will explore the philosophy and foundational concepts of the nursing program, the history of the nursing profession, and nursing roles within the Canadian health care system. Students will explore how nursing practice is guided by the Professional Standards, Code of Ethics, Scope of Practice, other Practice Standards, as well as provincial and federal legislation. Students will explore the relationship between theory, practice, and research and the interdisciplinary aspects of the nurse's role. NOTE: Delivered fully online.

Level: UG

Prerequisite(s): NRSG 3510

Co-requisite(s): NRSG 3610

Attributes: F2A4 (p. 521), HLTH (p. 521)

**NRSG 3610 7 credits****Practice and Praxis 2: Older Adults, Mental Health**

Students will relationally engage with individuals and families experiencing chronic health challenges with a focus on older adults and mental health. They will reflect upon the complexities of caring for families with chronic health and/or mental health challenges. Students will enhance their knowledge and develop keen sensitivity toward the experience of health as perceived by individuals and their families. They will apply theoretical learning in practice settings and praxis seminars. Note: This course is partially online.

Level: UG

Prerequisite(s): NRSG 3510

Co-requisite(s): GNQU 1301

Attributes: F2A4 (p. 521), HLTH (p. 521)

**NRSG 3620 2 credits****Relational Engagement 2**

Students will develop a conceptual and experiential understanding of relational engagement and caring practice (including Aboriginal wisdom) when working with older adults and people experiencing mental health challenges. They will enhance their awareness and understanding of the narratives, values, and intents influencing their relationships with clients and colleagues, and further develop their capacity for relational caring practices. Note: Delivered fully online

Level: UG

Prerequisite(s): NRSG 3500

Co-requisite(s): NRSG 3610

Attributes: F2A4 (p. 521), HLTH (p. 521)

**NRSG 3630 3 credits****Health Promotion 2: Pharmacology**

Students will explore and apply fundamental principles of pharmacology with an emphasis on health promotion, medication monitoring and client education. They will explore the principles of therapeutic medication administration and consider the legal, cultural, and ethical implications of safe medication management. They will explore the use of these principles in practice, including relevant legislation, drug action and interaction, routes of administration, and calculation of dosages for drugs used. Students will become familiar with the generic and trade names of drugs prescribed for common health challenges. Note: Delivered fully online.

Level: UG

Prerequisite(s): NRSG 3510

Co-requisite(s): NRSG 3610

Attributes: F2A4 (p. 521), HLTH (p. 521)

**NRSG 3640 1.5 credits****Critical Inquiry 2: Qualitative Research**

Students will enhance their abilities to participate in the research process through critical reflection of various qualitative research methodologies. They will develop their abilities to comprehend, critique, and utilize qualitative data, using appropriate techniques such as clustering and thematic analysis. Students will gain practical knowledge of the many ways in which qualitative research techniques provide a contextual and in-depth understanding of people's ways of knowing and experiencing. Students will explore ways to apply research findings to guide reflective evidence-informed nursing practice. NOTE: Delivered fully online.

Level: UG

Co-requisite(s): NRSG 3500, NRSG 3510 External Accreditation:

Attributes: F2A4 (p. 521), HLTH (p. 521)

**NRSG 3700 2 credits****Access for BPN Graduates**

Students will participate in a two-week on-campus residency that includes an orientation to the program and the consolidation residency. They will review the processes of case-based and online learning. Students will review nursing skills related to physical assessment, professional nursing practice standards and the essentials of Canada's health care system. They will incorporate the principles of relational engagement, higher order thinking and clinical decision-making models, including aboriginal frameworks. Students will apply this knowledge to case studies and in the simulation lab. They will begin to develop a learning ePortfolio.

Level: UG

Prerequisite(s): Kwantlen Polytechnic University Bachelor of Psychiatric Nursing graduate admitted to the Bachelor of Science in Nursing – Advanced Entry program.

Co-requisite(s): NRSG 3710

Attributes: F2A4 (p. 521), HLTH (p. 521)

**NRSG 3701 4 credits****Program Orientation: Access for BPN Graduates**

Students will focus on an introduction to the program, informatics, online learning, the technologies used in the program, and case-based learning. They will explore the philosophy and foundational concepts of the nursing program, the history of the nursing profession, and nursing roles within the Canadian health care system. Students will review nursing skills related to physical assessment, professional nursing practice standards from a registered nurse role perspective. They will apply knowledge of physical assessment, critical thinking and relational engagement in case studies and in the Simulation lab. They will incorporate the principles of relational engagement, higher order thinking and clinical decision-making models, including Indigenous frameworks. Students will explore the relationship between theory, practice, and research and the interdisciplinary aspects of the registered nurse's role. They will begin to develop a learning ePortfolio.

Level: UG

Prerequisite(s): Bachelor of Psychiatric Nursing graduate admitted to the Bachelor of Science in Nursing – Advanced Entry program

Co-requisite(s): NRSG 3705

Attributes: F2A4 (p. 521), HLTH (p. 521)

**NRSG 3705 3 credits****Health Promotion: Patho and Pharm Update**

Students will review, from a health promotion perspective, people's experiences related to pathophysiology, episodic health challenges and healing. They will review and apply fundamental principles of pharmacology with a consistent emphasis on health promotion through medication monitoring and client education. They will apply critical thinking, clinical decision-making, relational and organizational skills to promote healing.

Level: UG

Prerequisite(s): Bachelor of Psychiatric Nursing graduate admitted to the Bachelor of Science in Nursing – Advanced Entry program

Co-requisite(s): NRSG 3701

Attributes: F2A4 (p. 521), HLTH (p. 521)

**NRSG 3710 15 credits****Practice and Praxis 3: Capstone 1**

Students will relationally engage in client-centered care for individuals and families within acute care settings. They will develop an understanding of the experience of health challenges and healing practices that support client-directed care. Students will attend compressed lab times prior to clinical experiences, with a total of full-time practice for ten weeks.

Level: UG

Prerequisite(s): NRSG 3610 or a Kwantlen Polytechnic University Bachelor of Psychiatric Nursing graduate admitted to the Bachelor of Science in Nursing Advanced Entry program.

Attributes: F2A4 (p. 521), HLTH (p. 521)

**NRSG 3740 2 credits****Critical Inquiry 3: Data Analysis**

Students will be introduced to the techniques commonly used in the analysis of quantitative and qualitative data, using a variety of data analysis software. They will engage in the process of qualitative analysis by collecting, examining and coding qualitative data, using thematic analysis. Students will also examine a variety of descriptive and inferential statistical approaches to quantitative analysis. NOTE: Delivered fully online. All of NRSG 3510, NRSG 3540 and NRSG 3640

Level: UG

Co-requisite(s): NRSG 3610

Attributes: F2A4 (p. 521), HLTH (p. 521), QUAN (p. 532)

**NRSG 4112 3 credits****Health 4: Influencing Change**

Students will explore ways to influence and create change for the promotion of societal health. They will examine the culture, power, and politics of leadership and organizations. Students will critique selected strategies for enhancing professional influence on the evolving Canadian health care system, and society.

Level: UG

Prerequisite(s): NRSG 3350 and a Semester 6 term GPA of 2.33 or higher

Co-requisite(s): NRSG 4142

Attribute: HLTH (p. 521)

**NRSG 4121 3 credits****Professional Growth 3: Inquiry and Research Methods**

Students will examine concepts and theories related to inquiry and research in professional nursing practice. Students will enhance their abilities to participate in inquiry and the research process through critical reflection of various qualitative and quantitative research methodologies. They will develop their abilities to comprehend, critique, and utilize data, using appropriate techniques. Students will gain practical knowledge of the many ways in which qualitative and quantitative research techniques provide a contextual and in-depth understanding of people's ways of knowing and experiencing. They will explore ways to apply research findings to guide reflective evidence-informed nursing practice. Note: This course is partially online.

Level: UG

Prerequisite(s): NRSG 3350 and a cumulative semester 6 GPA of 2.33 or higher, or NRSG 3190

Co-requisite(s): NRSG 4112, NRSG 4122, NRSG 4142

Attributes: HLTH (p. 521), QUAN (p. 532)

**NRSG 4122 3 credits****Professional Growth 4: Qualitative & Quantitative Analysis**

Students will be introduced to the techniques commonly used in the analysis of quantitative and qualitative data, using a variety of data analysis software. They will engage in the process of qualitative analysis by collecting, examining and coding qualitative data. Students will also examine and apply a variety of descriptive and inferential statistical approaches to quantitative analysis.

Level: UG

Attributes: HLTH (p. 521), QUAN (p. 532)

**NRSG 4142 6 credits****Nursing Practice 7: Change**

Students will engage in activities to influence change for the promotion of societal health within the Canadian health care system. They will have opportunities to work collaboratively with interdisciplinary and multi-sectoral groups. Students demonstrate leadership and personal and professional growth in their practice as nurses in public and non-governmental non-profit organizational settings. Note: This is a practice course with a seminar.

Level: UG

Prerequisite(s): NRSG 3350 and Semester 6 term GPA of 2.33 or higher, or NRSG 3190

Co-requisite(s): NRSG 4112

Attribute: HLTH (p. 521)

**NRSG 4145 8 credits****Nursing Practice 5**

Students will engage with clients who are experiencing unpredictable and more complex health situations. Practice experience includes guided client care in a variety of health settings. Students will continue to develop clinical decision making abilities with minimal guidance. They will expand their capacity as a health team member in a variety of contexts. Opportunities for seeking and using new knowledge that may enhance, support, or influence competence in practice will be maximized. Note: Students will be required to provide their own transportation to and from a variety of clinical placement agencies in the Lower Mainland. Seminar debriefing may also be included on campus.

Level: UG

Prerequisite(s): All of NRSG 3245, 3275 and HEAL 3180

Co-requisite(s): NRSG 4165 and NRSG 4175

Attribute: HLTH (p. 521)

**NRSG 4165 3 credits****Complex Client Care**

Students will synthesize previous learning and develop their clinical reasoning skills for managing clients with complex clinical presentations in theoretical contexts. They will increase proficiency to anticipate actual and potential problems while intervening appropriately to provide comprehensive compassionate nursing care in a theoretical setting. Students will also expand their communication skills to support holistic collaborative care in critical situations.

Level: UG

Prerequisite(s): HEAL 3180, NRSG 3245 and NRSG 3275.

Co-requisite(s): NRSG 4145 and NRSG 4175.

Attribute: HLTH (p. 521)

**NRSG 4175 3 credits****Nursing Applications 5**

Students will integrate learning from previous course work and clinical experiences to refine their ability to care for complex clients with unpredictable health challenges. They will begin to exhibit independent critical thinking and problem solving in a theoretical context, planning care for special populations and emphasizing leadership skills. Students will continue to integrate knowledge to both prepare for subsequent clinical learning and analyze previous clinical experiences.

Level: UG

Prerequisite(s): HEAL 3180, NRSG 3245 and NRSG 3275

Co-requisite(s): NRSG 4145 and NRSG 4165

Attribute: HLTH (p. 521)

**NRSG 4242 8.5 credits****Consolidated Nursing Practice 8**

Students will integrate learning from throughout the program and advance their professional nursing practice in a specific practice setting. They will increase competence, autonomy and confidence across the professional and practice standards of nursing in preparation for their role as a beginning Registered Nurse. This 360 hour clinical experience will be completed within the semester, start dates may vary. NOTE: The learning experience will include weekends, holidays and rotating shifts. Students will be required to provide their own transportation to and from a variety of clinical placement agencies in the Lower Mainland. Seminar debriefing may also be included on campus.

Level: UG

Prerequisite(s): A Semester 7 term GPA of 2.33 or higher

Attribute: HLTH (p. 521)

**NRSG 4245 10 credits****Nursing Practice 6 Consolidated Nursing Practice**

Students will integrate learning from throughout the program and advance their professional nursing practice in a specific practice setting. They will increase competence, autonomy and confidence across the professional and practice standards of nursing in preparation for their role as a beginning Registered Nurse. This 360 hour clinical experience will be completed within the semester, start dates may vary. NOTE: The learning experience will include weekends, holidays and rotating shifts. Students will be required to provide their own transportation to and from a variety of clinical placement agencies in the Lower Mainland. Seminar debriefing may also be included on campus.

Level: UG

Prerequisite(s): All of (a) NRSG 4145, 4165, 4175, PHIL 3010 and (b) 3 credits from a course at the 2000 level or higher in ANTH, CRIM, ENGL, HEAL, HSCI, PSYC or SOCI

Attribute: HLTH (p. 521)

**NRSG 4510 5 credits****Practice and Praxis 4: The Experience of Nursing of Families**

Students will relationally engage with individuals and families experiencing health challenges, focusing on generative families and pediatrics. Basic assessment and care of generative families and pediatric clients will be explored in the lab. They will reflect upon the complexities of caring for families with health challenges and develop sensitivity toward the experience of health as perceived by the individual/family.

Level: UG

Prerequisite(s): NRSG 3710

Co-requisite(s): GNQU 1309 and GNQU 1321

Attributes: F2A4 (p. 521), HLTH (p. 521)

**NRSG 4520 1 credit****Relational Engagement 3: Family Context**

Students will further develop a conceptual and experiential understanding of the relational nature of caring practice within families, focusing on pediatrics and generative families. They will enhance their awareness and understanding of the narratives, values, and intents influencing their relationships with clients and their families, and will enhance their capacity for relational caring practice. Note: Delivered fully online.

Level: UG

Prerequisite(s): NRSG 3710

Co-requisite(s): NRSG 4510

Attributes: F2A4 (p. 521), HLTH (p. 521)

**NRSG 4530 2 credits****Health Promotion 3: Community Context**

Students will explore the concepts of primary, secondary, and tertiary prevention in the context of Canadian community health. They will focus on a comparative analysis of primary health care, prevention, and health promotion and examine the roles of nurses within the community. Students will examine the significance of interdisciplinary collaboration in working with community health issues. They will analyze social determinants of health, environmental health, and the impacts these have on the health and wellbeing of Canadians. Students will explore community development and change agency theories to improve community health with a focus on Aboriginal community dynamics. Note: Delivered fully online.

Level: UG

Prerequisite(s): NRSG 4510

Co-requisite(s): NRSG 4610

Attributes: F2A4 (p. 521), HLTH (p. 521)

**NRSG 4540 2 credits****Critical Inquiry 4: Nursing Theories**

Students will examine concepts and theories related to nursing science and practice, health and well-being. They will apply ethical, feminist, and critical theories and a phenomenological perspective when exploring the nursing profession, health, and healing. Students will use their own practice experiences to make meaning of conceptual frameworks and nursing theories. They will explore the process of concept development and synthesis and the genesis of theory development. Students will examine the central tenets of Aboriginal traditional knowledge and compare them to the ontology, epistemology, and methodology of theory development in western knowledge. Note: Delivered fully online.

Level: UG

Prerequisite(s): NRSG 4510

Co-requisite(s): NRSG 4610

Attributes: F2A4 (p. 521), HLTH (p. 521)

**NRSG 4550 1 credit****Professional Role 2: Teaching and Learning**

Students will examine a variety of teaching and learning theories, perspectives, and strategies that underlie meaningful relational interactions with individuals, families, and groups. They will explore the influence of personal meaning, beliefs, and values on teaching and learning processes from the perspective of both teacher and learner. Students will participate in teaching and learning encounters with a focus on health education, epidemiology and prevention. Note: Delivered fully online.

Level: UG

Prerequisite(s): NRSG 3710

Co-requisite(s): NRSG 4510

Attributes: F2A4 (p. 521), HLTH (p. 521)

**NRSG 4610 5 credits****Practice and Praxis 5: Community Context**

Students will develop caring, relationally engaged partnerships with community agencies with a focus on health promotion, capacity building, and community development. They will reflect upon the complexities of community health and development. Students will apply theoretical learning related to empowerment, participatory action, cultural safety, cultural competence, and change agency in practice placements and praxis seminars.

Level: UG

Prerequisite(s): NRSG 4510

Co-requisite(s): NRSG 4530

Attributes: F2A4 (p. 521), HLTH (p. 521)

**NRSG 4620 2 credits****Relational Engagement 4: Community**

Students will develop a conceptual and experiential understanding of relational engagement within the context of community. They will enhance their awareness and understanding of the narratives, values, and intents influencing their relationships with community groups, and will enhance their capacity for relational caring practices. Note: Delivered fully online

Level: UG

Prerequisite(s): NRSG 4510

Co-requisite(s): NRSG 4610

Attributes: F2A4 (p. 521), HLTH (p. 521)

**NRSG 4640 2 credits****Critical Inquiry 5: Health Care and Bioethics**

Students will develop a fundamental understanding of ethical theory applied to cases in bioethics and health care. They will examine ethical approaches as tools for generating and evaluating informed decisions and fundamental rights about ethical issues in healthcare. Students will discuss case studies from a variety of disciplines in the context of exploring general moral principles and their applications within health care. Students will apply a phenomenological perspective to the examination of ethical issues within health care and society. They will explore Aboriginal ethical philosophy such as relatedness, generational responsibility, and holistic and communal decision-making. Note: Delivered fully online

Level: UG

Prerequisite(s): NRSG 4510

Co-requisite(s): NRSG 4610

Attributes: F2A4 (p. 521), HLTH (p. 521)

**NRSG 4650 2 credits****Professional Role 3: Health Care Leadership**

Students will explore leadership roles in nursing and health care within practice, education, research, and administration. They will explore ways to influence and create change for the promotion of societal health and for optimal workplace quality. Students will examine the culture, power, and politics of leadership within health and social organizations. They will critique selected strategies for enhancing professional influence on the evolving Canadian health care system, and critically evaluate the role of the nurse as they transition into the graduate role. Note: Delivered fully online.

Level: UG

Prerequisite(s): NRSG 4610

Co-requisite(s): NRSG 4710

Attributes: F2A4 (p. 521), HLTH (p. 521)

**NRSG 4710 5 credits****Practice and Praxis 6: Global Context**

Students will relationally engage with individuals, families or groups with a focus on primary health care and global health. They will reflect upon the complexities of community health and development in a global context. They will explore travel nursing, international nursing, and the disparities in health care across the globe and on a local level. Students will apply theoretical learning in practice placements and online praxis seminars. Note: Praxis is delivered fully online.

Level: UG

Prerequisite(s): NRSG 4610

Co-requisite(s): NRSG 4720

Attributes: F2A4 (p. 521), HLTH (p. 521)

**NRSG 4720 2 credits****Relational Engagement 5: Global Context**

Students will develop a conceptual and experiential understanding of relational engagement and caring practice with a focus on the global community as client from a health promotion perspective. They will explore the principles of health promotion, including social determinants of health, participation, capacity, and empowerment in a global context. Students will analyze community development as a pattern for health promotion and global nursing practice. They will explore professional issues necessary for transition to the transcultural and international workplace, including social, political, and regulatory issues central to nursing practice. NOTE: Delivered fully online.

Level: UG

Prerequisite(s): NRSG 4610

Co-requisite(s): NRSG 4710

Attributes: F2A4 (p. 521), HLTH (p. 521)

**NRSG 4810 10 credits****Practice and Praxis 7: Practice Consolidation: Capstone 2**

Students will relationally engage with individuals and families or groups within acute care or community practice settings to consolidate their practice knowledge, skills, and competencies. They will synthesize practice, theory, insights and experiences from all other courses in the program and apply these to their nursing practice. Students will apply theoretical learning in practice placements and online praxis seminars. Note: Praxis is delivered fully online.

Level: UG

Prerequisite(s): NRSG 4710

Attributes: F2A4 (p. 521), HLTH (p. 521)

# Operations & Supply Chain Management (OSCM)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**OSCM 5100 3 credits****Strategic Operations Management**

An operations strategy refers to a set of operational decisions that a firm makes to achieve a long-term competitive advantage. The course covers strategic decisions in product and process design, technology, facilities, vertical integration, work design, and other areas, and also explores means of competition such as cost, quality, timeliness, productivity, customer service and innovativeness. Students will also analyse the intra-organizational relationships among the major functions both in manufacturing and service companies and the interface with the organization's suppliers, customers, and other stakeholders. Note: This course may be offered in compressed mode. Consult the current timetable.

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

**OSCM 5110 3 credits****Information Systems for Operations and Supply Chain Management**

Students will learn how to employ information technology to support the building and maintenance of competitive advantages through operations and supply chains, based on international benchmarks such as Supply Chain Operations Reference (SCOR). With the help of information technology, students will learn the theory and practice associated with developing and managing an effective and efficient flow of materials and information throughout the value chain within internal processes, between an organization and multiple tiers of suppliers and between an organization and customers. Students will understand concepts and apply technology-based approaches aiming at reducing operational costs, optimizing processing capacity, expediting accurate information transfer, enabling effective forecasting and planning under complex and dynamic environments. Ultimately, applying such technologies will capacitate students to implement and maintain in-transit delivery of customizable value. Information systems covered will include, but are not limited to Enterprise Resource Planning (ERP), Business Intelligence Systems (BI), Radio Frequency Identification Systems (RFID), and Geographic Information Systems (GIS)

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

**OSCM 5120 3 credits****Quality Management**

Students will demonstrate advanced understanding of a number of critical components of Quality Management as a conduit to organizational effectiveness. Specific outcomes include demonstrating an understanding of quality management in both manufacturing and service industries, and related concepts including Statistical Quality Control (SQC) and Statistical Process Control (SPC); Six Sigma and Total Quality Management (TQM); measurement of quality in services; and quality systems.

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

**OSCM 5130 3 credits****Productivity, Innovation, and Lean Systems**

Students will study the organic link between productivity and standard of living. The effects on productivity of organization-level factors will be analyzed in depth. The major importance of innovation (especially incremental innovation) for productivity gains will be examined in the context of understanding the typical processes that ensure the transformation of inputs into outputs both in manufacturing and in services. Note: This course may be offered in compressed mode. Consult the current timetable.

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

**OSCM 5140 3 credits****Supply Chain & Logistics Management**

Students will learn how to design and implement supply chain and logistics networks, and how to set and monitor relevant and meaningful metrics leading to competitiveness enhancement. Students will examine in depth the evolving concepts and tools of customer service management, transportation, warehousing, reverse flows, humanitarian logistics, sustainability, and the roles of external forces such as technology, globalization, government regulations, and the growing power of informed customers. Students will apply their knowledge and skills to audit or design real supply chain and logistics activities.

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

**OSCM 5150 3 credits****Applied Operations & Supply Chain Management Project**

Students will complete an Operations & Supply Chain audit of an organization and submit suggestions destined to improve the existing Operations & Supply Chain metrics. Class work will include interactive sessions on planning and structuring the audits, solving specific Operations & Supply Chain problems and dealing with project management issues, and addressing – in a large group setting – complex problems encountered by groups and their client organizations.

Level: UG

Prerequisite(s): 9 credits from courses in OSCM, including OSCM 5100 and OSCM 5140

Attributes: BUSI (p. 521), F2A9 (p. 521)

## Partsperson (PRTS)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables/](http://www.kpu.ca/registration/timetables/) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**PRTS 1100 2 credits****Parts Trade Introduction and Safety**

Students will be introduced to the parts trade through a variety of information including modules and videos. They will complete practical assignments working on the parts and service counter. Students will use a variety of measuring tools and techniques to perform accurate measurements. They will identify and select mechanics' air and hand tools for use by the shop technicians. Students will complete a computer-based on-line program for Workplace Hazardous Materials Information Systems (WHMIS).

Level: VO

Attribute: TRAD (p. 521)

**PRTS 1110 3 credits****Warehousing Tasks & Parts Catalogues**

Students will learn to identify and differentiate between different kinds of warehouse systems. They will set up a mini warehouse and stock items based on two types of stocking procedures. Students will become familiar with the many different catalogue systems available, and will be able to locate accurate part numbers for a variety of applications. Students will complete an assignment on the parts and service counter of approximately one week.

Level: VO

Attribute: TRAD (p. 521)

**PRTS 1120 4 credits****Counter Duties and Basic Vehicular Systems**

Students will learn the principles of good inventory control and will perform inventory counts. They will complete work orders and parts sales invoices. Students will perform price calculations including chain discounts, mark-ups, and pricing structures. They will be introduced to basic engine theory and operation. Students will complete an assignment on the parts and service counter of approximately one week in length.

Level: VO

Attribute: TRAD (p. 521)

**PRTS 1130 3 credits****Mechanical Parts Introduction**

Students will become familiar with the construction and operation of engine belts, hoses, filters, bearings, and batteries. They will learn to select the correct belt, hose, filter, bearing, or battery for a specific application from a variety of parts catalogues. Students will learn the requirements for storage of seals and gaskets. They will study the application and operation of a variety of automotive service technician's specialty tools including pullers, cooling system tools, brake tools, and air tools. Students will complete an assignment on the parts and service counter of approximately one week in length.

Level: VO

Attribute: TRAD (p. 521)

**PRTS 1140 2 credits****Standard Stock, Lubricant & Shop Supplies**

Students will learn to identify and measure threaded fasteners and fittings, and to select the appropriate items needed from parts catalogues. They will learn about friction and lubrication as it relates to the automotive trade, and will be able to select the correct engine, transmission and gear oil based on the API and SAE classification ratings. Students will complete an assignment on the parts and service counter of approximately one week in length.

Level: VO

Attribute: TRAD (p. 521)

**PRTS 1150 2 credits****Catalogues and Engine Components**

Students will locate dealer catalogue part numbers through use of a computer, microfiche, and parts catalogues. They will learn the design and function of engine blocks and internal components, cylinder heads, oil pans, valve covers, and related retail items. Students will practice selecting the correct part number from a variety of catalogues for the components mentioned above. Students will complete an assignment on the parts and service counter of approximately one week in length.

Level: VO

Attribute: TRAD (p. 521)

**PRTS 1160 3 credits****Engine Support Systems**

Students will learn the function and operation of components on the lubrication system, cooling system, fuel system, and exhaust and emission control systems on automobiles. They will practice selecting, from catalogues, the correct part for applications for these systems. Students will complete a practical assignment on the parts and service counter of approximately one week in length.

Level: VO

Attribute: TRAD (p. 521)

## Philosophy (PHIL)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**PHIL 1100 3 credits****Introduction to Philosophy**

Students will study central topics in the major areas of philosophy. They will examine a variety of philosophical perspectives on issues such as mind-body problem, the nature of reality, the limits of human knowledge, morality and moral judgement, and the justification of religious beliefs.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 1101 3 credits****Philosophy, Culture, and Identity**

Students will be introduced, through literary and philosophical works, to issues connected with how the modern identity is formed and how it is constituted in Western culture.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 1110 3 credits****Confronting Moral Issues: Introduction to Ethics**

Students will consider the meaning and justification of moral judgment by examining various views on whether or not morality has an objective basis. They will be introduced to leading theories of ethical conduct and will learn to apply these theories to contemporary moral problems and workplace situations.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 1111 3 credits****Sustainability: Analysis and Ethics**

Students will study elements of traditional philosophy courses such as critical thinking, philosophy of science, and ethics to provide a detailed analysis of a variety of concepts of sustainability. They will examine sustainability policies and practices related to the environment, social equity, and economics. Note: This course is cross-listed with POST 1100. Students may not get credit for both courses.

Level: UG

Cross-listing: POST 1100

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 1112 3 credits****Environmental Ethics**

Students will examine central problems in environmental ethics. They will investigate the philosophical implications of various views about humans' relationship to nature, and consider topics such as the extent of our obligations to non-human animals, to the environment, and to future generations.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 1145 3 credits****Critical Thinking**

Students will study the process of argument reconstruction and evaluation. They will focus on skills necessary that will enable them to distinguish argumentative from non-argumentative writing, rationally persuasive from rhetorically persuasive arguments, and strong from weak arguments. Students will be expected to analyze arguments from a variety of contexts such as newspaper editorials, advertising and surveys.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 1150 3 credits****Introduction to Formal Logic**

Students will study the basic techniques of formal deductive logic. They will learn the semantics and syntax of two artificial languages-sentential logic (SL) and predicate logic (PL)-with emphasis given to the former. With the aid of the formal techniques learned in this course, students will gain insight into the nature of rational argument and sound reasoning.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), QUAN (p. 532)

**PHIL 1155 3 credits****Introduction to Scientific Reasoning**

Students will examine the methodology behind arguments and experimentation in science, including the careful analysis of data, measurement of probability, and the formulation of various explanatory hypotheses. In so doing, they will become familiar, not only with how scientists go about their work, but with the philosophical foundations of scientific reasoning.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), QUAN (p. 532)

**PHIL 2106 3 credits****Ancient Greek Philosophy**

Students will examine the philosophical developments in ancient Greece that gave rise to Western Philosophy, with particular emphasis on one or more of Socrates, Plato or Aristotle.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 2107 3 credits****Modern Philosophy: Descartes to Kant**

Students will study some of the major philosophical texts from the modern period, beginning from the time of Descartes. They will apply methods of philosophical analysis to these texts in the exploration of epistemological, metaphysical, ethical and social-political questions.

Level: UG

Prerequisite(s): 3 credits from courses in PHIL

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 2110 3 credits****Moral Theory**

Students will examine some of the major normative ethical theories. They will study classic works representing the major ethical traditions, including virtue theory, deontology, social contract theory, and utilitarianism. They will examine concepts such as duty, virtue, well-being or happiness, and right action. Students will obtain a critical grasp of these ethical theories and concepts by reading classic works.

Level: UG

Prerequisite(s): 3 credits from courses in PHIL

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 2115 3 credits****Asian Philosophy**

Students will critically examine selected representative schools of philosophy in Asian traditions, including Hinduism, Confucianism, Taoism, and Zen Buddhism. They will explore such topics as reality, self, knowledge, ethics, and death.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 2117 3 credits****Social and Political Philosophy**

Students will examine selected central problems in social and political philosophy. They will investigate such topics as the justification of the state, the tension between individual freedom and social constraint, and theories of social justice.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 2120 3 credits****Philosophy of Religion**

Students will examine arguments for and against the existence of God, as well as other traditional problems of theology, from a philosophical perspective. In the course of such examinations, they will use both classic and contemporary sources.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 2210 3 credits****Epistemology**

Students will study traditional themes in epistemology. Using classical and contemporary readings, they will examine problems related to the justification of beliefs, the nature of truth, and theories describing the foundations of knowledge.

Level: UG

Prerequisite(s): 3 credits from courses in PHIL or permission of the instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 2215 3 credits****Metaphysics**

Students will study some of the main traditional topics of metaphysics. Using classical and contemporary readings, they will investigate problems related to mind-body interactionism, space and time, free will and fatalism, and theories of reality and truth.

Level: UG

Prerequisite(s): 3 credits from courses in PHIL or permission of the instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 3010 3 credits****Health Care Ethics**

Students will study various ethical and meta-ethical theories and will apply them to moral dilemmas in health care at the clinical, professional, and organizational levels. They will analyze various case studies that will help them develop competence in moral reasoning as it relates to personal, professional, and societal values-including (but not restricted to) the abortion and euthanasia debates, patient autonomy and the right to refuse treatment, two-tier health care, allocation of scarce resources, patient abuse and management of patient behaviour, alternative therapies, and the patient-caregiver relationship. Note: This course is intended for the Bachelor of Psychiatric Nursing and the Bachelor of Science in Nursing. It will not count as upper-level PHIL credits for Philosophy BA degree programs.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 3033 3 credits****Business Ethics**

Students will study various ethical and meta-ethical theories, and will apply them in standard business contexts – such as employer-employee relations, risk analysis, occupational and product safety, environmental protection, and multinational practices. Students will acquire the tools to allow them to make ethical business decisions. Note: This course is intended for BBA students. It will not count as upper-level PHIL credits for Philosophy BA programs.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 3040 3 credits****Philosophy of Art**

Students will investigate central questions about the nature and value of art (e.g., painting, sculpture, music, literature, and film). They will critically examine attempts to answer questions such as the following: What is art? Is there a difference between aesthetic judgments and mere judgments of taste or subjective preference? What is beauty? Should moral considerations affect our evaluations of art?

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher,

including 3 credits from courses in PHIL, or permission of the instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 3100 3 credits****Great Philosophers of the 20th Century**

Students will examine the life, work, and influence of one or more notable 20th Century philosopher(s). They will apply principles of rhetoric and philosophical analysis through close reading of selected texts, informed discussion, and formal writing.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher,

including 3 credits from courses in PHIL, or permission of the instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 3101 3 credits****20th Century Analytic Philosophy**

Students will acquire a detailed historical and conceptual framework for the assessment of 20th Century philosophical analysis. They will study issues raised by Russell and others near the beginning of the 20th Century. Students will then consider the historical and conceptual unfolding of various alternative approaches to these issues by later 20th Century analytical philosophers. They will focus on a technical examination of concepts such as: truth, reference, description, and meaning.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 3 credits from courses in PHIL, or permission of the instructor  
Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 3105 3 credits****Life and Death**

Students will study various ethical and metaphysical issues surrounding human existence and mortality. In particular, they will investigate the two central questions, "What is a good life?" and "Is death bad for the person who dies?" Using a variety of philosophical sources, they may also examine a number of related issues, including the possibility of life after death, the relationship between personal identity and immortality, the reasons why killing is generally considered wrong, and the moral status of abortion, euthanasia, and suicide.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 3 credits from courses in PHIL, or permission of the instructor  
Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 3109 3 credits****Foundations in Ethics**

Students will investigate central questions about the nature and foundations of ethical judgement. They will examine a variety of perspectives on such issues as the objectivity and prescriptivity of moral judgement.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 3 credits from PHIL  
Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 3110 3 credits****The Possibility of Knowledge**

Students will investigate central questions about the nature and foundations of epistemic judgement. They will examine a variety of perspectives on such issues as the justification of knowledge claims and the internalism/externalism debate in epistemology.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 3 credits from courses in PHIL, or permission of the instructor  
Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 3118 3 credits****Ethics and Public Policy**

Students will critically examine ethical issues in public policy through readings in classic and/or contemporary texts. They will consider topics such as policy governing life and death, sex and reproduction, freedom of speech, punishment, and the environment.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 3 credits from PHIL.  
Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 3119 3 credits****Contemporary Moral Theory**

Students will consider selected problems associated with various philosophical approaches to morality. They will investigate standard moral perspectives such as Utilitarianism, Kantianism, Contractarianism, Feminist Ethics, and Virtue Theory, in order to assess their philosophical strengths and weaknesses by introducing theoretical as well as practical considerations.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 3 credits from PHIL.

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 3120 3 credits****Free Will and Determinism**

Students will examine the philosophical problems involved in assigning moral responsibility in a world governed by causes which are, ultimately, outside of our control. Using both classic and contemporary sources, they will evaluate the reasoning behind deterministic theories that deny the reality of free will, claiming that all events, including human actions, have prior causes that render them inevitable.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 3 credits from courses in PHIL

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 3150 3 credits****Advanced Formal Logic**

Students will be introduced to contemporary symbolic logic. They will gain a working understanding of some symbolic languages, propositional logic and first-order predicate logic. Students will also discuss syntax and semantics at an elementary level, and soundness and completeness of first-order logical systems will be proved.

Level: UG

Prerequisite(s): either (a) PHIL 1150 or (b) Level C1 as defined in the Math Alternatives Table (p. 779)

Attributes: ASTR (p. 523), ARTS (p. 521), QUAN (p. 532)

**PHIL 3220 3 credits****Empiricism**

Students will study the motivations and influence of empiricism-the epistemological theory that genuine information about the world must be acquired by a posteriori or experiential means, so that nothing can be thought without first being sensed. They will analyze and compare the views of prominent empiricists such as Francis Bacon, John Locke, George Berkeley, David Hume, and John Stuart Mill.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 3 credits from courses in PHIL.

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 3225 3 credits****Rationalism**

Students will study the motivations and influence of rationalism-the epistemological view that regards reason as the chief source and test of knowledge. They will analyze and compare the views of prominent rationalists such as Ren#escartes, Benedict Spinoza, Gottfried Leibniz, and Immanuel Kant.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 3 credits from courses in PHIL.

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 3320 3 credits****Personal Identity**

Students will investigate various philosophical puzzles surrounding the problem of personal identity. In particular, they will contemplate the central metaphysical question, under what circumstances is a person existing at one time identical with a person existing at another time? Students will also examine problems related to the connection between personal identity and physical continuity, the psychological underpinnings of selfhood, and the relationship between personal identity and immortality.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 3 credits from courses in PHIL.

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 3425 3 credits****Language and Meaning**

Students will examine the nature of language through the study of topics such as truth, reference, meaning, linguistic structure, speech acts and context of use.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 3 credits from courses in PHIL.

Attribute: ARTS (p. 521)

**PHIL 3430 3 credits****Philosophy of Mind: Consciousness**

Students will investigate central questions about the nature of consciousness and the place of the mind in the physical world. They will examine competing approaches to the explanation of mental phenomena.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 3 credits from courses in PHIL.

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 3510 3 credits****Confronting Moral Issues: Bio-medical Ethics**

Students will examine moral problems, and proposed solutions to moral problems, in the context of health care. They will focus on case studies drawn from the bio-medical and health care fields.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 3 credits from courses in PHIL.

Attribute: ARTS (p. 521)

**PHIL 3512 3 credits****Confronting Moral Issues: The Natural Environment**

Students will examine moral problems, and proposed solutions to moral problems, that pertain to the environment and human interaction with the environment. Students will examine content drawn from current issues.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 3 credits from courses in PHIL.

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 3533 3 credits****Confronting Moral Issues: Business Ethics**

Students will examine moral problems and proposed solutions to moral problems that arise in a business context. They will apply moral theories and models for decision-making to specific scenarios.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including 3 credits from courses in PHIL.

Attribute: ARTS (p. 521)

**PHIL 3900 3 credits****Honours Research and Thesis I**

Students will conduct a literature review on a topic chosen in consultation with the instructor. They will explore a topic, narrow the topic and formulate a significant research problem. Students will carry out preliminary interpretive and analytical work on the problem. Note: This course is the first part of a two-course series which culminates in an honours thesis. PHIL 4900 is the second part of the series.

Level: UG

Prerequisite(s): 24 credits from courses at the 1100 level or higher from PHIL (B+).

Attribute: ARTS (p. 521)

**PHIL 4040 3 credits****Topics in the Philosophy of Art**

Students will study a selected topic or body of work in the philosophy of art. Using a variety of classic and contemporary sources, they will consider one or more problems related to the nature of art (e.g., art as imitation, art as representation, art as expression, the relationship between art and form, the relationship between art and the aesthetic experience) or the nature of a specific form of art (e.g., painting, sculpture, music, literature, film). Students will discuss topics(s) that may be associated with a particular movement, time period, or philosophical figure. Note: This is a seminar-based course. Students may take this course more than once, as topics vary, with permission of the department chair. The topic in a given semester will be determined in advance by the department. Please check with the department for the current topic.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher, including 6 credits from PHIL.

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 4110 3 credits****Topics in Ethics**

Students will engage in an in-depth study of a selected topic in applied ethics, normative ethics, or metaethics, which may be associated with a particular movement, time period, or philosophical figure. Note: This is a seminar-based course. Students may take this course more than once, as topics vary, with permission of the department chair. The topic in a given semester will be determined in advance by the department. Please check with the department for the current topic.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher, including 6 credits from PHIL

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 4117 3 credits****Topics in Social and Political Philosophy**

Students will study a selected theme, issue, or body of work in the area of socio-political philosophy. They will examine one or more theoretical approaches-e.g., Marxism, feminism, liberalism, communitarianism, post-modern political theory-and then consider the implications of the examined approach(es) for issues like the nation state, globalization, restructuring, and the social policies surrounding welfare and health care. Note: This is a seminar-based course. Students may take this course more than once, as topics vary, with permission of the department chair. The topic in a given semester will be determined in advance by the department. Please check with the department for the current topic.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher, including 6 credits from courses in PHIL.

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 4120 3 credits****Topics in Philosophy of Religion**

Students will study a selected theme, issue, or body of work in the philosophy of religion. Using a variety of textual sources and strict principles of philosophical analysis, they will consider one or more problems related to traditional arguments for God's existence, arguments against the existence of God, the role of faith in religious belief, the status of miracles, the relationship between science and religion, or the relationship between religion and morality. Note: This is a seminar-based course. Students may take this course more than once, as topics vary, with permission of the department chair. The topic in a given semester will be determined in advance by the department. Please check with the department for the current topic.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher, including 6 credits from PHIL.

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 4210 3 credits****Topics in Epistemology**

Students will study a selected topic or body of work in the field of epistemology. Using a variety of classic and contemporary sources, they will consider one or more themes related to defining knowledge, scepticism and the Pyrrhonian problem, foundationalism and coherentism, epistemic justification, contextualism and relativism, epistemology and science, or the relationship between epistemology and human cognition. Students will discuss topics(s) that may be associated with a particular movement, time period, or philosophical figure. Note: This is a seminar-based course. Students may take this course more than once, as topics vary, with permission of the department chair. The topic in a given semester will be determined in advance by the department. Please check with the department for the current topic.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher, including 6 credits from courses in PHIL.

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 4215 3 credits****Topics in Metaphysics**

Students will study a selected topic or body of work in the field of metaphysics. Using a variety of classic and contemporary sources, they will consider one or more themes related to the nature of universals and particulars, time and space, appearance and reality, persistence and change, personal identity, free will and determinism, causation, the nature of physical substance, or the feasibility of metaphysics as a genuine philosophical pursuit. Students will discuss topic(s) that may be associated with a particular movement, time period, or philosophical figure. Note: This is a seminar-based course. Students may take this course more than once, as topics vary, with permission of the department chair. The topic in a given semester will be determined in advance by the department. Please check with the department for the current topic.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher, including 6 credits from courses in PHIL

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 4430 3 credits****Topics in the Philosophy of Mind**

Students will study a selected theme, issue, or body of work in the philosophy of mind. Using a variety of textual sources and strict principles of philosophical analysis, they will consider one or more problems related to the traditional mind-body debate, the nature of consciousness, mental causation, psycho-physical supervenience, or intentionality. Students will discuss topics(s) that may be associated with a particular movement, time period, or philosophical figure. Note: This is a seminar-based course. Students may take this course more than once, as topics vary, with permission of the department chair. The topic in a given semester will be determined in advance by the department. Please check with the department for the current topic.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher, including 6 credits from courses in PHIL.

Attributes: ASTR (p. 523), ARTS (p. 521)

**PHIL 4900 3 credits****Honours Research and Thesis II**

Students will develop a philosophical position on a research question while working closely with the instructor. They will prepare an extended written discussion of the position developed in a format typical of articles in professional philosophical journals or otherwise suitable as an honours thesis. Note: This course is a continuation of PHIL 3900.

Level: UG

Prerequisite(s): PHIL 3900 (B+)

Attribute: ARTS (p. 521)

## Physics (PHYS)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**PHYS 1100 4 credits****Introductory Physics**

Students in this survey course will study kinematics and dynamics in one and two dimensions, energy and momentum conservation, electricity and magnetism, waves, and geometric optics. In the lab students will also study basic techniques of measurement, including the use of computers and report writing. Note: This is a preparatory course for students who have not passed Principles of Physics 12.

Level: UG

Prerequisite(s): Level C1 as defined in the Math Alternatives Table (p. 779).

Attributes: ASTR (p. 523), SCIH (p. 521), PW\_3 (p. 522), QUAN (p. 532)

**PHYS 1101 4 credits****Physics for Life Sciences I**

Students will study work, energy, power, efficiency, and heat; kinematics and dynamics of rotation; fluids; oscillations, waves, and sound. Students will study relevant examples and applications of each course topic in the areas of medical and life sciences. Students will participate in laboratory activities that emphasize data collection and analysis. Students with credit for PHYS 1120 may not take this course for further credit.

Level: UG

Prerequisite(s): PHYS 1100 or Principles of Physics 12 (with a P)

Co-requisite(s): MATH 1120 or 1130 or 1140

Credit Exclusion: PHYS 1120

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**PHYS 1102 4 credits****Physics for Life Sciences II**

Students will learn about optics and optical instruments; electrostatic forces and fields; magnetic forces and fields; electromagnetic induction; electric circuits; atomic structure, nuclear physics and radioactivity.

Students will study relevant examples and applications of each course topic in the areas of medical and life sciences. Students will participate in laboratory activities that will emphasize data collection and analysis. Students with credit for PHYS 1220 may not take this course for further credit.

Level: UG

Prerequisite(s): PHYS 1101 or PHYS 1120

Co-requisite(s): MATH 1220 or 1230 or 1240

Credit Exclusion: PHYS 1220

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**PHYS 1120 4 credits****Physics for Physical and Applied Sciences I**

Students will learn about statics, dynamics, oscillations, mechanical waves and sound. They will use computers extensively in the lab for data collection and analysis. Students with credit for PHYS 1101 may not take this course for further credit.

Level: UG

Prerequisite(s): PHYS 1100 or Principles of Physics 12 (with a C)

Co-requisite(s): MATH 1120 or 1130

Credit Exclusion: PHYS 1101

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**PHYS 1141 3 credits****Engineering Mechanics**

Students will study the statics of particles and rigid bodies. They will apply vector analysis to three-dimensional static-equilibrium problems and analyze the internal forces in rigid structures. They will use differential and integral calculus, in addition to Newton's laws, to study the kinematics and dynamics of particles. Students will focus on the analysis of practical mechanics problems in two and three dimensions. Note: This is an Engineering course. Students may earn credit for only one of PHYS 1141 or PHYS 1170 as they are equivalent courses.

Level: UG

Prerequisite(s): PHYS 1120

Co-requisite(s): MATH 1220

Cross-listing: PHYS 1170

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**PHYS 1170 3 credits****Mechanics I**

Students will study the statics, kinematics and dynamics of particles and rigid bodies. They will apply vector analysis to three-dimensional static-equilibrium problems, and differential and integral calculus to dynamics problems, as well as make use of Newton's laws and the concepts of impulse, momentum, work and energy. Students will focus on the analysis of practical mechanics problems in two and three dimensions. Note: This is an Engineering course. Students may earn credit for only one of PHYS 1141 or PHYS 1170 as they are equivalent courses.

Level: UG

Prerequisite(s): PHYS 1120

Co-requisite(s): MATH 1220

Cross-listing: PHYS 1141

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**PHYS 1220 4 credits****Physics for Physical and Applied Sciences II**

Students will learn about optics, modern physics, electricity and magnetism. They will use computers extensively in the lab for data collection and analysis. Students with credit for PHYS 1102 may not take this course for further credit. Note: Students who intend to go on in the physical or applied sciences must take MATH 1220 to ensure transfer credit.

Level: UG

Prerequisite(s): PHYS 1120 or 1101

Co-requisite(s): MATH 1220 or 1230

Credit Exclusion: PHYS 1102

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**PHYS 1400 3 credits****Energy, Environment, Physics**

Students will learn the basic principles of environmental physics. Students will build, analyze, and critique physical models of environmental processes. Students will apply environmental physics concepts to topical problems such as consumer energy use, renewable energy resources, carbon footprint, water use, waste, and global warming.

Level: UG

Prerequisite(s): Level C1 as defined in the Math Alternatives Table (p. 779)

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**PHYS 1401 1 credit****Environmental Physics Lab**

Students will conduct laboratory investigations related to environmental physics concepts such as: energy use, electrical power generation, fluid statics and dynamics. Students will use computers to obtain and analyze data, and to write reports.

Level: UG

Prerequisite(s): Level C1 as defined in the Math Alternatives Table (p. 779)

Attributes: SCIH (p. 521), QUAN (p. 532)

**PHYS 1600 3 credits****Introduction to Modern Technology**

Students will learn to work with microcontroller chips which are at the heart of many modern technological devices. Students will program a microcontroller to develop a device (e.g. a calculator or a simple robot) to function as intended. Students will learn the basics of the C programming language as well as skills such as simple circuit design, data acquisition, digital input and output (DIO), analog-to-digital conversion (ADC), pulse width modulation (PWM), and timing.

Level: UG

Prerequisite(s): PHYS 1100 or Principles of Physics 12 (with a C)

Attributes: ASTR (p. 523), SCIH (p. 521)

**PHYS 2010 3 credits****Modern Physics**

Students will study the basic postulates and results of the Special Theory of Relativity and Quantum Mechanics. Students will review the experimental evidence for quantization. Students will use the Schrödinger Equation to obtain wavefunctions for a variety of situations, including the Hydrogen atom. Students will also be introduced to solid state physics with an emphasis on electronic devices.

Level: UG

Prerequisite(s): (PHYS 1102 or PHYS 1220) and (MATH 1220 or 1230)

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**PHYS 2030 3 credits****Classical Mechanics**

Students will study intermediate topics in Classical Mechanics that rely heavily on mathematical skills developed in introductory calculus courses. Students will study topics such as time, position and velocity dependent forces, damped and forced vibrations, inertial and non-inertial frames of reference, the Kepler problem, and fluid mechanics. Students will extend the concepts learned in PHYS 1120.

Level: UG

Prerequisite(s): PHYS 1120 or (PHYS 1101 with a B)

Co-requisite(s): MATH 1152 or MATH 2321 or MATH 2821

Attributes: ASTR (p. 523), SCIH (p. 521)

**PHYS 2040 3 credits****Thermal Physics**

Students will learn about the thermal properties of matter, and mechanisms of heat transfer. Students will study heat engines and refrigeration, phase changes, and the laws of thermodynamics. Students will also study environmental applications of thermal physics and applications in green energy technology.

Level: UG

Prerequisite(s): (PHYS 1102 or PHYS 1220) and (MATH 1220 or MATH 1230)

Attributes: ASTR (p. 523), SCIH (p. 521)

**PHYS 2100 3 credits****Experimental Physics**

Students will learn how physical and statistical principles are applied in designing experiments and analyzing their results. They will use analogue and digital electronics, electronic instrumentation, and computers in the acquisition of experimental data. Students will perform experiments in classical mechanics, fluid dynamics, optics, thermodynamics, electronics, and/or modern physics.

Level: UG

Prerequisite(s): (PHYS 1102 or PHYS 1220) and (MATH 1220 or MATH 1230)

Attributes: ASTR (p. 523), SCIH (p. 521)

**PHYS 2330 3 credits****Intermediate Mechanics**

This course extends the concepts covered in PHYS 1120. Students will study the general motion of particles and rigid bodies, inertial and non-inertial frames of reference, the harmonic oscillator, and central forces.

Level: UG

Prerequisite(s): PHYS 1120 or (PHYS 1101 with a B or better)

Co-requisite(s): MATH 2321

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**PHYS 2420 3 credits****Intermediate Electricity and Magnetism**

Students will learn the principles of electricity and magnetism at an intermediate level. Topics covered are: electrostatic forces and fields, electric potential, capacitance and dielectrics, DC and AC circuits, magnetic fields, magnetic properties of materials, an introduction to semiconductor devices and Maxwell's equations.

Level: UG

Prerequisite(s): (PHYS 1220 or PHYS 1102) and (MATH 1220 or MATH 1230)

Co-requisite(s): MATH 2321 or MATH 2721 or MATH 1152

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**PHYS 2600 3 credits****Electronics**

Students will learn about direct current (DC) and alternating current (AC) circuits. Students will build, and study the behaviour of circuits containing resistors, capacitors, inductors, diodes, operational amplifiers, and transistors. Students will work with programmable microcontrollers using the C language to utilize microcontroller fundamentals such as digital input and output (DIO), analog-to-digital conversion (ADC), and timing to apply them to circuit design and data acquisition.

Level: UG

Prerequisite(s): PHYS 1220 and (PHYS 1600 or APSC 1299) and MATH 1220

Attributes: ASTR (p. 523), SCIH (p. 521)

**PHYS 2610 3 credits****Sensors and Actuators**

Students will be introduced to components of measurement systems using a variety of sensors, with emphasis on the practical use of associated signal measurement equipment. Students will also learn the theory of operation of sensors, actuators, and transducers and use these components to build working systems.

Level: UG

Prerequisite(s): (PHYS 1600 or APSC 1299) and PHYS 2100

Attributes: ASTR (p. 523), SCIH (p. 521)

**PHYS 3610 3 credits****Introduction to Control**

Students will learn different techniques to analyze linear systems, such as electromechanical, hydraulic and thermal systems. They will learn about the applications of the Laplace transform, matrix formulations and block diagrams in control systems. Students will be introduced to classic control systems, such as on-off control and proportional-integral-derivative (PID) control. Students will learn the basics of programmable logic controllers (PLCs) and design on-off controllers using PLCs. They will learn the essential components of pneumatic systems and build circuits using pneumatic equipment and simulators.

Level: UG

Prerequisite(s): PHYS 2030, 2600, and one of the following: MATH 2721 or 3421.

Attributes: ASTR (p. 523), SCIH (p. 521)

**PHYS 3620 3 credits****Process Control**

Students will learn the concepts and principles of control theory. They will learn how to apply techniques such as frequency response analysis and root locus analysis to the design of feedback control systems. Students will learn to design and build proportional-integral-derivative (PID) controllers using analogue and digital components to control electric motors. They will learn about liquid level control systems and work with laboratory models to learn about pump and valve sizing. Students will analyze industrial case studies.

Level: UG

Prerequisite(s): PHYS 3610

Attributes: ASTR (p. 523), SCIH (p. 521)

**PHYS 3700 3 credits****Signal and Image Processing**

Students will learn about the noise characteristics of components, sensors, and systems, as well as signal recovery techniques. They will also learn about the acquisition, processing and analysis of images for scientific and industrial applications. Students will develop and work with instrumentation and software for signal and image processing in the laboratory. Students will apply statistical analysis throughout, both for theory and for analysis.

Level: UG

Prerequisite(s): PHYS 2420 AND PHYS 2610

Attribute: SCIH (p. 521)

**PHYS 3710 3 credits****Applied Optics & Optoelectronics**

Students will study the physics of light and its technological applications. They will learn the concepts behind a variety of optical instruments and get hands-on experience with designing and building them. They will learn about light propagation, diffraction, interference and polarization and how these phenomena are used for imaging, measurement, sensing and communications. Finally they will investigate how light is generated and how it can be detected to allow optical systems to be interfaced to, and controlled by, electronic systems.

Level: UG

Prerequisite(s): PHYS 2100 and PHYS 2420.

Attribute: SCIH (p. 521)

**PHYS 3900 3 credits****Project in Physics & Technology**

Students will work as part of a team on a project in an area of physics and/or instrumentation. Students will review the current literature in their chosen area and design and carry out experiments or computer simulations to achieve their project goals. Students will deliver their findings as a formal report. They will also make formal and informal presentations at various stages of the project.

Level: UG

Prerequisite(s): PHYS 2100 and (PHYS 2600 or 2610) and (PHYS 2010, 2030, 2040 or 2420)

Attributes: ASTR (p. 523), SCIH (p. 521)

**PHYS 3950 3 credits****Work Experience - Part I**

Students will apply their previous learning to a real world situation during a work experience term that has been approved by, and with supervision from, Physics faculty. Students will prepare a plan of the work to be performed. Students will work full-time for seven weeks and will write a report at the end of that period.

Level: UG

Prerequisite(s): Approval of Physics work experience committee AND completion of at least 9 PHYS credits at the 3000 level.

Attribute: SCIH (p. 521)

**PHYS 3951 3 credits****Work Experience - Part II**

Students will continue to apply their previous learning to a real world situation during a work experience term that has been approved by, and with supervision from, Physics faculty. Students will work full-time for at least seven weeks and will prepare a final report and a presentation at the conclusion of the placement. Students will use the report and presentation to demonstrate the understanding they have gained of the applicability and relevance of their studies to modern technology.

Level: UG

Prerequisite(s): Approval of Physics work experience committee AND completion of at least 9 PHYS credits at the 3000 level

Attribute: SCIH (p. 521)

**PHYS 4010 3 credits****Quantum Mechanics**

Students will learn the experimental basis and basic postulates of Quantum Mechanics. Topics include spin-1/2 systems, state vectors, wave functions, the Schrodinger Equation, entanglement and interference.

Level: UG

Prerequisite(s): PHYS 2010 and one of (a) MATH 2721 and MATH 2821, or (b) MATH 3120 and MATH 3322

Attribute: SCIH (p. 521)

**PHYS 4199 3 credits****Senior Project I**

Students will learn and use project management tools to develop a project proposal and schedule for their senior project. The topic, scope and goals of the senior project will be defined by the student with consultation from faculty (and industry representatives where applicable). The project proposal and schedule will be implemented in the subsequent senior project course, PHYS 4299.

Level: UG

Prerequisite(s): All of (a) PHYS 3900 and (b) 6 credits from courses in PHYS at the 3000 level or higher

Attribute: SCIH (p. 521)

**PHYS 4299 3 credits****Senior Project II**

Students will carry out their senior project as proposed in PHYS 4199. Students will present their results and findings in a formal report and oral presentation.

Level: UG

Prerequisite(s): PHYS 4199

Attribute: SCIH (p. 521)

**PHYS 4600 3 credits****Programming for Instrumentation**

Students will learn programming languages and techniques relevant to industrial instrumentation. Students will learn about important programming patterns, environments, algorithms and professional best-practices in programming style, documentation and user interface development. It is recommended to take CPSC 1103 as an elective before enrolling in this course.

Level: UG

Prerequisite(s): Two of the following: PHYS 2100, PHYS 2600, PHYS 2610

Attributes: ASTR (p. 523), SCIH (p. 521)

**PHYS 4700 3 credits****Solid State Physics: Theory and Practice**

Students will learn about the crystallographic, electronic, thermal, and magnetic properties of semiconductors, metals, superconductors, and magnetic materials, as well as important applications of those materials. Students will learn about the theory and practice of important experimental techniques used by solid state physicists by performing experiments in the laboratory and by analysing case studies.

Level: UG

Prerequisite(s): PHYS 4010

Attributes: ASTR (p. 523), SCIH (p. 521), QUAN (p. 532)

**PHYS 4900 3 credits****Special Topics**

Students will apply key understandings and skills developed during the Physics for Modern Technology program (or equivalent) to practical problems of interest. The topic area for this course will vary with each offering.

Level: UG

Prerequisite(s): 45 credits from courses at the undergraduate level, including 9 credits from courses in PHYS at the 2000 level or higher

Attribute: SCIH (p. 521)

## Physics Qualifying (PHYQ)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

Note: These upgrading courses are preparatory and are not eligible for a Tuition Tax Credit (T2202A).

**PHYQ 1098 4 credits****Introduction to Physics**

Students will learn introductory concepts of physics, exploring energy in the fields of mechanics, dynamics, heat, waves, electricity, and light. They will extend these concepts to investigate renewable and sustainable sources of energy as future replacements for fossil fuel sources.

Level: CP

Prerequisite(s): Level F1 as defined in the Math Alternatives Table (p. 779)

Attribute: ACAD (p. 521)

## Pipefitter (PIPE)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables/) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**PIPE 1101 3 credits****Safe Work Practices**

Students will address safe work practices and how they pertain to construction work sites. They will examine the Occupational Health and Safety Regulation and Guidelines of WorkSafe BC applicable to the piping trade. Students will be able to demonstrate and use general safe work practices and procedures when using tools and equipment, practice the safe handling and storage methods for materials and equipment. They will receive Powder Actuated Tool and Workplace Hazardous Materials Information System (WHMIS) certificates.

Level: VO

Attribute: TRAD (p. 521)

**PIPE 1105 7 credits****Organize Work**

Students will use mathematics and science to solve problems in the piping trades. They will interpret engineering drawings and sketches and will make decisions pertaining to the installation, positioning, and/or maintenance of piping and fixtures currently used in the piping trade. Students will use codes and standards in the application of shop projects, as well as describe and use manufacturer and supplier documentation encountered in the piping trade.

Level: VO

Attribute: TRAD (p. 521)

**PIPE 1110 6 credits****Prepare and Assemble Piping Components**

Students will describe piping and tubing materials used in the piping trade. They will join piping, for example: plastic, copper, and carbon steel. Students will describe, select, and install valves used in the piping trade. They will describe fittings and connection methods, select and install fittings. Students will be able to use acceptable methods of structure penetration.

Level: VO

Attribute: TRAD (p. 521)

**PIPE 1121 8 credits****Tools and Equipment**

Students will develop basic skills to identify, select, inspect, use, and maintain hand tools and stationary, as well as portable power tools, appropriate to piping processes. They will complete shop projects that involve bench work to practice hand skills using a variety of industry related tools. Students will develop skills involving soldering and rigging equipment along with but not limited to ladders, knots and platforms.

Level: VO

Attribute: TRAD (p. 521)

## Plumbing (PLMB)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables/) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**PLMB 1101 2 credits****Safety in the Workplace**

Students will address safe work practices and how they pertain to construction work sites. They will examine the Occupational Health and Safety Regulation and Guidelines of WorkSafe BC applicable to the plumbing trade. Students will be able to demonstrate and use general safe work practices and procedures when using tools and equipment, practice the safe handling and storage methods for materials and equipment. They will receive basic St. John's First Aid, Hilti Powder Actuated Tool, Ipex Gluing and Workplace Hazardous Materials Information System (WHMIS) certificates.

Level: VO

Attribute: TRAD (p. 521)

**PLMB 1105 6 credits****Organization of Work**

Students will use mathematics and science to solve problems in the plumbing trades. They will interpret engineering drawings and sketches and will make decisions pertaining to the installation, positioning, and/or maintenance of piping and fixtures currently used in the plumbing trade. Students will use codes and standards in the application of shop projects, as well as describe and use manufacturer and supplier documentation encountered in the plumbing trade.

Level: VO

Attribute: TRAD (p. 521)

**PLMB 1110 4 credits****Prepare and Assemble Plumbing Components**

Students will describe piping and tubing materials used in the plumbing trade. They will join piping, for example: plastic, copper, and carbon steel. Students will describe, select, and install valves used in the plumbing trade. They will describe fittings and connection methods, select, and install fittings. Students will be able to use acceptable methods of structure penetration.

Level: VO

Attribute: TRAD (p. 521)

**PLMB 1121 5 credits****Tools and Equipment**

Students will develop basic skills to identify, select, inspect, use, and maintain hand tools and stationary, as well as portable power tools, appropriate to plumbing processes. They will complete shop projects that involve bench work to practice hand skills using a variety of industry related tools. Students will develop skills involving soldering and rigging equipment along with but not limited to ladders, knots and platforms.

Level: VO

Attribute: TRAD (p. 521)

## Policy Studies (POST)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](http://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**POST 1100 3 credits****Sustainability: Analysis and Ethics**

Students will study elements of traditional philosophy courses such as critical thinking, philosophy of science, and ethics to provide a detailed analysis of a variety of concepts of sustainability. They will examine sustainability policies and practices related to the environment, social equity, and economics. Note: Students in the Policy Studies (POST) program must take POST 1100, the first of four umbrella courses required for this degree. This course is cross-listed with PHIL 1111. Students may not get credit for both courses.

Level: UG

Cross-listing: PHIL 1111

Attributes: ASTR (p. 523), ARTS (p. 521)

**POST 2100 3 credits****Sustainability and Government**

Students will explore environmental sustainability as an issue in Canadian politics. They will examine the evolution of the environmental movement in Canada, and study the linkages between environmental concerns and Canadian political culture, parties, advocacy organizations, federal-provincial relations, domestic and foreign policy, and other areas of interest. Note: Students may earn credits for only one of POST 2100 or POLI 2100 as they are cross-listed courses.

Level: UG

Prerequisite(s): 6 credits from courses at the 1100 level or higher

Cross-listing: POLI 2100

Attributes: ASTR (p. 523), ARTS (p. 521)

**POST 2140 3 credits****CityLab3 - Rethinking Community**

Students will explore sustainability and develop leadership and civic skills by working on projects relevant to community partners. Students will think critically about community and/or project goals, imagining and evaluating possibilities for change. Using team-based processes, students will explore the community through field trips and research, generate, analyze and present sustainability ideas, practices and/or projects.

Level: UG

Prerequisite(s): 6 credits of courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**POST 2150 6 credits****CityLab6 Cultivating Community**

Using the Surrey community as a classroom, students explore sustainability through field trips and investigations, and identify community needs. Students engage in complex thinking about community values and goals, and (re-)imagine possibilities for change. Students research and apply best practices and generate sustainability ideas through team-based design processes. In collaboration with city staff and/or community organizations and members, students develop and present goals, proposals and implementation plans that further community sustainability. Students evaluate their projects and when possible implement them.

Level: UG

Prerequisite(s): 15 credits at the 1100 level or higher.

Attribute: ARTS (p. 521)

**POST 2900 3 credits****Special Topics**

Students will explore a selected topic in policy and/or sustainability. They will conduct research to develop an understanding of the topic. Note: This is a lecture-based course with extensive class discussion. The area of study will be established in advance by the department. Students may take this course twice on different topics. It is recommended that students take POST 1100.

Level: UG

Prerequisite(s): 6 credits from courses at the 1100 level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

**POST 3100 3 credits****Economics of Sustainability Policy**

Students will study current sustainability issues and policies from an economic perspective. Students will learn about the Neoclassical Growth Theory. The students will study several topics including: the values and the limitations of the alternative measures of economic welfare, policy reports and studies, and the implications of complementarity between natural and human-made capital. Note: Students may earn credit for only one of ECON 3100 and POST 3100 as they are identical courses.

Level: UG

Prerequisite(s): ECON 1150 and ECON 1250

Cross-listing: ECON 3100

Attribute: ARTS (p. 521)

**POST 3110 3 credits****Applied Policy Seminar I**

Students will study a specific set of applications of the principles of sustainability policy under the guidance of a practitioner. They will work in groups and examine specific situations and case studies to gain an insight into the practical difficulties of decision making and policy setting as it applies to real-life situations. They will study how concepts of ethics, governance, and economics are integrated. They will analyze the sustainability aspects of projects on topics such as water conservation, climate change mitigation, or food security.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher

Attribute: ARTS (p. 521)

**POST 4110 3 credits****Applied Policy Seminar II**

Students will study applications of policy, with a focus on sustainability, under the guidance of a practitioner. They will examine complex real-life situations and case studies, such as impacts of policy decisions on climate change mitigation, energy efficiency, subsidized housing, green space conservation, and others. They will study how concepts of ethics, governance, and economics, as well as the psychology of public behavior, are integrated into policy decision-making for sustainability. They will work in groups on a specific project, liaise with community stakeholders, and make recommendations for action in a formal presentation to stakeholders. Note: Students may earn credit for only one of POLI 4110 or POST 4110 as they are identical courses.

Level: UG

Prerequisite(s): Either (a) POST 3110, or (b) 18 credits from POLI courses at the 1100 level or higher, including POLI 2100, and SOCI 2260.

Cross-listing: POLI 4110

Attribute: ARTS (p. 521)

**POST 4150 3 credits****Psychology and Sustainability: Attitudes and Behaviour**

Students will explore the challenges involved in changing attitudes and behaviour as it pertains to sustainability policy. They will examine the foundations of attitudes, how they are formed, changed and their relationship to behaviour. Students will also learn what makes persuasion campaigns effective, as well as individual and social factors that interfere with attitude-behaviour consistency. They will learn to apply this knowledge to the evaluation of sustainability policy designed to change attitudes and behaviour. Note (1): This course is a requirement for the BA in Policy Studies. For Psychology students this course counts as a general elective not a Psychology Major/Minor credit. Note (2): This course is cross-listed as PSYC 4150. Students who have taken PSYC 4150 may not register for this course. Students may earn credits from only one of POST 4150 or PSYC 4150.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher

Cross-listing: PSYC 4150

Attribute: ARTS (p. 521)

**POST 4900 3 credits****Special Topics**

Students will examine a selected topic in policy studies and/or sustainability. They will critically analyze relevant literature and develop a comprehensive understanding of the topic. Students will examine and evaluate recent developments in the specific field, assess the implications of these developments, and identify future directions of research or policy development. Note: This is a seminar course. The area of study will be established in advance by the department. Students may take this course up to three times on different topics.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher,

including 3 credits of POST and 3 credits of ENGL

Attribute: ARTS (p. 521)

## Political Science (POLI)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**POLI 1110 3 credits****Ideology and Politics**

Students will examine the political ideologies that have played an important role in shaping the modern political landscape, influencing the political attitudes and actions of individuals, groups and societies. Students will also explore the historical context within which ideologies developed and engage the ideas of key thinkers in each ideological tradition.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**POLI 1120 3 credits****Canadian Government and Politics**

Students will survey Canadian politics and government. They will explore Canada's political culture, its constitution, federalism, and relations with indigenous peoples, as well as its institutions of government, including parliament, crown, prime minister and cabinet, bureaucracy, and the courts. Students will also investigate the mechanisms that help to mobilize citizens and link them to government, such as political parties, elections, interest groups and social movements. Students will thus acquire an enhanced command of their political environment and an enriched understanding of dilemmas facing Canada as a diverse liberal-democratic community.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**POLI 1123 3 credits****Politics in the City**

Students will study the evolution of politics at the municipal level in Canada, including political parties and civic movements, the local management of services, labour relations, lobby groups, budgeting, and policy making. They will examine the relationships between municipal governments and the provincial and federal governments, and explore other topics of current interest relating to city politics in Canada.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**POLI 1125 3 credits****Introduction to Political Science**

Students will examine the fundamental concepts and phenomena of political life. They will: explore such core concepts as power, authority, legitimacy, states, ideology, and political culture; analyze different approaches to organizing political systems (e.g., authoritarian and democratic); and investigate various institutions of government, such as constitutions, legislatures, executives, and judiciaries. Students will examine mechanisms for mobilizing civic participation, including political parties, elections, interest groups, and social movements, and survey the international context within which states operate.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**POLI 1145 3 credits****Comparing Countries: Introduction to Comparative Politics**

Students will study key topics in the field of comparative politics, focusing on the institutional, political-cultural, and economic dynamics that shape contemporary political life in different countries.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**POLI 1150 3 credits****Introduction to International Relations**

Students will develop the analytical skills with which to explain or understand world politics. They will be introduced to the intellectual tools such as core concepts and schools of thought, in order to make sense of the complex world of international politics. Students will explore a broad range of contemporary topics, including the role and importance of various state and non-state actors, the promotion of international order, and salient features of the international political economy, including the disparities between the countries of the North and South.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**POLI 2100 3 credits****Sustainability and Government**

Students will explore environmental sustainability as an issue in Canadian politics. They will examine the evolution of the environmental movement in Canada, and study the linkages between environmental concerns and Canadian political culture, parties, advocacy organizations, federal-provincial relations, domestic and foreign policy, and other areas of interest. Note: Students may earn credits for only one of POST 2100 or POLI 2100 as they are cross-listed courses.

Level: UG

Prerequisite(s): Any 6 credits at 1100-level or higher

Cross-listing: POST 2100

Attributes: ASTR (p. 523), ARTS (p. 521)

**POLI 2121 3 credits****Law and Politics: The Charter of Rights and Freedoms**

Students will study the concepts of rights and freedoms as they have been treated historically in Canada, and will analyze the place of rights in Canadian law prior to the entrenchment of the Charter of Rights and Freedoms. They will examine the Charter and the role of the courts with emphasis on the Supreme Court, and will discuss the place of rights and courts in a democratic society. Students will study the legalization of politics and politicization of the judiciary to better understand recent developments in Canadian law and politics regarding rights

Level: UG

Prerequisite(s): 3 credits of 1100 level POLI courses

Attributes: ASTR (p. 523), ARTS (p. 521)

**POLI 2122 3 credits****Political Leadership: The Prime Ministers of Canada**

Students will explore the careers and legacies of Canadian prime ministers. They will examine general understandings of political leadership, the evolution of the prime ministership, the role of prime ministers in shaping Canada's political development, controversies surrounding the legacies of various prime ministers, debates over prime ministerial power, and the nature of political leadership in our parliamentary system.

Level: UG

Prerequisite(s): 3 credits from courses in POLI at the 1100-level or higher, or HIST 1114

Attributes: ASTR (p. 523), ARTS (p. 521)

**POLI 2131 3 credits****Politics of the European Union**

Students will examine the politics of European Union. They will study the historical origins of the European Union (EU), its evolution, institutions and structures, political dynamics, role and status in world affairs, and the contemporary challenges it faces.

Level: UG

Prerequisite(s): 3 POLI credits

Attributes: ASTR (p. 523), ARTS (p. 521)

**POLI 2140 3 credits****Comparative Politics of Asia**

Students will be introduced to the government and politics of key Asian states. They will learn about the dynamics that shape the character and quality of contemporary Asian political systems, the underlying assumption being that "they who know only one country, know no country well." Students will enhance their understanding of political transformation in a comparative context will be enhanced by the study of different Asian countries.

Level: UG

Prerequisite(s): 3 credits of 1100-level POLI courses

Attributes: ASTR (p. 523), ARTS (p. 521)

**POLI 2150 3 credits****States, Markets, Globalization: International Political Economy**

Students will acquire a detailed conceptual framework for the analysis of the international political economy. They will study the dynamic interaction among states, societies, firms, and markets, at the international level. Students will focus on major "IPE" perspectives and theories, and learn to apply these to issue areas including monetary and financial relations, international trade, foreign investment, foreign debt, and development finance.

Level: UG

Prerequisite(s): 3 credits of 1100-level POLI courses

Attributes: ASTR (p. 523), ARTS (p. 521)

**POLI 2155 3 credits****War, Crime, and Violence: Contemporary Political Conflict**

Students will study the sources and nature of major contemporary international and national conflicts, such as disputes between the great powers, rich nations and poor nations, between Third World countries and within states. Students will focus on the phenomena of war, violence, and crime.

Level: UG

Prerequisite(s): 3 credit of 1100-level POLI courses, or HIST 2335

Attributes: ASTR (p. 523), ARTS (p. 521)

**POLI 2200 3 credits****Classic Thinkers: History of Political Thought**

Students will survey the development of political theory in the western tradition, ranging from the thought of Plato and other ancient thinkers to the works of modern liberal-democratic thinkers such as Hobbes, Locke, Rousseau, Burke, Mill, Nietzsche, and others. They will acquire a foundation in the great debates of western political life.

Level: UG

Prerequisite(s): 3 credits of 1100-level POLI or PHIL or HIST courses, or by permission of the instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**POLI 2235 3 credits****British Columbia Government and Politics**

Students will examine British Columbia's political culture and various elements affecting it, such as immigration, native land claims, primary and secondary resource industries, federal-provincial relations, interest group behaviour, union activity, environmental issues, political parties, and government policy-making.

Level: UG

Prerequisite(s): 3 credits of 1100-level POLI courses

Attributes: ASTR (p. 523), ARTS (p. 521)

**POLI 3100 3 credits****American Government and Politics**

Students will examine the institutions and processes associated with the federal government of the United States. They will study the executive, legislative and judicial branches, as well as the party system, the electoral system and election finance. Students will analyze the policy making process in America employing both foreign and domestic examples to highlight the important roles played by pressure groups, corporations and the media.

Level: UG

Prerequisite(s): Any 18 credits of 1100-level or higher, including any 3

POLI credits (POLI 1110 or 1125 or 1145 recommended)

Attributes: ASTR (p. 523), ARTS (p. 521)

**POLI 3122 3 credits****Introduction to Canadian Foreign Policy**

Students will examine the history and current state of the foreign and defence policies of Canada. They will also study the following specific areas: domestic and foreign influences on policy, governmental structures affecting policy, the interplay of trade, defence and diplomatic decision-making. Students will appraise recent policy initiatives with a view to developing an understanding of Canada's place in the global community.

Level: UG

Prerequisite(s): Any 18 credits of 1100-level or higher, including any 3

POLI credits (POLI 1110 or 1120 recommended)

Attributes: ASTR (p. 523), ARTS (p. 521)

**POLI 3125 3 credits****Visions of Nationhood: Canada, Quebec, and First Nations**

Students will examine diverse visions of nationhood in Canadian political discourse. They will probe competing conceptions of Canada, and explore the challenges to these conceptions posed by Quebec and indigenous nationhoods, as well as the intersections between multicultural pluralism and nationality in Canada.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100-level or higher, including 3 credits from POLI

Attributes: ASTR (p. 523), ARTS (p. 521)

**POLI 3131 3 credits****The Politics of Continental Integration**

Students will examine the phenomenon of continental integration, paying particular attention to North America as a contested site of integration. Students will investigate the existing status of North American integration and analyze debates around the merits and demerits of deepening it, using the European Union as a key point of comparison. They will probe the challenges of treaty-making, legal compliance and enforcement, and dispute resolution in continental contexts. Students will also analyze the affinities and tensions between regional, continental, and global forms of integration, and assess the implications of North American integration.

Level: UG

Prerequisite(s): Any 18 credits of 1100-level or higher, including any 3

POLI credits

Attributes: ASTR (p. 523), ARTS (p. 521)

**POLI 3146 3 credits****Government and Politics of India**

Students will examine the sources and nature of conflict, power and political change in India, developing a critical understanding of the forces historical, cultural, institutional and economic that shape contemporary Indian political life. They will analyze themes of development and modernization as they apply to India and the wider South Asian region, critically analyze the advantages and disadvantages of democracy in a developing society, and examine challenges facing India in the twenty-first century.

Level: UG

Prerequisite(s): Any 18 credits of 1100-level or higher, including any 3

POLI credits

Attributes: ASTR (p. 523), ARTS (p. 521)

**POLI 3147 3 credits****Foreign Policies of the Major Powers**

Students will acquire a factual and conceptual comparative framework of foreign policy as practiced by major powers. They will analyze the types of powers, various foreign policies, styles of foreign policy, constellation of the major powers and the target audience of the major powers.

Students will review some case studies on the challenges arising to, and by, the major powers. They will explore, debate, and compare theories to develop a solid grasp of the different theoretical perspectives of the foreign policies of major powers, and will establish their own theoretical preferences.

Level: UG

Prerequisite(s): Any 18 credits of 1100-level or higher, including 3 credits of POLI 1125 or 1145 or 1150 (POLI 2130 recommended)

Attributes: ASTR (p. 523), ARTS (p. 521)

**POLI 3150 3 credits****American Foreign Policy**

Students will examine the historical patterns of, and contemporary issues in, U.S. foreign policy. They will discuss the challenges faced by the U.S., its increasing reliance on unilateralism, and the response of other great powers to the U.S. in the Cold War and post-Cold War era. Students will also examine the sources of American foreign policy and will explore the linkages among political institutions, the policy formulation process, and policy outcomes.

Level: UG

Prerequisite(s): Any 18 credits of 1100-level or higher, including 3 credits of POLI 1125 or 1145 or 1150 (POLI 2130 recommended)

Attributes: ASTR (p. 523), ARTS (p. 521)

**POLI 3160 3 credits****International Organization**

Students will acquire a basic knowledge of the nature, activities, and problems of international organizations in political, economic, and social issue-areas. They will analyze the historical evolution, structural mechanisms, and governance styles of these organizations in addressing various global problems. Students will critically examine the most prominent theoretical and conceptual approaches to the analysis of international organizations, with particular emphasis on the notions of multilateralism and global governance.

Level: UG

Prerequisite(s): 18 credits of 1100-level or higher, including 3 credits of POLI 1125 or POLI 1145 or POLI 1150 or POST 2100

Attributes: ASTR (p. 523), ARTS (p. 521)

**POLI 3170 3 credits****International Peacekeeping**

Students will examine the multiple dimensions of peacekeeping operations in the world. They will explore the origin and growth of peacekeeping operations undertaken by international organizations, particularly the UN and the regional organizations, and the debate about the philosophy and strategy of peacekeeping operations. Students will analyze case studies, assess the strengths and weaknesses of overall peacekeeping operations, and evaluate the lessons to be learned from the past

Level: UG

Prerequisite(s): Any 18 credits of 1100-level or higher, including 3 credits of POLI 1125 or 1145 or 1150

Attributes: ASTR (p. 523), ARTS (p. 521)

**POLI 3500 3 credits****Public Debates in Politics**

Students will explore the theory and practice of political debate, examining fundamental principles of rhetoric and public communication, and examples of famous historical debates, before conducting their own formal debates around important political issues. Students will, under the supervision of the instructor, identify the issues to be debated, conduct rigorous scholarly research on their chosen topic, develop debating strategies, and moderate and conduct their own debates.

Level: UG

Prerequisite(s): 18 credits of 1100-level or higher, including any 3 POLI credits.

Attribute: ARTS (p. 521)

**POLI 4110 3 credits****Applied Policy Seminar II**

Students will study applications of policy, with a focus on sustainability, under the guidance of a practitioner. They will examine complex real-life situations and case studies, such as impacts of policy decisions on climate change mitigation, energy efficiency, subsidized housing, green space conservation, and others. They will study how concepts of ethics, governance, and economics, as well as the psychology of public behaviour, are integrated into policy decision-making for sustainability. They will work in groups on a specific project, liaise with community stakeholders, and make recommendations for action in a formal presentation to stakeholders. Note: Students may earn credit for only one of POLI 4110 or POST 4110 as they are identical courses.

Level: UG

Prerequisite(s): POST 3110, or (18 POLI credits at the 1100-level or higher including POLI 2100) and SOCI 2260

Cross-listing: POST 4110

Attribute: ARTS (p. 521)

**POLI 4120 3 credits****Indigenous Peoples in Canada: Politics and Policy**

Students will examine the relations between Indigenous peoples and the Canadian political order, ranging from: theoretical and legal approaches to indigeneity; varying views of Canada as a settler, colonial, and multinational state; the evolving constitutional status of Indigenous peoples; the fiduciary duties of the Crown, treaties and treaty-making; approaches to Indigenous autonomy and self-government; the legacy of residential schools, Indigenous political organization and mobilization; the political economy of Indigenous peoples in Canada; and debates over 'reconciliation.' In the process, students will consider specific policy debates, such as those surrounding Indigenous health and education, natural resources, and water and the environment, as well as various government approaches to 'managing' Indigenous issues. NOTE: this is a seminar course.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100-level or higher, including 3 credits from a course in POLI

Attribute: ARTS (p. 521)

**POLI 4125 3 credits****The Politics of Multiculturalism in Canada**

Students will critically explore the political issues raised by Canada's experience with cultural and religious diversity, informed by theoretical approaches to the wider themes of culture and religion in politics. They will examine the evolution of Canada's policy of official multiculturalism and the broader meanings attached to the term 'multiculturalism,' considering, in the process, liberal, nationalist, and radical critiques of multiculturalism in theory and practice. Students will also critically engage theoretical issues around the relationship between religious and cultural pluralism, and debates over the role of religion in the public life of a pluralistic society such as Canada. Note: This is a seminar course.

Level: UG

Prerequisite(s): 45 credits at 1100-level or higher, including 3 POLI credits (POLI 1120 recommended)

Attributes: ASTR (p. 523), ARTS (p. 521)

**POLI 4145 3 credits****Cross-Border Politics**

Students will analyze cross-border regions in international politics, exploring cross-border dynamics in the Americas, including the Pacific Northwest (Cascadia), as well as in Western and Eastern Europe, the Middle East, Africa, and Asia. They will address the challenges of multi-level governance in the 21st century in the context of case studies of peaceful cross-border regions. Students will analyze the political, social, economic and environmental impacts of cross-border integration; the tension between nation-state, inter-governmentalism and supra-nationalism; identity, citizenship and democracy in cross-border regions; and the status of cross-border regions in domestic and world affairs.

Note: This is a seminar course.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including 3 credits from POLI.

Attribute: ARTS (p. 521)

**POLI 4190 3 credits****Selected Topics in Canadian Politics**

Students will engage in an intensive study of an important selected issue, or related set of issues, in Canadian politics, as chosen by the instructor. Students will conduct readings, research, and class discussion at an advanced undergraduate level and be expected to demonstrate an effective mastery of the topic in question. NOTE: Students may take this course multiple times for further credit on different topics. NOTE: This is a seminar course.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including 3 credits from courses in POLI

Attribute: ARTS (p. 521)

**POLI 4191 3 credits****Selected Topics in International Politics**

Students will engage in an intensive study of an important selected issue, or related set of issues, in international politics, as chosen by the instructor. Students will conduct readings, research, and class discussion at an advanced undergraduate level and be expected to demonstrate an effective mastery of the topic in question. NOTE: Students may take this course multiple times for further credit on different topics. NOTE: This is a seminar course.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including 3 credits from courses in POLI

Attribute: ARTS (p. 521)

**POLI 4210 3 credits****Democracy: Classic and Contemporary Debates**

Students will critically examine democratic thought. They will explore such questions as the nature and foundation of democratic beliefs, critiques of democracy both ancient and modern, affinities and tensions between liberal and democratic ideals, and contemporary visions of democracy and their critics. Note: This is a seminar course.

Level: UG

Prerequisite(s): 45 credits at 1100-level or higher, including 3 POLI credits (POLI 1110 highly recommended)

Attributes: ASTR (p. 523), ARTS (p. 521)

**POLI 4330 3 credits****International Human Rights**

Students will critically examine a variety of issues relating to human rights, including the theoretical underpinnings of human rights, various categories of rights, the mechanisms available for their implementation, and issues relating to their effectiveness. They will probe the reasons why human rights violations continue to occur in many regions of the world, critically assess the emergence and evolution of the current international human rights regime, and explore the conditions that foster or hinder the implementation of international human rights norms. Note: This is a seminar course.

Level: UG

Prerequisite(s): 45 credits at the 1100-level or higher, including 3 POLI credits.

Attributes: ASTR (p. 523), ARTS (p. 521)

**POLI 4335 3 credits****The Politics of Radical Islamism**

Students will explore the politics of radical Islamism, analyzing the development, aims, and objectives of various Islamist militant movements such as the Taliban. Students will critically examine the role played by regional and international powers in the rise of the Taliban and selected other variants of radicalized political Islam, before considering the future prospects of radical Islamist politics.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including 3 credits from POLI.

Attributes: ASTR (p. 523), ARTS (p. 521)

**POLI 4340 3 credits****Public International Law**

Students will examine conceptual, theoretical, and empirical dimensions of international law. They will explore the distinction between public and private international law, and probe a range of general areas of law, including: human rights and humanitarian law, as well as specialized international law, including criminal; environmental; trade and investment; and space law. Students will analyze the application of international law at the national level, with special emphasis on the incorporation of international law within the law of Canada. They will examine the challenges of international treaty making; legal compliance and enforcement; international dispute resolution; and will explore the relationship between international law and international relations. Note: This is a seminar course.

Level: UG

Prerequisite(s): 45 credits of 1100-level or higher, including 3 credits of POLI 1110 or 1125 or 1145 or 1150

Attributes: ASTR (p. 523), ARTS (p. 521)

**POLI 4420 3 credits****Issues in Public Policy and Administration**

Students will acquire a detailed factual and conceptual framework for the analysis of specific topics within the discipline of public policy and administration. They will critically examine such subjects as the role of government, government intervention, the role and structure of government bureaucracies, interest and pressure groups, the management of the political process, and the relationship between public and foreign policy. Note: This is a seminar course.

Level: UG

Prerequisite(s): Any 3000 level POLI course

Attributes: ASTR (p. 523), ARTS (p. 521)

**POLI 4500 3 credits****Model United Nations**

Students will explore international organizations and parliamentary procedure with a particular focus upon the United Nations (UN). They will use a "learning by doing" approach to gain valuable experiences in engagement with foreign policies, UN functions and structure, research skills, public speaking, diplomacy, and negotiation and compromise.

Students will examine the history and mandate of the UN's various principal organs and agencies through readings, case studies, role-playing and simulations. Note: students enrolled in this course will be required to participate in KPU's annual Model United Nations (KMUN) Conference, in order to apply their knowledge of the UN to real-world issues and to demonstrate their understanding of parliamentary procedure.

Level: UG

Prerequisite(s): POLI 1150 plus any 42 credits at the 1100-level or higher

Attributes: ASTR (p. 523), ARTS (p. 521)

## Power Line Technician (PTEC)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**PTEC 1098 3 credits****Physics and Math for Power Line Technicians**

Students will learn the physics underlying electric power distribution and power line rigging, and the math necessary to use that physics. They will learn to predict the current, voltage, and power usage in various electric circuits, up to and including circuits of resistors in series and parallel with more than one power supply and circuits of resistors, capacitors and inductors in series or in parallel. Students will also learn to predict the forces involved in ensuring the safe construction and maintenance of electrical power lines.

Level: CP

Prerequisite(s): Prerequisites: [ABEM 0082 or 0011 or PSPM 1082 or MATP 1011 or Math 1093 or Principles of Math 11 or Applications of Math 11] and [ABEP 0088 or 0011 or PSPP 1088 or PHYP 1012 or Physics 11]

Attribute: TRAD (p. 521)

## Product Design (DEPD)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables)

(<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**DEPD 1100 3 credits****Studio 1: Design Methods**

Students will be introduced to properties, potential, and the language of materials. They will learn about the processes of manufacturing and assembly that are used in product design. Students will develop insight into how materials behave and how information and understanding are used to guide design, decision-making in relationship to these materials and processes. They will explore materiality in developing design outcomes through a series of lectures, projects and workshops.

Level: UG

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 1110 3 credits****Visualization for Product Design**

Students will develop fundamental skills in visualization for product design (sketching, drawing, and rendering). They will apply theories, concepts, methods and materials comprehending how these hand visualization techniques are integral to the design process; how drawing is a means to an end, for example: communicating and analyzing ideas, simplifying complex problems and processes, persuading clients, manufacturers and users, and providing technical information about construction, assembly and use. Students will transfer these visualization skills to project work.

Level: UG

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 1120 3 credits****Computer Fundamentals**

Students will examine basic computer hardware and software concepts, and the Internet, in relation to product design. They will use word processing and spreadsheet software to develop solutions for design and business problems. Students will explore the 2D and 3D capabilities of using various tools and techniques. They will design and build compositions to create print materials. Note: This course is similar to FMRK 1105. Students cannot earn credit for more than one of DEPDP 1120 or FMRK 1105.

Level: UG

Cross-listing: FMRK 1105

Attributes: ASTR (p. 523), DESN (p. 521), F2A3 (p. 521)

**DEPD 1121 3 credits****Construction Technologies**

Students will learn fundamental techniques and methods of construction technology related to soft materials for applications in product design. They will produce reference samples focusing on technical and production aspects of design projects. Students will become proficient in: industrial sewing techniques, patternmaking methods and applications, and textile selection for a variety of pliable materials, both natural and synthetic.

Level: UG

Cross-listing: DEPDP 1250

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 1130 3 credits****Design Thinking**

Students will be introduced to a number of strategies related to the design of products, such as methods of rational analysis and synthesis, formal design paradigms drawn from history, strategies for developing concepts, and making products meaningful to user groups. They will be introduced to the relationship of design thinking to the process of design. Students will understand the use of a diverse set of tools deployable within different design contexts or at different stages in the design process. They will use various techniques for exploring and representing design ideas to provide a foundation for future expertise in designing. Students will explore hybrid-thinking models through interdisciplinary actions that will provide a framework for leadership in their discipline.

Level: UG

Attributes: ASTR (p. 523), DESN (p. 521), F2A3 (p. 521)

**DEPD 1140 3 credits****Model Making**

Students will apply creative and innovative problem-solving skills to comprehensive three-dimensional design projects focusing on product design, such as sportswear and accessories, protective and safety gear, rescue apparel, uniforms, and shelters. Students will expand their knowledge of materials, processes, and methods as well as three-dimensional modeling and prototyping techniques, along with presentation methods relating to industrial product production.

Level: UG

Prerequisite(s): DEPD 1100

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 1210 3 credits****Three-Dimensional Design: Product Design**

Students will apply creative and innovative problem-solving skills to comprehensive three-dimensional design projects focusing on product design, such as sportswear and accessories, protective and safety gear, rescue apparel, uniforms, and shelters. Students will expand their knowledge of materials, processes, and methods as well as three-dimensional modeling and prototyping techniques, along with presentation methods relating to industrial product production. Note: This course is similar to FIND 1210. Students cannot earn credit for more than one of DEPD 1210 or FIND 1210.

Level: UG

Prerequisite(s): DEPD 1100

Attributes: ASTR (p. 523), DESN (p. 521), F2A3 (p. 521)

**DEPD 1220 3 credits****Digital Technologies for Product Design**

Students will learn the fundamentals of digital manufacturing technologies using industry standard software, with a focus on computer-aided design (CAD) for product design. Students will learn to create and develop design ideas from data using three-dimensional modeling software. Students will extend their prior knowledge of computer applications to create and present innovative product designs geared to production. They will develop and explore generative design processes to produce virtual 3D products.

Level: UG

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 1240 3 credits****Computer Fundamentals**

Students will examine basic computer hardware and software concepts, and the Internet, in relation to product design. They will use word processing and spreadsheet software to develop solutions for design and business problems. Students will explore the 2D and 3D capabilities of using various tools and techniques. They will design and build compositions to create print materials.

Level: UG

Cross-listing: FMRK 1105

Attributes: ASTR (p. 523), DESN (p. 521), F2A3 (p. 521)

**DEPD 1250 3 credits****Construction Technologies**

Students will learn fundamental techniques and methods of construction technology related to soft materials for applications in product design. They will produce reference samples focusing on technical and production aspects of design projects. Students will become proficient in: industrial sewing techniques, patternmaking methods and applications, and textile selection for a variety of pliable materials, both natural and synthetic.

Level: UG

Cross-listing: DEPD 1121

Attributes: ASTR (p. 523), DESN (p. 521), F2A3 (p. 521)

**DEPD 2310 6 credits****Studio 2: Design Content**

Students will explore concepts, materials, and fastening components appropriate to product design. They will apply critical thinking and creative problem-solving processes to explore and experiment with multiple combinations of materials, assembling and affixing technologies. Students will document their findings for future reference, and present the results of their explorations.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher

Co-requisite(s): DEPD 2320

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 2320 3 credits****Material Technology**

Students will investigate the technical aspects of soft materials in relation to product design. They will explore the profiles of natural and synthetic materials, including: classification, specification, structure, measurement, and performance. They will seek new uses and applications for soft materials, and consider environmental and technological factors appropriate to product design.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher

Co-requisite(s): DEPD 2310

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 2330 3 credits****Transformative Thinking for Product Design**

Students will be introduced to the complexities of societal threats and opportunities that affect design. They will understand the transformative nature of design that exists in a dynamic context. Students will study areas, such as cultural change, globalization, sustainability and technological advances, that will likely impact the design professions over the next decade.

Level: UG

Prerequisite(s): 12 credits from courses at the 1100 level or higher

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 2331 3 credits****Human Factors for Product Design**

Students will develop an understanding of ergonomics and human factors within the context of designing highly effective recreational and technical apparel and related soft products. They will research the relationship between product design and user needs for comfort, safety, well-being, and performance. They will explore methods for developing detailed user profiles and system requirements, and for evaluating design alternatives relative to functional and task variables; human needs, capabilities and limitations.

Level: UG

Prerequisite(s): 12 credits from courses at the 1100 level or higher.

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 2410 6 credits****Studio 3: Design Context**

Students will further explore concepts, materials, and components, in response to specific criteria for diverse contexts in product design. They will apply critical thinking and creative problem-solving processes in exploring solutions that allow for products to be used differently and more effectively. Students will incorporate relevant socio-cultural, human factor research, and technologies into their design exercises, and present their process and results.

Level: UG

Prerequisite(s): DEPD 2310 and 2320

Co-requisite(s): DEPD 2420

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 2420 3 credits****Production Technology**

Students will study various levels of production technology in product design. They will investigate and compare the principles and processes of current production and manufacturing requirements, and consider the limitations and comparative costs involved in forming materials to the required specifications (e.g. shape, size, and finish). Students will explore new resourceful and sustainable applications of production for product design.

Level: UG

Prerequisite(s): DEPD 2310 and 2320

Co-requisite(s): DEPD 2410

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 2430 3 credits****Socio-Cultural Issues in Design**

Students will consider essential concepts, theories and methods related to cultural issues and how these might impact the design of soft products. They will engage in critical thinking and creative problem-solving activities related to local, regional, and global issues, such as: social structures, economics, politics, gender, ethnicity, class and age; environment, sustainability and ethical practices.

Level: UG

Prerequisite(s): 12 credits from courses at the 2000 level or higher.

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 3510 6 credits****Studio 4: Design Engagement**

Students will respond to design briefs and engage in rigorously researching the design of soft goods products for leisure and sports gear. They will critically analyze existing and potential consumer markets, including under-represented demographic groups, with the aim of creatively improving such aspects as function, performance and comfort of products. Students will incorporate interdisciplinary knowledge and technologies into project work.

Level: UG

Prerequisite(s): All of: (a) DEPD 2331 or DEPD 2431, (b) DEPD 2410 and (c) DEPD 2420.

Co-requisite(s): DEPD 3520

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 3520 3 credits****Production Cycle: Manufacture and Strategies**

Students will study sourcing as a major aspect of production technology in soft product design. They will create specifications that include: sizing/grading, product measurements, bills of materials to gather components, vendor information, critical paths, and efficient, lean manufacturing techniques.

Level: UG

Prerequisite(s): All of: (a) DEPD 2331 or DEPD 2431, (b) DEPD 2410, (c) DEPD 2420, (d) DEPD 2430 and (e) MRKT 1199.

Co-requisite(s): DEPD 3510

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 3530 3 credits****Semiotics for Product Design**

Students will reflect on the relationship between semiotics (the study of sign systems) and product design. They will analyze major theories and current discourse to explore how signs and symbols, codes and conventions are used to convey meaning in the marketplace. Students will investigate the types of messages soft goods products communicate in different contexts.

Level: UG

Prerequisite(s): 15 credits from courses at the 2000 level or higher.

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 3610 6 credits****Studio 5 Design Implementation**

Students will further their skills in responding critically and creatively to designing protective gear for dangerous, and unpredictable contexts, e.g. search and rescue, law enforcement, health and safety, and military activities. They will confer with users and critically analyze their needs, with the aim of innovatively and economically improving such aspects as, function, performance and comfort. Students will consider the manufacturing requirements in the development of their solutions.

Level: UG

Prerequisite(s): DEPD 3510 and 3520

Co-requisite(s): DEPD 3620 and 3630

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 3620 3 credits****Product Development for Manufacturing**

Students will study production operations management and process sequencing. They will assess existing examples of product design to analyze the steps required in prototype manufacturing, evaluating the compatibility of materials with the design concept and end use. Students will connect with industry in order to develop a critical manufacturing path relevant to soft product manufacturing.

Level: UG

Prerequisite(s): All of: (a) DEPD 2331 or 2431, (b) DEPD 3510 and (c) DEPD 3520.

Co-requisite(s): DEPD 3610

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 3630 3 credits****Industry Experience**

Students will initiate and complete a faculty-approved, industry-related experience relevant to product design and manufacture, e.g. a work arrangement, an educational study tour, a set of trade shows, visits to manufacturing plants, or contributor at a major conference. They will observe and record their experiences, relate them to their course work, and provide documented evidence of the practical knowledge gained and its potential application.

Level: UG

Prerequisite(s): DEPD 3510, DEPD 3520, ENGL 1100 and MRKT 1199.

Co-requisite(s): DEPD 3610 and 3620

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 4710 6 credits****Studio 6: Design Evaluation**

Students will synthesize their knowledge and skills, by completing feasibility studies of a major industry-related project that highlights their personal abilities in product design. They will engage in rigorous research, brainstorm and test ideas, and propose strategies for future development. Students will probe and justify the economic viability, environmental impact, and the technologies required for realization. Students will make professional presentations about their feasibility studies to the university and the community.

Level: UG

Prerequisite(s): DEPD 3610, 3620 and 3630.

Co-requisite(s): DEPD 4720

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 4720 3 credits****Products & Business Scenarios**

Students will analyze the relationship between soft products and business scenarios. They will analyze circumstances from a global perspective in relation to today's economy. They will study international trade agreements and the legality of trade, and integrate socio-political factors into their research. Students will envision a business scenario, including product development, business supply chain, along with market research and cost estimates.

Level: UG

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 4810 9 credits****Studio 7: Design Projections**

Students will produce a final prototype of their major, industry-related project in product design. They will respond to research completed previously, by advancing and implementing their design strategies. Students will integrate interdisciplinary content; technological advances; specify appropriate manufacturing processes; estimate the economic viability; predict the environmental and ethical impacts of their design decisions. They will demonstrate and defend their solution through comprehensive presentations, documents, to the university and the community.

Level: UG

Prerequisite(s): DEPD 4710 and 4720

Attributes: DESN (p. 521), F2A3 (p. 521)

**DEPD 4831 3 credits****The Business of Product Design**

Students will practice professional business and leadership skills relevant to engagement in the product design profession. They will prepare themselves with appropriate knowledge, skills and tools, e.g. resumes, business proposals, portfolios and other documents typically required in business and manufacturing environments. Students will discuss business procedures, marketing plans, financial management, fee proposals and contracts, intellectual property issues, government regulations, ethical and professional liability issues.

Level: UG

Prerequisite(s): DEPD 4710, DEPD 4720 and MRKT 4177

Co-requisite(s): DEPD 4810

Attributes: DESN (p. 521), F2A3 (p. 521)

## Psychiatric Nursing (PSYN)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**PSYN 2110 2 credits****Essentials of Psychiatric/Mental Health Nursing**

Students will explore the concepts of mental health nursing through the examination of historical, social, cultural and political influences regarding mental health and wellness. They will examine the role of a mental health professional as a therapeutic agent. Students will also develop an understanding of their role in mental health. This course may be in class and/or online.

Level: UG

Co-requisite(s): HEAL 2150, PSYN 2125, 2130, 2145 and 2160.

Attribute: HLTH (p. 521)

**PSYN 2125 3 credits****Psychiatric/Mental Health Nursing: Pharmacology and Other Therapeutics**

Students will examine, develop and apply the principles of safe medication administration. They will learn theory with a focus on classes of medications, assessments and evaluation in relation to mental health nursing within the context of acute and community care. Students will also apply the principles of theory in the lab settings in practicing the skills related to safe medication administration. Students will be introduced to a variety of drug classes and will learn about uses of drugs, pharmacologic and therapeutic effects, side effects, adverse effects, safe dosage ranges, nursing considerations, monitoring of clients, and documentation. This course may be in class and/or online.

Level: UG

Co-requisite(s): HEAL 2150, PSYN 2110, 2130, 2145 and 2160.

Attribute: HLTH (p. 521)

**PSYN 2130 3 credits****Psychiatric/Mental Health Nursing: Communication**

Students will develop therapeutic communication and basic counseling skills. They will examine and discuss current approaches and modalities for counseling and psychotherapy in the context of multi-cultural, feminist, and ethical lenses. Students will study communication skills and interventions and enhance self-awareness. This course may be in class and/or online.

Level: UG

Co-requisite(s): PSYN 2110, 2125, 2145, 2160 and HEAL 2150.

Attribute: HLTH (p. 521)

**PSYN 2145 3 credits****Psychiatric/Mental Health Nursing: Practice I**

Students will begin to apply and understand concepts of health promotion, recovery, and psychosocial rehabilitation in this first clinical practice course. They will begin to use knowledge and skills working with individuals experiencing severe and persistent mental health challenges. Students will also apply skills from lab, pharmacology and psychosocial rehabilitation theory in varying mental health settings.

Level: UG

Co-requisite(s): PSYN 2110, 2125, 2130, 2160 and HEAL 2150.

Attribute: HLTH (p. 521)

**PSYN 2160 3 credits****Psychiatric/Mental Health Nursing: Psychosocial Rehabilitation**

Students will examine roles, relationships, challenges and interventions for individuals, families and groups as they pertain to health promotion. They will learn the principles of psychosocial rehabilitation with specific emphasis on recovery as a framework in psychiatric nursing for clients living with severe and persistent mental illness. Students will also explore the theoretical elements of group formation and dynamics for small group work. This course may be offered in class and/or online.

Level: UG

Co-requisite(s): PSYN 2110, 2125, 2130, 2145 and HEAL 2150.

Attribute: HLTH (p. 521)

**PSYN 2201 8 credits****Psychiatric/Mental Health Nursing: Acute Care as Community**

Students will apply select theories to maintain, restore, or improve the health of people in acute care communities. They will assess these communities using both a needs assessment and a community development model to facilitate informed health care decision-making. Students will apply knowledge of acute health care challenges and use nursing assessment and intervention skills in caring for individuals in a community context.

Level: UG

Prerequisite(s): PSYN 2101 and PSYN 2120 and SOCI 1125 and (ANTH 2142 or CRIM 2330)

Attribute: HLTH (p. 521)

**PSYN 2230 3 credits****Psychiatric/Mental Health Nursing: Health and Healing I**

Students will develop and examine personal meanings of health, healing and health promotion in the context of acute episodic health challenges. They will learn theory with a focus on holistic assessment of individuals, families, groups and communities in psychiatric and medical surgical settings. Students will learn about the assessment role of the psychiatric nurse in the Canadian health care team. Health promotion for vulnerable populations will also be explored. This course may be offered in class and/or online.

Level: UG

Prerequisite(s): PSYN 2145 and 2160.

Co-requisite(s): ANTH 2163, HEAL 2110, HEAL 2250 and PSYN 2245.

Attribute: HLTH (p. 521)

**PSYN 2245 4 credits****Psychiatric/Mental Health Nursing: Practice II**

Students will practice nursing in settings with clients who require acute mental health or acute medical/surgical care, treatment and intervention. They will focus on developing assessment skills, documentation and health education. Students will also practice intermediate communication skills while working with clients.

Level: UG

Prerequisite(s): PSYN 2145, 2160 and HEAL 2150.

Co-requisite(s): ANTH 2163, HEAL 2110, HEAL 2250 and PSYN 2230.

Attribute: HLTH (p. 521)

**PSYN 3100 7 credits****Community Health: Psychiatric Mental Health Nursing**

Students will apply community development models working with communities to maintain, restore, or improve the health of people in communities. They will have practice in a variety of communities where psychiatric and mental health needs can be addressed.

Level: UG

Prerequisite(s): PSYN 2201 or (CAHS 3500 or NRSNG 3190 for RPN's only)

Co-requisite(s): PSYN 3120 and WOMN 3100

Attribute: HLTH (p. 521)

**PSYN 3120 3 credits****Psychiatric/Mental Health Nursing: Health Care Economics, Leadership and Management**

Students will explore theory of basic economics and management with a focus on health care in Canada. They will develop leadership skills, group facilitation talents, and basic business planning and budget preparation. Students will work with an agency and will propose creative financial solutions to health care that maintains quality of care. They will integrate conflict resolution models, develop an understanding of working with unions, and be introduced to policy analysis. Students will also utilize nursing informatics.

Level: UG

Prerequisite(s): PSYN 2201

Attribute: HLTH (p. 521)

**PSYN 3130 3 credits****Psychiatric/Mental Health Nursing: Health and Healing II**

Students will continue to develop and refine their assessment skills and integrate, synthesize and evaluate holistic assessment of individuals, families and groups related to health promotion theory. Mental health promotion with vulnerable populations will be emphasized with a continued focus on recognition, screening, and assessment in mental health and medical surgical settings. This course may be offered in the classroom and/or online.

Level: UG

Prerequisite(s): PSYN 2230, 2245 and HEAL 2250.

Co-requisite(s): HEAL 3101, PSYC 3920 and PSYN 3145.

Attribute: HLTH (p. 521)

**PSYN 3145 4 credits****Psychiatric/Mental Health Nursing: Practice III**

Students will continue to practice nursing in settings with clients who require acute mental health or acute medical/surgical care, treatment and intervention. They will focus on advanced communication skills while working with clients. Students will also continue to develop assessment skills, documentation and health education.

Level: UG

Prerequisite(s): All of PSYN 2230, 2245, HEAL 2110, 2250 and ANTH 2163

Co-requisite(s): HEAL 3101, PSYC 3920, PSYN 3130 and 3146

Attribute: HLTH (p. 521)

**PSYN 3146 3 credits****Consolidated Practice: Medical/Surgical Nursing**

Students will consolidate their medical/surgical skills and knowledge in this practice course.

Level: UG

Prerequisite(s): All of PSYN 2230, 2245, HEAL 2110, 2250 and ANTH 2163

Co-requisite(s): HEAL 3101, PSYC 3920, PSYN 3130 and 3145

Attribute: HLTH (p. 521)

**PSYN 3200 7 credits****Global Problems and Health**

Students will apply concepts and theories to address health challenges related to crises and environmental factors. They will examine the relationship between environment and health including epidemiological analysis, policy, and assessment on a local and global level. Students will work with a community on an identified crisis and/or environmental health issue. They will also explore the relationship of health and harmony to the land, natural world, and environment, from many perspectives including Aboriginal people's perspective.

Level: UG

Prerequisite(s): PSYN 3100 and WOMN 3100

Co-requisite(s): PSYN 3220 and PSYN 3230 and PSYN 3240

Attribute: HLTH (p. 521)

**PSYN 3210 3 credits****Psychiatric/Mental Health Nursing: Global Health**

Students will be introduced to strategies of global health promotion. They will examine the relationship between environment and health including epidemiological analysis, policy, and assessment on a local and global level. Students will also explore the relationship of health and harmony to the land, natural world, and environment from many perspectives, including Aboriginal people's perspective. This course may be in class and/or online.

Level: UG

Prerequisite(s): All of PSYN 3130 and 3145

Co-requisite(s): HEAL 3180 and all of PSYN 3211, 3225 and 3245

Attribute: HLTH (p. 521)

**PSYN 3211 3 credits****Issues and Trends in Psychiatric/Mental Health Nursing**

Students will explore issues, trends and strategies in healthcare as it relates to psychiatric nursing in Canada. They will explore ethical issues and the profession's impact on healthcare delivery. Students will also analyze current issues in relation to their impact on psychiatric nursing provincially, nationally and internationally. This course may be offered in class and/or online.

Level: UG

Prerequisite(s): All of PSYN 3130 and 3145

Co-requisite(s): HEAL 3180 and all of PSYN 3210, 3225 and 3245

Attribute: HLTH (p. 521)

**PSYN 3220 2 credits****Issues in Mental Health Nursing**

Students will use critical social theory to explore current issues and societal trends associated with the oppression of people experiencing mental health issues. They will explore the role of the Registered Psychiatric Nurse (RPN) in relation to these issues and societal trends.

Level: UG

Prerequisite(s): PSYN 3100 and WOMN 3100

Co-requisite(s): PSYN 3200 and PSYN 3230 and PSYN 3240

Attribute: HLTH (p. 521)

**PSYN 3225 3 credits****Leadership and Management in Psychiatric/Mental Health Nursing**

Students will explore theories of psychiatric/mental health nursing leadership, management and related bodies of knowledge. They will obtain the foundation and competencies necessary to the professional psychiatric/mental health nursing role. Students will also examine the effects of theories on outcomes of care. This course may be offered in class and /or online.

Level: UG

Prerequisite(s): All of PSYN 3130 and 3145

Co-requisite(s): HEAL 3180 and PSYN 3210, 3245 and 3211

Attribute: HLTH (p. 521)

**PSYN 3230 3 credits****Psychiatric/Mental Health: Nursing Research**

Students will enhance their abilities to participate in the research process through critically reflecting on various research methodologies. They will develop their abilities to comprehend, critique and utilize research. Students will experience ways to transform personal inquisitiveness into a process of posing, exploring, and answering researchable questions. They will explore ways to critically examine their practice in relation to research. Students will explore the political considerations in conducting research.

Level: UG

Attribute: HLTH (p. 521)

**PSYN 3240 3 credits****Qualitative and Quantitative Analysis**

Students will learn techniques commonly used in the analysis of both qualitative and quantitative data. They will engage in the process of qualitative analysis through examining qualitative data, data coding, and thematic construction. Students will also examine a range of descriptive and inferential statistical approaches to quantitative analysis using a computer-based system.

Level: UG

Prerequisite(s): PSYN 3100 and PSYN 3120

Co-requisite(s): PSYN 3200 and PSYN 3220 and PSYN 3230

Attribute: HLTH (p. 521)

**PSYN 3245 4 credits****Psychiatric/Mental Health Nursing: Practice IV**

Students will apply concepts and theories to address health challenges related to crises and environmental factors. They will work on an identified crisis and/or environmental, global health issue.

Level: UG

Prerequisite(s): All of PSYN 3130, 3145 and HEAL 3101

Co-requisite(s): HEAL 3180 and all of PSYN 3210, 3211 and 3225

Attribute: HLTH (p. 521)

**PSYN 4100 7 credits****Capstone Course: Psychiatric / Mental Health Nursing**

Students will collaborate with peers to suggest course content based on course concepts and self-identified learning needs. They will practice in a variety of clinical settings to integrate learning from previous nursing and non-nursing courses. Students will apply advanced nursing skills in counseling, psychotherapy, and case management as they work with individuals, families and groups.

Level: UG

Prerequisite(s): PSYN 3200

Co-requisite(s): PHIL 3010 and SOCI 3345

Attribute: HLTH (p. 521)

**PSYN 4110 3 credits****Psychiatric/Mental Health Nursing: Child and Adolescent**

Students will explore a theoretical framework for assessment and treatment of mental health issues experienced by children, adolescents and their families. They will integrate family systems, bio-psycho-social assessment, and a holistic model of health. Students will also explore cultural competency and cultural safety when working with children and adolescent clients. This course may be offered in class and/or online.

Level: UG

Prerequisite(s): HEAL 3180 and all of PSYN 3210, 3211, 3225 and 3245

Co-requisite(s): PHIL 3010, PSYN 4145 and SOCI 3345

Attribute: HLTH (p. 521)

**PSYN 4145 7 credits****Psychiatric/Mental Health Nursing: Consolidation**

Students will reflect on the previous learning and develop a focused learning plan. They will develop core content for this course and apply this to their clinical practice setting.

Level: UG

Prerequisite(s): HEAL 3180 and all of PSYN 3210, 3211, 3225, 3245

Co-requisite(s): PHIL 3010, PSYN 4110, SOCI 3345

Attribute: HLTH (p. 521)

**PSYN 4200 10 credits****Psychiatric/Mental Health Nursing: Preceptorship**

Students will participate in a Preceptorship of their choice, based on availability of preferred placements. They will increase knowledge and skills to develop independence and confidence as a practitioner in the field of psychiatric/mental health nursing.

Level: UG

Prerequisite(s): PSYN 4100

Attribute: HLTH (p. 521)

**PSYN 4245 10 credits****Psychiatric/Mental Health Nursing: Preceptorship**

Students will transition from the role of student to the role of graduate nurse in this final preceptorship for psychiatric/mental health nursing.

They will be placed in a variety of settings with the expectation of enhancing proficiency at the entry-level for the profession.

Level: UG

Prerequisite(s): PHIL 3010, all of PSYN 4110, 4145 and SOCI 3345

Attribute: HLTH (p. 521)

## Psychology (PSYC)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](http://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**PSYC 1100 3 credits****Introduction to Psychology: Basic Processes**

Students will be introduced to topics related to basic psychological processes, such as the following: the biological basis of behaviour, sensation, perception, states of consciousness, learning and memory. Students will also examine the historical and philosophical contexts behind the development of psychology and the research methods used by psychologists.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_3 (p. 522)

**PSYC 1200 3 credits****Introduction to Psychology: Areas and Applications**

Students will study topics related to applications of psychological processes. They will critically examine areas such as cognition, motivation, emotion, theories of personality, development over the life span, the psychology of health and well-being, psychological disorders, approaches to treatment and therapy, and principles of social and cultural psychology.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 2300 3 credits****Applied Statistics**

Students will learn to apply descriptive and inferential statistics in the analysis of behavioral research

Level: UG

Prerequisite(s): PSYC 1100 and 1200

Attributes: ASTR (p. 523), ARTS (p. 521), QUAN (p. 532)

**PSYC 2308 3 credits****History and Systems of Contemporary Psychology**

Students will study the evolution of psychology's modern history, beginning approximately in the nineteenth century. They will analyze the debates, important discoveries, famous experiments, and differences seen amongst competing traditions within psychology. Students will examine the limitations of an historical approach to psychology.

Level: UG

Prerequisite(s): PSYC 1100 and 1200

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 2315 3 credits****Brain and Behaviour**

Students will demonstrate how normal and abnormal behaviour in both humans and animals may be understood through knowledge of the function of the brain and its underlying structure. They will examine psychophysicologists' current understanding of brain and nervous system involvement in areas such as sensation, perception, movement, memory, psychopathology, and recovery from brain damage.

Level: UG

Prerequisite(s): PSYC 1100 and 1200

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 2320 3 credits****Developmental Psychology: Childhood**

Students will study the process of human development from conception to adolescence, including major principles of development and the descriptive changes in child growth and behaviour. They will study the implications of theory and research findings for areas such as learning, personality, social behaviour, and psychopathology.

Level: UG

Prerequisite(s): PSYC 1100 and 1200

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 2321 3 credits****Developmental Psychology: Adolescence**

Students will examine the physical, cognitive, emotional and social changes that contribute to psychological development during adolescence. They will explore and discuss the implications of the major theories and research findings in the field of adolescent development.

Level: UG

Prerequisite(s): PSYC 1100 and 1200

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 2322 3 credits****Developmental Psychology: Adulthood**

Students will become familiar with the developmental processes from young adulthood through old age. They will study the implications of specific periods/stages, such as parenting, career choice, role changes and losses, including dying and death and the broader issues with an aging population.

Level: UG

Prerequisite(s): PSYC 1100 and 1200

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 2323 3 credits****First and Second Language Acquisition**

Students will study processes and issues associated with a child learning a first language and an adult studying a second language. Topics will include the acquisition of vocabulary, grammar and pronunciation. Students will become familiar with typical language development and review fundamental questions in current theoretical models. Note: Students may earn credits for only one of LING 2400 and PSYC 2323 as they are the same course.

Level: UG

Prerequisite(s): Either (a) PSYC 1100 and 1200, or (b) 6 credits from courses at the 1100 level or higher, including LING 1100.

Cross-listing: LING 2400

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 2330 3 credits****Social Psychology**

Students will explore psychological processes that occur in groups and their influence on the individual around such topics as social beliefs, self-esteem, prejudice, aggression, interpersonal attraction and intimate relationships, attitudes and behaviour, persuasion, conformity, and decision-making. Students will apply knowledge of these concepts to a wide variety of settings that may include law, business, and health.

Level: UG

Prerequisite(s): PSYC 1100 and PSYC 1200

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 2350 3 credits****Psychopathology**

Students will critically examine historical and contemporary approaches to the understanding of psychological disorders and explore issues associated with diagnosis and classification. Students will study specific classifications of psychological disorders including anxiety, somatoform, dissociative, mood, personality, eating and psychotic disorders.

Level: UG

Prerequisite(s): PSYC 1100 and 1200

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 2370 3 credits****Psychology of Personality**

Students will analyze Western personality theories such as the Psychoanalytic perspective, the Existential perspective, the Trait perspective, the Behavioural-Cognitive perspective, and the Humanistic perspective, among others.

Level: UG

Prerequisite(s): PSYC 1100 and 1200

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 2375 3 credits****Perception**

Students will study the psychology of perception. They will learn about depth perception, colour perception, attention, spatial processing, audition and smell.

Level: UG

Prerequisite(s): PSYC 1100 and 1200

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 2385 3 credits****Cognition**

Students will study cognitive processes, including memory, problem solving, reasoning, attention, spatial abilities and decision making.

Level: UG

Prerequisite(s): PSYC 1100 and 1200

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 2400 3 credits****Experimental Psychology: Research Methodology**

Students will examine the scientific method as a way of studying behavioral phenomena and explore research paradigms commonly used in psychology.

Level: UG

Prerequisite(s): PSYC 1100 and 1200

Attributes: ASTR (p. 523), ARTS (p. 521), QUAN (p. 532)

**PSYC 3010 3 credits****Human Sexuality**

Students will critically examine current research and theoretical perspectives that define the study of human sexuality. They will examine the interactive effects of physiology, cognition, socioemotional development, and culture on sexual development, sexual expression, sexual orientation, and gender-identity. Students will engage in critical discourse as it relates to sexuality in the media and society and will argue, with reference to empirical evidence, for or against contentious issues in human sexuality.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including PSYC 2300 and 2400.

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 3200 3 credits****Industrial and Organizational Psychology**

Students will learn to apply principles of psychology to create well-functioning and efficient organizations. They will focus on motivation to work, personnel selection and evaluation, employee development and relationships, with an emphasis on the application of psychological principles of individual behavior and group dynamics in various types of community and industrial organizations.

Level: UG

Prerequisite(s): PSYC 2300, 2330 and 2400.

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 3210 3 credits****Attitudes and Persuasion**

Students will critically examine the nature of attitudes, the relationship between attitudes and behaviour, the formation of attitudes, and the changes of attitudes through persuasion and influence. They will analyze current and past theories of persuasion and will learn to recognize applications of these theories in advertisements, political rhetoric, and other sources of influence.

Level: UG

Prerequisite(s): PSYC 2300, 2330 and 2400.

Attribute: ARTS (p. 521)

**PSYC 3215 3 credits****Psychology of Memory**

Students will engage in an in-depth examination of memory, one of the central areas in cognitive psychology. They will critically examine modern memory theory in its historical context, from the earliest works on forgetting to modern structural and processing theories. Students will also critically examine memory impairment and memory changes over the lifespan.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including PSYC 2300, 2385, and 2400.

Attribute: ARTS (p. 521)

**PSYC 3220 3 credits****Group Dynamics**

Students will explore the processes that occur among individuals within groups, as well as the processes involved when groups interact with each other. They will examine the functions and structure of groups, leadership, conformity pressure, group decision making, group performance and productivity. They will also gain knowledge about conflict and cooperation within groups and between groups. Throughout the course, students will learn to analyze group dynamics in their own experiences participating in and observing groups. Note: This is a seminar course.

Level: UG

Prerequisite(s): PSYC 2300 and 2400

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 3300 3 credits****Applied Statistics II**

Students will learn about statistical analyses and commonly used research designs in behavioural research, including analysis of variance (ANOVA) models, correlation, regression and multiple regression, as well as chi-square procedures, focusing on both conceptual understanding and practical application. They will learn computer software applications commonly used by potential employers to analyze data sets and interpret results.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including PSYC 2300 and 2400.

Attributes: ARTS (p. 521), QUAN (p. 532)

**PSYC 3303 3 credits****Learning: Theory and Practice**

Students will critically examine classical and modern learning theory, including such areas as habituation, sensitization, classical and operant conditioning, modeling, concept formation, and how the theoretical perspectives on these topics relate to the cognitive perspective. They will investigate aspects of learning theory such as generalization, discrimination, reinforcement and punishment in the light of both animal and human learning. Students will explore and discuss issues of stimulus control and the application of learning principles in everyday life.

Level: UG

Prerequisite(s): PSYC 2300 and 2400

Attribute: ARTS (p. 521)

**PSYC 3307 3 credits****Historical and Philosophical Foundations of Psychology**

Students will critically analyze selected themes within the intellectual history of western civilization from early origins to the present time, with particular emphasis on ideas that form the background of contemporary psychology.

Level: UG

Prerequisite(s): PSYC 2300 and 2400

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 3311 3 credits****Psychology of Consciousness**

Students will engage in an in-depth examination of the psychology of consciousness, one of the most fascinating and least understood frontiers of science. They will critically examine the phenomena associated with consciousness from a strictly scientific perspective. Students will critically explore, debate and discuss the historical overview of thinking on consciousness including the mind-body problem, theories of consciousness, altered states of consciousness, how consciousness interacts with the laws of physics, the current cognitive neuroscience approaches to understanding the processes involved in consciousness, and consciousness and quackery. Note: This is a seminar course.

Level: UG

Prerequisite(s): PSYC 2300 and 2400

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 3316 3 credits****Infancy**

Students will explore current research trends and theoretical perspectives in the field of infant development. They will critically examine genetics and prenatal development, labour and birth, and the developmental processes of physical growth, brain maturation, cognition, sensation, perception, and learning in infancy. Students will analyze the process of attachment and emotional development, and the environmental and interpersonal conditions associated with optimal pre- and postnatal development.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including PSYC 2300, PSYC 2400 and one of the following: PSYC 2320 or PSYC 2321.

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 3320 3 credits****Drugs and Behaviour**

Students will learn about psychopharmacology and neurophysiology as it relates to psychoactive drugs. They will examine in depth the different classes of drugs, stimulants, hallucinogens, and tranquilizers and their various effects on the nervous system, as well as the relationship between those effects and drug-induced changes in behaviour. Students will also critically analyze historical and current aspects of social policy and its basis, including possible topics such as research on usage, availability, a discussion of the effects of patent laws and the use of drugs in sports. Note: This is a seminar course.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including PSYC 2300, 2315 and 2400

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 3325 3 credits****Psychology of Gender**

Students will critically examine current research and theoretical perspectives on gender. They will examine the biological, cognitive, social, and cultural variables linked to gender identity. Students will explore, debate and discuss gender issues, gender roles, gender stereotypes, and gendered communication.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including PSYC 2300, 2330 and 2400.

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 3343 3 credits****Psychology of Prejudice**

Students will critically examine current research and theoretical perspectives on prejudice. They will learn the cognitive and social origins of prejudice. Students will explore and discuss forms of prejudice and discrimination pertaining to ethnic, racial, national, and religious groups. They will explore and discuss strategies to counter prejudice.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including PSYC 2300, 2330 and 2400.

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 3350 3 credits****Advanced Topics in Psychopathology**

Students will engage in an in-depth examination of specific classifications of adult psychopathology on topics varying from year to year, such as personality disorders, sexual and gender identity disorders, substance abuse disorders, cognitive and psychophysiological disorders, psychological disorders associated with aging, impulse control disorders, mood disorders, sleep disorders, and psychotic disorders.

Students will expand their knowledge of DSM diagnoses, explore issues around differential diagnosis and comorbidity, critically examine current diagnostic classification systems, consider recent research in the area, and explore gender, social and cultural issues in the diagnosis and treatment of psychological disorders. Students will develop their familiarity with diagnostic criteria and the course of specific disorders through media and textbook clinical cases. Note: This is a seminar course

Level: UG

Prerequisite(s): PSYC 2300, 2350 and 2400.

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 3370 3 credits****Advanced Personality Theory**

Students will examine and analyze original readings within the area of Personality Theory. They will discuss and evaluate readings from the following areas: psychoanalytic, analytical, object relations, individual, interpersonal, existential and phenomenological, humanistic, transpersonal, trait, behavioural, feminist, biological, cognitive, somatic, and eastern perspectives. Note: This is a seminar based course.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including PSYC 2300, 2370 and 2400.

Attribute: ARTS (p. 521)

**PSYC 3400 3 credits****Applied Research I**

Students will learn how to carry out research using experimental, quasi-experimental, and complex correlational designs. They will learn how to plan a course of research, design and implement a study, analyze and interpret the results, and communicate the findings to a variety of audiences including the academic and local communities.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including PSYC 2300 and 2400

Attributes: ARTS (p. 521), QUAN (p. 532)

**PSYC 3450 3 credits****Clinical Psychology: Intervention**

Students will learn about the practice of clinical psychology. They will critically examine assessment techniques, legal and ethical issues, as well as theory, practice, and outcome research of major approaches to therapeutic intervention and prevention. Note: This is a seminar course.

Level: UG

Prerequisite(s): PSYC 2300, 2350 and 2400.

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 3451 3 credits****Psychology and Law**

Students will critically examine the relationship between psychology and the law. They will analyze the roles that cognitive, social, and clinical psychology play in both criminal and civil matters. Students will analyze and interpret research in areas such as jury decision making, eyewitness memory of children and adults, expert testimony, competency, criminal responsibility, police investigations, and risk assessment. Students may earn credit for only one of CRIM 2204 and PSYC 3451. Note: This is a seminar course.

Level: UG

Prerequisite(s): 45 Credits at the 1100 Level or higher, including

PSYC 2300 and 2400

Credit Exclusion: CRIM 2204

Attribute: ARTS (p. 521)

**PSYC 3600 3 credits****Health Psychology**

Students will learn how the discipline of psychology addresses the prevention and treatment of illness, and the promotion of psychological and physical health. They will explore the nature of stress, illness-prone personality types, and health management from a psychobiological perspective.

Level: UG

Prerequisite(s): PSYC 2300, 2330 and 2400.

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 3800 3 credits****Evolutionary Psychology**

Students will critically discuss research and present the theories, methods, and current issues in the field of evolutionary psychology as it applies to human and animal behaviour. Students will focus in particular on the history of evolutionary thought, methods for testing evolutionary hypotheses, the problems of survival, mating strategies, parental care, kinship, cooperation, aggression, dominance hierarchies, memes, and Darwinian medicine. Note: This is a seminar course.

Level: UG

Prerequisite(s): PSYC 2330 and 2400.

Attribute: ARTS (p. 521)

**PSYC 3910 3 credits****Neuropsychology**

Students will learn the basic principles of neuropsychology as they relate to brain function and behaviour, especially in the context of the workplace and rehabilitation. Students will examine experimental and clinical neuropsychology and neurology. Students will identify sensory, motor, cognitive and affective disturbances resulting from brain damage and dysfunction, and the tests administered in their diagnosis. Students will participate in field trips to neuropsychological testing sites and hospitals where available. Note: This is a seminar-based course.

Level: UG

Prerequisite(s): PSYC 2300, 2315 and 2400.

Attribute: ARTS (p. 521)

**PSYC 3920 3 credits****Aging**

Students will critically examine fundamental biopsychosocial processes from mid-life onward, including current research with emphasis on physical changes, age-related chronic diseases, sensation and perception, work, social relationships, social contexts, the self and sense of well-being, as well as death and dying. They will develop skills and awareness of issues related to working with older adults and social policies that affect the aged.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher, including either (a) PSYC 1200 or (b) PSYC 1100 and PSYN 1200.

PSYC 2322 is recommended.

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 3930 3 credits****Consumer Psychology Research & Applications**

Students will examine the psychology of consumer behavior and advertising. They will review the cognitive and social psychological literature with an emphasis on experimental research.

Level: UG

Prerequisite(s): PSYC 2300, 2330, 2385 and 2400.

Attribute: ARTS (p. 521)

**PSYC 3940 3 credits****Adult Education**

Students will learn theories, research findings, and techniques applicable to training adult learners. They will explore a variety of contexts within which adult students learn, and will practice training techniques in simulated or actual settings.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including PSYC 2300 and 2400

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 3950 3 credits****Cognitive Ergonomics**

Students will study cognitive processing as it relates to human-machine interactions. They will examine information theory, attention and spatial displays, language and communication, memory, decision-making, manual control, human error, process control, automation, and human computer interaction. They will explore several case studies in reference to these issues. Note: This is a seminar course.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including PSYC 2300, 2385 and 2400.

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 3960 3 credits****Program Evaluation**

Students will learn to evaluate the effectiveness of institutional programs and procedures, including human service programs and corporate procedures. They will learn to identify the elements of effective programs and how to conduct needs assessments. Students will also learn how to do background preparation including liaising with different stakeholders, as well as designing, implementing, reporting and presenting evaluations of programs.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including PSYC 2300 and 2400

Attribute: ARTS (p. 521)

**PSYC 3970 3 credits****Community Psychology**

Students will learn about social institutions and their policies and how they affect the mental and physical health of individuals and groups living within communities. They will learn about primary, secondary and tertiary preventive strategies and measures that can be used for promoting health used by community-based multidisciplinary and multicultural agencies and programs. Students will explore career opportunities within these programs.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including PSYC 2300 and 2400

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 3980 3 credits****Environmental Psychology**

Students will critically examine theory and application in the field of environmental psychology and the interrelationships between ourselves and the environmental systems in which we live and work. They will study specific topics such as the history and scope of environmental psychology; theories of environment and behaviour; environmental stress; natural environments; built environments; designing for humans; specialized living and working environments and behavioural change in relation to contemporary global environmental issues and sustainability.

Level: UG

Prerequisite(s): PSYC 2300, 2330, and one of the following: CRIM 1208, PSYC 2400 or SOCI 2260.

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 4010 6 credits****Practicum in Psychology**

Students will work in a psychology-related community workplace part-time for a semester under the supervision of the faculty practicum instructor and a workplace representative. They will further their personal and professional development, integrating knowledge and skills acquired from the psychology degree curriculum in the context of their practical field experience. Students will complete reflective assignments and a final report related to their practicum work, as well as attend periodic seminars as a class. NOTE: Students must submit a pre-semester application questionnaire and work with the faculty practicum instructor to obtain a mutually agreed upon position prior to the practicum semester. Only those students who obtain a practicum position with approval of the instructor will be able to register.

Level: UG

Prerequisite(s): A minimum of 72 credits including 9 credits of 3000 and higher level Psychology courses and the permission of the Practicum Instructor.

Credit Exclusion: PSYC 4000

Attribute: ARTS (p. 521)

**PSYC 4100 3 credits****Tests and Measurement**

Students will study the basic principles of psychological testing including norms, reliability, validity, item response theory, scaling, scoring methods, item analysis, and ethical standards. They will experience taking and interpreting tests. They will focus on the use of appropriate standardized occupational tests and the development of evaluation instruments in the work setting.

Level: UG

Prerequisite(s): PSYC 2300 and 2400

Attributes: ARTS (p. 521), QUAN (p. 532)

**PSYC 4150 3 credits****Psychology and Sustainability: Attitudes and Behaviour**

Students will explore the challenges involved in changing attitudes and behaviour as it pertains to sustainability policy. They will examine the foundations of attitudes, how they are formed, changed and their relationship to behaviour. Students will also learn what makes persuasion campaigns effective, as well as individual and social factors that interfere with attitude-behaviour consistency. They will learn to apply this knowledge to the evaluation of sustainability policy designed to change attitudes and behaviour. Note (1): This course is a requirement for the BA in Policy Studies. For Psychology students this course counts as a general elective not a psychology major/minor credit. Note (2): This course is cross-listed as POST 4150. Students who have taken POST 4150 may not register for this course.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher

Cross-listing: POST 4150

Attribute: ARTS (p. 521)

**PSYC 4200 3 credits****Human Factors: Technology and Behaviour**

Students will study the human role in modern systems, with a focus on the design of systems that optimize performance, productivity, and human well-being. They will examine the history of human factors and ergonomics; human and system capabilities and limitations (physical, perceptual, and cognitive); environmental stress effects; task analysis; performance measurement; human error, and workspace design. Students will examine several case studies that exemplify various types of human factors problems and intervention strategies. Note: This is a seminar-based course.

Level: UG

Prerequisite(s): PSYC 2300 and 2400

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 4210 3 credits****Critical Thinking in Psychology**

Students will examine and critically analyze information from different sources such as advertising, the Internet, magazines, news, and interpersonal communication. They will differentiate between science and pseudoscience, and question core assumptions and beliefs. Note: This is a seminar course.

Level: UG

Prerequisite(s): PSYC 2300 and 2400

Attribute: ARTS (p. 521)

**PSYC 4315 3 credits****Neuroscience**

Students will examine brain function in depth by focusing on the biophysics of neural membranes, ion channels/receptors, neurotransmission, and signaling. They will examine the biophysiological mechanisms underlying neural development, neural organization, learning and memory, and brain dysfunction. Note: This is a seminar-based course.

Level: UG

Prerequisite(s): PSYC 2300, 2315 and 2400.

Attribute: ARTS (p. 521)

**PSYC 4350 3 credits****Developmental Psychopathology**

Students will engage in an in-depth exploration of developmental psychopathology from infancy to adolescence with an emphasis on the characteristics of disorders most commonly identified in childhood, including their determinants and potential outcomes. They will critically explore, debate, and discuss current theories and research as well as recent trends in intervention and prevention. Students will critically examine developmental psychopathology within the broader contexts of family, school, culture, and the community while investigating the ethical and challenging issues related to the research and diagnosis of childhood disorders. Note: This is a seminar course.

Level: UG

Prerequisite(s): PSYC 2300, 2350, 2400 and one of the following: PSYC 2320 or 2321.

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 4400 3 credits****Research Methods II: Qualitative Methodologies**

Students will design and implement research projects using qualitative methodologies such as case studies, phenomenological interviews, surveys, focus groups and accessing archival data. They will learn how to analyze qualitative data using appropriate techniques such as horizontalization, clustering, and thematic analysis, and open, axial, and selective coding.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including PSYC 2300 and 2400.

Attribute: ARTS (p. 521)

**PSYC 4500 3 credits****Interpersonal Relations**

Students will survey issues of interpersonal relations relevant to working effectively with others in the workplace and interacting successfully with customers and clients. Students will critically examine interpersonal problems and solutions involved in working with, understanding, and getting along with others. They will explore theory and research in the areas of interpersonal influence, impression formation and management, nonverbal communication, teamwork, cross-cultural diversity and relations, political skills, conflict resolution, customer satisfaction, and community psychology.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including PSYC 2300, 2330 and 2400.

Attribute: ARTS (p. 521)

**PSYC 4600 3 credits****Positive Psychology**

Students will explore, evaluate, and apply findings from positive psychology—an area of psychology relying on social science methods to study human well-being, human strengths, and factors that enable some people to flourish in the face of adversity. They will compare the major theories of positive psychology and will examine the historical background of positive psychology. Students will develop expertise in the use of social science methodology to study human strengths and well-being. Students will also develop expertise in distinguishing justified from unjustified interpretations of research in positive psychology.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including PSYC 2300 and one of the following: CRIM 1208, PSYC 2400 or SOCI 2260.

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 4650 3 credits****Psychology of Genocide**

Students will apply theories from social and personality psychology to the understanding of the causes, correlates, and consequences of genocide and mass killing. They will think critically about the complex and multi-factorial relationships found in the real world. Students will explore the psychology of different groups of people associated with genocide, including perpetrators, bystanders, rescuers, and survivors. Students will also learn about the extent to which the discipline of psychology itself has been shaped by various episodes of genocide and other mass killing.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including PSYC 2300, 2330 and one of the following: CRIM 1208, PSYC 2400 or SOCI 2260.

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 4700 3 credits****Culture and Psychology**

Students will critically examine research findings pertaining to the influence of culture on human behavior including issues of ethnicity and race, the acculturation process, self and identity, health beliefs and practices, language and accent, interpersonal attraction and intimate relationships, prejudice and discrimination. They will explore the practical applications of these findings to day-to-day life involving interactions with culturally diverse individuals, and develop greater inter-cultural sensitivity.

Note: This is a seminar course

Level: UG

Prerequisite(s): PSYC 2300, 2330 and one of the following: CRIM 2103, MATH 2335, PSYC 2400 or SOCI 2260.

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 4800 3 credits****Professional & Ethical Issues**

Students will examine ethical codes/requirements and issues in applied research, and regulations governing the practice of psychology in Canada and the US and, more specifically, in British Columbia. Students will also prepare for job searching by creating effective portfolios and resumes, and by developing effective job search techniques and interviewing styles.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including PSYC 2300 and 2400

Attribute: ARTS (p. 521)

**PSYC 4900 3 credits****Special Topics in Psychology**

Students will engage in an intensive study of a selected topic in psychology. This study will include the development of a proposal, writing reports and presenting the results. Note: The area of study will be established in advance by the department.

Level: UG

Prerequisite(s): PSYC 2400

Attribute: ARTS (p. 521)

**PSYC 4910 3 credits****Rehabilitation**

Students will learn about the field of rehabilitation psychology. They will learn many of the issues which rehabilitation psychologists need to consider when working with people who have acquired a physical disability. They will learn about the work of rehabilitation psychologists, other rehabilitation professionals and the role of psychology in aiding the rehabilitation of individuals with acquired disabilities. Students will examine some common disabling conditions which may include brain injury, stroke, Parkinson's disease, spinal cord injury, amputation, and sensory impairment. They will study the psychological, social, medical, and vocational effects of such conditions. Note: This is a seminar based course.

Level: UG

Prerequisite(s): PSYC 2300 and 2400

Attributes: ASTR (p. 523), ARTS (p. 521)

**PSYC 5000 6 credits****Honours Thesis I**

Students will carry out a detailed investigation of a topic of interest relevant to psychology. They will carry out the investigation under the supervision of a faculty member with expertise in the area, in the form of a literature survey and review. Students will be required to identify relevant sources of information and will submit a final paper representing an original literature review and an empirical research design. Note: This is a seminar-based course. The final paper for this course will be used for subsequent completion of a thesis in PSYC 5010. Students are strongly advised to seek methodological advice in the development of their proposal.

Level: UG

Prerequisite(s): PSYC 3300 (B+), PSYC 3400 (B+), permission of a supervisor, and permission of the Psychology Honours Committee.

Attribute: ARTS (p. 521)

**PSYC 5010 6 credits****Honours Thesis II**

Honours candidates will carry out research under the supervision of a faculty member with expertise in the area selected. They will use the information obtained from the literature review in PSYC 5000 to implement the proposed research. Candidates will, using appropriate methods, collect and interpret data, and write a thesis on the results of the project, and will present their thesis. Note: Candidates are strongly advised to seek methodological advice in the development of their proposal.

Level: UG

Prerequisite(s): PSYC 5000. This course may not be repeated without special permission of department.

Attribute: ARTS (p. 521)

## Public Relations (PRLN)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables/](http://www.kpu.ca/registration/timetables/) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**PRLN 1120 3 credits****PR Writing Fundamentals**

Students will develop proficiency in public relations writing skills. They will study the principles of public relations writing to help achieve corporate objectives through professional communication on behalf of an organization. Students will study the role of research, objectives, audiences, and channels in public relations writing as well as how to persuade and frame an argument, conduct audience analysis and use Canadian Press Style. They will gain practical experience in writing and designing a corporate newsletter.

Level: UG

Co-requisite(s): PRLN 1140 and PRLN 1141

Attribute: BUSI (p. 521)

**PRLN 1140 3 credits****Digital Applications for Print Media**

Students will learn a variety of computer applications for the production of print-ready communications. They will develop the skills and knowledge needed to generate effective print materials used in the public relations field. Students will work with various Windows-based programs such as MS Office and Adobe Creative Suite to design and print a variety of professional materials.

Level: UG

Co-requisite(s): PRLN 1141

Attributes: ASTR (p. 523), BUSI (p. 521)

**PRLN 1141 3 credits****Visual Design**

Students will study basic design elements and principles involved in creating effective page layout. They will learn about the history and anatomy of typography and how to make good font choices. Students will learn how to critically evaluate and solve design problems using the terminology of design and print production.

Level: UG

Attribute: BUSI (p. 521)

**PRLN 1150 3 credits****Introduction to Public Relations**

Students will learn about public relations including the related activities of public affairs and publicity. They will learn how to formulate communication plans and determine strategic tactics, objectives, target audiences and key messages.

Level: UG

Attribute: BUSI (p. 521)

**PRLN 1210 3 credits****Media Relations**

Students will learn the structure and organization of traditional, electronic, digital and social media and examine the characteristics, benefits, strengths and weaknesses of each media type for specific public relations goals. Students will learn how to work effectively with all types of media and to develop strategies to effectively represent an organization and gain positive unpaid (earned) media coverage. They will create a media list from an actual professional media database, pitch a story idea and create a client media plan.

Level: UG

Prerequisite(s): PRLN 1150

Co-requisite(s): PRLN 1220

Attribute: BUSI (p. 521)

**PRLN 1220 3 credits****Writing for Media Relations**

Students will develop proficiency in the writing of materials in support of media relations activities. They will write news releases, media advisories, backgrounders, profiles and other components of a media kit for both traditional and social media usage. Students will learn to use Canadian Press Style to write engaging and effective approaches aimed at media gatekeepers such as desk editors, producers and bloggers in order to achieve positive unpaid media coverage and publicity for organizations and clients.

Level: UG

Prerequisite(s): PRLN 1120

Co-requisite(s): PRLN 1210

Attributes: ASTR (p. 523), BUSI (p. 521)

**PRLN 1230 1.5 credits****Public Relations Research**

Students will learn qualitative and quantitative research methods and measurement tools as applied to the professional practice of public relations. They will learn various research methods including sampling and survey methods, focus group research, content analysis, and online research. Students will analyze and evaluate applied and academic research studies and will complete a research project.

Level: UG

Prerequisite(s): PRLN 1150

Attribute: BUSI (p. 521)

**PRLN 1236 3 credits****Visual Presentations**

Students will gain practical experience in the planning, design, production and delivery of aspects of multimedia presentations used in the field of public relations. They will study multimedia design theories and apply specific principles to such digital formats as photographs, video, and electronic slides to convey creative ideas and express information effectively. They will learn how to design and produce handouts and/or information packages that reflect repeating elements, both in content and design, used in visual presentations. Students will learn how to critically evaluate the design and application of each of the presentational formats used and how to critique the overall delivery of information.

Level: UG

Prerequisite(s): PRLN 1140 and PRLN 1141

Attribute: BUSI (p. 521)

**PRLN 1250 3 credits****Digital Applications for Electronic Media**

Students will explore the planning, development, production and communication of electronic media content. Students will be introduced to tools and techniques used in the production and authoring of graphics, text, photography, video and sound to design, edit and produce digital and electronic communications used in public relations, marketing and corporate communications.

Level: UG

Prerequisite(s): PRLN 1140 and PRLN 1141

Attribute: BUSI (p. 521)

**PRLN 2150 3 credits****Reputation Management**

At the core of public relations is the management of an organization's reputation. Students will understand reputation management in the organizational context as it affects the corresponding practice of public relations. Students will examine the role of public relations and reputation management through various theories which impact and influence the practice of public relations.

Level: UG

Prerequisite(s): PRLN 1150

Attribute: BUSI (p. 521)

**PRLN 2310 3 credits****Issues Management & Crisis Response**

Students will learn the theory and practice of reputation management for an organization. They will explore how professional communicators handle issues identification, crisis management and stakeholder analysis on behalf of an organization. They will learn how to evaluate communication risks; conduct stakeholder analyses; and prepare plans and strategies to manage communication around issues and crises for both internal and external stakeholders. Students will also focus on managing media relations during a crisis, with special emphasis on the role of the key spokesperson for the organization.

Level: UG

Prerequisite(s): PRLN 1150 and PRLN 1210

Attribute: BUSI (p. 521)

**PRLN 2320 3 credits****Promotional Writing & Design**

Students will learn to plan, budget, write, design and produce printed corporate communications products such as posters, information sheets, flyers, advertorials and fundraising profiles. They will produce polished, audience-directed, professional print communications projects that assist an organization to convey information about corporate goals and programs and build customer, community and public support.

Level: UG

Prerequisite(s): PRLN 1140, PRLN 1141 and PRLN 1250

Attribute: BUSI (p. 521)

**PRLN 2332 3 credits****Event Planning & Sponsorship**

Students will learn the basics of raising charitable donations for a nonprofit organization, with emphasis on special event fundraising, media coverage and volunteer recognition. Students will plan a fundraising event for a nonprofit whereby they conduct meetings with representatives of the organization to determine venue, theme, activities and timing. They will plan the creative and production aspects of the event, which will be implemented in PRLN 2432 Event Production & Management in the spring term.

Level: UG

Prerequisite(s): PRLN 1150 and PRLN 1210

Attribute: BUSI (p. 521)

**PRLN 2338 3 credits****Advanced Visual Design**

Students will build upon their knowledge of visual design and refine their ability to apply advanced typography and page layout principles to class projects. Students will further develop analytical skills to produce and evaluate effective design strategies and demonstrate the importance of design thinking to business success. Students will identify current areas of strength and prepare and maintain a print portfolio of their best design work.

Level: UG

Prerequisite(s): PRLN 1140, PRLN 1141, PRLN 1236 and PRLN 1250

Attribute: BUSI (p. 521)

**PRLN 2345 3 credits****Introduction to Fundraising & Development**

Students will examine the basics of fundraising and development for non-profit organizations, foundations and charities. They will examine the principles and strategic issues in fundraising; the role of the development officer; and the nature of fundraising campaigns. Students will develop an understanding of annual, capital and special project fundraising as well as how to work effectively with non-profit volunteer boards.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher

Attribute: BUSI (p. 521)

**PRLN 2350 3 credits****Publicity & Promotion**

Students will explore the tools, techniques, methodologies and best practices of marketing communications campaigns for a wide variety of organizations including profit and non-profit organizations. Students will also examine various corporate and marketing communication products such as posters, information sheets, flyers, advertorials and fundraising profiles to convey information about corporate goals programs.

Level: UG

Prerequisite(s): PRLN 1150

Attribute: BUSI (p. 521)

**PRLN 2432 3 credits****Event Production & Management**

Students will work with a client and implement the client-approved event proposal. They will learn to work as a team to organize, publicize, stage and manage a special event for a non-profit organization planned in a previous semester in PRLN 2332 Event Planning and Sponsorship.

Level: UG

Prerequisite(s): PRLN 2332

Attribute: BUSI (p. 521)

**PRLN 2441 3 credits****Organizational Communications**

Students will learn the techniques and strategies for creating and managing communications on behalf of an organization with employees and other audiences defined as internal to the organization. They will study how to design and produce effective professional communications plans, programs, policies and tools to effectively communicate corporate messages, promote employee engagement & productivity and create a positive organizational culture.

Level: UG

Prerequisite(s): PRLN 1150

Attributes: ASTR (p. 523), BUSI (p. 521)

**PRLN 2455 3 credits****Creative Services Consulting**

Students will learn how to establish a consulting company to gain contract and freelance project work in a creative services field such as public relations, corporate communications, marketing communications or graphic design. They will explore current concepts, theories and practical skills related to the establishment and marketing of a creative services consulting business. Students will examine business, marketing, ethical, legal and professional considerations specific to creative service businesses, agencies and consultancies.

Level: UG

Prerequisite(s): PRLN 1120, PRLN 1140, PRLN 1141, PRLN 1150,

PRLN 1210, PRLN 1220, and PRLN 1230.

Attribute: BUSI (p. 521)

**PRLN 2477 3 credits****PR Practicum**

Students will apply the skills and knowledge of professional public relations practice by securing, with instructor guidance and approval, an unpaid practicum of four weeks on-site in a professional communications environment. They will demonstrate mastery of the full range of PR competencies gained in the PR Diploma Program through tasks completed while working full-time, five days a week, for a minimum of 30 hours a week, for four weeks within the PR industry with consideration given to the student's interests, skills and personal suitability as well as the needs of both the student and the sponsor employer.

Level: UG

Prerequisite(s): Both (a) PRLN 1220, PRLN 1230, PRLN 2310, PRLN 2332, PRLN 2338 and PRLN 2350 and (b) PRLN 2320 OR PRLN 2150.

Attribute: BUSI (p. 521)

**PRLN 2478 1.5 credits****Professional Readiness**

Students will learn the techniques and practices of preparing for work opportunities in a professional and/or creative services field. They will analyze job postings and produce effective cover letters, resumes, and requests for informational interviews. They will design and organize a professional portfolio and learn to effectively present the portfolio to an employer. Students will practice professional networking skills and gain skills in handling employment interviews. They will examine the employment market for their chosen field and discuss plans for a practicum/job search.

Level: UG

Prerequisite(s): Both (a) PRLN 1220, PRLN 1230, PRLN 2310, PRLN 2332, PRLN 2338 and PRLN 2350 and (b) PRLN 2320 or PRLN 2150.

Attribute: BUSI (p. 521)

**PRLN 3010 3 credits****Ethics of Communication**

Students will examine ethical challenges that arise in the careers of organizational communications, marketing, business and public relations professionals. Students will explore the ethical codes of professional associations governing the practice of business communications. They will examine leadership roles for communicators in shaping ethical futures for profit and non-profit organizations.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher

Attribute: BUSI (p. 521)

# Public Safety Communications (PSCM)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

## **PSCM 1100 3 credits** **Call Processing**

Students will work in cooperative teams to learn and practise call-processing skills needed by communicators for successful integration into public safety and related industries, using both manual and automated systems. They will learn technical language used in the industry and how agencies function.

Level: UG

Co-requisite(s): PSCM 1280

Attribute: BUSI (p. 521)

## **PSCM 1120 3 credits** **Radio Communications**

Students will gain competency through practice in simulated radio dispatching within a communication centre team environment, applying radio protocol and procedures to Industry Canada specifications. They will identify the technologies (telephone, radio, and computer-aided dispatch systems) used within the communications industry in radio communications.

Level: UG

Co-requisite(s): PSCM 1280

Attribute: BUSI (p. 521)

## **PSCM 1140 3 credits** **Human Behaviour**

Students will analyze and practice inclusive techniques for dealing with the elderly, young children, the mentally and emotionally disadvantaged, and those members of our community with language barriers. They will learn to recognize and deal effectively with occupational, organizational, and event-related stress within themselves through journal writing and personal reflection.

Level: UG

Co-requisite(s): PSCM 1280

Attribute: BUSI (p. 521)

## **PSCM 1150 3 credits** **Legal & Regulatory Influences**

Students will examine the legal and regulatory influences on primary responding public safety agencies such as police, fire, and ambulance services. They will research federal and provincial statutes, municipal by-laws, and common laws affecting the public safety sector.

Level: UG

Co-requisite(s): PSCM 1280

Attribute: BUSI (p. 521)

## **PSCM 1200 3 credits** **Police Communications**

Students will work in a team environment to operate a simulated tri-service communications centre. They will learn the protocols and techniques for police call processing and radio dispatching through practical simulations, beginning at an entry level of operational competency and working up to handling multiple incident scenarios

Level: UG

Prerequisite(s): PSCM 1100 and 1120 and 1140 and 1150 and 1400

Co-requisite(s): PSCM 1281

Attribute: BUSI (p. 521)

## **PSCM 1240 3 credits** **Human Behaviour II**

Students will further study psychological disorders, social disobedience and victimization emphasized from the perspective of public safety communicators. The student will apply stress management techniques to deal with: critical incident stress, shiftwork, media stress, and sleep disorders. Students will also reflect on and acquire practical insights into different types of behaviors and their effects as they practice interaction with a diverse group of callers.

Level: UG

Prerequisite(s): PSCM 1100 and 1120 and 1140 and 1150 and 1400

Co-requisite(s): PSCM 1281

Attribute: BUSI (p. 521)

## **PSCM 1260 3 credits** **Practicum**

Students will observe and experience hands-on operations in a variety of public safety communications centres. They will produce written reports on procedures, technologies, and organization used in each centre.

Level: UG

Prerequisite(s): PSCM 1100 and PSCM 1120 and PSCM 1140 and PSCM 1150 and PSCM 1400

Co-requisite(s): PSCM 1281

Attribute: BUSI (p. 521)

## **PSCM 1280 1.5 credits** **Public Safety Communications Lab 1**

Students will examine computer aided dispatch software concepts, and its application to the public safety communications field. They will use the communications lab telephone system, computer aided dispatch software, mapping software and Records Management System (RMS) software to create and dispatch emergency calls in a simulated lab environment. Students will achieve a minimum 45 nwpm keyboarding speed.

Level: UG

Attribute: BUSI (p. 521)

## **PSCM 1281 1.5 credits** **Public Safety Communications Lab 2**

Students will continue to use the communications lab telephone system, current computer aided dispatch software, mapping software and Records Management System (RMS) software to create and dispatch emergency calls in a simulated lab environment. They will practice scenarios to assess a variety of responses for police, fire and ambulance and become proficient in the processing and dispatching of emergency calls. Students will achieve a minimum 50 net words per minute (NWPM) keyboarding speed.

Level: UG

Prerequisite(s): PSCM 1280

Attribute: BUSI (p. 521)

**PSCM 1300 3 credits****Fire Communications**

Students will identify the protocols and techniques for incident processing and dispatching in the fire service. They will utilize procedures for WHMIS and TDG in the context of fire exercises. Fire call processing, radio dispatching and incident command will be practiced in lab simulations. Students will work in a team environment to operate a simulated tri-service communications centre by the end of the course.

Level: UG

Co-requisite(s): PSCM 1281

Attribute: BUSI (p. 521)

**PSCM 1400 3 credits****Emergency Planning**

Students will examine emergency planning and preparedness regulations and procedures at the federal, provincial and municipal level, with the focus on analyzing the interaction of public safety agencies during a person-induced or natural disaster. They will apply their knowledge of emergency planning to establish and prepare personal strategies and equipment for themselves and their families.

Level: UG

Co-requisite(s): PSCM 1280

Attribute: BUSI (p. 521)

**PSCM 1500 3 credits****Emergency Medical Communications**

Students will learn the protocols and techniques for incident processing and dispatching in emergency medical situations. They will practice emergency medical call assessment and radio dispatching in lab simulations in a team environment, and will provide emergency medical telephone instruction. They will work together to operate a simulated tri-service communications centre.

Level: UG

Prerequisite(s): PSCM 1100 and PSCM 1120 and PSCM 1140 and PSCM 1150 and PSCM 1400

Co-requisite(s): PSCM 1281

Attribute: BUSI (p. 521)

## Punjabi (PUNJ)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**PUNJ 1100 3 credits****Introductory Punjabi I**

Students who have little or no previous knowledge of Punjabi (Gurmukhi) script will learn to read and write at the basic level. While exploring the Punjabi culture, students will use the communicative approach to develop the ability to speak, comprehend, read, and write Punjabi. Both students who do not speak Punjabi as well as students with fluent Punjabi speaking skills may register, however they will be assessed on different oral assessment rubrics. Note: Students with strong capabilities speaking, reading and writing in Punjabi may be asked to withdraw from the course. Students with strong capabilities speaking, but not reading and writing are encouraged to register in the course.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_3 (p. 522)

**PUNJ 1101 3 credits****Introductory Punjabi II**

Students will continue to build on basic reading and writing skills learned in PUNJ 1100 as well as improve their oral and listening skills while exploring the Punjabi and Indian cultures. Note: Any student with Grade 12 Punjabi or with previous language skills meeting or exceeding the learning outcomes of PUNJ 1101 is not permitted to register in this introductory course. Students with strong capabilities speaking, reading and writing in Punjabi may be asked to withdraw from the course. Students are encouraged to contact the instructor for an assessment before registering in the course.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**PUNJ 2200 3 credits****Intermediate Punjabi I**

Students will use the communicative approach to review and expand their knowledge of basic Punjabi grammar. They will further explore the Punjabi culture while continuing to develop oral, listening, reading, and writing skills at the intermediate level. Note: Students with strong capabilities speaking, reading and writing in Punjabi may be asked to withdraw from the course. Students are encouraged to contact the instructor for an assessment before registering in the course.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**PUNJ 2201 3 credits****Intermediate Punjabi II**

Students will use the communicative approach to reinforce and expand their linguistic skills at the intermediate level, through integrated and interactive practice in reading, writing, listening and speaking. They will also continue to work on their intercultural learning skills. Students with strong capabilities speaking, reading and writing in Punjabi may be asked to withdraw from the course. Note: Students are encouraged to contact the instructor for an assessment before registering in the course.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**PUNJ 3300 3 credits****Upper Intermediate Punjabi I**

Students will reinforce and expand their linguistic skills and cultural understanding through a study of Canadian Punjabi literature in a variety of forms, including poetry, short stories, and plays. They will also explore nonfiction, such as magazine and newspaper articles. They will do so through integrated and interactive practise in reading, writing, listening and speaking. Students will also continue to work on their intercultural learning.

Level: UG

Prerequisite(s): PUNJ 2201 or assessment by instructor

Attribute: ARTS (p. 521)

**PUNJ 3301 3 credits****Upper Intermediate Punjabi II**

Students will increase proficiency in all Punjabi language skills at an upper-intermediate level. They will continue their advanced study of complex grammatical structures and specialized vocabulary. They will read and discuss the works of Punjabi writers and journalists, as well as analyze Punjabi movies.

Level: UG

Prerequisite(s): Punjabi 3300 or assessment by the instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

# Sociology (SOCI)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca/) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

## **SOCI 1125 3 credits**

### **Introduction to Society: Processes and Structures**

Students will learn essential concepts, theoretical perspectives, and methods used in the discipline of sociology. They will explore sociological analysis on topics such as culture, socialization and social interaction, deviance, social inequality, gender and sexuality, race and ethnicity, aging, health, dis(abilities), mass media, family, education, work, religion, economy, polity, population and demography, social change, and globalization. Students will critically examine assumptions we make about social life and will develop informed views on social issues that are important in their own lives and the lives of others in local, national, and global communities.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_3 (p. 522)

## **SOCI 2225 3 credits**

### **Canadian Society: Conflict and Consensus**

Students will study various aspects of Canadian society. They will use sociological perspectives to critically analyze such things as Canadian identity, ethnic diversity and multiculturalism, national unity, regional differences, foreign control, and international relations. Students will explore the structure of Canadian society including issues related to health care, education, economy and work, social inequalities, government, and social policies.

Level: UG

Prerequisite(s): SOCI 1125

Attributes: ASTR (p. 523), ARTS (p. 521)

## **SOCI 2230 3 credits**

### **Racialization and Ethnicity in Canada**

Students will explore the impact of racialization and ethnicity on Canadian social policy and practice in areas such as law and justice, education, human service delivery, arts, and the media. They will analyze evidence of systemic patterns of advantage and disadvantage based on race, ethnicity, and aboriginality in Canadian society. Students will critically examine the effects of race, ethnicity and aboriginality on social, political, and academic discourse, and on resistance movements.

Level: UG

Prerequisite(s): SOCI 1125

Attributes: ASTR (p. 523), ARTS (p. 521)

## **SOCI 2235 3 credits**

### **The Development of Sociological Thought**

Students will explore the development of sociological thought from early modernist thinkers through to contemporary, post-colonial, and post-modern theorizing. They will critically evaluate essential sociological concepts, models, and theoretical approaches in light of the historical contexts in which they were developed, ongoing debates within the discipline, and their relevance to contemporary social life.

Level: UG

Prerequisite(s): SOCI 1125

Attributes: ASTR (p. 523), ARTS (p. 521)

## **SOCI 2240 3 credits**

### **Women in Canada**

Students will examine the diversity of women's lives in Canada. They will consider various approaches to the study of gender (i.e., what constitutes femininity and masculinity), as well as various perspectives on gender inequality. Students will examine the diverse ways in which women's experiences shape and are shaped by institutions such as the economy, the state, education, family, and mass media. They will analyze the interrelationships in gender, race, ethnicity, class, age, sexuality, disability, and geography as well as their impact on the conditions of women's lives both within Canada and globally.

Level: UG

Prerequisite(s): SOCI 1125

Attributes: ASTR (p. 523), ARTS (p. 521)

## **SOCI 2250 3 credits**

### **Families in Canada**

Students will examine the institution of the family in Canada in both historical and contemporary contexts. They will consider issues and approaches relevant to the sociology of the family and explore the structure and organization of various family forms and relations in the context of social, economic, and cultural transformation. Students will analyze the impact of gender, race, ethnicity and class on the institution of the family and compare cross-cultural and other differences among families both within Canada and globally.

Level: UG

Prerequisite(s): SOCI 1125

Attributes: ASTR (p. 523), ARTS (p. 521)

## **SOCI 2255 3 credits**

### **Sociology of Everyday Life and Interaction**

Students will inquire into everyday practices, interactions, and social processes involved in the accomplishment of identities and the social order. They will learn how to frame scenes and situations through which identities and the social order emerge as lived experience. They will examine the relativity of relationships, participation and belonging, self-presentation and performativity, and the importance of communicative ideals. They will analyze the ways that reality is socially constructed and the social order is reproduced, challenged, and transformed through common place taken-for-granted social interactions, rituals, routines, and representations. Students will explore everyday social practices, images, and spaces in a way that offers new meaning to social phenomena such as fashion, flirting, friendship, leisure, workplaces, and city life.

Level: UG

Prerequisite(s): SOCI 1125

Attributes: ASTR (p. 523), ARTS (p. 521)

## **SOCI 2260 3 credits**

### **Research Methods in Sociology**

Students will study the research methods used in the social sciences. Students will examine both quantitative and qualitative approaches used to conduct social research. They will emphasize practical applications of research while learning all the stages involved in designing and executing a research project.

Level: UG

Prerequisite(s): SOCI 1125

Attributes: ASTR (p. 523), ARTS (p. 521)

**SOCI 2270 3 credits****Sociology of Education: A Critical Perspective**

Students will critically explore the sociological, philosophical, and psychological concepts and theories of education and learning. They will examine the historical, socio-economic, and political factors responsible for the establishment and growth of the education system and schooling in the Canadian and global contexts. Students will investigate and analyze current educational issues and controversies. They will analyze the effects of discrimination and inequality on the achievement levels of students, and the organization of schools and universities. Students will critically examine the effects of "race"/ethnicity, gender, class, sexual orientation, and disabilities on the experiences of teachers and students in schools.

Level: UG

Prerequisite(s): SOCI 1125

Attributes: ASTR (p. 523), ARTS (p. 521)

**SOCI 2275 3 credits****Mass Media and Society**

Students will study the place of the mass media in Canadian society and their role in the social construction of reality. They will examine the development of print, radio, television, and new media in a global context, and will focus on the interconnection between media and other social institutions. Students will evaluate and apply various theoretical approaches to media production, content, and audiences.

Level: UG

Prerequisite(s): SOCI 1125

Attributes: ASTR (p. 523), ARTS (p. 521)

**SOCI 2280 3 credits****Sociology of Health, Disability, and Society**

Students will learn about the social, cultural, economic, and political factors surrounding experiences of health, disability, and society. They will learn about the social construction of health and disability, and the structure of Canada's health care system including health care professionals and health care delivery systems. Students will also explore the interaction between health care providers and service users, and current policy and health issues.

Level: UG

Prerequisite(s): SOCI 1125 or HSCI 1115

Attributes: ASTR (p. 523), ARTS (p. 521)

**SOCI 2285 3 credits****Gods in the Global Village: A Sociological Perspective of World Religions**

Students will examine the social dimensions of religion in communities and countries across the world. They will explore the social relevance of religion to individuals and collectives in both the local and the wider global village. Students will explore several interpretations of religion offered by sociologists, past and present. They will also examine religion's contribution to the shaping of social reality and the status of religion in the world today as well as its future.

Level: UG

Prerequisite(s): SOCI 1125

Attributes: ASTR (p. 523), ARTS (p. 521)

**SOCI 2290 3 credits****South Asians around the Globe**

Students will study the South Asian diaspora – the fragment of an ethnic community that exists outside of its "homeland" – with a special focus on the South Asian communities in Western Canada. They will examine social theory related to South Asian migration and social adaptation as well as look at contemporary concerns surrounding globalization and transnationalism. Students will investigate the major social issues that immigrant communities often face in the process of adaptation to Canada at the personal, community, and societal levels. Note: Students may earn credit for only one of ASIA 2290 or SOCI 2290, as they are identical courses.

Level: UG

Prerequisite(s): 6 credits from courses at the 1100 level or higher

Cross-listing: ASIA 2290

Attributes: ASTR (p. 523), ARTS (p. 521)

**SOCI 2311 3 credits****Social Justice in the Global and Local Contexts**

Students will explore social, political, and economic justice in the global and local contexts. They will also examine social justice-related concepts of exploitation, oppression, resistance, privilege, power, inequity, self-determination, and (respect for) cultural diversity, from the sociological and related historical, philosophical, and political perspectives. Finally, students will examine the connections between local and global social justice-related issues and conflicts and how these issues and conflicts are handled in international bodies such as the UN.

Level: UG

Prerequisite(s): SOCI 1125 (POLI 1150 or POLI 2130 recommended)

Attributes: ASTR (p. 523), ARTS (p. 521)

**SOCI 2365 3 credits****Introduction to Social Research Statistics**

Students will study basic statistical techniques used in sociology. They will examine descriptive and inferential statistics at an introductory level with an emphasis on practical applications. Students will learn to interpret and summarize data, perform basic bivariate analysis, and report findings in an informative and unbiased way.

Level: UG

Prerequisite(s): Both (a) SOCI 1125, and (b) CRIM 1208 or SOCI 2260.

Attributes: ASTR (p. 523), ARTS (p. 521), QUAN (p. 532)

**SOCI 3155 3 credits****Indigenous Perspectives on Settler Colonial Societies**

Students will explore Indigenous perspectives on settler colonial societies and the consequences of ongoing colonial occupation for Indigenous nations. Students will draw upon critical Indigenous studies scholarship, Indigenous traditional knowledge, narrative accounts and oral histories. Students will explore the misattribution and denial of Indigenous contributions to human social development and analyze strategies for decolonization, Indigenization, and self-determination. Note: Students may earn credit for only one of SOCI 3155 or INDG 3155, as they are identical courses.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher, including SOCI 1125 or INDG 1100.

Cross-listing: INDG 3155

Attributes: ASTR (p. 523), ARTS (p. 521)

**SOCI 3210 3 credits****Technology and Society**

Students will examine the complex relationship between technology and society in Canada and internationally from a sociological perspective. They will focus on the social and ethical implications of modern technology, as well as its historical development and cultural foundations. Students will learn to think critically and comprehensively about the role of technology in contemporary societies, through comparative analysis and theoretical evaluation. They will pay particular attention to the social, economic, political, and cultural transformations brought about by computerization, and explore the value conflicts and social challenges created by the new information technologies.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including SOCI 1125.

Attributes: ASTR (p. 523), ARTS (p. 521)

**SOCI 3230 3 credits****International Migration and Ethnic Communities**

Students will critically examine the causes of international migration, refugee movements, and the establishment of ethnic communities outside of their countries of origin. They will focus on environmental crisis, ethnic strife and cleansing, wars, economic crisis, disease, and cultural issues. Students will look at the development of ethnic communities as a result of migration and the viability of such communities in the context of both multi-culturalism and uni-culturalism. They will also examine the ways in which gender, class, ethnicity, racialization, and legal status organize migration and settlement. Note: This is a seminar course.

Level: UG

Prerequisite(s): 30 credits, including SOCI 1125. (SOCI 2230 recommended)

Attributes: ASTR (p. 523), ARTS (p. 521)

**SOCI 3235 3 credits****Classic Sociological Theories**

Students will examine classic sociological theories including the works of theorists such as Comte, Marx, Durkheim, Weber, Cooley and Mead, as well as early feminist and non-western theorists. They will explore the historical contexts in which the theories were developed and bring them to life by engaging in conceptual and critical analysis that furthers self-understanding and uncovers dimensions of our lives often taken for granted. They will engage the theories through dialogue, join in debates that characterize sociology, and apply classic social theories to contemporary phenomena, issues, and problems, rather than treat the theories as relics of the past. Note: This is a seminar course.

Level: UG

Prerequisite(s): SOCI 2235

Attributes: ASTR (p. 523), ARTS (p. 521)

**SOCI 3240 3 credits****Gender in Global Context**

Students will examine the social, sexual, economic, and political dimensions of gender from multiple geographic and cultural locations. They will explore the foundational explorations of feminism into the study of gender, and reflect on subsequent diverse approaches to the study of gender from cross-cultural and interdisciplinary approaches such as post-colonial and critical race theory, queer theory, cultural studies, political economy, and Indigenous traditional knowledge. Students will analyze social identities, ideologies, structures, and policies that rest upon gendered processes of imperialism, neoliberalism, racialization, and sexualization in both local and global contexts.

Level: UG

Prerequisite(s): SOCI 2240

Attributes: ASTR (p. 523), ARTS (p. 521)

**SOCI 3245 3 credits****Gender, Bodies, and Sexualities**

Students will explore historical and contemporary conceptions of sexualities and embodiment relating to gender in Westernized societies. Students will study the changing construction of gender, sexual identities and politics of embodiment that shape our everyday lives in relation to other socialized differences such as race and class. They will explore, discuss, and debate important theoretical and conceptual frameworks in gender and sexualities studies such as social structure, intersectionality, and social constructionism.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher, including SOCI 2240.

Attribute: ARTS (p. 521)

**SOCI 3260 3 credits****Qualitative Methods in Sociology**

Students will learn the theoretical and ethical underpinnings of qualitative research as well as the practical tools of the trade. They will use a broad range of applications including observational analysis, in-depth interviews and focus groups, participatory action research, ethnographic research, case studies, and narrative research. Students will gain practical knowledge of the many ways in which qualitative research techniques provide a contextual and in-depth understanding of social phenomenon. Students will use computer software and will also learn to organize, manage and interpret qualitative data. Note: This is a seminar course.

Level: UG

Prerequisite(s): SOCI 2260

Attributes: ASTR (p. 523), ARTS (p. 521)

**SOCI 3270 3 credits****Education, Nation-Building and Globalization**

Students will critically examine the historical, socio-economic, and political factors responsible for the establishment and growth of education systems in different parts of the world. They will explore the roles of the education system in colonial intervention, promotion of Westernization, nation-building, and modernization globally. Students will explore the effects of globalization, neo-liberalism, and neo-conservatism on education systems and students in various countries from critical multidisciplinary perspectives. Note: This is a seminar course

Level: UG

Prerequisite(s): 30 credits from courses at the 1100 level or higher, including SOCI 1125. (SOCI 2270 recommended)

Attributes: ASTR (p. 523), ARTS (p. 521)

**SOCI 3275 3 credits****Sociology of Popular Culture**

Students will explore the role of popular culture in their everyday lives and its connection with social structures and processes. They will apply various sociological perspectives, concepts, and interpretive strategies to a critical examination of a variety of popular culture forms, consumer goods, and leisure activities. They will analyze the production and consumption of popular culture within the local and global contexts and explore the relationships between popular culture, and community, identities, ethnicity, gender, the body and sexuality.

Level: UG

Prerequisite(s): SOCI 2275

Attributes: ASTR (p. 523), ARTS (p. 521)

**SOCI 3280 3 credits****Sociology of Dying and Death**

Students will critically examine cultural, historical, and contemporary attitudes and practices concerning dying and death. They will focus on the dying process, medicalization of death, funerals and body disposal, grief and bereavement, the coroner's role, suicide, assisted death, and other end of life decisions. Note: This is a seminar course.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher, including SOCI 1125.

Attributes: ASTR (p. 523), ARTS (p. 521)

**SOCI 3300 3 credits****Sociology of Work and Occupations**

Students will study the sociological aspects of work and occupations in the Canadian context. They will explore topics such as the historical transformation of work, the meaning of work, the impact of new technologies, and work structuring and restructuring. They will also examine the social organization of occupations, the relationship between work and social inequality, employment opportunities and insecurities, and control and resistance. Students will critically analyze issues related to work and occupations that affect Canadians in significant ways. Note: This is a seminar course.

Level: UG

Prerequisite(s): SOCI 1125

Attributes: ASTR (p. 523), ARTS (p. 521)

**SOCI 3310 3 credits****Conflict Analysis and Resolution**

Students will explore the emerging interdisciplinary field of Conflict Analysis and Resolution (CAR). They will critically analyze the basic elements and processes of human social conflict in interpersonal and broader social contexts. Students will learn core concepts and theories of conflict, including the thoughts and emotions that support conflict and the ones that challenge it; the social structures and processes that support, uphold, or diffuse it; and the ways in which the conditions that support conflict can be transformed. Students will analyze an interdisciplinary body of scholarship that includes theoretical, professional, and applied studies of conflict and its resolution. Note: This is a seminar class

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including SOCI 1125.

Attributes: ASTR (p. 523), ARTS (p. 521)

**SOCI 3320 3 credits****Sociology of Global Inequalities**

Students will critically examine a number of perspectives on development and underdevelopment within a global context, focusing in particular on economic, political and social change. They will critically examine the globalization process, including problems of inequality and its social, political, and economic roots. They will also analyze the role of regional and world bodies, including the North American Free Trade Agreement (NAFTA), the World Bank, the International Monetary Fund (IMF), and the World Trade Organization (WTO) in development and underdevelopment, paying particular attention to the effects of these organizations on communities and individuals. Note: This is a seminar course.

Level: UG

Prerequisite(s): 18 credits from courses at the 1100 level or higher, including SOCI 1125.

Attributes: ASTR (p. 523), ARTS (p. 521)

**SOCI 3330 3 credits****Contemporary Sociological Theories**

Students will engage in an extensive and critical examination of the assumptions, terminologies, and implications of the dominant frameworks of contemporary sociological theory from the early 20th century to the present. They will examine and explore several sociological themes, including power and social structure, the individual in modern society, modernity, postmodernity, and globalization. Students will examine the works of leading theorists of the contemporary period. Note: This is a seminar course.

Level: UG

Prerequisite(s): SOCI 2235

Attribute: ARTS (p. 521)

**SOCI 3345 3 credits****Social Policy in Context**

Students will examine how social issues are defined, and how social policies are formulated, administered, and revised. They will explore the dynamic relationship between social policy and Canada's social structure from varying theoretical perspectives. Students will consider historical and global influences, contemporary welfare state programs, as well as ideological, social, and economic factors shaping policy formation. Note: This is a seminar course.

Level: UG

Prerequisite(s): SOCI 1125

Attributes: ASTR (p. 523), ARTS (p. 521)

**SOCI 3365 3 credits****Quantitative Research Methods**

Students will study statistical methods for research in the social sciences at an advanced level. Students will employ statistical theory to enhance understanding beyond the basic applications of descriptive and inferential statistics. Students will use existing sociological empirical case studies to examine the issues motivating the research, the key research questions, and the reports of findings. They will analyze secondary data using statistical techniques in the context of the broader logic of quantitative sociological inquiry, with a special focus on applied regression analysis.

Level: UG

Prerequisite(s): One of: SOCI 2365, PSYC 2300, or permission of the instructor.

Attributes: ARTS (p. 521), QUAN (p. 532)

**SOCI 3385 3 credits****Introduction to Demography**

Students will study the analysis of population and its three main components: fertility, mortality, and migration. They will engage in an examination of demographic patterns in contemporary Canadian society, along with extensive cross-cultural and historical analysis. Students will also undertake in-depth study of significant contemporary international demographic changes, particularly those taking place in Asia and the USA.

Level: UG

Prerequisite(s): SOCI 1125

Attributes: ASTR (p. 523), ARTS (p. 521)

**SOCI 4225 3 credits****Advanced Topics in Canadian Issues**

Students will engage in an intensive and critical examination of a number of Canadian issues, as selected by the instructor. Students will conduct a primary research project outside the classroom and/or in the field for a portion of the semester on a specific topic. They will review relevant literature, write a proposal, collect and/or analyze data, write a paper, and give a presentation of the paper. Note: The topic(s) of study will be established in advance by the department. Please check with the department for proposed offerings. This is a seminar course. Students may take this course multiple times for further credit on different topics.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher, including both (a) SOCI 2225 and (b) SOCI 2260, CRIM 1208, PSYC 2300, or PSYC 2400.

Attribute: ARTS (p. 521)

**SOCI 4230 3 credits****Advanced Topics in Race/Ethnicity: A Global Perspective**

Students will engage in an intensive and critical examination of a number of issues and policies relating to race and ethnicity globally, as selected by the instructor. Students will conduct a primary research project outside the classroom and/or in the field for a portion of the semester on a specific topic. Note: This is a seminar course. The topic(s) of study will be established in advance by the department. Please check with the department for proposed offerings. For further credit on different topics, students may take this course multiple times.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including SOCI 1125 and SOCI 2230.

Attribute: ARTS (p. 521)

**SOCI 4310 3 credits****Terrorism, Globalization, and Social Justice**

Students will explore the socio-economic and historical foundations of globalization, inequality, social (in)justice, resistance, and terrorism. They will analyze social (in)justice, globalization and terrorism in local and global political, ideological, and religious conflicts. Students will analyze forms of resistance, oppression, and global inequality. Finally, they will examine theories and practices of conflict resolution, global economic justice, international and inter-ethnic arenas and peace initiatives of the United Nations and other bodies. Note: This is a seminar course.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including SOCI 1125. (SOCI 2230 and 3320 recommended)

Attributes: ASTR (p. 523), ARTS (p. 521)

**SOCI 4320 3 credits****Advanced Topics in Global Studies**

Students will engage in an intensive and critical examination of a number of global issues, as selected by the instructor. Students will conduct a primary research project outside the classroom and/or in the field for a portion of the semester on a specific topic. Note: This is a seminar course. The topic(s) of study will be established in advance by the department. Please check with the department for proposed offerings. For further credit on different topics, students may take this course multiple times.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including SOCI 1125 and SOCI 3320.

Attribute: ARTS (p. 521)

**SOCI 4325 6 credits****Sociological Aspects of Community Service**

Students will gain employment experience through volunteer work at not for profit social service agencies, international organizations or other community groups. They will work to complete a mutually agreed upon project that focuses on an issue or problem faced by the host agency. Through this project they will integrate sociological theory, concepts and methods and apply to the understanding of practical social issues. Students will also be involved in classroom based analysis and reflection about the interrelationships among organizations, culture and society.

Level: UG

Prerequisite(s): 60 credits from courses at the 1100 level or higher, including both (a) SOCI 1125 and (b) SOCI 2260, PSYC 2400, or CRIM 2103.

Attribute: ARTS (p. 521)

**SOCI 4330 6 credits****Global Community Service**

Students will deepen their formal preparation for local and global citizenship and gain practical experience through a field placement, doing volunteer work as part of a team with international non-for-profit/non-governmental or other community organizations in another country. They will engage in praxis-oriented, reciprocal learning about social justice issues through the application of theoretical and sociological knowledge, concepts, and methods to the practical, everyday lives of disadvantaged people and groups. They will work to complete a mutually agreed upon project that focuses on a social justice issue or problem faced by the host agency. Students will also be involved in classroom based analysis and critical reflection about the interrelationships among organizations, cultures and global society.

Level: UG

Prerequisite(s): 45 credits from courses at the 1100 level or higher, including SOCI 3320.

Attributes: ASTR (p. 523), ARTS (p. 521)

## Spanish (SPAN)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**SPAN 1100 3 credits****Basic Spanish I**

Students who have little or no previous knowledge of Spanish will learn basic communication skills used in a Spanish cultural context. They will develop the ability to speak, comprehend, read, and write Spanish at a beginner level through various communicative tasks. Note: Any student with Grade 12 Spanish or with previous language skills meeting or exceeding the learning outcomes of SPAN 1100 is not permitted to register in this introductory course. Students with strong capabilities speaking, reading and writing in Spanish may be asked to withdraw from the course.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_3 (p. 522)

**SPAN 1101 3 credits****Basic Spanish II**

Students will build on previously acquired basic skills in Spanish and continue to develop speaking, listening, reading, and writing proficiency at a basic level through various communicative tasks. In addition, students will continue exploring the culture of Spanish-speaking peoples. Note: This course is designed for students with a basic knowledge of Spanish only. Students with strong capabilities speaking, reading and writing in Spanish may be asked to withdraw from the course.

Level: UG

Prerequisite(s): SPAN 1100, or Spanish 11 (with a grade C or higher), or assessment by instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**SPAN 2200 3 credits****Intermediate Spanish I**

Students will develop proficiency in speaking, listening, reading and writing at an intermediate level while further exploring the Spanish-speaking culture. Students are expected to converse exclusively in Spanish during class time.

Level: UG

Prerequisite(s): SPAN 1101, or Spanish 12 (with a grade C or higher), or assessment by instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**SPAN 2201 3 credits****Intermediate Spanish II**

Students will build on previously acquired skills and will become more fluent and accurate in speech and listening comprehension. They will develop reading and writing skills while increasing their understanding of modern Spanish society and culture. Students will converse exclusively in Spanish during class time.

Level: UG

Prerequisite(s): SPAN 2200, or assessment by instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**SPAN 2205 3 credits****Writing and Oral Skills for Spanish Speakers**

Students possessing a native or near-native command of oral Spanish and/or an upper intermediate level of the language will consolidate their knowledge of Spanish with a special focus on writing the language formally (i.e. spelling, orthography and punctuation, expanding vocabulary at formal registers, and broadening the range of topics used in written and oral expression). Students will gain writing skills in a simple but formal and clear style. They will also increase their awareness of the diversity of Spanish spoken in different Spanish-speaking cultures. Note: This course is designed for students possessing a native or near native command of oral Spanish.

Level: UG

Prerequisite(s): SPAN 2201, or native or near-native oral command of Spanish, or assessment test

Attributes: ASTR (p. 523), ARTS (p. 521)

**SPAN 3310 3 credits****Advanced Spanish Conversation through Film**

Students will expand their conversational proficiency through the understanding of and appreciation for Spanish-speaking cultures and communities around the globe. Students will combine language and culture through the study of popular films as rich sources of cultural information. Students will be exposed to content-based communicative language learning to acquire advanced Spanish conversational skills in meaningful contexts.

Level: UG

Prerequisite(s): SPAN 2201 or 2205 or Assessment Test

Attributes: ASTR (p. 523), ARTS (p. 521)

**SPAN 3450 3 credits****Culture and Society in the Spanish-Speaking World**

Students will deepen their understanding of Spanish-speaking cultures and communities through the study of cultural traditions, values, and norms that are most common to and shared within the Spanish-speaking world. They will examine selected portions of television programs, films, music videos, photographs, advertisements, and figurative language where these traditions, values, and norms are represented. Students will discuss, analyze, and evaluate how these traditions, values, and norms are used to organize behaviours (verbal and non-verbal), expectations, and to structure life within the Spanish-speaking world. Students will also be able to reflect on current and future interactions with Spanish-speaking people and societies. The course is taught in English and prior knowledge of Spanish is not required. Note: Students may earn credits for only one of SPAN 3450 or LANC 3450 as they are identical courses.

Level: UG

Prerequisite(s): 30 credits from courses at the 1100-level or higher

Cross-listing: LANC 3450

Attribute: ARTS (p. 521)

## Sustainable Food Systems and Security (SFSS)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables/](http://www.kpu.ca/registration/timetables/) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

**SFSS 6100 1 credit****Our Food System and Sustainability**

In this course, students will investigate the meaning of food systems and sustainability. The theoretical underpinnings of food system studies will be introduced and critically examined using interdisciplinary approaches (e.g., agriculture, anthropology, social sciences, planning, community nutrition, food security, economics, environmental resource management). Students will learn the importance of sustainability models pertaining to global resource limitations, ecosystem degradation, and societal well-being, function and development.

Level: GR

Attributes: ARTS (p. 521), F2A6 (p. 521)

**SFSS 6110 4 credits****Environment & Food Systems**

In this course, students will investigate the underlying requirements for food production, including land, water, and resources, and how the production of food has impacted these in turn. Students will learn about the relationship between food production and the environment, including the impact of climate change on food systems.

Level: GR

Prerequisite(s): SFSS 6100

Attributes: ARTS (p. 521), F2A6 (p. 521)

**SFSS 6120 3 credits****Food System Economics**

In this course, students will critically examine the economic underpinnings and outcomes of the industrial, global food system through a food security and food system sustainability lens. The economic foundation and environment required for a robust, sustainable food system will be gauged and requisite policy and regulatory strategy be explored. Through case studies, students will learn about the applicability and limitations of a variety of economic analysis tools used in food system studies.

Level: GR

Prerequisite(s): SFSS 6100

Attributes: ARTS (p. 521), F2A6 (p. 521)

**SFSS 6130 4 credits****Food System & Society**

Students will examine the nexus of food system, community and household health, food insecurity, food sovereignty, culture and food policy and politics in order to acquire a conceptual understanding of the links between the modern industrialized food system and community and population health. Students will cover topics related to the social, cultural, and health impacts of food systems as well as the effects of the socioeconomic, political, cultural and psychological factors on food choices and health. Students will evaluate current agricultural policies, examine policy barriers to alternative food systems and explore policy development and policy change.

Level: GR

Prerequisite(s): SFSS 6100

Attributes: ARTS (p. 521), F2A6 (p. 521)

**SFSS 6140 4 credits****Creating Our Food Future**

This course explores the evolution and structure of food systems through economic, social, and ecological lenses. Students will develop an understanding of the dynamics between regional and global food systems and their respective paradigms. Through the application of design-thinking methodologies, students will apply design metrics to assess the sustainability of food systems.

Level: GR

Prerequisite(s): SFSS 6100

Attributes: ARTS (p. 521), F2A6 (p. 521)

**SFSS 6180 2 credits****Community Food System- Capstone Project**

In this course, students will engage in community-based learning. They will identify, study and assess the nature and basis of a sustainable food-system challenge or opportunity in their community. Students will develop, with input from stakeholders and/or participation of relevant food system actors, a program plan (inclusive of strategic activity/ actions, roles and relationships of food system actors, timelines, budgets and budgetary consideration, and anticipated limitation, pitfalls and outcomes) addressing the challenge/ opportunity. Faculty approval of the project is required.

Level: GR

Prerequisite(s): All of SFSS 6100, 6110, 6120, 6130, and 6140

Attributes: ARTS (p. 521), F2A6 (p. 521)

## Technical Apparel Design (DETA)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**DETA 5110 3 credits****Technical Apparel in Context**

Students will examine the relationship between technical apparel and the intended context of use. They will learn to apply a human-centred systems approach to characterize human, functional, and environmental design requirements and objectives. Students will explore selected topics in ergonomics, anthropometry, psychology, thermal physiology, kinesiology, and safety as they relate to technical apparel design for recreational, occupational, athletic, survival, and therapeutic contexts.

Level: UG

Attributes: DESN (p. 521), F2A6 (p. 521)

**DETA 5120 3 credits****Technical Textile Technologies**

Students will enhance their knowledge of advances in textile technologies that are revolutionizing the technical apparel industry. They will study the properties, processing, and testing of high tech textiles and new millennium fibres for a range of applications including: athletic and recreational performance, protection, occupational, survival, medical, smart fabrics, and eco-textiles for sustainability. Students will gain an understanding of the properties that influence function and performance. They will explore ways to apply research to further promote their understanding of technical textile applications.

Level: UG

Attributes: DESN (p. 521), F2A6 (p. 521)

**DETA 5130 3 credits****Creative Innovation**

Students will explore, interpret, and conceptualize innovative processes for creative solutions in the designing of technical performance apparel. They will envision future technical apparel opportunities through evaluation of the current marketplace, interpretation of economic forecasts, sustainability issues, and target market user profiles. Students will systematize the effective application of design processes resulting in a variety of exploratory and defendable options.

Level: UG

Attributes: DESN (p. 521), F2A6 (p. 521)

**DETA 5140 3 credits****Advances in Apparel Production**

Students will research and analyze advanced production methodologies for technical apparel. They will examine technical apparel components to understand the implications of product integrity. Students will execute rapid prototyping techniques as an iterative process and evaluate production methodologies for fit, function, and environmental sustainability.

Level: UG

Attributes: DESN (p. 521), F2A6 (p. 521)

**DETA 5200 3 credits****Global Business Strategies for Technical Apparel**

Students will reach beyond existing market demands to create new opportunities. They will critique business models, leadership practices, and global strategies while considering diverse organizational, social, and cultural relationships within the technical apparel industry. Students will assess geographical, ethical, and sustainability issues related to the use and function of technical apparel in global sourcing, trade negotiations, and logistical planning.

Level: UG

Prerequisite(s): DETA 5110, 5120, 5130 and 5140.

Attributes: DESN (p. 521), F2A6 (p. 521)

**DETA 5210 3 credits****User Experience**

Students will apply and critique methods of engaging with and learning from technical apparel users throughout an iterative design process. They will formulate and implement testing strategies to evaluate user experience of technical apparel products.

Level: UG

Attributes: DESN (p. 521), F2A6 (p. 521)

**DETA 5230 3 credits****Strategic Design Direction**

Students will research market opportunities and critique creative strategies, technological advances, and leadership approaches in the design of technical performance apparel. They will evaluate principles of research design methodology for the purposes of measuring potential innovation and creative solutions. Students will, through divergent thinking and exploration, debate strategic design directions and research to inform the final capstone project in DETA 5300.

Level: UG

Attributes: DESN (p. 521), F2A6 (p. 521)

**DETA 5300 9 credits****Capstone Project**

Students will develop and conduct a complete design process for technical apparel based on approval of the capstone proposal developed in DETA 5230, Strategic Design Direction. They will apply the key elements of an iterative design process to generate a detailed, responsive design and an associated business strategy. Students will incorporate an understanding of the human-centred systems approach, current textile technologies, apparel production standards, user and market analyses, business strategies, project management, and innovation.

Level: UG

Prerequisite(s): DETA 5200, 5210 and 5230.

Attributes: DESN (p. 521), F2A6 (p. 521)

## Technical Management & Services (TMAS)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**TMAS 5100 3 credits****Business Planning and Performance for Technical Businesses**

Students in this course will explore and learn the concepts, issues, and themes related to analyzing business performance, business planning, strategy, and entrepreneurship. Students will develop their ability to analyze business performance and develop business plans that are aligned with the organizations strategic and financial goals. Various life phases of organizations will be explored to build an understanding of the impact on business performance and planning. Students will be encouraged to combine and apply their creativity and technical skills to develop a business strategy including, strategic and financial objectives for a technology or technical service based organization. Note: This course may be offered in compressed mode. Consult the current timetable.

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

**TMAS 5110 3 credits****Managing Technical Business Growth**

Students will explore and evaluate challenges in the management of technology, engineering and technical services organizations as a business grows and develops in the face of growing complexity. Students will assume the roles of senior technical managers dealing with typical problems in a department within an environment of rapid change and growth: developing and implementing new infrastructure (business models, systems, processes, policies, practices), managing the deployment of resources, management of change, and managing project/technical professionals. Note: This course may be offered in compressed mode. Consult the current timetable.

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

**TMAS 5120 3 credits****Business Law for Technical Management and Services**

This course addresses legal issues commonly encountered by technical professionals, best practices in identifying and mitigating legal risks, as well as strategies to avoid costly legal errors and to recognize when professional legal advice is necessary. Students will develop legal reasoning skills by examining various areas of the law that can interact to affect a single business transaction in a technical business environment. Note: This course may be offered in compressed mode. Consult the current timetable.

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

**TMAS 5130 3 credits****Consulting and Client Management Practices**

Student will use an applied approach in developing practiced knowledge of the methodologies, tools, techniques and standards required for the professional consultant. The five stages of the consulting process will be leveraged while working as part of a consulting team. Students will develop an understanding of and practice the skills required to effectively work with external and internal clients. Emphasis will be placed on the particular consulting skills required to manage client interactions and engagement. Note: This course may be offered in compressed mode. Consult the current timetable.

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

**TMAS 5140 3 credits****Sustainable Operations**

This course develops students ability to define and analyze sustainable business practices within the value chain of the product or service in order to develop and integrate sustainable practices at each step of the value chain. Students will learn how to measure and account for sustainability initiatives as a means of creating value at the operations management level within an organization. Students will be challenged to consider the sustainability challenges from the different stakeholder perspectives and priorities in developing and implementing sustainable operational practices and initiatives.

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

**TMAS 5150 3 credits****New Product and Services Development**

Students will learn and apply the new product and service development processes, as well as the tools and techniques associated with launching them. They will learn how to select and apply quantitative and qualitative approaches for analyzing market opportunities, as well as the approaches and methods to design, test, and introduce new products and services. Students will learn how to lead the organization and its stakeholders in the new product and services development process.

Level: UG

Attributes: BUSI (p. 521), F2A9 (p. 521)

## Theatre (THEA)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**THEA 1110 3 credits****Theatre in Context 1**

Students will study selected periods of theatre with a focus on the socio-cultural contexts. Emphasis will be placed on the theories and practices that have shaped contemporary theatre. This survey course investigates global theatrical performance traditions as well as ritual performance processes. This course will involve field trips to performances in the Lower Mainland; additional fees will apply to meet field trip expenses. This is not an acting course.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**THEA 1120 3 credits****Acting for Stage and Screen 1**

Students are introduced to the actor's creative process and to the basics of performance for stage and screen. Through studio and on-camera exercises, improvisations, and in-class performances, this course integrates the development of acting resources with the exploration of acting as a collaborative process. This course will involve field trips to performances in the Lower Mainland; additional fees will apply to meet field trip expenses.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521)

**THEA 1130 6 credits****Theatre Performance 1**

This course involves intense practical experience in theatre performance and production. Students apply theories and practices of theatre performance to the development and presentation of an extended public performance. By undertaking performance or production responsibilities, students develop theatre knowledge and skill. While students who focus on production are not required to act, those who focus on performance will be required to do some production work. Students are required to attend performances in the Lower Mainland; additional fees will apply to meet field trip expenses.

Level: UG

Prerequisite(s): Audition or interview, and permission of the Instructor

Attributes: ASTR (p. 523), ARTS (p. 521)

**THEA 2120 3 credits****Acting for Stage and Screen 2**

Working with other actors in ensemble relationships, students explore the principles of creating and sustaining dramatic action by applying acting theory to the preparation and presentation of scenes for both stage and screen. This course will involve field trips to performances in the Lower Mainland; additional fees will apply to meet field trip expenses.

Level: UG

Prerequisite(s): THEA 1120

Attributes: ASTR (p. 523), ARTS (p. 521)

## Welding (WELD)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables/) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**WELD 1010 1 credit****Worksite Safety and Orientation**

Students will describe the scope of the welder trade in British Columbia. They will identify and respond to workplace hazards. Students will safely use and maintain welders' hand tools, power tools, and personal safety equipment. They will study the role of WorkSafeBC and their responsibility to apply its regulations and policies. Students will review basic occupational Mathematics.

Level: VO

Attribute: TRAD (p. 521)

**WELD 1115 4 credits****Oxy Fuel Welding and Cutting**

Students will learn the function of each component in an oxy fuel welding and cutting system, and will assemble, test, adjust and operate this equipment. They will study the properties of high pressure oxygen, acetylene and propane gases, and will learn and apply oxy fuel safety standards. Students will develop skill by completing a variety of welding and cutting exercises.

Level: VO

Prerequisite(s): WELD 1010

Attribute: TRAD (p. 521)

**WELD 1120 4 credits****Basic Shielded Metal Arc Welding**

Students will study shielded metal arc welding (SMAW) theory and applications. They will select, set up and adjust SMAW power sources. Students will learn the composition and classification of SMAW electrodes. They will develop skill by completing a variety of welded joints. Students will learn to apply SMAW safety standards.

Level: VO

Prerequisite(s): WELD 1115

Attribute: TRAD (p. 521)

**WELD 1130 4 credits****Basic Gas Metal Arc Welding**

Students will study basic gas metal arc welding (GMAW) theory and application. They will select, set up, and adjust GMAW power sources and wire feeders. Students will learn the composition and classification of GMAW electrode wires and shielding gases. They will develop skill by completing a variety of weld joints. Students will learn and apply GMAW safety standards.

Level: VO

Prerequisite(s): WELD 1120

Attribute: TRAD (p. 521)

**WELD 1140 1 credit****Material Handling**

Students will study hand and power rigging techniques used by welders and fabricators. They will select and use slings, shackles, spreaders and related rigging hardware. Students will learn the concepts of safe working load, centre of gravity, and rigging limitations. They will learn and apply the Occupational Health and Safety Regulation and Guidelines of WorkSafe BC.

Level: VO

Attribute: TRAD (p. 521)

**WELD 1200 1 credit****Air Arc and Plasma Arc Cutting**

Students will study air arc and plasma arc theory and application. They will select, set up, and operate plasma arc and air arc power sources. Students will use and maintain torches and related equipment. They will develop skills by cutting carbon steel, stainless steel and aluminum plate. Students will learn and comply with air arc and plasma arc safety standards.

Level: VO

Attribute: TRAD (p. 521)

**WELD 1210 4 credits****Advanced Shielded Metal Arc Welding**

Students will study advanced Shielded Metal Arc Welding (SMAW) theory and application. They will describe the major components and operating principles of SMAW power sources. Students will review the composition and application of SMAW electrodes. They will further develop their skills by completing a variety of welded joints.

Level: VO

Prerequisite(s): WELD 1200

Co-requisite(s): WELD 1220

Attribute: TRAD (p. 521)

**WELD 1220 1 credit****Read Technical Drawings**

Students will read and interpret fabrication drawings. They will study the principles of orthographic and pictorial projections, including all lines, views and related information. Students will interpret symbols, abbreviations and material specifications. They will identify and solve dimensioning problems.

Level: VO

Co-requisite(s): WELD 1210

Attribute: TRAD (p. 521)

**WELD 1230 4 credits****Advanced Semi-Automated Welding**

Students will study advanced semi-automatic welding theory and application. They will develop the skill and knowledge needed to produce high-quality welds using a number of standard welding processes. Students will have their work visually and destructively tested.

Level: VO

Prerequisite(s): WELD 1220

Attribute: TRAD (p. 521)

**WELD 1240 1 credit****Basic Metallurgy**

Students will study the physical and mechanical properties of ferrous and non-ferrous metals. They will describe the manufacture and processing of iron and steel. Students will learn to identify metals using practical techniques. They will classify and describe applications of iron and steel products.

Level: VO

Prerequisite(s): WELD 1220

Attribute: TRAD (p. 521)

**WELD 1250 2 credits****Stationary Shop Equipment**

Students will select, set up and operate stationary fabrication equipment. They will use and maintain press drills, stationary saws, iron workers and power squaring shears. Students will develop skill by working on individual and group projects. They will comply with fabrication machinery safety regulations.

Level: VO

Co-requisite(s): WELD 1230 and 1240

Attribute: TRAD (p. 521)

**WELD 1300 4 credits****Welding and Metal Fabrication Essentials**

Students will follow safety procedures and use oxy-fuel to heat and cut different thicknesses of metal. They will describe the theory and characteristics of combustible gas, electric arc and metallurgy and their chemical reactions. Students will use a variety of welding processes and identify testing equipment and methods that are used to test weld specimens. They will use hand and power tools to complete metal projects to prescribed specifications.

Level: UG

Attribute: TRAD (p. 521)

**WELD 2100 5 credits****Shielded Metal Arc Pipe Welding**

Students will study pipe welding theory technique and safety using the Shielded Metal Arc Welding process (SMAW). They will learn appropriate tool use, pipe groove preparation and fitting techniques. Students will work with a variety of pipe diameters, schedules and electrodes. They will develop skill by welding pipe in all positions. Students will visually and destructively test their work

Level: VO

Prerequisite(s): WELD 1210

Co-requisite(s): WELD 2110

Attribute: TRAD (p. 521)

**WELD 2110 1 credit****Welding Standards and Testing**

Students will study destructive and non-destructive testing methods applied to welded connections. They will learn and comply with welding codes and standards for structural steel, boilers and piping. Students will learn the importance of quality control and management in manufacturing, construction and maintenance operations. They will describe welding testing and certification

Level: VO

Prerequisite(s): WELD 1210 and 1230

Co-requisite(s): WELD 2100

Attribute: TRAD (p. 521)

**WELD 2120 2 credits****Gas Metal Arc Alloy Welding**

Students will study advanced Gas Metal Arc Welding (GMAW) techniques used to weld aluminum, stainless steel and alloy steel products, and the identification and correction of weld faults. They will review constant voltage power sources and specialized wire feeders. Students will select and use a variety of alloy electrode wires and shielding gases. They will develop skill by safely welding aluminum, stainless steel and alloy steels

Level: VO

Prerequisite(s): WELD 2100 and 2110

Co-requisite(s): WELD 2130

Attribute: TRAD (p. 521)

**WELD 2130 1 credit****Piping Drawings**

Students will read and interpret pipe fabrication and installation drawings. They will learn orthographic and isometric formats. Students will use symbols and terminology specific to pipe work. They will identify and describe applications for common pipe fittings and components and use piping mathematics. Students will lay out elbows, tees and offsets.

Level: VO

Prerequisite(s): WELD 2100 & 2110

Co-requisite(s): WELD 2120

Attribute: TRAD (p. 521)

**WELD 2140 2 credits****Advanced Flux Core Arc Welding**

Students will study advanced Flux Core Arc Welding (FCAW) techniques used in heavy machinery and structural fabrication. They will review constant voltage power source and wire feeder theory. Students will select and use gas shielded and self shielded electrodes. They will develop skill by completing a variety of welded joints to high standards using the appropriate safety equipment. Students will visually and destructively test their work.

Level: VO

Prerequisite(s): WELD 2120 and 2130

Co-requisite(s): WELD 2150

Attribute: TRAD (p. 521)

**WELD 2150 1 credit****Alloy Metallurgy**

Students will study the microstructure of ferrous and non-ferrous alloys. They will describe the heat treatment of steel and aluminum. Students will identify the effects of alloy content on the weldability of steel and aluminum.

Level: VO

Prerequisite(s): WELD 2120 and 2130

Co-requisite(s): WELD 2140

Attribute: TRAD (p. 521)

**WELD 2160 2 credits****Basic Gas Tungsten Arc Welding**

Students will study Gas Tungsten Arc Welding (GTAW) theory and application. They will select, setup and adjust high frequency power sources. Students will learn the composition, classification and application of tungsten electrodes, shielding gases and filler material. They will develop skill by practicing a variety of welded joints on mild steel, stainless steel and aluminum using the appropriate safety equipment. Students will learn and apply GTAW regulations.

Level: VO

Prerequisite(s): WELD 2140 and 2150

Attribute: TRAD (p. 521)

**WELD 2200 2.5 credits****Shielded Metal Arc Alloy Welding**

Students will study alloy steel and stainless steel welding using the Shielded Metal Arc Welding (SMAW) process. They will select and use specialized coated electrodes. Students will prepare and fit alloy plate and pipe. They will develop skill by completing a variety of welded joints, and identify and correct weld faults. Students will visually and destructively test their work.

Level: VO

Prerequisite(s): WELD 2160

Co-requisite(s): WELD 2210

Attribute: TRAD (p. 521)

**WELD 2210 1 credit****Advanced Alloy Metallurgy**

Students will study the weldability of non-ferrous and reactive metals. They will learn the physical and mechanical properties of nickel, copper, magnesium, titanium and zirconium alloys. Students will describe joint geometry, joint preparation, cleaning and shielding methods. They will identify and correct welding problems.

Level: VO

Prerequisite(s): WELD 2160

Co-requisite(s): WELD 2200

Attribute: TRAD (p. 521)

**WELD 2220 3 credits****Gas Tungsten Arc Alloy Welding**

Students will study alloy steel and stainless steel welding using the Shielded Metal Arc Welding (SMAW) process. They will select and use specialized coated electrodes. Students will prepare and fit alloy plate and pipe. They will develop skill by completing a variety of welded joints, and identify and correct weld faults. Students will visually and destructively test their work.

Level: VO

Prerequisite(s): WELD 2200 and WELD 2210

Co-requisite(s): WELD 2230

Attribute: TRAD (p. 521)

**WELD 2230 1 credit****Plate and Pipe**

Students will study parallel line development, radial line development and triangulation. They will lay out and develop offsets, cones and square to round transitions. Students will solve angles, circumference and true lengths required for pipe and plate development.

Level: VO

Prerequisite(s): WELD 2200 and WELD 2210

Co-requisite(s): WELD 2220

Attribute: TRAD (p. 521)

## Womens Studies (WOMN)

Registration in some course sections is restricted to students in particular programs. See Timetables - [kpu.ca/registration/timetables](http://www.kpu.ca/registration/timetables) (<http://www.kpu.ca/registration/timetables/>) - for current section information.

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**WOMN 2200 3 credits****Footsteps of the Crone: Creative Teaching & Learning**

Students will explore teaching and learning theories from crone wisdom through the ages by mothers and grandmothers, to modern feminist-oriented teaching and learning theories. They will use a crone wisdom lens to assess learning needs and preferences of people of all ages. Students will develop structured and informal learning plans to meet the educational needs of people.

Level: UG

Attribute: HLTH (p. 521)

**WOMN 3100 3 credits****Conceptual Traps & Health Care**

Students will apply feminist, critical, environmental, change, and women-centered leadership theories in analyzing how patriarchal and capitalistic values affect local, regional, provincial, and national health care policy. The roots of failed delivery systems will be analyzed. Proposals will be developed for the innovative delivery of psychiatric/mental health nursing services in select communities, based on theories covered in class.

Level: UG

Prerequisite(s): (ENGL 1100 for BPN students) or (CAHS 3500 for RPN students)

Attribute: HLTH (p. 521)

## Writing (WRTG)

Visit the BC Transfer Guide - [bctransferguide.ca](https://www.bctransferguide.ca) (<https://www.bctransferguide.ca/>) - for information about course transfer in B.C.

**WRTG 1100 3 credits****Writing for University**

Students will focus on reading, writing, and speaking as an academic practice. Through texts drawn from various disciplines, students will explore and recognize common rhetorical and structural patterns in contemporary academic writing; they will, in turn, practice employing these patterns in their own written and oral work. NOTE: This course is offered as a supplement to ENGL 1100 for students who wish to do additional work on their academic writing and communication skills.

Level: UG

Attributes: ASTR (p. 523), ARTS (p. 521), PW\_3 (p. 522)

# COURSE INFORMATION

The course descriptions in the University Calendar are extracted from KPU's official Course Outlines. To obtain copies, see Requesting Official Course Outlines (p. 780).

For schedule information, please see the current Timetable (<http://www.kpu.ca/registration/timetables/>).

- Mathematics Alternatives Table (p. 779)
- Requesting Official Course Outlines (p. 780)

## Mathematics Alternatives Table

Each row lists alternative ways to meet a mathematics requirement for admission or course prerequisite (the minimum acceptable grade for each course is indicated in brackets).

For example, the requirement 'Level C1 as defined in the Math Alternatives Table' is fulfilled by any of the courses or tests listed on Level C1. In addition, each Requirement Level is fulfilled automatically by any Requirement Level higher in the table. For example, the requirement 'Level C1 as defined in the Math Alternatives Table' is fulfilled by any of the courses or tests listed on Levels A1 or B1, as well as C1.

Questions about mathematics prerequisites may be directed to Academic Advising [kpu.ca/advising](http://www.kpu.ca/advising/) (<http://www.kpu.ca/advising/>)

Requirement Level	High School Courses	Assessment Tests	MATQ Courses	MATH Courses
	One of: MATH 1120 (C), MATH 1130 (C), or MATH 1140 (C) fulfills the math requirement for any KPU course that has high school math prerequisites.			
A1	One of: Pre-Calculus 12 (B), Calculus 12 (C), IB Mathematics (HL) (B), IB Further Math (HL) (B), AP Calculus AB 12 (B), AP Calculus BC 12A (B), AP Calculus BC 12B (B), or Principles of Mathematics 12 (B)	Math Placement Test Level D <sup>1</sup>		MATH 1112 (C)

B1 One of: Pre-Calculus 12 (C+), or Principles of Mathematics 12 (C+)

C1 One of: Pre-Calculus 12 (C), Pre-Calculus 11 (B), IB Mathematics (SL) (B), Principles of Mathematics 12 (C), or Principles of Mathematics 11 (B)

Math Placement Test Level C<sup>1</sup>

One of: MATQ 1093 (C), or MATQ 1099 (B)

One of: MATH 1102 (C), or MATH 1117 (C)

D1 One of: Foundations of Mathematics 11 (B), Foundations of Mathematics 12 (C), IB Mathematical Studies (SL) (C), Applications of Mathematics 12 (B), or Applications of Mathematics 11 (A)

One of: MATQ 1094 (C), or MATQ 1099 (C)

<b>E1</b>	One of: Pre-Calculus 11 (C), Foundations of Mathematics 11 (C+), IB Mathematics (SL) (C), Principles of Mathematics 12 (P), Principles of Mathematics 11 (C), Applications of Mathematics 12 (C), or Applications of Mathematics 11 (C)	Math Placement Test Level B <sup>1</sup>	MATQ 1089 (C+)
<b>F1</b>	Foundations of Mathematics and Pre-Calculus 10 (B)	Academic Career Preparation Math Assessment Test Part 2: Algebra	MATQ 1089 (C)

<b>G1</b>	One of: Foundations of Mathematics and Pre-Calculus 10 (C), Foundations of Mathematics 11 (C), Apprenticeship and Workplace Mathematics 12 (C), Apprenticeship and Workplace Mathematics 11 (B), Apprenticeship and Workplace Mathematics 10 (B), Principles of Mathematics 10 (C), Essentials of Mathematics 12 (C), Essentials of Mathematics 11 (B), or Essentials of Mathematics 10 (B)	One of: Math Placement Test Level A <sup>1</sup> , or Academic Career Preparation Math Assessment Test Part 1: Arithmetic	MATQ 1079 (C+)
-----------	---	---	----------------

- <sup>1</sup> Requirements for Math Placement Test:
- Level D: 11/15 on Part C of Test; 11/20 on Part D of Test.
  - Level C: 11/15 on Part C of Test.
  - Level B: 10/15 on Part A of Test; 10/15 on Part B of Test.
  - Level A: 10/15 on Part A of Test.

For further information about KPU's Assessment Tests, see [kpu.ca/assessment-testing-services/](http://kpu.ca/assessment-testing-services/)

## Requesting Official Course Outlines

To request an official KPU course outline, students must send an e-mail to [student.records@kpu.ca](mailto:student.records@kpu.ca) from their KPU e-mail account (to verify status as a current or former KPU student). In the email, please include the following information to avoid delay in processing the request:

- Your full name as it was when you were a student at KPU
- Your 9-digit KPU student number
- The subject code and course number for each course outline you require, as listed on your transcript, e.g. ENGL 1100

- The name and e-mail address of the person(s) or institution(s) to receive the course outline(s)

Requests are typically completed within 10 business days.

# GLOSSARY

---

## **Academic Advisor:**

University staff that are available to guide students in selecting and planning effective programs of study for degree completion, career training and university transfer through individual appointments, as well as to provide referrals to other members of the university community.

## **Academic Standing:**

Students must maintain an Institutional CGPA of at least 2.0 (C average) in order to stay in Good Academic Standing. Students who fall below this Institutional CGPA may be placed on Academic Warning and then Academic Probation before being Required to Withdraw. See also Grade Point Average (GPA).

## **Academic Year:**

The period from September 1 through the following August 31. The Academic Year begins with the Fall Semester from September through December, followed by the Spring Semester from January through April, and lastly the Summer Semester from May through August.

## **Add/Drop Period:**

The period at the beginning of each semester during which students can make adjustments to their schedule by adding or dropping courses.

## **Admission:**

The decision to admit a student into a Faculty, School, or program after all requirements for admission have been satisfied.

## **Admission Requirements:**

Requirements, including academic and non-academic that must be fulfilled to qualify for admission to the University and a program.

## **Adult Graduation Diploma:**

Enables adult learners to complete their BC Ministry of Education secondary school graduation requirements in order to enter post-secondary studies or the workforce. Length of program varies.

## **Advanced Certificate:**

In some programs, students may complete additional specialized courses after obtaining a certificate, and work towards the completion of an advanced certificate. Length of program: up to 18 months.

## **Application for Admission:**

At KPU, a formal request, or application for admission, is required of individuals who want to pursue undergraduate, vocational or preparatory studies at KPU. KPU's application for admission is available online at [kpu.ca/apply](http://www.kpu.ca/apply/) (<http://www.kpu.ca/apply/>).

## **Apprenticeships:**

An apprenticeship is a combination of on-the-job training and classroom learning that leads to a trade credential – or “ticket”. The Industry Training Authority (ITA) leads and coordinates British Columbia's skilled trades system. Length of program varies.

## **Associate's Degree:**

An associate's degree consists of 60 credits of study prescribed by the Ministry of Education in arts or science. Most BC universities will grant 60 transfer credits to holders of an associate's degree, even if all the courses taken towards the associate's degree do not transfer individually to the receiving institution.

## **Award:**

A monetary or non-monetary presentation recognizing achievement that is not based solely on academic performance or financial need.

## **Bachelor's Degree:**

A Baccalaureate (or Bachelor's) degree combines academic theory and applied skills development in a curriculum that will provide the foundation for a career or graduate studies. It is made up of a minimum of 120 credits and takes four to five years of full-time studies to complete. Students who have met the GPA requirements and wish to continue studies at the graduate level may apply for admission to Master's degree or Doctoral degree (PhD) programs after completing the Baccalaureate Degree.

## **Bursary:**

A monetary award based primarily on student financial need as demonstrated through an assessment of student financial resources and expenses for the applicable study period.

## **Certificate:**

A certificate is generally a 30 credit program that takes 6-12 months of full-time studies to complete. A Certificate prepares students for a wide variety of employment categories. Some of KPU's certificate programs also allow students to progress into diploma and degree programs.

## **Certificate of Completion:**

Success is not always measured by letter grades but through demonstration that a student has mastered a particular skill or learning objective. This type of learning at KPU is often formally recognized through a certificate of completion. Length of program varies.

## **Citation:**

Citations offer opportunities to work within a number of sectors including building construction, horticulture and metal trades. Length of a citation program is typically less than 6 months.

## **Confirmation Deposit:**

A non-refundable, non-transferrable payment that signifies acceptance by the applicant of an offer of admission by the University.

## **Continuous Instructional Cycle:**

Instructional offerings that utilize rolling admission whereby each student starts and ends courses on an individual basis. Continuous instructional cycle offerings have a limited number of seats that are continuously filled as space becomes available.

## **Convocation:**

The ceremony where students are awarded and conferred credentials by the Chancellor of the University.

## **Co-operative Education:**

Co-operative education gives students the opportunity to combine theory with on-the-job training. Co-op combines on-campus classes with periods of paid, off-campus, career-related work experience.

## **Co-requisite:**

Course that must be taken at the same time, or previous to, a currently registered course (If taken previously, a minimum final grade of C is required to fulfill a co-requisite.).

## **Course Load:**

The maximum course load is normally restricted to 17.5 credits per semester; however a student's average course load is typically 3 – 5 courses per semester. Some programs may require a specific course load.

**Credential:**

The credential is awarded upon completion of the University's and the program's academic and curricular requirements. A credential can be a Certificate of Completion, Citation, Certificate, Diploma, Associate's Degree, Bachelor's Degree, Post-Baccalaureate Certificate, or Post-Baccalaureate Diploma. All formal KPU credentials must be approved by the University Senate.

**Credits/Credit Hours/Semester Credit Hours:**

A specific numerical value assigned to a course, generally corresponding to either the number of contact hours per week throughout the semester or to some other metric of student engagement. Most courses at KPU are 3 credits. Credit values for courses are used in the calculation of GPA and fees, as well as in the evaluation of credits required for a credential. A student that has accrued fewer than 30 credits is classified as a first-year student; a second-year student is one that has accrued between 30 and 59 credits; a third-year student is one that has accrued between 60 and 89 credits; and a fourth-year student is one that has accrued 90 or more credits.

**CRN:**

An acronym that stands for 'Course Reference Number'. This is the number that is attached to a specific section of a course and used to register in a particular section of a course.

**Curriculum Effective Date:**

The time at which the given set of requirements to graduate with a particular credential was initially implemented.

**Department:**

An educational administrative sub-unit of a Faculty and/or School within a university dealing with a particular field of knowledge.

**Diploma:**

A diploma is generally a 60 credit program that takes two years of full-time study to complete. A diploma enables graduates to pursue many different careers or progress into a Bachelor's Degree program.

**Discontinuance:**

Permanent closure of a program which includes removal from future academic calendars and cessation of admission or declaration to the designated program.

**Drop:**

De-registering from a course before the end of the add/drop period (no record of the withdrawal is recorded on the student's transcript).

**Elective:**

A course which is freely selected by a student to fulfill degree requirements. All degree programs include some required classes and some electives. Electives may or may not be transferable to the chosen institution.

**Faculty:**

An educational administrative division constituted by the Board of the University. For example, the Faculty of Arts.

**Faculty Member:**

Instructors at KPU are known as faculty members.

**Fixed Term:**

A period of study that begins and ends on set dates that are usually different from KPU's regular semester dates. Generally applicable to Trades and Apprenticeship programs that have a limited number of seats

and for which admission involves a selection process based on specific requirements.

**Full-time:**

A student who is enrolled in nine or more credit hours in a semester is considered to be full-time at KPU. The minimum course load to qualify for a student loan is nine post-secondary, undergraduate-level credits.

**Grade Points:**

A specific numerical value associated with the letter grade assigned to a course. Provides a basis for calculating grade point averages.

**Grade Point Average (GPA):**

A weighted average calculated by multiplying the grade points for a course by the number of semester credit hours assigned to that course, adding those values for a set of courses, and dividing the result by the total number of semester credit hours for those courses. Separate GPA calculations are made for each academic level.

**Institutional Cumulative Grade Point Average (Institutional CGPA)** The GPA calculated for all courses taken at KPU.

**Program Grade Point Average (Program GPA)** The GPA calculated for all courses applicable towards graduation with a specific credential.

**Term Grade Point Average (Term GPA)** The GPA calculated for all courses taken at KPU in a specific term.

**Transfer Grade Point Average (Transfer GPA)** The GPA calculated for all transfer and PLA courses.

**Overall Grade Point Average (Overall GPA)** The GPA calculated for all courses.

**Graduation:**

Is the term used to acknowledge that a student has met program requirements, and the credential has been audited by the Office of the Registrar and conferred by KPU's Senate.

**Grant:**

A monetary award that is provided to a student as targeted funding in support of specific student populations and their identified needs.

**Incidental Fees:**

Fees for discretionary services (such as transcripts, testing services, etc.), as well as fines and/or penalties.

**Internship:**

A short work term where students complete a predetermined number of hours working in a position related to their field of study.

**ITA-ID:**

An acronym that stands for the Industry Training Authority Individual Identification Number, formerly known as the Trade Worker ID (TWID) number.

**Late Registration Period:**

The period after which the add/drop period has ended, for which registration in a course requires the permission of the instructor, Dean and/or University Registrar.

**Limited Intakes:**

Programs for which a limit has been set on the number of students admitted per application cycle.

**Lower Division Requirements:**

These are requirements that should be completed within the first 60 credits of a Baccalaureate degree; also referred to as 1st-year and 2nd-

year requirements. Generally, these requirements are met with courses numbered 1100 - 2999.

**Major:**

A major is the principal subject or discipline of study within a Bachelor's degree.

**Mandatory Student Fees:**

Required fees other than tuition, including student fees (such as library, technology and student life fees), required course materials, and Kwantlen Student Association (KSA) fees.

**Minor:**

A minor is a secondary subject or discipline of study within a Bachelor's degree.

**Open Intakes:**

Programs for which a limit has not been set on the number of students admitted per application cycle.

**Part-Time:**

At KPU, a student who is registered in less than 9 credits hours of study in a semester is considered a part-time student.

**Policies:**

All official policies related to being a student at KPU can be found at [kpu.ca/policies](http://kpu.ca/policies). These include information about tuition fees, grades, and withdrawal from courses.

**Post-Baccalaureate:**

An academic program designed for those who already have an undergraduate degree or the equivalent. This is a focused addition to an undergraduate degree, to help enhance employment opportunities or prepare for graduate-level work. Length of program varies.

**Preparatory:**

Students can prepare for vocational or undergraduate studies by upgrading specific courses, or earn a specific preparatory credential.

**Prerequisite:**

Course that must be successfully completed previous to registering in a given course. For example, a student must successfully complete ENGL 1100 before registering in ENGL 2300. A prerequisite course must be completed with a minimum grade of C unless otherwise stated. Prerequisite requirements can be found in the Course Description section of the University Calendar.

**Prior Learning Assessment (PLA):**

A process used to grant credits towards a certificate, diploma, or degree in recognition of learning gained through previous work, training, or informal experience.

**Program:**

A defined set of courses of instruction that lead to a credential approved by KPU Senate. A program or units of study also consists of a) a unit of study, under the governance of Senate, that results in the granting of a degree or a non-degree credential or b) a unit of study that constitutes the designation of major or minor, or c) a unit of study that constitutes a department.

**Program Requirements:**

Curricular stipulations that must be fulfilled by a student in order to become eligible to receive a particular credential.

**Program Change:**

Any changes to a program that require re-approval by Senate.

**Program Suspension:**

A temporary cessation of a program whereby students will not be admitted to or declare into a program for a defined period of time.

**Red Seal:**

This is the inter-provincial standard of excellence in the trades. An individual may get their Red Seal endorsement by successfully completing the required examination.

**Registration:**

The process of enrolling in a specific course. At KPU this is done online for most courses.

**Scholarship:**

A monetary award based primarily on academic achievement and, in some cases, in combination with demonstrated leadership or community service.

**School:**

An educational administrative division that may be constituted by the Board of the University to function in the full capacity of a Faculty. For example, the School of Business. Alternatively, a School may be an educational administrative unit which functions within a Faculty, similar to a Department.

**Sponsoring Agency:**

A third party agency providing sponsorship funding for KPU students.

**Tuition Fees:**

Fees charged to cover the instruction of a learning activity, and not assignable to a service (related or otherwise) associated with the learning activity.

**Undergraduate:**

A student admitted to a post-secondary institution who has not yet earned a bachelor's or equivalent degree. Also, the level of post-secondary studies below a Master's degree.

**University Calendar:**

The University's official publication of academic programs, courses, and regulations. It includes all the academic programs at KPU, the requirements for admission, the curricular requirements for graduation, the dates of the academic terms, the fees, and University rules and regulations. It is published annually by the University Registrar and found online at: [kpu.ca/calendar](http://kpu.ca/calendar)

**Upper Division Requirements:**

These are requirements that should be completed after the first 60 credits of a Baccalaureate degree; also referred to as 3rd-year and 4th-year requirements. Generally, these requirements are met with courses numbered 3000 - 5999.

**Vocational:**

A combination of education and training with an emphasis on practical skills and knowledge specific to a particular vocation or occupational field.

**Withdraw:**

To formally remove oneself from a class via the online registration system. If this is done prior to the posted deadline, a 'W' will be shown on the transcript, and the course will not be used in the calculation of the grade point average.

# APPRENTICESHIPS

An apprenticeship is a combination of on-the-job training and classroom learning that leads to a trade credential – or “ticket”. The Industry Training Authority (ITA) (<https://www.itabc.ca/>) leads and coordinates British Columbia’s skilled trades system. ITA works with employers, apprentices, industry, labour, training providers such as KPU, and government to issue credentials, support apprenticeships, fund programs, set program standards and increase opportunities in the trades. The following apprenticeship training programs are offered periodically through KPU. KPU does not issue apprenticeship credentials; this is done by the ITA.

## Requirements and Programs

- Apprenticeship Fees (p. 785)
- Apprenticeship Grades and Records (p. 786)
- Apprenticeship in Arborist Technician (p. 786)
- Apprenticeship in Automotive Service Technician (p. 788)
- Apprenticeship in Building Envelope Technician (p. 790)
- Apprenticeship in Carpentry/Building Construction (p. 790)
- Apprenticeship in Climbing Arborist (p. 792)
- Apprenticeship in Construction Electrician (p. 794)
- Apprenticeship in Industrial Mechanic/Millwright (p. 796)
- Apprenticeship in Landscape Horticulturist (p. 797)
- Apprenticeship in Metal Fabrication (p. 799)
- Apprenticeship in Parts & Warehousing (p. 800)
- Apprenticeship in Plumbing (p. 801)
- Apprenticeship in Production Horticulturist (p. 803)
- Apprenticeship in Welding (p. 804)

## Apprenticeship Training Overview

There are three major components of apprenticeship training:

- A formal agreement between the employer, apprentice and Industry Training Authority
- In-school technical training
- Work-based training (on the job)

## Role of an Apprentice

Apprentices have an employer to sponsor them and are registered with the Industry Training Authority (ITA) ; more importantly they have made a commitment to learn applied skills both on the job and in school. To enhance your understanding of the requirements to earn certification it is recommended you review the Industry Training Program Profile for your trade on the Industry Training Authority website ([www.itabc.ca](http://www.itabc.ca) (<http://www.itabc.ca>)).

## In-School Technical Training

As an apprentice discuss appropriate times with your employer to attend in-school technical training for approximately 6 - 10 weeks per year over a four year period. To progress, an apprentice must meet ITA program requirements for the in-school technical training and standardized level exam that includes both practical and theoretical components. KPU offers in-school apprentice technical training in the skilled trades listed below.

## Work-Based Training

All apprenticeship programs have identified work-based training. On-the-job training provides an opportunity for students to apply the theory that they learned through their in-school technical training into practice. Track your hours/work with your sponsor and report this information to the ITA every 6 to 12 month. Review your apprentice transcript on line through ITA Direct Access ([www.itadirectaccess.ca](http://www.itadirectaccess.ca) (<http://www.itadirectaccess.ca>)) to ensure your information is up-to-date and accurate.

## Apprenticeship Fees

KPU regulations regarding fee payment, withdrawals and refunds of tuition are distinct for apprenticeship programs.

## Fee Payment

Students registering for an apprenticeship level must complete the Apprenticeship Registration Form and submit it to Apprentice Services ([kpu.ca/apprentice](http://www.kpu.ca/apprentice) (<http://www.kpu.ca/apprentice/>)) for registration processing.

## Apprentice Evaluation Fee

For each program registration, students will be assessed a \$10.00 Apprentice Evaluation Fee, in addition to tuition and student fees.

## Refunds and Fee Adjustment Rules

Full refunds will be given to individuals that are waitlisted for an apprenticeship level and not eventually admitted, as well as to individuals that are registered for an apprenticeship level that is cancelled. Full refunds, except for the Apprentice Evaluation Fee, will be given to individuals that are deemed ineligible for an apprenticeship level. Individuals that are registered for an apprenticeship level and choose to withdraw must notify KPU of their intention to withdraw. Withdrawals are subject to refunds and fee adjustments, according to the timing of notification of withdrawal:

Withdrawal Notification	Tuition Fee Refund
42 days or more prior to the start of class	95%
41 to 21 days prior to the start of the class	50%
20 to 15 days prior to the start of the class	25%
14 days or less prior to the start of class	0%

<sup>1</sup> A student who withdraws from an apprenticeship level within 14 days of the start of classes is not entitled to a refund of the apprentice evaluation fee or tuition; however, student fees and student association fees will be refunded until the end of the first week of classes.

## Sponsored Students

Students whose fees are being paid by a sponsoring agency must complete the Apprenticeship Registration Form and submit it to Apprentice Services for registration processing. Sponsored students are responsible for all tuition fees; liability will be removed once the Apprenticeship Registration Form and Letter of Authorization are

received. For additional information consult Apprentice Services ([kpu.ca/apprentice](http://www.kpu.ca/apprentice) (<http://www.kpu.ca/apprentice/>)).

## Fee Deferrals

Students seeking a fee deferral should contact Student Awards and Financial Assistance ([kpu.ca/awards](http://www.kpu.ca/awards/) (<http://www.kpu.ca/awards/>)). Once a fee deferral has been approved, students must complete the Apprenticeship Registration Form and submit it to Apprentice Services for registration processing.

## Withdrawing

Students may withdraw from an apprenticeship level until the mid-point of the course. To officially withdraw, a student must inform KPU, either via the online registration system or by submitting a completed withdrawal form to Apprentice Services or Student Enrollment Services. A student who stops attending class but does not officially withdraw by the deadline will be assigned a grade based on the work completed in the level. All withdrawals are subject to the Refunds and Fee Adjustment Rules.

## Apprenticeship Grades and Records

Starting in Fall 2014, apprenticeship grades are recorded on the University transcript using percentages. Grade point values are assigned to distinct ranges of percentage grades as follows:

### Apprenticeship Grading System

Percentage Grade	Grade Points
90-100	4.33
85-89	4.00
80-84	3.67
76-79	3.33
72-75	3.00
68-71	2.67
64-67	2.33
60-63	2.00
56-59	1.67
50-55	1.00
0-49	0.00
W	n/a (Withdrawn)

The Apprenticeship Grading System can only be used for reporting outcomes of apprenticeship levels. For reference purposes, a letter grade can be calculated by converting the percentage grade to a letter grade using the Grading System defined in Policy AC4, Student Evaluation and Grading Policy (<http://www.kpu.ca/policies/>).

## Industry Training Authority Reporting

Apprenticeship level outcomes are reported to the Industry Training Authority (ITA). Depending on the trade and level, outcomes reported on the KPU transcript may include Standard Level Exam results.

## Apprenticeship in Arborist Technician

## Description

Arborists manage and care for the trees in our urban environment. The arborist technician is the first of three sequential trades credentials in arboriculture. The arborist technician job focuses on work conducted from the ground and in support of the climbing arborist (second credential).

Arborist Technician Apprenticeship combines on-the-job training and classroom learning. An apprenticeship is established when an apprentice obtains an ITA Identification Number and registers their apprenticeship and sponsoring employer with the Industry Training Authority (ITA). After apprentices have registered with the ITA, they can apply to register at KPU for in-class training. Apprentices may apply to the ITA to recognize prior work based training hours. Refer to [www.itabc.ca](http://www.itabc.ca) (<http://www.itabc.ca>) for information. Arborist Technician Apprentices attend 8-weeks of in-class and applied technical training at the KPU Langley Campus.

The Arborist Technician program was established by arboriculture subject matter experts and the BC Industry Training Authority. Topics include tree and shrub identification, rigging and climbing, pruning, planting, falling, equipment use, and safe work practices. The curriculum used for technical training has been developed and approved by the arboriculture industry.

Journeypersons in arboriculture are in demand. Certified arborist technicians work in municipal parks departments, school boards, golf courses and for private arboriculture companies.

### Training Schedules

KPU apprentice training schedules and waitlists are published on Kwantlen Course Search (<http://kpu.ca/registration/timetables/>). Additional apprenticeship training opportunities are listed on Trades Training BC (<https://www.tradetrainingbc.ca/>); this is the hub for BC's Public Trades Training Programs & Services.

### Costs

In addition to applicable tuition fees, students require the following:

- textbooks (Available at the Kwantlen Polytechnic University bookstore at the start of classes)
- school supplies
- safety footwear (in conformance with WorkSafeBC regulations)

- rain gear and outdoor work wear including work gloves
- professional quality hand held bypass pruners
- field trips
- travel
- accommodation and food

## Financial Supports for Apprentices

Apprentices may be eligible for financial support for the in-class portion of their training through the EPBC Apprentice Program Financial Supports. Application to this program must be made four to six weeks prior to the start of technical training. Information is available through WorkBC.

Apprentices must apply separately for Employment Insurance (EI) Benefits no later than the last week of work, or during the first week of training, or they will not be eligible to receive EPBC Apprentice Program Financial Supports. EI information can be obtained by visiting Service Canada.

The Canada Apprentice Loan is an initiative of the Government of Canada. As of January 2015, apprentices can apply for up to \$4,000 in interest-free loans per period of in-school technical training. Information is available at the Canada Apprentice Loan Service Centre.

## Student Profile

Students interested in the Arborist Technician apprenticeship program will have a strong desire for hands-on outdoor work, enjoy working in nature and with living things, and be interested in learning about the trees in ecosystems they work in. Individuals with allergies to dust, pollen or plant products, or specific chemicals should be aware of the potential impact on their health. Physical fitness and a healthy back are generally required for a successful career in arboriculture. Apprentices may work with plant protection products.

Apprentices in the practical Arborist Technician Apprenticeship program typically have some work experience or are interested in working in number of arboriculture enterprises. For example, they may be working for arboriculture companies, golf courses, municipal parks, school boards, and landscape maintenance or construction companies.

## Requirements

### General Prerequisites

The following requirements apply:

- Completed KPU Apprentice Registration (<http://kpu.ca/trades/apprenticeship-registration/>)
- Active apprentice registration in the BC Apprenticeship system.
- Valid Trade Worker Identification number from the Industry Training Authority (ITA-ID). If you do not have an ITA-ID, you will need to complete an apprenticeship registration form through the ITA ([www.itabc.ca](http://www.itabc.ca)) prior to enrolling. To determine your eligibility please consult with the Industry Training Authority.
- Grade 10 or equivalent, including English 10, Math 10 and Science 10 is recommended

Note: International student enrollment requires approval of the Dean.

## Curricular Requirements

Note: AARB courses are assessed Tuition Category 2.b.2 tuition and fees for domestic students. KPU Tech does not permit students to register in Apprenticeship Levels out of sequence.

Curricular requirements are established by the Arborist Technician Program of the ITA. Details are available on the Arborist Technician webpage at [itabc.ca](http://www.itabc.ca) (<http://www.itabc.ca>)

Code	Title	Credits
AARB 1010	Arborist Technician	
AARB 1011	The Safety Conscious Arborist (A1,A4-A6,H1-H4)	
AARB 1012	Plant Identification (D1, D2)	
AARB 1013	Biology, Pruning & Planting (D3-D6)	
AARB 1014	Falling and Bucking (E1-E8)	
AARB 1015	Rigging and Climbing (F1-F4, G1)	
AARB 1016	Tools and Equipment (B1-B4, C1-C4)	

## Credential Awarded

Upon successful completion of an apprentice level, KPU will report your technical training completion information to the Industry Trade Authority (ITA) in order for the ITA to determine credit towards your designated apprenticeship.

## Courses

### AARB 1010 0 credits

#### Arborist Technician

Apprentices will study and practice the skills required to become a successful arborist technician. The arborist technician works primarily from the ground and supports climbing arborists and field arborists. They will practice using larger equipment such as chippers and stump cutters and will learn to work around bucket trucks. Apprentices will work with chainsaws. They will learn basic rigging techniques and be introduced to climbing equipment. Apprentices will begin to develop plant identification skills and will prune a variety of smaller trees, shrubs, vines, and groundcovers.

Level: VO

Prerequisite(s): 1. Valid Trade Worker ID Number (ITA ID #) 2. Active apprentice registration in the BC Apprenticeship system 3. Class 5 Driver's license 4. English 10 or better preferred 5. Additional requirements mandated by the Industry Training Authority may be required, contact Apprenticeship Services for information

**AARB 1021 0 credits****Tree Identification**

A Climbing Arborist has a working knowledge of a variety of different tree species and can identify them using a variety of methodologies. Apprentices will identify a variety of tree species common to British Columbia using several different methodologies. Apprentices will describe the morphological characteristics of a variety of common trees, including buds, leaf scar, stems, bark, inflorescences, leaf arrangement and morphology, and growth habit. The apprentice will also select appropriate trees for planting on site conditions and assess the trees prior to installation. (Lines D7, D13)

Level: VO

Attributes: F2B2 (p. 521), SCIH (p. 521)

**AARB 1022 0 credits****Tree Assessment**

Climbing Arborists occasionally assess options and apply appropriate actions to solve abiotic disorders of trees in a safe and effective manner. The apprentice will be able to assess trees for common abiotic tree disorders, including assessment of soils and tree structural conditions. The apprentice will apply basic actions such as pruning, wound tracing and treatments to mitigate abiotic tree disorders. (Lines D7, D10)

Level: VO

Attributes: F2B2 (p. 521), SCIH (p. 521)

**AARB 1023 0 credits****Tree Disease Identification**

The Climbing Arborist apprentice will identify and diagnose common woody plant pests and diseases in British Columbia. The apprentice will select and install structural supports in trees to reduce tree failure, reduce tree hazards, and improve structure for tree restoration purposes., according to Industry standards. (Lines D8, D9, D11, D14)

Level: VO

Attributes: F2B2 (p. 521), SCIH (p. 521)

**AARB 1024 0 credits****Pruning, Planning and Risk**

The Climbing Arborist must understand factors and associated risks influencing the safe execution of the job and to develop safe procedures. The apprentice will learn to identify and understand all factors and associated risks influencing the safe execution of the job. The apprentice will learn to develop and communicate a safe job plan. The apprentice will prune a wide variety of trees while using appropriate techniques and tools. (Lines I1,2,3, D12)

Level: VO

Attributes: F2B2 (p. 521), SCIH (p. 521)

**AARB 1025 0 credits****Rigging and Regulations**

Climbing Arborists must to know the legislation and regulations that pertain to their work on to the job site. The apprentice will use rigging techniques to remove large trees or portions of trees in confined locations or when surrounded by obstacles with a low impact focus, according to Industry standards and the authorities having jurisdiction. The apprentice will safely use various cutting techniques in aerial situations to remove tree parts. (Lines F5,6, A5,6)

Level: VO

Attributes: F2B2 (p. 521), SCIH (p. 521)

**AARB 1026 0 credits****Climbing, Planning and Risk**

Climbing Arborists will regularly assess the work site for a variety of risks including specific ground risks, tree risks, and weather risks. Apprentices will formulate and communicate risk management plans. They will learn to select appropriate climbing equipment and inspect it for safety. (Lines A5, A6, I1,2,3,D12,G2-5)

Level: VO

Attributes: F2B2 (p. 521), SCIH (p. 521)

**AARB 1028 0 credits****Climbing Arborist CoQ Final Exam**

## Description

In BC, an individual can become certified as an Automotive Service Technician by completing the Automotive Service Technician apprentice program. Apprenticeship programs are designed to provide students the full scope of knowledge and applied skills necessary to perform the

occupation. Apprentices have an employer to sponsor them and are registered with the Industry Training Authority (<https://www.itabc.ca/>) (ITA).

KPU delivers in-school technical training for Automotive Service Technician apprenticeship levels 1, 2, 3 and 4. The in-school technical training varies for each level and is 6 to 7 weeks in duration. Upon completion of levels 1, 2 and 3 apprentices with sufficient work-based training hours will be eligible to write the Certificate of Qualification (CoQ) exam. Additional information is available at: [kpu.ca/trades/auto](http://www.kpu.ca/trades/auto) (<http://www.kpu.ca/trades/auto/>).

The pathway to becoming a certified Automotive Service Technician generally takes 4 years to complete the in-school technical training and work-based hours. Apprentices will be eligible to write the Red Seal Inter-provincial Examination upon successful completion of all in-school technical training and 6000 work-based hours. The Red Seal endorsement will be awarded upon completion of all requirements and is recognized in all jurisdictions across Canada; additional information is at: [red-seal.ca](http://www.red-seal.ca) (<http://www.red-seal.ca/w.2lc.4m.2-eng.html>).

## Training Schedules

KPU apprentice training schedules and waitlists are published on Kwantlen Course Search (<http://kpu.ca/registration/timetables/>). Additional apprenticeship training opportunities are listed on Trades Training BC (<https://www.tradetrainingbc.ca/>); this is the hub for BC's Public Trades Training Programs & Services.

## Financial Supports for Apprentices

Apprentices may be eligible for financial support for the in-class portion of their training through the EPBC Apprentice Program Financial Supports. Application to this program must be made four to six weeks prior to the start of technical training. Information is available through WorkBC (<https://www.workbc.ca/Employment-Services/Apprenticeship-Training-Supports/Apprenticeship-Training-Supports.aspx>).

Apprentices must apply separately for Employment Insurance (EI) Benefits no later than the last week of work, or during the first week of training, or they will not be eligible to receive EPBC Apprentice Program Financial Supports. EI information can be obtained by visiting Service Canada (<https://www1.canada.ca/en/esdc/service-canada.html>).

The Canada Apprentice Loan is an initiative of the Government of Canada. As of January 2015, apprentices can apply for up to \$4,000 in interest-free loans per period of in-school technical training. Information is available at the Canada Apprentice Loan Service Centre (<https://www.pca-cal.ca/en/Home/>).

## Requirements

### General Prerequisites

The following requirements apply:

- Completed KPU Apprentice Registration (<http://kpu.ca/trades/apprenticeship-registration/>)
- Active apprentice registration in the BC Apprenticeship system.
- Valid Trade Worker Identification number from the Industry Training Authority (ITA-ID). If you do not have an ITA-ID, you will need to complete an apprenticeship registration form through the ITA ([www.itabc.ca](http://www.itabc.ca)) (<http://www.itabc.ca>) prior to enrolling (Level 1 through to 4). To determine your eligibility please consult with the Industry Training Authority.

Note: International student enrollment requires approval of the Dean.

## Curricular Requirements

Note: KPU Tech does not permit students to register in Apprenticeship Levels out of sequence.

Code	Title	Credits

## Other Information

### Special Equipment

Students will require appropriate steel-toed safety shoes or boots and safety glasses.

## Credential Awarded

KPU will report your in-school technical training completion information to the Industry Training Authority (ITA) in order for the ITA to determine credit towards your designated apprenticeship.

## Courses

### AAST 1010 0 credits

#### Automotive Service Level 1

In this level, apprentices will complete the learning objectives as defined in the Industry Training Authority Program Outline (April 2013) for Automotive Service Technician 1. Topics include: Workplace Safety, Employability Skills, Tools and Equipment, General Automotive Maintenance, General Automotive Practices, Basic Electrical Systems, Brake Systems, Steering Systems, and Suspension Systems.  
Level: VO

Prerequisite(s): 1. Valid Trade Worker ID Number (ITA ID #) 2. Active apprentice registration in the BC Apprenticeship system 3. Additional requirements mandated by the Industry Training Authority may be required, contact Apprenticeship Services for information

### AAST 1020 0 credits

#### Automotive Service Level 2

In this level, apprentices will complete the learning objectives as defined in the Industry Training Authority Program Outline (April 2013) for Automotive Service Technician 2. Topics include: Advanced Electrical Systems, Heating, Ventilation and Air Conditioning Systems, Engines, Engine Support Systems, and Hybrid Vehicle Safety. Employment Insurance (EI) Eligibility Provincial program financial supports must be applied for online through the Apprentice Online Portal at [apprenticeonline.gov.bc.ca](http://apprenticeonline.gov.bc.ca). It is recommended that apprentices apply for these supports four weeks in advance of the start of their technical training and application must be made no later than the first day of technical training.  
Level: VO

Prerequisite(s): 1. Valid Trade Worker ID Number (ITA ID #) 2. Active apprentice registration in the BC Apprenticeship system 3. AST Foundation or Level 1 Technical Training 4. AST Level 1 Certificate of Qualification and Certificate of Apprenticeship 5. Additional requirements mandated by the Industry Training Authority may be required, contact Apprenticeship Services for information

**AAST 1030 0 credits****Automotive Service Level 3**

In this level, apprentices will complete the learning objectives as defined in the Industry Training Authority Program Outline (April 2013) for Automotive Service Technician 3. Topics include: Standard and Electronic Ignition Systems, Fuel Systems, Emission Control Systems, and Electronic Engine Controls. Employment Insurance (EI) Eligibility Provincial program financial supports must be applied for online through the Apprentice Online Portal at [apprenticeonline.gov.bc.ca](http://apprenticeonline.gov.bc.ca). It is recommended that apprentices apply for these supports four weeks in advance of the start of their technical training and application must be made no later than the first day of technical training.

Level: VO

Prerequisite(s): 1. Valid Trade Worker ID Number (ITA ID #) 2. Active apprentice registration in the BC Apprenticeship system 3. AST Foundation or Level 1 Technical Training and Level 2 Technical Training 4. AST Level 2 Certificate of Qualification and Certificate of Apprenticeship 5. Additional requirements mandated by the Industry Training Authority may be required, contact Apprenticeship Services for information.

**AAST 1040 0 credits****Automotive Service Level 4**

In this level, apprentices will complete the learning objectives as defined in the Industry Training Authority Program Outline (May 2009) for Automotive Service Technician. Topics include: Clutches, Standard Transmissions/Transaxles, Manual Overdrive, Test and Service Transfer Cases, Test and Service Automatic Transmissions, Air Care Program, Test and Service Drive Lines, and Test and Service Drive Axles and Differentials.

Level: VO

Prerequisite(s): 1. Valid Trade Worker ID Number (ITA ID #) 2. Active apprentice registration in the BC Apprenticeship system 3. AST Foundation or Level 1, 2 & 3 Technical Training 4. AST Level 1, 2 & 3 Certificate of Qualification and Certificate of Apprenticeship.

## Apprenticeship in Building Envelope Technician

**Intakes for this program have been postponed indefinitely.**

### Description

A Building Envelope Technician's job is to enclose a house from the foundation up, keeping weather out and warmth in while creating openings for windows, doors and utilities. The Building Envelope Technician program provides the skills, training and knowledge you need to become a provincially-recognized, certified tradesperson. The program gives you the skill, training and knowledge to safely install, seal, repair,

replace and remove external walls in residential homes, including wall and foundation interfaces, wall and ceiling interfaces, window and door openings, plumbing heat and electrical systems.

## Requirements

### General Prerequisites

#### Apprentices

The following requirements apply:

- Completed KPU Apprentice Registration (<http://kpu.ca/trades/apprenticeship-registration/>)
- Active apprentice registration in the BC Apprenticeship system.
- Valid Trade Worker Identification number from the Industry Training Authority (ITA-ID). If you do not have an ITA-ID, you will need to complete an apprenticeship registration form through the ITA ([www.itabc.ca](http://www.itabc.ca) (<https://www.itabc.ca/>)) prior to enrolling (Level 1 through to 4). To determine your eligibility please consult with the Industry Training Authority.

#### Non-Apprentices

- Successful completion of English 11 (or equivalent)
- Successful completion of Mathematics 11 (or equivalent)
- Interview
- Submission of sponsorship application

**Note:** International student Application for Admission requires approval of the Dean.

## Description

In BC, an individual can become certified as a Carpenter by completing the Carpentry apprentice program. Apprenticeship programs are designed to provide students the full scope of knowledge and applied skills necessary to perform the occupation. Apprentices have an employer to sponsor them and are registered with the Industry Training Authority (<https://www.itabc.ca/>) (ITA).

KPU delivers in-school technical training for Carpentry apprenticeship levels 1, 2, 3 and 4. The in-school technical training for each level is 6 weeks in duration (duration under review) and include an end of level examination. Additional information is available at: [kpu.ca/trades/carpentry](http://kpu.ca/trades/carpentry) (<http://kpu.ca/trades/carpentry/>).

The pathway to becoming a certified Carpenter generally takes 4 years to complete the in-school technical training and work-based training hours. Carpenter apprentices will be eligible to write the Red Seal Inter-provincial Examination upon successful completion of all in-school technical training. Red Seal endorsement will be awarded upon completion of 6480 hours of work based training and is recognized in all jurisdictions across Canada; additional information is at: [red-seal.ca](http://www.red-seal.ca/w.2lc.4m.2-eng.html) (<http://www.red-seal.ca/w.2lc.4m.2-eng.html>).

## Training Schedules

KPU apprentice training schedules and waitlists are published on Kwantlen Course Search (<http://kpu.ca/registration/timetables/>). Additional apprenticeship training opportunities are listed on Trades Training BC (<https://www.tradetrainingbc.ca/>); this is the hub for BC's Public Trades Training Programs & Services.

## Financial Supports for Apprentices

Apprentices may be eligible for financial support for the in-class portion of their training through the EPBC Apprentice Program Financial Supports. Application to this program must be made four to six weeks prior to the start of technical training. Information is available through WorkBC (<https://www.workbc.ca/Employment-Services/Apprenticeship-Training-Supports/Apprenticeship-Training-Supports.aspx>).

Apprentices must apply separately for Employment Insurance (EI) Benefits no later than the last week of work, or during the first week of training, or they will not be eligible to receive EPBC Apprentice Program Financial Supports. EI information can be obtained by visiting Service Canada (<https://www1.canada.ca/en/esdc/service-canada.html>).

The Canada Apprentice Loan is an initiative of the Government of Canada. As of January 2015, apprentices can apply for up to \$4,000 in interest-free loans per period of in-school technical training. Information is available at the Canada Apprentice Loan Service Centre (<https://www.pca-cal.ca/en/Home/>).

## Requirements

### General Prerequisites

The following requirements apply:

- Completed KPU Apprentice Registration (<http://kpu.ca/trades/apprenticeship-registration/>)

- Active apprentice registration in the BC Apprenticeship system.
- Valid Trade Worker Identification number from the Industry Training Authority (ITA-ID). If you do not have an ITA-ID, you will need to complete an apprenticeship registration form through the ITA ([www.itabc.ca](http://www.itabc.ca) (<https://www.itabc.ca/>)) prior to enrolling (Level 1 through to 4). To determine your eligibility please consult with the Industry Training Authority.

Note: International student enrollment requires approval of the Dean.

## Curricular Requirements

Note: KPU Tech does not permit students to register in Apprenticeship Levels out of sequence.

Code	Title	Credits
ACRP 1010	Carpentry Level 1	0
ACRP 1020	Carpentry Level 2	0
ACRP 1030	Carpentry Level 3	0
ACRP 1040	Carpentry Level 4	0

## Other Information

### Special Equipment

Students will require appropriate tools and safety wear in conformance with WorkSafeBC regulations that include safety glasses, steel toed boots, hard hats and hearing protection.

## Credential Awarded

KPU will report your in-school technical training completion information to the Industry Training Authority (ITA) in order for the ITA to determine credit towards your designated apprenticeship.

## Courses

ACRP 1010 0 credits

### Carpentry Level 1

In this level, apprentices will complete the learning objectives as defined in the Industry Training Authority Program Outline (November 2007) for Carpentry. Topics include: Safe work Practices, Documentation and Organizational Skills, Tools and Equipment, Survey Instruments, Site Layout, Concrete Formwork, Residential Housing, and Building Science. Level: VO

Prerequisite(s): 1. Valid Trade Worker ID Number (ITA ID #) 2. Active apprentice registration in the BC Apprenticeship system 3. Additional requirements mandated by the Industry Training Authority may be required, contact Apprenticeship Services for information.

**ACRP 1020 0 credits****Carpentry Level 2**

In this level, apprentices will complete the learning objectives as defined in the Industry Training Authority Program Outline (November 2007) for Carpentry. Topics include: Safe Work Practices, Documentation and Organizational Skills, Tools and Equipment, Survey Instruments, Rigging and Hoisting Equipment, Perform Site Layout, and Build Concrete Formwork. Employment Insurance (EI) Eligibility Provincial program financial supports must be applied for online through the Apprentice Online Portal at [apprenticeonline.gov.bc.ca](http://apprenticeonline.gov.bc.ca). It is recommended that apprentices apply for these supports four weeks in advance of the start of their technical training and application must be made no later than the first day of technical training.

Level: VO

Prerequisite(s): 1. Valid Trade Worker ID Number (ITA ID #) 2. Active apprentice registration in the BC Apprenticeship system 3. Carpentry Foundation or Level 1 Technical Training 4. Additional requirements mandated by the Industry Training Authority may be required, contact Apprenticeship Services for information.

**ACRP 1030 0 credits****Carpentry Level 3**

In this level, apprentices will complete the learning objectives as defined in the Industry Training Authority Program Outline (November 2007) for Carpentry. Topics include: Documentation and Organizational Skills, Tools and Equipment, Survey Instruments, Frame Residential Housing, Finishing Materials, and Building Science Employment Insurance (EI) Eligibility Provincial program financial supports must be applied for online through the Apprentice Online Portal at [apprenticeonline.gov.bc.ca](http://apprenticeonline.gov.bc.ca). It is recommended that apprentices apply for these supports four weeks in advance of the start of their technical training and application must be made no later than the first day of technical training

Level: VO

Prerequisite(s): 1. Valid Trade Worker ID Number (ITA ID #) 2. Active apprentice registration in the BC Apprenticeship system 3. Carpentry Foundation or Level 1 Technical Training and Level 2 Technical Training 4. Additional requirements mandated by the Industry Training Authority may be required, contact Apprenticeship Services for information.

**ACRP 1040 0 credits****Carpentry Level 4**

In this level, apprentices will complete the learning objectives as defined in the Industry Training Authority Program Outline (May 2009) for Carpentry. Topics include: Use Documentation and Organizational Skills, Use Survey Instruments, Perform Site Layout, Build Concrete Formwork, Frame Residential Housing, Apply Finishing Materials Employment Insurance (EI) Eligibility Provincial program financial supports must be applied for online through the Apprentice Online Portal at [apprenticeonline.gov.bc.ca](http://apprenticeonline.gov.bc.ca). It is recommended that apprentices apply for these supports four weeks in advance of the start of their technical training and application must be made no later than the first day of technical training.

Level: VO

Prerequisite(s): 1. Valid Trade Worker ID Number (ITA ID #) 2. Active apprentice registration in the BC Apprenticeship system 3. Carpentry Foundation or Level 1, 2 and 3 Technical Training 4. Additional requirements mandated by the Industry Training Authority may be required, contact Apprenticeship Services for information.

# Apprenticeship in Climbing Arborist

### Area of Study:

[kpu.ca/hort](http://kpu.ca/hort) (<http://kpu.ca/hort/>)

### Academic Level:

Vocational

### Credential Granted:

### Intake Type:

- Open

### Curriculum Effective Date:

02-Mar-2015

## Description

Arborists manage and care for trees in our urban environment. The Climbing Arborist program is the second of three sequential trades credentials in arboriculture. A climbing arborist's job focuses on tree work such as pruning, disease control, structural support, and tree removal.

The Climbing Arborist Apprenticeship links learning and employment by providing apprentices the opportunity to further their education, while maintaining full-time employment in the arboriculture industry. An apprenticeship is established when an employer and employee complete, sign and register an Apprentice and Sponsor Registration form with the Industry Training Authority (ITA, [www.itabc.ca](http://www.itabc.ca) (<https://www.itabc.ca/>)) Apprentices may also apply to the ITA for work-based training completed before the apprenticeship is established. Refer to [www.itabc.ca](http://www.itabc.ca) (<https://www.itabc.ca/>) for information.

Climbing Arborist apprentices attend one 8-week long technical training session at the Langley campus of KPU. Topics include aerial lift operations, tree identification, tree pests and disease management, pruning, tree support, rigging, climbing, aerial rescue, job planning, and risk assessment. The curriculum used for technical training has been developed and approved by the arboriculture industry.

Journeypersons in arboriculture are in demand. Municipal parks departments and the large private arboriculture industry sector require certified climbing arborists to fill a significant number of positions.

## Training Schedules

KPU apprentice training schedules and waitlists are published on Kwantlen Course Search (<http://kpu.ca/registration/timetables/>). Additional apprenticeship training opportunities are listed on Trades Training BC (<https://www.tradetrainingbc.ca/>); this is the hub for BC's Public Trades Training Programs & Services.

## Costs

In addition to applicable tuition fees, students will incur expenses for the following:

- textbooks
- school supplies

- safety footwear (in conformance with WorkSafeBC regulations)
- climbing gear
- rain gear
- field trips
- travel
- accommodation and food

## Financial Supports for Apprentices

Apprentices may be eligible for financial support for the in-class portion of their training through the EPBC Apprentice Program Financial Supports. Application to this program must be made four to six weeks prior to the start of technical training. Information is available through WorkBC (<https://www.workbc.ca/Employment-Services/Apprenticeship-Training-Supports/Apprenticeship-Training-Supports.aspx>).

Apprentices must apply separately for Employment Insurance (EI) Benefits no later than the last week of work, or during the first week of training, or they will not be eligible to receive EPBC Apprentice Program Financial Supports. EI information can be obtained by visiting Service Canada (<https://www1.canada.ca/en/esdc/service-canada.html>).

## Student Profile

Students interested in this apprenticeship program should have a strong desire for hands-on outdoor work, enjoy nature and living things, be concerned about the environment, and have entrepreneurial talents. Individuals with allergies to dust, pollen or plant products, or specific chemicals should be aware of the potential impact on their health. Physical fitness and a healthy back are required for a successful career in arboriculture. Apprentices may work with plant protection products.

## Practical Assessment

After completing the technical training and logging 1800 hours of work experience, an apprentice will need to complete a practical assessment to gain their Certificate of Qualification. Contact HortEducationBC for more information on the practical assessment at [www.horteducationbc.com](http://www.horteducationbc.com) (<https://horteducation.ca/>).

## Requirements

### General Prerequisites

The following requirements apply:

- Completed KPU Apprentice Registration (<http://kpu.ca/trades/apprenticeship-registration/>)
- Active apprentice registration in the BC Apprenticeship system.
- Valid Trade Worker Identification number from the Industry Training Authority (ITA-ID). If you do not have an ITA-ID, you will need to complete an apprenticeship registration form through the ITA ([www.itabc.ca](http://www.itabc.ca) (<https://www.itabc.ca/>)) prior to enrolling. To determine your eligibility please consult with the Industry Training Authority.
- Completion of Arborist Technician (p. 786)
- Grade 10 or equivalent, including English 10, Math 10 and Science 10 is recommended

Note: International student enrollment requires approval of the Dean.

## Curricular Requirements

Note: AARB courses are assessed Tuition Category 2.b.2 tuition and fees for domestic students. KPU Tech does not permit students to register in Apprenticeship Levels out of sequence.

Code	Title	Credits
AARB 1020	Climbing Arborist	

- Regulations, Safety, and Site Inspection
- Tree Identification
- Management of Pests and Diseases
- Rigging, Climbing, and Cutting Trees
- Safe Aerial Operations and Aerial Rescue

## Credential Awarded

Upon successful completion of an apprentice level, KPU will report your technical training completion information to the Industry Trade Authority (ITA) in order for the ITA to determine credit towards your designated apprenticeship.

## Courses

### AARB 1010 0 credits

#### Arborist Technician

Apprentices will study and practice the skills required to become a successful arborist technician. The arborist technician works primarily from the ground and supports climbing arborists and field arborists. They will practice using larger equipment such as chippers and stump cutters and will learn to work around bucket trucks. Apprentices will work with chainsaws. They will learn basic rigging techniques and be introduced to climbing equipment. Apprentices will begin to develop plant identification skills and will prune a variety of smaller trees, shrubs, vines, and groundcovers.

Level: VO

Prerequisite(s): 1. Valid Trade Worker ID Number (ITA ID #) 2. Active apprentice registration in the BC Apprenticeship system 3. Class 5 Driver's license 4. English 10 or better preferred 5. Additional requirements mandated by the Industry Training Authority may be required, contact Apprenticeship Services for information

Level: VO

Attributes: F2B2 (p. 521), SCIH (p. 521)

**AARB 1021 0 credits****Tree Identification**

A Climbing Arborist has a working knowledge of a variety of different tree species and can identify them using a variety of methodologies. Apprentices will identify a variety of tree species common to British Columbia using several different methodologies. Apprentices will describe the morphological characteristics of a variety of common trees, including buds, leaf scar, stems, bark, inflorescences, leaf arrangement and morphology, and growth habit. The apprentice will also select appropriate trees for planting on site conditions and assess the trees prior to installation. (Lines D7, D13)

Level: VO

Attributes: F2B2 (p. 521), SCIH (p. 521)

**AARB 1022 0 credits****Tree Assessment**

Climbing Arborists occasionally assess options and apply appropriate actions to solve abiotic disorders of trees in a safe and effective manner. The apprentice will be able to assess trees for common abiotic tree disorders, including assessment of soils and tree structural conditions. The apprentice will apply basic actions such as pruning, wound tracing and treatments to mitigate abiotic tree disorders. (Lines D7, D10)

Level: VO

Attributes: F2B2 (p. 521), SCIH (p. 521)

**AARB 1023 0 credits****Tree Disease Identification**

The Climbing Arborist apprentice will identify and diagnose common woody plant pests and diseases in British Columbia. The apprentice will select and install structural supports in trees to reduce tree failure, reduce tree hazards, and improve structure for tree restoration purposes., according to Industry standards. (Lines D8, D9, D11, D14)

Level: VO

Attributes: F2B2 (p. 521), SCIH (p. 521)

**AARB 1024 0 credits****Pruning, Planning and Risk**

The Climbing Arborist must understand factors and associated risks influencing the safe execution of the job and to develop safe procedures. The apprentice will learn to identify and understand all factors and associated risks influencing the safe execution of the job. The apprentice will learn to develop and communicate a safe job plan. The apprentice will prune a wide variety of trees while using appropriate techniques and tools. (Lines I1,2,3, D12)

Level: VO

Attributes: F2B2 (p. 521), SCIH (p. 521)

**AARB 1025 0 credits****Rigging and Regulations**

Climbing Arborists must to know the legislation and regulations that pertain to their work on to the job site. The apprentice will use rigging techniques to remove large trees or portions of trees in confined locations or when surrounded by obstacles with a low impact focus, according to Industry standards and the authorities having jurisdiction. The apprentice will safely use various cutting techniques in aerial situations to remove tree parts. (Lines F5,6, A5,6)

Level: VO

Attributes: F2B2 (p. 521), SCIH (p. 521)

**AARB 1026 0 credits****Climbing, Planning and Risk**

Climbing Arborists will regularly assess the work site for a variety of risks including specific ground risks, tree risks, and weather risks. Apprentices will formulate and communicate risk management plans. They will learn to select appropriate climbing equipment and inspect it for safety. (Lines A5, A6, I1,2,3,D12,G2-5)

Level: VO

Attributes: F2B2 (p. 521), SCIH (p. 521)

**AARB 1028 0 credits****Climbing Arborist CoQ Final Exam**

Level: VO

Attributes: F2B2 (p. 521), SCIH (p. 521)

# Apprenticeship in Construction Electrician

## At a Glance Faculty

[kpu.ca/trades](http://kpu.ca/trades) (<http://kpu.ca/trades/>)

## Description

In BC, an individual can become certified as a Construction Electrician by completing the Electrical apprentice program. Apprenticeship programs are designed to provide students the full scope of knowledge and applied skills necessary to perform the occupation. Apprentices have an

employer to sponsor them and are registered with the Industry Training Authority (<https://www.itabc.ca/>) (ITA).

KPU delivers in-school technical training for Electrical apprenticeship levels 1, 2, 3 and 4. The in-school technical training for each level is 10 weeks in duration and includes an end of level examination. Additional information is available at: [kpu.ca/trades/electrical](http://kpu.ca/trades/electrical) (<http://kpu.ca/trades/electrical/>).

The pathway to becoming a certified Construction Electrician generally takes 4 years to complete the in-school technical training and work-based training hours. Electrical apprentices will be eligible to write the Red Seal Inter-provincial Examination upon completion of all in-school technical training. Red Seal endorsement will be awarded upon completion of 6000 work-based training hours and is recognized in all jurisdictions across Canada; additional information is at: [red-seal.ca](http://www.red-seal.ca/w.2lc.4m.2-eng.html) (<http://www.red-seal.ca/w.2lc.4m.2-eng.html>).

## Training Schedules

KPU apprentice training schedules and waitlists are published on Kwantlen Course Search (<http://kpu.ca/registration/timetables/>). Additional apprenticeship training opportunities are listed on Trades Training BC (<https://www.tradestrainingbc.ca/>); this is the hub for BC's Public Trades Training Programs & Services.

## Financial Supports for Apprentices

Apprentices may be eligible for financial support for the in-class portion of their training through the EPBC Apprentice Program Financial Supports. Application to this program must be made four to six weeks prior to the start of technical training. Information is available through WorkBC (<https://www.workbc.ca/Employment-Services/Apprenticeship-Training-Supports/Apprenticeship-Training-Supports.aspx>).

Apprentices must apply separately for Employment Insurance (EI) Benefits no later than the last week of work, or during the first week of training, or they will not be eligible to receive EPBC Apprentice Program Financial Supports. EI information can be obtained by visiting Service Canada (<https://www1.canada.ca/en/esdc/service-canada.html>).

The Canada Apprentice Loan is an initiative of the Government of Canada. As of January 2015, apprentices can apply for up to \$4,000 in interest-free loans per period of in-school technical training. Information is available at the Canada Apprentice Loan Service Centre (<https://www.pca-cal.ca/en/Home/>).

## Requirements

### General Prerequisites

The following requirements apply:

- Completed KPU Apprentice Registration (<http://kpu.ca/trades/apprenticeship-registration/>)
- Active apprentice registration in the BC Apprenticeship system.
- Valid Trade Worker Identification number from the Industry Training Authority (ITA-ID). If you do not have an ITA-ID, you will need to complete an apprenticeship registration form through the ITA ([www.itabc.ca](http://www.itabc.ca) (<https://www.itabc.ca/>)) prior to enrolling (Level 1 through to 4). To determine your eligibility please consult with the Industry Training Authority.

Note: International student enrollment requires approval of the Dean.

## Apprenticeship in Landscape Horticulturist

### At a Glance

#### Faculty

[kpu.ca/science](http://kpu.ca/science) (<http://kpu.ca/science/>)

#### Area of Study:

[kpu.ca/hort](http://kpu.ca/hort/) (<http://kpu.ca/hort/>)

#### Academic Level:

Vocational

**Credential Granted:****Intake Type:**

- Open

**Curriculum Effective Date:**

01-Sep-2019

**Description**

KPU's Landscape Horticulturist Apprenticeship Training Program provides apprentices with relevant and comprehensive theoretical and practical horticulture education. Landscape Horticulturist is a Red Seal Trade in Canada. The Red Seal endorsement promotes excellence to employers, instills pride in skilled workers, and facilitates labour mobility.

Apprenticeships combine on-the-job training and classroom learning. An apprenticeship is established when an apprentice obtains a ITA Worker Number and identifies a sponsor to register an apprentice with the Industry Training Authority (ITA). After apprentices have registered with the ITA, they can begin to register at KPU for in class training. Apprentices may apply to the ITA to recognize prior work-based training hours. Refer to itabc.ca (<http://www.itabc.ca>) for information.

Landscape Horticulturist requirements are established in the Landscape Horticulturist Program Outline published by the BC Industry Training Authority. Landscape Horticulturist apprentices complete four 6-week training levels, in sequence, at the KPU Langley Campus.

Combined with their work experience, and their KPU educational experiences, Landscape Horticulturist apprentices become highly skilled and in demand journeypersons in the horticulture industry. They are employed at municipal parks departments, botanical gardens, golf courses, private landscape contractors and arboriculture companies, and as consultants throughout the province and across Canada

**Costs**

In addition to applicable tuition fees, students require the following:

- textbooks (purchased at the beginning of Level 1, 3, and 4)
- school supplies
- safety footwear (in conformance with WorkSafeBC regulations)
- rain gear and outdoor work wear including work gloves
- field trips
- travel
- accommodation and food

**Training Schedules**

KPU apprentice training schedules and waitlists are published on Kwantlen Course Search (<http://kpu.ca/registration/timetables/>). Additional apprenticeship training opportunities are listed on Trades Training BC (<https://www.tradetrainingbc.ca/>); this is the hub for BC's Public Trades Training Programs & Services.

**Financial Supports for Apprentices**

Apprentices may be eligible for financial support for the in-class portion of their training through the EPBC Apprentice Program Financial Supports. Application to this program must be made four to six weeks prior to the start of technical training. Information is available through WorkBC (<https://www.workbc.ca/Employment-Services/Apprenticeship-Training-Supports/Apprenticeship-Training-Supports.aspx>).

Apprentices must apply separately for Employment Insurance (EI) Benefits no later than the last week of work, or during the first week of training, or they will not be eligible to receive EPBC Apprentice Program Financial Supports. EI information can be obtained by visiting Service Canada (<https://www1.canada.ca/en/esdc/service-canada.html>).

The Canada Apprentice Loan is an initiative of the Government of Canada. As of January 2015, apprentices can apply for up to \$4,000 in interest-free loans per period of in-school technical training. Information is available at the Canada Apprentice Loan Service Centre (<https://www.pca-cal.ca/en/Home/>).

**Transfer from Horticulture Foundation Programs**

Graduates of KPU Horticulture Foundation programs receive credit for Levels 1 and 2 of the technical training.

**Student Profile**

Students interested in the Landscape Horticulturist apprenticeship program will have a strong desire for hands-on outdoor work, enjoy working in nature and with living things, and be interested in learning about the ecosystems they work in... Individuals with allergies to dust, pollen or plant products, or specific chemicals should be aware of the potential impact on their health. Physical fitness and a healthy back are generally required for a successful career in horticulture. Apprentices may work with plant protection products.

Apprentices in the practical Horticulture Apprenticeship program typically have some work experience or are interested in working in number of horticulture enterprises. For example, they may be working for greenhouse owners, landscape maintenance or construction companies, nurseries, golf courses, municipal parks, or school boards.

**Requirements**  
**General Prerequisites**

The following requirements apply:

- Completed KPU Apprentice Registration (<http://kpu.ca/trades/apprenticeship-registration/>)
- Active apprentice registration in the BC Apprenticeship system.
- Valid Trade Worker Identification number from the Industry Training Authority (ITA-ID). If you do not have an ITA-ID, you will need to complete an apprenticeship registration form through the ITA ([www.itabc.ca](http://www.itabc.ca) (<https://www.itabc.ca/>)) prior to enrolling (Level 1 through to 4). To determine your eligibility please consult with the Industry Training Authority.

**Note:** International student enrollment requires approval of the Dean.

**Curricular Requirements**

**Note:** KPU Tech does not permit students to register in Apprenticeship Levels out of sequence.

The ITA (<https://www.itabc.ca/>) is changing the Landscape Horticulturist Program over the period from 2018 through 2021. The Landscape Horticulturist Program Outline and Program Profile are posted on the Landscape Horticulturist webpage at itabc.ca (<https://www.itabc.ca/>) Further details will be posted here once available.

It is important for Landscape Horticulturist apprentices to be clear about which version of the program they are registered in. If you completed

Level One training before September 2018, or are not certain if you are in the Harmonized program, please contact ITA Customer Service.

## Credential Awarded

Upon successful completion of an apprentice level, KPU will report your technical training completion information to the Industry Trade Authority (ITA) in order for the ITA to determine credit towards your designated apprenticeship.

## Apprenticeship in Metal Fabrication At a Glance

## Description

In BC, an individual can become certified Metal Fabricator by completing the Metal Fabrication apprentice program. Apprenticeship programs are designed to provide students the full scope of knowledge and applied skills necessary to perform the occupation. Apprentices have an employer to sponsor them and are registered with the Industry Training Authority (<https://www.itabc.ca/>) (ITA).

KPU delivers in-school technical training for Metal Fabrication apprenticeship levels 1, 2, and 3. The in-school technical training for each level is 5 weeks in duration and includes an end of level exam. Additional information is available at: [kpu.ca/trades/metal\\_fabrication](http://kpu.ca/trades/metal_fabrication) ([http://kpu.ca/trades/metal\\_fabrication/](http://kpu.ca/trades/metal_fabrication/)).

The pathway to becoming a certified Metal Fabricator generally takes 4 years to complete the in-school technical training and work-based training hours. Metal Fabrication apprentices will be eligible to write the Red Seal Inter-provincial Examination upon completion of all in-school technical training. The Red Seal will be awarded upon completion of 6400 hours of work-based training hours and is recognized in all jurisdictions across Canada; additional information is at: [red-seal.ca](http://www.red-seal.ca/w.2lc.4m.2-eng.html) (<http://www.red-seal.ca/w.2lc.4m.2-eng.html>).

## Training Schedules

KPU apprentice training schedules and waitlists are published on Kwantlen Course Search (<http://kpu.ca/registration/timetables/>). Additional apprenticeship training opportunities are listed on Trades Training BC (<https://www.tradestrainingbc.ca/>); this is the hub for BC's Public Trades Training Programs & Services.

## Financial Supports for Apprentices

Apprentices may be eligible for financial support for the in-class portion of their training through the EPBC Apprentice Program Financial

Supports. Application to this program must be made four to six weeks prior to the start of technical training. Information is available through WorkBC (<https://www.workbc.ca/Employment-Services/Apprenticeship-Training-Supports/Apprenticeship-Training-Supports.aspx>).

Apprentices must apply separately for Employment Insurance (EI) Benefits no later than the last week of work, or during the first week of training, or they will not be eligible to receive EPBC Apprentice Program Financial Supports. EI information can be obtained by visiting Service Canada (<https://www1.canada.ca/en/esdc/service-canada.html>).

The Canada Apprentice Loan is an initiative of the Government of Canada. As of January 2015, apprentices can apply for up to \$4,000 in interest-free loans per period of in-school technical training. ### Description

In BC, an individual can become certified as a Partsperson by completing the Parts apprentice program. Apprenticeship programs are designed to provide students the full scope of knowledge and applied skills necessary to perform the occupation. Apprentices have an employer to sponsor them and are registered with the Industry Training Authority (<https://www.itabc.ca/>) (ITA).

KPU delivers in-school technical training; apprentices complete Parts & Warehousing level 1 followed by Parts apprenticeship levels 2 and 3.

The in-school technical training for each level is 3 weeks in duration. Upon completion of level 1 and level 2 apprentices with sufficient work-based training hours will be eligible to write the Certificate of Qualification (CoQ) exam. Upon completion of level 3 students will be eligible to write both the level 3 exam and Red Seal Parts exam. Additional information is available at: [kpu.ca/trades/automotive-warehousing](http://kpu.ca/trades/automotive-warehousing) (<http://kpu.ca/trades/automotive-warehousing/>).

The pathway to becoming a certified Partsperson generally takes 3 years to complete the in-school technical training and 5040 work-based training hours. Apprentices will be eligible to write the Red Seal Inter-provincial Examination upon successful completion of all in-school technical training and work-based hour requirements. The Red Seal endorsement is recognized in all jurisdictions across Canada; additional information is at: [red-seal.ca](http://www.red-seal.ca) (<http://www.red-seal.ca/w.2lc.4m.2-eng.html>).

### Training Schedules

KPU apprentice training schedules and waitlists are published on Kwantlen Course Search (<http://kpu.ca/registration/timetables/>). # Apprenticeship in Production Horticulturist

## At a Glance

### Faculty

kpu.ca/science (<http://kpu.ca/science/>)

### Area of Study:

kpu.ca/hort (<http://kpu.ca/hort/>)

### Academic Level:

Vocational

### Credential Granted:

### Intake Type:

- Open

### Curriculum Effective Date:

01-Sep-2011

**Intakes for this program have been postponed indefinitely.**

## Description

Horticulture Apprenticeship links learning and employment by providing apprentices the opportunity to further their education, while maintaining full-time employment in the horticulture industry. An apprenticeship is established when an employer and employee complete, sign and register an apprentice, and sponsor registration form with the Industry Training Authority (ITA). Apprentices may also apply to the ITA for work-based training completed before the apprenticeship was established. Refer to <http://www.itabc.ca> (<https://www.itabc.ca/>) for information.

The Production Horticulture apprentice must complete three technical training levels. Typically one level is completed each year, but depending on apprentice/student interest and the technical training schedule the opportunity exists to complete levels one and two in a single year.

The first two levels of the program include fundamental horticulture knowledge and skills. For level one and level two, apprentices attend six-weeks of technical training sessions for theoretical and practical instruction at the Langley Campus of KPU. The instruction in level three focuses on Production Horticulture. During level three, apprentices attend an eight-week technical training session for theoretical and practical instruction at the Langley Campus of KPU.

The curriculum used for technical training has been developed and approved by the horticulture industry. It provides relevant, up-to-date information, and is based on recent technological advances in the horticulture field.

Journeypersons in production horticulture are in demand. Municipal parks departments and nurseries often list a journeyperson certification as a minimum requirement when hiring horticulturists.

## Training Schedules

KPU apprentice training schedules and waitlists are published on Kwantlen Course Search (<http://kpu.ca/registration/timetables/>). Additional apprenticeship training opportunities are listed on Trades

Training BC (<https://www.tradetrainingbc.ca/>); this is the hub for BC's Public Trades Training Programs & Services.

## Costs

In addition to applicable tuition fees, students require the following:

- textbooks (purchased at the beginning of Level 1 and 3)
- school supplies
- safety footwear (in conformance with WorkSafeBC regulations)
- rain gear
- field trips
- travel
- accommodation and food

## Financial Supports for Apprentices

Apprentices may be eligible for financial support for the in-class portion of their training through the EPBC Apprentice Program Financial Supports. Application to this program must be made four to six weeks prior to the start of technical training. Information is available through WorkBC (<https://www.workbc.ca/Employment-Services/Apprenticeship-Training-Supports/Apprenticeship-Training-Supports.aspx>).

Apprentices must apply separately for Employment Insurance (EI) Benefits no later than the last week of work, or during the first week of training, or they will not be eligible to receive EPBC Apprentice Program Financial Supports. EI information can be obtained by visiting Service Canada (<https://www1.canada.ca/en/esdc/service-canada.html>).

## Transfer from Horticulture Foundation Programs

Graduates of Horticulture Foundation programs receive credit for Levels 1 and 2 of the technical training.

## Student Profile

Students interested in the apprenticeship should have a strong desire for hands-on outdoor work, enjoy nature and living things, be concerned about the environment, and have entrepreneurial talents. Individuals with allergies to dust, pollen or plant products, or specific chemicals should be aware of the potential impact on their health. Physical fitness and a healthy back are generally required for a successful career in horticulture. Apprentices may work with plant protection products.

Apprentices in the practical Horticulture Apprenticeship program typically come from a number of horticulture enterprises. For example, they may be working for greenhouse owners, nurseries, municipal parks, or school boards.

## Requirements

### General Prerequisites

The following requirements apply:

- Completed KPU Apprentice Registration (<http://kpu.ca/trades/apprenticeship-registration/>)
- Active apprentice registration in the BC Apprenticeship system.
- Valid Trade Worker Identification number from the Industry Training Authority (ITA-ID). If you do not have an ITA-ID, you will need to complete an apprenticeship registration form through the ITA ([www.itabc.ca](http://www.itabc.ca)) (<https://www.itabc.ca/>) prior to enrolling (Level 1 through to 3). To determine your eligibility please consult with the Industry Training Authority.

Note: International student enrollment requires approval of the Dean.

## Curricular Requirements

This program is designed to produce journeypersons with good theoretical and practical training, and experience in the horticulture industry.

Note: KPU does not permit students to register in Apprenticeship Levels out of sequence.

AHPR 1030	Production Horticulture Apprentice Level 3	0

## Credential Awarded

Upon successful completion of an apprentice level, KPU will report your technical training completion information to the Industry Trade Authority (ITA) in order for the ITA to determine credit towards your designated apprenticeship.

## Courses

### AHPR 1030 0 credits

#### Production Horticulture Apprentice Level 3

Apprentices begin to specialize in nursery production. They will practice plant propagation techniques and study container nursery production. Apprentices will continue to develop their knowledge of plants and plant adaptations. They will study of the management of soils and media in the nursery. Apprentices will study pest management in nurseries and review the application of phytosanitary processes and systems. Apprentices will be introduced to environmental control systems used in nursery production. Apprentices continue their specialization with the study of field nursery production. Apprentices will continue to develop their knowledge of plants and plant adaptations. They will study the application of integrated pest management programming to the nursery and review the implementation phytosanitary certification. Apprentices will be introduced to irrigation and drainage requirements for nurseries and the installation and maintenance of those systems. They will review the business operations of production nurseries.

Level: VO

Prerequisite(s): 1. Valid Trade Worker ID Number (ITA ID #) 2. Active apprentice registration in the BC Apprenticeship system 3. Level 1 and Level 2 Technical Training 4. Additional requirements mandated by the Industry Training Authority may be required, contact Apprenticeship Services for information

#### Intake Type:

- Open

## Description

In BC, an individual can become certified Welder by completing the Welder apprentice program. Apprenticeship programs are designed to provide students the full scope of knowledge and applied skills necessary to perform the occupation. Apprentices have an employer to sponsor them and are registered with the Industry Training Authority (ITA).

KPU delivers in-school technical training for Welder apprenticeship levels 1, 2, 3 and Specialty Metals Endorsement program. The in-school technical training for level 1, 2, and 3 are 8 weeks in duration. Levels 1 and 2 include an end of level Certificate of Completion examination; level 3 includes the Red Seal examination. The Specialty Metals Endorsement program is for apprentices that have a Red Seal and is 5 weeks in duration. Additional information is available at: [kpu.ca/trades/welding](http://www.kpu.ca/trades/welding) (<http://www.kpu.ca/trades/welding/>).

The pathway to becoming a certified Welder generally takes 4 years to complete the in-school technical training and 4500 work-based training hours. Apprentices will be eligible to write the Red Seal Inter-provincial Examination upon successful completion of Level 3 in-school technical training and work-based hour requirements. The Red Seal endorsement is recognized in all jurisdictions across Canada; additional information is at: [red-seal.ca](http://www.red-seal.ca/w.2lc.4m.2-eng.html) (<http://www.red-seal.ca/w.2lc.4m.2-eng.html>).

## Apprenticeship and Modular Pathways

There are two pathways for progression beyond the Welding Foundation/ Welder C level. Students with an employer sponsor will progress to Welder Apprentice Level 3, followed by the Specialty Metals

Endorsement. Students without an employer sponsor will progress to Welder Level B followed by Welder Level A.

## Training Schedules

KPU apprentice training schedules and waitlists are published on Kwantlen Course Search (<http://kpu.ca/registration/timetables/>). Additional apprenticeship training opportunities are listed on Trades Training BC (<https://www.tradestrainingbc.ca/>); this is the hub for BC's Public Trades Training Programs & Services.

## Financial Supports for Apprentices

Apprentices may be eligible for financial support for the in-class portion of their training through the EPBC Apprentice Program Financial Supports. Application to this program must be made four to six weeks prior to the start of technical training. Information is available through WorkBC (<https://www.workbc.ca/Employment-Services/Apprenticeship-Training-Supports/Apprenticeship-Training-Supports.aspx>).

Apprentices must apply separately for Employment Insurance (EI) Benefits no later than the last week of work, or during the first week of training, or they will not be eligible to receive EPBC Apprentice Program Financial Supports. EI information can be obtained by visiting Service Canada (<https://www1.canada.ca/en/esdc/service-canada.html>).

The Canada Apprentice Loan is an initiative of the Government of Canada. As of January 2015, apprentices can apply for up to \$4,000 in interest-free loans per period of in-school technical training. Information is available at the Canada Apprentice Loan Service Centre (<https://www.pca-cal.ca/en/Home/>).

## Requirements

### General Prerequisites

The following requirements apply:

- Completed KPU Apprentice Registration (<http://kpu.ca/trades/apprenticeship-registration/>)
- Active apprentice registration in the BC Apprenticeship system.
- Valid Trade Worker Identification number from the Industry Training Authority (ITA-ID). If you do not have an ITA-ID, you will need to complete an apprenticeship registration form through the ITA ([www.itabc.ca](http://www.itabc.ca)) (<https://www.itabc.ca/>) prior to enrolling (Level 1 through to 4). To determine your eligibility please consult with the Industry Training Authority.

**Note:** International student enrollment requires approval of the Dean.

## Curricular Requirements

**Note:** KPU Tech does not permit students to register in Apprenticeship Levels out of sequence.

Code	Title	Credits
AWLD 1010	Welding: Apprenticeship Technical Training Level 1	0
AWLD 1020	Welding: Apprenticeship Technical Training Level 2	0
AWLD 1030	Welding: Apprenticeship Technical Training Level 3	0

## Specialty Metals Endorsement

Details on the Special Metals Endorsement are currently under development. For up-to-date information, please see the Welding

information page ([kpu.ca/trades/welding](http://www.kpu.ca/trades/welding/) (<http://www.kpu.ca/trades/welding/>)).

## Credential Awarded

KPU will report your in-school technical training completion information to the Industry Training Authority (ITA) in order for the ITA to determine credit towards your designated apprenticeship.

## Courses

### AWLD 1010 0 credits

#### Welding: Apprenticeship Technical Training Level 1

In this level, apprentices will complete the learning objectives as defined in the Industry Training Authority Program Outline (July 2012) for Welder. Topics include: Occupational Skills, Oxy-Fuel Cutting and Gouging Processes, Fusion and Braze (TB) Using the Oxy-Fuel (OFW), Shielded Metal Arc Welding (SMAW) Welding Drawings, Electric Arc Cutting, Gouging and Related Processes, and Semi-Automatic Welding. Employment Insurance (EI) Eligibility Provincial program financial supports must be applied for online through the Apprentice Online Portal at [apprenticeonline.gov.bc.ca](http://apprenticeonline.gov.bc.ca). It is recommended that apprentices apply for these supports four weeks in advance of the start of their technical training and application must be made no later than the first day of technical training.

Level: VO

Prerequisite(s): 1. Valid Trade Worker ID Number (ITA ID #) 2. Active apprentice registration in the BC Apprenticeship system 3. Additional requirements mandated by the Industry Training Authority may be required, contact Apprenticeship Services for information.

### AWLD 1020 0 credits

#### Welding: Apprenticeship Technical Training Level 2

In this level, apprentices will complete the learning objectives as defined in the Industry Training Authority Program Outline (July 2012) for Welder. Topics include: Occupational Skills, Shielded Metal Arc Welding (SMAW), Semi-Automatic Welding, Basic Metallurgy, Welding Drawings, Layout and Fabricate Components, and Submerged Arc Welding (SAW). Employment Insurance (EI) Eligibility Provincial program financial supports must be applied for online through the Apprentice Online Portal at [apprenticeonline.gov.bc.ca](http://apprenticeonline.gov.bc.ca). It is recommended that apprentices apply for these supports four weeks in advance of the start of their technical training and application must be made no later than the first day of technical training

Level: VO

Prerequisite(s): 1. Valid Trade Worker ID Number (ITA ID #) 2. Active apprentice registration in the BC Apprenticeship system 3. Welding Foundation or Level 1 Technical Training 4. Additional requirements mandated by the Industry Training Authority may be required, contact Apprenticeship Services for information.

**AWLD 1030 0 credits**

**Welding: Apprenticeship Technical Training Level 3**

In this level, apprentices will complete the learning objectives as defined in the Industry Training Authority Program Outline (July 2012) for Welder. Topics include: Shielded Metal Arc Welding (SMAW), Semi-Automatic Welding, Basic Metallurgy, Gas Tungsten Arc Welding (GTAW), Welding Drawings, Layout and Fabricate Components, Quality Control and Inspection, Standards, Codes, Specifications and Welder Qualifications, and Specialized Processes. Employment Insurance (EI) Eligibility: Provincial program financial supports must be applied for online through the Apprentice Online Portal at [apprenticeonline.gov.bc.ca](http://apprenticeonline.gov.bc.ca). It is recommended that apprentices apply for these supports four weeks in advance of the start of their technical training and application must be made no later than the first day of technical training

Level: VO

Prerequisite(s): 1. Valid Trade Worker ID Number (ITA ID #) 2. Active apprentice registration in the BC Apprenticeship system 3. Welding Foundation or Level 1 Technical Training and Level 2 Technical Training 4. Additional requirements mandated by the Industry Training Authority may be required, contact Apprenticeship Services for information.

# PREVIOUS UNIVERSITY CALENDARS

2000-2001

Home (<https://www.kpu.ca/calendar/archive/calendar2000/programs.html>)

Previous versions of the University Calendar are made available for reference purposes, particularly for those students fulfilling curricular requirements for graduation from a previous year's University Calendar. For up-to-date course information, always refer to the course listings in the current University Calendar (p. 520). Full printed copies of previous University Calendars are available at the KPU Library (<http://www.kpu.ca/library/>).
